Beginning in Tax Year 2022, this preference allows Delaware residents two deductions from personal income tax. The first is a deduction from taxable income of up to $1,000 for contributions (or $2,000 for joint filers) to an account established and maintained pursuant to the DE529 Education Savings Plan as set forth in subchapter XII of Chapter 34 of Title 14. The deduction does not apply to individuals with a federal AGI greater than $100,000 or $200,000 for joint returns. The second is a deduction from taxable income of up to $5,000 for contributions to an account established and maintained pursuant to the Delaware Achieving a Better Life Experience (ABLE) Program as set forth in Chapter 96A of Title 16.

3. Estimated Revenue Loss-[11]
FY 25: Negligible
FY 26: Negligible

4. Assessment
One of the main criticisms of 529-related tax preferences is that they mainly benefit the wealthy. Data from 11 states show that 90% of the contributions to 529 plans are from households with income over $100,000. This provision has a means test to help ensure benefits of this preference are given to those with incomes below $100,000, or $200,000 for joint returns.

Given the means test on income and relatively low subtraction for qualifiable contributions, the potential incentive effect of the 529 and ABLE deductions on boosting savings may be limited. For example, consider a single filer household with a taxable income of $50,000, contributing the maximum allowable amount of $1,000 to a 529 Savings Plan. At a 5.5% marginal tax rate, the single filer would reduce their tax liability by $55, begging the question of whether a $55 benefit would act as a sufficient incentive to contribute an additional $945 that they otherwise would not have. The relatively modest nature of this tax preference suggests that the benefit provided may act more as a reward for existing activity rather than an incentive for new or increased contributions.

[11] The estimates are from the fiscal note for HB 145 with HA 4 of the 151st General Assembly.

ABLE plans, which provide similar tax-free growth for costs for caring for individuals with disabilities, are relatively new. In an environment of rapidly increasing costs, similar to higher education, providing tax benefits for individuals to save can help ease the burden.

The purpose of 529 and ABLE accounts (at the federal level) is to allow the funds to be deposited post-tax and thereafter to grow and later be distributed tax free, similar to a Roth IRA, as long as the distributions are made to pay qualified educational expenses. Therefore, contributions to these accounts are not deductible for income tax purposes at the federal level, similar to contributions to a Roth IRA, so the question then is whether as a policy matter, contributions to these accounts should be deductible for state income tax purposes.

5. Inadvertent Effects

Individuals and households taking this subtraction may already be contributing to a 529 or ABLE Savings Plan. In these cases, the 529 and ABLE deductions act as a bonus rather than an incentive.

On both a federal and state level, the earnings as well as qualified distributions are tax deductible. When combined with the Delaware contribution deduction, the impact of all the preferences may be significant and arguably provide a double benefit.

## 1.21 Organ and Bone Marrow Transplantation Tax Credit

1. Statutory Provision

Title 30, Delaware Code, Chapter 20E, §§20E-101 – 20E-104

2. Description

Beginning in tax year 2023, this preference allows Delaware taxpayers to claim a refundable credit of up to $10,000 for unreimbursed medical expenses and lost wages related to a donation of an organ or bone marrow by the taxpayer or dependent. In addition, the provision provides a refundable tax credit to Delaware employers who provide employees who donate an organ or bone marrow with paid time off for the purpose of the transplantation in the amount of 25% of the employee's gross wages for a period of up to 30 days of missed work for each donation; this employer credit will be effective once the Division of Revenue has implemented the corporate income tax release of the Integrated Revenue Administration System. Neither the individual tax credit

nor the employer tax credit extends to lost wages or gross wages for traditional paid time off. The tax credit must be claimed in the taxable year in which the organ or bone marrow transplantation occurs.

3. Estimated Revenue Loss[12]
FY 25: Negligible
FY 26: Negligible

4. Assessment
The purpose of this tax credit is to incentivize Delaware taxpayers to donate organs and bone marrow for transplantation and for Delaware employers to grant paid time off to employees who donate organs and bone marrow. There is mixed historical evidence linking tax incentives to increased donation rates, so the effectiveness this tax credit will have at increasing donations remains unknown.

Additionally, the tax credit applies to unreimbursed medical expenses, travel expenses, lodging expenses, and lost wages related to organ or bone marrow donation, but the credit does not apply to childcare or eldercare expenses. According to the Health and Human Services Department, childcare and eldercare costs are estimated to range from around $1,680-$3,000 during the typical 4–6-week post-surgical recovery time. If the goal is to incentivize donation by removing the financial barriers related to donation, then the credit might be more effective by expanding the scope of reimbursable expenses.

Providing reimbursements through the tax system generally delays the payment until tax filing season. A living donor with unreimbursed expenses will need to wait 12 months or more for the benefit if the expenses are incurred early in the calendar year; in no case will the upfront costs to donors be removed.

5. Inadvertent Effects
Living donors taking this credit may have donated organs and bone marrow despite this credit, and therefore in these cases, the credit acts as bonus rather than an incentive.

The Organ and Bone Marrow Transplantation Tax Credit poses a potential administrative burden. The process of verifying/auditing qualified expenses

[12] Estimated revenue loss represented here is only for the Personal Income Tax loss for taxpayers claiming the individual tax credit. The employer tax credit is not yet effective and would be a revenue loss for the Corporate Income Tax.

for a period of one or more tax years requires highly skilled staff and increases the complexity of the tax return, incurring more costs and the potential for more errors.

## 1.22 Union Dues Deduction

1. Statutory Provision
   Title 30, Delaware Code, Chapter 11, §1109(a)(2)(d)

2. Description
   Starting in tax year 2024, this preference permits an itemized tax deduction of the annual cost to a resident to maintain membership in a labor organization, not to exceed $500. This preference limits the deduction to individuals who have not taken a deduction on their federal income tax return for any cost to maintain membership in a labor organization and does not include payments that are not deductible under federal law.

3. Estimated Revenue Loss
   FY 25: Negligible
   FY 26: Negligible

4. Assessment
   Union membership has been declining for decades, dropping from 20.1% of the employed workforce in 1983 to 10.3% in 2021. If this decline is, in part, due to the financial strain imposed by union dues, the tax preference could address this concern. However, given the $500 deduction limit, the maximum reduction to a filer's tax liability would be $33, which may not be sufficient to incentivize membership and act only as a reward for behavior that would have occurred irrespective of the deduction.

   Critics of union dues tax deductions argue that union members receive specific benefits in return for their dues and cost burdens should not be shifted to Delaware's taxpayers.

5. Inadvertent Effects
   Union dues had been federally deductible as part of unreimbursed employee expenses to the extent they and other miscellaneous deductions exceeded 2% of federal adjusted gross income and the taxpayer itemized deductions. The Tax Cut and Jobs Act of 2017 eliminated this and other miscellaneous deductions, but they are scheduled to be restored in tax year 2026. This

preference provides a tax benefit for these formerly privileged expenses. By limiting this deduction to individuals who have not taken a deduction on their federal income tax return, if federal law restores or creates a similar deduction, this preference does not permit a duplicate deduction.

# CORPORATE INCOME TAX

- Statutory Provision

  Title 30, Delaware Code, Chapters 19 and 64.

- Collection/Administrative Agency

  The Department of Finance, Division of Revenue, administers this tax.

- General Liability

  Every domestic and foreign corporation doing business in Delaware is required, unless specifically exempt by law, to file a corporate income tax return regardless of the amount of its gross income or its taxable income. Corporations that maintain a statutory office in Delaware but do not conduct business within the state are not required to file a corporate income tax return.

  Tax liabilities for Delaware purposes are based on the share of the corporation's federal taxable income that is allocated and apportioned to Delaware. Delaware taxable income does not include interest on obligations of the United States, the state of Delaware, or its subdivisions. Dividends, interest, and royalties of foreign corporations that qualify for a foreign tax credit for federal purposes are excluded from Delaware taxable income. Additional deductions are allowed for wages eliminated as a deduction in the calculation of the federal Jobs Credit and certain expenditures on renovations that improve accessibility for handicapped persons.

  Income from rents and royalties, patents and copyright royalties, gains and losses from the sale or other disposition of real and tangible personal property, and interest is allocated directly to the states where the property is physically located or the transactions took place, reduced by the applicable related expenses.

  Apportionment of unallocated income is generally based on Delaware gross receipts to total United Stares gross receipts for interstate business. The apportionment formula is applied to a company's entire taxable income, excluding its allocated and exempt income. Prior to the passage of the Delaware Competes Act in January 2016, the apportionment calculation was based on equal weighting of property, wages and sales ratios.

| | |
|---|---|
| **2016 and years prior** | Apportionment Ratio = .333 * Property Ratio + .333 * Salary Ratio + .333 * Sales Ratio |
| **2017** | Apportionment Ratio = .25 * Property Ratio + .25 * Salary Ratio + .50 * Sales Ratio |
| **2018** | Apportionment Ratio = .20 * Property Ratio + .20 * Salary Ratio + .60 * Sales Ratio |
| **2019** | Apportionment Ratio = .125 * Property Ratio + .125 * Salary Ratio + .75 * Sales Ratio |
| **2020 and beyond** | Apportionment Ratio = Sales Ratio |

- Tax Rate

  8.7% of taxable income

- Tax Receipts, net of refunds (millions of dollars)

| Fiscal Year | 2016 | 2017 | 2018 | 2019 | 2020* | 2021* | 2022 | 2023 | 2024 | 2025 |
|---|---|---|---|---|---|---|---|---|---|---|
| Total ($) | 143.3 | 120.8 | 89.7 | 147.8 | 116.5 | 209.7 | 314.2 | 383.9 | 344.8 | 371.4 |

* TY 2019 Final and TY 2020 Q1 Tentative payments were delayed from April 2020 to July 2020 causing a one-time shift of revenues from FY 2020 to FY 2021.

- Tax Preferences

  The following table identifies corporate income tax preferences within the Delaware Code along with annual estimated costs. Links within the table navigate to more detailed analysis of each tax preference.

| TAX PREFERENCE | FY 25 (EST) | FY 26 (EST) |
|---|---|---|
| 2.01 Exemption of Investment Holding Companies, Firms Managing Intangible Investments of Mutual Funds | Unknown | Unknown |
| 2.02 Deduction of Interest from Affiliated Companies | Negligible | Negligible |
| 2.03 Handicapped Accessibility Deduction | Negligible | Negligible |
| 2.04 Neighborhood Assistance Credit | $750,000 | $700,000 - $900,000 |
| 2.05 Tax Credit for Creation of Employment and Qualified Investments in Business Facilities (New Jobs Creation formerly Blue Collar Jobs Act) | $250,000 | $250,000 - $1.5 million |
| 2.06 Tax Credit for Creation of Employment and Qualified Investments in Targeted Areas (New Jobs Creation formerly Blue Collar Jobs Act) | Included in 2.05 | Included in 2.05 |
| 2.07 Clean Energy Technology Device Manufacturing Tax Credits | $0 | $0 |
| 2.08 Credits for Development at "Brownfield" Sites and Facilities | $0 | $0 |
| 2.09 Research and Development Tax Credit | $25.7 million | $22.0 - $28.0 million |
| 2.10 Land and Historic Resource Tax Credit | Negligible | Negligible |
| 2.11 Historic Preservation Credit | (D) | (D) |
| 2.12 Headquarters Management Company | $0 | $0 |
| 2.13 Asset Management Corporation | Negligible | Negligible |
| 2.14 Business Finder's Fee Tax Credit | $0 | $0 |

| | | |
|---|---|---|
| 2.15 Exemption of Out-of-State Resources During Declared Emergencies | Negligible | Negligible |
| 2.16 New Economy Jobs Tax Credit | (D) | (D) |
| 2.17 Vocational Rehabilitation Credit | Negligible | Negligible |
| 2.18 Apportionment Election Preference for Worldwide Headquarters and Telecommunications Companies | (D) | (D) |
| 2.19 Automatic External Defibrillator Tax Credit | Negligible | Negligible |
| 2.20 Marijuana Tax Business Deduction | $0 | Indeterminate |

Negligible = Defined as less than $50,000.
(D) = Per 30 Del. C. §368, the Department of Finance is prohibited from disclosing tax return information identifying specific taxpayers.

## 2.01 Exemption of Investment Holding Companies, Firms Managing Intangible Investments of Mutual Funds

1. Statutory Provision
Title 30, Delaware Code, Chapter 19, §1902(b)(8).

2. Description
Investment holding companies and corporations whose activities within this state are confined to the maintenance and management of the intangible investments of corporations or business trusts registered as investment companies under the Investment Company Act of 1940 are exempt from the corporate income tax.

3. Estimated Revenue Loss
FY 25: Unknown
FY 26: Unknown

4. Assessment
This provision is designed to spur economic development in the state. The tax preference is intended to strengthen the state's reputation as a major financial center and to signal to the financial community that Delaware is a progressive state in terms of liberalizing its financial regulatory environment. Originally, this exemption applied only to investment holding companies. On July 1, 1990, this provision was extended to include corporations that invest the funds of a mutual fund.

Eligible firms file informational returns establishing their eligibility for the exemption and do not have to file a corporate income tax return. This makes an accurate assessment of the revenue impact of this provision little more than guesswork. Investment holding companies are established in Delaware primarily because of this tax exemption, and it is likely that many of them would leave the state if the exemption were repealed or modified given the mobility of intangible assets. No data exist by which the Division of Revenue could make its own estimate of the revenue loss generated by this exemption.

Many states have passed legislation to effectively prevent companies from deducting expenses paid to Delaware Investment Holding Companies from corporate income. As the number of states which allow these payments to be deducted from corporate income decreases, the use of these companies may potentially decrease as well.

5. Inadvertent Effects
None noted.

## 2.02 Deduction of Interest from Affiliated Companies

1. Statutory Provision
Title 30, Delaware Code, Chapter 19, §1903(a)(2).

2. Description
Delaware allows firms (creditors) to deduct the amount of interest income (including discount) that they earn on inter-corporate obligations, usually in the form of advances, loans, or similar contractual transactions. In order to qualify for this deduction, the following requirements must be met:

(i) the debtor and creditor corporations are subject to taxation under Delaware law; and,
(ii) the debtor corporation does not claim a deduction for such interest payments in determining its entire net income for Delaware corporation income tax purposes.

3. Estimated Revenue Loss
FY 25: Likely to be Negligible*
FY 26: Likely to be Negligible*

* Accounts for a very high probability of a sweeping behavioral effect. See discussion in Assessment, below.

4. Assessment
The corporate income tax deduction for interest from affiliated corporations allows related companies to shift interest income and related expenses among members of a group that is eligible to file a federal consolidated return. The rationale behind this provision is consistent with the idea behind the exemptions for investment holding companies (Item 2.01) and designated or qualified settlement funds (Item 1.13). A tax advantage for the management of inherently mobile intangible assets, such as inter-company obligations, enhances Delaware's reputation as a financial center and may also produce relatively small employment gains for Delaware's financial and legal communities. Because the ease with which intangible assets could be moved from Delaware is so great, it is clear that a tax incentive's impact on the decision to locate such assets in Delaware is critical.

In fact, many argue that a business's decision to "locate" intangible assets in Delaware occurs solely due to the tax incentive. Unlike tangible business assets, such as a production or research facility, the location of intangible assets is not dependent upon the quality of public infrastructure, access to markets, a well-trained pool of labor, or quality of life considerations. In the event of its repeal, the vast majority of the intangible assets covered under this provision would leave the state, drastically reducing any revenue loss estimate produced on a static basis.

When the deduction was enacted in 1957, Delaware permitted corporations to elect to file consolidated returns. Since most corporations at that time filed consolidated returns, there was little or no revenue impact resulting from the shift of income among related companies. Starting on August 1, 1971, however, corporations were not permitted to file consolidated returns and now must file a separate return for each corporation conducting business within Delaware. Interest may be excluded from state taxation to the extent that the creditor corporation (the corporation that receives the interest income) conducts a greater percentage of its business in Delaware than the debtor corporation (the corporation that pays the interest on its debt).

Affiliated finance companies (AFCs) present a special case under this tax preference. The AFC acts as a creditor by purchasing receivables from their affiliate or "core business" (a large retailer, for example). The affiliate usually has a very small apportionment percentage because sales in Delaware make up only a small part of its market. The AFC, however, usually has a very high apportionment percentage (frequently 100%). The interest on a large loan from an AFC to the core business is often sufficient to totally eliminate its tax liability when deducted from the AFC's net income. The AFC's primary function is to enhance the financial position of the core business; large loans are not uncommon. It is evident that this preference is the reason behind the establishment of AFC's in Delaware. The fact that so many AFC's were established in Delaware in response to this provision suggests that its elimination would cause many or all AFC's to move to other states.

As mentioned above, estimates of the revenue loss for this tax preference are confounded by unknown market responses to a change in this tax law. Although the elimination of this provision could cause a temporary, short-term increase in revenues, firms likely would move these operations out of the state as quickly as possible, erasing any long-term revenue gain.

5. Inadvertent Effects
None noted.

## 2.03 Handicapped Accessibility Deduction

1. Statutory Provision
Title 30, Delaware Code, Chapter 19, §1903(a)(2)(f).

2. Description
Delaware offers a deduction, not to exceed $5,000, equal to the renovation expenses incurred removing design features in a building which restrict a physically handicapped person's full use of said building. For the purposes of this provision, Delaware Code defines "building" as building or structure, located in Delaware and open to the general public. This definition includes sidewalks, curbing, driveways, and entrances connected with, or related to, the use of the building structure. Expenditures incurred in the removal of architectural barriers or physical design features in order to make the building more accessible to handicapped individuals also qualify.

3. Estimated Revenue Loss
FY 25: Negligible
FY 26: Negligible

4. Assessment
This deduction is rarely utilized; in most years, no firms use the preference. This suggests that it is insufficient to encourage businesses to undertake costly renovations. This is true despite the fact that the deduction may be claimed in addition to a deduction on depreciation for renovation projects. Moreover, corporations are also allowed to expense up to $15,000 of capital costs in lieu of depreciation to remove architectural and transportation barriers to handicapped individuals under §190 of the federal IRC, which is adopted by Delaware law. As such, corporations may receive a Delaware tax benefit of up to $435 (8.7% of the capital project up to $5,000) in addition to expensing or depreciating the capital investment.

Small businesses may also claim the federal "disabled access tax credit" equal to 50% of "eligible access expenditures" (defined under Section 44 of the IRC) that exceed $250 but not exceeding $10,250. To be eligible, a small business must have gross receipts of less than $1 million or no more than 30 full-time employees.

Despite these federal and state inducements, very few companies have responded to them. The primary policy tool in promoting handicapped accessibility is the Americans with Disabilities Act (ADA). Enforcement of the ADA depends primarily upon private lawsuits brought by persons who claim that a business is non-compliant.

Given its history of limited use, it appears that utilization of this tax benefit will remain inconsequential and that this provision will do little to achieve its intended purpose. It is also unclear whether the state should subsidize actions that are already mandated by other laws.

5. Inadvertent Effects
None noted.

## 2.04 Neighborhood Assistance Credit

1. Statutory Provision
Title 30, Delaware Code, Chapter 20, Subchapter I, §§2001 – 2008.

2. Description
Persons that invest in community development programs approved by the Director of the Delaware State Housing Authority and the Neighborhood Assistance Act Advisory Council are entitled to a tax credit equal to 50% of the amount invested by a business firm in a program or in a Community-Based Development Organization. The tax credit is limited to the lesser of 50% of a firm's qualifying investment or $50,000. The aggregate amount of tax credits awarded in any one year may not exceed $1 million.

The term "Neighborhood Assistance" encompasses contributions to neighborhood organizations, Community Development Corporations, or Community-Based Development Organizations, which fund the following activities: job training or education for individuals not employed by the business firm, community services, crime prevention, housing, or economic development in an impoverished area.

Legislation enacted during the 147th General Assembly reduced the maximum annual award of Neighborhood Assistance Credits and capped the amount a firm may receive over a three-year period in order to extend the availability of the credit to a greater number of firms.

3. Estimated Revenue Loss
FY 25: $750,000[1]
FY 26: $700,000 - $900,000

4. Assessment
The goal of this credit is to encourage Delaware businesses to invest in job training, education, crime prevention, and other community services in designated impoverished areas.

5. Inadvertent Effects
None noted.

## 2.05 Tax Credit for Creation of Employment and Qualified Investments in Business Facilities (New Jobs Creation formerly Blue Collar Jobs Act)

1. Statutory Provision
Title 30, Delaware Code, Chapter 20, Subchapter II, §§2010 – 2015.

2. Description
Any corporate taxpayer that makes a qualified investment ($200,000 or more) and that hires five or more qualified employees ($40,000 per employee) is entitled to receive a tax credit. Eligible corporations receive credits of $500 for each qualified employee and $500 for each $100,000 invested, not to exceed 50% of their tax liability in a given year. Credits may be taken in the taxable year in which all eligibility conditions are met and for any of the 9 following taxable years. Unused credits may be carried forward.

Qualified activities are defined as:

1. Manufacturing;
2. Wholesaling;
3. Scientific, agricultural or industrial research development or testing;
4. Computer processing, or data preparation and processing services;
5. Engineering services;
6. Consumer credit reporting services, including adjustment and collection services and credit reporting services;
7. Non-custom computer software;
8. Telecommunications services;
9. Aviation services;

[1] Includes revenue loss due to credits claimed under the personal income tax by pass-through entity partners/owners.

10. Year-round, climate-controlled space used for growing fruits or vegetables;
11. Any combination of the activities described above; or,
12. The administration, management or support operations (including marketing) of any activity described above.

Telecommunication service businesses are required to hire at least 50 qualified employees and make a minimum investment of $15,000 per qualified employee (with a minimum aggregate investment of $750,000, rather than $200,000).

An alternative investment tax credit of $375 per $100,000 of investment is available in cases where the qualified investment is at least the greater of $1 million, or 15% of the unadjusted basis of the qualified facility. The alternative credit is to be used by manufacturers, wholesalers or aviation service firms who do not meet the ordinary requirements for investment credits, such as the required number of new employees).

Eligibility for corporate income tax credits also means firms become eligible for gross receipts and public utility tax breaks.[2] Unused credits may be carried forward for use in future tax years.

Both corporate income tax receipts and the cost of this preference fluctuate considerably from year to year.

3. Estimated Revenue Loss[3]
FY 25: $250,000
FY 26: $250,000 - $1.5 million

4. Assessment
The first goal of these credits is to promote job creation and investment in Delaware by giving employers incentives to hire additional full-time employees

[2] A related type of investment credit can be used against the bank franchise tax (5 Del. C., Chapter 11, Section 1105(h)-(i)).

[3] This estimate only includes the fiscal impact of this provision with respect to the corporate income tax. No assessment is made of the extent to which these credits will be claimed against other eligible taxes. Given this limitation, the fiscal impact estimate does not reflect the full impact of this provision on state revenues. It also excludes any "dynamic" revenue effect the credit may have (i.e., economic improvements resulting from the credit which offset some of its cost). For example, to the extent that the qualified investment in new facilities and employees increases a firm's productivity (and profits) corporate income tax receipts – and other state tax receipts – could increase. Establishing and quantifying a causal effect, however, would be tenuous at best.

or to expand business facilities. The second goal is to offer an incentive to firms that are considering whether to locate a facility in Delaware. Whether a $500 credit per $100,000 of investment (0.5%) offers enough incentive for firms to expand is an open question, but appears improbable. In the absence of increased demand for a firm's products or services, the promise of a relatively small tax subsidy will make little difference in the expansion decision.

These credits also attempt to create a competitive environment to attract new business to Delaware. State development officials have indicated that these credits serve a useful role as a marketing tool in recruiting new businesses to Delaware. On the margin, the existence of tax credits may tip a firm's location decision in Delaware's favor. The credits may have value if they portray Delaware as being committed to economic development.

In general, though, the impact of taxes on business location decisions is often of secondary importance to other elements of a state's business climate. Access to markets, labor skill and supply, and infrastructure quality are typically more important considerations in a business's location decision. It is often unclear whether tax credits are critical to a firm's decision to establish or expand its operations in Delaware or if they merely serve as a bonus to firms that would have chosen to locate here regardless of the credit. The size of the incentives suggests that they are unlikely to have a significant impact on businesses' location decisions. Despite this, proponents argue that such credits must be offered for businesses to even consider Delaware as a potential location. Although the credits often may not be *the* deciding factor in a location decision, they still may be an important consideration. The marginal impact of the credits may be important enough to retain them; they may even be considered a cost of doing business for state development efforts.

An assessment of the fiscal impact of the credits depends on the ability to identify those business decisions that were influenced by the credits and those that were not. Fiscal impacts could then be calculated for both sets of decisions and weighed against each other. However, no data exist that would allow such a comparison to be conducted.

5. Inadvertent Effects

These credits may indeed serve as a useful promotional tool for state development officials. However, there is an equally strong probability that most firms are simply "rewarded" with a bonus for actions that they would

have taken without the existence of a credit, rather than "earning" a credit for actions that would not have occurred without them.

## 2.06 Tax Credit for Creation of Employment and Qualified Investments in Targeted Areas (New Jobs Creation formerly Blue Collar Jobs Act)

1. Statutory Provision
Title 30, Delaware Code, Chapter 20, Subchapter III, §§2020 – 2022.

2. Description
This provision provides employers engaged in qualified activities (as defined in §2010 – see above) an extra credit of $250 (for a total credit of $750) for each additional full-time employee, and an extra credit of $250 (for a total of $750) for each $100,000 investment in qualified facilities located in "targeted areas" (as defined in §2020), in addition to the credits allowable under §2011 above.

A related credit of $500 (the amount for investment in qualified facilities) is allowed for facilities engaged in "commercial or retail activity" within targeted areas. *Commercial activities* (as defined in §2020(1)) include all services except: amusement conductor, amusement park operator, auctioneer, automobile race operator, bowling alley operator, circus exhibitor, entertainment agent, finance or small loan agency, floor show operator, health spa or health club, junk dealer, motion picture theater, outdoor music festival promoter, pawnbroker, pool table operator, public bath keeper, salvage yard operator and self-service laundry or dry cleaner. *Retail activities* (as defined in §2020(2)) include all retail trade except: providing retail food and beverage services (including eating and drinking places, but excluding grocery and convenience stores), engaging in automobile sales, or providing recreation or entertainment. Facilities meeting this expanded definition in targeted areas are treated as if they qualified for the credit described above in 2.05.

3. Estimated Revenue Loss [4]
FY 25: See Item 2.05 above
FY 26: See Item 2.05 above

4. Assessment
These credits were established to further encourage economic development and employment in underdeveloped areas of the state and to create a business environment that is competitive with other states in the region. It is likely that

[4] This figure is included in the fiscal impact estimate for tax credits for the creation of employment and qualified investment in business facilities (Item 2.05).

some of the financial benefit of these credits accrues to firms that would have invested in these areas anyway. In these cases, the use of this preference does not reflect behavioral change induced by the tax benefit; the credits are of secondary importance to other elements of a state's business climate, such as access to markets, the skill and cost of labor, and infrastructure. Given the size of the incentives and the characteristics of the targeted areas, they seem unlikely to have a significant impact on business location decisions.

5. Inadvertent Effects
Certain qualifying firms may be benefiting from a tax incentive for actions that were largely unrelated to the existence of the preference.

## 2.07 Clean Energy Technology Device Manufacturing Tax Credits

1. Statutory Provision
Title 30, Delaware Code, Chapter 20, §2040.

2. Description
Clean energy technology device manufacturers qualifying for the New Job Creation Credit (see Item 2.05) are entitled to increase the income tax credits established under that provision by $250, from $500 to $750. Clean energy technology device manufacturers include makers of the following items:

- Solar power devices;
- Fuel cells;
- Wind power devices; and,
- Geothermal power devices.

3. Estimated Revenue Loss[5]
FY 25: $0
FY 26: $0

4. Assessment
At present this credit has not been claimed.
This credit was established to further encourage economic development and employment with respect to specific forms of manufacturing within the state. While this credit has not been used so far, it may potentially be utilized in the future should clean energy manufacturing become increasingly popular. Like

[5] While these credits have not been used in previous years, their use may grow in the future if Delaware's manufacturing landscape changes.

all economic development credits, it is likely that some of the financial benefit of these credits will ultimately accrue to firms that would have made the investments regardless of the credit.

5. Inadvertent Effects
See Items 2.05 and 2.06.

## 2.08 Credits for Development at "Brownfield" Sites and Facilities

1. Statutory Provision
Title 30, Delaware Code, Chapter 20, §2011(l).
Title 30, Delaware Code, Chapter 20, §2021(d).

2. Description
Brownfield properties are typically abandoned properties where some residual environmental contamination may still exist or where fears of cleanup liability may be preventing re-use of the land. Piggybacked on the New Job Creation Credits, the "brownfield" credits attempt to encourage redevelopment of these lands by offering reduced license fees and tax credits for firms that invest in these properties. Tax credits worth $650 for each qualified employee and $650 for each $100,000 in qualified investment in "brownfield" sites are available. The value of these credits grows to $900 per qualified employee or $900 for each $100,000 in qualified investments if the "brownfield" is also located in a "targeted" area as defined under §2020.

3. Estimated Revenue Loss
FY 25: $0[6]
FY 26: $0

4. Assessment
Since the inception of this program in 1995, this program has gone largely unused.

As with many tax preferences, the brownfield credits may not offer enough incentive to outweigh the large potential cleanup liabilities that investment in or ownership of these properties may entail. Moreover, firms that would actually fund and oversee a brownfield clean up, such as those that specialize in environmental remediation or real estate development, would not typically meet the New Job Creation Credit employment, investment and qualified

[6] When relevant, estimates include revenue losses due to credits claimed under the personal income tax by pass-through entity partners/owners.

activity requirements. As mentioned above, Brownfield Credits can only be awarded if the firm first qualifies for the New Job Creation Credit.

Further diminishing the Brownfield credit's efficacy is the fact that otherwise eligible firms may not be initially profitable. Because of this, they have no corporate income tax liability and are often small enough to be exempt from payment of the gross receipts tax. The offer of a non-refundable tax credit is irrelevant to a firm without any tax liability within the foreseeable future.

5. Inadvertent Effects
Like other tax preferences that try to induce behavioral change, it seems likely that the brownfields credits will reward behavior that would have occurred regardless of the preference.

## 2.09 Research and Development Tax Credit

1. Statutory Provision
Title 30, Delaware Code, Chapter 20, Subchapter VIII, §§2070 – 2075.

2. Description
This preference, adapted from similar federal tax provisions, allows a credit against tax for qualified research conducted within Delaware. As a result of the Commitment to Innovation Act, signed into law March 17, 2016, this credit was amended to ensure that all companies receive the full research and development tax credit for which they qualify. Prior to tax year 2017, the statewide cap on such credits was $5 million per year. If statewide credit applications exceeded $5 million, receipts were allowed *pro rata* according to the approved amount so that the total approved credits would not exceed $5 million. For tax years 2017 and beyond, the Commitment to Innovation Act removes the $5 million cap and the full, approved amount of the credit will be granted.

This legislation also provides that credits issued for tax years 2017 and later will be refundable. Unused credits issued prior to tax year 2017 cannot be carried back but can be carried forward fifteen years; these credits remain nonrefundable.

3. Estimated Revenue Loss
FY 25: $25.7 million
FY 26: $22.0 - $28.0 million

4. Assessment

The purpose of this preference is to enhance Delaware's reputation as a home for research-intensive firms, such as pharmaceutical and biotechnology firms. Like all business tax incentives, it is difficult to isolate that portion which actually results in "new" economic activity from that part which merely serves as a bonus to firms that would have engaged in the desired activity in the absence of the incentive. Because the Research and Development Credit is used by many firms that already had significant research and development activity in Delaware prior to its enactment, it is likely that a large portion of the provision's cost does not add to the level of research and development conducted in Delaware. On the other hand, as may be the case with the New Job Creation Credits, the Research and Development Credits may be considered an unavoidable cost of doing business for states that hope to compete successfully in the area of high-tech economic development.

5. Inadvertent Effects

None noted.

## 2.10 Land and Historic Resource Tax Credit

1. Statutory Provision

Title 30, Delaware Code, Chapter 18, §§1801 – 1807.

2. Description

This preference allows an income tax credit for permanent gifts of land or interest in land to public agencies and qualified private non-profit charitable organizations. Lands that qualify must either:

(1) meet the criteria for Open Space established by the Delaware Land Protection Act;

(2) Consists of natural habitat for the protection of Delaware's unique and rare biological and natural resources; or

(3) Protect Delaware's important historic resources.

The tax credit is 40% of the appraised fair market value of the gift up to $50,000. The credit is not refundable, but unused portions can be carried forward for up to five (5) consecutive years.

3. Estimated Revenue Loss

FY 25: Negligible
FY 26: Negligible

4. Assessment
This credit may not be effective in motivating some corporate donors—this credit only benefits those firms that have a tax liability. Due to fluctuations in net corporate income, in any given year three-quarters of firms have little or no tax liability and would therefore have little incentive to take advantage of the credit.

For further discussion, refer to Section 1.14.

5. Inadvertent Effects
Refer to Section 1.14.

## 2.11 Historic Preservation Credit

1. Statutory Provision
Title 30, Delaware Code, Chapter 18, §1813.

2. Description
Under this provision, a person who wishes to repair or otherwise preserve a historic property may apply to the State Historic Preservation Office for a partial credit for qualified expenditures.

To qualify for the credit, an individual must first submit a rehabilitation proposal to the Historic Preservation Office to ensure that the restoration will meet federal and state guidelines. Credits are to be granted on a first-come, first-served basis, not to exceed $5 million in any one fiscal year. Projects receiving a credit of not more than $300,000 are allocated at least $1.5 million of the total, and $1.5 million of credits are reserved for projects located in Downtown Development Districts, $500,000 of which is reserved for projects receiving a credit of not more than $300,000. Moreover, $100,000 of the credits awarded in a given fiscal year must be reserved for distribution to qualified resident curators. After April 1 of each year, any unused balance from the reserved amounts is available for any eligible project.

Upon project completion, the State Preservation Office must certify that the end product conforms to federal and state requirements. Then the Division of Revenue or the Office of the State Bank Commissioner will determine the appropriate value of the tax credit to be issued. Personal Income Tax, Corporate Income Tax, or Bank Franchise Tax credits may be valued at:

- 20% (30% in the case of low-income housing) of qualified expenditures made in the rehabilitation of any certified historic property eligible for a federal tax credit under §47 of the Internal Revenue Code (income producing properties);

- 30% (40% in the case of low-income housing) of qualified expenditures made in the rehabilitation of any certified historic property not eligible for a federal tax credit under §47 of the Internal Revenue Code (non-income producing properties); or,

- 100% of the qualified expenditures made in the rehabilitation of a certified historic property qualifying for credit award as a resident curatorship property regardless of eligibility for a federal tax credit under § 47 of the Internal Revenue Code [26 U.S.C. § 47].

Rehabilitative efforts taking the following forms do not qualify for the Historic Preservation Credit:

1) The acquisition of real property or interest in real property;

2) Additions to existing structures when the square footage of all additions is greater than or equal to 20% of the total square footage of the historic portion of the property;

3) Paving or landscaping costs that exceed 10% of the total qualified expenditure;

4) Sales and marketing costs; or,

5) Expenditures not properly charged to a capital account, or, in the case of owner-occupied property, would not be charged to a capital account if the owner were using such property in a trade or business.

3. Estimated Revenue Loss[7]
FY 25: (D)
FY 26: (D)

[7] These figures reflect the loss to the Corporate Income Tax only. With the exception of credits owned by individuals (see section 1.16), it appears that most of the remaining Historic Preservation Credits are owned by financial institutions. As such, there are millions of dollars in credits available that could offset Bank Franchise Tax liabilities. Given the transferability of these credits, at any time the credits may be conveyed to corporate taxpayers and then used to immediately reduce corporate income tax liabilities.

4. Assessment
For a more complete discussion, refer to analysis in Section 1.15

5. Inadvertent Effects
Refer to analysis in Section 1.15.

## 2.12 Headquarters Management Company

1. Statutory Provision
Title 30, Delaware Code, Chapter 64 and Chapter 20, §§2061 – 2064.

2. Description
Headquarters Management Corporations (HMC's) are entities treated as a corporation under the Internal Revenue Code of the United States (Title 26 of the United States Code) that:

a. Make an election to be taxed as a Headquarters Management Corporation; and

b. The activities of which in this state are certified by the Director of Revenue to be confined to investment activities and/or the provision of headquarters services to itself and members of its affiliated group.

Headquarters services include accounts receivable and payable; employee benefit plan administration; insurance; legal; payroll; data processing; purchasing; and tax, financial and securities accounting, reporting and compliance services provided by a Headquarters Management Corporation to itself and members of its affiliated group, and the maintenance and management of the intangible investments of other members of its affiliated group.

HMC's were developed as a complement to Delaware Investment Holding Companies (See Item 2.01). Whereas even the most ardent supporters of Investment Holding Companies would admit that they provide little in the way of direct employment benefits, HMC's were designed with the goal of increasing employment in Delaware for firms which limit their activities in Delaware to providing certain services to entities within their affiliated group.

(D) = Per 30 Del. C. §368, the Department of Finance is prohibited from disclosing tax return information identifying specific taxpayers.

HMC's are entitled to generous tax credits, which, by adding as few as five employees, eliminate 99% of the corporate income tax otherwise due. These credits are available for ten years.

3. Estimated Revenue Loss
FY 25: $0
FY 26: $0

4. Assessment
HMC's were established in 2004. Since that time, fewer than twenty HMC applications have been approved. As is the case with Investment Holding Companies, there is a high likelihood that the HMC's would not have been formed were not for 99% tax exemption offered under this provision. The fact that in fifteen-years' time so few firms have opted to take advantage of the HMC statute calls into question its general effectiveness as an economic development incentive.

5. Inadvertent Effects
None noted.

## 2.13 Asset Management Corporation

1. Statutory Provision
Title 30, Delaware Code, Chapter 19, §1903(b)(7).

2. Description
Asset Management Corporations (AMC's) are corporations that derive 90% or more of their federally-reported gross receipts from asset management services. Asset management services include, with respect to intangible investments:
a. Rendering investment advice, including investment analysis;
b. Making determinations as to when sales and purchases are to be made;
c. Selling or purchasing;
d. Rendering administration services;
e. Rendering distribution services; or
f. Managing contracts for sub-advisory services.

Rather than the three-factor apportionment used by other corporations, asset management corporations are entitled to use customer-based sourcing and single factor, receipts-based apportionment.

3. Estimated Revenue Loss
FY 25: Negligible*
FY 26: Negligible*

* Accounts for a very high probability of a sweeping behavioral effect. See discussion in Assessment, below.

4. Assessment
The legislation establishing asset management corporations was adopted in response to evolving business practices within the financial services industry. In the mutual fund industry, for example, firms are increasingly engaging in related activities, such as pension fund management, that would fall outside of the scope of Delaware's mutual fund exemption. Because Delaware's mutual fund exemption is an "all or nothing proposition" (to qualify, 100% of a firm's activities must be confined to the management of intangible investments of mutual funds) any activity outside this scope, no matter how small, results in the loss of the exemption.

This provision is designed to allow firms the flexibility to engage in a wider array of financial activities without risking the loss of their tax advantaged status. The asset management corporation legislation was effective starting in tax year 2009. At present, fewer than five corporations have elected AMC status.

It is likely that any firms which are located in Delaware due to this distinction would not be located here in the absence of this preference. Therefore, the state would not likely stand to gain additional revenue if it were to eliminate the credit as the firms would leave the State.

5. Inadvertent Effects
None noted.

## 2.14 Business Finder's Fee Tax Credit

1. Statutory Provision
Title 30, Delaware Code, Chapter 20, §§2090 – 2097.

2. Description
This tax credit's purpose is to create incentives for existing businesses to partner with the state in the effort to create new employment opportunities for Delaware citizens, and to stimulate the Delaware economy by expanding

the tax base. A finder's fee, a tool used commonly by businesses, is an arrangement by which an intermediary finds, introduces, and brings together parties to a business opportunity.

This provision rewards each Sponsor Firm (the "finder") and each New Business Firm (the business which relocates to Delaware) with a $500 annual tax credit per Delaware job created by the new business. The tax credit is available for three years. The program requires that the new business relocate to Delaware as a result of the efforts of the sponsor, and excludes those businesses, such as real estate agents, banks and commercial landlords, that already have an incentive to bring out-of-state business to Delaware.

3. Estimated Revenue Loss
FY 25: $0
FY 26: $0

4. Assessment
This provision became effective on October 1, 2010. Since its introduction, no businesses have applied for the Business Finder's Fee program.

5. Inadvertent Effects
Like all economic development tax incentives, there is a good chance that some of the firms that eventually take advantage of this legislation would have located in Delaware in its absence. In such cases, this legislation would act as a "bonus" instead of an incentive.

## 2.15 Exemption of Out-of-State Resources During Declared Emergencies

1. Statutory Provision
Title 30, Delaware Code, Chapter 31, §§3101 – 3105.

2. Description
Delaware does not consider equipment and personnel employed during a declared state of emergency by infrastructure companies based in other states to constitute legal presence in the state for tax purposes if those assets are employed in emergency related work.

3. Estimated Revenue Loss
FY 25: Negligible
FY 26: Negligible

4. Assessment

This preference may facilitate the response to future disasters by eliminating tax concerns of companies employing out-of-state resources. During a declared emergency period, Delaware does not consider out-of-state businesses, workers, and property to have legal presence in this state of tax purposes. Companies without prior nexus in the state will benefit from this preference as they will not have to file a corporate income tax return. Companies with prior nexus in the state will also benefit from this preference as they will not be required to consider out-of-state, emergency-related property and personnel in their apportionment formula.

The revenue lost from this preference is likely to be $0 for two reasons. First, the probability of a declared disaster occurring during any given fiscal year is small and unpredictable. Second, enforcement would likely be low if Delaware chose to tax this activity.

5. Inadvertent Effects

None noted.

## 2.16 New Economy Jobs Credit

1. Statutory Provision

Title 30, Delaware Code, Chapter 20, §§2080 – 2086.

2. Description

The purpose of this provision is to incentivize the creation of new, well-paying positions without regard to industry or occupation. Targeted economic incentives are frequently criticized as government's attempt to "pick winners" by singling out a specific industry for tax preferences or direct assistance. Instead, the logic behind this provision is that, in the long-run, labor markets will determine which skills and industries are most in demand. As such, the most effective incentive is one that implicitly accepts those results without limiting the incentive to a predetermined list of preferred activities.

During the 148th General Assembly, this credit expanded to include a benefit for retained jobs. A company involved in or resulting from a recent corporate restructuring which has its principal executive offices in Delaware and is focused on specific industries such as agricultural science, nutrition, biosciences, and safety may be eligible for a job retention credit. A program focused on job retention is founded on differing logic than one which targets new employment. Such a credit should be sufficiently narrow to continue to

allow market forces to direct employment away from declining industries while still allowing the State to compete for retention of large employers in healthy industries considering leaving the State.

To qualify, a new employer must add at least 50 net new jobs with average annual salaries of at least $142,040 for tax year 2024.[8] This provision awards a refundable tax credit ranging from 25% to 40% of the qualified withholding taxes collected and paid on behalf of these new, qualified employees during the taxable year. Additional geographic-based credits are available to businesses that locate qualifying employees within targeted growth zones, incorporated municipalities, former brownfields and targeted growth counties.

The maximum aggregate credit is 65% of qualified withholding. Qualifying firms are eligible for credits over a ten year period. Eligibility in each year during that period is independently determined for new cohorts of employees.

Legislation enacted during the 147th General Assembly added additional ways a firm may qualify for this credit. Employers that create at least 200 jobs with an average salary of $70,000 (not indexed for inflation) in Delaware will be entitled to a tax credit equal to 25% of the withholding paid by the employer for the new jobs. If employers create more than 200 jobs, the size of the tax credit increases and can reach 40% if the employer creates 500 or more new jobs.

For retained jobs, the certified employer must maintain 200 jobs with an average salary of $70,000 in Delaware to earn a tax credit equal to 25% of the withholding paid by the employer on behalf of the retained employees. If employers retain more than 200 jobs, the size of the tax credit increases and can reach 40% if the employer retains 500 or more employees.

3. Estimated Revenue Loss
FY 25: (D)
FY 26: (D)

4. Assessment
This credit provides the Delaware Economic Development Office with a tool to recruit high-paying jobs to Delaware. The possibility that this provision might go unused for several years is expected, because it is designed to help

[8] This salary threshold is adjusted for inflation (CPI growth) annually.
(D) = Per 30 Del. C. §368, the Department of Finance is prohibited from disclosing tax return information identifying specific taxpayers.

Delaware capitalize on rare, significant economic development opportunities, such as the potential relocation of a corporate headquarters.

5. Inadvertent Effects
Like all economic development tax incentives, there is a good chance that some of the firms that take advantage of this legislation would have located or stayed in Delaware in its absence. In such cases, this legislation would act as a "bonus" instead of an incentive.

## 2.17 Vocational Rehabilitation Hiring Credit

1. Statutory Provision
Title 30, Delaware Code, Chapter 20B, §§20B-100 –20B-104.

2. Description
This preference provides an incentive for employers to hire individuals with a state-certified physical or mental disability who are in the process of, or have completed, vocational rehabilitative services. Employers may claim a refundable credit against the bank franchise tax, corporate income tax, personal income tax, or insurance income tax equal to 10% of gross wages or $1,500, whichever is less, for each qualified disabled worker they hire. Credits may be claimed in the year the qualified disabled worker is hired and for two subsequent years.

3. Estimated Revenue Loss
FY 25: Negligible
FY 26: Negligible

4. Assessment
The credit is available for employees hired on or after January 1st, 2017 and may be taken in the year of the hiring and up to two years thereafter. The tax credit can provide a labor market advantage for individuals with a qualified disability to offset other employment disadvantages they might have faced.

5. Inadvertent Effects
Refer to Section 1.18.

## 2.18 Apportionment Election Preference for Worldwide Headquarters and Telecommunication Companies

1. Statutory Provision
Title 30, Delaware Code, Chapter 19, §§1901 – 1903.

2. Description
As part of legislation enacted in the 148th General Assembly to modernize Delaware's apportionment of multi-state firms' profits—moving from three factor apportionment to single sales factor apportionment over a five year period—Telecommunications Corporations (TCCs) and Worldwide Headquarters Corporations (WHCs) are allowed to annually elect their apportionment method between equally weighted three factors or a single sales factor beginning in tax year 2017.

TCCs are members "of a group of corporate and non-corporate entities, which group (a) consists of corporate and non-corporate entities that are affiliated through relationships described in § 267(b) of the Internal Revenue Code, (b) provides both intrastate mobile telecommunications services and other intrastate telephone services, as such terms are used in § 5501(8)a.3. of [Title 30], and (c) in the aggregate earns annual gross receipts in the United States from providing intrastate and interstate telephone and telecommunications services, and from providing Internet access, as such term is defined in § 5501(6) of [Title 30], in excess of" $50 billion.

WHCs are corporations that (a) list the site of their principal executive offices as an address in Delaware in their Form 10-Q filing with the SEC for the quarter immediately prior to January 1st, 2017, (b) employ at least 400 full-time employees at the corporate headquarters in Delaware as of January 1st, 2016, and (c) make or contract for a capital investment of not less than $25 million to renovate or improve the corporate headquarters in Delaware between July 1st, 2014 and June 30th 2018.

3. Estimated Revenue Loss
FY 25: (D)[9]
FY 26: (D)

[9] (D) = Per 30 Del. C. §368, the Department of Finance is prohibited from disclosing tax return information identifying specific taxpayers.

4. Assessment

At the time of enactment, the full impact of the Delaware Competes Act was projected to cost $8.2 million in FY 17 and $17.6 million in FY 18 for all corporate income taxpayers in Delaware. The costs associated with the TCC and WHC provisions are likely to be a very small portion of those estimated costs.

The WHC provisions may be attractive for a few large Delaware-based firms with the potential for growth. Single-sales factor apportionment removes any negative tax consequences for expanding property and payroll in the State. Accordingly, there is no need for WHCs to defer expansion decisions until 2020.

Because TCCs are less likely to have large property and payroll shares in Delaware, this incentive may have less significance for them. Should TCCs continue to utilize three factor apportionment, then the cost of the TCC preference will continue beyond the end of the single-sales apportionment phase-in.

5. Inadvertent Effects

Providing a preference for firms in one sector of the economy may create an incentive for other firms to recharacterize their activities in such a way that they meet the legal requirements for eligibility. While the strict definitions and high barriers to entry in telecommunications industries likely prevent this issue, it is possible that some firms may be able to do so and create a basis for claiming the single-sales apportionment. To the extent they are successful, the cost of this provision rises with no benefit in terms of Delaware employment or property ownership. Such preferences may also increase administrative costs related to enforcing narrowly defined eligibility standards.

## 2.19 Automatic External Defibrillator Tax Credit

1. Statutory Provision

Title 30, Delaware Code, Chapter 20C, §§20C-100 – 20C-101.

2. Description

This preference provides an incentive for employers to place into service automatic external defibrillators (AED) at business locations within the State of Delaware. For each AED placed into service after December 31, 2017, the taxpayer is entitled to a one-time credit of $100.

3. Estimated Revenue Loss
FY 25: Negligible
FY 26: Negligible

4. Assessment
This credit is intended to incentivize private businesses in Delaware to install potentially life-saving devices at their location. The Delaware Department of Health, Office of Emergency Medical Services provides free AED devices through the Delaware Early Defibrillation Program. The $100 credit may not be likely to incentivize the purchase of a device, which typically cost between $1,200 and $3,000. Because this incentive is a credit against taxes due, entities without a tax liability (e.g. non-profits) would not benefit from this preference.

5. Inadvertent Effects
None noted.

## 2.20 Marijuana Tax Business Deduction

1. Statutory Provision
Title 30, Delaware Code, Chapter 16, Subchapter II, §1625

2. Description
This preference allows licensed marijuana establishments to deduct ordinary and necessary business expenses on their Delaware state income tax returns. Such deductions are not currently permitted under federal law due to Internal Revenue Code §280E, which disallows deductions or credits for businesses engaged in the sale of controlled substances. The Delaware provision ensures that marijuana establishments are treated comparably to other businesses for state tax purposes. However, the deduction is not permitted if federal law is amended to allow such expenses under §280E, preventing duplicate benefits. This is effective August 1, 2023.

3. Estimated Revenue Loss
FY 25: $0
FY 26: Indeterminate (subject to review after tax year 2026 returns are filed)

4. Assessment
This deduction aligns Delaware's tax treatment of marijuana establishments with that of other legal state businesses by allowing them to deduct typical

operating expenses. Without the deduction, marijuana businesses would face significantly higher effective state tax burdens compared to other industries, potentially hindering their ability to operate competitively. Supporters argue that the measure promotes fairness and helps stabilize the regulated cannabis market by reducing compliance costs that would otherwise be exacerbated by the federal §280E limitation. Critics contend that the deduction effectively subsidizes marijuana operations, shifting tax burdens to other taxpayers, and could be viewed as premature given the federal government's continued prohibition.

5. Inadvertent Effects

The provision's sunset trigger tied to §280E creates administrative complexity, requiring monitoring of federal law changes to determine ongoing eligibility. If federal law changes, marijuana establishments will need to adjust accounting practices accordingly, which may lead to compliance burdens in transition years. Additionally, while the deduction improves after-tax profitability for marijuana establishments, it could inadvertently incentivize market oversaturation or increase pressure on state regulatory oversight.

# MOTOR FUEL/SPECIAL FUEL TAX

- Statutory Provision

  Title 30, Delaware Code, Chapter 51.

- Collection/Administrative Agency

  The Department of Transportation, Motor Fuel Tax Administration, administers this tax.

- General Liability

  Delaware imposes an excise tax on each gallon of gasoline sold or used in the state. The tax is collected by and paid to the state by licensed distributors. An excise tax is also imposed on the retail sale or use of special fuel, which includes all combustible gases and liquids suitable for propulsion of motor vehicles except fuels that are determined to be gasoline or gasohol. The special fuel tax is collected by and paid to the state by licensed suppliers, users, and dealers. Another excise tax is imposed for certain aviation jet fuel designed for use in the operation of jet or turbo-prop aircraft.

- Tax Rates

  The excise tax rate is 23 cents per gallon of gasoline, 22 cents per gallon of special fuel, or 5 cents per gallon of aviation jet fuel, sold or used in the state.

- Tax Receipts ($ millions)[1]

| Fiscal Year | 2016 | 2017 | 2018 | 2019 | 2020 | 2021 | 2022 | 2023 | 2024 | 2025 |
|---|---|---|---|---|---|---|---|---|---|---|
| Total ($) | 124.6 | 129.5 | 131.6 | 142.8 | 138.7 | 128.5 | 136.7 | 136.1 | 135.1 | 132.4 |

[1] Figures are for gasoline, special fuel and aviation jet fuel receipts

- Tax Preferences

The following table identifies motor, special fuel and aviation jet fuel tax preferences within the Delaware Code along with annual estimated costs. Links within the table navigate to more detailed analysis of each tax preference.

| TAX PREFERENCE | FY 25 (EST) | FY 26 (EST) |
|---|---|---|
| 3.01 Motor Fuel Tax Exemptions | $99,000 | $105,000 |
| 3.02 Motor Fuel Tax Refunds | $35,000 | $37,000 |
| 3.03 Special Fuel Exemptions | $47,000 | $50,000 |
| 3.04 Aviation Jet Fuel Exemptions | (D) | (D) |

(D) = Per 30 Del. C. §368, the Department of Finance is prohibited from disclosing tax return information identifying specific taxpayers.

## 3.01 Motor Fuel Tax Exemptions

1. Statutory Provision
Title 30, Delaware Code, Chapter 51, Subchapter I, §5111(a)(5).

2. Description
This provision exempts gasoline sold to volunteer fire companies, veterans' groups, and civic ambulance companies from the motor fuel tax.
Section 5111 of the Delaware Code also exempts gasoline sold to the federal or state government from the motor fuel tax. However, these exemptions for governments are not considered tax preferences for the purpose of this report. (Please see section titled "Delaware Tax Provisions Not Included" for more discussion.)

3. Estimated Revenue Loss
FY 25: $99,000
FY 26: $105,000

4. Assessment
Whether the tax code is the most appropriate policy tool to provide public support for these activities is open to question. Proponents of the preference may argue that the exemption is justified because these organizations perform quasi-public service functions that the state or one of its political subdivisions would otherwise provide.

5. Inadvertent Effects
None noted.

## 3.02 Motor Fuel Tax Refunds

1. Statutory Provision
Title 30, Delaware Code, Chapter 51, Subchapter I, §5120(a).

2. Description
This provision allows for a refund of motor fuel taxes in the following circumstances:

- Gas sold for use in stationary engines, tractors, motor boats, aircraft, and any other vehicle or machine that does not utilize public highways within the State; or,

- Gas sold to operators of a taxicab business with a base of operations in Delaware.

3. Estimated Revenue Loss
FY 25: $35,000
FY 26: $37,000

4. Assessment
Because the motor fuel excise tax is intended to be a road use tax, the exemption of fuel in off-highway vehicles and machines is considered legitimate. However, one may question the exemption for taxicabs, as their operation undoubtedly occurs on public roads and highways. Additionally, with the rise of ride-sharing services, the equity of this preference for taxicabs is further brought into question.

5. Inadvertent Effects
None noted.

## 3.03 Special Fuel Exemptions

1. Statutory Provision
Title 30, Delaware Code, Chapter 51, §5133(a).

2. Description
This provision exempts special fuels—primarily diesel—sold to volunteer fire companies, veterans' groups, and civic ambulance companies from the special fuel tax.

Section 5111 of the Delaware Code also exempts fuel sold to the federal or state government from the special fuel tax. However, these exemptions for governments are not considered tax preferences for the purpose of this report. (Please see section titled "Delaware Tax Provisions Not Included" for more discussion.)

3. Estimated Revenue Loss
FY 25: $47,000
FY 26: $50,000

4. Assessment
The rationale for exempting special fuels used by eligible vehicles is consistent with the exemption of such vehicles from the motor fuels tax. Please refer to the discussion in Items 3.01 and 3.02.

5. Inadvertent Effects
None noted.

## 3.04 Aviation Jet Fuel Exemptions

2. Statutory Provision
Title 30, Delaware Code, Chapter 51, §5172(b).

3. Description
This provision exempts aviation jet fuels used for aerial application within the State from the aviation jet fuel tax. It also exempts, for a temporary period not to exceed 5 years, aviation jet fuel used for the purpose of economic development and job creation in the aviation industry in the State. This exemption must be approved by the Council on Development Finance and the Director of Small Business.

Section 5172 of the Delaware Code also exempts fuel sold to the federal or state government from the aviation jet fuel tax. However, these exemptions for governments are not considered tax preferences for the purpose of this report. (Please see section titled "Delaware Tax Provisions Not Included" for more discussion.)

4. Estimated Revenue Loss
FY 25: (D)
FY 26: (D)

5. Assessment
Aviation jet fuel used for aerial application, which is spraying crops with crop protection products from an agricultural aircraft, is a business input in the agricultural process, not a final product. Taxing business inputs violates several tax policy principles and causes economic distortions.

6. Inadvertent Effects
None noted.

(D) = Per 30 Del. C. §368, the Department of Finance is prohibited from disclosing tax return information identifying specific taxpayers.

# PUBLIC UTILITY TAX

- Statutory Provision

  Title 30, Delaware Code, Chapters 33, 41 and 55.

- Collection/Administrative Agency

  The Department of Finance, Division of Revenue, administers this tax.

- General Liability

  Firms that provide steam, gas, electric, telephone, telegraph, or cable television services are subject to the public utility tax. Except for cable television services, receipts from sales to residential users are exempt from this tax. A separate license tax is based on gross receipts of businesses that produce steam, gas, or electricity.

- Tax Rates

| UTILITY | TAX RATE | PAYMENT DATES |
|---|---|---|
| Electricity Distribution | 4.25% of gross receipts from non-residential users. 2.0% of gross receipts from manufacturers, food processors and agribusinesses. Sales to automobile and certain other types of manufacturers are exempt. | Returns and payment due on or before the 20th day after the end of each calendar month. |
| Gas Distribution | 4.25% of gross receipts from non-residential users. 2.0% of gross receipts from manufacturers, food processors and agribusinesses. Sales to automobile manufacturers are exempt. | Returns and payment due on or before the 20th day after the end of each calendar month. |
| Intrastate Telephone & Telegraph Services | 5.0% of gross receipts from non-residential users | Returns and payment due on or before the 20th day after the end of each calendar month. |
| Cable and Satellite Television Distribution | 2.125% of gross receipts | Returns and payment due on or before the 20th day after the end of each calendar month. |
| Electricity and Gas Manufacturing and Production | 0.1 % (one mill) on each dollar of gross receipts from the production of gas or electricity.<br>Municipalities are exempt. | Returns and payments are due on the first Monday of May. |

- Tax Receipts (millions of dollars)

| Fiscal Year | 2016 | 2017 | 2018 | 2019 | 2020 | 2021 | 2022 | 2023 | 2024 | 2025 |
|---|---|---|---|---|---|---|---|---|---|---|
| Total ($) | 45.0 | 43.7 | 43.1 | 37.0 | 35.8 | 35.0 | 29.6 | 35.7 | 34.5 | 36.0 |

- Tax Preferences

The following table identifies public utility tax preferences within the Delaware Code along with annual estimated costs. Links within the table navigate to more detailed analysis of each tax preference.

| TAX PREFERENCE | FY 25 (EST) | FY 26 (EST) |
|---|---|---|
| 4.01 Public Utility Exemption for Corporations Reorganizing Under Provisions of the Bankruptcy Code | Negligible | Negligible |
| 4.02 Exemption of Electricity Used in Certain Manufacturing Processes | $155,000 | $125,000 - $175,000 |
| 4.03 Refunds of Public Utility Tax to Firms That Qualify for the New Facilities Business Credit Program | Negligible | Negligible |
| 4.04 Rate Reduction for Electricity Used by Manufacturing, Agribusiness and Food Processing Firms | $1.3 million | $1.0 - $1.5 million |
| 4.05 Rate Reduction for Gas Used by Manufacturing, Agribusiness and Food Processing Firms | $130,000 | $125,000 - $150,000 |
| 4.06 Exemption of Electricity Used By Automobile Manufacturers | $0 | $0 |
| 4.07 Exemption of Gas Used By Automobile Manufacturers | $0 | $0 |
| 4.08 Rate Reduction for the Provision of Cable and Satellite Television Services | $8.1 million | $7.8 - $8.2 million |
| 4.09 Exemption for Electronic Pager Service | Negligible | Negligible |

## 4.01 Public Utility Exemption for Corporations Reorganizing Under Provisions of the Bankruptcy Code

1. Statutory Provision
   Title 30, Delaware Code, Chapter 55, §5506(f).

2. Description
   The public utility tax on gas and electricity is exempted for 36 consecutive months for any corporation which is a debtor in possession in a reorganization proceeding under Chapter 11 of the United States Bankruptcy Code.

3. Estimated Revenue Loss
   FY 25: Negligible
   FY 26: Negligible

4. Assessment
   This exemption is intended to assist ailing Delaware firms that are considered extremely important to the state economy. This exemption could result in a significant revenue loss if given to one or more firms that are a large electricity consumer. No firms are known to have claimed this exemption over the course of the last several years, and none are expected to do so in the near future.

5. Inadvertent Effects
   None noted.

## 4.02 Exemption of Electricity Used in Certain Manufacturing Processes

1. Statutory Provision
   Title 30, Delaware Code, Chapter 55, §5506(g).

2. Description
   Gross receipts from electricity used in electrolytic (decomposition of a chemical compounds using an electrical current), electroarcthermal (steel production using electric arcs for heating), or air separation manufacturing processes (separation of air into its component parts by electric charge) are exempt from the public utility tax.

3. Estimated Revenue Loss
FY 25: $155,000
FY 26: $125,000 - $175,000

4. Assessment
This preference attempts to strengthen the competitive position of certain Delaware manufacturers relative to neighboring states by assisting specific types of firms that use large amounts of electricity in production. How successfully this tax preference meets its objective is unknown.

5. Inadvertent effects
None noted.

## 4.03 Refunds of Public Utility Tax to Firms That Qualify for the New Facilities Business Credit Program

1. Statutory Provision
Title 30, Delaware Code, Chapter 55, §5507.

2. Description
Any firm that is eligible for New Job Creation Credits (defined under Title 30, Section 2011(a), formerly Blue Collar Jobs Credits) is also entitled to receive for five years a rebate of 50 percent of the public utility tax that it owes on the operation of new or expanded enterprises.

3. Estimated Revenue Loss [1]
FY 25: Negligible
FY 26: Negligible

4. Assessment
This program was implemented as a component of the Blue Collar Jobs Act in order to enhance the business climate for the state's manufacturers. For a full discussion, please refer to Item 2.05, 2.06, 2.08 and 2.09 in the corporate income tax section of this report.

5. Inadvertent effects
None noted.

[1] This estimate can vary significantly from year to year as claims for refunds from a handful of major energy-using firms can widely change the total amount of refunds.

## 4.04 Rate Reduction for Electricity Used by Manufacturing, Agribusiness and Food Processing Firms

1. Statutory Provision
Title 30, Delaware Code, Chapter 55, §5502(b)(2).

2. Description
This provision lowers the tax rate for all manufacturers in the state who do not qualify for the electrochemical manufacturing exemption discussed above (see Item 4.02). The public utility tax on electricity sold to Delaware manufacturers is 2 percent, as opposed to the general 4.25 percent rate.

3. Estimated Revenue Loss
FY 25: $1.3 million
FY 26: $1.0 - $1.5 million

4. Assessment
This preference attempts to strengthen the competitive position of Delaware's manufacturers relative to neighboring states by assisting firms that use large amounts of electricity in production. How successful this tax preference is in its purpose is unknown. For firms using significant amounts of electricity in the production process, overall power rates may be much more important than the 2.25 percentage point reduction provided by this provision in determining whether the state's utility rates are affordable and competitive. While this provision provides a 53 percent reduction in tax rates, the overall reduction in electricity costs is only 2.16 percent. For example, consider a firm that spends $10,000 annually on electricity. The savings provided by this provision are calculated as follows:

| Cost Savings from Utility Rate Reduction | | |
|---|---|---|
| Amount spent on electricity (before taxes): | **$10,000** | |
| Amount spent on electricity under 4.25% rate: | **$10,425** | ($10,000 * 1.0425) |
| Amount spent on electricity under 2.0% rate: | **$10,200** | ($10,000 * 1.02) |
| Difference | **$225** | ($10,425 - $10,200) |
| Percent reduction: | **2.16%** | ($225 / $10,425) |

A flaw of broad, industry-based preferences such as this is that firms obtain tax relief solely because they fall under a definition of "manufacturing." Firms in other industries may actually be larger power users or in more competitively precarious positions but do not meet the statutory definition.

5. Inadvertent effects

Enacting a public utility tax preference for a single sector of the economy may cause firms in that industry to lag in the introduction of more energy-efficient production technologies. Given the relatively small benefit provided by this preference, however, this outcome seems unlikely.

Additionally, providing a preference for firms in one sector of the economy may create an incentive for other firms to construe their activities in such a way that they meet the legal requirements for eligibility. For some firms, non-substantive changes to their activities or accounting practices can create a basis for claiming entitlement to benefits. To the extent that they are successful, the cost of this provision is increased with no concomitant increase in benefits. Such preferences may also increase administrative costs in enforcing narrowly defined eligibility standards.

## 4.05 Rate Reduction for Natural Gas Used by Manufacturing, Agribusiness and Food Processing Firms

1. Statutory Provision

Title 30, Delaware Code, Section §5502(b)(2).

2. Description

This provision reduces the public utility tax rate on receipts from natural gas consumed by manufacturers, agribusinesses and food processing firms to 2.0%. The general rate is 4.25%

3. Estimated Revenue Loss

FY 25: $130,000
FY 26: $125,000 - $150,000

4. Assessment

Generally speaking, the same assessment of the rate reduction for receipts from electricity consumed by manufacturers (item 4.04) can be applied to this preference. However, an evaluation of this preference must also take into account that a rate preference for electricity consumed by manufacturers existed for several years prior to the enactment of this provision. As such, a rate differential existed between electricity and gas used in manufacturing processes. To the extent that these inputs could be substituted, manufacturers had a tax induced incentive to favor electricity over natural gas. By eliminating the rate differential, the economic decisions of manufacturers for inputs in the production process will be less distorted by tax code provisions.

5. Inadvertent effects
See item 4.04.

## 4.06 Exemption of Electricity Used By Automobile Manufacturers

1. Statutory Provision
Title 30, Delaware Code, Chapter 55, §5506(j).

2. Description
This provision exempts automobile manufacturers from paying the public utility tax on electricity that they use in vehicle production.

3. Estimated Revenue Loss
FY 25: $0
FY 26: $0

4. Assessment
Noting the large "multiplier effect" that automobile plants had on Delaware's economy, the General Assembly added this provision in the spring of 1995. Automobile Manufacturers were then critical Delaware employers. While this provision likely provided only a minor benefit to auto manufacturers, it demonstrates a visible commitment by the state to this sector of the economy.

Ultimately, in the wake of the closure of the state's two auto plants, relative to the powerful economic and operational challenges that faced Delaware's auto industry, this preference's relief proved irrelevant.

5. Inadvertent effects
Enacting a public utility tax preference for a single sector of the economy may cause firms in that industry to lag in the introduction of more energy-efficient production technologies. Given the relatively small benefit provided by this preference, however, this outcome seems unlikely.

## 4.07 Exemption of Natural Gas Used By Automobile Manufacturers

1. Statutory Provision
Title 30, Delaware Code, Chapter 55, §5506(j).

2. Description
This provision exempts automobile manufacturers from paying the public utility tax on natural gas that they use in vehicle production.

3. Estimated Revenue Loss
FY 25: $0
FY 26: $0

4. Assessment
Generally speaking, the same assessment of the exemption for receipts from electricity consumed by automobile manufacturers (item 4.06) can be applied to this preference. However, an evaluation of this preference must also take into account that an exemption for electricity consumed by automobile manufacturers existed for several years prior to the enactment of this provision. As such, a rate differential existed between electricity and gas used in this manufacturing process. To the extent that these inputs could be substituted, manufacturers had a tax induced incentive to favor electricity in the production of automobiles over natural gas. By eliminating the rate differential, the economic decisions of automobile manufacturers for inputs in the production process will be less distorted by tax code provisions.

Ultimately, in the wake of the closure of the state's two auto plants, relative to the powerful economic and operational challenges that faced Delaware's auto industry, this preference's relief proved irrelevant.

5. Inadvertent effects
See Item 4.06

## 4.08 Rate Reduction for the Provision of Cable and Satellite Television Services

1. Statutory Provision
Title 30, Delaware Code, Chapter 55, §5502(b)(4).

2. Description
This preference imposes a reduced rate of 2.125% (as opposed to 5.00% for other telecommunication services) on the provision of cable and satellite television communications, commodities and services. The legal incidence of this tax falls on entities distributing cable television services within the state of Delaware.

3. Estimated Revenue Loss
FY 25: $8.1 million
FY 26: $7.8 - $8.2 million

4. Assessment
Although it can be debated whether this provision is appropriately included in this report, it is treated as a tax preference because it taxes one type of public utility service differently from others and it meets the definition of a tax preference found in 8305(6) of Title 29.[2] As this report is meant to be as inclusive as possible, an argument can be made to include this item.

The goal of this preference appears to be the provision of tax relief to residential consumers. Unlike most other elements of the public utility tax, which are limited to nonresidential services, the tax on cable and satellite services applies to residential and nonresidential consumption. By applying a lower tax rate to these services, this provision achieves this goal.

5. Inadvertent effects
None noted.

## 4.09 Exemption for Electronic Pager Service

1. Statutory Provision
Title 30, Delaware Code, Chapter 55, §5501(7)(b).

2. Description
This provision excludes electronic pager service from the public utility tax.

3. Estimated Revenue Loss
FY 23: Negligible
FY 24: Negligible

4. Assessment
This exemption differentiates electronic pager service from other types of telecommunications service. Traditional electronic pagers have limited functionality and advances in telecommunications technology have essentially rendered pagers obsolete. With the advent of smart phones, which provide a wider array of services, it is increasingly clear that "stand-alone" pagers are becoming a technological anachronism, calling into question the policy rationale for continuing this preference.

[2] The definition of a "tax preference" found in §8305(6) describes a preference as a tax code provision that (among other things) "...exempts, in whole or in part, certain persons, income, goods, *services* or property from the impact of established taxes..." The federal definition speaks more directly to the issue by defining a tax preference as "a preferential rate of tax."

5. Inadvertent effects
None Noted.

# Acknowledgments

This report is a product of the District of Columbia Office of Revenue Analysis (ORA). Charlotte Otabor and Kevin Hundelt researched all the tax expenditures, drafted the report, and estimated the federal conformity tax expenditures. In addition, the following ORA staff members estimated the forgone revenues from local tax expenditures: Steven Giachetti, Zhong Jin, Betty DeLeon, and Peter Johansson.

I also thank the individuals from other D.C. government agencies, such as the Department of Energy and Environment (DOEE) and the Office of Tax and Revenue (OTR), who provided important information on many local tax expenditure provisions.

Glen Lee
Chief Financial Officer

# Introduction

D.C. Law 13-161, the "Tax Expenditure Budget Review Act of 2000,"[1] requires the Chief Financial Officer to prepare a biennial tax expenditure budget that estimates the revenue loss to the District government resulting from tax expenditures during the current fiscal year and the next two fiscal years. The law defines "tax expenditures" as "the revenue losses attributable to provisions of federal law and the laws of the District of Columbia that allow, in whole or in part, a special exclusion, exemption, or deduction from taxes … or which provide a special credit, a preferential rate of tax, or a deferral of tax liability."[2]

The Chief Financial Officer prepared the first required tax expenditure budget for the proposed fiscal year 2003 budget. This report, which estimates the revenue forgone due to tax expenditures in fiscal years 2024 through 2027,[3] covers more than 200 separate tax expenditure provisions. Several tax expenditures were also removed since the previous tax expenditure report because they are no longer applicable. Additionally, this tax expenditure budget includes a section on individual or specific tax provisions granted to a particular firm or organization. Presenting these individual and categorical tax provisions provides a more comprehensive view of the District's tax system.

**Understanding Tax Expenditures**

Tax expenditures are often described as "spending by another name" or "disguised spending." Policymakers use tax abatements, credits, deductions, deferrals, exemptions, and exclusions to promote various policy goals in education, human services, public safety, economic development, environmental protection, and other areas. Instead of pursuing these objectives through direct spending, policymakers reduce the tax liability associated with certain actions (such as hiring new employees) or conditions (such as being blind or elderly) so that individuals or businesses can keep and spend the money, often for some purpose. Unlike tax expenditures, direct spending programs usually receive an annual appropriation, and the proposed funding levels are reviewed during the annual budget cycle. Tax expenditures, on the other hand, remain in place unless policymakers act to modify or repeal them; in this respect, they are like entitlement programs. Also, direct spending programs are itemized on the expenditure side of the budget, whereas revenues are shown in the budget as aggregate receipts without an itemization of tax expenditures. For example, a program to expand access to higher education could offer tax deductions for college savings that are not accounted for in the budget instead of increasing student loans or grants. Regardless of the government's approach, there is a real resource cost regarding forgone revenue or direct expenditures.

There are two types of tax expenditures: (1) federal conformity tax expenditures, which apply U.S. Internal Revenue Code provisions to the D.C. personal and corporate income taxes, and (2) local tax expenditures authorized only by D.C. law. By conforming to the federal definition of adjusted gross income (with several exceptions), the District adopts most of the exclusions and deductions from income that are part of the federal personal and corporate income tax systems. Most states with an income tax use federal adjusted gross income as the basis for their income tax.

[1] D.C. Law 13-161 took effect on October 4, 2000 and is codified in § 47-318 and § 47-318.01 of the D.C. Official Code.
[2] See D.C. Official Code § 47-318(6).
[3] Although the law requires the tax expenditure budget to estimate the revenue loss for the current fiscal year and the subsequent two fiscal years, this report covers the current year and the subsequent three fiscal years. See D.C. Official Code § 47-392.01(b).

An example of the federal conformity tax expenditure is the home mortgage interest deduction: The District follows the federal practice of allowing taxpayers to deduct home mortgage interest payments. In addition to the 103 federal conformity provisions covered in this report,[4] there are 204 tax expenditures established by local law. An example of a local tax expenditure is the homestead deduction, which allows all D.C. taxpayers who live in their own homes to deduct a certain amount ($87,050 at the time of this writing) from the home's taxable value. Federal conformity and local tax expenditures warrant regular scrutiny to ensure they are effective, efficient, and equitable and highlight the tradeoffs between tax expenditures and other programs.

The District took a major step in scrutinizing local tax expenditures with the passage of D.C. Law 20-155, which requires the Office of the Chief Financial Officer (OCFO) to review all D.C. tax expenditures (such as abatements, credits, and exemptions) on a five-year cycle. The OCFO must summarize the purpose of each provision, estimate the revenue forgone, examine the impacts on the District's economy and social welfare, and offer recommendations about whether to maintain, revise, or repeal the tax preference. Pursuant to the legislation, to date, the Office of Revenue Analysis (ORA) has finished the first cycle of tax expenditure review by policy areas issuing 5 evaluation reports and a summary wrap-up report at the time of this writing: the 2015 District of Columbia Housing Tax Expenditure Review, the District of Columbia 2016 Tax Expenditure Review: Environment, Public Safety, Transportation, and Tax Administration and Equity Provisions, the 2018 Review of Economic Development Tax Expenditures, 2021 Review of Income Security and Social Policy Tax Expenditures, 2022 Health and Education Tax Expenditure Review, and the Summary Report on the District's First Cycle of Tax Expenditure Reviews. ORA published the first report of the second cycle, the Housing Tax Expenditure Review report, in 2023. The second report of the second cycle, the Tax Expenditure Review: Environment, Public Safety, Transportation, and Tax Administration and Equity Provisions report, will be published sometime in 2024.

Since the previous tax expenditure budget was published in 2022, policymakers have established five new local tax expenditures. These include (1) tax abatements for housing in Downtown DC, (2) tax abatement for a redevelopment project located at 3200 Pennsylvania Ave, S.E (3) Community for Creative Non-violence real property tax relief (4) Grace Covenant Church equitable real property tax relief, (5) gross income tax exclusion from funding received from the District Department of the Environment or the District of Columbia Sustainable Energy Utility to incentivize solar installations under the Solar for All program, (6) Affordable Housing Opportunities, Inc. tax abatement, (7) 206 Elm Street N.W. real property tax exemption, (8) Players Lounge tax exemption, and (9) Habitat for Humanity real property tax exemption. Since the previous report, policymakers modified four local tax expenditures: (1) senior and individuals with disabilities real property tax increase limit, which lowers the allowable increase in assessed properties to 2 percent; (2) disabled veterans homestead exemption, which allows a deduction of $445,000 from the assessed value of their homestead property, reducing the tax obligation for that property (3) New Howard University Hospital Tax Abatement Amendment that adds to parcels to the existing tax abatement, (4) tax abatement for Affordable Housing in High-Need Areas Amendment Act of 2023, and (5) Earned Income Tax Credit Expansion Amendment Act of 2022, expands the credit to residents who are not citizens or resident aliens of the United States who would otherwise qualify except for their citizenship or residency status. Additionally, as of January

[4] A small number of federal conformity tax expenditures are not included in this report because they concern tax benefits for industries, such as agriculture and mining, which are non-existent or almost non-existent in the District of Columbia.

1, 2018, the District conforms to the Internal Revenue Tax Code on the individual income standard deduction and personal exemption, which are included in the federal conformity tax expenditures.[5]

The tax expenditure budget aims to subject tax preferences to the same scrutiny as direct appropriations. Itemizing tax expenditures provides policymakers with a more complete picture of how the government uses its resources so they can consider how to allocate resources more effectively. For example, if ineffective or outmoded tax expenditures were eliminated, policymakers could free up resources to expand high-priority direct spending programs or cut tax rates. This exercise is designed to give policymakers the information they need about tax expenditures to make sound fiscal policy decisions.

**Structure of the Report**

This tax expenditure budget and accompanying report, prepared by the staff of the ORA, offers extensive background information on each tax expenditure in addition to estimates of the revenue forgone for fiscal years 2024 through 2027. The report provides (1) the statutory basis and year of enactment for each provision, (2) a description of the tax expenditure and how it is structured, (3) the purpose of the tax expenditure, and (4) a discussion of impacts.

The report begins with a summary table that overviews the District's tax expenditures. The summary table classifies the tax expenditure according to the type of tax and provides the statutory authority, year of enactment, policy area, and estimated revenue loss for fiscal years 2024 through 2027. This summary also includes individual tax expenditures.

The body of the report is organized into separate parts for federal conformity (Part I) and local tax expenditures (Part II). The local tax expenditure section includes sub-sections for each of the District's major taxes: personal and business income taxes, real property tax, deed recordation and transfer tax, sales tax, gross receipts tax, insurance premiums tax, personal property tax, local tax expenditures (unknown if used), unused local tax expenditures (no one is taking them), and unused local tax expenditures (implementing regulations not yet written).

Below are three sub-categories of local tax expenditures: (1) local tax expenditures whose usage is unknown, (2) local tax expenditures that have not been used, and (3) individual tax expenditures.

Local tax expenditures whose usage is unknown: There are some local tax expenditures in the District's tax code for which it is difficult to determine whether they are being used. One of the reasons the usage of some local provisions is unknown is due to a lack of information on the tax provision. An example of a local tax expenditure whose usage is unknown is the employer-assisted home purchase tax credit, where questions pertaining to the tax credit are not captured on the business income tax form; instead, the credit is combined with other tax credits into a single line on the tax form. When completing the tax forms, it is difficult to determine whether companies claim the employer-assisted home purchase tax credit.

Local tax expenditures that have not been used: For several of the local tax expenditures, we know they are not being used in the District because the regulations needed to implement the tax expenditures have not been written by the agency assigned to administer them. In other cases, tax

[5] The District also conforms to the Internal Revenue Tax Code on the state death tax credit, not included in the report.

provisions in the District have not been used, and it is unclear why no one is taking advantage of the tax provisions.[6]

Individual or Specific tax expenditures: Individual tax expenditures are those for which the recipient of the tax preference is specified by name in the authorizing legislation. The recipient of an individual tax provision is granted the tax benefit based on specific circumstances. This is compared to categorical tax expenditures, which may be taken by anyone eligible for them. The list of individual tax expenditures represents those that have been identified in the OCFO's Tax Expenditure Reviews and Annual Unified Economic Development Reports. As of the report's writing, 81 individual tax expenditures have been identified thus far. ORA will continue to update this listing as individual tax provisions are identified through our comprehensive review of the District's tax expenditures as mandated by D.C. Law 20-155.

Each categorical tax expenditure is described in detail, including benefit levels (the amount of abatements, credits, deductions, deferrals, exclusions, and exemptions) and eligibility criteria.

The different types of tax expenditures are as follows:

- Exclusions are items that are not considered part of a taxpayer's gross income for tax purposes, even though they increase his or her resources or wealth. Exclusions do not have to be reported on a tax return but still cause adjusted gross income to be lower than expected. Employer contributions to health and retirement plans are examples.

- Exemptions are per-person reductions in taxable income that taxpayers can claim because of their status or circumstances (such as senior citizens).

- Adjustments are reductions in taxable income available to all tax filers who meet certain criteria, regardless of whether they itemize their deductions. Adjustments are also known as "above-the-line" deductions and are entered on the tax return.

- Deductions are reductions to taxable income that must be itemized on the tax form. This option is not available to those who choose the standard deduction.

- Subtractions are reductions from federal adjusted gross income used to derive District of Columbia adjusted gross income. Subtractions reflect income that is taxed by the federal government but not by the D.C. government.

- Credits, which reduce tax liability directly instead of reducing the amount of income subject to taxation. Credits can be refundable (if the amount of the credit exceeds tax liability, the taxpayer gets the difference as a direct refund) or non-refundable (the amount of the credit cannot exceed tax liability).

- Abatements are reductions in tax liability (typically real property tax liability) that are often applied on a percentage basis or through a negotiated process.

[6] Tax expenditure estimates of $0 under the Deed Recordation and Transfer Tax are not moved to these categories, as the estimates for these provisions will depend on whether property in each category is sold and transferred in the study period.

- Deferrals delay the recognition of income to a future year or years. Because they shift the timing of tax payments, deferrals function like interest-free loans to the taxpayer.

- Rebates are refunds provided to qualifying taxpayers as a separate payment (as contrasted with tax credits that are first applied as a reduction of tax liability).

- Special rules, which is a category used for federal tax expenditures that involve blended tax rates or special accounting procedures and do not fit neatly into any other category.

**Policy and Program Areas**

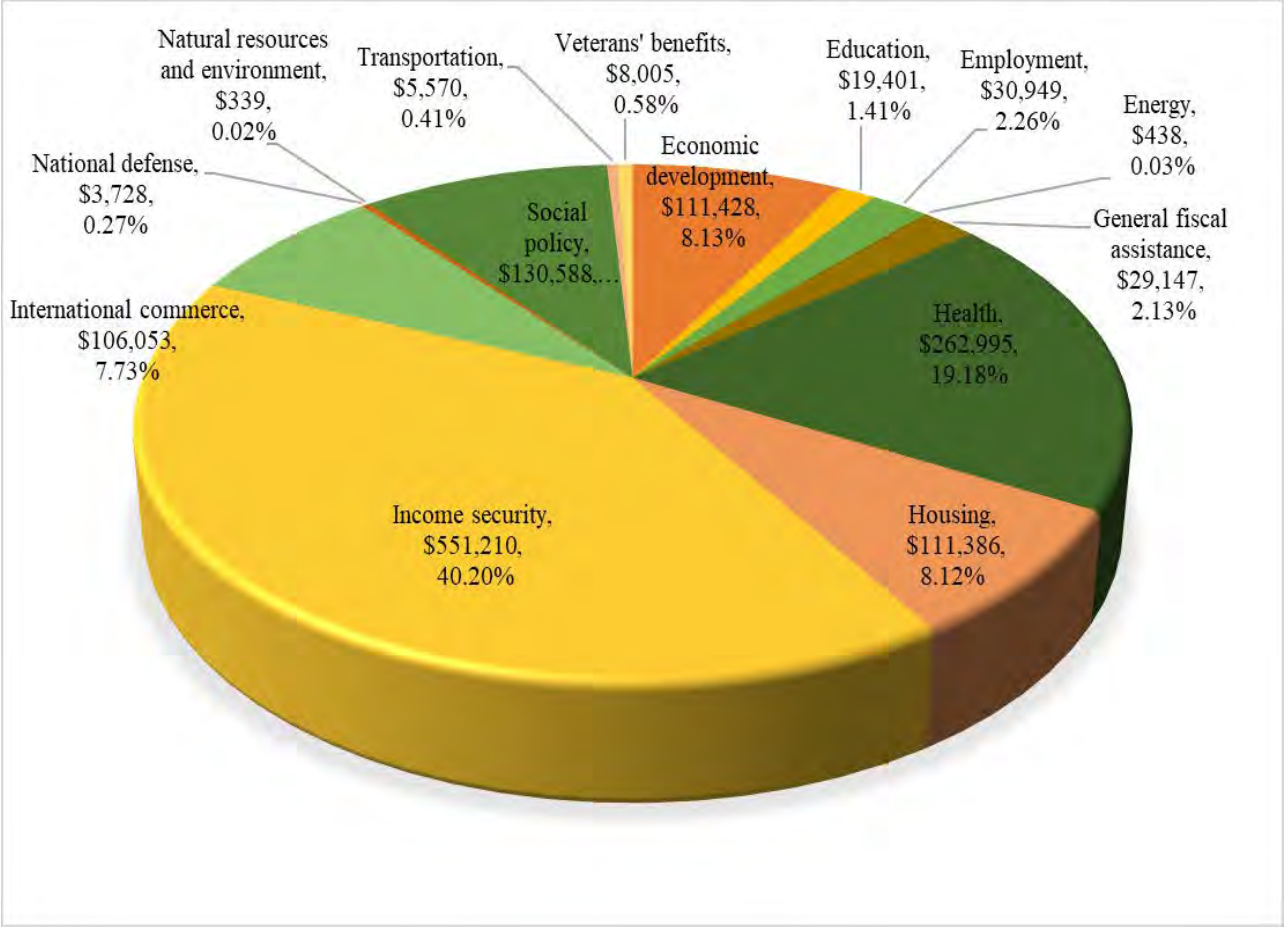
Each tax expenditure is also classified by one of 14 policy or program areas: education, health, social policy, and transportation. The policy areas largely mirror the categories used by the Joint Committee on Taxation (JCT) of the U.S. Congress, the Congressional Research Service (CRS), and the United States Department of Treasury to facilitate comparisons. Nevertheless, the categories were modified and expanded in several cases to make them more relevant to the District of Columbia. For example, the "business and commerce" category used by the JCT was changed to "economic development" to reflect a policy focus of importance in the District, and a "public safety" category was added (there are no public safety tax expenditures at the federal level).

The five policy areas with the largest number of federal conformity provisions are economic development (25 tax expenditures), income security (16), education (11), employment (7), health (7), and social policy (7). Nevertheless, ordering federal conformity tax expenditures by estimated revenue loss for each policy area (FY 2024) produces a different ranking. Income security provisions account for the largest estimated revenue loss due to the forgone revenue from employer pension contributions and earnings plans. Health provisions rank second in revenue loss for federal conformity provisions, followed by social policy, economic development, and housing. Many federal tax expenditures classified under the social policy include charitable contributions, child care, employer-provided child care, and foster care payments.

Assessing the District's local tax expenditure provisions, the four policy areas with the largest number of categorical tax expenditures are housing (35 tax expenditures), social policy (24), economic development (20), general law (15), and income security (9). Once again, the ordering of local tax expenditures by estimated revenue loss for each policy area, excluding general law and tax administration and equity, which are provisions that either aid the government in performing its duties, prevent double taxation, or help in defining the tax base, produces a different ranking.[7] General law usually represents the largest revenue forgone ($2.4b) in local tax expenditures and includes provisions directed to federal and state governments, including buildings owned by the federal, state, and foreign governments, and those more akin to base defining measures, such as the exemption of professional and personal services from the sales tax ($276m). Tax administration and equity, one of the smallest revenue-forgone policy areas (minimal), are tax provisions created to assist in tax administration and prevent double taxation, which is also excluded since they are more akin to base-defining measures. The figure below presents total local District tax expenditures and estimated revenue loss by policy area for fiscal year 2024.

[7] The estimated revenue loss in these calculations is for FY 2024.

**Table 1: Federal Conformity FY 2024 Tax Expenditures, Aggregated by Policy Area in $000s**

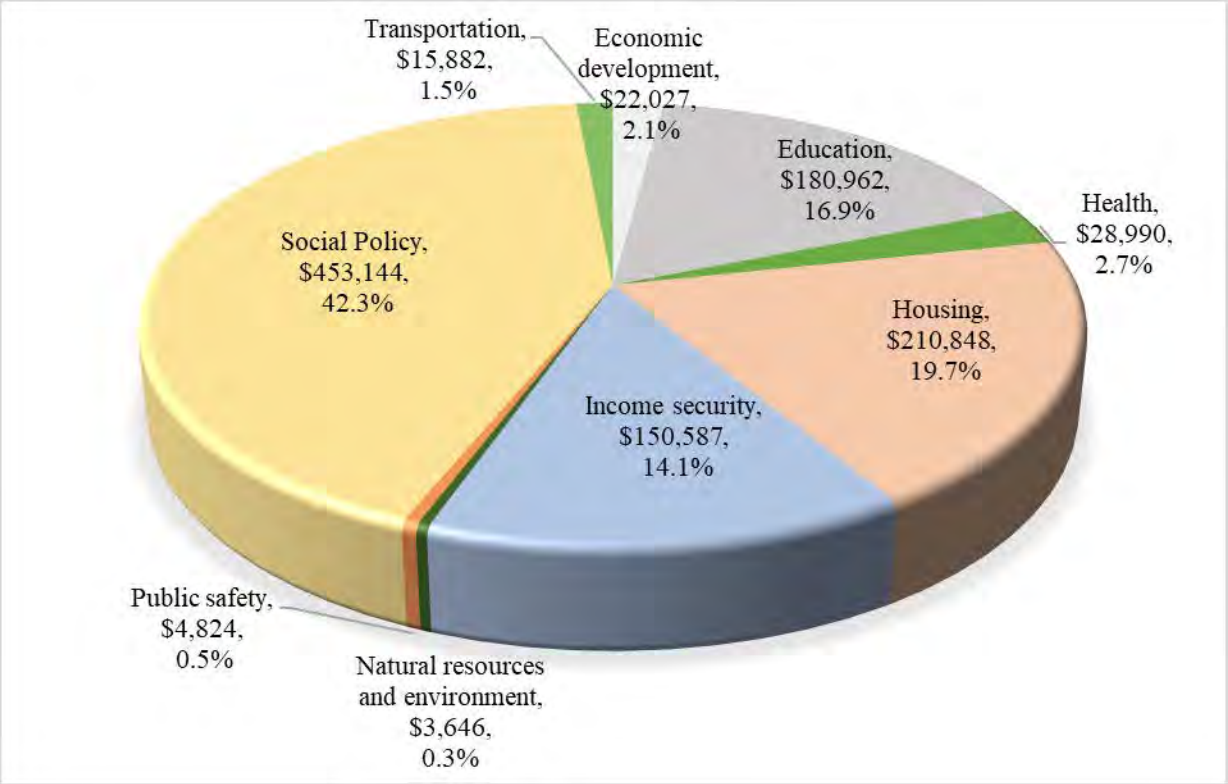


Source: ORA Analysis.
Note: Summing tax expenditures does not consider possible interactions among individual tax expenditures and, therefore, does not produce an exact estimate of the revenue that would be gained if any specific provision were removed.

As the figure below shows, excluding general law, tax administration, and equity, tax preferences targeted to social policy make up the largest category of the District's spending through the tax code. Social policy preferences include property tax exemptions for churches and charitable organizations and the sales tax exemption for groceries. The sales tax exemption for nonprofit organizations and the sales tax exemption for groceries make up the largest forgone revenue in the social policy program area at $170 million and $114.2 million, respectively. Housing tax preferences make up the second largest aggregate amount of forgone revenue, which includes the homestead deduction, the cap on property assessment increases, the property tax circuit breaker (Schedule H), and a tax credit for senior citizens and persons with disabilities. Together, they make up about 83 percent of the total housing provisions. Additionally, 72 individual tax expenditures have been

identified, of which 24 are housing-related. The total individual tax expenditure revenue forgone is $48.2 million for the 2024 fiscal year.

**Table 2: Local FY 2024 Tax Expenditures, Aggregated by Policy Area, $000**



Source: ORA Analysis. Note: The chart does not include tax expenditures not assigned to a policy area, such as the exemption of Federal and D.C. Government property from taxation, or those more akin to base defining measures, such as the exemption of professional and personal services from the sales tax, as well as tax provisions to assist in tax administration. Further, summing tax expenditures does not consider possible interactions among individual tax expenditures, so it does not produce an exact estimate of the revenue that would be gained were any specific provision removed.

**Important Caveats**

Caution about interpreting the revenue loss estimates in the tax expenditure budget deserves emphasis. The forgone revenue estimate is intended to measure what is being "spent" through the tax system or the amount of relief or subsidy provided through that provision. Nevertheless, the forgone revenue is *not* identical to the amount of revenue that could be gained by repealing the tax expenditure. There are three main reasons why:

- First, the revenue loss estimates are "static" and do not reflect behavioral changes that might occur if a tax expenditure were repealed. For example, if the District eliminated the local supplement to the federal earned income tax credit, people might reduce their work hours, and their income tax payments could also drop.

- Second, the revenue loss for each tax expenditure is estimated independently, which does not account for interaction effects among different tax provisions. For example, DC law establishes that taxpayers may not claim the mortgage interest deduction, which is a part of the itemized deduction on Schedule A of the individual income tax return, and the

standard deduction. If the mortgage interest deduction were abolished, more taxpayers might claim the standard deduction.

- Third, the D.C. government may be unable to collect the full amount owed due to administrative reasons. For example, if the District disallowed for local income tax purposes an exemption or exclusion that is allowed on the federal income tax (a process known as "decoupling"), the District would probably not recoup all the forgone revenue. That is because taxpayers would have to make a separate calculation on their District income taxes to add back the dollars that had been excluded, and compliance with this requirement would not be universal (nor would audits detect all violations).

Because of the factors described above, the total forgone revenue from tax expenditures is *not* equivalent to the sum of the individual estimates of forgone revenue. As the U.S. Government Accountability Office has stated:

While sufficiently reliable as a gauge of general magnitude, the sum of the individual revenue loss estimates has important limitations in that any interactions between tax expenditures will not be reflected in the sum … Thus, the revenue loss from all or several tax expenditures together might be greater or less than the sum of the estimated revenue losses from the individual tax expenditures, and no measure of the size or the magnitude of these potential interactions or behavioral responses to all or several tax expenditures is available.[8]

**Methodology**

Summary statistics from the Office of Tax and Revenue (OTR) from D.C. tax returns were an important source of data for the tax expenditure budget and were particularly useful for estimating the forgone revenue from local income tax provisions. Unfortunately, in many instances, tax expenditures cannot be estimated from available tax data because they involve income, property, or economic activity that is not taxed, and the relevant information is never reported to the tax office. Therefore, ORA often uses data from federal sources (such as the Census Bureau and the Bureau of Economic Analysis) and D.C. government agencies to estimate the number of beneficiaries and the revenue lost from certain tax expenditures.

OTR generally lacks information on federal conformity income tax expenditures because the amounts excluded are not reported, and the amounts deducted are subtracted from federal adjusted gross income, which is the starting point for a D.C. income tax return. Therefore, ORA's federal conformity estimates represent a District of Columbia portion of the nationwide tax expenditure estimates prepared by the JCT.[9] ORA estimated the D.C. portion using two fractions: (1) a ratio representing the D.C. share of the relevant activity or population, such as D.C. taxable income divided by national taxable income, and (2) a ratio representing the D.C. average tax rate divided by the U.S. average tax rate.

Because of the methodological challenges and data issues, it is important to view the revenue estimates as indicating orders of magnitude rather than providing precise point estimates.

[8] U.S. Government Accountability Office, Government Performance and Accountability: Tax Expenditures Represent a Substantial Federal Commitment and Need to Be Reexamined (GAO-05-960, September 2005), p. 3.

[9] ORA additionally uses tax expenditure estimates from the U.S. Department of the Treasury and the Congressional Budget Office.

In addition, U.S. Internal Revenue Service rules provide that "No statistical tabulation may be released outside the agency with cells containing data from fewer than three returns" in order to protect the confidentiality of individual tax records.[10] Tax expenditures with fewer than three claimants are, therefore, listed in this report as "no estimate," except for real property tax expenditures, for which different rules apply.[11]

**Key Terms for Summary Tables**

- Too small: According to the JCT, a federal conformity tax expenditure with positive forgone revenue of less than $50 million annually refers to a district's revenue loss from conforming to the federal policy, which would be very close to zero.

- $0: refers to a federal conformity or local tax expenditure with forgone revenue that was $0 or not applicable. The federal conformity tax expenditure estimates are shown separately for individuals and corporations. Some federal tax provisions apply only to corporations or individuals. Therefore, '$0' will refer to the federal conformity tax expenditure estimate for which the federal tax provision is non-applicable.

- sunset means there will be no revenue loss because the provision has expired.

- minimal: refers to a local tax expenditure for which precise data are lacking, but the forgone revenue is estimated to be less than $50,000 annually.

- no estimate: refers to a local tax expenditure for which precise data are lacking but for which the revenue loss might not be minimal. In addition, "no estimate" refers to cases in which calculations cannot be made because there are fewer than three claimants. As previously noted, to protect the confidentiality of individual tax records, U.S. Internal Revenue Service rules provide that "No statistical tabulations may be released with cells containing data from fewer than three returns."

Finally, some tax provisions have changed since the preliminary listing in the Fiscal Year 2023 Approved Budget and Financial Plan (noted with asterisks on the tables below).

**Comments Welcomed**

The Office of Revenue Analysis hopes this report will provide clear and concise information for policymakers and the public and contribute to a more informed discussion of budget and tax policy

[10] U.S. Internal Revenue Service, Publication 1075, "Tax Information Security Guidelines for Federal, State, and Local Agencies and Entities" (January 2014), p. 116. Even if the taxpayers are not specifically identified, it might be possible for someone to figure out the confidential information from an estimate of revenue involving so few people or businesses.

[11] D.C. Official Code § 47-1001 states that, "The Mayor shall publish, by class and by individual property, a listing of all real property exempt from the real property tax in the District. Such listing shall include the address, lot and square number, the name of the owner, the assessed value of the land and improvements of such property, and the amount of the tax exemption in the previous fiscal year." IRS rules do not affect real property taxation because the federal government does not impose a real property tax.

in the District of Columbia. ORA welcomes comments on the report and will use the feedback to improve future versions.

# Summary Data on District of Columbia Tax Expenditures

# I. Federal Conformity Tax Expenditures

(Individual and Corporate Income Taxes)

| # | Name of Tax Expenditure | Program Area | Year Enacted | Internal Revenue Code Section | Revenue Forgone ($ in thousands) FY 2024 | FY 2025 | FY 2026 | FY 2027 |

# PART I: FEDERAL CONFORMITY TAX EXPENDITURES

## Income Tax

*EXCLUSIONS*

# 1. Capital gains on assets transferred at death

Internal Revenue Code Sections: 1001, 1014, 1023, 1040, 1221, and 1222
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1921

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $39,801 | $41,301 | $43,686 | $46,276 |
| **Total** | **$39,801** | **$41,301** | **$43,686** | **$46,276** |

DESCRIPTION: A capital gains tax are taxes generally levied "on the increased value of a capital asset."[12] That is, the difference between the final sales price and the original cost of the asset. When property is transferred upon an owner's death, unrealized capital gains on the property are excluded from taxable income. The basis of taxation for the heir is the market value of the property when the owner died, rather than the original cost of the asset (this is sometimes called a "step-up" in basis). Income tax is therefore not imposed on any appreciation that occurs before death.

PURPOSE: Although the original rationale for the exclusion is not clear and was never indicated in the legislative history of the provision, a justification currently used is that death should not trigger recognition of income.[13] One author notes that, "Part of the rationale for step-up in basis was that the gains were subject to the estate tax."[14] In addition, there would be an administrative burden both for taxpayers and the IRS to determine the original price of assets that were purchased long ago.

IMPACT: The Congressional Research Service states that, "The exclusion of capital gains at death is most advantageous to individuals who need not dispose of their assets to achieve financial liquidity. Generally speaking, these individuals tend to be wealthier. The deferral of tax on the appreciation involved, combined with the exemption for the appreciation before death, is a significant benefit for those investors and their heirs."[15]

Regarding efficiency, the failure to tax capital gains transferred at death encourages "lock-in" of assets (holding the same assets even though portfolio change might otherwise be more beneficial).[16] CRS points out that, "Lower capital gains taxes may disproportionately benefit real estate investments and may cause corporations to retain more earnings than would otherwise be the case,

[12] U.S. Senate, Committee on the Budget, Tax Expenditures: Compendium of Background Material on Individual Provisions, Senate Print 176-24, prepared by the Congressional Research Service (December 2022), p. 449

[16] Ibid.

thus resulting in efficiency losses. At the same time, lower capital gains taxes reduce the distortion that favors corporate debt over equity, which produces an efficiency gain." [17]

[17] U.S. Senate, Committee on the Budget, p. 452.

***Income Tax***
*Exclusions*

## 2. Capital gains on assets transferred as a gift

Internal Revenue Code Section: 1015,1023, 1040, 1221, and 1222.
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1921

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $1,905 | $10,924 | $6,097 | $127 |
| **Total** | **$1,905** | **$10,924** | **$6,097** | **$127** |

DESCRIPTION: When property is transferred as a gift during the lifetime of the owner, unrealized capital gains on the property are excluded from taxable income. The basis of taxation is the original cost of the asset paid by the donor, but the tax is not imposed upon the transfer. In addition, tax can be avoided entirely if the recipient holds the asset until death, when it can be transferred to an heir without triggering capital gains taxation.

PURPOSE: Although the original rationale for the exclusion is not clear, a justification currently used is that a gift should not trigger a recognition of income.[18] In addition, another rationale might be that the transfer is subject to the gift tax.

IMPACT: The impact of the capital gains tax exclusion for gifts is somewhat like the exclusion for assets transferred at death (see Tax Expenditure #1, described on pages 39 and 40). The exclusion of capital gains on gifts will be most advantageous to individuals who do not need to dispose of their assets to achieve financial liquidity, and to those who have more valuable assets. These individuals tend to be wealthier. In addition, the exclusion for capital gains on gifts encourages the "lock-in" of assets (maintaining the same assets even though portfolio change might otherwise be more beneficial).

*Exclusions*

## 3. Cash accounting, other than agriculture

Internal Revenue Code Sections: 446 and 448
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1916

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $932 | $932 | $932 | $932 |
| Personal Income Tax Loss | $3,344 | $3,478 | $4,013 | $4,415 |
| **Total** | **$4,276** | **$4,410** | **$4,945** | **$5,346** |

DESCRIPTION: Employee-owned personal service businesses[19] and other small businesses with average annual gross receipts capped at $25 million[20] have the option of using the cash method of accounting instead of the accrual method. Using the cash method for tax purposes effectively defers corporation and personal income taxes by allowing qualified businesses to record income when it is received rather than when it is earned (the accrual method).

PURPOSE: The purpose of the exclusion is to simplify record keeping and eliminate an additional drain on the working capital of small businesses.

IMPACT: Small businesses and personal service corporations benefit from this provision. The Congressional Research Service states that cash accounting allows businesses to exercise "greater control over when receipts and expenses are recognized for tax purposes. By shifting income or expenses from one year to the next, a business can defer the payment of taxes on income that would be recognized sooner under the accrual method, or it can take advantage of credits or net operating losses that otherwise may expire. As noted earlier, the cash-basis method of accounting entails lower tax compliance costs for small business owners."[21]

[19] This category includes businesses in health, law, accounting, engineering, architecture, actuarial science, performing arts, or consulting.

*Exclusions*

## 4. Credit union income

Internal Revenue and U.S. Code Sections: 501(c)(14)(A) and 12 USC 1768
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1937

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $4,289 | $4,595 | $5,055 | $5,361 |
| Personal Income Tax Loss | $0 | $0 | $0 | $0 |
| **Total** | **$4,289** | **$4,595** | **$5,055** | **$5,361** |

DESCRIPTION: The income of a credit union is exempt from corporate income tax. Credit unions are non-profit cooperatives organized by people with a common bond (such as membership in the same profession) that distinguishes them from the public. Members of the credit union pool their funds to make loans to one another. The earnings that the credit union distributes to its depositors (as opposed to earnings that it retains) are subject to taxation.

Credit unions initially gained tax-exempt status in 1934[22] when they were included in a broader exemption for domestic building and loan associations. In 1951, a specific tax exemption for credit unions was enacted.

PURPOSE: CRS notes that "Credit unions have never been subject to the federal income tax. Initially, the Attorney General of the United States ruled that credit unions were exempt from income tax because of their similarity to domestic building and loan associations—whose business was at one time confined to lending to members—and cooperative banks operated for mutual purposes, which were specifically exempt by Revenue Acts."[23] Further, according to the U.S. Government Accountability Office (GAO), credit unions "continue to be exempt because of their cooperative, not-for-profit structure, which is distinct from other depository institutions, and because credit unions have historically emphasized serving people of modest means."[24]

IMPACT: Credit unions and their members benefit from this provision. The Congressional Research Service states that "For a given addition to retained earnings, this tax exemption may translate into higher dividends and lower interest rates on loans for credit union members relative to for-profit banks."[25]

[22] Erica York (January 30, 2018). Reviewing the Credit Union. The Tax Exemption. Available at https://taxfoundation.org/reviewing-credit-union-tax-exemption/
[23] U.S. Senate, Committee on the Budget, Tax Expenditures: Compendium of Background Material on Individual Provisions, Senate Print 117-24, prepared by the Congressional Research Service (December 2022), p. 342
[24] U.S. Government Accountability Office, "Financial Institutions: Issues Regarding the Tax-Exempt Status of Credit Unions," Highlights of GAO-06-220T, Testimony before the Committee on Ways and Means, House of Representatives, November 3, 2005.
[25] U.S. Senate, Committee on the Budget, p. 342.

Proponents of the exemption emphasize that credit unions are directed by volunteers for serving their members, rather than maximizing profits. CRS also points out that, "supporters argue that credit unions are subject to certain regulatory constraints not required of other depository institutions and that these constraints reduce the competitiveness of credit unions. For example, credit unions may only accept deposits of members and lend only to members, other credit unions, or credit union organizations."[26]

On the other hand, "Proponents of removing the taxation exemption argue that deregulation has led to increased competition among all depository institutions, including credit unions, and the tax exemption gives credit unions an unwarranted advantage over other depository institutions. Large credit unions may have tax advantages over similar sized banks as a result of the exemption. They argue that depository institutions should have a level playing field for market forces to allocate resources efficiently."[27] The U.S. Treasury Department's 1984 tax reform report to President Reagan proposed repealing the exclusion of credit union income on precisely those grounds.[28]

It is also not clear to what extent credit unions serve people of low or moderate incomes and pass on the savings from the tax exclusion to credit union members. In testimony to the U.S. House Committee on Ways and Means in November 2005, a GAO official stated that, "[S]ome studies, including one of our own, indicate that credit unions serve a slightly lower proportion of households with low and moderate incomes than banks."[29]

*Exclusions*

## 5. Distribution from redemption of stock to pay taxes imposed at death

Internal Revenue Code Section: 303
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1950

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $115 | $115 | $115 | $115 |
| **Total** | **$115** | **$115** | **$115** | **$115** |

DESCRIPTION: "When a shareholder in a closely-held business dies, a partial redemption of the stock (selling the stock back to the corporation) is treated as a sale or exchange of an asset eligible for long-term capital gain treatment."[30] The treatment of the redemption as a capital gain means that there is a "step up" in basis: the stock is valued for purposes of federal income tax as of the date that it was transferred to the decedent's heir or heirs, rather than the value at the initial time of purchase by the decedent. As a result, there will be little or no federal tax due on the redemption (depending on the exact timing of the redemption).[31]

To qualify for this tax benefit, at least 35 percent of the decedent's estate must consist of the stock of the corporation. The benefits of the exclusion cannot exceed the estate taxes and expenses (funeral and administrative) that are incurred by the estate.

PURPOSE: According to the Congressional Research Service, this provision was adopted due to "congressional concern that estate taxes would force some estates to liquidate their holdings in a family business. There was further concern that outsiders could join the business, and the proceeds from any stock sales used to pay taxes would be taxable income under the income tax."[32]

IMPACT: Family businesses benefit from this provision because it creates an incentive to sell stock back to the business to pay estate taxes. CRS observes that, "There are no special provisions in the tax code, however, for favorable tax treatment of other needy redemptions, such as to pay for medical expenses. To take advantage of this provision, the decedent's estate does not need to show that the estate lacks sufficient liquid assets to pay taxes and expenses. Furthermore, the proceeds of the redemption do not have to be used to pay taxes or expenses."[33]

[30] U.S. Senate, Committee on the Budget, p.579.
[31] There could be some tax liability if the stock appreciates between the time it is bequeathed to the heir or heirs and the time it is sold back to the closely held business.

[33] Ibid.

***Income Tax***
*Exclusions*

## 6. Gain on like-kind exchanges

Internal Revenue Code Section: 1031
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1921

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $1,769 | $1,622 | $1,622 | $1,622 |
| Personal Income Tax Loss | $10,797 | $10,415 | $9,780 | $9,526 |
| **Total** | **$12,566** | **$12,037** | **$11,402** | **$11,148** |

DESCRIPTION: When business or investment property is exchanged for property of a "like kind," no gain or loss is recognized on the exchange and therefore no tax is paid on any appreciation in the property's value at the time of the exchange. This exclusion contrasts to the general rule that any sale or exchange of money or property is a taxable event.[34]

PURPOSE: According to the Congressional Research Service, the rationale for allowing these tax-free exchanges is "that the investment in the new property is merely a continuation of the investment in the old."[35]

IMPACT: CRS states that, "The like-kind exchange rules have been liberally interpreted by the courts to allow tax-free exchanges of real property of the same general type but of very different quality and use. All real estate, in particular, is considered 'like-kind'… The provision is very popular with real estate interests, some of whom specialize in arranging property exchanges. It is useful primarily to persons who wish to alter their real estate holdings without paying tax on their appreciated gain ... Stocks and financial instruments are generally not eligible for this provision, so it is not useful for rearranging financial portfolios."[36]

In addition, the exclusion serves to "simplify transactions and make it less costly for businesses and investors to replace property. Taxpayers gain further benefit from the loose definition of 'like-kind,' because they can also switch their property holdings to types they prefer without tax consequences. This might be justified as reducing the inevitable bias a tax on capital gains causes against selling property, but it is difficult to argue for restricting the relief primarily to those taxpayers engaged in sophisticated real estate transactions."[37] The "like-kind" rule creates an economic distortion by encouraging investment in land and buildings even when real estate might not represent the most productive use of capital. A *New York Times* article stated that, "Because it allows farmers to avoid capital gains taxes on land swaps, the tax break provides an incentive to sell farmland coveted by developers and buy property in less desirable and more remote areas."[38]

***Income Tax***
*Exclusions*

## 7. Imputed interest

Internal Revenue Code Sections: 163(e), 483, 1274 and 1274A
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1964

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | too small | too small | too small | too small |
| Personal Income Tax Loss | $978 | $978 | $1,060 | $1,141 |
| **Total** | **$978** | **$978** | **$1,060** | **$1,141** |

Note: "Too small" means that the nationwide federal revenue impact was estimated as $50 million or less.

DESCRIPTION: For debt instruments that do not bear a market rate of interest, the Internal Revenue Service assigns or "imputes" a market rate to estimate interest payments for tax purposes. The imputed interest must be included as income to the recipient and is deducted by the payer. There are several exceptions to this general rule, covering debt associated with the sale of property when the total sales price is no more than $250,000; the sale of farms or small businesses by individuals when the sales price is no more than $1 million; and the sale of a personal residence. An interest rate no greater than 9 percent may not be assigned to debt instruments given in exchange for real property for amounts less than an inflation-adjusted maximum (currently $4.6 million or $3.3 million, depending on the debt instrument used).

The tax expenditure is the revenue loss caused by the exceptions to the imputed interest rule listed above. A common example of this exemption is a low-interest, no-interest, or "gift" loan involved in the sale of property between family members.

PURPOSE: The purpose of the exclusion is to reduce the tax burden on the sales of homes, small businesses, and farms, and to allow buyers to finance the purchase of property that would otherwise be unaffordable under prevailing market rates and conditions. Essentially, the exclusion allows a limited set of transactions to take place without restrictions on seller financing. The restrictions on the exclusion are intended to prevent the tax avoidance that may result if the seller charges an artificially high sales price (to shift income toward tax-favored capital gains) and an artificially low interest rate (to shift income out of taxable interest payments).

IMPACT: Sellers of residences, small businesses, and farms who would have to pay tax on interest they do not charge, and otherwise will not receive, benefit from this provision. The exceptions to the imputed interest rules are generally directed at "seller take-back" financing, in which the seller of the property receives a debt instrument (note, mortgage) in return for the property. This financing mechanism allows the sellers to shift taxable income between tax years and thus delay the payment of taxes.[39] The imputed interest rules have been less important since the Tax Reform Act of 1986 took effect, because tighter depreciation rules limited the arbitrage opportunities from seller-financed transactions.[40]

[39] U.S. Senate, Committee on the Budget, p. 504.
[40] Ibid, p. 505.

***Income Tax***
*Exclusions*

## 8. Interest on small-issue qualified private-activity bonds

Internal Revenue Code Sections: 103, 141, 144, and 146
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1968

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | too small | too small | too small | too small |
| Personal Income Tax Loss | $107 | $107 | $107 | $107 |
| **Total** | **$107** | **$107** | **$107** | **$107** |

DESCRIPTION: Interest income on state and local bonds that are used to finance loans of $1 million or less for the construction of private manufacturing facilities is tax-exempt. These bonds, which are known as "small-issue industrial development bonds" (IDBs) are classified as private-activity bonds rather than governmental bonds because a substantial portion of the benefits accrues to private individuals or businesses.[41]

The $1 million loan limit for a single project may be raised to $10 million if the aggregate amount of related capital expenditures (including those financed by tax-exempt bond proceeds) made over a six-year period is not expected to exceed $10 million. Total borrowing for any one borrower is limited to $40 million. The private-activity bond annual volume cap is equal to the greater of $110 per state resident or $335.115 million in 2022.[42] The small-issue IDBs are also subject to caps on the volume of private-activity bonds each state can issue.

State and local governments initially faced no restrictions on using tax-exempt bonds for economic development. Congress first imposed limits on the amount of bond issuance and the size of the projects supported in 1968.

PURPOSE: The Congressional Research Service notes that small-issue IDBs are supported by Congress to promote investment and jobs in their communities.[43] Because the interest on the bonds is tax-exempt, buyers are willing to accept lower interest rates for the small-issue IDBs than they would for taxable securities, which in return reduce the cost of financing for the manufacturers.

IMPACT: CRS states that, "since interest on the bonds is tax exempt, purchasers are willing to accept lower before-tax rates of interest than on taxable securities. These low rates allow issuers to offer loans to manufacturing businesses at reduced interest rates."[44] However, any increase in investment, jobs, and tax base obtained by communities from their use of these bonds likely is offset by the loss of jobs and tax base elsewhere in the economy. "National benefit could arise from relocating jobs and tax base to achieve social or distributional objectives. The use of the bonds, however, is not targeted to specific geographic areas that satisfy explicit federal criteria such as median income or unemployment …"[45] CRS also points out that, "With a greater supply of public

[41] U.S. Senate, Committee on the Budget, p. 535.
[42] Ibid, pp. 535-536.
[43] Ibid, p. 536.
[44] Ibid.
[45] Ibid., p. 537.

bonds, the interest rate on bonds necessarily increases to lure investors. In addition, expanding the availability of tax-exempt bonds also increases the assets available to individuals and corporations to shelter their income from taxation."[46]

[46] Ibid, p. 538.

***Income Tax***
*Exclusions*

## 9. Magazine, paperback and record returns

Internal Revenue Code Section: 458
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1978

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | too small | too small | too small | too small |
| Personal Income Tax Loss | too small | too small | too small | too small |
| **Total** | **too small** | **too small** | **too small** | **too small** |

Note: "Too small" means that the nationwide federal revenue impact was estimated as $50 million or less.

DESCRIPTION: Generally, if a buyer returns goods to the seller, the seller's income is reduced in the year in which the items are returned. This tax expenditure involves an exemption from this rule for publishers and distributors of magazines, paperbacks, and records (records include discs, tapes, and similar objects that contain pre-recorded sounds).

Publishers and distributors may elect to exclude from corporate or personal taxable income any goods sold during a tax year that are returned shortly after the close of the tax year. Specifically, magazines must be returned within two months and 15 days, and paperbacks and records must be returned within two months and fifteen days after the end of the tax year, respectively. This allows publishers and distributors to sell more copies to wholesalers and retailers than they expect will be sold to consumers.

PURPOSE: The purpose of the exclusion is to avoid taxing publishers and distributors of magazines, paperbacks, and records on accrued income when goods that are sold in one year are returned after the close of the year.

IMPACT: Publishers and distributors of magazines, paperbacks and records benefit from this provision. The Congressional Research Service notes that, "The special tax treatment granted to publishers and distributors of magazines, paperbacks, and records is not available to producers and distributors of other goods. On the other hand, publishers and distributors of magazines, paperbacks, and records often sell more copies to wholesalers and retailers than they expect will be sold to consumers."[47] CRS also states that the exclusion "mainly benefits large publishers and distributors."[48] In 1984, the U.S. Treasury Department's tax reform report to President Reagan recommended repealing the exclusion as an unnecessary subsidy.[49]

[47] U.S. Senate, Committee on the Budget, p. 512.

*Exclusions*

## 10. Small business stock gains

Internal Revenue Code Section: 1202 and 1045
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1993

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $7,720 | $7,605 | $7,720 | $8,181 |
| **Total** | **$7,720** | **$7,605** | **$7,720** | **$8,181** |

DESCRIPTION: Individuals and non-corporate business taxpayers can exclude from gross income a portion of the gain from the sale or exchange of qualified small business stock. The exclusion is 50 percent for qualified stock issued after August 10, 1993; 75 percent for stock acquired from February 18, 2009, to September 27, 2010; and 100 percent of any gain from the sale or exchange of qualified small business stock (QSBS) acquired after September 27, 2010.

In 2022, individuals with adjusted gross incomes (AGIs) under $83,350 for joint filers ($41,675 for single filers) pay 0 percent tax on realized long-term capital gains; the tax rate increases to 15 percent for joint filers with AGIs between $83,351 and $517,200 (single filers with AGIs between $41,676 and $459,750); finally, joint filers with AGIs above $517,200 (above $459,750 for single filers) are taxed at 20 percent.

Qualified small business stock must be acquired by a non-corporate taxpayer at the time of original issue and held for at least five years. A C corporation must issue the stock with no more than $50 million in gross assets and employs at least 80 percent of its assets in a qualified trade or business during the five-year holding period. The qualified business or trade must be a "specialized small business investment company" in any line of business except for health care, law, engineering, architecture, food service, lodging, farming, insurance, finance, or mining.

The exclusion has not been considered a preference item for computing the alternative minimum tax (AMT) for QSBS acquired after September 27, 2010. Additionally, the corporate AMT was repealed beginning in 2018.

PURPOSE: Congressional Research Service states that the exclusion is "intended to increase the flow of equity capital to new or young small firms and SSBICs in a range of industries. These firms may have difficulty raising capital from more traditional sources such as banks, angel investors, or private equity firms. The exclusion encourages a greater flow of equity capital by increasing the risk-adjusted, after-tax rate of return a taxpayer could earn by buying, holding for five years, and then selling QSBS, relative to alternative investments."[50]

IMPACT: CRS posits that the likely beneficiaries from the exclusion are high-income individuals (including pass-through business owners) who have relatively high risk tolerances, as well as angel investors and venture capital funds organized as partnerships.[51] The tax expenditure from the

[50] U.S. Senate, Committee on the Budget, pp. 573.
[51] Ibid, pp. 573 and 575.

exclusion arises from the difference between the effective capital gains tax rate (0 percent) that applies to sales or exchanges of QSBS and the maximum effective capital gains tax rate (20 percent), under both the regular income tax.[52] CRS notes that the exclusion raises some policy questions that concern its economic rationale and effectiveness. According to CRS, proponents of the exclusion "argue that it is needed to address financing gaps that interfere with the formation and growth of young small firms seeking to develop and sell innovative technologies. In their view, these gaps result from the failure of investors, banks, and other financiers to adequately grasp the risk of financing new business ventures pursuing untested but potentially profitable new products and services… established firms generally are likely to have less difficulty accessing financial capital for new technology investments."[53] Others argue that "there is no evidence that too few small start-up firms are being formed, that too many of these firms fail to grow into successful enterprises, or that financial markets systematically prevent the growth of many small start-up firms. As a result, say these critics, a policy initiative like the exclusion might do more harm than good. They are concerned that the exclusion does more to distort the domestic allocation of financial capital than it does to facilitate the creation and growth of innovative small start-up firms. More specifically, critics contend that the exclusion might be steering equity capital toward politically favored businesses and away from those with a greater potential for growth."[54]

The 2017 Tax Cuts and Jobs Act (TCJA) has renewed interest among some investors in QSBS due to the reduction in the top corporate income tax rate from 35 percent to 21 percent, which seems to have increased the interest of investors in QSBS. However, the lack of data on investment in QSBS makes it difficult to evaluate the impact of TCJA on investments in QSBS and funding outcomes for issuing firms.[55]

## 11. Discharge of certain student loan debt

Internal Revenue and U.S. Code Sections: 108(f), 20 U.S.C. 1087ee(a)(5), 20 U.S.C. §§1087(c)(4), 1087e(a)(1), and 1087dd(g)(4)
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1984

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $822 | $925 | $1,028 | $1,131 |
| **Total** | **$822** | **$925** | **$1,028** | **$1,131** |

DESCRIPTION: In general, canceled or forgiven debt, or debt that is repaid on a borrower's behalf, is considered taxable income. However, federal law allows exclusion for the discharge of student loan debt by the federal, state, or local governments; public benefit corporations that operate a state, county, or municipal hospital; and qualified educational institutions for an individual who agrees to work in a certain type of occupation or areas with unmet needs for a specified period.

Programs covered by the exclusion include loan forgiveness for teachers and public service employees under the federal direct student loan program, loan forgiveness for teachers under federal guaranteed loan programs, and loan cancelation for public service employees under the federal Perkins Loan program. Also eligible for the exclusion are loan payments made on behalf of health professionals who work in shortage areas under the National Health Service Corps Loan Repayment Program or state programs eligible for Public Health Service Act funding, as well as loan payments or forgiveness offered by state programs that recruit health care professionals to underserved or shortage areas. Beginning in 2021, this exclusion from gross income is temporarily extended to include amounts of loans discharged that were made expressly for postsecondary educational expenses by specified types of lenders, were made by a qualifying educational organization, were a private education loan, or by an organization exempt from tax under Section 501(a) to refinance a loan to an individual to assist the individual in attending such an educational organization.[56]

PURPOSE: The purpose of the exclusion is to encourage individuals to work in certain high-priority occupations (such as public health or education) or in certain locations (such as health professional shortage areas) by providing student loan forgiveness as an incentive.

IMPACT: Individuals with student loans forgiven under the program benefit from this provision. The industries and geographic areas targeted for the incentive may also benefit. The Congressional Research Service states that, "The value to an individual of excluding the discharge of student loan indebtedness from gross income depends on that individual's marginal tax rate in the tax year in which the benefit is realized. In some instances, beneficiaries are required to have served in certain types of professions or occupations, including occupations with unmet need, or that are in locations with unmet needs."[57]

[56] The temporary exclusion would end on December 31, 2025.

## 12. Earnings of Coverdell education savings accounts

Internal Revenue Code Section: 530
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1998

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $308 | $308 | $308 | $308 |
| **Total** | **$308** | **$308** | **$308** | **$308** |

DESCRIPTION: A taxpayer may establish a Coverdell education savings account (ESA) to pay for the qualified education expenses of a named beneficiary.[58] Qualified expenses include tuition, fees, books, supplies, and room and board for elementary, secondary, and higher education. There are two tax advantages to a Coverdell: 1) the earnings can grow tax-free annually until they are withdrawn, and 2) distributions or withdrawals from a Coverdell are tax-free if they are used to pay for qualified expenses. Annual contributions to a beneficiary cannot exceed $2,000 and cannot be made after the beneficiary reaches age 18 unless he or she has special needs. The annual contribution is not deductible, but any earnings on the contributions are tax-free until they are distributed.

The maximum allowable contribution is reduced for taxpayers with annual incomes over $95,000 and is phased out completely at an annual income level of $110,000 (the comparable thresholds are $110,000 and $220,000 for a joint return). The portion of the distribution attributed to principal is not taxed, but the earnings may be taxed depending on the amount of qualified higher education expenses that the beneficiary has incurred. A 6 percent tax is imposed if total contributions exceed the annual per-beneficiary limit.

A contributor may fund multiple accounts for the same beneficiary (subject to the overall $2,000 annual limit) and a student may be the designated beneficiary of multiple accounts. Except for accounts for special needs beneficiaries, Coverdell ESA balances must be fully distributed by the time beneficiaries reach the age of 30.

PURPOSE: According to the Congressional Research Service, "These benefits reflected congressional concern that families faced difficulty paying for college. They also may reflect congressional intent to subsidize middle-income families that otherwise would not qualify for need-based federal student aid."[59] The federal law that expanded eligible expenses to those incurred in connection with enrollment in public and private K-12 schools was intended to encourage families to exercise school choice to provide alternatives to the traditional public school.

IMPACT: CRS points out that families that have the wherewithal to save are more likely to benefit. Higher income families—who both have a greater ability to save and receive a larger tax benefit

[58] The program is named after the late Senator Paul Coverdell of Georgia, who was the chief sponsor of the authorizing legislation. Coverdell ESAs were previously known as "Education IRAs."
[59] Ibid, p. 700.

(due to their high tax bracket)—will tend to benefit the most from these accounts.[60] Additionally, "higher-income families also are more likely than lower income families to establish accounts for their children's K-12 education expenses. The amount of the tax benefit, particularly if the maximum contribution to an account is not made each year, is probably too small to affect a family's decision to send their children to public or private school."[61]

*Exclusions*

## 13. Earnings of qualified tuition programs

Internal Revenue Code Section: 529
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1997

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $5,345 | $5,551 | $6,168 | $6,579 |
| **Total** | **$5,345** | **$5,551** | **$6,168** | **$6,579** |

DESCRIPTION: Qualified Tuition Programs (QTPs), also known as "529 plans" for their section number in the tax code, are tax-advantaged investments used to pay for higher education and up to $10,000 of elementary and secondary school tuition expenses, apprenticeship programs expenses, fees, books, supplies and equipment required for an apprenticeship program registered and certified by the Department of Labor,[62] and up to $10,000 in student loan payments. These earnings usually grow tax-free if used to pay for qualified higher education expenses. Two types of QTPs allow people to pay in advance or save for tuition expenses for designated beneficiaries: (1) prepaid plans and (2) savings plans. Prepaid tuition plans allow account owners to make tuition payments for beneficiaries at current prices, thereby providing a hedge against inflation. Savings plans allow account owners to save and invest money on a tax-favored basis that can be used to pay for higher education expenses (tuition and fees, books, supplies, room and board).

The District of Columbia sponsors a college savings plan but does not offer a prepaid tuition plan. Nevertheless, it is possible to participate in a prepaid tuition plan outside of one's current state of residence. Only states can sponsor college savings accounts, but both states and institutions of higher education offer prepaid tuition plans.

Contributors can fund multiple QTP accounts for the same beneficiary in different states, and an individual may be the beneficiary of accounts established by different contributors. Sponsors can establish their own restrictions, and the specifics of each plan vary from state to state. One difference between QTPs and Coverdell education savings accounts (see tax expenditure #12 on the previous page) is that there are no income restrictions or annual contribution limits for QTPs. Individuals can contribute to QTPs and Coverdell plans during the same year.

Contributions to QTPs are taxable, but the earnings on contributions, as well as the distributions, are free from federal income tax. Taxpayers must reduce their QTP exclusion by the amount of any other tax-free educational assistance. Non-qualifying distributions are subject to a 10 percent penalty, and the earnings share of a non-qualifying distribution is subject to federal income tax.

PURPOSE: QTPs were established by states in response to widespread concern about the rising cost of college.[63] The purpose of the exclusion is to help families save for higher education. However, the 2017 Tax Cut and Jobs Act and the 2019 Setting Every Community Up for Retirement Enhancement Act expanded the definition of qualifying higher education expense to

[62] U.S. Senate, Committee on the Budget, p. 704.
[63] Ibid., p. 706.

include up to $10,000 per beneficiary per year for tuition expenses at a public, private, or religious elementary and secondary school; and certain expenses associated with apprenticeships as well as up to $10,000 in student loan repayments (for the beneficiary and each sibling of the beneficiary).[64] Additionally, the 2020 FAFSA Simplification excludes 529 plan distributions from an account owned by an eligible student's nonparent family members from the calculation for federal student aid starting in the 2023-2024 aid year.[65]

IMPACT: The Congressional Research Service states that the benefits of QTPs are more likely to benefit higher-income families because those taxpayers are subject to higher taxes and have the resources to save for college. Additionally, families with QTPs had about 25 times the median financial assets of those without and about 3 times the median income as families without 529 plans.[66] CRS notes that "529 plans were intended to encourage families to save for college. However, their disproportionate use by higher-income families, who are more likely to save without 529 plans, suggests these plans may not efficiently encourage college saving. Even with 529 plans, lower- and middle-income families may lack the income or have other financial priorities (like retirement savings) that make it difficult to save for college in the first place. In addition, lower- and middle-income families may be unaware of 529 plans, discouraged from investing with minimum initial contribution requirements or complex fee structures, or unfamiliar with the variety of investment options available.[67] Urban Institute researchers have questioned whether the plans impact college savings because higher-income families have the resources to set aside funding for higher education without tax incentives.[68]

*Exclusions*

## 14. Employer-provided education assistance

Internal Revenue Code Section: 127 and 3121(a)(18)
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1978

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $1,713 | $1,820 | $1,606 | $1,499 |
| **Total** | **$1,713** | **$1,820** | **$1,606** | **$1,499** |

DESCRIPTION: An employee may exclude from income certain amounts paid by an employer for education assistance, including tuition, fees, and books. The maximum exclusion is $5,250 per year. There are 3 main requirements of the educational assistance plan for the exclusion to be applicable. First, educational assistance must be provided pursuant to a written qualified educational assistance program. Second, the Plan may not discriminate in favor of highly compensated employees. Third, no more than 5 percent of the total amount paid out during the year may be paid to or for employees who are shareholders or owners of at least 5 percent or more of the business.[69] Any excess is part of an employee's gross income and is subject to income and payroll taxes. The exclusion applies whether the employer pays the expenses, reimburses the employee for expenses, or provides instruction directly. The coursework does not have to be job-related, but classes involving sports, games, or hobbies are eligible only if they are job-related.

PURPOSE: The purpose of the exclusion is to encourage employers to offer education assistance to their employees.

IMPACT: The Congressional Research Service states, "The exclusion of these benefit payments may make continuing education more affordable for employees. It also encourages employers to compensate employees through educational assistance rather than additional taxable wages or benefits. The value of the exclusion is dependent upon the amount of educational expenses furnished and the marginal tax rate."[70] CRS adds, "The availability of employer educational assistance encourages employer investment in human capital, which may be inadequate in a market economy because of spillover effects (i.e., the benefits of the investment extend beyond the individuals undertaking additional education and the employers for whom they work)."[71] The following groups of employees are much more likely to receive employer-provided educational assistance than other workers: employees in management, professional, and related jobs; full-time employees; employees who belong to labor unions; employees whose wages are in the top half of the earnings distribution; and employees at firms with 100 or more employees.[72]

President Bush's Advisory Panel on Federal Tax Reform recommended repealing this exclusion (as well as several other exclusions for fringe benefits) because "The favorable tax treatment of

## 15. Employer-provided tuition reduction

Internal Revenue Code Section: 117(d)
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1984

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $321 | $321 | $428 | $428 |
| **Total** | **$321** | **$321** | **$428** | **$428** |

DESCRIPTION: Tuition reductions for employees of eligible educational institutions may be excluded from federal taxable income if the reductions do not represent payment for services. An eligible education institution normally maintains a regular faculty and curriculum. It normally has a regularly enrolled body of pupils or students in attendance at the place where its educational activities are regularly carried on.[74] The exclusion also applies to tuition reductions for an employee's spouse and dependent children.

PURPOSE: The Congressional Research Service states that "Language regarding tuition reductions was added by the Deficit Reduction Act of 1984 as part of legislation codifying and establishing boundaries for tax-free fringe benefits; similar provisions had existed in regulations since 1956."[75]

IMPACT: CRS notes that "The exclusion of tuition reductions lowers the net cost of education for employees of educational institutions … Educational institutions provide tuition reductions to employees as a fringe benefit, which may reduce labor and job turnover costs. In addition, tuition reductions for graduate students providing research and teaching services for the educational institution also contribute to reducing the educational institution's labor costs. Both employees and graduate students may view the reduced tuition as a benefit of their employment that encourages education. The exclusion may, however, pass some of the education institution's labor costs on to other taxpayers."[76]

[74] U.S. Senate, Committee on the Budget, p. 717.
[75] Ibid, p. 719.
[76] Ibid, pp. 718-719.

*Exclusions*

## 16. Interest on education savings bonds

Internal Revenue Code Section: 135
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1988

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $33 | $33 | $41 | $41 |
| **Total** | **$33** | **$33** | **$41** | **$41** |

DESCRIPTION: Part or all the interest earned on U.S. Series EE or Series I savings bonds can be excluded from taxable income if the bonds are used to finance higher education expenses for the taxpayer, the taxpayer's spouse, or the taxpayer's dependents. The bonds must have been issued after 1989, and the owner must have been at least 24 years old at the time of issuance. The proceeds must be used for qualified higher education expenses (which generally cover tuition and fees but not room and board) in the same year they are redeemed.

The tax exemption is phased out for taxpayers with AGI between $128,650 and $156,650 if married filing jointly ($83,200 and $98,200 for other taxpayers) in tax year 2022.[77] Taxpayers with incomes above those levels did not qualify for any exclusion.

PURPOSE: The purpose of the exclusion is to encourage lower- and middle-income families to save for their children's college education. The legislation "reflects a long-held congressional concern that families have difficulty paying for college, particularly with the cost of higher education often rising faster than prices in general."[78]

IMPACT: The Congressional Research Service states that "Education savings bonds provide lower- and middle-income families with a tax-favored way to save for higher education that is convenient and often familiar. The benefits are greater for families who live in states and localities with high-income taxes because the interest income from Series EE and Series I Bonds is exempt from state and local income taxes."[79]

Several restrictions limit the value of education savings bonds as a college savings vehicle. CRS observes that "Since the interest exclusion for Education Savings Bonds can be limited when the bonds are redeemed, families intending to use them for college expenses must predict their income eligibility far in advance. They must also anticipate the future costs of tuition and fees and whether

## *Income Tax*
*Exclusions*

# 17. Interest on state and local private-activity bonds issued to finance education facilities

Internal Revenue Code Sections: 103, 141,142(k), 145, 146, and 501(c)(3)
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1968

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $622 | $622 | $746 | $746 |
| Personal Income Tax Loss | $2,143 | $2,143 | $2,357 | $2,357 |
| **Total** | **$2,765** | **$2,765** | **$3,103** | **$3,103** |

DESCRIPTION: Interest income on state and local bonds used to finance the construction of private non-profit educational facilities (such as classrooms and dormitories) and qualified public educational facilities (QPEF) is tax-exempt. These bonds are classified as private-activity rather than governmental bonds because a substantial portion of the benefits accrues to individuals or private organizations instead of the public.

Bonds issued for non-profit educational facilities are not subject to the state volume cap on private-activity bonds (which is $335.115 million as of 2022), but there is a cap of $150 million on the amount of bonds any non-profit institution can have outstanding. Public colleges and universities can also issue tax-exempt bonds to finance facilities owned by private, for-profit corporations, provided the school has a public-private agreement with the local education authority. Tax-exempt bonds issued for qualified public education facilities are subject to a separate state-by-state cap equal to $10 per capita or $5 million per year, whichever is greater.[81]

PURPOSE: The purpose of the education private-activity bonds is to support the construction or substantial rehabilitation of educational facilities by subsidizing low-interest loans. Investors purchase the bonds at low interest rates because the income from them is tax-free.

IMPACT: The tax-exempt bonds benefit educational institutions by helping them finance facilities at reduced interest rates. Some benefits of the tax exemption also flow to bondholders. According to the Congressional Budget Office and the Joint Committee on Taxation, education facility bonds accounted for 17 percent of total state and local private-activity bond issuance from 1991 to 2007, growing 11 percent annually.[82]

The Congressional Research Service observes that non-profit organizations may be "using their tax-exempt status to subsidize goods and services for groups that might receive more critical scrutiny if they were subsidized by direct federal expenditure."[83] Furthermore, "As one of many categories of tax-exempt private-activity bonds, nonprofit educational facilities and QPEFs have increased the financing costs of bonds issued for more traditional public capital stock. The higher

[81] U.S. Senate, Committee on the Budget, pp. 725-726.

[83] U.S. Senate, Committee on the Budget, p. 727.

cost arises because the QPEFs compete for a relatively fixed amount of available investment capital. In addition, this class of tax-exempt bonds has increased the supply of assets that individuals and corporations can use to shelter income from taxation."[84]

[84] U.S. Senate, Committee on the Budget, p. 727.

***Income Tax***
*Exclusions*

## 18. Interest on state and local private-activity student loan bonds

Internal Revenue Code Sections: 103, 141, 144(b), and 146
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1965 (general exclusion for state and local bonds was enacted in 1913, but student loan bonds were not offered until the enactment of the Higher Education Act of 1965)

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $124 | $124 | $124 | $124 |
| Personal Income Tax Loss | $214 | $214 | $214 | $214 |
| **Total** | **$339** | **$339** | **$339** | **$339** |

DESCRIPTION: Student loan bonds, which are issued by state and local governments to finance student loans at a reduced rate, represent another type of tax-exempt, private-activity bond. These bonds are subject to a state's annual volume cap on private-activity bonds and, therefore, must compete for tax-exempt financing with all other private-activity bonds subject to the cap. The tax expenditure represents the revenue loss from excluding interest on the bonds.

Before July 2010, the tax expenditure included the revenue loss from federal government loan programs (such as Stafford, PLUS, and Consolidation loans) that were carried out through private lenders and financed in part by tax-exempt debt. Since July 1, 2010, the federal government has been providing loans directly instead of operating through private lenders. Nevertheless, there is an ongoing revenue loss from loans already issued.

PURPOSE: The purpose of the private-activity bonds is to increase access to higher education by subsidizing low-interest loans. Investors purchase the bonds at below-market interest rates because the income from them is tax-free.

IMPACT: Students benefit from the exclusion, which may also generate spillover benefits to society from a more educated citizenry. The lower interest rate on the bonds may increase the availability of student loans by lowering the cost of government borrowing, but it does not reduce the interest rate charged to students, which is set by federal law. In 2021, $2.97 billion of student loan bonds were issued. Students present a high credit risk due to their uncertain earning prospects, meaning that the private sector may not supply enough capital for higher education due to the risk. Subsidies can help correct this market failure.[85]

The Congressional Research Service points out that other federal programs, such as subsidized direct loans, may be sufficient to address the market failure. Tax-exempt financing also involves potential costs. CRS states, "As one of many categories of tax-exempt private-activity bonds, bonds issued for student loans have increased the financing costs of bonds issued for public capital stock and have increased the supply of assets available to individuals and corporations to shelter their income from taxation."[86]

[85] U.S. Senate, Committee on the Budget, p. 712.
[86] Ibid., p. 714.

***Income Tax***
*Exclusions*

## 19. Scholarship and fellowship income

Internal Revenue Code Section: 117
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1954

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $4,875 | $5,074 | $5,970 | $6,368 |
| **Total** | **$4,875** | **$5,074** | **$5,970** | **$6,368** |

DESCRIPTION: Scholarships and fellowships are excluded from personal taxable income to the extent that they cover tuition and course-related expenses of students enrolled in primary, secondary, or higher education. The exclusion covers awards based on financial need (such as Pell Grants) and those based on academic achievement or merit (such as National Merit Scholarships). Eligible educational institutions must maintain a regular teaching staff and curriculum and have a regularly enrolled student body attending classes where the school conducts its instructional activities.

PURPOSE: This exclusion was originally enacted to clarify the status of education grants. Until this provision was enacted in 1954, scholarships and fellowships were included in gross income unless it could be proven that the money was a gift. The Congressional Research Service observes that the present rationale for the exclusion, in light of the expansion of need-based grants, "rests upon the hardship that taxation would impose. If the exclusion were abolished, awards could arguably be increased to cover students' additional tax liability, but the likely effect would be that fewer students would get assistance."[87]

IMPACT: CRS states, "The exclusion reduces the net cost of education for students who receive financial aid through scholarships or fellowships. The potential benefit is greatest for students at higher-tuition schools, as they can exclude more scholarship or fellowship assistance."[88] As a result, students attending private colleges and universities may claim a disproportionate share of the benefits.

CRS adds that "The exclusion provides greater benefits to taxpayers with higher marginal tax rates. While students themselves generally pay tax at low (or even zero) marginal rates, many are members of families who are subject to higher rates. Determining the proper taxpaying unit for college students complicates assessment of the exclusion."[89]

## 20. Employee awards

Internal Revenue Code Sections: 74(b), 74(c) and 274(j)
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1986

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $535 | $535 | $535 | $535 |
| **Total** | **$535** | **$535** | **$535** | **$535** |

DESCRIPTION: Certain awards of tangible personal property (in 2017, the definition of "tangible personal property" was revised to exclude cash, gift cards, and certain other non-tangible personal property) given to employees for length of service or safety practices or any designated prizes and awards that are transferred to qualified charities are excluded from personal taxable income, departing from the standard treatment of prizes and awards as taxable income. The exclusion amount is limited to $400 per employee but can rise to $1,600 if it is part of a qualified employee achievement award plan that does not discriminate in favor of highly compensated employees. The employer is also allowed to deduct the cost from its taxable income. If the cost of the award to the employer and the fair market value of the award exceeds the limits stated above, the employee must include the extra amount in his or her gross income.

Several other restrictions are designed to ensure that the awards do not constitute disguised compensation. Length of service awards cannot be granted to an employee in the first five years of service or to an employee who received a length of service award in any of the prior four years of service. Awards for safety achievement cannot be awarded to a manager, administrator, clerical employee, or other professional employee. In addition, safety awards cannot be granted to more than 10 percent of employees in any year.

PURPOSE: The purpose of the exclusion is to clarify the tax treatment of employee awards and to encourage longevity in employment as well as safety practices on the job.

IMPACT: Employees who receive length-of-service or safety awards and employers who save costs related to training and time lost to injuries benefit from this provision. The Congressional Research Service points out that "The exclusion promotes a traditional and widespread business practice … Since the dollar limits on the exclusion are relatively small and have not been increased since 1986, the exclusion has not become a vehicle for significant tax avoidance. Still, the lack of an increase in the exclusion may have led over time to reductions in the tax-free portion of qualified awards, undercutting their incentive effect."[90]

## 21. Employee stock ownership plans

Internal Revenue Code Sections: 401(a)(28), 404(a)(9), 404(k), 415(c)(6), 512(e) 1042, 4975(d)(3), 4978, and 4979A
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1974

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $3,479 | $3,728 | $3,976 | $4,225 |
| Personal Income Tax Loss | $3,961 | $4,282 | $4,603 | $4,924 |
| **Total** | **$7,440** | **$8,010** | **$8,579** | **$9,149** |

DESCRIPTION: An employee stock ownership plan (ESOP) is a defined contribution retirement plan that invests in the stock of a sponsoring employer. ESOPs are unique among employee benefit plans in their ability to borrow money to buy stock. An ESOP can be leveraged (that is, borrowed money is used to buy stock) or unleveraged (where stock is acquired through direct employer contributions of cash or stock). ESOPs involve several tax expenditures and must meet the minimum requirements to qualify for the tax advantages.

First, employer contributions may be deducted from corporate taxable income as a business expense. An employer may also deduct dividends paid on stock held by an ESOP if the dividends are paid to plan participants. Second, employees are not taxed on employer contributions or the earnings on invested funds until they are distributed. Third, a stockholder in a closely-held company may defer recognition of the gain from the sale of stock to an ESOP if, after the sale, the ESOP owns at least 30 percent of the company's stock and the seller reinvests the proceeds from the sale of stock in a U.S. company.

PURPOSE: The Congressional Research Service states, "The tax incentives for ESOPs are intended to broaden stock ownership, provide employees with a source of retirement income, and grant employers a tax-favored means of financing."[91]

IMPACT: ESOP tax incentives encourage personal savings through employee stock ownership and a qualified employee benefit plan. "Some evidence suggests that among firms with ESOPs, there is a greater increase in productivity if employees are involved in corporate decision-making."[92] Employers and employees of participating companies benefit from the tax-favored status of ESOPs. Although private companies sponsor most ESOPs, most ESOP participants are employed by public companies.[93]

CRS observes, "These plans are believed to motivate employees by more closely aligning their financial interests with the financial interests of their employers. The distribution of stock ownership achieved through participation in ESOPs is broader than the distribution of stock

[91] U.S. Senate, Committee on the Budget, p. 769.
[92] Ibid, pp. 770-771.
[93] Ibid, p. 769.

ownership in the general population."[94] Nevertheless, "(T)he requirement that ESOPs invest primarily in the stock of the sponsoring employer is consistent with the goal of corporate financing, but it may not be consistent with the goal of providing employees with retirement income. The cost of such a lack of diversification was demonstrated with the failure of Enron and other firms whose employees' retirement plans were heavily invested in company stock."[95]

## 22. Employer-paid meals and lodging (other than military)

Internal Revenue Code Sections: 119 and 132(e)(2)
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1918

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | -$1,988 | -$2,112 | -$3,852 | -$3,479 |
| Personal Income Tax Loss | $11,455 | $11,562 | $11,669 | $11,883 |
| **Total** | **$9,467** | **$9,449** | **$7,817** | **$8,404** |

DESCRIPTION: Employees can exclude from personal taxable income the fair market value of meals provided by employers if the meals are furnished on the employer's business premises and for the employer's convenience. The fair market value of lodging provided by an employer can also be excluded from personal taxable income if the lodging is furnished on business premises for the convenience of the employer and if the employee is required to accept the lodging as a condition of employment (as when an apartment manager must live on the premises). The exclusion does not apply to cases in which an employee is reimbursed by the employer for amounts spent on meals and lodging.

In addition, the fair market value of meals provided to an employee at a subsidized eating facility operated by the employer is excluded from taxable income.

PURPOSE: The purpose of the exclusion is to eliminate the record-keeping and administrative burdens, and to recognize that the fair market value of employer-provided meals and lodging may be difficult to measure.

IMPACT: The exclusion benefits both the employees (more employed and they receive higher after-tax compensation) and their employers (who might receive their employees' services at a lower net cost).[96] The Congressional Research Service states "The exclusion subsidizes employment in occupations and industries in which employer-provided meals and lodging are relatively frequent. In theory, the exclusion encourages more workers to seek such jobs than would happen without the exclusion, and it increases the after-tax compensation of eligible workers. Their employers would get their services at a lower cost if the employers reduce wages by the monetary value of the meals and lodging they offer."[97]

## 23. Housing allowance for ministers

Internal Revenue Code Section: 107 and 265
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1921

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $963 | $1,071 | $1,071 | $1,178 |
| **Total** | **$963** | **$1,071** | **$1,071** | **$1,178** |

DESCRIPTION: Ministers (defined as being "a duly ordained, commissioned, or licensed minister of a church"[98]) can exclude from personal taxable income the fair rental value of a church-owned or church-rented home furnished or a cash housing allowance paid as part of their compensation. The housing allowance used to pay home expenses includes rent, mortgage interest, utilities, repairs, and other expenses directly relating to providing a home. The church must officially designate the allowance as being for housing before paying it to the minister, and the allowance cannot exceed the fair rental value of the minister's home. In addition, ministers who receive cash housing allowances may also claim them as tax deductions on their individual income tax returns if they are used to pay mortgage interest and real estate taxes on their residences, although they are still subject to Social Security payroll taxes.

Ministers may also claim an itemized tax deduction for payments they make for mortgage interest and property taxes on their residences. Ministers can deduct the housing "payments even though they are not subject to income taxation. This is an example of a double tax benefit from the same expenditure, which is unusual under the federal tax code."[99]

PURPOSE: The Revenue Act of 1921 authorized only the exclusion of church-provided housing. Although there was no stated rationale for the exclusion, the Congressional Research Service notes that "Congress may have intended to provide tax relief to a segment of society that was widely seen as essential to the spiritual welfare of Americans, but that often experienced economic deprivation because of their relatively low salaries."[100] Congress added the exclusion for cash housing allowances in 1954, possibly to provide equal treatment among clergy members receiving different housing assistance from their churches. In clarifying the tax treatment of housing assistance to clergy members in the "Clergy Housing Allowance Clarification Act of 2002" (P.L. 107-181), Congress stated its desire to "minimize government intrusion into internal church operations and the relationship between a church and its clergy."[101]

IMPACT: Ministers who receive a housing allowance or live in a church-provided home benefit from this provision. Through the special exclusion, ministers receiving such housing allowances

[98] U.S. Senate, Committee on the Budget, p. 797.
[99] Ibid, p. 798.

pay less than other taxpayers with the same or smaller economic income. CRS observes that the tax-free parsonage allowances encourage some congregations to structure maximum amounts of tax-free housing allowances into their minister's pay and may thereby distort the compensation package. "The provision is inconsistent with the tax principles of horizontal and vertical equity… IRC section 107 gives clergy members a tax benefit that most other taxpayers with similar pre-tax incomes lack, reducing horizontal equity … Ministers with higher incomes receive a greater subsidy than lower-income ministers because the subsidy amount hinges on marginal tax rates. The disproportionate benefit of the tax exclusion to high-income individuals reduces vertical equity, which undergirds the progressivity of the federal income tax."[102] In addition, some ministers can claim the tax benefits twice by deducting mortgage interest payments made with cash housing allowances excluded from taxable income.

## 24. Miscellaneous fringe benefits

Internal Revenue Code Sections: 117(d) and 132
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1984

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $10,491 | $10,919 | $11,348 | $11,776 |
| **Total** | **$10,491** | **$10,919** | **$11,348** | **$11,776** |

DESCRIPTION: Certain non-cash fringe benefits qualify for an exclusion from an employee's gross income. These benefits include services provided at no additional cost (such as free stand-by flights for airline employees), employee discounts, working condition fringe benefits, certain tuition reductions, and *de minimis* fringe benefits (such as providing coffee to employees or allowing them occasional personal use of an office copy machine).

Benefits may also be provided to employees' spouses and dependent children, retired and disabled former employees, and widows or widowers of former employees. Additionally, certain nondiscrimination requirements apply to the miscellaneous benefits provided for highly compensated employees.

PURPOSE: The Congressional Research Service states, "Congress recognized that in many industries employees receive either free or discounted goods and services that the employer sells to the general public. In many cases, these practices had been long established and generally treated by employers, employees, and the Internal Revenue Service as not giving rise to taxable income."[103] CRS further points out that "Employees receive a benefit from the availability of free or discounted goods or services, but the benefit may not be as great as the full amount of the discount. Employers may have valid business reasons, other than simply providing compensation, for encouraging employees to use the products they sell to the public … As with other fringe benefits, placing a value on the benefit in these cases is difficult."[104]

IMPACT: Both employers and employees benefit from this exclusion, which subsidizes employment in those businesses and industries where ancillary fringe benefits are feasible and commonly offered. CRS states that "Under normal market circumstances, more people are employed in these businesses and industries than they would otherwise be, and they receive higher compensation (after tax). Their employers receive their services at a lower cost. Both sides of the transaction benefit because the loss is imposed on the Treasury through lower tax collections."[105] In addition, "Because the exclusion applies to practices which are common and may be feasible only in some businesses and industries, it creates inequities in tax treatment among different employees and employers."[106]

## 25. Spread on acquisition of stock under incentive stock option plans and employee stock purchase plans

Internal Revenue Code Sections: 421, 422 and 423
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1981

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | -$1,471 | -$1,605 | -$1,739 | -$1,739 |
| Personal Income Tax Loss | $1,383 | $1,383 | $1,613 | $1,728 |
| **Total** | **-$88** | **-$222** | **-$125** | **-$10** |

DESCRIPTION: Employees may be granted stock options under an incentive stock option plan (which is capped at $100,000 annually per employee and can be confined to officers or highly-paid employees) or an employee stock purchase plan (which is capped at $25,000 annually per employee and must be offered to all full-time employees with at least two years of service). These plans allow employees to exercise stock options within a specified time frame.

Generally, a stock option or purchase plan allows an employee to buy the stock for less than the current market price. Specifically, employee stock option purchase plans allow the option price to be less than 85 percent of the fair market value when granted and 85 percent of the fair market value when acquired. When the employee exercises an option, the stock is transferred from the company to the employee, but the difference in value between the market value and the option prices (also known as the spread) is not considered taxable income. The value of this tax expenditure stems from the deferral of the tax until the employee sells the stock. If the stock is held one year from purchase and two years from the granting of the option, the gain is also taxed at the lower long-term capital gain rate.

The employer is not allowed a tax deduction for granting a stock option, but if the stock is not held for the required amount of time, the employee is taxed at the ordinary income tax rates (rather than lower capital gain rates), and the employer is allowed a deduction.

PURPOSE: According to the Congressional Research Service, the deferral of tax for qualified stock options was re-instituted by the Economic Recovery Tax Act of 1981 "with the justification that encouraging the management of a business to have a proprietary interest in its successful operation would provide an important incentive to expand and improve the profit position of the companies involved."[107] The deferral of taxable gains had been allowed between 1964 and 1976.

IMPACT: The ownership of company stock is thought by many to assure that the company's employees, officers, and directors share the interests of the company's stakeholders. CRS describes the complex effects of this provision as follows: "Taxpayers with above-average or high incomes are the primary beneficiaries of these tax advantages. Because employers (usually corporations) cannot deduct the cost of stock options eligible for the lower tax rate on long-term capital gains

[107] U.S. Senate, Committee on the Budget, p. 789.

employers pay higher income taxes. The prevailing view of tax economists is that the corporate income tax falls primarily on capital income. Because high-income households own most capital income, these households bear the incidence of this aspect of stock options. These conflicting effects on incidence mean that the overall incidence of qualified stock options is uncertain. Because this tax expenditure raises corporate income tax revenue by more than it reduces individual income tax revenue, the net effect is to increase federal tax revenue."[108]

CRS also observes that "Paying for the services of employees, officers, and directors by the use of stock options has several advantages for the companies. Start-up companies often use the method because it does not involve the immediate cash outlays that paying salaries involves; in effect, a stock option is a promise of a future payment contingent on increases in the value of the company's stock. It also makes the employees' pay dependent on the performance of the company's stock, giving them extra incentive to try to improve the company's (or at least the stock's) performance."[109] Additionally, stock options act as a form of forced savings for employees, as the money cannot be spent until the restrictions expire.

[109] Ibid, pp. 789-790.

***Income Tax***
*Exclusions*

## 26. Voluntary employees' beneficiary association income

Internal Revenue Code Sections: 419, 419A, 501(a), 501(c)(9), 512(a)(3) and 4976
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1928

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $2,141 | $2,141 | $2,248 | $2,676 |
| **Total** | **$2,141** | **$2,141** | **$2,248** | **$2,676** |

DESCRIPTION: A voluntary employees' beneficiary association (VEBA) provides life, medical, disability, accident, and other insurance, as well as fringe benefits, to active or retired employees, their dependents, and their beneficiaries. The income earned by a VEBA is generally exempt from federal income taxes,[110] but when the benefits are distributed to individuals, the income is taxable unless there is a specific statutory exclusion. Accident and health benefits are excludable from income, but severance and vacation pay are not.

Most VEBAs are organized as trusts to be legally separate from their employers. VEBAs must meet several general requirements. Most importantly, they must be associations of employees who share a common employment-related bond, such as membership in a collective bargaining unit. In addition, the organization must apply to the IRS for a determination of tax-exempt status to be valid. Furthermore, membership in a VEBA must be voluntary, and the association must be controlled by its members, by an independent trustee such as a bank, or by trustees or fiduciaries, at least some of whom are designated by the members or on behalf of the members. Substantially, all the organization's operations must further the provision of life, sickness, accident, and other welfare benefits to employees and their families, and benefit plans (other than collectively bargained plans) must not discriminate in favor of highly compensated individuals.

PURPOSE: The Congressional Research Service states that "Perhaps VEBAs were seen as providing welfare benefits that served a public interest and normally were exempt from taxation."[111]

IMPACT: CRS points out that "Funding a welfare benefit through a VEBA often offers tax advantages to the employer as well as the employees. The magnitude of the tax advantage depends on the amount of benefits payable and the duration of the liability. Thus, the tax advantage is greater for a VEBA that funds the disabled claim reserve for a Long-Term Disability plan than for a VEBA that funds the Incurred but Not Paid claim reserve for a medical plan."[112] CRS also notes that VEBA withdrawals "could lead to inefficient use of employee fringe benefits. By lowering the after-tax cost of these benefits, the tax preferences for VEBAs could encourage overconsumption of these benefits compared to a situation where there was no tax preference for these benefits.[113]

[110] Income earned by a VEBA to pre-fund retiree health benefits is normally subject to tax, but an important exception applies to VEBAs established through collective bargaining.
[111] U.S. Senate, Committee on the Budget, p. 808.
[112] Ibid, p. 806.
[113] Ibid., p. 809

Additionally, VEBAs provide employee benefits, which are protected by the irrevocable trust fund associated with it. In the case of bankruptcy, the presence of a VEBA with accumulated assets for payment of retiree health benefits offers retirees a measure of protection.

***Income Tax***
*Exclusions*

## 27. Interest on state and local private-activity bonds issued to support energy facilities

Internal Revenue Code Sections: 103, 141, 142(f), and 146
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1980

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | too small | too small | too small | too small |
| Personal Income Tax Loss | too small | too small | too small | too small |
| **Total** | **too small** | **too small** | **too small** | **too small** |

Note: "Too small" means that the nationwide federal revenue impact was estimated as $50 million or less.

DESCRIPTION: Each state receives a certain amount of authority to issue tax-exempt private activity bonds, which are securities issued by a state or local government to finance qualified projects by a private user. Qualified projects, which include constructing certain private energy production facilities such as electric energy or gas, are expected to have a public benefit.

Energy facility bonds are subject to the annual volume cap, adjusted for inflation since 2003, for state-private activity bonds. Generally, only facilities operating as of January 1, 1997, are eligible for tax-exempt financing. The private-activity bond annual volume cap is equal to the greater of $110 per state resident or $335.115 million in 2022.

PURPOSE: The tax preference encourages private entities to invest in energy infrastructure. The bonds reduce the operating cost of electricity-generating facilities for a limited number of entities. Without the tax preference, local electricity generation might not have been economically viable. Investors purchase the bonds at low interest rates because their income is tax-free.

IMPACT: The primary beneficiaries of the tax exemption are bondholders. Energy production companies, as well as residential and commercial users of energy, benefit from this provision. The Congressional Research Service states, "Even if a case can be made for a federal subsidy of energy production facilities based on underinvestment at the state and local level, it is important to recognize the potential costs. As one of many categories of tax-exempt private-activity bonds, those issued for energy production facilities increase the financing cost of bonds issued for other public capital. With a greater supply of public bonds, the interest rate on the bonds necessarily increases to lure investors. In addition, expanding the availability of tax-exempt bonds increases the range of assets available to individuals and corporations to shelter their income from taxation."[114]

[114] U.S. Senate, Committee on the Budget, pp. 138-139.

*Exclusions*

## 28. Accrued interest on savings bonds

Internal Revenue Code Section: 454(c)
Federal Law Sunset Date: None for general deduction
Year Enacted in Federal Law: 1951

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $489 | $489 | $489 | $489 |
| **Total** | **$489** | **$489** | **$489** | **$489** |

DESCRIPTION: Owners of U.S. Treasury Series E, EE, and I savings bonds can include the interest in their taxable income as it accrues or defer taxation on the interest until the bond is redeemed. The estimated revenue loss from this tax expenditure represents the difference between the tax due on the interest upon accrual and the tax paid using the deferral option. Since June 2010, all E bonds no longer earn interest because they have matured.

PURPOSE: The exclusion of accrued interest is intended to encourage people to buy U.S. savings bonds. The Congressional Research Service points out that "The deferral of tax on interest income on savings bonds provides two advantages. First, it delays tax payment on the interest, delivering the equivalent of an interest-free loan for the amount of the tax. Second, if the taxpayer is in a lower income bracket when the bonds are redeemed, the deferral reduces the tax rate paid on the interest. This is particularly common when the bonds are purchased while the owner works and redeemed after the owner retires."[115]

IMPACT: The primary beneficiaries of the provision are middle-income taxpayers. CRS notes that the savings bonds appeal to small savers because the bonds are available in small denominations, are easy to purchase, and serve as a safe investment.

CRS adds that "The savings bond program was established to provide small savers with a convenient and safe debt instrument and to lower the cost of borrowing to the taxpayer. The option to defer taxes on interest increases sales of bonds. There is no empirical study that has determined whether or not the cost savings from increased bond sales more than offset the loss in tax revenue from the accrual."[116]

[115] U.S. Senate, Committee on the Budget, p. 1154.
[116] Ibid, p. 1155.

***Income Tax***
*Exclusions*

## 29. Allocation of interest expenses attributable to tax-exempt bond interest by financial institutions

Internal Revenue Code Sections: 265(b)
Federal Law Sunset Date: None (but only applies to bonds issued in 2009 and 2010)
Year Enacted in Federal Law: 2009

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $622 | $622 | $622 | $622 |
| Personal Income Tax Loss | $0 | $0 | $0 | $0 |
| **Total** | **$622** | **$622** | **$622** | **$622** |

DESCRIPTION: Banks and other financial institutions can deduct their interest payments to depositors as a cost of doing business, thereby reducing their tax liability. Nevertheless, banks must reduce their interest deduction if they invest in tax-exempt bonds. Generally, banks and financial institutions must reduce their interest deduction by the same percentage that tax-exempt bonds make up of total assets (i.e., if tax-exempt bonds are 10 percent of the bank's portfolio, then the interest deduction must be reduced by 10 percent). The reason for this rule is to prevent banks from claiming two tax preferences for the same investment.

This general rule has an important qualification: individuals and non-financial institutions with tax-exempt bond investments that comprise less than 2 percent of their investment portfolio are not required to reduce their interest expense deduction.

This tax expenditure captures the revenue loss from two temporary expansions of the interest deduction offset rules allowed to purchase bonds issued in 2009 and 2010. First, banks and other financial institutions could shelter an amount equal to 2 percent of the bonds issued during those years from the offset to their interest deduction. Second, the definition of "small issuer" was changed to include municipalities issuing up to $30 million in annual bonds, rather than $10 million for bonds issued in 2009 and 2010.

PURPOSE: According to the Congressional Research Service, the rationale for the expanded interest deduction for banks and financial institutions investing in tax-exempt bonds is "to encourage public investment infrastructure generally and to help state and local governments issue debt."[117]

IMPACT: CRS states that "This tax expenditure subsidizes the provision of state and local public goods and services by small issuers. This may not be economically efficient, as this provision favors small projects at the expense of larger projects—regardless of the relative economic value."[118]

[117] U.S. Senate, Committee on the Budget, Tax Expenditures: Compendium of Background Material on Individual Provisions, Senate Print 114-31, prepared by the Congressional Research Service (December 2016), p. 621.

[118] U.S. Senate, Committee on the Budget, p. 1146.

Additionally, CRS states that "Eliminating the requirement to allocate certain interest expenses could increase the demand for small issuer tax-exempt obligations, which would reduce the interest costs to the issuing governments."[119]

[119] U.S. Senate, Committee on the Budget, p. 1146.

***Income Tax***
*Exclusions*

## 30. Interest on public-purpose state and local government bonds

Internal Revenue Code Sections: 103, 141, and 146
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1913

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $6,715 | $6,715 | $6,715 | $6,839 |
| Personal Income Tax Loss | $21,321 | $20,999 | $21,213 | $21,535 |
| **Total** | **$28,036** | **$27,714** | **$27,928** | **$28,374** |

DESCRIPTION: The interest on state or local bonds that are used to build capital facilities that are owned and operated by government entities and serve the public interest (such as schools, highways, and bridges) are excluded from federal taxable income. These bonds can be issued in unlimited amounts, although state governments do have a variety of self-imposed debt limits.

D.C. policymakers had eliminated the exclusion of interest on out-of-state bonds acquired after December 31, 2012, from the District of Columbia personal income tax. This action meant that the District had "decoupled" from the federal exclusion for state and local bond interest, except for bonds issued by the District. Nevertheless, policymakers reversed this decision as part of D.C. Act 20-157, the "Fiscal Year 2014 Budget Support Act of 2013," and all interest on public-purpose state and local bonds will continue to be excluded from D.C. taxes.

PURPOSE: According to the Congressional Research Service, the exclusion was based on the belief that state and local interest income was constitutionally protected from federal taxation. In 1988, the U.S. Supreme Court ruled in *South Carolina v. Baker* that federal taxation of state and local interest income was not barred by the Constitution, but the exclusion has remained in place. CRS states that "many believe the exemption for governmental bonds is still justified on economic grounds, principally as a means of encouraging state and local governments to invest in public capital."[120]

IMPACT: State and local governments benefit from the exclusion because it allows them to offer lower interest rates by increasing the effective rate of return enjoyed by the bondholder. In effect, the federal government subsidizes a state or local government's interest cost by providing the exclusion. The expenditure also encourages state and local taxpayers to provide public services that also benefit residents of other local states or localities.

The impact of this tax expenditure can be measured by (1) how much additional public capital investment occurs because of this tax provision and by (2) the distributional effects across issuers and taxpayers. The impact on public capital investment is mixed because the broad range of public projects financed with tax-exempt bonds diminishes the target efficiency of the public subsidy. Purchasers of state and local bonds also benefit from the exclusion, but the distribution of benefits depends on the interest-rate spread between taxable bonds and the tax-exempt municipal bonds, the percentage of the tax-exempt bond issues purchased by individuals of different income levels, and

[120] U.S. Senate, Committee on the Budget, p. 1132.

the range of marginal tax rates. Higher-income taxpayers are more likely to benefit because they are more likely to own bonds and can gain a windfall from the interest-rate spread due to their higher marginal tax rates. Nevertheless, researchers at the Tax Policy Center have pointed out that low- and moderate-income individuals may gain a significant benefit if the state and local programs supported by municipal bonds (such as school construction) provide roughly equal benefits on a per-capita basis.[121]

The windfall for higher-income taxpayers is illustrated by the following example. Assume that taxable bonds are paying 7 percent interest and that tax-exempt municipal bonds are paying 5 percent, there is a 2.0 percentage-point interest rate subsidy to the issuer. For someone facing a 12 percent marginal tax rate, the effective return on the taxable bond will be 6.16 percent (7 percent minus the .12 tax), a better deal than the tax-exempt rate of 5 percent. For someone facing a 37 percent marginal tax rate, the effective rate on the taxable bond will be 4.1 percent (7 percent minus the .37 tax), making the tax-exempt bond's 5 percent return a better deal. In fact, the 5 percent interest rate exceeds the amount that the higher-income taxpayer would demand (4.1 percent) to buy a tax-exempt bond rather than a taxable bond.[122] Additionally, CRS states that "The tax cuts provided for by the 2017 tax revision (P.L. 115-97) further decreased the inefficiency of this subsidy, as it decreased the top marginal income tax rates faced by individuals and businesses to 37 percent and 21 percent, respectively, beginning in tax year 2018". [123]

The federal subsidy of state and local borrowing for capital investment may generate spillover benefits for nearby states or localities; for example, a modernized wastewater treatment plant may reduce pollution in nearby rivers and lakes. At the same time, some question the subsidy for promoting capital investment at the expense of labor and argue that there is no evidence that state and public governments underprovide capital facilities. Finally, the subsidizing of state and local bonds decreases federal control of the budget because the revenue loss results from the decisions of state and local officials.[124]

## 31. Employer contributions for medical care, medical insurance premiums, and long-term care insurance premiums

Internal Revenue Code Sections: 105, 106, and 125
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1918

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $228,452 | $243,547 | $251,576 | $262,816 |
| **Total** | **$228,452** | **$243,547** | **$251,576** | **$262,816** |

DESCRIPTION: Employer payments for accident insurance, health insurance, long-term care insurance premiums,[125] and other employee medical expenses are not included in an employee's personal taxable income. The exclusion applies to health benefits provided to the employee's family members.

The exclusion also applies to other forms of health coverage like flexible savings accounts (FSAs) or cafeteria plans[126], Archer medical savings accounts (MSAs), health savings accounts (HSAs), or health reimbursement arrangements (HRAs). FSAs allow employees to choose a benefit amount at the start of a year and to use the account to pay for medical expenses not covered by employer-provided health insurance. FSAs are funded through wage and salary reductions and may include limited funds provided through employer contributions, both of which are exempt from federal income and payroll taxes. In 2022, an employee could contribute up to $2,850 to a health FSA and a limited amount may be rolled over to the next year ($570).

These exclusions do not limit the amount of employer contributions that may be excluded, although generous reimbursements paid to highly compensated employees under self-insured medical plans that fail to satisfy specified non-discrimination requirements must be excluded from the employees' taxable income.

PURPOSE: The exclusion of employer-provided health insurance from taxable income is part of a longstanding policy of excluding fringe benefits from taxation. The legislative history of section 106 indicates that the exclusion was intended to remove differences between the tax treatment of employer contributions and non-taxable compensation to employees.[127] The exclusion subsidizes providing health care to employees through employer-provided group health insurance.

IMPACT: The Congressional Research Service states that "The exclusion for employer-provided health benefits is thought to exert a strong influence on the health insurance coverage for a

[125] Before January 1, 2015, the District of Columbia allowed long-term care insurance premiums to be subtracted from federal adjusted gross income; however, based on the taxpayer's age, certain amounts of these expenses may still be deductible as itemized medical expenses.
[126] Cafeteria plans were listed as a separate tax expenditure prior to the 2020 CRS report but are now combined with estimates for health insurance (this chapter) or dependent care.
[127] U.S. Senate, Committee on the Budget, pp. 965-966.

substantial share of the nonelderly working population."[128] In 2021, 53.4 percent of the U.S. population received health insurance coverage through employers, according to the Census Bureau.[129] CRS adds that "Although the tax exclusion benefits a majority of families, the distribution of the benefits accrue more to higher-income taxpayers than to lower-income ones. High-paid employees tend to be more likely to be enrolled in more generous employer-paid health insurance coverage as compared to their low-paid counterparts. And high-paid employees fall in higher tax brackets," which increases the value of the exclusion. Additionally, the value of the provision depends in part on a taxpayer's marginal tax rate so that for a given amount of employer provided health insurance coverage, the higher the tax rate, the greater the tax benefit.

Those least likely to receive employer-provided health insurance include workers under age 25, workers in firms with fewer than 25 employees, part-time workers, low-wage workers, and workers in the construction, business and personal service, entertainment, and wholesale and retail trade industries.[130]

Experts also point out that the health care exclusion imposes significant efficiency costs on society. Employees covered by employer-provided health plans receive greater tax subsidies than individuals who purchase health insurance in the individual market, have no health insurance, pay out of pocket for medical expenses, and claim the medical-expense itemized income tax deduction. The subsidy consequently incentivizes employees to seek compensation through non-taxable health benefits rather than taxable wages. As a result, employees may consume more health insurance than they need. As stated by CRS, "Most health economists think the unlimited exclusion for employer-provided health benefits has distorted the markets for both health insurance and health care. Generous health plans encourage subscribers to use health services that are not cost-effective, putting upward pressure on health care costs."[131]

Nevertheless, as CRS points out, "The exclusion could have some social benefits. Owing to the pooling of risk that employment-based group health insurance provides, the exclusion makes it possible for many employees to purchase health insurance plans that simply would not be available on the same terms or at the same cost in the individual market."[132]

## 32. Interest on state and local private-activity bonds issued to finance non-profit hospital construction

Internal Revenue Code Sections: 103, 141, 145(b), 145(c), 146, and 501(c)(3).
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1913

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $373 | $373 | $373 | $373 |
| Personal Income Tax Loss | $1,500 | $1,500 | $1,500 | $1,500 |
| **Total** | **$1,873** | **$1,873** | **$1,873** | **$1,873** |

DESCRIPTION: Interest income on state and local bonds to finance the construction of non-profit hospitals and nursing homes is tax-exempt. These bonds are classified as private-activity bonds rather than governmental bonds because a substantial portion of the benefits accrues to individuals or private organizations instead of the public. Non-profit hospital bonds are not subject to state volume caps on private-activity bonds. The non-profit hospital bonds are not subject to the state private activity bond annual volume cap. According to the U.S. Internal Revenue Service, $37.9 billion of qualified hospital bonds were issued in 2017.[133]

PURPOSE: The intent of the legislation is so the government can support charitable organizations that provide services to the public. The purpose of the bonds is to provide low-cost financing for hospitals and nursing homes owned by non-profit organizations. Investors purchase the bonds at low interest rates because the income from them is tax-free.

IMPACT: Private, non-profit hospitals and the communities they serve benefit from this provision. Some of the benefits of the tax exemption also flow to bondholders. The Congressional Research Service observes that "Questions have also been raised about whether nonprofit hospitals fulfill their charitable purpose and deserve continued access to tax-exempt bond financing. Even if a case can be made for this federal subsidy for nonprofit organizations, it is important to recognize the potential costs. As one of many categories of tax-exempt private-activity bonds, bonds for nonprofit organizations increase the financing cost of bonds issued for other public capital. With a greater supply of public bonds, the interest rate on the bonds necessarily increases to attract investors. In addition, expanding the availability of tax-exempt bonds increases the assets available to individuals and corporations to shelter their income from taxation."[134]

*Exclusions*

## 33. Medical care and TriCare medical insurance for military dependents, retirees, retiree dependents, and veterans

Internal Revenue Code Sections: 112 and 134 and certain court decisions
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1986

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $3,228 | $3,364 | $3,773 | $4,091 |
| **Total** | **$3,228** | **$3,364** | **$3,773** | **$4,091** |

DESCRIPTION: Active-duty military personnel receive various benefits (such as medical and dental care) or cash in lieu of such benefits that are excluded from taxation. In addition, the following groups are also eligible for medical and dental care benefits without being subject to taxation: dependents of active-duty personnel; retired military personnel and their dependents; veterans; survivors of deceased veterans; and reservists who have served on active duty since September 11, 2001, and joined the Selected Reserve.

Military dependents and retirees can receive medical care in military facilities and from military doctors with sufficient capacity. Civilian health-care providers working under contract with the Department of Defense can also treat these individuals through the TRICARE program. TRICARE provides medical care through a health maintenance organization, a preferred provider organization, or a fee-for-service option.

PURPOSE: The Congressional Research Service notes that this exclusion has evolved over time through a series of legislative, administrative, and legal actions. Thus, the rationale has not been clear-cut. CRS adds that "The Tax Reform Act of 1986 (P.L. 99-514) consolidated various provisions related to military compensation into a new section 134 of the Internal Revenue Code. In taking this step, Congress wanted to make the tax treatment of military fringe benefits more transparent and consistent with the tax treatment of fringe benefits under the Deficit Reduction Act of 1984 (P.L. 98-369)."[135]

IMPACT: Higher-income individuals gain a disproportionate share of the benefits of the exclusion because they face higher marginal tax rates that increase the savings from each dollar excluded. Although the tax exclusion of health benefits may create inefficiencies by encouraging individuals to purchase more health care than they would if they bore the full cost, direct care provided in military facilities may be difficult to value for tax purposes. In addition, the exclusion of medical care for service members' dependents and military retirees might hamper military recruitment and retention. Others have argued that limiting the tax exclusion can be coupled with increasing military pay to prevent adverse impacts on the retention of active-duty military personnel with dependents and high enough incomes to incur tax.[136]

## 34. Capital gain on sale of principal residence

Internal Revenue Code Section: 121
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1997

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $48,394 | $50,426 | $53,094 | $55,761 |
| **Total** | **$48,394** | **$50,426** | **$53,094** | **$55,761** |

DESCRIPTION: Homeowners may exclude from personal taxable income up to $250,000 (single taxpayers) or $500,000 (married taxpayers filing jointly) of capital gains realized on the sale or exchange of their principal residence. To qualify, the taxpayer must have owned and occupied the home for at least two of the previous five years. The exclusion applies only to the portion of the property associated with the residence, not to portions used in business activity. The exclusion cannot be used more than once every two years.

PURPOSE: Capital gains arising from the sale of an individual's principal residence have long received preferential tax treatment to promote homeownership by reducing its after-tax cost. Previously, homeowners could defer the tax on capital gains from the sale of their principal residence if the sale proceeds were used to buy another home of equal or greater value. In addition, homeowners aged 55 and older were allowed a one-time exclusion of a gain of up to $125,000 from the sale of their principal residence. In 1997, Congress modified these provisions to reduce their complexity by allowing all taxpayers to exclude $250,000 (single) or $500,000 (married filing jointly) of capital gains from the sale of their principal residence.

IMPACT: The Congressional Research Service states, "Excluding the capital gains on the sale of principal residences from gross income primarily benefits middle- and upper-income taxpayers. At the same time, however, this provision avoids putting an additional tax burden on taxpayers, regardless of their income levels, who must sell their homes because of changes in family status, employment, or health. It also provides tax benefits to elderly taxpayers who sell their homes and move to less expensive housing during their retirement years. This provision simplifies income tax administration and record keeping." [137]

Regarding the efficiency impact, CRS states that the exclusion "gives homeownership a competitive advantage over other types of investments, since the capital gains from investments in other assets are generally taxed when the assets are sold. Moreover, when combined with other provisions in the tax code, such as the deductibility of home mortgage interest, homeownership is generally considered an especially attractive investment from a tax perspective. As a result, savings are diverted out of other forms of investment and into housing."[138] Alternatively, the exclusion on the sale of a principal residence is justifiable. After all, the tax law does not allow the deduction of personal capital losses because much of the profit from the sale of a personal residence can

[137] U.S. Senate, Committee on the Budget, pp. 395-396.
[138] Ibid, p. 397.

represent only inflationary gains, and the motivation for such purchases is not profit-based. "Taxing the gain on the sale of a principal residence might also interfere with labor mobility."[139]

[139] U.S. Senate, Committee on the Budget, p. 397.

*Exclusions*

## 35. Interest on state and local private-activity bonds issued to finance housing

Internal Revenue Code Sections: 103, 141, 142, 143, and 146
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1980

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $497 | $497 | $622 | $622 |
| Personal Income Tax Loss | $1,607 | $1,607 | $1,821 | $1,821 |
| **Total** | **$2,104** | **$2,104** | **$2,443** | **$2,443** |

DESCRIPTION: Interest income on state and local bonds used to finance owner-occupied housing of first-time homebuyers (mortgage revenue bonds, or MRBs) and the construction of rental housing and veterans' housing for low and moderate-income families is tax-exempt. These bonds are classified as private-activity rather than governmental bonds because a substantial portion of the benefits accrues to individuals or private organizations instead of the public. Housing construction bonds are subject to state volume caps on private-activity bonds ($335.115 million in 2022) and, therefore, must compete with other authorized private activities for bond financing.

The 2008 housing market crisis led Congress to legislate two provisions in the Housing and Economic Recovery Act of 2008 (HERA, P.L. 110-289) to help the housing sector. HERA allowed for interest on qualified private-activity bonds issued for (1) qualified residential rental projects, (2) qualified mortgage bonds, and (3) qualified veterans' mortgage bonds to not be subject to the alternative minimum tax (AMT). Additionally, HERA provided $11 billion of added volume cap space for bonds issued for qualified mortgage bonds and qualified bonds for residential rental projects. The cap space was designated for 2008 but could have been carried forward through 2010.[140]

PURPOSE: The purpose of the bonds is to increase the incidence of homeownership and finance low-interest mortgages for low- and moderate-income homebuyers, along with multi-family housing for low-income renters. Investors purchase housing bonds at low interest rates because the income is tax-free. The interest savings should allow issuers to offer housing for sale or rent at a lower cost.

IMPACT: In 2019, according to the Council of Development Finance Agencies, roughly $9.5 billion of MRBs and $16.4 billion of multifamily-housing qualified private activity bonds were issued in the U.S.[141] Regarding homeownership, the Congressional Research Service notes that "Income, tenure status, and house-price-targeting provisions imposed on MRBs make them more likely to achieve the goal of increased homeownership than many other housing tax subsidies that make no targeting effort, such as is the case for the mortgage-interest deduction. Nonetheless, it has been suggested that most of the mortgage revenue bond subsidy goes to families that would

[140] U.S. Senate, Committee on the Budget, p. 400.
[141] Ibid, pp. 400 and 406

have been homeowners even if the subsidy were not available."[142] Concerning rental housing, CRS states that there is a belief that subsidized housing for low- and moderate-income families provided benefits to the nation, and promotes "equitable treatment for families unable to take advantage of the substantial tax incentives available to those able to invest in owner-occupied housing."[143]

More generally, private-activity bonds impose costs because they "increase the financing cost of bonds issued for other public capital. With a greater supply of public bonds, the interest rate on the bonds necessarily increases to lure investors. In addition, expanding the availability of tax-exempt bonds increases the assets available to individuals and corporations to shelter their income from taxation."[144]

[142] U.S. Senate, Committee on the Budget, p. 402.
[143] Ibid, p. 407.
[144] Ibid.

***Income Tax***
*Exclusions*

## 36. Compensatory damages for physical injury or sickness

Internal Revenue Code Section: 104(a)(2) - 104(a)(5)
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1918

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $2,141 | $2,248 | $2,248 | $2,248 |
| **Total** | **$2,141** | **$2,248** | **$2,248** | **$2,248** |

DESCRIPTION: Damages paid through a court award or a settlement to compensate for physical injury or illness are excluded from the recipient's taxable income. The exclusion applies to lump-sum and periodic payments but not to punitive damages except in certain states where only punitive damage awards are allowed. In addition, the exclusion does not apply to compensation for discrimination or emotional distress.

PURPOSE: According to the Congressional Research Service, the exclusion "is based on the reasoning that these payments are compensating for a loss."[145] Noting that the interest component of periodic payments would normally be taxable, CRS adds that "An argument for the full exclusion of periodic payments was to avoid circumstances where individuals used up their lump-sum payments and might then require public assistance."[146]

IMPACT: CRS states that "The exclusion benefits individuals who receive cash compensatory damages for physical injuries and illness. It parallels the treatment of workers' compensation, which covers on-the-job injuries. It especially benefits higher-income individuals whose payments would typically be larger, reflecting larger lifetime earnings, and subject to higher tax rates. By restricting tax benefits to compensatory… In recent years, scientific and public awareness has grown concerning the serious nature of psychiatric and emotional reactions that individuals can experience in response to harassment or situational trauma. Perhaps the best-known current example is Post-Traumatic Stress Disorder (PTSD). Some courts have opined that damage awards for emotional distress should also be excluded from taxation under section 104(a)(2). "[147]

## 37. Disaster mitigation payments

Internal Revenue Code Section: 139
Federal Law Sunset Date: None
Year Enacted in Federal Law: 2005

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $99 | $99 | $99 | $99 |
| **Total** | **$99** | **$99** | **$99** | **$99** |

DESCRIPTION: Disaster mitigation payments under the Robert T. Stafford Disaster Relief and Emergency Insurance Act or the National Flood Insurance Act are excluded from taxable income. Disaster mitigation grants cover a variety of expenditures, such as securing items to reduce potential damage from earthquakes, putting houses on stilts to reduce flood damage, tie-downs for mobile homes to protect against hurricanes and other windstorms, and securing roofs and windows from wind damage.

PURPOSE: According to the Congressional Research Service, the Internal Revenue Service ruled in 2004 that disaster mitigation payments would be taxable without a specific exemption in the law. Previously, individuals had not paid taxes on the payments. Congress responded by establishing an explicit statutory exclusion. CRS states, "The tax legislation was in response to that ruling and reflected the general view that individuals and businesses should not be discouraged from mitigation activities due to tax treatment of these payments."[148]

IMPACT: CRS observes that "The tax exemption is most beneficial for higher-income individuals who have higher marginal tax rates. Even individuals with relatively low incomes could be subject to tax, however, since the mitigation payments can be large when used for major construction projects (such as putting houses in flood plains on stilts). These individuals might not have enough income to pay taxes on these grants and taxation might cause them not to participate in the program."[149] The tax expenditure also has an additional benefit of $6 for each dollar spent, making it cost-effective.[150]

The fairness and efficiency issues surrounding the exclusion are complex. CRS states that "An argument can be made that individuals should be responsible for undertaking their own measures to reduce disaster costs since those expenditures would benefit them… Disaster mitigation expenditures for individuals and businesses can also have benefits that spill over to the community at large, and an individual would not take these benefits into account when making an investment decision."[151]

## 38. Employer contributions for premiums on accident and disability insurance

Internal Revenue Code Sections: 105 and 106
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1954

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $6,958 | $7,066 | $8,029 | $8,457 |
| **Total** | **$6,958** | **$7,066** | **$8,029** | **$8,457** |

DESCRIPTION: Employer payments for employee accident and disability insurance premiums are not included in an individual's personal taxable income.

PURPOSE: According to the Congressional Research Service, in 1954, Congress exempted accident and health benefits from taxation "in an attempt to equalize the tax treatment of benefits through an insurance plan and benefits provided in other ways."[152] The intent is to encourage individuals to purchase more accident or disability insurance because of concerns that "many would fail to buy prudent amounts of insurance on their own, thus increasing financial vulnerabilities of workers and their families."[153]

IMPACT: Higher-income individuals and employees working for large firms benefit more from this exclusion since their marginal tax rates are higher, and they are more likely to receive insurance benefits from their employers. Also, lower-income individuals would benefit less since they may have difficulty protecting themselves from income loss due to accidents or disability. CRS argues "(T)he exclusion may motivate employers to design compensation packages that increase accident and disability insurance coverage of workers. Whether this exclusion is the most efficient method of encouraging purchases of prudent levels of insurance coverage is unclear. Some have noted, however, that untaxed fringe benefits increased middle class effective incomes since 1980, while growth in take-home pay has stagnated for some subgroups."[154]

The exclusion may impair both horizontal and vertical equity. In arguing for a repeal of the exclusion, President Bush's Advisory Panel on Federal Tax Reform stated that "Employees who have these employer-provided fringe benefits receive better tax treatment than employees who pay for these expenses out of pocket. Among workers for whom the benefit is available, more of the benefits go to high-income taxpayers, even though they are paid for with higher tax rates for everyone."[155] According to the 2022 Bureau of Labor Statistics Employee Benefits Survey, 41 percent of civilian workers had access to short-term disability benefits, and 40 percent of employees took the benefit; while 36 percent of civilian workers had access to long-term disability benefits, and about 34 percent take up disability benefits.[156]

***Income Tax***
*Exclusions*

## 39. Employer contributions for premiums on group-term life insurance

Internal Revenue Code Section: 79 and L.O. 1014, 2 C.B. 8 (1920).
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1920

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $4,496 | $4,710 | $5,032 | $5,353 |
| **Total** | **$4,496** | **$4,710** | **$5,032** | **$5,353** |

DESCRIPTION: Employer payments for employee life insurance (above $50,000 in coverage) and death benefits are not included in an individual's taxable income. To qualify for the exclusion, the insurance plan must meet certain requirements, including non-discrimination provisions, to ensure that employee benefits are spread widely and equitably.

PURPOSE: The exclusion was originally authorized, without any limitation on the amount of coverage, by a legal opinion issued in 1920. The $50,000 limit on the amount that can be excluded was enacted in 1964, based on the view that it "would encourage the purchase of group life insurance and assist in keeping the family unit intact upon death of the breadwinner."[157]

IMPACT: The Bureau of Labor Statistics Employee Benefits Survey found that 60 percent of civilian workers are offered life insurance benefits, and 98 percent of those workers take up the benefit.[158] CRS states, "Concerns that many individuals would fail to buy prudent amounts of life insurance on their own may justify encouraging individuals to purchase more life insurance to protect surviving family members from financial vulnerabilities. Subsidizing life insurance coverage may help ensure a minimum standard of living for surviving dependent individuals."[159] Employers may also benefit from the exclusion because it allows them to provide this form of compensation at a lower cost than the earnings employees would need to buy the same amount of insurance on their own. On the other hand, self-employed individuals or those who work for an employer without such a plan do not benefit from this tax subsidy for life insurance coverage.

Consequently, there is uneven access to the benefit, giving rise to horizontal and vertical equity concerns. CRS observes that "Aside from administrative convenience, the rationale for subsidizing insurance for employees, but not to the self-employed or those who are not employed is unclear. Higher-income individuals may receive more benefits from fringe benefit exclusions because their marginal tax rates are higher and because they are more likely to receive group life insurance benefits from their employers. Lower-income individuals, whose surviving dependents are probably more financially vulnerable, may benefit less from income exclusion of premiums paid on their behalf, but may value the insurance protection more."[160]

## 40. Employer pension contributions and earnings plans

Internal Revenue Code Sections: 401-407, 410-418E, and 457
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1921

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $365,160 | $464,184 | $560,211 | $657,737 |
| **Total** | **$365,160** | **$464,184** | **$560,211** | **$657,737** |

DESCRIPTION: Employer contributions to qualified pension, profit-sharing, stock bonus, and annuity plans are not included in the employee's personal taxable income in the year of contribution. Earnings on these contributions are also tax-free. Withdrawals are included in taxable income.

There are two major types of pension plans: (1) defined-benefit plans, which guarantee employees a certain benefit level on retirement, and (2) defined-contribution plans, which provide a pension that depends on the employee's contributions and the earnings on those contributions. Employer contributions to both types of plans are excluded from taxable income. The estimated revenue impact of this tax expenditure is the revenue that the government does not collect on pension contributions and earnings, offset by the taxes paid on pension withdrawals.

The Consolidated Appropriations Act of 2023 modified several retirement plans and created two new types of retirement plans: a new type of section 401(k) plan, a "starter 401(k) deferral-on arrangement," and a new type of 403(b) plan, a "safe harbor deferral-only 403(b) plan.

PURPOSE: While the intent for the exclusion is unclear, CRS notes that "the exemptions may have been adopted in part to deal with technical problems of assigning income."[161] Additionally, "The major economic justification for the favorable tax treatment of pension plans is that they arguably increase savings and increase retirement income security… The effects of these plans on savings and overall retirement income security are, however, subject to some uncertainty."[162] The Congressional Research Service observes, "Because individuals cannot directly control employer contributions to plans or are subject to a ceiling on contributions, tax benefits may relate to savings that would have taken place in any case. At the same time, pension plans may force saving and retirement income on employees who otherwise would have total savings less than their pension-plan savings."[163]

IMPACT: CRS states, "The employees who benefit from these provisions consist of taxpayers whose employment is covered by a plan. The benefit derived by a particular employee depends upon the level of tax that would have been paid by the employee if the provision were not in

[161] U.S. Senate, Committee on the Budget, p. 1062
[162] Ibid, p. 1064.
[163] Ibid.

effect."[164] Nevertheless, CRS points out that the benefits are likely to accrue disproportionately to high-income households because employees with higher salaries are more likely to receive pension benefits, and the dollar contributions made on behalf of higher-income employees are larger. For example, in 2021, 45 percent of workers in the bottom 25 percent of wages in the US were covered by a pension plan while 92 percent of workers in the top 25 percent were covered by a pension plan.[165] In addition, higher-income taxpayers derive a larger benefit because their marginal tax rate is higher, increasing the value of the exclusion. Workers are also more likely to be covered by pensions if they work in certain industries, if large firms employ them, or if they are unionized.[166]

## 41. Income of trusts to finance supplemental unemployment benefits

Internal Revenue Code Section: 501(c)(17)
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1960

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $43 | $43 | $43 | $43 |
| **Total** | **$43** | **$43** | **$43** | **$43** |

DESCRIPTION: The investment income from a supplemental unemployment benefit trust may be exempt from taxation if it is established by an employer, employees, or both solely to provide supplemental unemployment compensation when an involuntary loss of employment arises from a reduction in force, discontinuation of a plant or operation, temporary layoff, or other similar circumstance.

The trust must be outlined in a written plan that ensures it does not discriminate in favor of officers, shareholders, supervisors, or highly compensated employees. Benefits must be determined according to objective standards.

Supplemental unemployment trusts were first established in the auto industry in 1955. If an employee leaves a company voluntarily or is discharged for misconduct, he or she is not eligible for a benefit. The employee has no vested interest in the amounts paid into the fund on his or her behalf.

PURPOSE: The purpose of the exclusion is to encourage the creation of supplemental unemployment benefit trusts and to increase income support for laid-off workers.

IMPACT: Employers who sponsor a supplemental unemployment benefit trust and the employees who participate in the plans benefit from this provision. The exclusion may harm economic efficiency because the tax-free treatment of investment income encourages the provision of supplemental unemployment benefits when other benefits might be more valuable without tax preference.

## 42. Public assistance cash benefits

Internal Revenue Code Section: N.A. (this exclusion was established through a series of IRS rulings dating back to 1933)
Federal Law Sunset Date: None
Year Enacted in Federal Law: N.A. (this exclusion was established through a series of IRS rulings dating back to 1933)

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $1,727 | $1,806 | $1,910 | $1,989 |
| **Total** | **$1,727** | **$1,806** | **$1,910** | **$1,989** |

DESCRIPTION: Under the general welfare exclusion, public assistance benefits in the form of cash payments or in-kind benefits (goods or services), whether provided free or partly subsidized, are not included in the personal taxable income of the recipient. Examples include cash benefits provided by the Temporary Assistance to Needy Families and the Supplemental Security Income program for the aged, blind, and disabled, as well as in-kind benefits provided by Medicaid and the Supplemental Nutrition Assistance Program (Food Stamps). A payment would qualify under the general welfare exclusion if payments: (1) are made to individuals under the government program; (2) are for the promotion of general welfare that is based on need; and (3) do not represent compensation for services.

It should be noted that the estimates shown above reflect only the forgone revenue from public assistance cash benefits because it is difficult to determine the value of in-kind benefits to recipients.

PURPOSE: The exclusion is not specifically authorized by law; instead, the exclusion has been established by a series of Internal Revenue Service rulings. The Congressional Research Service states that "The IRS rulings providing for the general welfare exclusion reflect a rationale that public assistance provided under government programs should not be taxed when made for the promotion of the general welfare. For federal programs, the reasoning might include that Congress did not intend to tax with one hand what it gives with the other. The exclusion also has the effect of harmonizing the tax treatment of public assistance with assistance provided by private charitable entities, which is generally a nontaxable gift to the recipient under section 102."[167]

IMPACT: CRS notes that the "Exclusion of public assistance cash payments from taxation gives no benefit to the poorest recipients and has little impact on the income of many, in the absence of refundable tax credits. This is because welfare payments are relatively low, and many recipients have little if any non-transfer cash income. If cash public assistance payments were made taxable, most recipients would still owe no tax due to insufficient income."[168] Nevertheless, some families with relatively large amounts of cash benefits and those who worked for part of the year and received cash assistance for part of the year would pay tax if public assistance benefits were taxable; these families benefit from the exclusion.

[167] U.S. Senate Committee on the Budget, pp. 1186-1187.
[168] Ibid, p. 1186.

The exclusion violates the principle of horizontal equity because people with identical incomes will face a different tax liability if they receive different amounts of public assistance cash benefits. On the other hand, the exclusion promotes the social goal of protecting a minimum income level for all individuals.

***Income Tax***
*Exclusions*

## 43. Traditional and Roth IRA earnings and distributions

Internal Revenue Code Sections: 219, 408 and 408A
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1997

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $14,426 | $15,484 | $19,427 | $21,495 |
| **Total** | **$14,426** | **$15,484** | **$19,427** | **$21,495** |

DESCRIPTION: Two types of Individual Retirement Accounts (IRAs) offer tax benefits: the Roth IRA and the traditional IRA. Contributions to a Roth IRA are taxable, but the earnings and qualified distributions made more than five years after the establishment of the IRA are tax-free. The pattern of benefits for a traditional IRA is the opposite. Some contributions to a traditional IRA are tax-deductible for taxpayers below specified income levels, and the earnings on contributions are tax-free, but the qualified distributions are taxable. Participation in IRAs is approximately evenly split between Roth IRAs and traditional IRAs.[169]

Qualified distributions to a Roth IRA are those made after age 59½, upon the death or disability of the individual, or up to $10,000 for first-time homebuyer expenses, for education expenses, or unreimbursed medical expenses. An individual may contribute up to $6,000 to a Roth IRA ($7,000 for an individual above 50) or an amount equal to earned income, whichever is less, but eligibility is conditioned on income.

Qualified distributions to a traditional IRA must start by age 72 if reaching age 70½ after 2019 to avoid any penalty, and individuals are allowed to roll over employer retirement account balances into individual IRAs. The allowable contribution was phased out for single filers with income between $109,000 and $129,000 and for joint filers with income between $68,000 and $78,000 during tax year 2022.

The above expenditure reflects the net effect of traditional and Roth IRAs. It reflects the forgone taxes from the deduction of IRA contributions by some taxpayers, the forgone taxes from not taxing IRA earnings, and the revenue gain from the taxation of IRA distributions (traditional IRAs distributions are taxed).

PURPOSE: According to CRS, "(T)he provision for IRAs was enacted in the Employee Retirement Income Security Act of 1974, but it was limited to individuals not covered by pension plans. The purpose of IRAs was to reduce discrimination against these individuals."[170] The intent of the exclusion is also to provide an incentive for taxpayers to save for retirement and a savings incentive for workers who do not have employer-provided pension plans.

[169] Urban-Brookings Tax Policy Center, The Tax Policy Briefing Book: A Citizens' Guide for the 2008 Election and Beyond, p. II-3-1, available at www.taxpolicycenter.org.
[170] U.S. Senate, Committee on the Budget, p. 1072.

IMPACT: Taxpayers who save for retirement through an IRA benefit from this provision. The Congressional Research Service notes that "IRAs tend to be less concentrated among higher-income taxpayers than some other types of capital tax subsidies, in part because they are capped at a dollar amount and in part because of the income limits in some cases. Their benefits do tend, nevertheless, to accrue more heavily to the upper half of the income distribution. This effect occurs in part because of the low participation rates at lower-income levels. Further, the lower marginal tax rates at lower income levels make the tax benefits less valuable."[171]

It is not clear whether IRAs and other tax-favored retirement plans increase savings. CRS notes that "Another economic justification for IRAs is that they arguably increase savings and increase retirement security. The effects of these plans on savings and overall retirement income are, however, subject to some uncertainty, and this issue has been the subject of a considerable literature."[172] William Gale and Benjamin Harris of the Urban-Brookings Tax Policy Center pointed out that "Savings incentives do not raise private saving to the extent that households finance their contributions by shifting their existing assets into a tax-favored account, or by shifting current-period saving that would have occurred even in the absence of the incentive, or by increasing their debt."[173]

*Exclusions*

## 44. Social Security and Railroad Retirement benefits

Internal Revenue Code Section: 86
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1938

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $21,653 | $22,969 | $24,331 | $29,415 |
| **Total** | **$21,653** | **$22,969** | **$24,331** | **$29,415** |

DESCRIPTION: A portion of Social Security and Railroad Retirement Board benefits are not subject to federal income tax. By local law, the District of Columbia has extended the tax exemption to the full amount of benefits (see tax expenditures #116-#119 in this report). This description and the estimate of forgone revenue shown above pertain only to exempt benefits due to the District's conformity to the federal income tax rules.

The amount of Social Security benefits and "Tier 1" Railroad Retirement benefits (which are equivalent to Social Security benefits received by a railroad worker) subject to federal taxation depends on the amount of "provisional income" above certain thresholds. Provisional income is adjusted gross income plus one-half of Social Security benefits and otherwise tax-exempt interest income, such as tax-exempt bonds.

Taxpayers with provisional income under $25,000 (single) or $32,000 (married filing jointly) pay no tax on their Social Security or Railroad Retirement benefits.

If provisional income is above the tax-exempt thresholds but below $34,000 (single) or $44,000 (joint), then the amount of benefits subject to tax is the lesser of (1) 50 percent of benefits, or (2) 50 percent of income above the tax-exempt thresholds. If the provisional income is above the second-level threshold of $34,000 ($44,000 for a married couple), the amount of benefits subject to tax is the lesser of (1) 85 percent of benefits or (2) 85 percent of income above the second threshold, plus the smaller of (a) $4,500 ($6,000 for a married couple), or (b) 50 percent of benefits. For married people filing separately, taxable benefits are less than 85 percent of benefits or 85 percent of provisional income. The income thresholds described above are not indexed for inflation.

The proceeds from taxation of Social Security and Railroad Retirement benefits at the 50 percent level are credited to the Social Security Trust Fund and the National Railroad Retirement Investment Trust. The proceeds of the taxation of benefits at the 85 percent level are credited to the Medicare Hospital Insurance Trust Fund.

PURPOSE: The exclusion aims to treat Social Security and Railroad Retirement benefits more like other pension income, thereby enhancing horizontal equity. Social Security and Railroad Retirement benefits were tax-free until 1984, unlike other pension benefits, which are fully taxable except for the proportion of projected lifetime benefits that can be attributed to the worker's contributions. The Social Security amendments of 1983 (P.L. 98-21) made 50 percent of benefits above threshold amounts taxable, and the Omnibus Budget Reconciliation Act of 1993 (P.L. 103-

66) created the second level in which 85 percent of benefits above the threshold are subject to taxation.

The Congressional Research Service points out that the exemption level and the progressive rates for the taxing of benefits reflect the social welfare goals of Social Security, which differs from a regular pension program in basing its benefits on work history and providing additional benefits to people with lower earnings.[174] There have been no direct legislative changes regarding taxation of Social Security benefits since 1993.

IMPACT: CRS observes, "Under the current two-level structure, all Social Security beneficiaries have some untaxed benefits. The Congressional Budget Office estimates that more than 70 percent of benefits are untaxed. Taxes are imposed on at least half of the benefits for middle and upper-income beneficiaries, while lower-income beneficiaries have no benefits taxed."[175]

President Bush's Advisory Panel on Federal Tax Reform criticized the two-tiered structure for the taxation of Social Security and railroad retirement benefits for being overly complicated and permitting "bracket creep," which means that more and more recipients cross the income thresholds each year due to inflation and are required to pay more tax.[176]

[174] U.S. Senate, Committee on the Budget, pp. 1106-1108.
[175] Ibid, p. 1109.

*Exclusions*

## 45. Survivor annuities paid to families of public safety officers

Internal Revenue Code Section: 101(h)
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1997

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | too small | too small | too small | too small |
| **Total** | **too small** | **too small** | **too small** | **too small** |

Note: "Too small" means that the nationwide federal revenue impact was estimated as $50 million or less.

DESCRIPTION: The surviving spouse or child of a public safety officer killed in the line of duty can exclude from gross income a survivor annuity payment under a government pension plan. The annuity must be attributable to the individual's service as a public safety officer.

PURPOSE: According to the Congressional Research Service, "Congress intended to subject annuities paid to surviving spouses of public safety officers killed in the line of duty to the same tax treatment as annuities paid to survivors of military service personnel killed in combat."[177]

IMPACT: Surviving family members of officers killed in the line of duty benefit from this provision. The annual revenue loss from this provision has been less than $50 million since its enactment in 1997.[178]

[177] U.S. Senate, Committee on the Budget, p. 1102.
[178] Ibid.

***Income Tax***
*Exclusions*

## 46. Workers' compensation benefits

Internal Revenue Code Section: 104(a)(1)
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1918

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $3,212 | $3,212 | $3,319 | $3,319 |
| **Total** | **$3,212** | **$3,212** | **$3,319** | **$3,319** |

DESCRIPTION: Workers' compensation benefits (both medical and non-medical benefits) granted to employees in the case of a work-related injury and to survivors in case of an employee's work-related death are not taxable. Employers finance the benefits through insurance or self-insurance, and their costs are deductible as a business expense. Benefits are paid regardless of who was at fault, and workers' compensation is treated as the exclusive remedy for work-related injury or death. The states administer workers' compensation programs.

PURPOSE: The Congressional Research Service states that no rationale for the exclusion is found in the legislative history (the provision was enacted in 1918), "However, it has been maintained that workers' compensation should not be taxed because it is in lieu of court-awarded damages for work-related injury or death that, before the enactment of workers' compensation laws … would have been payable under tort law for personal injury or sickness and not taxed."[179]

IMPACT: Households that benefit the most from the exclusion are those that could continue to work, return to work like those with partial or short-term disabilities, or have other sources of taxable income since their combined incomes would likely be above the taxable threshold level. CRS states that the "Exclusion of workers' compensation benefits from taxation increases the value of these benefits to injured employees and survivors, without direct cost to employers, through a tax subsidy."[180] The exclusion is additionally a regressive subsidy since it replaces more income for higher-income employees than those in poorer households.

[179] U.S. Senate, Committee on the Budget, p. 1007.
[180] Ibid.

*Exclusions*

## 47. Reduced tax rate on active income of controlled foreign corporations

Internal Revenue Code Sections: 11(d), 91, 245A, 250, 882, and 951-964
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1909

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $79,347 | $72,148 | $55,911 | $48,864 |
| Personal Income Tax Loss | $0 | $0 | $0 | $0 |
| **Total** | **$79,347** | **$72,148** | **$55,911** | **$48,864** |

DESCRIPTION: Firms incorporated in the US are taxed on their worldwide income, while foreign-chartered corporations are only taxed on their U.S. source income. Firms that change headquarters to foreign countries are treated as U.S. firms if U.S. shareholders of the former U.S. firm retain 80 percent more ownership and are also called surrogate firms. Also, other firms where former U.S. shareholders retain 60 percent but less than 80 percent ownership are called inverted firms.

Generally, some of the overall income of controlled foreign corporation (CFC) subsidiaries is subject to income tax that falls into two types: Subpart F income (Sections 951- 964) and other income. Subpart F income is income related to passive investment rather than income from active business operations. Additionally, it includes certain types of sales, services, and other income whose geographic source can easily be shifted is included in Subpart F. Foreign tax credits associated with that income are allowed to offset U.S. tax on that income and are allowed on an overall basis (combining income and credits from different countries).

A reduced tax rate known as the global intangible low-taxed income (GILTI) is imposed on other income. CRS states that "GILTI income is technically part of Subpart F but is subject to a separate foreign tax credit treatment and other rules. Two deductions are allowed in addition to deducting normal Subpart F income. First, a deemed return to tangible investments, 10 percent of the tax basis (cost less depreciation) for tangible assets net of interest deductions, is excluded so that no taxes are imposed on this income. Second, 50 percent of the remaining income is deducted for taxable years beginning after December 31, 2017, and through taxable years beginning before January 1, 2025. Thus, the tax rate on this income is 10.5 percent (half of the 21 percent corporate tax rate)."[181]

PURPOSE: Deferral has been a part of the US tax system since 1909. As CRS states, "In 1962, the Kennedy Administration proposed a substantial scaling-back of deferral to reduce outflows of U.S. capital. Congress, however, was concerned about the potential effect of such a step on U.S. multinationals and on U.S exports. Instead of repealing deferral, the Subpart F provisions were adopted in The Revenue Act of 1962 (P.L. 87-834) and were aimed at taxpayers who used deferral to accumulate funds in so-called "tax haven" countries. (Hence, Subpart F's concern with income whose source can be easily manipulated.)"[182] The purpose of this tax deferral is to encourage the purchase and operation of foreign subsidiaries by U.S. firms, thereby increasing U.S. firms'

[181] U.S. Senate, Committee on the Budget, p. 44
[182] Ibid, p. 46

penetration of foreign markets and enhancing the firms' global competitiveness. Proponents also contend that the tax deferral boosts U.S. exports.

IMPACT: CRS states, "The exemption from tax for tangible investments creates an incentive to make tangible investments in lower-tax countries abroad rather than in the United States. The deduction for GILTI income also creates an incentive to hold intangible assets abroad in low-tax countries. These effects interact with the U.S. deduction for certain intangible income derived from FDII, which encourages intangibles to be located in the United States but discourages tangible investment."[183]

CRS also points out that in the new tax reform, intangible investment income is not taxed, unlike the old system, where it would be taxed when repatriated. Thus, while the lower corporate tax rate may encourage more investment in the United States, excluding tangible returns may encourage more investment abroad.

[183] U.S. Senate, Committee on the Budget, p. 45.

***Income Tax***
*Exclusions*

## 48. Allowances for federal employees working abroad

Internal Revenue Code Section: 912
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1943

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $4,681 | $4,957 | $5,232 | $5,232 |
| **Total** | **$4,681** | **$4,957** | **$5,232** | **$5,232** |

DESCRIPTION: U.S. federal civilian employees working abroad can exclude from personal taxable income certain special allowances that are provided to offset the costs of living abroad, such as the costs of housing, education, and travel. Like other U.S. citizens, federal employees who work abroad are subject to U.S. taxes and can credit any foreign taxes paid against their U.S. taxes.

PURPOSE: The exclusion was enacted in response to rising living costs abroad. This exclusion aims to offset the extra costs of working abroad (such as maintaining a home in the U.S. and in a foreign country) and encourage employees to accept assignments abroad.

IMPACT: Federal civilian employees working abroad benefit from this provision. CRS notes, "Federal employees abroad may receive a significant portion of their compensation in housing allowances, cost-of-living differentials, and other allowances. The income exclusions permitted under section 912 can substantially reduce their taxes. Data suggest that real incomes for federal workers abroad are generally higher than real incomes in the United States. Consequently, section 912 exclusions probably reduce the progressivity of the income tax."[184]

The tax expenditure is ambiguous in promoting horizontal equity because without the exclusion, "federal employees in high-cost countries would likely pay higher taxes than persons with identical real incomes who work in the United States. The higher nominal income needed to offset higher living costs abroad could place federal employees stationed abroad in a higher tax bracket."[185] At the same time, the exclusion may also encourage federal agencies to provide more compensation in the form of generous special allowances than would otherwise be the case, thereby undermining efficiency.

*Exclusions*

## 49. Income earned abroad by U.S. citizens: Housing and Salary

Internal Revenue Code Section: 911
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1926

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $11,130 | $11,705 | $12,308 | $12,941 |
| **Total** | **$11,130** | **$11,705** | **$12,308** | **$12,941** |

DESCRIPTION: U.S. citizens who live abroad (except for U.S. government employees, who benefit from a separate exclusion described under tax expenditure #48) can exclude up to $112,600 in foreign earned income from personal taxable income in 2022. The limit on excludable income is adjusted annually for inflation. A taxpayer must meet the physical residence tests to receive the exclusion.[186] Taxpayers may also exclude certain foreign housing expenses from taxable income.[187] The combined income and housing exclusion cannot exceed the taxpayer's total foreign-earned income for that year, including the value of a housing allowance.

PURPOSE: The purpose of this exclusion is to compensate U.S. citizens working abroad for the costs of living overseas and the taxes they pay to the foreign country where they live. When the exclusion was originally adopted in 1926, proponents argued that it "would bolster U.S. trade performance since it would provide tax relief to U.S. expatriates engaged in trade promotion."[188] The history of the exclusion shows a continuing attempt by policymakers to find a balance between the provision's perceived beneficial effects on U.S. trade and economic performance and perceptions of tax equity.

IMPACT: U.S. citizens who live and work abroad benefit from this provision. The Congressional Research Service points out that "The impact of the exclusions on Americans working abroad depends partly on whether their foreign taxes are higher or lower than their U.S. taxes (before taking the exclusion into account). For expatriates who pay high foreign taxes, the exclusion holds little importance because they can use the foreign tax credit to offset their U.S. tax liability. For expatriates who pay little or no foreign taxes, however, the exclusion can reduce or eliminate their U.S. tax liability."[189]

[186] Physical presence test: a person must be a U.S. citizen or permanent resident, must have their tax home in a foreign country, and must either be a bona fide resident of a foreign country or have lived abroad for at least 330 days of any 12 consecutive months.
[187] The housing exclusion is equal to the amount by which housing costs exceed 16 percent of the earned income exclusion but cannot exceed 30 percent of the maximum earned income exclusion (which is $112,000 in 2022). In addition, the Treasury Department has the authority to raise the maximum housing exclusion above these levels in high-cost cities.
[188] U.S. Senate, Committee on the Budget, p. 35.
[189] Ibid, p. 34.

Employers also benefit because the exclusion subsidizes the transfer of employees to positions overseas; without the exclusion, employers might have to reimburse employees for the taxes paid on their housing and other expenses of living abroad.

Additionally, CRS notes that "scholars have argued that the exclusions may actually work against U.S. domestic economic interests by encouraging highly compensated U.S. citizens to work overseas, thereby both expatriating U.S. intellectual capital and reducing U.S. tax revenue."[190]

[190] U.S. Senate, Committee on the Budget, p. 37.

## 50. Benefits and allowances for Armed Forces personnel

Internal Revenue Code Sections: 104, 112, 134 and a court decision: *Jones v. United States*, 60 Ct. Cl. 552 (1925).
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1925

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $3,046 | $3,137 | $3,319 | $3,637 |
| **Total** | **$3,046** | **$3,137** | **$3,319** | **$3,637** |

DESCRIPTION: Military personnel receive a variety of in-kind or cash benefits that are not taxed. These include medical and dental benefits, group life insurance, professional education and dependent education, moving and storage, premiums for survivor and retirement protection plans, subsistence allowances, uniform allowances, housing allowances, overseas cost-of-living allowances, evacuation allowances, family separation allowances, travel for consecutive overseas tours, emergency assistance, family counseling, defense counsel, burial and death services, certain combat-zone compensation and combat-related benefits, and travel of dependents to a burial site. Any cash payments in lieu of the benefits are also excluded from taxable income.

In addition, payments made to families when members of the armed forces die on active duty or while traveling to or from active duty are excluded from taxation.[191]

PURPOSE: CRS states that "The exemption of armed forces benefits and allowance evolved from the precedent set by *Jones v. United States,* through subsequent statutes, regulations, and administrative practices."[192] The rationale of the exclusion is to reduce tax burdens of military personnel during wartime (as in the use of combat pay provisions); other allowances were based on the belief that certain types of benefits are intrinsic elements in the military structure.

IMPACT: Military service members and their families benefit from the exclusion. CRS states, "Some argue that the exclusion for military allowances and benefits functions as an inequitable substitute for additional taxable compensation, since high-income military personnel derive greater benefits from this treatment than do low-income members."[193] The value of the exclusion, therefore, reduces the progressivity of the income tax system. The exclusion may also harm efficiency by encouraging the Defense Department to provide members of the armed forces with a greater share of non-cash benefits than they would prefer. Nevertheless, CRS states that the "elimination of the exclusions could lead some service members to think that their benefits were being cut, or provide an opportunity for Congress or the president to cut benefits, making it more difficult to recruit new military personnel and to retain existing personnel."[194]

[191] Families of a deceased member of the armed forces receive a $100,000 death gratuity payment.

## 51. Combat pay

Internal Revenue Code Section: 112
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1918

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $409 | $409 | $500 | $546 |
| **Total** | **$409** | **$409** | **$500** | **$546** |

DESCRIPTION: Pay received by active members of the U.S. Armed Forces is excluded from gross income during any month in which the member served in a combat zone or was hospitalized due to an injury or illness incurred while serving in a combat zone. For commissioned officers, the exclusion is limited to the maximum compensation for active enlisted military personnel. For hospitalized service members, the exclusion is limited to two years after he or she ends service in the combat zone.

PURPOSE: The Congressional Research Service states, "Generally, the compensation paid to military personnel serving in a combat zone is increased to reflect the hazards inherent in such a duty. Excluding combat pay from taxation may reflect a general public recognition that service members should be rewarded for putting their lives at risk."[195]

IMPACT: The exclusion of combat pay significantly reduces (for commissioned officers) or eliminates (for enlisted personnel) the tax liability of active military personnel serving in a combat zone.

[195] U.S. Senate, Committee on the Budget, p. 31.

*Exclusions*

## 52. Military disability benefits

Internal Revenue Code Section: 104(a)(4), 104(a)(5), and 104(b)
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1942

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $136 | $182 | $182 | $182 |
| **Total** | **$136** | **$182** | **$182** | **$182** |

DESCRIPTION: Service members who become physically unfit to perform military duties can be retired on military disability under certain conditions. Individuals who were armed forces members on or before September 24, 1975, may be eligible for the exclusion of disability pay from personal taxable income. The amount of military disability pay for these individuals is based on the percentage-of-disability method or the years-of-service method. Under the percentage-of-disability method, the pension equals the percentage of disability multiplied by the terminal monthly basic pay. Under the years-of-service method, terminal monthly basic pay is multiplied by the number of service years times 2.5. Only the portion that would have been paid under the percentage-of-disability method is excluded from gross income.

Individuals who joined the armed forces after September 24, 1975, may exclude military disability payments equivalent to disability payments they could have received from the U.S. Department of Veterans Affairs. Otherwise, their disability payments may be excluded only if the disability is directly attributable to a combat-related injury.

Under the Victims of Terrorism Tax Relief Act of 2001, any civilian or member of the military whose disability is attributable to terrorism or military action anywhere in the world may exclude disability income from gross income.

PURPOSE: The exclusion aims to compensate veterans for economic hardship created by injury or illness. According to the Congressional Research Service, the blanket exclusion for military disability pay was enacted in 1942, based partly on the view that military disability pay was similar to workers' compensation, which was excluded from the federal income tax. In 1976, Congress tightened the exclusion due to concern about abuses by "members of the armed forces who were classified as disabled shortly before becoming eligible for retirement to obtain tax-free pension benefits."[196] However, those who joined the military on or before September 24, 1975, could continue under the prior rules.

IMPACT: According to CRS, The exclusion of disability pension payments provides beneficiaries more after-tax income than they would receive from the same amount of taxable pension benefits.[197] Therefore, exclusion favors higher-income veterans. Additionally, the true cost of the tax expenditure is understated since the exclusion is a form of spending through the tax code.

## 53. Earnings of certain environmental settlement funds

Internal Revenue Code Section: 468B
Federal Law Sunset Date: None
Year Enacted in Federal Law: 2005

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | too small | too small | too small | too small |
| Personal Income Tax Loss | $0 | $0 | $0 | $0 |
| **Total** | **too small** | **too small** | **too small** | **too small** |

Note: "Too small" means that the nationwide federal revenue impact was estimated as $50 million or less.

DESCRIPTION: Hazardous waste site cleanup is sometimes funded by environmental settlement funds, which serve the same purpose as an escrow account. These funds are established in consent decrees between the U.S. Environmental Protection Agency (EPA) and the parties responsible for contaminating a site under the jurisdiction of a federal district court. This provision allows businesses that contribute to certain environmental settlement funds to exclude the earnings on those contributions from taxable income. The provision effectively lowers the after-tax cost to a business settling with the EPA to clean up hazardous wastes identified through the "Superfund" program.

The conditions needed to be satisfied for the fund program to be exempt from taxation include: (1) a court order establishes it; (2) it is created to receive settlement payments as directed by a government entity for the sole purpose of resolving and satisfying one or more liability claims brought under CERCLA; (3) a government entity has the authority and control over the expenditure of the fund; and (4) any remaining funds at termination will be disbursed to the government entity.[198]

PURPOSE: The exclusion aims to incentivize parties deemed responsible for hazardous waste sites to enter into an agreement with the EPA to clean up the sites.

IMPACT: Businesses establishing environmental settlement funds during the eligible period benefit from this provision. The Congressional Research Service states, "The tax expenditure tied to the provision lies in the fund income that escapes taxation. In effect, the provision lowers the after-tax cost to a taxpayer of settling with the EPA to clean up hazardous waste sites identified through the Superfund program."[199]

There may also be a broader public benefit because the exclusion should encourage those responsible for hazardous waste to act more quickly to remediate the sites at their own expense, saving tax dollars that would otherwise be needed to perform the remediation.

## 54. Energy conservation subsidies provided by public utilities

Internal Revenue Code Section: 136
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1992

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $50 | $40 | $40 | $40 |
| **Total** | **$50** | **$40** | **$40** | **$40** |

DESCRIPTION: Residential energy customers can exclude from personal taxable income any subsidy (directly or indirectly) from a public utility for purchasing or installing an energy conservation device. If an energy conservation expenditure qualifies for this exclusion, the taxpayer may not claim any other tax benefits for the same expenditure.

PURPOSE: The exclusion aims to encourage residential customers to participate in conservation programs sponsored by public utilities. These programs would enhance the energy efficiency of dwelling units and encourage energy conservation in residential buildings.

IMPACT: Homeowners participating in conservation programs and installing energy-saving devices benefit from this provision. The Congressional Research Service points out that this tax preference "can be justified on the grounds of conservation and load management if they result in less pollution or more stable energy provisions during times of peak demand. In general, however, it would be more efficient to tax energy fuels directly than to subsidize a particular method of achieving conservation. From an economic perspective, allowing targeted tax benefits for certain types of investment or consumption can result in a misallocation of resources"[200]

CRS also notes that complex incentives are at play in the case of rental housing. The tenant and landlord lack a strong financial incentive to invest in energy conservation equipment because the benefits may not accrue entirely to the party paying the cost. Tenants may not occupy a rental property long enough to reap the benefits of energy conservation measures, whereas landlords may not have sufficient control over the behavior of renters to be sure that the investment in energy conservation will pay off. As a result, "These market failures may lead to underinvestment in conservation measures in rental housing and provide the economic rationale for this provision." [201] Nevertheless, the exclusion is available both to owners who occupy their homes and those who rent them out.

*Exclusions*

## 55. Interest on state and local private-activity bonds issued to finance water, sewer, and hazardous-waste facilities

Internal Revenue Code Sections: 103, 141, 142, and 146.
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1968

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $124 | $124 | $124 | $124 |
| Personal Income Tax Loss | $214 | $214 | $214 | $214 |
| **Total** | **$339** | **$339** | **$339** | **$339** |

DESCRIPTION: Interest income on state and local bonds used to finance the construction of sewage facilities, facilities used to supply water, and facilities that dispose of hazardous waste is tax-exempt. The bonds are classified as private-activity bonds rather than governmental bonds if a substantial portion of the benefits accrues to private organizations instead of the public. The private-activity bonds issued for these facilities are subject to a state annual volume cap greater than $105 per capita or $321.78 million in 2020.

To qualify for tax-exempt bond financing, water-supply facilities must serve the general public, and must be operated by a governmental unit or have their rates established or approved by a government regulator. The portion of a hazardous waste facility financed with tax-exempt bonds cannot exceed the portion of the facility to be used by entities other than the owner or operator of the facility.

PURPOSE: The purpose of the tax expenditure is to encourage increased investment. It provides low-cost financing of water, sewer, and hazardous-waste facilities. Investors purchase the bonds at low interest rates because the income from them is tax-free.

IMPACT: The Congressional Research Service suggests that tax-exempt water, sewer, and hazardous waste facility financing has public benefits because the subsidy helps correct a market failure that may lead to underinvestment. The benefits of the facilities to the environment and public health across state and local borders, but state and local governments may not recognize the spillover benefits when setting spending levels. CRS adds, "There are significant costs, real and perceived, associated with siting an unwanted hazardous waste facility. The federal subsidy through this tax expenditure may encourage increased investment and spread the cost to more potential beneficiaries (i.e., federal taxpayers)."[202]

CRS also cautions that "As one of many categories of tax-exempt private-activity bonds, bonds for these facilities increase the financing cost of bonds issued for other public capital. With a greater supply of public bonds, the interest cost on the bonds necessarily increases to attract investors. In

[202] U.S. Senate, Committee on the Budget, p. 659.

addition, expanding the availability of tax-exempt bonds increases the range of assets available to individuals and corporations to shelter their income from taxation."[203]

[203] U.S. Senate, Committee on the Budget, p. 659.

***Income Tax***
*Exclusions*

## 56. Employer-provided adoption assistance

Internal Revenue Code Sections: 23 and 137
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1996

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $985 | $996 | $1,006 | $1,017 |
| **Total** | **$985** | **$996** | **$1,006** | **$1,017** |

DESCRIPTION: Benefits that a taxpayer receives through an employer-sponsored adoption assistance program are excluded from personal taxable income. The employer-sponsored benefits must be provided according to a written plan, and qualified expenses eligible for deduction include reasonable and necessary adoption fees, court costs, attorney fees, and travel expenses. In the case of a special-needs adoption, expenses such as construction, renovations, or alterations may qualify for the exclusion.

For tax year 2022, the maximum exclusion was $14,890 per child. The deduction was phased out for taxpayers with modified adjusted gross income between $223,410 and $263,410; at higher income levels, there is no benefit. The maximum deduction and the income levels over which the benefits are phased out are indexed to inflation.

Qualified adoption expenses claimed under this exclusion cannot also be claimed for the federal adoption tax credit (and vice-versa). The exclusion also does not cover any expenses paid by a federal, state, or local grant.

PURPOSE: The purpose of the exclusion is to encourage and facilitate adoption, especially for children with special needs, by reducing the associated financial costs. CRS states that "Congress enacted the credit and exclusion because of the belief that the financial costs associated with the adoption process should not be a barrier to adoptions."[204] Specifically, it is designed to provide tax relief to moderate-income families for the costs associated with adoptions and to encourage families to seek adoptable children. The belief is that the expenditure expansion would encourage more adoptions and allow more families to afford adoption.

IMPACT: The exclusion primarily benefits middle-income families because it is phased out for wealthy taxpayers. The Congressional Research Service points out that there is little evidence that adoption tax benefits are an effective policy tool to increase adoptions. Although the amount of adoption tax benefits has increased over time, the actual number of children adopted has not. CRS also states that "If adoption tax benefits do not lead to additional adoptions, they are considered economically inefficient by economists and are instead a windfall benefit to families that would have adopted even in the absence of these benefits."[205]

[204] U.S. Senate, Committee on the Budget, p. 866.
[205] Ibid, p. 868.

## 57. Employer-provided childcare

Internal Revenue Code Sections: 21 and 129
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1981

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $867 | $921 | $1,188 | $1,338 |
| **Total** | **$867** | **$921** | **$1,188** | **$1,338** |

DESCRIPTION: Employer payments for dependent care through a dependent-care assistance program are not included in an individual's personal taxable income. The maximum annual exclusion is $5,000 and may not exceed the lesser of the employee's earned income or the earned income of the employee's spouse. To qualify, employer assistance must be provided through a plan that meets certain conditions, such as eligibility requirements that do not discriminate in favor of highly compensated employees, shareholders, or owners.

Qualifying dependent-care expenses include household services, daycare centers, and other similar types of non-institutional care. Dependents must be under the age of 13, except for a physically or mentally incapacitated spouse or dependent who lives with the taxpayer for more than half of the year. Day care centers must comply with state and local laws and regulations for the exclusion of payments to be allowable. Payments to relatives are allowable only if the relatives are not dependents of the taxpayer or a child of the taxpayer under age 19.

A taxpayer may also claim a nonrefundable tax credit for certain expenses incurred to care for a dependent child, disabled dependent, or disabled spouse. The expenses must enable the taxpayer to work to qualify for the credit.

PURPOSE: The rationale for the tax credit is that childcare is a work-related cost. The provision was intended to recognize the similarity of childcare expenses to employee business expenses and provide limited benefits. The Congressional Research Service states that the exclusion was intended "to encourage employers to sponsor childcare for their employees."[206] There is also the desire to reduce welfare costs.

IMPACT: CRS notes that the exclusion "provides an incentive for employers to provide, and employees to receive, compensation in the form of dependent-care assistance rather than cash … As is the case with all deductions and exclusions, the tax savings exclusion is proportional to the taxpayer's marginal tax rate and, thus, provides a greater benefit to taxpayers in high tax brackets than those in low tax brackets, all else being equal."[207] Nevertheless, the $6,000 limit on the exclusion restricts the benefit for upper-income families.

[206] U.S. Senate, Committee on the Budget, p. 851.
[207] Ibid, p. 850.

CRS further observes that "The exclusion tends to benefit middle- and higher-income households for a variety of reasons, including that higher-income workers are more likely to work for employers that offer these benefits. And higher-income workers in higher tax brackets will receive a greater tax savings from a given amount of the exclusion than lower-income workers in a lower tax bracket."[208]

On the other hand, CRS states that "the availability of dependent care can reduce employee absenteeism and unproductive work time. The tax exclusion may also encourage full participation of women in the workforce as the lower after-tax cost of childcare may not only affect the labor force participation but hours of work."[209]

[208] U.S. Senate, Committee on the Budget, p. 854.
[209] Ibid.

***Income Tax***
*Exclusions*

## 58. Foster care payments

Internal Revenue Code Section: 131
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1982

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $343 | $343 | $412 | $412 |
| **Total** | **$343** | **$343** | **$412** | **$412** |

DESCRIPTION: Payments made by a state, local, or qualified foster-care placement agency to a provider who cares for a foster child in the home are excluded from the personal taxable income of the provider. The exclusion applies both to reimbursements for the general cost of caring for a foster child as well as additional payments provided for the care of a child with physical, mental, or emotional handicaps (the latter are referred to as "difficulty of care" payments). Payments made are also not viewed as earned income by the Internal Revenue Service for purposes of the Earned Income Tax Credit (EITC).

The exclusion does not cover foster care payments made for more than 5 children aged 19 or older under the standard reimbursement rates or the "difficulty of care" reimbursement rates, nor does it cover payments for more than 10 children under the age of 19 who are eligible for "difficulty of care" rates.

PURPOSE: According to the Congressional Research Service, the exclusion of qualified foster care payments "was made to relieve foster care providers from the detailed record-keeping requirements of prior law,"[210] which disallowed any exclusion more than the expenses paid in caring for a foster child. "Congress feared that detailed and complex record-keeping requirements might deter families from accepting foster children or from claiming the full tax exclusion to which they were entitled."[211]

IMPACT: CRS observes that "it is generally understood that the tax law treatment of foster care payments prevents unnecessary accounting and record-keeping burdens for foster care providers, which may affect some families' decision to foster. The tax treatment of these payments also provides administrative convenience for the Internal Revenue Service."[212] Children in foster care may benefit from the exclusion because the reduction in the administrative burden may encourage more people to become foster parents, and there may be a broader social benefit from encouraging the placement of children in foster care.

## 59. Employer-provided transportation assistance

Internal Revenue Code Section: 132(f)
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1984 (parking benefits) and 1992 (transit benefits)

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | -$4,100 | -$4,225 | -$4,349 | -$4,473 |
| Personal Income Tax Loss | $8,564 | $8,778 | $9,100 | $9,528 |
| **Total** | **$4,464** | **$4,554** | **$4,751** | **$5,055** |

DESCRIPTION: In 2024, taxpayers can exclude up to $315 per month for employer-paid parking and an additional $315 per month for employer-provided transit passes or vanpool benefits. A "transit pass" means any pass, token, fare card, voucher, or similar item that entitles an individual to transportation in a mass transit system or through a commuter highway vehicle (vanpool). The maximum monthly exclusions for employer-provided parking and transit assistance are adjusted annually for inflation.

The 2017 tax legislation (P.L. 115-97) suspended the exclusion of bicycle commuting benefits and disallowed employer deductions for the costs of providing qualified transportation fringe benefits to employees, except as necessary for ensuring an employee's safety, for tax years starting after December 31, 2017, and before January 1, 2026.

Employees can use pre-tax dollars, at their employer's discretion, to pay for parking or mass transit benefits. The pre-tax option is not available for bicycle commuting benefits, which must be paid directly by the employer.

PURPOSE: The exclusion is part of a general policy of excluding employer-provided benefits from taxable income. The exclusion is capped to place a limit on the ability of employers and employees to shift compensation from taxable wages to non-taxable fringe benefits.

IMPACT: The Congressional Research Service states, "The subsidy benefits employees by effectively raising their after-tax compensation. This exemption arguably induces employees to use mass transportation, which reduces traffic congestion and lowers commuting costs for all urban workers. About 8 percent of the civilian workforce receives subsidized commuting benefits."[213]

Regarding mass transit, CRS observes that "Subsidies for mass transit and vanpools encourage the use of mass transportation and may reduce congestion and pollution. Some studies have found that transportation benefit programs can spur non-users of public transportation to become occasional users and occasional users to become more regular users … All commuters in an area may enjoy spillover benefits from reduced traffic congestion, such as lower transportation costs, shorter waiting times, in traffic, and improved air quality."[214] Nevertheless, "Businesses and workers located where mass transportation alternatives are lacking gain little benefit from this provision."[215]

[213] U.S. Senate, Committee on the Budget, p. 615.
[214] Ibid., pp. 616-617.
[215] Ibid., p. 616.

Regarding parking, CRS points out that "Subsidies or favorable tax treatment of parking may encourage more employees to drive to work, which may increase traffic congestion and air pollution. One study found that when employees in California firms were allowed to opt for a cash benefit instead of employer-provided parking benefits, the proportion of employees driving to work fell significantly…. Subsidized employee parking may also make finding parking spaces harder, which can affect quality of life in residential neighborhoods near work areas and the flow of customers for retail businesses." [216]

[216] Ibid, p. 617.

*Exclusions*

## 60. Interest on state and local private-activity bonds issued to finance airport, dock, and mass commuting facilities

Internal Revenue Code Sections: 103, 141, 142, and 146
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1968

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $249 | $249 | $249 | $249 |
| Personal Income Tax Loss | $750 | $750 | $750 | $750 |
| **Total** | **$999** | **$999** | **$999** | **$999** |

DESCRIPTION: Each state receives a certain amount of authority to issue tax-exempt private activity bonds and securities issued by a state or local government to finance qualified projects by a private user. Interest in these bonds is tax exempt. These qualified projects, which include the construction of airports, docks, wharves, and mass commuting facilities, are expected to benefit the public.

Although private-activity mass commuting facility bonds are subject to annual volume caps on private-activity bonds (the cap was $110 per capita or $335.115 million, whichever is greater, for each state in 2022), bonds issued for airports, docks, and wharves are not subject to the caps.

PURPOSE: The bonds promote the construction of airport, dock, wharf, and mass-transit infrastructure by subsidizing low interest rates, thereby lowering the cost of the facilities and supporting commerce. Investors purchase the bonds at low interest rates because the income from them is tax-free.

IMPACT: This provision benefits the owners of the airport, dock, wharf, and mass transit infrastructure, as well as the businesses and residents who use these facilities. There may also be spillover benefits from such investment. According to the Congressional Research Service, "Economic theory suggests that to the extent these facilities provide social benefits that extend beyond the boundaries of the state or local government, the facilities might be underprovided due to the reluctance of state and local taxpayers to finance benefits for nonresidents."[217]

CRS also identifies the potential costs of these private activity bonds, stating that "As one of many categories of tax-exempt private-activity bonds, those issued for airports, docks, wharves, and mass commuting facilities increase the financing cost of bonds issued for other public capital. With a greater supply of public bonds, the interest rate on the bonds necessarily increases to attract investors. In addition, expanding the availability of tax-exempt bonds increases the assets available to individuals and corporations to shelter their income from taxation."[218]

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | too small | too small | too small | too small |
| Personal Income Tax Loss | $107 | $107 | $107 | $107 |
| **Total** | **$107** | **$107** | **$107** | **$107** |

DESCRIPTION: States are authorized to issue tax-exempt private activity bonds, which are securities issued by a state or local government to finance qualified projects by a private user. These qualified projects, which include highway projects and surface freight transfer facilities (truck to rail or rail to truck) that receive federal aid, are expected to have a public benefit even though a substantial portion of the benefits will accrue to private individuals or businesses.

These bonds are not subject to the federally imposed annual state volume caps on private-activity bonds, but there is a national limitation of $15 billion on the aggregate value of the bonds, which the U.S. Secretary of Transportation allocates. The national limitation was increased from $15 billion to $30 billion in 2021 through the Infrastructure Investment and Jobs Act (P.L. 117-58).

PURPOSE: According to the Congressional Research Service, in 2005, Congress authorized state and local governments to issue tax-exempt bonds to finance highways and surface freight-transfer facilities "to enhance the efficiency of the nation's long-distance freight transport infrastructure. With more efficient intermodal facilities, proponents suggest that long-distance truck traffic will shift from government-financed interstate highways to privately-owned long-distance rail transport."[219] The bonds promote construction of highways and surface freight-transfer facilities by subsidizing low interest rates, thereby lowering the cost of the facilities and supporting commerce. Investors buy the bonds at low interest rates because the income earned is tax-free.

IMPACT: CRS noted two reasons for federal subsidy of intermodal facilities: "First, state and local governments tend to view these projects as potential economic development tools. ... Second, the federal subsidy may correct a potential market failure, leading to additional investment in qualifying transportation facilities where markets would tend to underinvest."[220] Private businesses should benefit from the construction of a more efficient system of long-distance freight transportation, but there may be spillover benefits to society as well in the form of economic development. CRS notes, "The facilities might be underprovided because state and local taxpayers may be unwilling to finance benefits for nonresidents."[221] At the same time, CRS points out that expanding tax-exempt private-activity bond issuance raises the financing cost of bonds issued for other public capital. "With a greater supply of public bonds, the interest rate on the bonds

[219] U.S. Senate, Committee on the Budget, pp. 602-603
[220] Ibid, p.603
[221] Ibid.

necessarily increases to lure investors. In addition, expanding the availability of tax-exempt bonds increases the assets available to individuals and corporations to shelter their income from taxation."[222] Additionally, "According to the Federal Highway Administration, as of July 2022, $15.20 billion of bonds have been issued under this provision for 38 projects. Thus, just over half (51 percent) of the bond allowance has been subscribed with the recent increase in the national limitation to $30 billion."[223]

## 62. G.I. bill education benefits

U.S. Code Section: U.S. Code Title 38, Section 5301 (not codified in the Internal Revenue Code)
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1917

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $686 | $696 | $741 | $827 |
| **Total** | **$686** | **$696** | **$741** | **$827** |

DESCRIPTION: Higher education benefits that veterans receive under the G.I. Bill are excluded from recipients' personal taxable income (as are all benefits provided by the U.S. Department of Veterans Affairs).

Veterans who served on active duty for at least three years after September 11, 2001, and received an honorable discharge are eligible for payment of full tuition and fees at all in-state public schools and tuition and fees up to $27,120.05 per academic year at private or foreign schools.[224] These veterans can also receive an annual stipend of up to $1,000 for books and supplies. Depending on their length of service, veterans who served for less than three years can qualify for partial benefits.

Veterans who entered active duty before September 11, 2001, are eligible for up to 36 months of education benefits, the amount of which depends on length of service and other factors.

If a veteran receives another education-related tax benefit, such as the Hope Credit or Lifetime Learning Credit, he or she must reduce the value of the other benefit by the amount of any G.I. bill payment made on his or her behalf.

PURPOSE: The exclusion is intended to recognize the service and sacrifices that veterans made for our country and to help them prepare for civilian employment.

IMPACT: Veterans receiving education benefits under the G.I. Bill benefit from this provision. The tax savings will be greater for veterans with higher incomes because they are in higher marginal tax brackets. The U.S. military benefits as well because the benefits provided under the G.I. Bill serve as a valuable recruitment tool.

## 63. Veterans' benefits and services

U.S. Code Section: U.S. Code Title 38, Section 5301 (not codified in the Internal Revenue Code)
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1917

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $7,319 | $7,683 | $8,455 | $9,910 |
| **Total** | **$7,319** | **$7,683** | **$8,455** | **$9,910** |

DESCRIPTION: All cash payments provided by the U.S. Department of Veterans Affairs are excluded from recipients' personal taxable income. The payments include veterans' readjustment benefits, disability compensation, interest on state and local government-qualified private activity bonds for veteran housing, and pension payments.

In addition, surviving spouses and parents of service members are eligible for dependency and indemnity compensation payments if the service member died on active duty, died due to a service-connected illness or condition, or was totally disabled for 10 or more years before death due to a non-service-connected illness or condition (this period is reduced to five years if the veteran was totally disabled upon leaving military service). These benefits are also exempt from taxation.

PURPOSE: The exclusion recognizes the service performed by veterans and the sacrifices they made for our country. It also provides income support to elderly veterans and those with disabilities.

IMPACT: Individuals receiving veterans' benefits and their families benefit from this provision. The Congressional Research Service observes, "Since these exclusions are not counted as part of income, the tax savings are a percentage of the amount excluded, depending on the marginal tax bracket of the veteran. Thus, the exclusion amounts will have greater value for veterans with higher incomes than for those with lower incomes."[225] CRS adds that "The rating schedule for veteran's disability compensation was intended to reflect the average impact of the disability on the average worker. However, because the rating is not directly related to the impact of the disability on the veteran's actual or potential earnings, the tax-exempt status of disability compensation payments may reflect a tax exemption for an inaccurate estimate of the veteran's lost earnings because of the disability."[226]

Additionally, some analysts "have noted that if veterans with new disability ratings below 30 percent were declared ineligible for compensation, it would shift spending to those veterans most impaired."[227] Although 5.1 percent of veterans receiving disability compensation had a combined rating of 30 percent or less, their disability compensation payments accounted for only 6.1 percent of all disability compensation payments for veterans in FY 2019.[228]

*ADJUSTMENTS*

## 64. Interest on student loans

Internal Revenue Code Section: 221
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1997

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $2,776 | $2,570 | $3,084 | $3,290 |
| **Total** | **$2,776** | **$2,570** | **$3,084** | **$3,290** |

DESCRIPTION: Taxpayers may deduct up to $2,500 in annual interest paid on qualified higher education loans (the maximum deduction is not adjusted for inflation). The deduction is phased out as income levels rise; in tax year 2022, the phase-out ranges were from modified adjusted gross incomes of $70,000 to $85,000 for single filers and $145,000 to $175,000 for joint filers. The deduction can be taken without itemizing (known as an adjustment or an above-the-line deduction).

A qualified education loan represents indebtedness incurred solely to pay for qualified higher education expenses, such as tuition, fees, and room and board, on behalf of a taxpayer or his or her spouse or dependents. The student must have been enrolled on at least a half-time basis in a program leading to a degree, certificate, or credential at an institution eligible to participate in U.S. Department of Education student aid programs or at a hospital or health care facility that offers internship or residency programs leading to a certificate or degree.

Interest on loans from relatives or qualified employer plans may not be deducted. The qualifying expenses eligible for deduction must be reduced by the amount of any scholarship or other payment that is excluded from the federal income tax. The deduction is not allowed for individuals who can be claimed as a dependent by another taxpayer.

PURPOSE: According to the Congressional Research Service, the interest deduction "was authorized … as one of a number of benefits intended to make postsecondary education more affordable for middle-income families who are unlikely to qualify for much need-based federal student aid. The interest deduction is seen as a way to help taxpayers repay education loan debt, which has risen substantially in recent years."[229]

IMPACT: In 2020, 27,470 District tax filers claimed the federal student loan adjustment. Tax filers with federal adjusted gross income of less than $50,000 comprised 34 percent of the claimants and accounted for 37 percent of the total amount deducted.[230] While tax filers with federal adjusted gross income of between $75,000 and $200,000 comprised 24 percent of the claimants and accounted for 17 percent of the total amount deducted, reflecting the phasing out of the benefit at

[229] U.S. Senate, Committee on the Budget, Tax Expenditures Compendium of Background Material on Individual Provisions December 1, 2014. p. 627.
[230] These data are from the Internal Revenue Service's Statistics of Income Tax Stats, "Tax Year 2020: Historic Table 2," available at https://www.irs.gov/statistics/soi-tax-stats-historic-table-2.

income levels from $65,000 to $80,000 (for individual returns) and $135,000 to $165,000 (for joint returns).

Researchers from the Urban Institute have pointed out that "Units that receive the student loan interest deduction differ from units receiving the other tax benefits because benefits accrue to former students who have loans rather than current students and their families."[231]

CRS also discusses the incentives created by the deduction as follows: "The tax deduction can be justified both as a way of encouraging persons to undertake additional education and as a means of easing repayment burdens. The deduction may encourage some graduates to accept public service jobs that may pay lower salaries. On the other hand, the deduction, which subsidizes debt financing of education, may encourage students and their families to take on additional debt to pay for higher education (either more education or more costly education). At the very least, analysis by Pew Trusts indicates that as student loan debt has increased over the past ten years, so has the aggregate costs of the deduction (in terms of reduced revenues). Whether the deduction will affect enrollment decisions is unknown. The deduction has been criticized for providing a subsidy to all borrowers (aside from those with higher income), even those with little debt, and for doing little to help borrowers who have large loans and high-interest payments. It is unlikely to reduce loan defaults, which generally are related to low income and unemployment."[232]

## 65. Contributions to health savings accounts

Internal Revenue Code Section: 223
Federal Law Sunset Date: None
Year Enacted in Federal Law: 2003

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $8,473 | $9,274 | $10,875 | $11,876 |
| **Total** | **$8,473** | **$9,274** | **$10,875** | **$11,876** |

DESCRIPTION: Health savings accounts (HSAs) provide a tax-advantaged vehicle for people to pay for unreimbursed medical expenses, such as deductibles and co-payments, which are not covered by insurance. Eligible individuals can establish and fund an HSA if they have qualifying high-deductible health insurance (at least $1,500 for single coverage and $3,000 for family coverage in tax year 2024). The minimum deductible levels do not apply to preventive care. Furthermore, qualifying healthcare plans cannot have limits on out-of-pocket expenditures that exceed $7,500 for single coverage and $15,000 for family coverage in 2024. The goal is to make individuals more conscious of healthcare costs while protecting them from catastrophic costs. HSA contribution limits were indexed to the Consumer Price Index for All Urban Consumers (CPI-U). However, the 2017 tax revision (P.L. 115-97) permanently changed the inflation adjustment measure to the Chained Consumer Price Index for All Urban Consumers (C-CPI-U), effective with the 2018 tax year.

For 2024, the monthly contribution limit to an HSA was $4,150 for single coverage and $8,300 for family coverage. Individuals who are at least 55 years old but not yet enrolled in Medicare can contribute an additional $1,000 per year. Individuals may deduct their HSA contributions from gross income in calculating their taxable income. An employer can also contribute to an HSA on an employee's behalf, and such contributions are not taxable to the employee or the employer. HSA account earnings are tax-exempt and unused balances may accumulate without limit.

Withdrawals from HSAs are exempt from federal income taxes if they are used for qualified medical expenses. However, withdrawals that are not used for qualified medical expenses are subject to a 20 percent penalty and must be included in the account owner's gross income to determine federal tax liability.

PURPOSE: According to the Congressional Research Service, HSAs "allow individuals to save for routine and other medical costs while insuring against large or catastrophic medical expenses. Properly designed, they may encourage more cost-conscious healthcare use and the accumulation of funds for medical care.[233]

IMPACT: CRS notes that "More recent IRS data on amounts deducted (i.e., individual contributions claimed for the above-the-line deduction) also indicate that in 2019, the deduction primarily benefited upper-middle- and higher-income families. As noted in the table below, roughly

[233] U.S. Senate, Committee on the Budget, pp. 912-913.

65 percent of the amounts deducted are taken by tax filing units with adjusted gross incomes over $100,000, with more than 36 percent claimed by those with adjusted gross incomes above $200,000. In total, $5.7 billion was deducted by individuals for HSA contributions across all income levels in 2019."[234]

CRS also observes that "HDHPs and HSAs have also been touted as a way to lower overall health care costs, as consumers are incentivized to find out what health care providers charge and be willing to switch to lower-cost providers or forgo a doctor's visit for what they may consider a minor ailment. This raises an important issue about the distinction between cost and quality and whether consumers can tell the difference. Similarly, incentives created by an HDHP/HSA to lower expenditures may unintentionally lower expenditures on "necessary" rather than "unnecessary" care."[235] In addition, it is not clear if individual healthcare consumers have the expertise necessary to judge whether they can reduce their healthcare usage or purchase lower-cost services without harming their health, which is necessary for this market-based approach to work.

People who finance more of their own healthcare costs benefit from HSAs because they otherwise enjoy a smaller subsidy from the exclusion of employer-provided healthcare. If an employer-provided health plan switches to a higher deductible, employees would lose out without an HSA.

## 66. Health insurance premiums and long-term care insurance premiums paid by the self-employed

Internal Revenue Code Section: 162(l)
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1986

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $7,442 | $8,119 | $10,438 | $11,791 |
| **Total** | **$7,442** | **$8,119** | **$10,438** | **$11,791** |

DESCRIPTION: Self-employed individuals may deduct amounts paid for health insurance covering themselves, their spouses, or their dependents. In addition, self-employed individuals may also reduce their taxable personal income by the amounts paid for qualified long-term care insurance, subject to annual limits ranging from $470 for individuals aged 40 and under to $5,880 for individuals over age 70 in 2024. The deduction is taken "above the line," meaning it can be used regardless of whether the taxpayer itemizes deductions on his or her tax return.

For this deduction, a self-employed individual is defined as a sole proprietor, working partner in a partnership, or employee of an S corporation who owns more than 2 percent of the corporation's stock. The following limitations apply: (1) the deduction cannot exceed a taxpayer's net earned income from the trade or business in which the health insurance plan was established, minus deductions for 50 percent of the self-employment tax and any contributions to a qualified pension plan, (2) the deduction cannot be taken for any month when a self-employed person is eligible to participate in a health insurance plan offered by an employer or a spouse's employer, and (3) if a self-employed person claims an itemized deduction for medical expenses, those expenses must be reduced by the amount of this deduction.

PURPOSE: According to the Congressional Research Service, the purpose of the deduction is (1) to provide the self-employed with a tax benefit comparable to the exclusion of employer-provided health benefits and (2) to improve access to health care by the self-employed.[236]

IMPACT: Approximately 3.8 million tax filers claimed over $31.4 billion under the health insurance deduction for the self-employed in 2019. It is unknown how many self-employed claimed the deduction for long-term insurance premiums.[237] CRS states that "The deduction lowers the after-tax cost of health insurance purchased by the self-employed proportional to a self-employed individual's marginal income tax rate. Individuals who purchase health insurance coverage in the non-group market but are not self-employed receive no such tax benefit. There is some evidence that the deduction has contributed to a significant increase in health insurance coverage among the self-employed and their immediate families. As one would expect, the gains appear to have been concentrated in higher-income households."[238]

[236] U.S. Senate, Committee on the Budget, p. 958.
[237] Ibid, 956.
[238] Ibid, 958.

The pattern of proportionality to marginal tax rate is evident in the District. In the tax year 2020, 8,920 District tax filers claimed the federal adjustment for medical insurance premiums paid by the self-employed, a 4.7% decline from 2019. However, filers with federal adjusted gross income of $200,000 or more represented about 42.2 percent of the claimants and accounted for more than half (60.9 percent) of the amount deducted.[239]

CRS also describes some of the efficiency losses to society that may result from the deduction, stating that "a 100-percent deduction is likely to encourage higher-income self-employed individuals to purchase health insurance coverage than they otherwise would. That overconsumption leads to wasteful or inefficient use of health care. To reduce the likelihood of such an outcome, some favor capping the deduction at an amount commensurate with a standardized health benefits package, adjusted for regional variations in health care costs."[240]

[239] These data are from the Internal Revenue Service's Statistics of Income Tax Stats, "Tax Year 2020: Historic Table 2," available at https://www.irs.gov/statistics/soi-tax-stats-historic-table-2

*Adjustments*

## 67. Contributions to self-employment retirement plans

Internal Revenue Code Sections: 401-407, 410-418E, and 457
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1962

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $119,192 | $123,520 | $147,892 | $154,980 |
| **Total** | **$119,192** | **$123,520** | **$147,892** | **$154,980** |

DESCRIPTION: Self-employed taxpayers who contribute to their own retirement accounts may deduct those contributions from their personal taxable income up to certain limits. The deduction is taken "above the line," meaning it can be used regardless of whether the taxpayer itemizes deductions on his or her tax return.

Taxes on the earnings of the retirement accounts are deferred until the funds are distributed during retirement. The withdrawals from the plans are included in personal taxable income. Therefore, the value of the tax expenditure equals the revenue that the government does not collect on retirement contributions and earnings, offset by the taxes paid on the pensions by those currently drawing down the benefits.

One type of self-employment retirement plan is a "simplified employee pension" (SEP). A self-employed taxpayer is allowed to deduct SEP contributions of as much as 25 percent of self-employment income (net of any SEP contribution) or $69,000 for 2024 (whichever is less). There are other retirement plan options for the self-employed, including 401(k) plans, other defined contribution plans, and defined benefit plans.[241]

PURPOSE: The purpose of the adjustment is to encourage the self-employed to save for retirement.

IMPACT: In tax year 2020, 4,210 District tax filers claimed this adjustment. The benefits were strongly concentrated among upper-income households. Tax filers with federal adjusted gross income of $200,000 or more represented the majority (68.5 percent) of the claimants and accounted for 86.2 percent of the total amount deducted.[242]

The adjustment lowers the after-tax cost of retirement contributions made by the self-employed by a percentage equal to a self-employed individual's marginal income tax rate, which disproportionately benefits high-income households. The tax-favored treatment of some retirement contributions and the earnings on those contributions may encourage individuals to shift their savings from taxable accounts to tax-advantaged accounts without increasing total savings. At the same time, the adjustment also promotes equity among self-employed individuals and individuals who work at public or private-sector organizations.

[241] The information about retirements for self-employed people is retrieved from https://www.irs.gov/Retirement-Plans/Retirement-Plans-for-Self-Employed-People

## 68. Overnight travel expenses of National Guard and Reserve members

Internal Revenue Code Sections: 62(a)(2)(E) and 162(p)
Federal Law Sunset Date: None
Year Enacted in Federal Law: 2003

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $136 | $136 | $136 | $136 |
| **Total** | **$136** | **$136** | **$136** | **$136** |

DESCRIPTION: A deduction from federal gross income is allowed for all unreimbursed overnight travel, meals, and lodging expenses of National Guard and Reserve members. This deduction can be taken without itemizing (an adjustment or above-the-line deduction).

To qualify, members must have traveled more than 100 miles away from home and stayed overnight as part of an activity while on official duty. No deduction is permitted for commuting expenses to and from drill meetings. The expenses may not exceed the general federal government per-diem rate applicable to that locale.

PURPOSE: The adjustment reimburses members of the National Guard and Reserve for expenses incurred in the line of duty. The Congressional Research Service states that "In enacting the deduction, Congress recognized the increasing role that Reserve and National Guard members were playing in national defense."[243]

IMPACT: National Guard and Reserve members benefit from this provision. CRS notes that "Some military benefits are similar to the "for the convenience of the employer" benefits provided in the private sector. These include allowances for housing, meals, moving and storage, overseas cost-of-living, and uniforms. Other military benefits are equivalent in their treatment of employer-provided fringe benefits, such as medical and dental benefits, education assistance, group term life insurance, and disability and retirement benefits. The tax deduction for the overnight travel expenses of National Guard members and reservists had a counterpart among civilian employees in section 162(a) deduction for the unreimbursed travel expenses of employees who are required to travel as part of their job. The Tax Cuts and Jobs Act suspended the latter deduction. Both deductions lower the after-tax cost of required travel."[244]

*DEDUCTIONS*

## 69. Accelerated depreciation of buildings other than rental housing

Internal Revenue Code Sections: 167 and 168
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1954

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $460 | $460 | $460 | $460 |
| Personal Income Tax Loss | $528 | $528 | $528 | $660 |
| **Total** | **$987** | **987** | **$987** | **$1,119** |

DESCRIPTION: This provision allows for accelerated depreciation of buildings as a deduction from personal and corporate income tax. The standard method to calculate depreciation is the straight-line method used under the alternative minimum tax, in which equal amounts are deducted over 40 years. The accelerated method allows buildings used for purposes besides rental housing to be depreciated over 39 years.

The revenue impact of this tax expenditure represents the difference between the tax that would be due under the 40-year period and the tax required under accelerated depreciation.

PURPOSE: The deduction promotes investment in buildings. In addition, accelerated depreciation helps offset any understatement of depreciation that results from using a historical cost basis to calculate depreciation, which does not account for inflation.

IMPACT: This provision benefits owners of buildings used in a trade or business. The Congressional Research Service states that "the direct benefits of accelerated depreciation accrue to owners of buildings, and particularly to corporations … Benefits to capital income tend to concentrate in the higher-income classes."[245]

CRS adds, "Much of the previous concern about the role of accelerated depreciation in encouraging tax shelters in commercial buildings has faded because the current depreciation provisions are less rapid than those previously in place and because there is a restriction on the deduction of passive losses."[246]

*Deductions*

## 70. Accelerated depreciation of equipment

Internal Revenue Code Sections: 167 and 168
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1954

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $22 | $22 | $22 | $22 |
| Personal Income Tax Loss | $7 | $7 | $7 | $7 |
| **Total** | **$29** | **$29** | **$29** | **$29** |

DESCRIPTION: This provision allows for accelerated equipment depreciation as a deduction from personal and corporate income tax. The standard method to calculate depreciation is the straight-line method in which equal amounts are deducted in each period. Equipment is currently divided into six categories depreciated over 3, 5, 7, 10, 15, and 20 years, respectively. Accelerated depreciation allows for faster write-offs than the straight-line method, such as "double declining balance depreciation," which permits taxpayers to apply twice the straight-line depreciation rate to each year's remaining undepreciated balance.

In addition, Congress and the President have periodically authorized "bonus depreciation," which allows a certain percentage of the cost of machinery and equipment to be deducted immediately. Bonus depreciation was in effect under federal law, allowing a 100 percent deduction for equipment placed into service from September 9, 2010, through the end of 2011 and permitting 50 percent expensing through the end of 2013. Nevertheless, in 2008, the District of Columbia "decoupled" from the federal bonus depreciation rules (but not from the regular accelerated depreciation rules described in the first paragraph), meaning that taxpayers could not include the bonus provisions when calculating their District taxes – and will not be able to do so in the future if bonus depreciation is reauthorized. [247]

Taxpayers eligible for another type of accelerated expensing of the cost of business property (known as the "Section 179 allowance") must calculate their Section 179 deduction first and then calculate any additional depreciation from the remaining basis.

PURPOSE: This deduction promotes investment in business machinery and equipment. Proponents of accelerated depreciation contend that the value of machinery and equipment declines faster in the early years and that depreciation should follow the same pattern.

IMPACT: This provision benefits machinery and equipment used in a trade or business. The Congressional Research Service states that "the direct benefits of accelerated depreciation accrue to owners of assets and particularly to corporations … Benefits to capital income tend to concentrate in the higher-income classes."[248]

[247] The statutory provision requiring decoupling was included in D.C. Law 17-219, the "Fiscal Year 2009 Budget Support Act of 2008," which took effect on August 16, 2008. See Title VII-L of the Act.
[248] U.S. Senate, Committee on the Budget, p. 483.

CRS adds, "Evidence suggests that the rate of economic decline of equipment is much slower than the rates allowed under current law, and this provision causes a lower effective tax rate on such investments than would otherwise be the case. The effect of these benefits on investment in equipment are uncertain, although more studies find equipment somewhat more responsive to tax changes than they do structures. … Equipment did not, however, appear to be very responsive to the temporary expensing provisions adopted and expanded in 2003."[249] Another risk is that subsidies for machinery and equipment may encourage the substitution of capital for labor, dampening employment growth.

The Center on Budget and Policy Priorities has urged states to decouple from the federal rules for bonus depreciation, arguing that a substantial portion of the benefits flow to multi-state corporations, which may spend the additional money out-of-state or increase their own profit. CBPP also points out that the bonus depreciation provisions include no requirement or incentive for a firm to buy machinery or equipment in the state.[250]

## 71. Amortization of business start-up costs

Internal Revenue Code Section: 195
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1980

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | too small | too small | too small | too small |
| Personal Income Tax Loss | $268 | $268 | $401 | $401 |
| **Total** | **$268** | **$268** | **$401** | **$401** |

DESCRIPTION: This provision allows a taxpayer to deduct from personal or corporate taxable income eligible start-up expenditures of up to $5,000 and to amortize any remaining amount over 15 years. The deduction must be reduced on a dollar-for-dollar basis when the costs exceed $50,000, and no start-up expenses may be deducted as a current expense once a taxpayer's total start-up expenses reach or exceed $55,000.

Such expenditures must satisfy two requirements to be deducted. First, the expenditures must be paid for creating or investigating a trade or business before the taxpayer begins an active business. Second, the expenditures must reflect costs that would be deductible for an active business.

PURPOSE: The Congressional Research Service states that the deduction is intended "to facilitate the creation of new businesses and reduce the frequency of protracted litigation over the tax treatment of start-up expenditures."[251]

IMPACT: New businesses that incur start-up costs benefit from this provision. CRS states, "Tax preferences for capital income (like IRC section 195) tend to benefit higher-income individuals."[252] CRS also observes that there are tax administration benefits both to start-up businesses and the IRS, stating that "Under the foundational principles of the federal income tax, business start-up costs should be written off over the life of a business because they are a capital expense. Such a view, however, raises the challenge of estimating the useful life of a business at its outset. IRC section 195 has three advantages as a means of addressing this challenge. First, it lowers the likelihood of costly and drawn-out legal disputes involving businesses and the IRS over the tax treatment of start-up costs. Second, it does so at a small revenue cost. Third, it simplifies tax accounting and temporarily increases cash flow for small business owners at an early stage of their firms' existence."[253]

## 72. Completed contract rules

Internal Revenue Code Section: 460
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1986

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $1,242 | $1,242 | $1,397 | $1,397 |
| Personal Income Tax Loss | $134 | $134 | $268 | $268 |
| **Total** | **$1,376** | **$1,376** | **$1,665** | **$1,665** |

DESCRIPTION: Some taxpayers with construction or manufacturing contracts extending for more than one tax year can use the completed contract method of accounting. Under this method, income and costs of the contract are reported when the contract is completed; however, some indirect costs may be deducted from corporate and personal taxable income in the year paid or incurred. This policy has been likened to giving taxpayers an interest-free loan because the speeding up of deductions temporarily provides them with more money.

This deduction is limited to home and other real estate construction contracts if they are in effect for less than two years and the contractor's gross receipts for the previous three years have averaged $10 million or less. The tax expenditure is the revenue loss that results from deferring tax on the contracts covered by the rule relative to the normal tax treatment of such contracts (which is to capitalize indirect costs and report them while the income from the contract is reported).

CRS notes that "Other real estate construction contracts may also be subject to these more relaxed rules if they are of less than two years' duration and the contractor's gross receipts are $25 million or less the year the contract is signed."[254]

PURPOSE: The purpose of the deduction is to recognize the uncertainties involved in certain contracts, which make it difficult to determine profit or loss until the contract is completed. IRS rules authorized the completed contract method of accounting in 1918, but the use of this method has since been restricted due to concern about perceived abuses by large contractors who were using accrual accounting in their own financial statements (which showed that they could estimate the profit or less before the contract was completed).

IMPACT: The Congressional Research Service states, "Use of the completed contract rules allows the deferral of taxes through mismatching income and deductions because they allow some costs to be deducted from other income in the year paid or incurred. This is true, even though the costs relate to the income that will not be reported until the contract's completion, and because economic income accrues to the contractor each year he works on the contract but is not taxed until the year the contract is completed. Tax deferral is the equivalent of an interest-free loan from the government for the amount of the deferred taxes. Because of the restrictions now placed on the use of the completed contract rules, most of the current tax expenditure relates to real estate

[254] U.S. Senate, Committee on the Budget, p. 516

construction, especially housing."[255] Although the deduction has a minor economic impact because it is now restricted to a very small segment of the construction industry, CRS notes that "One area where it is still permitted, however, is in the construction of single-family homes, where it adds some tax advantage to an already heavily tax-favored sector.[256]

## 73. Exception from passive loss rules for $25,000 of rental real estate loss

Internal Revenue Code Section: 469(i)
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1986

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $5,403 | $5,742 | $6,296 | $6,450 |
| **Total** | **$5,403** | **$5,742** | **$6,296** | **$6,450** |

DESCRIPTION: Taxpayers who own rental property and meet specific requirements can deduct up to $25,000 in passive losses from their ordinary income. Passive gains and losses generally arise from limited or general partnerships or other investment-oriented ventures in which the taxpayer does not actively participate.

Although passive-loss rules usually prohibit deducting rental property losses from income, this tax expenditure involves an exception to those rules. To qualify for the deduction, the taxpayer must play an active role in the rental process, own a stake of at least 10 percent in the property, and have an adjusted gross income of less than $100,000 for a full deduction or $150,000 for a partial deduction. Taxpayers with adjusted gross income of more than $150,000 cannot receive a deduction.

PURPOSE: The limitations on passive-loss deductions were adopted in the Tax Reform Act of 1986 to reduce opportunities for tax sheltering. Many taxpayers had used passive losses in real estate ventures, oil and gas operations, and farming businesses to offset wage, salary, and active investment income. However, a partial exception for passive losses from rental real estate was offered because "Congress believed that a limited measure of relief … was appropriate in the case of certain moderate-income investors in rental real estate, who otherwise might experience cash flow difficulties with respect to investments that in many cases were designed to provide financial security, rather than to shelter a substantial amount of other income."[257]

IMPACT: Certain owners of rental real estate benefit from this provision. This exception to the passive-loss rules may create economic distortions and efficiency losses. By extending a tax preference to rental real estate investment, this provision may encourage overinvestment in the real estate sector at the expense of other investments that would otherwise be more productive. Although upper-income households are more likely to own rental properties, the income restrictions curtail the benefits for high-income individuals.

[257] U.S. Congress, Joint Committee on Taxation, General Explanation of the Tax Reform Act of 1986, JCS-10-87 (Washington, D.C.: U.S. Government Printing Office, 1987), p. 230.

*Deductions*

## 74. Expensing of depreciable small business property (Section 179 expensing allowance)

Internal Revenue Code Section: 179
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1958

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $1,397 | $1,242 | $1,397 | $1,553 |
| Personal Income Tax Loss | $8,428 | $8,428 | $10,167 | $11,772 |
| **Total** | **$9,825** | **$9,670** | **$11,564** | **$13,325** |

DESCRIPTION: Generally, the cost of business property must be deducted from personal and corporate income as it depreciates over its useful life. Section 179 expensing allows certain businesses to deduct the full purchase price of qualified equipment, provided that the amount deducted cannot exceed taxable income from the trade or business in which the property is used. Qualified equipment generally includes new and used machinery, equipment, and off-the-shelf computer software purchased for use in a trade or business. With several exceptions, real property such as buildings and their structural components do not qualify for the deduction.

The maximum deduction under section 179 is $1,000,000 with a phaseout limit of $2.5 million. For each dollar of qualifying property a taxpayer places in service above $2 million, the maximum deduction under section 179 was reduced by one dollar. After tax year 2019, the limit on expensing is indexed for inflation. According to CRS, "For 2022, firms cannot claim a Section 179 deduction for more than $1,080,000 of the cost of assets placed in service that year. Once a firm's investment reached at least $2,700,000 the amount eligible is reduced one dollar for each dollar of investment in excess of $2,700,000."[258]

According to the CRS, "Taxpayers unable to expense the costs of qualified property under Section 179, due to income limitations, may still be able to fully expense qualified property through 2022 under current law. After 2022, full expensing is then replaced by a "bonus depreciation" treatment, which is phased out by 20 percent over four years: 80 percent for 2023, 60 percent for 2024, 40 percent for 2025, 20 percent for 2026 and terminated beginning with the 2027 tax year."[259]

In 2008, the District of Columbia decoupled from the increases to Section 179 expensing, meaning that individuals and firms could not apply the higher expensing levels in calculating their D.C. taxes. [260] The expensing limitation for D.C. taxes equals the lesser of $25,000 or the actual cost of the business property during the year it was placed in service. If Congress restores higher Section 179 levels, the estimated revenue loss to the District from this tax expenditure will not reflect the increased amounts. Taxpayers who are eligible for other types of accelerated depreciation must

[258] U.S. Senate, Committee on the Budget, p. 490.
[259] Ibid.
[260] The statutory provision requiring decoupling was included in D.C. Law 17-219, the "Fiscal Year 2009 Budget Support Act of 2008," which took effect on August 16, 2008. See Title VII-L of the Act.

calculate their Section 179 deduction first and then apply any other deductions to the remaining basis.

Accelerated depreciation of any property does not change the cumulative amount of depreciation allowed. Therefore, this provision allows a taxpayer to deduct more in the first year of the investment and less in the later years of the capital life-cycle.

PURPOSE: The expensing allowance, which has been modified and expanded many times since its initial enactment in 1958, was intended "to reduce the tax burden on small firms, give them an incentive to invest more, and simplify their tax accounting," according to the Congressional Research Service.[261]

IMPACT: CRS states, "In the absence of section 179 (and temporary expensing), the cost of qualified assets would have to be recovered over longer periods. Thus, the provision greatly accelerates the depreciation of relatively small purchases of those assets. This effect has significant implications for business investment. All other things being equal, expensing boosts the cash flow of firms able to take advantage of it, as the present value of taxes owed on the stream of income earned by a depreciable asset is smaller under expensing than other depreciation schedules."[262] The lower cost of capital and the resulting increase in cash flow are intended to stimulate the economy by spurring capital investment and employment.

CRS also points out that "Because the allowance has a phase-out threshold, its benefits are confined to firms that are relatively small in asset, employment, or revenue size. Businesses in excess of the phase-out threshold, though, may still be able to fully expense or claim bonus depreciation through 2026 under current law. Benefits to capital income tend to concentrate in the higher-income classes"[263]

Regarding efficiency, CRS states that "Some argue that investment by smaller firms should be supported by government subsidies because they create more jobs and develop and commercialize more new technologies than larger firms. The evidence on this issue is inconclusive. In addition, economic analysis offers no clear justification for targeting investment tax subsidies at such firms. In theory, taxing the returns to investments made by all firms at the same effective rate does less harm to social welfare than granting preferential tax treatment to the returns earned by many small firms."[264]

Another risk is that subsidies for machinery and equipment may encourage the substitution of capital for labor, dampening employment growth.

*Deductions*

## 75. Expensing of magazine circulation expenditures

Internal Revenue Code Section: 173
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1950

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | too small | too small | too small | too small |
| Personal Income Tax Loss | too small | too small | too small | too small |
| **Total** | **too small** | **too small** | **too small** | **too small** |

Note: "Too small" means that the nationwide federal revenue impact was estimated as $50 million or less.

DESCRIPTION: This provision allows publishers of periodicals, newspapers, and magazines to deduct expenditures to establish, maintain, or increase circulation in the year that the expenditures are made. The revenue impact of this tax expenditure is the difference between the current deduction of costs and the recovery that would have been allowed if these expenses were capitalized and deducted over time.

The expenditures eligible for deduction do not include purchases of land and depreciable property or the expansion of circulation through purchasing another publisher or its list of subscribers.

PURPOSE: According to the Congressional Research Service, "Congress wanted to eliminate some of the difficulties associated with distinguishing between expenditures to maintain circulation, which had been treated as currently deductible, and those to establish or develop new circulation, which had to be capitalized."[265] Numerous disputes, dating back to the late 1920s, had existed between publishers and the IRS about how to make this distinction.

IMPACT: Publishers of newspapers, magazines, and periodicals benefit from this provision, but the IRS also benefits from the administrative simplification that results. CRS states that "Section 173 allows publishers to expense the acquisition of certain assets (i.e., costs associated with maintaining or developing lists of subscribers) that yield returns in more years than one. At the same time, it simplifies tax compliance and accounting for them and tax administration for the IRS. Without such treatment, it would be necessary for the IRS or Congress to clarify how to distinguish between expenditures for establishing or expanding circulation and expenditures for maintaining circulation."[266]

[265] U.S. Senate, Committee on the Budget, p. 508.
[266] Ibid, pp. 508-509.

*Deductions*

## 76. Gain on non-dealer installment sales

Internal Revenue Code Sections: 453 and 453A(b)
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1986

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $5,427 | $5,774 | $6,120 | $6,467 |
| Personal Income Tax Loss | $1,393 | $1,393 | $1,492 | $1,592 |
| **Total** | **$6,820** | **$7,167** | **$7,613** | **$8,059** |

DESCRIPTION: People who do not deal regularly in selling property (non-dealers) are allowed to report some property sales for personal and corporate tax purposes under a special method of accounting called the installment method. This method allows the taxpayer to pro-rate the gross profit from the sale over a period in which payments are received. The taxpayer gets the advantage of deferring some of the taxes to future years rather than paying the taxes in full. The tax expenditure is the difference between what the tax liability would be under year-of-sale reporting and tax liability under installment reporting.

Non-dealers must pay the government interest on the deferred taxes attributable to the portion of the installment sales that arise during and remain outstanding at the end of the tax year of more than $5 million. A transaction with a sales price of less than $150,000 does not count toward the $5 million threshold. Because the interest payments offset some of the value of the tax deferral, the tax expenditure reflects only the revenue loss from transactions that give rise to interest-free deferrals.

PURPOSE: The deduction's purpose is to match the timing of tax payments to the timing of the cash flow generated by the property's sale. The Congressional Research Service points out that "It has usually been considered unfair, or at least impractical, to attempt to collect the tax when the cash flow is not available, and some form of installment sale reporting has been permitted since at least the Revenue Act of 1921."[267]

IMPACT: This provision benefits infrequent property sellers who sell on an installment basis. CRS notes that "The deferral of taxation permitted under the installment sale rules essentially furnishes the taxpayer an interest-free loan equal to the amount of tax on the gain that is deferred …the primary benefit probably flows to sellers of farms, small businesses, and small real estate investments."[268]

A fair method of taxing such property sales is difficult to structure. CRS states that "The installment sales rules have always been pulled between two opposing goals: taxes should not be avoidable by the way a deal is structured, but they should not be imposed when the money to pay them is not available. Allowing people to postpone taxes by taking a note instead of cash in a sale leaves obvious room for tax avoidance … After having tried many different ways of balancing these goals,

[267] U.S. Senate, Committee on the Budget, p. 456.
[268] Ibid.

lawmakers have settled on a compromise that denies the advantage of the method to taxpayers who would seldom have trouble raising the cash to pay their taxes (retailers, dealers in property, investors with large amounts of sales) and permits its use to small, non-dealer transactions (with 'small' rather generously defined)."[269]

[269] U.S. Senate, Committee on the Budget, p. 457.

*Deductions*

## 77. Life insurance company reserves

Internal Revenue Code Sections: 803(a)(2), 805(a)(2), and 807
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1984

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $3,523 | $3,676 | $3,829 | $3,983 |
| Personal Income Tax Loss | $0 | $0 | $0 | $0 |
| **Total** | **$3,523** | **$3,676** | **$3,829** | **$3,983** |

DESCRIPTION: Life insurance companies can deduct net additions to their reserves and must add net subtractions to their reserves when calculating income, subject to certain requirements outlined in section 807 of the Internal Revenue Code. The ability to deduct the net additions to reserves may allow life insurance companies to defer paying some taxes, thus reducing their tax burden by allowing them to offset current income with future expenses. In most years, insurance companies increase their reserves.

PURPOSE: The deduction's purpose is to make tax rules consistent with standard industry accounting practices. In the insurance industry, some form of reserve accounting is a common practice in estimating net income.

Insurance companies have been allowed to deduct any additions to their reserves required by law since the corporate income tax was adopted in 1909. Before Congress adopted the Deficit Reduction Act of 1984 (P.L. 98-369), reserves were required by state law. Because Congress concluded that state rules allowed for a significant overstatement of deductions, it established federal rules for allowable reserves in the Deficit Reduction Act of 1984.

IMPACT: The Congressional Research Service observes, "When life insurance companies can deduct additions to the reserve accounts when computing taxable income, they can purchase assets using tax-free or tax-deferred income. Reserve accounting shelters both premium and investment income from tax because amounts added to reserves include both premium income and the investment income earned by the invested assets."[270]

The deduction's benefits may extend beyond life insurance companies. CRS points out that "Competition in the life insurance market could compel companies to pass along corporate tax reductions to policyholders. Thus, this tax expenditure may benefit life insurance consumers as well as shareholders of private stock insurance companies. For mutual life insurance companies, policyholders may benefit either through lower premiums, better service, or higher policyholder dividends."[271]

[270] U.S. Senate, Committee on the Budget, p. 357.
[271] Ibid.

***Income Tax***
*Deductions*

## 78. Loss from sale of small business corporation stock

Internal Revenue Code Section: 1244
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1958

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $107 | $107 | $107 | $120 |
| **Total** | **$107** | **$107** | **$107** | **$120** |

DESCRIPTION: Taxpayers may deduct a loss on the sale or exchange of qualifying small business corporation stock as an ordinary loss rather than a capital loss. The deduction as an ordinary loss is more valuable because ordinary income is taxed at a higher rate than capital income.

A small business corporation is defined as having not more than $1 million in money and other property received for its stock. For any taxable year, the aggregate amount a taxpayer may treat as an ordinary loss from the sale or exchange of small business corporation stock may not exceed $50,000 for single filers or $100,000 for joint filers. This write-off is much greater than the $3,000 deduction allowed for losses from the sale or exchange of other corporate stock.

PURPOSE: The deduction encourages investment in small businesses. Because small businesses are often unproven and have a high failure rate, the deduction may encourage entrepreneurs to invest by offering them some protection against investment losses.

IMPACT: This provision benefits individuals with losses from small business corporation stock and small businesses that benefit from greater investment. Nevertheless, the deduction may cause an efficiency loss because it channels resources (in the form of tax relief) to businesses based on their size rather than on their productivity and ability to respond to market forces.

***Income Tax***
*Deductions*

## 79. Property and casualty insurance company reserves

Internal Revenue Code Section: 832(b)
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1986

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $306 | $306 | $306 | $460 |
| Personal Income Tax Loss | $0 | $0 | $0 | $0 |
| **Total** | **$306** | **$306** | **$306** | **$460** |

DESCRIPTION: A property and casualty insurance company's taxable income during a tax year is its underwriting income (i.e., premiums minus incurred losses and expenses) plus investment income and certain other income items minus allowable deductions. Under certain conditions, additions to loss reserves held to pay future claims can also be deducted from taxable income.

The Tax Reform Act of 1986 imposed a 15 percent pro-ration provision due to Congressional concern that using tax-exempt investments to finance additions to loss reserves needed to be regulated. Therefore, the allowable deduction for additions to loss reserves was reduced by 15 percent of the sum of (1) the insurer's tax-exempt interest, (2) the deductible portion of dividends received (with special rules for dividends from affiliates), and (3) the increase in the cash value of life insurance, endowment, or annuity contracts for the taxable year. Even with the 15 percent reduction, property and casualty insurance companies can still shield a considerable amount of income from taxation.

The Tax Cuts and Jobs Act modified the 15 percent pro-ration provision to 25 percent to reflect the lowering of the corporate income tax rate.

PURPOSE: The Congressional Research Service states that Congress adopted this provision because members concluded it was "not appropriate to fund loss reserves on a fully deductible basis out of income which may be, in whole or in part, exempt from tax. The amount of the reserves that is deductible should be reduced by a portion of such tax-exempt income to reflect the fact that reserves are generally funded in part from tax-exempt interest or from wholly or partially deductible dividends."[272]

IMPACT: CRS observes that "The pro-ration provision allows property and casualty insurance companies to fund a substantial portion of their deductible reserves with tax-exempt or tax-deferred income. Life insurance companies, banks and brokerage firms, and other financial intermediaries face more stringent proration rules that prevent or reduce the use of tax-exempt or tax-deferred investments to fund currently deductible reserves or deductible interest expense. Allowing property and casualty insurance companies an advantageous tax status, based on the ability to use tax-exempt income to reduce tax liabilities, may allow those insurers to attract economic resources from other sectors of the economy, thus creating economic inefficiencies."[273] Nevertheless, "A more stringent allocation rule, which could reduce the attractiveness of investing reserves in tax-preferred assets,

[272] U.S. Senate, Committee on the Budget, p. 380.
[273] Ibid., p. 381

which could raise financing costs for those governments. On the other hand, a more stringent allocation rule would allow Congress to target tax incentives for state and local governments more effectively."[274]

[274] U.S. Senate, Committee on the Budget, p.. 381.

*Deductions*

## 80. Deduction for classroom expenses of elementary and secondary school educators/ Special deduction for teacher expenses

Internal Revenue Code Sections: 62(a)(2)(D)
Federal Law Sunset Date: None
Year Enacted in Federal Law: 2002

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $104 | $104 | $104 | $156 |
| **Total** | **$104** | **$104** | **$104** | **$156** |

DESCRIPTION: An eligible educator working at an elementary or secondary school can claim a maximum of $300 (and is annually adjusted for inflation beginning in 2016) for qualified unreimbursed expenses. Qualified expenses include expenses paid for by an eligible educator for books, supplies (other than nonathletic supplies for health or physical education courses), computer equipment, supplementary materials used by the educator in the classrooms, software, and services and other equipment.

An eligible educator is "an individual who, with respect to any tax year, is an elementary or secondary school teacher, instructor, counselor, principal, or aide in a school for a minimum of 900 hours in a school year. A school means any school that provides elementary or secondary education (kindergarten through grade 12), as determined under State law."[275]

PURPOSE: According to the Congressional Research Service, the tax deduction "may encourage educators already purchasing supplies to increase the amount spent and may encourage other educators to purchase supplies."[276]

IMPACT: CRS observes that "If the purpose of the deduction is to reimburse some portion of educators' classroom spending, a deduction may not be a particularly equitable way to provide this type of refund. Deductions are worth more to taxpayers in higher tax brackets than those in lower tax brackets."[277]

## 81. Amortization of certified pollution control facilities

Internal Revenue Code Sections: 169(d)(5)
Federal Law Sunset Date: None
Year Enacted in Federal Law: 2005

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | too small | too small | too small | too small |
| Personal Income Tax Loss | $0 | $0 | $0 | $0 |
| **Total** | **too small** | **too small** | **too small** | **too small** |

DESCRIPTION: Coal-fired electric generation plants that invested in pollution control equipment placed in service after April 11, 2005, are eligible to amortize the costs over a seven-year period. This rule applies only to plants that began operation on or after January 1, 1976.

Plants that began operating before January 1, 1976, are eligible for five-year amortization if the pollution control equipment has a useful life of 15 years or less.

Both sets of rules (those applying to pre-1976 plants and post-1975 plants) represent a tax expenditure because they allow for faster depreciation than the 15- or 20-year period (depending on the type of equipment) that would ordinarily be allowed under the modified accelerated cost recovery system, which sets the standard depreciation rules.

Qualifying pollution control equipment refers to any technology, such as a scrubber system, installed by a qualifying facility to reduce the air emissions of any pollutant regulated by the U.S. Environmental Protection Agency under the Clean Air Act.

CRS notes that the Tax Cuts and Jobs Act temporarily "allows expensing for equipment through 2022, with that percentage reduced by 20 percent per year starting in 2023. During the period of full expensing, electing amortization for pollution control facilities will not be beneficial compared to the general treatment of equipment."[278]

PURPOSE: According to the Congressional Research Service, the accelerated depreciation for pollution control equipment "targets electric utilities, a major source of air pollution … The incentive should facilitate utilities in meeting a new suite of EPA mandates to reduce emissions of sulfur dioxide ($SO_2$), nitrous oxide ($NO_2$), and mercury (Hg)."[279]

IMPACT: CRS observes that "Because of the time value of money, the earlier deduction is worth more in present value terms, which reduces the cost of capital and the effective tax rates on the investment returns. This should provide an incentive for power plant companies … to invest in pollution control equipment."[280] At the same time, CRS notes a possible perverse consequence of this subsidy, stating that "The Clean Air Act's 'New Source Review' provisions require the installation of state-of-the-art pollution-control equipment whenever an air-polluting plant is built

[278] U.S. Senate, Committee on the Budget, p. 209.
[279] Ibid, p. 208.
[280] Ibid.

or when a 'major modification' is made on an existing plant. By creating a more favorable (in some cases much more favorable) regulatory environment for existing facilities than new ones, grandfathering creates an incentive to keep old, grandfathered facilities up and running."[281]

## 82. Depreciation recovery periods for specific energy property

Internal Revenue Code Sections: 168(e)
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1986

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $249 | $497 | $497 | $497 |
| Personal Income Tax Loss | too small | too small | too small | too small |
| **Total** | **$249** | **$497** | **$497** | **$497** |

DESCRIPTION: Federal law allows more rapid depreciation of certain types of tangible energy property than would otherwise be allowed under the modified accelerated cost recovery system, which sets the standard depreciation rules. The accelerated depreciation of specific types of energy property, described in the next paragraph, represents tax expenditure.

The recovery period for certain renewable energy equipment, including solar, wind, geothermal, fuel cell, combined heat and power, and microturbine properties, is five years. Renewable energy generation property that is part of a "small electric power facility" and certain biomass properties are depreciated over five years. Natural gas gathering lines are subject to seven-year depreciation if the original use began after April 11, 2005. A qualified smart meter or smart electric grid system has a recovery period of 10 years. Finally, certain electric transmission properties and natural gas distribution lines placed in service after April 11, 2005, are depreciated over 15 years.

PURPOSE: According to the Congressional Research Service, a detailed legislative history for these provisions is lacking, but the rationale was "presumably to encourage investment in alternative energy sources that are less polluting than conventional fuels."[282]

IMPACT: Commercial property owners who purchase the energy property listed above benefit from the tax subsidy, but society may incur efficiency costs. CRS points out that "Economic theory suggests that economic efficiency is maximized when capital investments are treated equally. Permanent investment subsidies, such as accelerated depreciation, may distort the allocation of capital in the long run, possibly reducing overall efficiency in the allocation of resources."[283] Nevertheless, externalities such as the pollution associated with conventional fossil fuels may justify a tax subsidy for alternative energy sources. CRS also observes that "Generally, economic efficiency is better enhanced by taxing energy sources that produce negative external externalities, rather than subsidizing renewable alternatives."[284]

## 83. Energy-efficient commercial building property

Internal Revenue Code Section: 179D
Federal Law Sunset Date: None
Year Enacted in Federal Law: 2005

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $31 | $46 | $46 | $46 |
| Personal Income Tax Loss | $158 | $158 | $172 | $185 |
| **Total** | **$189** | **$204** | **$218** | **$231** |

DESCRIPTION: A formula-based tax deduction is available for all or part of the expenditures on energy-efficient commercial property occurring in the taxable year. The deduction is set at $0.50 per square foot and increased by $0.02 for each percentage point by which the certified efficiency improvements reduce energy and power costs, with a maximum amount of $1.00 per square foot. This tax expenditure is projected to create costs because (1) taxpayers can amend their returns in subsequent years to claim the deduction, and (2) the credit could create a net operating loss that could be carried forward into future years.

Starting in 2023, this provision provides that to be able to claim a deduction, a qualifying building must increase its efficiency relative to a reference building by 25 percent, reducing total annual energy and power costs of the building (with respect to interior lighting, heating, cooling, and ventilation; and hot water supply systems).

To qualify as "energy-efficient commercial building property," costs must be associated with depreciable or amortizable property that is installed in a domestic building that is within the scope of Standard 90.1 affirmed by the Department of Energy as of four years prior to the date of the building being placed in service.

PURPOSE: The deduction encourages businesses to retrofit their commercial buildings with energy-conserving components and equipment, enhancing their energy efficiency.[285]

IMPACT: Commercial buildings include a wide variety of building types—such as offices, hospitals, schools, factories, warehouses, hotels, and shopping malls. Businesses that invest in energy-efficient property are the direct beneficiaries of the deduction. The Congressional Research Service points out that "Allowing a current deduction for energy-efficient capital goods that would otherwise be depreciated over (39 years) … greatly accelerates and increases the present value of the deductions."[286]

Spillover benefits to society offer a possible justification for the deduction. CRS notes that "(I)f consumption of energy results in negative effects on society, through the generation of carbon emissions or pollution, the deduction … might be economically justified. In general, however, it

[285] U.S. Senate, Committee on the Budget, p. 102.
[286] Ibid, pp. 101-102.

would be more economically efficient to directly tax polluting energy fuels than to subsidize a particular method of achieving conservation."[287] In addition, CRS notes that there may be market failures in energy conservation for commercial property that is leased; both landlord and tenant may underinvest in energy conservation equipment because each party is not sure that it will realize the savings needed to offset the up-front cost.[288] The tax deduction may help correct the market failure.

## 84. Blue Cross and Blue Shield companies

Internal Revenue Code Sections: 833
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1986

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $460 | $460 | $460 | $460 |
| Personal Income Tax Loss | $0 | $0 | $0 | $0 |
| **Total** | **$460** | **$460** | **$460** | **$460** |

DESCRIPTION: Blue Cross and Blue Shield, as well as other smaller health insurance providers that operated on August 16, 1986, and other non-profit health insurers that meet certain community service and medical loss ratio standards, qualify for special tax treatment. A medical loss ratio (MLR) equals total health benefits paid divided by premium income and is used to indicate profitability and administrative efficiency.

This deduction has two main features. First, Blue Cross/Blue Shield and other eligible health insurers can fully deduct unearned premiums,[289] unlike other property and casualty insurance companies (which is how Blue Cross/Blue Shield and the other insurers are classified under tax law). Second, Blue Cross/Blue Shield and the other insurers may deduct 25 percent of the year's health-related claims and expenses minus their accumulated surplus at the beginning of the year. The special deductions apply only to net taxable income for the year and cannot be used in alternative minimum tax calculations.

PURPOSE: In the Tax Reform Act of 1986, Congress repealed a tax exemption that Blue Cross/Blue Shield had enjoyed since the 1930s after finding that the company was engaged in inherently commercial activities and that its tax-exempt status provided an unfair competitive advantage. At the same time, Congress enacted the special deduction to recognize the role of Blue Cross/Blue Shield and other health insurers in providing insurance to high-risk, small groups,[290] which is riskier and more expensive.

IMPACT: Although the preferential tax treatment presumably benefits Blue Cross/Blue Shield, the other insurers, and the people who receive the insurance, the Congressional Research Service notes that the insurers have moved away from their traditional role of covering smaller, high-risk groups. As a result, "these tax preferences have benefited their managers and their affiliated hospitals and physicians more than their communities."[291]

[289] An unearned premium refers to an insurance premium that has been collected in advance by an insurance company but must be returned to the client if the coverage ends before the term covered by the insurance is complete (if the client exercises an option to cancel, for example).

*Deductions*

## 85. Medical and dental care expenses

Internal Revenue Code Section: 213
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1942

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $13,067 | $14,684 | $25,387 | $30,613 |
| **Total** | **$13,067** | **$14,684** | **$25,387** | **$30,613** |

DESCRIPTION: Taxpayers who itemize their deductions can deduct from their taxable personal income any medical expenses in excess of 7.5 percent of their adjusted gross income (AGI). The deduction includes amounts paid for health insurance and covers the medical expenses of the taxpayer, his or her spouse, and dependents.

Some rules govern the medical expenses eligible for the deduction, which includes amounts paid by the taxpayer and his family for the following purposes:

1. health insurance premiums, diagnosis, treatment, mitigation, or prevention of disease, or for the purpose of affecting any structure or function of the body, including dental care;
2. prescription drugs and insulin, transportation primarily for and essential to medical care, and lodging away from home for and essential to medical care, up to $50 per night for each individual.

There are limits on deductions for long-term care insurance. The limits depend on the insured's age and are adjusted annually for inflation: in 2023, they will range from $480 for individuals aged 40 and under to $5,960 for individuals over 70.

PURPOSE: CRS notes that "[I]n adopting such a rule, Congress was trying to encourage improved standards of public health and ease the burden of high tax rates during World War II."[292] The deduction is also "intended to assist taxpayers who have high out-of-pocket medical expenses relative to their income."[293] The deduction compensates for large medical bills viewed as involuntary and, therefore, reduces an individual's ability to pay taxes.

IMPACT: CRS states that low—to middle-income households claim a large share of the deduction's benefits because "Medical spending constitutes a larger fraction of household budgets among low-income taxpayers than it does among high-income taxpayers, making it easier for low-income taxpayers to exceed the 7.5 percent AGI threshold. Finally, low-income households are more likely to suffer large declines in their incomes than high-income households when serious medical problems cause working adults to lose time from work."[294]

[292] U.S. Senate, Committee on the Budget, p. 922.
[293] U.S. Senate, Committee on the Budget, p. 924.
[294] Ibid, pp. 920-921.

CRS also observes that the deduction does not establish horizontal equity among those who receive employer-sponsored health care and those who pay for health care costs out of pocket because "Employer-paid health care is excluded from income and payroll taxes, whereas the cost of health insurance bought in the non-group market can be deducted from taxable income only to the extent it exceeds a set percent of AGI. Lowering or abolishing the AGI threshold for the deduction would narrow but not eliminate the difference between the tax benefits for health insurance available to the two groups."[295]

[295] Ibid, p. 925.

## 86. Accelerated depreciation of rental housing

Internal Revenue Code Sections: 167 and 168
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1954

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $565 | $565 | $484 | $404 |
| Personal Income Tax Loss | $3,548 | 3,270 | $3,061 | $3,061 |
| **Total** | **$4,113** | **$3,835** | **$3,545** | **$3,465** |

DESCRIPTION: Rental housing placed in service after 1986 benefits from accelerated depreciation calculated on a straight-line basis over 27.5 years. This tax expenditure measures the revenue loss due to rental housing deductions in excess of those allowed under the 40-year straight-line depreciation allowed under the alternative minimum tax.

Rental housing placed in service before 1986 continues to depreciate according to the method in effect when it came on the market, which may allow the property to depreciate faster than under a straight-line method.

PURPOSE: The depreciation policy was developed through administrative rulings before 1954. Accelerated depreciation promotes investment in rental housing by effectively deferring taxes paid on such investment.

IMPACT: The Congressional Research Service states that "The direct benefits of accelerated depreciation accrue to owners of rental housing. Benefits to capital income tend to concentrate in the higher-income classes."[296]

About the economic impact of accelerated depreciation, CRS notes that "evidence indicates that the economic decline rate for residential buildings is much slower than that reflected in tax depreciation methods."[297]

In addition, "Much of the previous concern about the role of accelerated depreciation in encouraging tax shelters in rental housing has faded because the current depreciation provisions are less rapid than those previously in place, and because there is a restriction on the deduction of passive losses."[298]

[296] U.S. Senate, Committee on the Budget, p. 410.

## 87. Mortgage interest on owner-occupied residences

Internal Revenue Code Section: 163(h)
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1913

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $47,945 | $48,322 | $153,462 | $189,892 |
| **Total** | **$47,945** | **$48,322** | **$153,462** | **$189,892** |

DESCRIPTION: Taxpayers may take an itemized deduction for interest paid on debt secured by a principal or second residence. Although some restrictions apply, most taxpayers can deduct the full amount of their mortgage interest. The mortgage interest deduction is for homes valued at $750,000 ($375,000 for married taxpayers but filing separately) for taxable years 2018 through 2025. Mortgage debt includes home equity loans secured by a principal or second residence used to buy, build, or substantially improve a taxpayer's home. Prior to 2018, the mortgage interest deduction limit was $ 1 million ($500,000 for married filing separately). Therefore, under the new law, the treatment of the deduction of mortgage interest paid on refinanced mortgage debt will depend on the date of the original mortgage to determine which mortgage limit applies ($750,000 or $1 million).

After 2025, mortgage interest will be deductible on up to $1 million of debt used to buy, build, or improve a principal or second residence, plus up to $100,000 of home equity indebtedness. The sum of the acquisition indebtedness and home equity debt cannot exceed the fair market value of the home.

The deduction is considered a tax expenditure because homeowners can deduct their mortgage interest even though the implicit rental income from the home (the money they could earn by renting to someone else) is not subject to tax. There were no limits on the home mortgage interest deduction until restrictions were enacted in 1986 and 1987.

PURPOSE: The home mortgage interest deduction was part of a larger deduction for all interest paid that was established when the personal income tax was first enacted in 1913. The Congressional Research Service states that "There is no evidence in the legislative history that the interest deduction was intended to encourage home ownership or to stimulate the housing industry at that time."[299]

Proponents of the deduction contend that it encourages homeownership, which, in turn, is seen as encouraging neighborhood stability and civic responsibility by giving people a stronger stake in their communities.

[299] U.S. Senate, Committee on the Budget, p. 385.

IMPACT: In 2020, 56,470 District tax filers claimed the mortgage interest deduction. Taxpayers with federal adjusted gross income of $100,000 or more comprised about 74 percent of the beneficiaries and claimed 82 percent of the total amount deducted.[300] CRS reports that households with an annual income of at least $100,000 also claimed the bulk (90.4 percent) of the benefits nationwide in 2020.[301] Higher-income households can afford to spend more on housing and qualify to borrow more.

Urban Institute researchers also point out that the mortgage interest deduction "is not a cost-effective tool for increasing homeownership because its main beneficiaries are not individuals on the margin between renting and owning. The deduction is available only to itemizing taxpayers and its value rises with an individual's tax rate."[302] As a result, eliminating the deduction would reduce after-tax income by the largest percentage for those in the 80th to 99th percentiles of the income distribution (those in the top 1 percent would not lose as much because their mortgage costs are lower as a percentage of income).[303]

Regarding economic efficiency, CRS states that "The preferential tax treatment of owner-occupied housing relative to other assets is also criticized for encouraging households to invest more in housing and less in other assets that might contribute more to increasing the nation's productivity and output."[304] Nor is the deduction necessarily effective in promoting homeownership. CRS also notes that "the rate of homeownership in the United States is lower than the average for the Organisation for Economic Co-operation and Development countries, including those without a tax subsidy for mortgage interest (Keightley, 2020). The value of the U.S. deduction may be at least partly capitalized into higher prices at the middle and upper end of the market."[305]

The home mortgage interest deduction also impairs horizontal and vertical equity. Renters do not receive a comparable tax benefit. Landlords may deduct mortgage interest paid for rental properties but must pay tax on the rental income (homeowners don't pay any tax on the imputed rental value of their homes). Finally, many elderly individuals do not have home mortgages (they own their homes outright) and, therefore, do not benefit from the mortgage interest deduction.[306]

*Deductions*

## 88. State and local property taxes on owner-occupied residences

Internal Revenue Code Section: 164
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1913

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $8,829 | $9,011 | $50,094 | $73,761 |
| **Total** | **$8,829** | **$9,011** | **$50,094** | **$73,761** |

DESCRIPTION: Taxpayers may take an itemized deduction for real estate taxes paid on an owner-occupied residence. The 2017 Tax Cuts and Jobs Act temporarily eliminated the $10,000 limitation on claims for state and local taxes paid and the deduction of foreign real property tax payment claims until tax year 2026. Between 2018 and 2025, (1) deductions for state and local income, sales, personal property, and domestic real property taxes paid not in the carrying on of a trade or business cannot exceed $10,000 (or $5,000 for married individuals filing separately); and (2) foreign real property tax payment claims are not eligible for the deduction.

PURPOSE: When the U.S. personal income tax was first enacted in 1913, all federal, state, and local taxes were deductible. This was based on the premise that tax payments reduce disposable income and, therefore, should not be included in a measure of the taxpayer's ability to pay. Today, proponents argue that the deduction promotes fiscal federalism by helping state and local governments raise revenue to support public services.

IMPACT: In 2020, 59,410 District tax filers claimed the deduction for property taxes paid. Taxpayers with federal adjusted gross income of $100,000 or more comprised 74 percent of the claimants and accounted for 85 percent of the total amount deducted.[307]

As stated by the Congressional Research Service, "The deduction for real property taxes reduces the cost of home ownership relative to renting, as renters may not deduct rental costs under the federal income tax. Landlords may deduct the property tax they pay on a rental property but are taxed on the rental income."[308]

CRS adds that "Modern theories of the public sector discount the "don't tax a tax" justification for state and local tax deductibility, emphasizing instead that taxes represent citizens' decisions to consume goods and services collectively. From this perspective, state and local taxes are benefit taxes and should be treated the same as expenditures for private consumption. As such, these taxes should not be deductible against federal taxable income."[309]

[307] These data are from the Internal Revenue Service's Statistics of Income Tax Stats, "Tax Year 2020: Historic Table 2," available at www.irs.gov/taxstats/index.html.

*Deductions*

## 89. Additional standard deduction for the blind

Internal Revenue Code Section: 63(f)
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1943

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $23 | $23 | $18 | $23 |
| **Total** | **$23** | **$23** | **$18** | **$23** |

DESCRIPTION: An additional standard deduction is available for the blind. The blind taxpayer is entitled to an additional deduction amount of $1,500 ($1,850 for unmarried aged/blind taxpayers). If both 65 and blind, the additional deduction amount is doubled. For the purpose of the tax deduction, an individual is blind only if his central visual acuity does not exceed 20/200 in the better eye with correcting lenses or if his visual acuity is greater than 20/200 but is accompanied by a limitation in the fields of vision such that the widest diameter of the visual field subtends an angle no greater than 20 degrees.

Before January 1, 2018, the District provided local income tax deductions for blind residents[310] and did not conform to the Internal Revenue Service. The Tax Revision Commission Implementation Amendment Act of 2014 (TRC Act)[311], which became effective January 1, 2018, through revenue triggers, increased the standard deduction to conform to the federal level.

PURPOSE: CRS states that "The purpose of the deduction was to help cover the additional expenses directly associated with blindness, such as the hiring of readers and guides. The deduction evolved to a $600 personal exemption in the Revenue Act of 1948 (P.L. 80-471) so that the blind did not forfeit the use of the standard deduction and so that the tax benefit could be reflected directly in the withholding tables."[312]

IMPACT: The additional standard deduction amounts raise the income threshold at which taxpayers begin to pay taxes. In tax year 2017, 815 individuals living in the District of Columbia claimed the exemption and tax filers with income at or below $50,000 accounted for 59 percent of the total amount exempted (see table below).

[310] § 47–1806.02(d)
[311] § 47–181
[312] U.S. Senate, Committee on the Budget, p. 1034.

| Additional personal exemption for the blind- 2017 | | | | |
|---|---|---|---|---|
| **Income Category (AGI)** | **Number** | **Share** | **Amount ($)** | **Share** |
| Breakeven or Loss | 37 | 4.5% | 65,675 | 4.5% |
| $1 to $25,000 | 249 | 30.6% | 441,975 | 30.6% |
| $25,001 to $50,000 | 192 | 23.6% | 340,800 | 23.6% |
| $50,001 to $75,000 | 93 | 11.4% | 165,075 | 11.4% |
| $75,001 to $100,000 | 54 | 6.6% | 95,850 | 6.6% |
| $100,001 to $150,000 | 88 | 10.8% | 156,200 | 10.8% |
| $150,001 to $200,000 | 36 | 4.4% | 63,900 | 4.4% |
| Over $200,000 | 66 | 8.1% | 117,150 | 8.1% |
| **Total** | **815** | **100.0%** | **1,446,625** | **100.0%** |

CRS states that "advocates of the blind justify special tax treatment based on higher living costs and additional expenses associated with earning income. However, other taxpayers with disabilities (deafness, paralysis, loss of limbs) are not accorded similar treatment and may be in as much need of tax relief. Just as the blind incur special expenses, so too do others with different impairments."[313] The special deduction for the blind, therefore, violates the principle of horizontal and vertical equity since similar taxpayers are not treated equally.

[313] U.S. Senate, Committee on the Budget, p. 1035

## 90. Additional standard deduction for the elderly

Internal Revenue Code Sections: 63(f)
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1943

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $3,373 | $3,618 | $2,987 | $3,191 |
| **Total** | **$3,373** | **$3,618** | **$2,987** | **$3,191** |

DESCRIPTION: An additional standard deduction is available for the elderly. The taxpayer is entitled to an additional deduction amount of $1,500 ($1,850 for single households or head of households). If both 65 and blind, the additional deduction amount is doubled. To qualify for the additional standard deduction amount, a taxpayer must be age 65 (or blind) before the close of the tax year. The amounts, like the basic standard deduction, are adjusted annually for inflation.

Before January 1, 2018, the District provided local income tax deductions for elderly residents[314] and did not conform to the Internal Revenue Service. The Tax Revision Commission Implementation Amendment Act of 2014 (TRC Act),[315] which became effective January 1, 2018, through revenue triggers, increased the standard deduction to conform to the federal level.

PURPOSE: According to the Congressional Research Service, the rationale for the deduction to the elderly is "because of a heavy concentration of low-income individuals in that population, the rise in the cost of living, and to counterbalance changes in the tax system after World War II."[316]

IMPACT: The deduction benefits those taxpayers who are age 65 and older. Elderly taxpayers, as well as taxpayers with an elderly spouse or domestic partner, benefit from this provision. During tax year 2017, 51,509 senior citizens living in the District of Columbia claimed the exemption and those with income at or below $50,000 accounted for 45 percent of the total amount exempted (see table below). The justification for the additional tax deduction is that the elderly face increased living costs primarily due to inflation and high medical costs. However, social security benefits are adjusted annually for inflation, and the federal government has established the Medicare program to provide medical insurance for the elderly.

[314] § 47–1806.02(d)
[315] § 47–181
[316] U.S. Senate, Committee on the Budget, p. 1034.

| Additional personal exemption for the elderly- 2017 | | | | |
|---|---|---|---|---|
| **Income Category (AGI)** | **Number** | **Share** | **Amount ($)** | **Share** |
| Breakeven or Loss | 1,726 | 3.4% | 3,063,650 | 3.4% |
| $1 to $25,000 | 10,981 | 21.3% | 19,491,275 | 21.3% |
| $25,001 to $50,000 | 10,641 | 20.7% | 18,887,775 | 20.7% |
| $50,001 to $75,000 | 6,822 | 13.2% | 12,109,050 | 13.2% |
| $75,001 to $100,000 | 4,399 | 8.5% | 7,808,225 | 8.5% |
| $100,001 to $150,000 | 5,607 | 10.9% | 9,952,425 | 10.9% |
| $150,001 to $200,000 | 3,244 | 6.3% | 5,758,100 | 6.3% |
| $200,001 to $500,000 | 5,860 | 11.4% | 10,401,500 | 11.4% |
| Over $500,000 | 2,229 | 4.3% | 3,956,475 | 4.3% |
| **Total** | **51,509** | **100.0%** | **91,428,475** | **100.0%** |

CRS notes that "The provision also fails the effectiveness test since low-income blind and elderly individuals who already are exempt from tax without the benefit of the additional standard deduction amount receive no benefit from the additional standard deduction. Nor does the provision benefit those blind or elderly taxpayers who itemize deductions (such as those with large medical expenditures in relation to income)."[317]

*Income Tax*
*Deductions*

## 91. Casualty and theft losses

Internal Revenue Code Section: 165(c)(3), 165(e), 165(h) - 165(k)
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1913

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $5 | $5 | $24 | $28 |
| **Total** | **$5** | **$5** | **$24** | **$28** |

DESCRIPTION: Taxpayers who itemize deductions may subtract from taxable income their non-business casualty and theft losses that are not reimbursed through insurance, subject to the following limitations: (1) total losses during the tax year must exceed 10 percent of adjusted gross income, and (2) losses must exceed $100 per event to be counted. Eligible losses include those arising from fire, storm, shipwreck, or other casualty, or theft, and the cause of the loss must be a sudden, unexpected, or unusual event. Eligible losses also include those associated with a disaster declared by the President under Section 401 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act between tax years 2018 and 2025.

PURPOSE: CRS states that "The deduction was intended to be for extraordinary, nonrecurring losses which go beyond the average or usual losses incurred by most taxpayers in day-to-day living."[318] The $100 floor per event, established in 1964, was intended to reduce the number of small and often improper claims, reduce the costs of record-keeping and audits, and focus the deduction on extraordinary losses.[319]

IMPACT: The Congressional Research Service states, "The deduction grants some financial assistance to taxpayers who suffer substantial casualties and itemize deductions. It shifts part of the loss from the property owner to the general taxpayer and thus serves as a form of government coinsurance. Use of the deduction is low for all income groups."[320]

The benefits may be tilted toward more affluent taxpayers because a dollar of deductible losses is worth more to those with higher marginal tax rates and because the deduction is available only to those who itemize.

Finally, the deduction may protect people who failed to purchase insurance at the expense of those who did. CRS further points out that "It similarly discriminates against people who take preventive measures to protect their property but cannot deduct their expenses. No distinction is made between loss items considered basic to maintaining the taxpayer's household and livelihood versus highly discretionary personal consumption."[321]

## 92. Deduction of foreign taxes instead of a credit

Internal Revenue Code Sections: 901
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1913

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $4,614 | $5,126 | $5,297 | $4,956 |
| Personal Income Tax Loss | $0 | $0 | $0 | $0 |
| **Total** | **$4,614** | **$5,126** | **$5,297** | **$4,956** |

DESCRIPTION: Taxpayers may elect to claim a deduction against taxable income or a credit against taxes due for any taxes paid on income earned abroad. Generally, the credit is more advantageous than the deduction because the credit reduces taxes on a dollar-for-dollar basis, whereas the deduction only reduces the amount of income subject to taxation. Nevertheless, if the taxpayer has reached the foreign tax credit limit, he or she will benefit from claiming the deduction, which also represents a tax expenditure.

CRS states that "foreign tax credits were limited in the recent 2017 tax revision (P.L. 115- 97)… For controlled foreign corporations only 80 percent of taxes paid on certain foreign source income can be credited, and no credits are allowed for dividends which are exempt going forward."[322]

PURPOSE: According to the Congressional Research Service, the rationale for this deduction might have been "to recognize foreign taxes, like state taxes, as a possible cost associated with earning income. As such, the provision would help correct for mismeasurement of adjusted gross income and be justified on ability to pay or horizontal equity arguments."[323]

IMPACT: The deduction benefits those taxpayers who are either unable to claim the foreign tax credit or who have reached the foreign tax credit limit. CRS points out that the deduction "results in the foreign return net of foreign tax equaling the domestic before tax return and a nationally efficient allocation of capital. While this provision maximizes the income or output in the domestic market, it also alters the division of income between capital and labor, shifting income towards labor and away from capital. Because national neutrality distorts the location of investment, it may produce an inefficient 'deadweight' reduction in world economic welfare."[324]

## 93. Financing income of certain controlled foreign corporations

Internal Revenue Code Sections: 953 and 954.
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1962

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $3,064 | $3,064 | $3,064 | $3,064 |
| Personal Income Tax Loss | $0 | $0 | $0 | $0 |
| **Total** | **$3,064** | **$3,064** | **$3,064** | **$3,064** |

DESCRIPTION: Under the U.S. method of taxing overseas investment, income earned abroad by foreign-chartered subsidiary corporations that are owned and controlled by U.S. investors or firms is generally not taxed if it is reinvested abroad. Instead, U.S. taxes are deferred until the income is repatriated to the U.S. parent firm as dividends or other income.

Subpart F of the U.S. Internal Revenue Code disallows the deferral of tax on foreign income by certain firms known as "controlled foreign corporations."[325] In general, income that falls under subpart F and is therefore subject to current taxation includes passive investment income, such as interest, dividends, and gains from the sale of stock and securities, as well as certain types of income whose geographic source is thought to be easily shifted.

Ordinarily, income from banking and insurance would often be covered by Subpart F and, therefore, subject to immediate taxation. Nevertheless, Congress provided a temporary exception from Subpart F for income derived in the active conduct of a banking, financial, or similar business and for the investment income of an insurance company earned on risks in its country of incorporation. Specifically, "[T]wo deductions are allowed in addition to deducting normal Subpart F income. First, a deemed return to tangible investments, 10 percent of the tax basis (cost less depreciation) for tangible assets net of interest deductions, is excluded so that no taxes are imposed on this income. Second, 50 percent of the remaining income is deducted for taxable years beginning after December 31, 2017, and through taxable years beginning before January 1, 2025."[326]

PURPOSE: According to the Congressional Research Service, Subpart F was enacted in 1962 to "curtail the use of tax havens by U.S. investors who sought to accumulate funds in countries with low tax rates – hence Subpart F's emphasis on passive income and income whose source can be manipulated."[327] The stated rationale for the banking and insurance exception from Subpart F was that "interest, dividends, and like income were not thought to be 'passive' income in the hands of banking and insurance firms."[328]

[325] A "controlled foreign corporation" is a firm that is at least 50 percent owned by U.S. stockholders, each of whom owns at least 10 percent of the corporation's stock.
[326] U.S. Senate, Committee on the Budget, p. 54.
[327] Ibid, p. 55.
[328] Ibid.

IMPACT: U.S. firms conducting financial business abroad benefited from this provision. CRS notes that "banks and insurance firms present an almost insoluble technical problem" in the implementation of Subpart F because "the types of income generated by passive investment and income whose source is easily manipulated are also the types of income financial firms earn in the course of their active business. The choice confronting policymakers, then, is whether to establish an approximation that is fiscally conservative or one that places most emphasis on protecting active business income from Subpart F."[329]

More generally, tax incentives for investment abroad can reduce economic efficiency for the capital-exporting country (the U.S., in this case) and the world economy. CRS states that "Economic theory instead recommends a policy known as 'capital export neutrality' under which marginal investments face the same tax burden at home and abroad. From that vantage, then, the exceptions to Subpart F likewise impair efficiency."[330]

[329] U.S. Senate, Committee on the Budget, p. 57.

## 94. Charitable contributions, other than education and health

Internal Revenue Code Sections: 170 and 642(c)
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1917 (individuals) and 1935 (corporations)

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $6,204 | $6,434 | $6,664 | $7,123 |
| Personal Income Tax Loss | $89,487 | $94,634 | $112,056 | $155,018 |
| **Total** | **$95,691** | **$101,068** | **$118,720** | **$162,141** |

DESCRIPTION: Subject to certain limitations, charitable contributions may be deducted by individuals, corporations, estates, and trusts. The contributions must be made to religious, educational, or scientific institutions, public charities, non-profit hospitals, and federal, state, or local governments. Only individuals who itemize their deductions can claim this deduction.

Individuals may deduct charitable contributions of as much as 50 percent of gross income (30 percent for gifts of capital gain property). The limit is temporarily increased to 60 percent for tax years 2018 to 2025. There was a temporary increase to 100 percent for 2020 for cash contributions to public charities (not to private foundations, supporting organizations, or donor-advised funds). An above-the-line deduction for contributions of up to $300 was also allowed for non-itemizers for 2020. Corporations may deduct charitable contributions up to 10 percent (this limit was temporarily increased to 25 percent for 2020) of adjusted taxable income. Contributions made in property are subject to different rules depending on the type of donor, recipient, and purpose.

PURPOSE: According to the Congressional Research Service, the deduction was originally established for individual taxpayers during World War I in response to concern that high wartime tax rates would curtail charitable contributions.[331] The deduction was extended to corporations in 1935. Proponents argue that the deduction for private donations reduces demand for government services and that the services provided by voluntary, non-profit organizations may be more efficient and better tailored to people's needs than public services.

IMPACT: In 2020, 59,250 District tax filers claimed this deduction. Those with federal adjusted gross income (AGI) of less than $100,000 comprised 30 percent of the claimants but accounted for only 11 percent of the total amount deducted. Those with federal AGI of $200,000 or more comprised only 36 percent of claimants but accounted for 79 percent of the total amount deducted.[332]

The unavailability of the deduction to taxpayers who claim the standard deduction is one reason why the benefits of the charitable contribution deduction are tilted toward higher-income individuals. In addition, the higher marginal tax rates faced by higher-income taxpayers mean that

[331] U.S. Senate, Committee on the Budget, p. 880.
[332] These data are from the Internal Revenue Service's Statistics of Income Tax Stats, "Tax Year 2020 Historic Table 2," available at www.irs.gov/taxstats/index.html.

each dollar they deduct translates into a larger reduction in tax. To make the deduction more equitable, President Bush's Advisory Panel on Federal Tax Reform proposed making it available to all taxpayers who contribute more than 1 percent of their income to charity, regardless of whether they itemize their deductions.[333]

CRS notes that contributions vary among income classes. Contributions outside of those to educational and health organizations are relatively less concentrated among higher-income taxpayers while contributions to religious organizations are far more concentrated at the lower end of the income scale.[334]

Society may benefit from the deduction because it supports activities, such as education and scientific innovation, which can have large spillover effects. CRS notes that "[S]upporters note that contributions finance socially desirable activities. Further, the federal government could be forced to step in to assume some activities currently provided by charitable, nonprofit organizations if the deduction were eliminated. Public spending, however, might not be available to make up all of the difference. In addition, many believe that the best method of allocating general welfare resources is through a dual system of private philanthropic giving and governmental allocation."[335]

William Randolph of the U.S. Treasury Department points out that a deduction may not be the most effective way to promote charitable giving because "An efficient subsidy would vary with the amount of external benefits, whereas the tax subsidy rate provided by a charitable deduction varies only with the giver's tax rate … Some argue that a tax credit would be a fairer and more efficient form of subsidy because the subsidy rate would not depend as much on the giver's level of income."[336] Moreover, researchers at the Center on Philanthropy at Indiana University have found that economic growth plays a more important role in spurring charitable giving than changes in tax rates or preferences.[337]

## 95. Charitable contributions to educational institutions

Internal Revenue Code Sections: 170 and 642(c)
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1917 (individuals) and 1935 (corporations)

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $2,757 | $2,987 | $2,987 | $3,217 |
| Personal Income Tax Loss | $15,442 | $16,234 | $19,402 | $27,321 |
| **Total** | **$18,200** | **$19,222** | **$22,389** | **$30,538** |

DESCRIPTION: Subject to certain limitations, charitable contributions may be deducted by individuals, corporations, estates, and trusts. The contributions must be made to scientific, literary, or educational organizations. Only individuals who itemize their deductions can claim this deduction.

Individuals may deduct charitable contributions of as much as 50 percent of gross income (30 percent for gifts of capital gain property). The limit is temporarily increased to 60 percent for tax years 2018 to 2025. There was a temporary increase to 100 percent for 2020 for cash contributions to public charities (not to private foundations, supporting organizations, or donor-advised funds). An above-the-line deduction for contributions of up to $300 was also allowed for non-itemizers for 2020. Corporations may deduct charitable contributions up to 10 percent (this limit was temporarily increased to 25 percent for 2020) of adjusted taxable income. Contributions made in property are subject to different rules depending on the type of donor, recipient, and purpose.

PURPOSE: According to the Congressional Research Service, the deduction was originally established for individual taxpayers during World War I in response to concern that high wartime tax rates would curtail charitable contributions.[338] The deduction was extended to corporations in 1935. Proponents argue that the deduction for private donations reduces demand for government services and that the services provided by voluntary, non-profit organizations may be more efficient and better tailored to people's needs than public services.

IMPACT: CRS notes that "contributions to education are more heavily concentrated among higher-income taxpayers (and similar to contributions to the arts and health), as compared to contributions for religion, combined purpose charities, and charities to meet basic needs."[339]

CRS states that education produces spillover effects that benefit society through a more efficient workforce, lower unemployment rates, lower welfare costs, and less crime. Proponents, therefore, argue that important activities or services provided by educational organizations may be eliminated if the deduction were eliminated without the availability of public spending to make up the funding difference. However, opponents "say that helping educational organizations may not be the best way to spend government money. Opponents further claim that the present system allows wealthy taxpayers to indulge special interests (such as gifts to their alma maters). It is generally argued that

[338] U.S. Senate, Committee on the Budget, p. 754.
[339] Ibid, p. 753.

the charitable contributions deduction is difficult to administer and adds complexity to the tax code."[340]

[340] U.S. Senate, Committee on the Budget, p. 756.

## 96. Charitable contributions to health organizations

Internal Revenue Code Sections: 170 and 642(c)
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1917 (individuals) and 1935 (corporations)

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $3,217 | $3,447 | $3,667 | $3,677 |
| Personal Income Tax Loss | $11,285 | $11,879 | $14,057 | $19,402 |
| **Total** | **$14,502** | **$15,326** | **$17,733** | **$23,079** |

DESCRIPTION: Subject to certain limitations, charitable contributions may be deducted by individuals, corporations, estates, and trusts. The contributions must be made to organizations that provide medical or hospital care, medical education, or medical research. Only individuals who itemize their deductions can claim this deduction.

Individuals may deduct charitable contributions of as much as 50 percent of gross income (30 percent for gifts of capital gain property). The limit is temporarily increased to 60 percent for tax years 2018 to 2025. There was a temporary increase to 100 percent for 2020 for cash contributions to public charities (not to private foundations, supporting organizations, or donor-advised funds). An above-the-line deduction for contributions of up to $300 was also allowed for non-itemizers for 2020. Corporations may deduct charitable contributions up to 10 percent (this limit was temporarily increased to 25 percent for 2020) of adjusted taxable income. Contributions made in the form of property are subject to different rules depending on the type of donor, recipient, and purpose.

PURPOSE: According to the Congressional Research Service, the deduction was originally established for individual taxpayers during World War I in response to concern that high wartime tax rates would curtail charitable contributions.[341] The deduction was extended to corporations in 1935. Proponents argue that the deduction for private donations reduces demand for government services and that the services provided by voluntary, non-profit organizations may be more efficient and better tailored to people's needs than public services.

IMPACT: CRS states that contributions to health (like those to the arts and education) are more heavily concentrated among higher-income taxpayers, as compared to contributions for religion, combined-purpose charities, and charities to meet basic needs, which are more concentrated in lower-income classes.[342]

Proponents argue that contributions finance services such as hospital care for the poor. In addition, proponents believe that the best method of allocating general welfare resources is through a dual system of private philanthropic giving and governmental allocation.

[341] U.S. Senate, Committee on the Budget, p. 936.
[342] Ibid, p. 935.

Opponents, on the other hand, contend that deductible contributions are made partly with dollars, which are public funds. They feel that helping private charities may not be the optimal way to spend government money.[343]

[343] U.S. Senate, Committee on the Budget, pp. 938-939.

*Deductions*

## 97. Costs of removing architectural and transportation barriers to the disabled and elderly

Internal Revenue Code Section: 190
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1976

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | too small | too small | too small | too small |
| Personal Income Tax Loss | too small | too small | too small | too small |
| **Total** | **too small** | **too small** | **too small** | **too small** |

Note: "Too small" means that the nationwide federal revenue impact was estimated as $50 million or less.

DESCRIPTION: Business taxpayers may deduct up to $15,000 in annual expenses for removing physical barriers to the elderly or persons with disabilities in qualified facilities or public transportation vehicles that the taxpayer owns or leases. The tax expenditure associated with this deduction reflects the additional tax savings from the deduction relative to the regular depreciation rules that would otherwise apply.

Costs associated with constructing a new facility or vehicle or undertaking a complete renovation of an existing facility to make it more accessible to the elderly or persons with disabilities do not qualify for the deduction. In the case of a partnership, the $15,000 limit applies separately to the partnership and its individual members.

PURPOSE: According to the Congressional Research Service, the "likely goal" of the deduction "was to engage the private sector in expanding employment opportunities and improving access to goods and services for the elderly and disabled. Supporters of the provision have long contended that without it, firms would be less likely to remove physical barriers to the elderly and disabled from their facilities and transport systems."[344]

IMPACT: CRS states that "Expensing allows a taxpayer to fully deduct a business expense in the first year of investment, in comparison to depreciation whereby the taxpayer deducts the expense over many years according to a depreciation schedule. Expensing will generally provide additional tax savings (in comparison to depreciation) to taxpayers, since the full cost of the property (or improvements to the property) is recovered in the first year, rather than in future years when the value of any associated tax savings will fall."[345]

[344] U.S. Senate, Committee on the Budget, p. 569.
[345] Ibid, pp. 568-569.

***Income Tax***
*SPECIAL RULES*

## 98. 60-40 rule for gain or loss from section 1256 contracts

Internal Revenue Code Section: 1256
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1981

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $147 | $147 | $147 | $147 |
| Personal Income Tax Loss | $2,667 | $2,540 | $2,413 | $2,413 |
| **Total** | **$2,815** | **$2,688** | **$2,561** | **$2,561** |

DESCRIPTION: A "section 1256 contract" is any regulated futures contract, foreign currency contract, non-equity option, dealer equity option, or dealer securities futures contract traded on a qualified board of exchange with a "mark-to-market" accounting system. Under a mark-to-market system, gains and losses must be reported annually for tax purposes.

A tax expenditure arises under section 1256 contracts because the capital gain or loss from applicable contracts consists of 60 percent long-term and 40 percent short-term gain or loss, regardless of how long the contract is held. The "60-40 rule" removes the one-year holding period requirement for long-term capital gains tax treatment, allowing some gains to be taxed at a lower rate.

The "60-40 rule" does not apply to hedging transactions. These are transactions done by a business in its normal operation with the primary purpose of reducing risks or to limited partnerships.

PURPOSE: According to the Congressional Research Service, "Using mark-to-market overcomes the tax sheltering impact of certain commodity futures trading strategies and harmonizes the tax treatment of commodities futures contracts with the realities of the marketplace."[346]

IMPACT: The mark-to-market accounting for section 1256 contracts eliminates the deferral that would result under usual tax rules that recognize gains only when they are realized rather than when they accrued. At the same time, this accounting method removes the one-year holding requirement for long-term capital gains treatment, conferring a benefit to the owners of these assets. According to CRS, this special rule "often results in lower taxes for traders."[347]

[346] U.S. Senate, Committee on the Budget, p. 592.

*Special Rules*

## 99. Interest rate and discounting period assumptions for reserves of property and casualty insurance companies

Internal Revenue Code Sections: 831, 832(b), and 846
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1986

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $2,451 | $2,604 | $2,604 | $2,910 |
| Personal Income Tax Loss | $0 | $0 | $0 | $0 |
| **Total** | **$2,451** | **$2,604** | **$2,604** | **$2,910** |

DESCRIPTION: Property and casualty insurance companies may gain a tax advantage from the rules for calculating the present value of future losses. A present value is the current equivalent value of a given cash flow and is calculated using interest rates or discount factors and information about the timing of income and losses. Most businesses calculate taxable income by deducting expenses when they become liable for paying them. However, property and casualty companies pay out a significant portion of losses years after collecting premiums. Therefore, it is necessary to discount losses in future years to prevent the insurer from gaining a tax advantage from deferring loss payments.

Before 2017, the U.S. Treasury Department specified discount factors for various lines of property and casualty insurance used to compute the present value of future losses for tax purposes. Since the 2017 tax change, insurers must employ discount rates calculated by the IRS from an average of yields of high-quality corporate bonds, although transition rules allowed a blended treatment for up to eight years. The tax change constrains insurers' ability to shift net earnings into the future, thus deferring and lowering its tax burden. In June 2019, the IRS further modified the discounting rules to make sure they conformed to the 2017 legislation. The rule applies a single annual rate to all lines of business, calculated from a five-year average of yields on high-quality corporate bonds with maturities ranging from 4½ years to 10 years, with an average maturity of 7¼ years. The IRS also simplified consent procedures for making related accounting changes.[348]

PURPOSE: According to the Congressional Research Service, "Requiring most property and casualty companies to calculate the present value of future losses … with discount rates specified by the Treasury simplified the tax liability calculation and helped ensure more uniform tax treatment of property and casualty companies."[349]

IMPACT: CRS states that "Determining the distribution of benefits … is difficult because ownership of most property and casualty insurance companies is widely dispersed, either among shareholders in stock companies or policyholders in mutual companies. Competitive pressures may force companies to pass some benefits on to property and casualty insurance policyholders via lower premiums."[350] In addition, "Allowing some firms, such as property and casualty insurance

[350] Ibid, pp. 374-375.

companies, to defer certain tax liabilities requires other taxpayers to bear higher burdens or reduces federal revenues. A potential mismatch between simple tax rules and actual financial management practices may allow those insurers to attract economic resources from other sectors of the economy, thus creating economic inefficiencies."[351]

## 100. Inventory accounting

Internal Revenue Code Sections: 475, 491and 492
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1938

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $1,991 | $1,991 | $1,991 | $1,991 |
| Personal Income Tax Loss | $396 | $396 | $528 | $528 |
| **Total** | **$2,387** | **$2,387** | **$2,519** | **$2,519** |

DESCRIPTION: Businesses that sell goods must maintain inventory records to determine the cost of the goods sold. Businesses can account for inventory on an item-by-item basis but may also use rules such as first-in, first-out (FIFO) accounting, which assumes that the most recent item sold is the earliest one that was purchased, and last-in, first-out (LIFO) accounting, which assumes that the most recent item sold is the last one purchased. Under FIFO, firms may choose the lower of cost or market (LCM) method, which allows them to deduct losses on goods that have fallen in value below their original cost while in inventory. LIFO can only be used if it is also used for financial reporting, although it is not allowable for securities dealers.

Basic FIFO is the standard method of accounting for costs by matching the order of purchase with the order of sale. The use of the LCM method under FIFO, as well as LIFO more generally, is considered a tax expenditure because it provides more favorable tax treatment than basic FIFO. LIFO allows a firm to exclude the appreciation in the value of inventory when prices are rising, whereas LCM allows a firm to recognize losses when inventory drops in value.

PURPOSE: According to the Congressional Research Service, LIFO was originally adopted "to allow a standard accounting practice."[352] Because price inflation was very low, LIFO originally had a very minor impact. CRS notes that LCM was "considered a conservative accounting practice which reflected the loss in value of inventories."[353] However, the Economic Recovery Tax Act of 1981 (P.L. 97-34) "simplified LIFO by allowing a simplified dollar-value method that could be applied to all inventory by small businesses ... The reason was to make the method that most effectively mitigates the effects of inflation more accessible to all businesses."[354]

IMPACT: One study found that LIFO is most heavily used by the chemical, furniture, general merchandise, and metal industries, while another study concluded that the chemical and metal industries, furniture, and general merchandise retailers most often use it.[355] LIFO allows firms to lower their tax burden by reducing the difference between the sales price and the cost of inventory. It may even encourage firms expecting a high tax bill to purchase more inventories before the year ends to reduce taxable income. Small firms may benefit from using LCM for both tax and financial purposes.[356]

## 101. Special alternative tax on small property and casualty insurance companies

Internal Revenue Code Sections: 501(c)(15), 831, 832, and 834
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1954

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $3,105 | $3,261 | $3,416 | $3,726 |
| Personal Income Tax Loss | $268 | $268 | $268 | $401 |
| **Total** | **$3,373** | **$3,528** | **$3,682** | **$4,128** |

DESCRIPTION: Insurance companies not classified as life insurance companies (mostly property and casualty insurance companies) enjoy tax-exempt status if their annual gross receipts are $600,000 or less and if premiums account for 50 percent or less of their gross receipts. Mutual insurance companies may enjoy tax-exempt status if their annual gross receipts are $150,000 or less and if more than 35 percent of the receipts are premiums.

Slightly larger insurance companies not classified as life insurance companies may elect to be taxed only on their taxable investment income if net written premiums and direct written premiums each do not exceed $2.2 million for 2015 and indexed to inflation for later years.

PURPOSE: Small insurance companies have enjoyed tax advantages for over a century, dating back to when tax-exempt fraternal organizations provided life insurance to about 30 percent of the adult population. The Congressional Research Service states that "These provisions may have been included to encourage *the* formation of small insurance companies to serve specific groups of individuals or firms that could not easily obtain insurance through existing insurers."[357]

IMPACT: CRS notes that "Some very small non-life insurance companies are exempted from taxation entirely, while slightly larger non-life insurance companies may choose a potentially advantageous tax status instead of being taxed at the regular corporate tax rate of 21 percent."[358] It is difficult to determine how the deduction benefits are distributed because "ownership of some of these companies may be widely dispersed. Competitive pressures may force companies to pass some of these benefits on to insurance policyholders via lower premiums. In other cases, a set of companies may set up a 'captive' or 'minicaptive' insurance company, which provides insurance policies in exchange for premiums. In these cases, stakeholders in the parent companies benefit from the tax exemption."[359]

CRS notes that the deduction violates economic principles and creates costs for society. First, "The principle of basing taxes on the ability to pay, often put forth as a requisite of an equitable and fair tax system, provides no justification for reducing taxes on business income for firms below a certain

[357] U.S. Senate, Committee on the Budget, pp. 368-369.
[358] Ibid, p. 368.
[359] Ibid.

size."[360] In addition, "Imposing lower tax rates on smaller firms distorts the efficient allocation of resources, since it offers a cost advantage based on size and not economic performance. This tax reduction serves no simplification purpose, since it requires an additional set of computations and some complex rules to prevent abuses."[361]

[360] U.S. Senate, Committee on the Budget, p. 369.

## 102. Interest-charge domestic international sales corporations

Internal Revenue Code Sections: 991-997
Federal Law Sunset Date: None
Year Enacted in Federal Law: 1986

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Loss | $3,217 | $3,217 | $3,064 | $2,910 |
| Personal Income Tax Loss | $0 | $0 | $0 | $0 |
| **Total** | **$3,217** | **$3,217** | **$3,064** | **$2,910** |

DESCRIPTION: An "Interest-Charge Domestic Sales Corporation" (IC-DISC) is a domestic corporation, usually formed as a tax-exempt subsidiary of another corporation or trust, that exports U.S. products. The parent company pays the IC-DISC a tax-deductible commission for its qualified export sales. Because the IC-DISC is tax-exempt, distributions to IC-DISC shareholders are taxed only once at the lower individual dividend and capital gains tax rates. As a result, the shareholders enjoy a preferred after-tax return representing a tax expenditure.

IC-DISC shareholders may also defer up to $10 million in income from qualified export sales. An interest charge is imposed on shareholders, however, based on the distribution that would have occurred without the deferral. The $10 million deferral limit was intended to limit the benefit of IC-DISC activity to smaller businesses.

PURPOSE: According to the Congressional Research Service, "IC-DISC was intended to increase U.S. exports and provide an incentive for U.S. firms to operate domestically rather than abroad. Additionally, IC-DISC … was adopted as a way to partially offset export subsidies offered by foreign countries."[362] CRS also notes that "IC-DISC is a tax incentive that is intended to increase U.S. exports and discourage U.S. corporations from establishing subsidiaries in foreign countries."[363]

IMPACT: IC-DISC reduces the effective tax rate on export income, and the benefit accrues to the owners of export firms and IC-DISC shareholders. Although IC-DISCs are intended to boost the U.S. economy by increasing exports and discouraging U.S. corporations from establishing subsidiaries in other countries, CRS highlights some negative consequences. For example, "With flexible exchange rates, an increase in U.S. exports resulting from IC-DISC likely causes an appreciation of the U.S. dollar relative to foreign currencies. In response, U.S. citizens could be expected to increase their consumption of imported goods, possibly at the expense of domestically produced substitutes. As a result, no improvement in the balance of trade occurs and domestic employment could decrease."[364]

CRS also points to "inefficiencies that IC-DISC may introduce into the allocation of productive economic resources within the U.S. economy, as only domestic exporters may benefit from the subsidy. Additionally, because the tax benefit is related to the production of exported goods and

[362] U.S. Senate, Committee on the Budget, p. 68.
[363] Ibid, p. 69.
[364] Ibid.

services, domestic consumers receive no direct consumption benefit. Foreign consumers, on the other hand, benefit from lower-priced goods."[365]

## 103. Investment funds exemption from unincorporated business franchise tax

District of Columbia Code: D.C. Official Code § 47-1808.01(6)
Sunset Date: None
Year Enacted: 2014

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Business Income Tax Loss | $3,172 | $3,238 | $3,241 | $3,302 |
| Personal Income Tax Loss | $0 | $0 | $0 | $0 |
| **Total** | **$3,172** | **$3,238** | **$3,241** | **$3,302** |

DESCRIPTION: The District cannot tax non-residents' income, whether earned directly or via pass-through entities. Before 2015, investment funds operating a stock "trading" business in the District were treated as an unincorporated business and, therefore, subject to the unincorporated business franchise tax (UBFT). As of January 1, 2024, the UBFT tax is 8.25 percent. However, UBFT does not apply to trade or business where more than 80 percent of gross income is derived from personal services rendered by individuals or partners without capital as a material income-producing factor. This exempts professional firms, including doctors, lawyers, engineers, and accountants. This changed with the Tax Revision Commission Recommendations Clarification Act of 2014. The Act exempts trades and businesses that trade their own stocks, securities, and commodities from filing unincorporated business franchise taxes.

The exemption stems from whether an investment partnership should be considered as being engaged in a trade or business. An investment partnership, being treated as a business, will apportion its investment income as "business income" among the states where the investment partnership has apportionment factors, and the nonresident partners might be taxed in those states on their distributive shares of the apportioned business income of the investment partnership. On the other hand, an investment partnership not treated as being engaged in a trade or business, will have its income pass through to the partners as nonbusiness income and be taxed only in the partner's state of residence or commercial domicile.[366]

Virginia and Maryland offer similar exemptions to 'pass-through' entities established solely to invest in intangible personal property, such as stocks and bonds, with zero employees and no real or tangible property. These pass-through entities are not considered carrying on a trade or business. Corporations and non-residents in Virginia are not required to file a Virginia income tax return solely because of income from an investment pass-through entity. In Maryland, non-resident members and partnerships whose activities and assets are limited to investment in stocks, bonds, futures, options, or debt obligations other than debt instruments directly secured by real or tangible personal property are not subject to the nonresident member tax merely because a general partner from a Maryland location conducts the investment decisions, trading orders, research and the like.

[366] John A. Biek, "State Income Tax Exemptions for Nonresident Partners in Investment Partnerships" May-June 2009, available at http://www.ngelaw.com/files/Publication/28ece83b-1d2c-4c41-9186-1ee61fac8a1e/Presentation/PublicationAttachment/cd94486d-1a7b-41d1-b908-1caeadd4047d/JPTE.6666.Biek.pdf.

1406/8585

PURPOSE: The purpose of this provision is to encourage new industries, and thereby expand the District's economy and employment base.

IMPACT: According to DC Tax Revision Commission, the tax imposed on investment funds operating a stock trading business in the District amounts to a "tax on capital gains, dividends, and interest—and represents a liability that would not be imposed on funds in other states. The UBFT effectively precludes investment funds from "trading" stocks or securities in the District."[367] The DC Tax Revision Commission recommended that the "District adopt such a 'trading safe harbor' that would generally exempt investment funds from the UBFT. This step, which would apply only to intangible and not real property, could position the District to attract a vibrant new industry, spurring growth and diversifying the economy."[368]

[367, 375] Final Report of the D.C. Tax Revision Commission. May 2014, p. 18, available at http://media.wix.com/ugd/ddda66_eb2ae0d8b86a4c9c86eaee90501c36aa.pdf.

## 104. BID corporations

District of Columbia Code: D.C. Official Code § 47-4668
Sunset Date: None
Year Enacted: 2018

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Business Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $0 | $0 | $0 | $0 |
| **Total** | **$0** | **$0** | **$0** | **$0** |

DESCRIPTION: Business Improvement District (BID) corporations are nonprofit corporations that are organized pursuant to the District law for nonprofit corporations that conduct Business Improvement District Activities (BID activities) in a BID. A BID is organized and established by property and business owners to enhance the economic vitality of a downtown or neighborhood commercial area and is designed and conducted to avoid any material adverse impact on adjoining residential neighborhoods. The cost of BID services is financed by a self-imposed tax on the businesses within the community.

BID expenditures are used primarily for purchasing supplemental services, which include maintaining commercial corridors through litter and graffiti removal and landscaping to supplement city services; increasing security through the presence of ambassadors who walk the commercial district; promoting the commercial district and businesses operating therein; providing homeless and youth services; and making capital investments to supplement city services.[369]

Currently, there are eleven established business improvement districts (Adams Morgan Partnership; Anacostia BID; Capitol Hill (BID); Capitol River Front BID; DowntownDC; Dupont Circle BID Office; Georgetown (BID); Golden Triangle; Mount Vernon Triangle DC; NoMa BID; and Southwest BID), which provide programs that address commercial District-wide issues, such as cleanliness, maintenance, safety, promotion, economic development, and other collective business issues in their coverage areas. The Department of Small and Local Business Development manages the certification of BIDs and the BID charter extension process. The Council authorizes the BID taxes, collected by the District government and remitted to the BID.[370]

PURPOSE: This provision exempts Business Improvement Districts from taxation. Previous law does not provide a tax exemption for BIDs; therefore, the legislation was necessary to exempt BIDs from paying any sales, use, franchise, gross sales or receipts, income, personal or real property, transfer, or excise taxes.[371]

[369] Business Improvement Districts (BIDs), Department of Small and Local Business Development, August 25, 2022, available at https://dslbd.dc.gov/service/business-improvement-districts-bids
[370] Ibid.
[371] Council of the District of Columbia Committee on Business and Economic Development Committee Report (March 27, 2018). Report on Bill 22-0585, the "Business Improvement Districts Tax Exemption Amendment Act of 2018". Available at https://lims.dccouncil.us/Legislation/B22-0585.

Natalie Avery, the Executive director of DC BID Council, testified to the Council during the public hearing on Bill 22-0585, the "Business Improvement Districts Tax Exemption Amendment Act of 2018," that "from 1996 through 2007 there was language in the District's annual appropriation bill that exempted BIDs from paying taxes levied by the District of Columbia based on the following rationale: BIDs are funded by an additional real property tax imposed by the District of Columbia on non-exempt properties in BID areas and provide enhanced public services that contribute to the economic and social health of the city. She further stated that imposing District of Columbia taxes on BIDs would result in a significant reduction in public services customarily provided by BIDs to DC neighborhoods. In addition, the Office of Tax and Revenue stopped renewing BID tax exemption certificates in September 2017, thus the legislation is very important for BIDs to be exempted from certain taxes."[372]

IMPACT: BIDs benefit from this legislation.

[372] Council of the District of Columbia Committee on Business and Economic Development Committee Report (March 27, 2018). Report on Bill 22-0585, the "Business Improvement Districts Tax Exemption Amendment Act of 2018", p. 3. Available at https://lims.dccouncil.us/Legislation/B22-0585.

## 105. DC 529 ABLE Program Trust

District of Columbia Code: D.C. Official Code § 47-4901 and § 47-4902
Sunset Date: None
Year Enacted: 2016

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Business Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $224 | $256 | $288 | $320 |
| **Total** | **$224** | **$256** | **$288** | **$320** |

DESCRIPTION: The District's ABLE program was established under the federal Stephen Beck, Jr. Achieving a Better Life Experience (ABLE) Act of 2014. The DC ABLE program offers an income tax exemption on the earnings of deposits made to ABLE savings accounts for eligible individuals[373] to spend on qualified disability expenses such as healthcare, education, housing, and transportation. As of 2024, any individual can contribute up to $18,000 of after-tax dollars a year to any ABLE (also known as 529A) account. The federal legislation amends implemented Section 529 of the Internal Revenue Service Code to create tax-free savings accounts for persons with disabilities, which are established and maintained by states. Persons with a disability would lose access to means-tested public benefits like Supplemental Security Income (SSI) or Medicaid if they possessed a savings account worth more than $2,000 unless the savings are held in an ABLE account.[374]

Both the states of Virginia and Maryland have ABLE programs as well as forty-one other states with their distinct regulations, tax deductions, and residency requirements.[375]

Since the passage of the Tax Cuts and Jobs Act of 2017, two adjustments to states' ABLE programs have been made: ABLE beneficiaries can roll over their 529 accounts into their 529A accounts up to the annual maximum contribution until January 1, 2026, in the event the beneficiary is later diagnosed with a disability; and ABLE beneficiaries who work and earn income, but do not participate in an employer's retirement plan, are incentivized to save additional amount in their 529A accounts up to the federal poverty level (currently $14,580 in continental U.S.) in addition to the maximum annual contribution.

[373] The law defines "eligible individual" as an individual who during the taxable year is entitled to benefits based on blindness or disability under title II or XVI of the Social Security Act, and the blindness or disability occurred before the age of 26, or a disability certification with respect to such individual is filed with the OCFO for such taxable year, as defined in federal ABLE act.
[374] The ABLE savings account is not treated as personal assets towards this $2,000 cut off so long as the account does not exceed $100,000.
[375] The ABLE Nation Resource Center compares plans by state, available at https://www.ablenrc.org/select-a-state-program/

Purpose: According to the law's committee report, the exemption's purpose is to provide eligible District residents with disabilities with a way to pay for certain expenses and save money for the future without losing their eligibility for public benefits such as SSI.

Impact: Like the 529 college savings plan, the ABLE Program Trust benefits the account users whose withdrawals for qualified expenses, as well as investment gains from contributions, are tax-exempt. According to the law's purpose, the program appears to be meeting its goal of helping young residents with disabilities save for future qualified disability expenses, maintain their public benefits eligibility, and provide access to wealth for said persons.

A lack of data precludes us from determining the amount of tax-exempt capital gains from the taxable contributions for these accounts. As of calendar year 2023, the OCFO holds over $1.91 million in 238 DC ABLE accounts.

***Income Tax***
*Exclusions*

## 106. Gross income exclusion

District of Columbia Code: D.C. Official Code § 47-1803.02(a)(2)(RR)- (WW)
Sunset Date: None
Year Enacted: 2022

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Business Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $74 | $74 | $74 | $74 |
| **Total** | **$74** | **$74** | **$74** | **$74** |

DESCRIPTION: The gross income exclusion exempts income from the Downtown Destination grants awarded to individuals or entities, including Business Improvement Districts and Main Streets, to create or enhance public spaces, exhibits, or businesses that will attract families to the Central Business District or other nearby commercial corridors; and to housing providers to cover the costs of past due rent of District residents who are tenants of the housing providers. Additionally, the exclusion exempts funding from the District Department of the Environment or the District of Columbia Sustainable Energy Utility to incentivize solar installations under the Solar for All program. Moreover, rebates issued for automatic external defibrillators, climate change resilience grants authorized under Subtitle VI-C, and lump sum payments received from the educator pay parity program are exempt.

PURPOSE: This provision exempts specific grants from District income taxes and incentivizes solar installations under the Solar for All program.

IMPACT: The exclusion benefits low to moderate-income residents participating in the Solar for All program. A lack of data precludes us from determining the amount of income that is tax-exempt from the Downtown Destination grants and rebates issued from automatic external defibrillators. However, it is believed that the forgone tax revenue from these exempt grants is minimal.

***Income Tax***
*Subtractions*

## 107. College savings plan contributions

District of Columbia Code: D.C. Official Code § 47-4501 - § 47-4512
Sunset Date: None
Year Enacted: 2001

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Business Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $4,021 | $4,021 | $4,021 | $4,021 |
| **Total** | **$4,021** | **$4,021** | **$4,021** | **$4,021** |

DESCRIPTION: The District of Columbia College Savings Plan allows residents to create college savings accounts to benefit from incentives for qualified tuition programs provided by section 529 of the U.S. Internal Revenue Code. Contributions to a college savings account must be spent on "qualified higher education expenses and elementary and secondary tuition," which include college tuition, fees, books, supplies, and equipment.[376] Anyone can open a college savings account on behalf of a child. At the end of FY 2022, the D.C. plan had 36,904 accounts with an average balance of $25,696. Although the D.C. plan added 3,772 new accounts in FY 2022, its assets decreased by 6.9% to $948.3 million from FY 2021 due to a combination of historically high inflation, rising interest rates, the war in Ukraine, and lingering COVID-19 issues.[377]

H.R. 1865, P.L. 116-94, also known as the Setting Every Community Up for Retirement Enhancement Act (SECURE Act), was signed into law on December 20, 2019. It expanded the types of eligible expenses for the 529 Plan to include apprenticeship programs and education loan repayments up to $10,000.

Earnings in a college savings account and the distribution of funds to pay for qualified higher education expenses are exempt from federal income tax. The District of Columbia conforms to those federal rules when applying the local income tax (see tax expenditure #13, "Earnings of qualified tuition programs").

The District of Columbia also allows account owners to take a local income tax deduction of as much as $4,000 yearly for single filers or $8,000 for joint filers. If the account owner contributes more than the maximum amount in a tax year, the excess amount may be carried forward, subject to the annual limit, for five years. The estimate of forgone revenue shown above reflects the loss resulting from the local income tax deduction.

College savings plans are offered in 49 states, 35 of which offer state tax deductions or credits to those who contribute to the plans in addition to the federal tax incentives.[378] In Maryland, a taxpayer can deduct up to $2,500 in annual account contributions *per* child, while in Virginia, a taxpayer can deduct up to $4,000 in annual account contributions *per* child. Both states also allow residents to exclude the earnings on their 529 account investments from state income tax.

[376] See Section 529(c)(3) of the Internal Revenue Code for the statutory definition of "qualified higher education expenses."
[377] D.C. 529 College Savings Plan, Fiscal Year 2022 Annual Report, available at www.dccollegesavings.com.
[378] State Section 529 Deductions, available at https://finaid.org/savings/state529deductions/

PURPOSE: This provision aims to increase access to higher education by helping individuals and families save for it on a tax-favored basis.

IMPACT: Families and others who pay for higher education benefit from the subtraction, as do the students whose educations are financed, at least in part, by the tax-favored college savings accounts. Moreover, society may benefit from having a more educated and productive citizenry.

During the tax year 2021 (the last year data was collected), 9,475 tax filers claimed this subtraction. As shown in the workforce table below, tax filers with annual income above $100,000 accounted for 93.1 percent of the total amount subtracted.

Higher-income families benefit more from college savings plans because they have the resources to save for college and face higher marginal tax rates that increase the value of tax deductions and exclusions. Urban Institute researchers have questioned whether the plans impact college savings because higher-income families would likely set aside funding for higher education even without the tax incentives.[379]

**College Savings Program- TY 2021**

| Income Category (AGI) | Number | Share | Amount ($) | Share |

## 108. Public school teacher expenses

District of Columbia Code: D.C. Official Code § 47-1803.03(b-2)
Sunset Date: None
Year Enacted: 2007

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Business Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $60 | $60 | $60 | $60 |
| **Total** | **$60** | **$60** | **$60** | **$60** |

DESCRIPTION: An individual who has served as a classroom teacher in a traditional public school or a public charter school for an entire tax year may subtract the following expenses from District of Columbia gross income: (1) the amount paid for basic classroom materials and supplies needed for teaching, up to $500 per year, and (2) the amount paid as tuition and fees for post-graduate education, professional development, or licensing and certification requirements, up to $1,500 per year. If the taxpayer claimed a deduction for classroom materials and supplies or tuition and fees on his or her federal income tax return, then those expenses may not be claimed as a deduction from the District of Columbia gross income.

Maryland offers public school teachers to deduct up to $250 of unreimbursed classroom supplies purchased during the tax year and a non-refundable annual tuition tax credit of up to $1,500 for courses necessary to achieve or maintain advanced teacher certification. To receive the credit, the teacher must complete the course with a grade of "B" or better, have a satisfactory performance evaluation, and not have been reimbursed by his or her school system for the tuition paid. In 2022, Virginia enacted an income tax deduction of up to $500 for certain expenses incurred by an eligible educator in tax years 2022, 2023, and 2024. Virginia also allows a licensed primary or secondary school teacher to deduct 20 percent of unreimbursed tuition costs paid to attend continuing education courses required as a condition of employment, provided these expenses were not deducted from federal gross income.

PURPOSE: The purpose of the subtraction is to defray the costs that teachers often absorb for classroom supplies, materials, and professional development and to enhance the public school's ability to recruit and retain highly qualified teachers.

IMPACT: Classroom teachers are the direct beneficiaries of the subtraction, but there may be spillover benefits for society if the provision helps public schools in the District of Columbia schools attract and retain skilled teachers. On the other hand, the subtraction may violate the principle of horizontal equity because other professionals, such as child welfare workers, do not receive a similar deduction. Decision-makers might also consider whether it makes more sense to pursue the policy goals through direct spending for school supplies and professional development rather than through a tax provision.

During the tax year 2021, 2,106 tax filers claimed the subtraction, which is geared toward low-to-middle-income earners. As shown in the table below, tax filers with incomes between $25,000 and $75,000 accounted for 41.7 percent of the total amount deducted.

| **Public School Teacher Expenses-2021** | | | | |
|---|---|---|---|---|

## 109. Health insurance premiums paid for a same-sex spouse or domestic partner (personal income tax)

District of Columbia Code: D.C. Official Code § 47-1803.03(a)(15) and § 46-401(b)
Sunset Date: None
Year Enacted: 1992

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Corporate Income Tax Impact | $0 | $0 | $0 | $0 |
| Personal Income Tax Impact | $113 | $118 | $123 | $127 |
| **Total** | **$113** | **$118** | **$123** | **$127** |

DESCRIPTION: An individual taxpayer may subtract from gross income the amount of any health insurance premium paid by his or her employer for a domestic partner.

Individuals can also exclude from gross personal income the health insurance premiums that employers pay for themselves and other family members, but that exclusion is provided in federal law, to which the District conforms (see tax expenditure #31 "Employer contributions for medical care, medical insurance premiums and long-term care insurance premiums"). The federal government now allows any tax deductions or exclusions on behalf of domestic partners. However, the 2013 ruling by the federal government does not apply to registered domestic partnerships, civil unions, or similar formal relationships recognized under state law. The estimated revenue loss shown above reflects the cost of providing the D.C. personal income tax deduction for health insurance premiums paid for a domestic partner.

D.C. law defines a "domestic partner" as a person with whom an individual maintains a committed relationship characterized by mutual caring and sharing of a mutual residence; who is at least 18 years of age and competent to contract; who is the sole domestic partner of the other person; and is not married.[380] A domestic partner can be of the same sex or the opposite sex.

Neither Maryland nor Virginia offers individuals a similar tax deduction for domestic partners.

PURPOSE: The subtraction promotes tax equity for domestic partners and expands their access to health insurance. Because of federal conformity, the health insurance premiums paid by employers on behalf of spouses are not counted in the District of Columbia gross income; this provision offers the same treatment to domestic partners. The provision also makes health insurance more affordable to domestic partners.[381]

IMPACT: Domestic partners and their families benefit from the subtraction. In the tax year 2021, 248 tax filers claimed the subtraction. Tax filers with incomes over $75,000 accounted for 68 percent of the total amount deducted, as shown in the table below. It is estimated that the number of claimants has dropped since 2009 because same-sex marriage is now legal in the District of

[380] See D.C. Official Code § 32-701(3).
[381] Council of the District of Columbia, Committee on Finance and Revenue, Report on Bill 16-495, the "Domestic Partner Health Care Benefits Tax Exemption Act of 2005," October 12, 2005.

Columbia, reducing the appeal of domestic partner benefits for same-sex couples, and the federal government recognizes domestic partners for tax purposes. ORA estimates 248 tax filers will claim the deduction in FY 2022

The deduction for health insurance premium costs may lead employees to seek—and employers to provide—more of their compensation in terms of health benefits than they would otherwise offer, creating an efficiency loss.

## 110. Health professional loan repayments

District of Columbia Code: D.C. Official Code § 7-751.11
Sunset Date: None
Year Enacted: 2006

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Business Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $127 | $127 | $127 | $127 |
| **Total** | **$127** | **$127** | **$127** | **$127** |

DESCRIPTION: The District of Columbia Health Professional Recruitment Program was established as a recruitment tool for health professionals in the District. Subject to the availability of funds, the program repays the outstanding principal, interest, and related expenses for government or commercial loans an individual obtains for tuition, fees, and reasonable educational expenses incurred while obtaining a health professional degree. The loan repayments made by the District government are taxable under the federal income tax but are not considered income for purposes of the District of Columbia income tax.

In return for the loan repayment, the health professional must work for at least two years and a maximum of four years at a non-profit facility located in a "health professional shortage area" or "medically underserved area" in the District of Columbia designated by the U.S. Department of Health and Human Services. The non-profit facility must offer primary care, mental health, or dental services to District of Columbia residents regardless of their ability to pay.

Physicians, dentists, and nurses are among the health professionals who are eligible to apply for the program. Selection is based on professional qualifications and relevant experience, professional achievements, and other competency indicators. The Department of Health administers the program.

Specifically, for full-time participants in the program, physicians and dentists are eligible to have 100% of their total debt not to exceed $120,000. Physicians who specialize and practice in obstetrics and gynecology, psychiatry, oncology, cardiology, neurology, infectious diseases, pulmonary diseases, nephrology, endocrinology, podiatry, ophthalmology, or another medical sub-specialty identified by the Director shall be eligible to have 100% of their total debt, not to exceed $200,000, provided that the participants provide full-time service in Wards 7 or 8. Also, other health professionals can have 100% of their total debt repaid, up to $66,000. All the debt is repaid over 4 years of service by the participants.

In 2012, Maryland policymakers enacted legislation establishing "Health Enterprise Zones," where residents experience measurable health disparities and poor health outcomes. A health care practitioner who provides primary care, behavioral health services, or dental health services in a designated zone may apply to the Department of Health and Mental Hygiene (DHMH) for a state income tax credit if he or she (1) demonstrates competency in cultural, linguistic, and health literacy, (2) accepts and provides care for Medicaid and uninsured patients, and (3) meets any other criteria set by DHMH. A practitioner in a Health Enterprise Zone may also apply for a refundable

$10,000 credit against the state income tax for hiring workers who help provide healthcare services in the zone. These tax credits are budgeted, so they are subject to the availability of funds and provided on a first-come, first-served basis.

Virginia loan repayment program through the Virginia Department of Health-Office of Minority Health and Health Equity (VDH-OMHHE) provides non-taxed incentives to qualified medical, dental, behavioral health, and pharmaceutical (pharmacists) professionals in return for a minimum of two (2) years of service at an eligible practice site in one of the federally designated Health Professional Shortage Areas (HPSAs) in a qualified field of practice in Virginia. Virginia State Loan Repayment Program VA-SLRP requires a dollar-for-dollar match from the community/practice site. The maximum award for a four (4) year commitment is $140,000 and shall be for a qualifying educational loan. Prioritizing applications for VA-SLRP is done on a first-come, first-served basis, with priority given to renewals. All approvals are based on the availability of funds. The participant shall meet and fulfill all requirements listed below to be eligible for the VA-SLRP.[382]

PURPOSE: This provision aims to "recruit community-based providers to our neediest neighborhoods by creating an incentive for those health professionals who choose to work where a health care shortage exists."[383]

IMPACT: This provision benefits health professionals who agree to work in health professional shortages or medically underserved areas in the District of Columbia. Low-income residents who receive health care from non-profit entities in the targeted areas should also benefit from this provision.

During the tax year 2021, 63 tax filers claimed the subtraction, a five (5) percent increase from 2021. As shown in the table below, in 2021, tax filers with incomes at or below $75,000 accounted for 51 percent of the total amount subtracted, which reflects the lower salaries that health professionals receive at non-profit facilities in medically underserved areas. However, there is an uptick in the number of tax filers with income at or above $100,000 that claimed the subtraction in 2021, which may reflect a shift in the salaries of health professionals.

## 111. D.C. and federal government survivor benefits

District of Columbia Code: D.C. Official Code § 47-1803.02(a)(2)(N)
Sunset Date: None
Year Enacted: 1987

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Business Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $3,203 | $3,331 | $3,467 | $3,604 |
| **Total** | **$3,203** | **$3,331** | **$3,467** | **$3,604** |

DESCRIPTION: Taxpayers may exclude from their District of Columbia taxable income the amount of any survivor benefits they received from the D.C. government or federal government if they are 62 or older by the end of the tax year. Maryland and Virginia provide an income subtraction for surviving spouses receiving military retirement benefits. Maryland residents who are a surviving spouse who receives military retirement income can subtract up to $12,500, with an increase to the first $20,000 for individuals who are at least 55 years old on the last day of the taxable year of their military retirement income from their gross income. This benefit also applies to persons who served in other certain commissioned civil service corps. Virginia residents who are surviving spouses of deceased veterans receive a graduated taxable income subtraction. For tax year 2024, a surviving spouse, at any age, who is receiving survivor annuities can deduct $30,000 from their gross income. Beginning in tax year 2024, the age 55 eligibility requirement has been eliminated.

This provision does not affect Social Security survivor benefits, which are excluded from taxation under another provision of D. C. law (see tax expenditure #115), "Social Security benefits for survivors and dependents").

PURPOSE: The exclusion shields the benefits of D.C. government or federal government workers from taxation, promoting income security among elderly survivors.

IMPACT: This provision benefits individuals over 62 who receive survivor benefits from the D.C. or federal government. In 2021, 1,672 tax filers claimed this subtraction. Tax filers with income below $50,000 accounted for the bulk (60.2 percent) of the total subtractions, as shown in the table on the next page.

The exclusion of federal and D.C. government survivor benefits violates the principle of horizontal equity because those with private-sector survivors' benefits do not receive the same exclusion.

| DC and federal government survivor benefits - 2021 | | | | |
|---|---|---|---|---|
| **Income Category (DC AGI)** | **Number** | **Share** | **Amount ($)** | **Share** |

## 112. Disability payments for the permanently and totally disabled

District of Columbia Code: D.C. Official Code § 47-1803.02(a)(2)(M)
Sunset Date: None
Year Enacted: 1985

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Business Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $6 | $6 | $6 | $7 |
| **Total** | **$6** | **$6** | **$6** | **$7** |

DESCRIPTION: Taxpayers may exclude from adjusted gross income up to $5,200 in disability payments, provided that (1) they were permanently and totally disabled when they retired, (2) they had not reached the age required to retire under their employer's regular (non-disability) retirement program as of the first day of the taxable year, and (3) their other income was less than $15,000.

This provision does not apply to Social Security disability benefits, which are excluded from taxation under another provision of D.C. law (see tax expenditure #117), "Social Security benefits for the disabled").

Virginia allows permanently and totally disabled taxpayers to exclude up to $20,000 in disability plan income. However, Virginia taxpayers who claim the state's age deduction for those over 65 are not eligible for the exclusion. Maryland does not have a similar tax provision.

PURPOSE: The purpose of the subtraction is to maintain in D.C. law a provision of the U.S. Internal Revenue Code that was abolished by the Social Security Amendments of 1983, thereby preserving in local law a tax benefit to certain individuals with disability income.[384]

IMPACT: Permanently and totally disabled individuals who receive disability payments, are not eligible for their employer's regular retirement plan, and meet the income standards benefit from this provision. In tax year 2021, about 16 taxpayers will claim the subtraction.

Because of the income limit, the subtraction assists only low-income individuals and households. Moreover, the real value of the benefit has declined over time because the amount that can be excluded ($5,200) and the limitation on other income ($15,000) have not been adjusted for inflation or income growth.

[384] Specifically, the federal government replaced disability income exclusion with a new credit for the permanently and totally disabled. Because a credit is not automatically mirrored in the D.C. income tax system, D.C. policymakers apparently decided to retain the disability income exclusion in local law.

*Subtractions*

## 113. Income of persons with a permanent and total disability

District of Columbia Code: D.C. Official Code § 47-1803.02(a)(2)(V)
Sunset Date: None
Year Enacted: 2005

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Business Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $556 | $578 | $601 | $625 |
| **Total** | **$556** | **$578** | **$601** | **$625** |

DESCRIPTION: A taxpayer who has been determined to have a permanent and total disability by the U.S. Social Security Administration may exclude up to $10,000 from District of Columbia gross income if he or she (1) is receiving supplemental security income or social security disability, railroad retirement disability, or federal or District of Columbia government disability payments, and (2) has a household adjusted gross income of less than $100,000.

Neither Maryland nor Virginia offers a similar exclusion, although Virginia allows permanently and totally disabled taxpayers to exclude up to $20,000 in disability plan income. Maryland has a maximum pension exclusion of $39,500 if a taxpayer is 65 or older or totally disabled (or has a spouse who is totally disabled).

PURPOSE: This exclusion provides income support to people who cannot work due to a permanent total disability.

IMPACT: This provision benefits people with permanent and total disabilities. During tax year 2021, 848 tax filers claimed this subtraction. As shown in the table below, the benefits accrue almost entirely to low-to-moderate income taxpayers: tax filers with income of $50,000 or less accounted for 91 percent of the total amount subtracted.

| Income for people with a permanent and total disability – 2021 | | | | |
|---|---|---|---|---|
| **Income Category (AGI)** | **Number** | **Share** | **Amount ($)** | **Share** |
| Breakeven or Loss | 324 | 38.2% | 2,602,882 | 38.0% |

## 114. Social security and railroad retirement benefits

District of Columbia Code: D.C. Official Code § 47-1803.02(a)(2)(L)
Sunset Date: None
Year Enacted: 1985

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Business Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $45,279 | $47,077 | $49,011 | $50,936 |
| **Total** | **$45,279** | **$47,077** | **$49,011** | **$50,936** |

Note: The estimated revenue loss in the table above covers *all* social security income tax subtractions available to District residents because they are combined into one sum in the District's tax database. In other words, the revenue loss applies to this tax expenditure and #115 - #117.

DESCRIPTION: As required by law, the District of Columbia exempts all railroad retirement benefits from the local income tax, though a portion of those benefits is taxable under the federal income tax (see tax expenditure #44, "Social Security and Railroad Retirement benefits"). The estimate of forgone revenue shown above represents the incremental revenue loss resulting from exempting the railroad retirement benefits that are subject to federal taxation as well as Social Security benefits that are taxable at the federal level, which are reported on the same line of the District income tax form.

Under the federal income tax, the portion of railroad retirement benefits that railroad workers would receive if Social Security instead covered them is taxed on the same basis as Social Security benefits. Specifically, up to 50 percent of Social Security benefits are taxable for taxpayers between $25,000 and $34,000 (single filers) or $32,000 and $44,000 (joint filers). Above those income ranges ($34,000 for a single filer and $44,000 for joint filers), up to 85 percent of Social Security benefits are subject to federal income tax.

In addition, non-Social Security equivalent benefits provided to railroad retirees, such as supplemental annuity benefits, are subject to federal income tax regardless of any other income the retiree receives.

PURPOSE: The subtraction is intended to ensure equitable tax treatment of railroad retirement and Social Security benefits. Under D.C. law, all Social Security benefits are also exempt from the local income tax (see tax expenditure #115, "Social Security benefits for retired workers").

IMPACT: Individuals receiving railroad retirement payments benefit from this subtraction. According to the Railroad Retirement Board, in the District of Columbia there are approximately 400 current beneficiaries of the railroad retirement and survivor benefits program, who receive average benefits of $683 per month.[385] Because D.C. taxpayers report their railroad retirement and Social Security income on the same line of the income tax form, there are no data on the railroad

[385] U.S. Railroad Retirement Board, "Annual Railroad Retirement Act & Railroad Unemployment Insurance Act Data, Table B27: Retirement and Survivor Benefits in Current-Payment Status on September 30, 2022, by Class and State (amounts in thousands)," retrieved on April 26, 2024 from: https://www.rrb.gov/sites/default/files/2023-10/ST22partb.pdf.

retirement subtraction by income level. See the distributional table in the following tax expenditure #115 below for a breakdown of all Social Security and railroad retirement benefits combined by income level.

## 115. Social Security benefits for retired workers

District of Columbia Code: D.C. Official Code § 47-1803.02(a)(2)(L)
Sunset Date: None
Year Enacted: 1985

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Business Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | included in #114 | included in #114 | included in #114 | included in #114 |
| **Total** | **included in #114** | **included in #114** | **included in #114** | **included in #114** |

DESCRIPTION: The District exempts all Social Security benefits from taxation, a policy that is more generous than the federal treatment of Social Security benefits (see tax expenditure #45, "Social Security and Railroad Retirement Benefits"). Under federal law, up to 50 percent of Social Security benefits are taxable for taxpayers with "provisional income" between $25,000 and $34,000 (single filers) or $32,000 and $44,000 (joint filers). Above those income ranges ($34,000 for a single filer and $44,000 for joint filers), up to 85 percent of Social Security benefits are subject to federal income tax.[386]

The estimate of forgone revenue represents the incremental revenue loss resulting from the District's decision to exempt the Social Security benefits of retired workers from federal taxation. Forty other states, including Maryland and Virginia, provide a full exemption of Social Security benefits from taxation.[387]

PURPOSE: The subtraction shields Social Security benefits from taxation and ensures that Social Security provides adequate income support to the elderly during their retirement.

IMPACT: This provision benefits Retired Social Security recipients. D.C. taxpayers report railroad retirement and all types of Social Security income (for retirees, survivors and dependents, and the disabled) on the same line of the income tax form, so they are necessarily reported together here.

The table on the following page shows the aggregate distribution of Social Security *and* railroad retirement subtractions by income group. Nevertheless, because almost two-thirds of the Social Security recipients in the District are retirees and the number of railroad retirement beneficiaries in the District is small, the distribution suggests that taxpayers with incomes of $150,000 or less claim just over 56 percent of the benefits of the subtraction while taxpayers with annual incomes over $150,000 claim over 43 percent of the benefit. Taxpayers with incomes over $500,000 a year claim about 11 percent of the benefit.

[386] Provisional income consists of federal adjusted gross income, tax-exempt interest, some foreign-source income, and one-half of Social Security benefits.
[387] Nicole Spector (2024). 41 States That Won't Tax Social Security Benefits in 2024. Yahoo Finance, April 28, 2024. Retrieved from https://finance.yahoo.com/news/41-states-won-t-tax-120052096.html

As of December 2022, there were 61,434 retired workers, 1,623 spouses of retired workers, and 812 children of retired workers receiving Social Security benefits in the District of Columbia.[388]

The table below shows that 28,389 tax *filers* claimed the subtraction for Social Security or Railroad Retirement benefits in 2021. The number is lower than the recipients cited in the previous paragraph because those figures include all household members rather than tax filing units.

| Social security and railroad retirement benefits - 2021 | | | | |
|---|---|---|---|---|
| **Income Category (AGI)** | **Number** | **Share (%)** | **Income Amount Subtracted ($)** | **Share (%)** |
| Breakeven or Loss | 492 | 1.7% | 3,993,069 | 0.7% |
| $1 to $25,000 | 4,092 | 14.4% | 23,972,533 | 4.3% |
| $25,001 to $50,000 | 6,428 | 22.6% | 78,088,453 | 14.0% |

## 116. Social Security benefits for survivors and dependents

District of Columbia Code: D.C. Official Code § 47-1803.02(a)(2)(L)
Sunset Date: None
Year Enacted: 1985

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Business Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | included in #114 | included in #114 | included in #114 | included in #114 |
| **Total** | **included in #114** | **included in #114** | **included in #114** | **included in #114** |

DESCRIPTION: The District exempts all Social Security benefits from taxation, a policy that is more generous than the federal treatment of Social Security benefits. Under federal law, up to 50 percent of Social Security benefits are taxable for taxpayers with "provisional income" between $25,000 and $34,000 (single filers) or $32,000 and $44,000 (joint filers). Above those income ranges ($34,000 for a single filer and $44,000 for joint filers), up to 85 percent of Social Security benefits are subject to federal income tax.[389]

The estimate of forgone revenue represents the incremental revenue loss resulting from the District's decision to exempt the Social Security benefits of survivors and dependents subject to federal taxation.

40 other states provide a full exemption of Social Security benefits from taxation, including Maryland and Virginia.[390]

PURPOSE: The exclusion shields Social Security benefits from taxation and ensures that Social Security provides adequate income support to dependents and survivors.

IMPACT: This provision benefits survivors and dependents who receive Social Security benefits. As of December 2022, 6,841 survivors (including children) received Social Security benefits in the District of Columbia.[391]

Because D.C. taxpayers report railroad retirement and all types of Social Security income (for retirees, survivors and dependents, and the disabled) on the same line of the income tax form, there are no data on the subtraction for Social Security survivors' and dependents' benefits by income level. See the distributional table in tax expenditure #115 for a breakdown of all Social Security and railroad retirement benefits combined by income level.

[389] Provisional income consists of federal adjusted gross income, tax-exempt interest, some foreign-source income, and one-half of Social Security benefits.

## 117. Social Security benefits for the disabled

District of Columbia Code: D.C. Official Code § 47-1803.02(a)(2)(L)
Sunset Date: None
Year Enacted: 1985

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Business Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | included in #114 | included in #114 | included in #114 | included in #114 |
| **Total** | **included in #114** | **included in #114** | **included in #114** | **included in #114** |

DESCRIPTION: The District exempts all Social Security benefits from taxation, a policy that is more generous than the federal treatment of Social Security benefits. Under federal law, up to 50 percent of Social Security benefits are taxable for taxpayers with "provisional income" between $25,000 and $34,000 (single filers) or $32,000 and $44,000 (joint filers). Above those income ranges ($34,000 for a single filer and $44,000 for joint filers), up to 85 percent of Social Security benefits are subject to federal income tax.[392]

The estimate of forgone revenue represents the incremental revenue loss resulting from the District's decision to exempt the Social Security disability benefits subject to federal taxation.

40 other states provide a full exemption of Social Security benefits from taxation, including Maryland and Virginia.[393]

PURPOSE: The exclusion shields Social Security benefits from taxation and ensures that Social Security provides adequate income support to people with disabilities.

IMPACT: Social Security recipients with disabilities benefit from this provision. As of December 2022, there were 11,547 disabled workers, 21 spouses of disabled workers, and 1,198 children of disabled workers receiving Social Security benefits in the District of Columbia.[394]

Because D.C. taxpayers report railroad retirement and all types of Social Security income (for retirees, survivors and dependents, and the disabled) on the same line of the income tax form, there are no data on the subtraction for Social Security disability benefits by income level. See the distributional table in the previous tax expenditure #115 for a breakdown of all Social Security and railroad retirement benefits combined by income level.

[392] Provisional income consists of federal adjusted gross income, tax-exempt interest, some foreign-source income, and one-half of Social Security benefits.

## 118. Rental assistance to police officers

District of Columbia Code: D.C. Official Code § 42-2902
Sunset Date: None
Year Enacted: 1993

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Business Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $181 | $183 | $185 | $187 |
| **Total** | **$181** | **$183** | **$185** | **$187** |

DESCRIPTION: Metropolitan Police Department (MPD) officers can receive discounted rent from public and private housing providers in the District of Columbia. The D.C. Housing Authority (DCHA) is also lawfully required to offer public housing units at a discounted rent to MPD officers, prioritizing officers who already live in the District. The discounted rent officers receive is not counted as income in calculating District of Columbia income tax liability.

An officer who receives discounted rent must notify the Chief of Police of the terms of the discount and provide a copy of the lease or written agreement detailing the terms of the housing rental.

A review did not identify similar provisions offered in Virginia. However, in 2022, the City of Baltimore, Maryland's Police Department offered $1,000 monthly housing assistance for new hires for the first year of full-time employment if they live within the city.[395]

PURPOSE: This provision encourages MPD officers to live in the District of Columbia, particularly in public housing, and thereby promotes safety and security in the communities where they live. The report on the legislation by the Council's Committee on Housing stated that "Effective community policing requires a police presence in our community … Police officers who live in our community serve as a positive role model for our children, build a closer rapport with our residents, and their mere presence increases public safety."[396]

IMPACT: MPD officers and the communities where they reside are the intended beneficiaries of this provision. According to DC's 2021 individual income tax returns data, 10 MPD officers participate in the Residential Officer Program.

[395] Media Relations of the Baltimore Police Department (2022). Media Release: Baltimore Police Department announces new recruitment and retention incentives. ## 119. Compensatory damages awarded in a discrimination case

District of Columbia Code: D.C. Official Code § 47-1803.02(a)(2)(U) and § 47-1806.10
Sunset Date: None
Year Enacted: 2002

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Business Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $14 | $15 | $15 | $16 |
| **Total** | **$14** | **$15** | **$15** | **$16** |

DESCRIPTION: A taxpayer may exclude from the District of Columbia gross income a court award intended to compensate him or her for the pain and suffering of unlawful employment discrimination. The exclusion does not apply to back pay, front pay (future wages), or punitive damages.[397] A review did not identify similar provisions offered in Virginia. In 2023, Maryland allowed any amount received by a claimant for noneconomic damages due to a claim of unlawful discrimination to be subtracted from Maryland's gross income.[398]

PURPOSE: The subtraction preserves the full value of the awards, which are intended to compensate individuals for the pain and suffering associated with unlawful employment discrimination.

IMPACT: This provision benefits individuals who have won an employment discrimination suit or received a monetary settlement of an employment discrimination claim. In the tax year 2021 (the last year for which data are available), 67 tax filers claimed $174,277 in awards. The maximum award amount in that year was $62,144.

[397] D.C. law provides that damages pertaining to back pay and front pay are to be averaged over the period of back and future wages involved. This spreading of back pay and front pay protects the taxpayers from having to pay a large lump sum in taxes in one year and avoids the perverse result in which a taxpayer could be pushed into a higher tax bracket due to the award of back pay and front pay.

## 120. Poverty lawyer loan assistance

District of Columbia Code: D.C. Official Code § 47-1803.02(a)(2)(X)
Sunset Date: None
Year Enacted: 2007

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Business Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $10 | $10 | $10 | $10 |
| **Total** | **$10** | **$10** | **$10** | **$10** |

DESCRIPTION: Loans awarded and subsequently forgiven through the District of Columbia Poverty Lawyer Loan Assistance Repayment Program (LRAP) can be excluded from the District's gross income.

LRAP is intended to encourage law students and attorneys to practice in areas of civil law deemed to serve the public interest. Participants who practice law in the designated areas, live in the District of Columbia, have an individual annual adjusted gross income of less than $100,000 or a joint annual adjusted gross income of less than $200,000,[399] and exhaust all other loan assistance opportunities, can receive loans to repay the debt incurred while obtaining a law degree. The loans are forgiven when the participant completes his or her service obligation. The maximum amount of loan repayment assistance is $12,000 per year per participant.

The District of Columbia Bar Foundation administers LRAP on behalf of the Deputy Mayor for Public Safety and Justice, who oversees the program. The Bar Foundation determines which areas of legal practice qualify for LRAP. According to the D.C. Bar Foundation, "49 Attorneys Enrolled to Receive Loan Forgiveness through LRAP" in 2023.[400] The average participant in 2023 owed $101,630 in educational debt and earned $72,137. The average LRAP-adjusted award in 2023 was $5,800.[401]

PURPOSE: This subtraction encourages attorneys to enter public-interest work and thereby expands access to legal services for low-income residents.

IMPACT: LRAP participants benefit from this provision, as do the organizations and clients who receive legal services from the participants. In the tax year 2021 (the last year for which data were available), 9 tax filers subtracted about $125,000 of income related to LRAP awards. The median income of the filers in that year was $42,702. Organizations that have employed program participants include the Legal Aid Society of the District of Columbia, Legal Counsel for the Elderly, Washington Legal Clinic for the Homeless University Legal Services, and Whitman-Walker Health.

[399] The income ceiling will be increased by 3 percent on October 1 of each year. The next increase will take effect on October 1, 2024. See D.C. Official Code § 4-1704.03(a)(4) and the 2024 LRAP guidelines available at https://dcbarfoundation.org/lrap.
[400] DC Bar Foundation, and from https://www.dcbarfoundation.org/reports.
[401] Ibid. The COVID-19 federal student loan payment suspension has been in effect from March 2020 to October 2023, which impacted the LRAP awards. For this reason, the 2020-2023 LRAP data is atypical.

## 121. Economic development zone incentives for businesses

District of Columbia Code: D.C. Official Code § 6-1501, § 6-1502, § 6-1504, and § 47-1807.06
Sunset Date: None
Year Enacted: 1988

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Business Income Tax Loss | $160 | $164 | $165 | $165 |
| Personal Income Tax Loss | $0 | $0 | $0 | $0 |
| **Total** | **$160** | **$164** | **$165** | **$165** |

DESCRIPTION: D.C. law designates three economic development zones eligible for tax and other development incentives: the Alabama Avenue zone, the D.C. Village zone, and the Anacostia zone. The Mayor may also designate additional economic development zones (subject to Council approval) based on evidence of economic distress, such as high levels of poverty, unemployment, low income, population loss, and other criteria outlined in the law.

A business entity that is located within an economic development zone is eligible for corporate franchise tax credits or unincorporated business franchise tax credits if (1) the business has signed a "First Source" agreement with the D.C. government pledging that 51 percent of new hires shall be D.C. residents, and (2) the business is subject to the D.C. franchise tax.

The available credits include (1) a credit equal to 50 percent of wages paid to low-income workers who are D.C. residents, up to a maximum of $7,500 per employee per year, (2) a credit equal to 50 percent of the workers' compensation premiums paid on behalf of workers who are D.C. residents, and (3) a rent credit for businesses that rent space to a non-profit child care center. The value of the rent credit is equal to the difference between the fair market value for the space and the actual rent charged to the childcare center. If the rent credit exceeds the tax liability of a business, it can carry the credit backward or forward for up to five years.

The Mayor must submit, and the Council must approve a resolution that qualifies the business for the incentives. The resolution must identify the business, specify the types of incentives to be granted, and estimate the annual dollar value of each franchise tax credit.

In 1997, the federal government established an enterprise zone in the District of Columbia, which provided businesses operating in the zone with federal wage tax credits, expensing and capital gains tax benefits, and tax-exempt bond financing. The authorization for the federal enterprise zone expired on December 31, 2011.

Maryland provides income tax credits for each new worker hired by a business in any of 29 enterprise zones or a Regional Institution Strategic Enterprise (RISE) zone and allows localities to offer real property tax credits for a portion of any property improvements made by a business in an

enterprise zone.[402] Businesses located in the Baltimore City or Prince George's County zones are eligible for larger property and income tax credits, as well as personal property tax credits. Virginia replaced its enterprise zone tax credits with a grant program.

PURPOSE: The incentives promote economic development in neighborhoods in economic distress and increase the employment of low-income D.C. residents.

IMPACT: Businesses located in an economic development zone and low-income residents are eligible to benefit from these incentives. Nevertheless, only two incentive packages have been approved since the economic development zones were created, and neither package included business tax incentives (both packages included real property tax incentives). ORA is not aware of any entities that have been eligible to claim this credit.

[402] The income tax credits are $1,000 for each new worker, but the credit rises to $9,000 over three years if the worker is "economically disadvantaged." The real property tax credits equal 80 percent of the increased tax liability resulting from property improvements for the first five years and are then phased out over the next five years.

## 122. Qualified high-technology companies: employment incentives

District of Columbia Code: D.C. Official Code § 47-1817.03
Sunset Date: None
Year Enacted: 2001

| (Dollars in thousands) | FY 2024 | FY 2025 | FY2026 | FY2027 |
|---|---|---|---|---|
| Business Income Tax Loss | 14,806 | 15,176 | 15,328 | 15,313 |
| Personal Income Tax Loss | $0 | $0 | $0 | $0 |
| **Total** | **14,806** | **15,176** | **15,328** | **15,313** |

DESCRIPTION: A qualified high technology company is allowed a credit against its business tax liability equal to 5 percent of the wages paid during the first 24 calendar months of employment to a qualified employee hired after December 31, 2017. The credit for each qualified employee may not exceed $3,000 per taxable year. If the credit exceeds the amount of tax otherwise due from a high-technology company, the unused amount can be carried forward for 10 years if a qualified employee was hired before October 1, 2019.

A high-technology company is considered "qualified" if it (1) has ten (before 2020, it was two) or more employees in the District and (2) derives at least 51 percent of gross revenues earned in the District from technology-related goods and services such as Internet-related services and sales; information and communication technologies, equipment and systems that involve advanced computer software and hardware; and advanced materials and processing technologies. A qualified employee is a person who is employed in the District of Columbia by a qualified high-technology company.

The employment credits were part of a list of incentives for high-technology firms authorized by D.C. Law 13-256, the "New E-conomy Transformation Act of 2000."[403] The "Downloading Lost Revenues Amendment Act of 2019" amended the provision by reducing the credit amounts.

Maryland offers a job creation tax credit for eligible businesses that locate or expand in the state and create at least 60 new jobs (25 in a "priority funding area" or 10 jobs in certain counties), as well as tax credits for hiring people who are qualified veterans. Still, these incentives are not specific to the high-technology sector (or any other sector). Virginia provides a major business facility tax credit for firms that create at least 51 new jobs (26 new jobs for firms in economically distressed areas or enterprise zones) relative to a base year but cannot also claim the green job creation tax credit or the clean fuel vehicle and advanced cellulosic biofuels job credit. They can, however, claim the new company incentive program; all of these incentives are not targeted at the high-technology sector.

PURPOSE: The credit encourages the growth of high-technology industries and employment in the District of Columbia and thereby strengthens the District's economic base.

[403] The other incentives, which include increased expensing of capital assets, a reduced corporate tax rate, property tax abatements, sales tax exemptions, and personal property tax exemptions, are discussed elsewhere in this section.

IMPACT: This provision benefits high-technology companies in the District of Columbia. There may also be spillover benefits regarding greater employment and business activity. For tax year 2022, 92 companies were certified as QHTCs, while 26 claimed $12.7 million in total QHTC credits, some of which may have been carried forward from previous years. In total, 23 firms claimed 1,155 employees as the basis of the wage credits reported.

*Credits*

# 123. Qualified high-technology companies: incentives to employ and retrain disadvantaged workers

District of Columbia Code: D.C. Official Code §§ 47-1817.04 and 47-1817.05
Sunset Date: 2020
Year Enacted: 2001

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Business Income Tax Loss | Included in #122 | Included in #122 | Included in #122 | Included in #122 |

DESCRIPTION: Before 2020, a qualified high technology company could take credits against its franchise tax liability equal to 50 percent of the wages paid to a qualified disadvantaged employee during the first 24 calendar months of employment. The credit could not exceed $15,000 in a taxable year for each disadvantaged employee, and the credit was not allowable if the company accords the qualified employee lesser benefits or rights than other employees in similar jobs. Until 2020, if the allowable credit amount exceeds the tax otherwise due, the company could carry forward the unused amount for 10 years. As of tax year 2020, the credit for wages paid is no longer applicable, the credit for retraining costs cannot exceed $10,000 for each qualified disadvantaged worker *retrained* during the first 18 months of employment, and the carry forward provision is repealed.[404]

Retraining expenditures for qualified employees who are eligible for the tax credit include tuition, costs, or fees for credit or noncredit courses leading to academic degrees or certification of professional, technical, or administrative skills taken at District-based accredited colleges or universities or the cost for formal enrollment in training programs offered by nonprofit training providers (including community or faith-based organizations certified for the provision of training or job-readiness preparation at skill levels suitable for immediate performance of entry-level jobs), in demand among technology companies and information and telecommunications companies.

A qualified disadvantaged employee refers to a District of Columbia resident who is receiving benefits from the Temporary Assistance to Needy Families (TANF) program; was a recipient of TANF in the period immediately preceding employment; was released from incarceration within 24 months of being hired by a qualified high-technology company; or qualifies for the Welfare-to-Work Tax Credit or the Work Opportunity Tax Credit under the U.S. Internal Revenue Code.

A high-technology company is considered "qualified" if it (1) has ten (it was two before 2020) or more employees in the District and (2) derives at least 51 percent of gross revenues earned in the District from technology-related goods and services such as Internet-related services and sales; information and communication technologies, equipment and systems that involve advanced computer software and hardware; and advanced materials and processing technologies. The

[404] The QHTC Tax Incentives Modification Amendment Act of 2020 (Subtitle (VII)(M) of the FY 2021 Budget Support Act of 2020) amended Section 47-1817.04(d) and repealed Section 47-1817.04(e) and Section 47-1817.05(c).

employment credits are part of a package of incentives for high-technology firms first authorized by D.C. Law 13-256, the "New E-conomy Transformation Act of 2000."[405]

Maryland offers tax credits to its state business tax to employers who hire people with disabilities, but this incentive is not specific to the high-technology sector (or to any other sector). Virginia provides a tax credit of up to $750 for hiring TANF recipients (for businesses with 100 employees or less), but the incentive is not limited to the high-technology sector. Additionally, Virginia provides a non-refundable worker training tax credit of up to 35% of all classroom training costs. Still, it is limited to up to $500 annual credit per student if the course work is incurred at a private school or $300 per qualified employee with retraining in a STEM or STEAM discipline.[406] The worker retraining tax credit is not targeted at the high-technology sector or at disadvantaged workers.

PURPOSE: The purpose of the credit is to encourage high-technology companies to invest in the skills of disadvantaged workers and thereby help disadvantaged workers attain better jobs with higher wages and more potential for advancement within the high-technology sector.

IMPACT: Disadvantaged workers in the District of Columbia and high-technology companies that employ them benefit from this tax credit. In tax year 2022, no claims were made under this provision.

However, the credit violates the principle of horizontal equity because firms in other industries with equivalent income levels are not eligible for similar tax relief.

[405] The other incentives, which include increased expensing of capital assets, a reduced corporate tax rate, property tax abatements, sales tax exemptions, and personal property tax exemptions, are discussed elsewhere in this section.

[406] For classes taken at a private school, Virginia limits the annual credit to $200 per student ($300 per student if the student is undergoing training in science, technology, engineering, or mathematics).

## 124. Small retailer property tax relief credit

District of Columbia Code: D.C. Official Code § 47-1807.14
Sunset Date: None
Year Enacted: 2018

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Business Income Tax Loss | $3,041 | $3,028 | $3,009 | $3,006 |
| Personal Income Tax Loss | $0 | $0 | $0 | $0 |
| **Total** | **$3,041** | **$3,028** | **$3,009** | **$3,006** |

DESCRIPTION: A qualified corporation is eligible for a refundable credit equal to 1). 10% of the total rent paid by the corporation for a qualified rental retail location during the taxable year capped at $5,000; and 2) a tax credit equal to the total Class 2 real property taxes, under § 47-811, paid by the qualified corporation for a qualified retail owned location during the taxable year not to exceed the lesser of the real property tax paid during the taxable year or $5,000.

Retail sales include all tangible personal property, food, drink, and alcoholic beverages; digital goods, hotel room or any other transient lodgings or accommodations; admission to public events (except live performances of ballet, dance, or choral performances, concerts (instrumental and vocal), plays (with and without music), operas and readings and exhibitions of paintings, sculpture, photography, graphic and craft arts; parking and motor vehicle storage services; real property maintenance services; landscaping services; health club services; tanning studio services; data processing and information services; newspapers or publications; job seeking services; armored car, private investigation and security services; bottled water delivery services; the storage of household goods; carpet and upholstery cleaning services; car washing services; and bowling alley or billiard parlor services.

A qualified company is a corporation that engages in making retail sales with less than $2,500,000 in federal gross receipts or sales and is current on all District tax filings and payments. A qualified “retail rental location" or “qualified retail owned location” means a building or part of a building that is established in the District and is either the primary place of the retail business of the qualified corporation, owned by the qualified corporation, leased by the qualified corporation; or is classified, in whole or in part, as Class 2 Property, as defined in § 47-813 and has obtained a Certificate of Occupancy for commercial use.

Qualified retail sales companies already receiving any other tax credits towards payment of the real property tax for the qualified rental retail location or a qualified-owned retail location exempt from property tax are not eligible for the credit.

PURPOSE: The credit's purpose is to encourage the investment and growth of small retail businesses in the District. No purpose was expressly stated in this law’s founding committee report, so we assume its intent.

IMPACT: Small retail businesses benefit from this tax credit. In calendar year 2019, 710 small retailers claimed $3.2 million in credits; in 2020, 720 small retailers claimed $3 million in credits;

in 2021, 633 small retailers claimed $2.77 million worth of credits; and 585 small retailers claimed $2.63 million of credits in 2022.

## 125. District of Columbia Low-Income Housing Tax Credit

District of Columbia Code: D.C. Official Code § 47-4801- § 47-4812
Sunset Date: None
Year Enacted: 2015

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Business Income Tax Loss | $509 | $525 | $540 | $557 |
| Personal Income Tax Loss | $0 | $0 | $0 | $0 |
| **Total** | **$509** | **$525** | **$540** | **$557** |

DESCRIPTION: The District of Columbia Low-Income Housing Tax Credit (LIHTC) allows investors in qualified, affordable housing developments that receive an allocation of federal LIHTC to also receive a District income tax credit, franchise tax credit, or an insurance premium tax credit, up to 25 percent of the annual federal tax credit. Investors that receive the DC LIHTC can also claim the credit over ten years beginning once the housing project is placed in service and meets certain leasing thresholds. The DC credit is nonrefundable; however, unused credits may be carried forward to any of the 10 remaining subsequent taxable years the investor is eligible for the credit.

The federal LIHTC is currently awarded to certain low-income and mixed-income housing construction or rehabilitation projects through an allocation from the Department of Housing and Community Development (DHCD) or the District of Columbia Housing Finance Agency (DCHFA) when the projects use certain bond financing. The credit is allowed only for the fraction of units serving low-income tenants, subject to a maximum rent.

An owner of a qualified project receiving the DC LIHTC must certify to the Chief Financial Officer (CFO) the amount of credit allocated to the owner. The owner of the qualified project must additionally provide the CFO with the appropriate information so that the low-income housing tax credit can be properly allocated. Owners of the housing development can also sell, transfer, or assign the District LIHTC, provided they file an affidavit with DHCD that they have received an amount that exceeds the lesser of $0.70 per $1.00 in District of Columbia low-income housing tax credit or at least 80 percent of the value of the per dollar price for the federal LIHTCs and that the proceeds have been used to ensure the financial feasibility of the project.

PURPOSE: The District of Columbia LIHTC supports the development and rehabilitation of affordable housing. The Low-Income Housing Tax Credit Program is an investment vehicle created by the Federal Tax Reform Act of 1986, designed to encourage the private sector to invest in the construction and rehabilitation of housing for low—and moderate-income individuals and families.[407]

IMPACT: The LIHTC reduces the cost of investing in qualified low-income housing units. According to the Congressional Research Service (CRS), "Proponents of the credit argue that competitive sale of tax credits by developers to investors and the oversight requirements by housing agencies should prevent excess profits from occurring, and direct much of the benefit to qualified

[407] Department of Housing and Community Development. "Low Income Housing Tax Credit (LIHTC) Program. Available at https://dhcd.dc.gov/page/low-income-housing-tax-credit-lihtc-program

tenants of the housing units. Some critics have argued that the syndication process (the forming of a partnership between a developer and investors) results in a nontrivial portion of LIHTC funding being diverted away from subsidizing construction costs."[408]

## 126. Lower-income, long-term homeownership

District of Columbia Code: D.C. Official Code § 47-1806.09 - § 47-1806.09f
Sunset Date: None
Year Enacted: 2002

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Business Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $1 | $1 | $1 | $1 |
| **Total** | **$1** | **$1** | **$1** | **$1** |

DESCRIPTION: The District offers a lower-income, long-term homeowner credit to eligible residents with a household income equal to or less than 50 percent of the area median income who own an eligible residence (one that receives the homestead deduction) as a principal place of residence and have resided in that home for at least seven consecutive years. Eligible homeowners get a credit on their District of Columbia income tax equal to the difference between the current real property tax bill and 105 percent of their real property tax bill in the prior year.

The credit is refundable, meaning that the taxpayer can get a check for any amount by which the credit exceeds his or her income tax liability. Because household income determines eligibility, the income of anyone who shares the housing—even someone who is unrelated to the taxpayer—counts toward the 50 percent median income cap. To claim the credit, taxpayers must fill out Schedule L, the "Lower Income Long-Term Homeowner Credit."

In tax year 2023, the household income limits ranged from $52,745 for a single-person household to $105,490 for a household of eight people or more.

A review did not identify any tax relief provisions targeted at long-term homeowners in Maryland or Virginia.

PURPOSE: The credit protects lower-income, long-term homeowners in the District of Columbia from rapid increases in real property taxes that could force them to sell their homes and possibly leave the District.

IMPACT: Lower-income, long-term homeowners in the District of Columbia benefit from this provision. In the tax year 2021, 14 tax filers claimed the credit. The credit violates the principle of horizontal equity because lower-income homeowners who have not resided in the same home as a principal place of residence for seven years do not qualify for similar tax relief.

## 127. Property tax circuit breaker

District of Columbia Code: D.C. Official Code § 47-1806.06
Sunset Date: None
Year Enacted: 1977

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Business Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $38,546 | $40,077 | $41,724 | $43,362 |
| **Total** | **$38,546** | **$40,077** | **$41,724** | **$43,362** |

DESCRIPTION: The District's property tax circuit breaker program (also known as "Schedule H") allows low-income homeowners and renters to claim a property tax credit applied to the taxpayer's income tax liability. To qualify, the taxpayer must have been a D.C. resident throughout the taxable year. The credit is refundable; if the amount of the credit exceeds tax liability, the taxpayer receives the excess amount in the form of a refund. The program has been revised substantially since 2014. One of the revisions includes the decision not to use household income to determine eligibility, which is important because taxpayers will no longer have to count the income of anyone who shares their housing – even someone who is unrelated – when applying for the program. Using the income of the tax filing unit (a single person or a family, in essence) expands eligibility and reduces the administrative complexity of the program.

For homeowners, the credit equals the amount by which their property tax bill exceeds a set percentage of household income (the relevant percentage varies with income), up to a maximum of $1,325 in 2023. The maximum credit is adjusted annually for inflation. The Schedule H federal Adjusted Gross Income (AGI) eligibility threshold for those under age 70 increased from $57,600 to $61,300 and from $78,600 to $83,700 for filers aged 70 and older. It is adjusted annually for inflation based on the consumer price index.

For renters, an imputed property tax payment of 20 percent of total rent payments is used to calculate their credit. The renter receives a credit equal to the amount by which his or her imputed property tax payment exceeds a percentage of household income, up to a maximum of $1,325. The maximum credit is also adjusted annually for inflation.

The program is known as a "circuit breaker" because it stops tax liability from increasing once it reaches a certain percentage of income. According to the Institute on Taxation and Economic Policy, 29 states and DC offered a circuit breaker program in 2023. Meanwhile, another 16 states provide property tax credits to some low-income families based on income.[409] In many states, the circuit breaker is available only to the elderly.

Maryland also offers a circuit breaker program. Homeowners with household income up to $60,000 and net worth, not including the value of the property on which you are seeking the credit or any qualified retirement savings or Individual Retirement Accounts, must be less than $200,000, can

[409] Carl Davis and Brakeyshia Samms (May 11, 2023). "Preventing an Overload: How Property Tax Circuit Breakers Promote Housing Affordability", *Institute on Taxation and Economic Policy*, Report, May 2023, p. 2.

claim a credit on taxes that result from the first $300,000 in assessed value. Renters can also qualify for a credit of up to $1,000 based on the assumption that 15 percent of their rent is used to pay property tax. Virginia does not have a circuit-breaker program.

PURPOSE: The credit enhances income security for residents whose property taxes are high relative to their income, such as elderly residents on fixed incomes. Although the tax relief is provided through the income tax system, it is based on the amount by which an individual or family's property tax bill exceeds a specified percentage of income.

IMPACT: Low—to moderate-income individuals and families who own or rent a home in the District of Columbia that serves as their primary residence are the main beneficiaries of this credit. In 2021, 37,133 tax filers claimed the credit, a 5.9 percent increase from the tax year 2019. As shown in the table below, in tax year 2021, 61 percent of tax filers claiming the credit made over $20,000 and claimed more than half of the credit.

## 128. Earned income tax credit

District of Columbia Code: D.C. Official Code § 47-1806.04(f)
Sunset Date: None
Year Enacted: 2000

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Business Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $98,372 | $100,347 | $102,681 | $104,502 |
| **Total** | **$98,372** | **$100,347** | **$102,681** | **$104,502** |

DESCRIPTION: An individual who receives a federal earned income tax credit (EITC) is eligible for a District of Columbia EITC (DC EITC) equal to a percentage of the federal credit. The credit is refundable, meaning that if the taxpayer's credit exceeds their DC income tax liability, they receive the balance as a refund. District taxpayers with qualified dependents who are allowed the federal EITC when filing their federal individual income tax return are eligible for a local EITC equal to 40% of their federal EITC. The Fiscal Year 2022 Budget Support Act of 2021 expanded the DC EITC for families with dependents to the most generous state-funded level in the country, eventually reaching 100% of the federal EITC for tax year 2025 returns. Specifically, the Earned Income Tax Credit as Basic Income Amendment Act of 2021 increases, for filers with a qualifying dependent, the amount of federal EITC matched by DC from 40 percent to 70 percent for tax years 2022 to 2024, 85 percent for tax year 2025, and 100 percent for tax years after 2025. The expansion also allows for monthly payments of a portion of the EITC beginning in tax year 2022. For tax year 2022, recipients will receive 40 percent of the total owed in a lump-sum payment, with the remaining amounts paid in 11-monthly installments. If the remaining credit owed is less than $600, then the recipients will be paid the full credit in one lump sum. After 2022, tax filers owed at least $1,200 will receive the entire amount in equal installments over 12 months, while payments for less than $1,200 will be paid as a lump sum.

The EITC has a phase-in range where the credit increases along with earnings, hits a plateau where the credit remains constant, and then has a phase-out range where the credit falls to zero. The maximum credit amounts for tax year 2024 are $7,830 with three or more qualifying children, $6,960 with two qualifying children, $4,213 with one qualifying child, and $632 with no qualifying children.

Working families with children who have annual income that ranges below $49,084 to $66,819 (depending on marital status and number of children) for tax year 2024 generally are eligible for the federal EITC and investment income of $11,600 or less for the year. In addition, low-income workers without children with incomes below $18,591 ($25,511 for a married couple) can receive a very small federal EITC.[410] In the District, however, the 2014 EITC expansion for childless workers made the maximum credit received by this group at least 100 percent of the federal credit. This expansion widened the earned income range to get the maximum credit from the federal level to a DC-specified earned income range for both unmarried and married childless workers. The expansion also raised the income eligibility limit at which childless workers can receive the credit.

[410] Can the Earned Income Tax Credit Help You? available at https://www.kiplinger.com/taxes/earned-income-tax-credit-awareness.

Before 2014, The federal government modified the federal credit through the American Recovery and Reinvestment Act (ARRA) of 2009. ARRA revised the federal EITC by providing a larger subsidy for families with three or more children and increasing benefits for married couples to reduce a "marriage penalty." Although the ARRA expansions were originally adopted only for 2009 and 2010, Congress extended the provisions through the end of tax year 2017. Those changes are mirrored in the DC EITC.

D.C. EITC program is additionally available to non-custodial parents between the ages of 18 and 30 who comply with a court order for child support payments. Because these taxpayers are not eligible for the federal EITC, they must fill out an additional form (Schedule N, "Non-Custodial Parent EITC Claim") to claim the DC EITC.

Most states (32 of 41) with a broad-based income tax offer their EITCs, including Maryland and Virginia. Maryland offers taxpayers the choice of a 45 percent refundable EITC (100% for childless workers) or a 50 percent non-refundable EITC. Virginia provides a 20 percent non-refundable EITC.[411]

Montgomery County, Maryland, is one of several localities to offer an EITC. Although Montgomery County's EITC was originally designed to equal the taxpayer's state EITC, the percentage was reduced due to budget shortfalls and is set at 95 percent for tax year 2014. The county EITC returned to 100 percent of the state EITC in tax year 2015. However, the County's match for this program is now 56% of the Maryland Refundable Earned Income Tax Credit with the adoption of Resolution 20-184 for the operating budget for fiscal year 2024.

PURPOSE: The credit promotes self-sufficiency among low-income workers, thereby reducing poverty and welfare dependency.

IMPACT: Low-income individuals and families benefit from the credit. During tax year 2021, 74,068 tax filers claimed the DC EITC a 37.7 percent increase in the number of claimants from 2019. Tax filers with income between $10,000 and $30,000 received 62.8 percent of the total share of the credit amount, as shown in the table below.

Researchers have found that the EITC leads to significant increases in employment among single mothers while not reducing the labor supply among those already in the labor market.[412] One estimate is that the EITC lifted 2.5 million children out of poverty nationwide in 2005, more than any other government program.[413] Proponents also note that the EITC is easy to administer; no additional bureaucracy is needed to deliver benefits. The Center on Budget and Policy Priorities notes that "States with EITCs report very low administrative costs with the credit – typically less than 1 percent – which means that nearly every dollar a state spends on the EITC goes to the working families in need of help."[414]

## 129. Child and dependent care

District of Columbia Code: D.C. Official Code § 47-1806.04(c)
Sunset Date: None
Year Enacted: 1977

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Business Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $8,258 | $8,258 | $8,258 | $8,258 |
| **Total** | **$8,258** | **$8,258** | **$8,258** | **$8,258** |

DESCRIPTION: An individual who receives a federal child and dependent care tax credit, as authorized by section 21 of the U.S. Internal Revenue Code (26 U.S.C. § 21), is eligible for a District of Columbia income tax credit equal to 32 percent of the federal credit. The credit is not refundable (it cannot exceed the amount of the individual's tax liability).

The U.S. Internal Revenue Code limits the credit to care provided for a dependent child under 13, a spouse, or certain other dependents incapable of self-care. The care must have been provided so that the taxpayer and his or her spouse if the taxpayer is married, can work or look for work. The care recipient must have lived with the taxpayer for at least half the year. The value of the federal credit ranges from 20 percent to 50 percent (declining as income rises) of dependent care expenses of up to $3,000 for one qualifying individual and $6,000 for two or more qualifying individuals.

The expenses qualifying for the credit must be reduced by the amount of any employer-provided dependent care benefits that the taxpayer excluded from his or her gross income.

Maryland offers a child and dependent care tax credit like the District's: single filers with income up to $30,000 and joint filers with income up to $50,000 receive credits equal to 32 percent of the federal credit. The Maryland credit is gradually phased out over income ranges of $30,001 to $103,650 (single filers) and $50,001 to $161,100 (joint filers). Virginia allows taxpayers who qualify for the federal credit to deduct up to $3,000 in care expenses for one dependent and up to $6,000 for two or more dependents. Virginia allows taxpayers to claim the Virginia deduction even if they couldn't claim the federal credit.

PURPOSE: The credit assists families in paying for child and dependent care so that a parent or caretaker may work or look for work.

IMPACT: Individuals and families eligible for the federal child and dependent care tax credit benefit from the D.C. credit. During the tax year 2021, 13,700 tax filers claimed the credit, a 23.5 percent decline (4,209 tax filers) compared to 2019. The income of many of the credit beneficiaries is between $25,000 and $100,000. Urban Institute researchers have noted that "Because the credit is nonrefundable, under current law, the high credit rates remain elusive. Those for whom the highest credit rates apply rarely owe taxes, and as a result, they rarely receive any benefit from this

provision."[415] The same pattern would apply to the District's credit because it follows the federal rules.

## 130. Early learning child credit

District of Columbia Code: D.C. Official Code § 47-1806.15
Sunset Date: None
Year Enacted: 2018

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Business Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $397 | $413 | $429 | $445 |
| **Total** | **$397** | **$413** | **$429** | **$445** |

DESCRIPTION: The District of Columbia Early Learning Tax Credit (ELC) is a refundable income tax credit enacted in the Fiscal Year 2019 Budget Support Act, effective October 30, 2018 (D.C. Law 22-0168). The ELC is available to taxpayers based on the amount of eligible childcare expenses paid by the taxpayer, up to $1,020 (increased annually according to the cost-of-living adjustment) per eligible child. ELC was originally only available for tax year 2018 for taxpayers earning up to $750,000 annually. The Fiscal Year 2020 Budget Support Act of 2019 extended the credit indefinitely but lowered the maximum income allowed for eligibility to $150,000 per year for those filing single, head of household, or married filing jointly, and $75,000 per year for those married filing separately.

An eligible child must be a dependent of the taxpayer and be 3 or under as of September 31 in the applicable tax year. For example, for the tax year 2018, a child turning 4 between October 1, 2018, and December 31, 2018, was still eligible. Eligible childcare expenses are payments to a qualified child development facility for childcare services provided to an eligible child.

A child development facility is a center, home, or other structure that regularly provides care and other services, supervision, and guidance for children, infants, and toddlers, regardless of its designated name. Child development facilities must be in the District of Columbia and either licensed by the District of Columbia or operated by the federal government or a private provider on federal property.

PURPOSE: The purpose of this act is to assist DC residents with the costs of early childhood care. Research shows that the costs of early childhood care in the District of Columbia are among the highest in the country.[416]

IMPACT: In 2021, 441 tax filers claimed $356,700 in credits for 484 children (a tax filer may claim multiple children). As the distribution below shows, in 2021, just over 49 percent of the total credit awarded went to filers earning $75,000 or higher (up to $150,000). Fewer claimed credit in 2021 compared to 2019, most likely due to the impact of the reduced income eligibility levels. While the reduction in the income eligibility level ensures that the credit is better targeted to lower-income families, a DC-based advocacy group contends that the tax credit is not the best way to

[416] ChildcareAware. "The US and the High Price of Child Care: Examination of a Broken System." 2019 Report. https://info.childcareaware.org/hubfs/2019%20Price%20of%20Care%20State%20Sheets/Final-TheUSandtheHighPriceofChildCare-AnExaminationofaBrokenSystem.pdf; page 18.

improve childcare affordability because the $1,000 credit only offsets a small amount of total annual childcare costs.[417]

## 131. Alternative fuel vehicle conversion and infrastructure credit (personal and business income tax)

District of Columbia Code: D.C. Official Code § 47-1806.12 and § 47-1806.13
Sunset Date: None
Year Enacted: 2015

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Business Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $425 | $425 | $425 | $425 |
| **Total** | **$425** | **$425** | **$425** | **$425** |

DESCRIPTION: An individual can claim a nonrefundable credit in the amount of 50% of the equipment and labor costs directly attributable to the purchase and installation of alternative fuel storage and dispensing or charging equipment on a qualified alternative fuel vehicle refueling property or in a qualified private residence. The maximum credit that can be claimed is $ 1,000 per vehicle charging station for a qualified private residence and $10,000 per qualified alternative fuel vehicle refueling property or vehicle charging station for a qualified alternative fuel vehicle refueling property.

The equipment and labor cost to claim the credit cannot include any land purchases (or land access) to be used as a qualified alternative fuel vehicle refueling property, purchase of an existing qualified alternative fuel vehicle refueling property, or construction or purchase of any structure. The credit claimed cannot exceed the taxpayer's tax liability for the year. If the amount of the tax credit exceeds the tax liability, the excess amount of the credit can be rolled over for up to 2 tax years.

A tax filer can claim a nonrefundable tax credit of 50% of the labor costs directly attributable to the cost of converting a motor vehicle licensed in the District that operates on petroleum diesel or petroleum-derived gasoline to a motor vehicle that operates on an alternative fuel, with a maximum credit of $19,000 per vehicle.

Alternative fuel is fuel used to power a motor vehicle that includes at least 85% ethanol, natural gas, compressed natural gas, liquefied natural gas, liquefied petroleum gas, biodiesel (not kerosene), electricity provided by a vehicle-charging station, or hydrogen.[418] The tax credit is available until December 31, 2026.

Federal income tax credits are also available for the installation of alternative fuel systems. Vehicle refueling and recharging property placed in service in eligible census tracts must be used to store or dispense clean-burning fuel or recharge electric motor vehicles are eligible for a tax credit. Eligible property includes certain fueling equipment for natural gas, propane, hydrogen, electricity, E85, or biodiesel blends of at least 20% (B20+). The tax credit for businesses is 6% with a maximum credit of $100,000 for each single item of property for qualified refueling property subject to depreciation. Businesses meeting prevailing wage and apprenticeship requirements may be eligible for a 30% credit with a maximum credit of $100,000. Consumers who purchase

[418] § 47-1806.12

qualified residential fueling equipment before January 1, 2033, can receive a tax credit of up to $1,000.[419]

Maryland has an electric vehicle supply equipment rebate program for EVSE purchase and installation. The program is calculated by multiplying 50% by the EVSE's purchase and installation price and is capped at the following amounts: 50% up to $700 for residential purchase and installation and 50% up to $5,000 for commercial. For FY 2024, the total rebate program award is capped at $2.5 million. Virginia currently does not have any incentives.

PURPOSE: The legislation aims to radically transform the fuel options available in the District with initiatives that would facilitate a rapid advance in the diversity of fuel sources available.

IMPACT: DC residents will benefit from the credit, as the tax expenditure will transform their fuel options, allowing them to choose cleaner, greener fuel for their vehicles. About 286 tax filers claimed the credit in tax year 2021.

## 132. Opportunity Zone

District of Columbia Code: D.C. Official Code § 47-1801.04(39A), § 47-1801.04(39B), § 47-1801.04(39C), § 47-1801.04(39D) and 47-1803.03(a)(20)
Sunset Date: None
Year Enacted: 2020

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Business Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $1,949 | $2,069 | $638 | ($10,932) |
| **Total** | **$1,949** | **$2,069** | **$638** | **($10,932)** |

DESCRIPTION: Individuals and businesses can benefit from three tax incentives associated with qualified opportunity zones. One, any tax due on capital gains can be deferred temporarily for 180 days after sale if the gains are reinvested in a qualified opportunity fund (QOF). QOF is "an investment vehicle organized as a corporation or a partnership for the purpose of investing in qualified opportunity zone property that holds at least 90 percent of its assets in qualified opportunity zone property or another QOF. Qualified opportunity zone property includes any qualified opportunity zone stock, qualified opportunity zone partnership interest, and qualified opportunity zone business property."[420] Two, the basis of the original gain will increase by 10 percent if the investment in the QOF is held for at least five years. if the investment is held for at least 7 years, the basis of the gain increases by an additional 5 percent. Finally, the third incentive permanently excludes capital gains tax on any gains from the qualified portion of their investment earned within the Opportunity Zone when the QOF investment is sold or disposed of if it is held for at least 10 years and until at least December 31, 2026.[421]

Qualified opportunity zones are specific census tracts in low-income communities designated by the chief executive officer of each state (i.e., the governor) and the District of Columbia. The federal opportunity zone tax incentives are in effect from December 22, 2017, through December 31, 2026.

Nevertheless, DC chose to decouple the capital gains deferral for purposes of District income taxes unless the investment meets certain criteria. These criteria include a requirement that the QOF is certified by the Mayor, that the QOF has invested at least the value of the taxpayer's QOF investment in a qualified opportunity zone (QOZ) located in the District, and that the QOF submits IRS forms 8996 and 8997 to the Office of Tax and Revenue. To be certified by the Mayor, the QOF must submit documentation showing the QOF has invested in a business or property that has received a grant, loan, or tax incentive from the District; has invested in an economic development project managed, owned, or disposed of by the District; has received the support of the Advisory Neighborhood Commission where the investment is located; or that has received at least a score of 75 on the Urban Institute Opportunity Zone Community Impact Assessment Tool. The subtitle also requires that the Office of Tax and Revenue collect data related to taxpayers claiming Opportunity

[421] Ibid, p. 571.

Zone tax benefits and provide it in an anonymized format to the Office of the Deputy Mayor for Planning and Economic Development (DMPED).[422]

PURPOSE: Opportunity Zone tax incentives were enacted through the Tax Cuts and Jobs Act of 2017 to spur "economic growth and investment in distressed communities by providing federal tax benefits to businesses and investment located within designated boundaries."[423]

IMPACT: CRS notes that "[O]pportunity Zone tax incentives are designed to be broad incentives to retain investment in or shift investment toward specific geographic areas. Thus investors, who are likely in higher-income and long-term capital gains tax brackets, are the direct beneficiaries. The benefits accrued from investments in QOFs are staggered over time, which could encourage long-term, "patient" capital for development projects in areas that could be classified as higher risk by lenders and financers."[424]

# REAL PROPERTY TAX

***Real Property Tax***
*Abatements*

## 133. New residential developments

District of Columbia Code: D.C. Official Code § 47-857.01 - § 47-857.10
Sunset Date: None
Year Enacted: 2002

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $291 | $291 | $291 | $291 |

DESCRIPTION: The Mayor is authorized to grant up to $8 million annually in real property tax abatements for new residential developments. The tax abatement for any eligible property expires at the end of the 10th tax year after the tax year in which a certificate of occupancy is issued. An eligible property must be improved by new structures or undergo rehabilitation, with 10 or more units devoted to residential use.

The $8 million annual limit is divided among projects in three areas: (1) $2.5 million in tax abatements for new housing projects and new mixed-income housing projects downtown, (2) $2 million in tax abatements for new housing projects and new mixed-income housing projects in Housing Priority Area A ("Mount Vernon Square North"), and (3) $3.5 million in tax abatements for new, mixed-income housing projects in other parts of the District of Columbia, which includes a set-aside of up to $500,000 for real property located in square 2910.[425]

The amount of tax relief varies according to the property's location and other factors, such as the type of construction and the percentage of affordable housing units. The program's rules are outlined in Title 10-B, Chapter 59 of the D.C. Municipal Regulations. The Office of the Deputy Mayor for Planning and Economic Development administers the program.

A property that receives a tax abatement for vacant rental housing (see tax expenditure #214) or receives tax-increment financing is not eligible for the new residential development abatements.

PURPOSE: The regulations state that the program's purpose is "to provide tax abatements as incentives for the production of new housing downtown and for the production of affordable, mixed-income housing in high-cost areas of the District of Columbia."[426]

IMPACT: The tax abatements are intended to deliver broad-based benefits by promoting the growth of mixed-income communities with commercial and residential uses, thereby strengthening the District's economic and tax base.[427] In particular, the downtown and Mount Vernon Square North areas are targeted beneficiaries of the program.

[425] Square 2910 is bounded by Kansas Avenue, Upshur Street, Georgia Avenue, and Taylor Street in Northwest D.C.
[426] See Title 10-B, Section 5900 of the D.C. Municipal Regulations.
[427] This summary draws on the Council of the District of Columbia, Committee on Finance and Revenue, "Committee Report on Bill 14-183, the 'HomeStart Financial Incentives Act of 2001," dated November 13, 2001.

Revenue loss may decline during FY 2024-2027 because some properties are reaching the end of the 10-year eligibility period. The abatements violate the principle of horizontal equity because similar developments in other parts of the city do not qualify for equivalent tax relief.

***Real Property Tax***
*Abatements*

## 134. NoMA residential developments

District of Columbia Code: D.C. Official Code § 47-859.01 - § 47-859.05
Sunset Date: None
Year Enacted: 2009

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $1,994 | $0 | $0 | $0 |

DESCRIPTION: The Mayor is authorized to grant up to $5 million annually and $50 million in total real property tax abatements for new residential developments in the North of Massachusetts Avenue (NoMA) neighborhood of Wards 5 and 6. The tax abatement for any eligible property expires at the end of the 10th tax year after the tax year in which a certificate of occupancy is issued. An eligible property must be improved by new structures or undergo rehabilitation and have 10 or more units devoted to residential use.

The tax abatement is set at $1.50 per residential floor-area ratio per square foot, multiplied by the total square footage as certified by the project architect and the Mayor. The program's rules are outlined in Title 10-B, Chapter 62 of the D.C. Municipal Regulations. The Deputy Mayor for Planning and Economic Development administers the program.

A property that claims a tax abatement for vacant rental housing (see tax expenditure #214) or receives tax-increment financing is not eligible for the NoMA abatements.

PURPOSE: The abatements are intended to encourage new multi-family residential development in the NoMA neighborhood. Noting that residential development had slowed considerably due to a weakening economy and credit crunch, the Council's Committee on Finance and Revenue stated in its report on the authorizing legislation that "The tax abatement bill would give an incentive to new builders to break ground and create new residential development in the NoMA area. The tax incentives contained in the bill are modeled after the successful Housing Act of 2002."[428] (See tax expenditure #133, "New residential developments").

IMPACT: Housing developers and residents of the new housing developments stand to benefit from the tax abatements, which are also intended to have broader benefits by strengthening the District's economic and tax base. The abatements violate the principle of horizontal equity because similar developments in other parts of the city do not qualify for equivalent tax relief.

Two developments currently receive this abatement (See table on the following page). Two other developments received this abatement until March 31, 2024. The revenue loss from the tax abatements will be constant until the first projects to receive the abatement reach their 10th, and after that, the projected revenue loss will decrease.

[428] Council of the District of Columbia, Committee on Finance and Revenue, Report on Bill 18-18, the "NoMA Residential Development Tax Abatement Act of 2009," March 16, 2009, p. 2.

## 135. Affordable Housing in High-Need Affordable Housing

District of Columbia Code: D.C. Official Code § 47-860
Sunset Date: None
Year Enacted: 2021

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2025 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $200 | $4,125 | $4,125 | $4,125 |

DESCRIPTION: The Mayor is authorized to grant real property tax abatements to affordable housing projects. Eligible properties must contain or be developed with at least 350 housing units, rent at least one-third of the units at a level affordable at 80 percent of the area median income,[429] and be in an area designated through the District's Housing Equity Report[430] as having a high need for affordable housing (Rock Creek West, Rock Creek East, Capitol Hill, and Upper Northeast). Moreover, the developer must enter land covenants, agree to use Certified Business Enterprises[431] for 35 percent of project operations (but not construction costs), and agree to First Source hiring requirements[432] for project operations (but not construction costs). Finally, the mayor will use a competitive process to select the eligible projects that would receive the abatements.

The abatement would begin the tax year immediately following the year the project receives a certificate of occupancy and can continue for 40 years. The abatement becomes effective in fiscal year 2024. The program is also capped at $200,000 in 2024 and $4 million annually thereafter.

PURPOSE: The abatement encourages the development of affordable housing in neighborhoods with a "high need for affordable housing" and little to no available housing for low-income residents.

IMPACT: Once the abatement takes effect, it should increase the supply of affordable housing in DC.

[429] As set forth in section 2(1) of the Housing Production Trust Fund Act of 1988, effective March 16, 1989 (D.C. Law 7-202; D.C. Official Code § 42-2801(1)).

*Abatements*

## 136. Urban farming and food security

District of Columbia Code: D.C. Official Code § 47-868
Sunset Date: None
Year Enacted: 2014

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $90 | $90 | $90 | $90 |

DESCRIPTION: If a landowner uses, leases, or allows it to be used by an unrelated party for an agricultural purpose, 90 percent of the real property tax on the land value of the relevant portion of the real property can be abated for each real property tax year that the real property is used for agricultural use. To be eligible to apply for an abatement, an applicant must, before the property is used as an urban farm, submit a proposed annual planting plan to the Department of Energy and Environment (DOEE) for approval. The annual planting plan must produce a food commodity or put it to another season-appropriate agricultural-related use (like providing cover cropping, a beehive, or growing seedlings in a greenhouse).

For improvement, real property is not fully used as an urban farm; the portion of the improvement in use as an urban farm is abated. It is computed by dividing the square footage of the portion of the improvement used for urban farming by the gross building area of the improvement.

The abatement cannot exceed the real property tax liability on which the urban farm is located and is capped 20,000 per parcel of real property, per tax year. Subtitle (VI)(M), The Urban Agriculture Funding Amendment Act of 2020, in The Fiscal Year 2021 Budget Support Act of 2020, limits the total real property tax abatements to $150,000 per year beginning in FY 2021. The FY 2022 Urban Agriculture Funding Amendment Act further reduced the maximum annual real property tax abatements to $90,000. The Department of 'Energy and Environment's Office of Urban Agriculture certifies properties to receive abatements.

Food commodity means vegetables, fruits, grains, mushrooms, honey, herbs, nuts, seeds, or rootstock grown in the District by urban farming or by a community garden that is intended to be used as food in its perishable state and is approved by regulatory authorities.

In 2014, Maryland enacted the Urban Agricultural Property Tax Credit, which authorizes counties and the city of Baltimore to implement a property tax credit for urban land used for agricultural purposes. The real property must be between one-eighth of an acre and five acres. To qualify for the tax credit, the real property must be used for urban agricultural purposes, may not be used for any other for-profit purpose that would subject the parcel to property tax liability, and produce agricultural products valued at at least $2,500 per tax year. The credit is capped at $5,000 for each applicant per fiscal year.

PURPOSE: This tax expenditure aims to encourage urban farming, improve access to fresh and healthy food in the District, and promote the productive use of District property.

IMPACT: The provision will benefit property owners and residents because the district now has more healthy foods available. In FY 2024, the DOEE's Office of Urban Agriculture certified 12 properties.

| Year | Number of properties certified |
|---|---|
| 2019 | 2 |
| 2020 | 3 |
| 2021 | 4 |
| 2022 | 8 |
| 2023 | 13 |
| 2024 | 12 |

*Abatements*

## 137. Tax abatement for housing in Downtown

District of Columbia Code: D.C. Official Code § 47-860.01-§ 47-860.04
Sunset Date: None
Year Enacted: 2022

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $2,500 | $2,500 | $2,500 | $2,500 |

DESCRIPTION: The program provides a 20-year tax abatement to incentivize property owners to convert all or part of their property from commercial to residential uses in eligible downtown areas. The conversions must yield a minimum of 10 affordable housing units for households earning 60% or less of the median family income for at least 20 years or at least 18% of the affordable housing units developed for households earning 80% or less of the median family income during the abatement period.

Eligibe areas include the geographic area bounded by a line starting at the intersection of the center line of Massachusetts Avenue, N.W., and the center of Dupont Circle, N.W.; continuing southeast along the center line of Massachusetts Avenue, N.W., to the center line of North Capitol Street, N.W.; continuing south along the center line of North Capitol Street, N.W., to the center line of Constitution Avenue, N.W.; continuing west along the center line of Constitution Avenue, N.W., to the center line of 15th Street, N.W.; continuing north along the center line of 15th Street, N.W. to the center line of Pennsylvania Avenue, N.W.; continuing west along the center line of Pennsylvania Avenue, N.W., to the center of Washington Circle, N.W.; continuing northeast along the center line of New Hampshire Avenue N.W., to, and terminating at, the intersection of the center line of Massachusetts Avenue, N.W., and the center of Dupont Circle, N.W. (the starting point); and any other portion of the central business district designated by the Mayor.

Other requirements to be eligible for the tax abatement includes filing a covenant in the land records of the District, binding on the owner and all of its successors to follow the affordable housing units requirements of the Inclusionary Zoning Program; the property owner must, at a minimum, contract with certified business enterprises for at least 35% of the contract dollar volume of the construction and operations of the project; the property owner must enter into a First Source Agreement for the operation of the project; a reservation letter must be submitted to the Mayor stating that the proposed development or redevelopment project is eligible for the tax abatement, setting forth the expected amount of the abatement, as determined pursuant to § 47-860.03(a), and reserving that amount for the project; the Mayor transmits to the owner the eligibility and reservation letter requested with the conditions imposed and the abatement cap set by the Mayor; and the property owner has received a certificate of occupancy within 24 months after the date the eligibility and reservation letter was transmitted. The certification deadline could be extended at the Mayor's discretion.

PURPOSE: According to the FY 2023 Budget Support Act of 2022, the purpose behind the abatement is to incentivize the conversion of currently commercial properties to residential uses.[433]

[433] Fiscal Year 2023 Budget Support Act of 2022, Council of the District of Columbia Committee of the Whole Committee Report.

IMPACT: Property owners will benefit from the provision. Residents will also benefit from the provision because of the increase in affordable housing available in the District.

***Real Property Tax***
*Exemptions*

## 138. Development of a qualified supermarket, restaurant, or retail store

District of Columbia Code: D.C. Official Code § 47-1002(23)
Sunset Date: None
Year Enacted: 1988

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $1,506 | $1,497 | $1,509 | $1,527 |

DESCRIPTION: A qualified supermarket, restaurant, or retail store is eligible for a real property tax exemption for 10 consecutive years beginning with the tax year in which a certificate of occupancy was issued for the development. Qualified supermarkets, restaurants, and retail stores must be in census tracts where more than half of the households have incomes below 60 percent of the area median, as determined by the U.S. Department of Housing and Urban Development. The property must continue to be used for the original purpose to maintain the exemption.

If the real property is not owned by the supermarket, restaurant, or retail store, the owner of the property can qualify for the real property tax exemption (also valid for 10 years) if the owner leases the land or structure to the supermarket at a fair-market rent that is reduced by the amount of the tax exemption. The authorizing statute also provides that a qualifying supermarket, restaurant, or retail store that leases real property that is part of a larger development can receive a rebate from the D.C. government for its pro-rata share of the property tax paid if the owner of the property has already paid the tax. However, the authorizing statute provides that any new exemptions for a qualified restaurant or retail store beginning on or after October 1, 2010, shall not be granted "until the fiscal effect of any such new exemptions is included in an approved budget and financial plan."[434]

PURPOSE: This exemption encourages the construction and operation of supermarkets, restaurants, and retail stores in lower-income areas of the city to decrease food deserts. Thus, D.C. residents' access to healthy food will increase, leading to longer-term improvements in their health outcomes.

IMPACT: This provision benefits individuals and organizations constructing and operating supermarkets, restaurants, and retail stores in the target areas, as do residents of these areas. In 2023, four supermarkets claimed the exemption.[435] The exemption violates the horizontal equity principle because other businesses in the target areas do not receive a similar exemption. The forgone revenue estimates are based on experience, suggesting that two more supermarkets will qualify yearly.

[434] See D.C. Official Code § 47-3802(b)(1), as amended by D.C. Law 20-61, the "Fiscal Year 2014 Budget Support Act of 2013," effective December 24, 2013.
[435] Unified Economic Development Budget Report: Fiscal Year 2023 Year-End, March 2024, Appendix I. Pgs. 48-57.

A 2018 report reviewing the District's economic development tax expenditures provided more detail on the District supermarkets' tax incentives.[436] That analysis found that almost $29 million of forgone District revenues could not be shown to have affected supermarkets' location decisions, generally, or produced economic or other benefits that would not have happened but for the incentives. As such, the report recommended that policymakers should consider changing the supermarket tax incentives to better target supermarkets that would not otherwise locate in an area of highest.

## 139. BID corporations

District of Columbia Code: D.C. Official Code § 47-4668
Sunset Date: None
Year Enacted: 2018

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | n/a | n/a | n/a | n/a |

DESCRIPTION: Business Improvement District (BID) corporations are nonprofit corporations organized pursuant to the District law for nonprofit corporations conducting Business Improvement District activities (BID activities) in a BID. A BID is organized and established by property and business owners to enhance the economic vitality of a downtown or neighborhood commercial area. It is designed and conducted to avoid any material adverse impact on adjoining residential neighborhoods. The cost of BID services is financed by a self-imposed tax on the businesses within the community.

BID expenditures are used primarily for purchasing supplemental services, which include maintaining commercial corridors through litter and graffiti removal and landscaping to supplement city services; increasing security through the presence of ambassadors who walk the commercial district; promoting the commercial district and businesses operating therein; providing homeless and youth services; and making capital investments to supplement city services.[437]

Currently, there are eleven established business improvement districts (Adams Morgan Partnership; Anacostia BID; Capitol Hill (BID); Capitol River Front BID; DowntownDC; Dupont Circle BID Office; Georgetown (BID); Golden Triangle; Mount Vernon Triangle DC; NoMa BID; and Southwest BID), which provide programs that address commercial District-wide issues, such as cleanliness, maintenance, safety, promotion, economic development, and other collective business issues in their coverage areas. The Department of Small and Local Business Development manages the certification of BIDs and the BID charter extension process. The Council authorizes the BID taxes, collected by the District government and remitted to the BID.[438]

PURPOSE: The purpose of this provision is to exempt Business Improvement Districts from taxation. Previous law does not provide a tax exemption for BIDs; therefore, the legislation must exempt BIDs from paying any sales, use, franchise, gross sales or receipts, income, personal or real property, transfer, or excise taxes.[439] Natalie Avery, the Executive director of DC BID Council, testified to the Council during the public hearing on Bill 22-0585, the "Business Improvement Districts Tax Exemption Amendment Act of 2018," that “from 1996 through 2007 there was language in the District's annual appropriation bill that exempted BIDs from paying taxes levied

[437] Business Improvement Districts (BIDs), Department of Small and Local Business Development, August 25, 2022, available at https://dslbd.dc.gov/service/business-improvement-districts-bids
[438] Ibid.
[439] Council of the District of Columbia Committee on Business and Economic Development Committee Report (March 27, 2018). Report on Bill 22-0585, the “Business Improvement Districts Tax Exemption Amendment Act of 2018”. Available at https://lims.dccouncil.us/Legislation/B22-0585.

by the District of Columbia based on the following rationale: BIDs are funded by an additional real property tax imposed by the District of Columbia on non-exempt properties in BID areas and provide enhanced public services that contribute to the economic and social health of the city. She further stated that imposing District of Columbia taxes on BIDs would result in a significant reduction in public services customarily provided by BIDs to DC neighborhoods. In addition, the Office of Tax and Revenue stopped renewing BID tax exemption certificates in September 2017, thus the legislation is very important for BIDs to be exempted from certain taxes."[440]

IMPACT: BIDs benefit from this legislation.

## 140. Educational institutions

District of Columbia Code: D.C. Official Code § 47-1002(10)
Sunset Date: None
Year Enacted: 1942

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $175,658 | $170,891 | $169,545 | $169,147 |

DESCRIPTION: Buildings belonging to and operated by schools, colleges, or universities "not organized or operated for private gain, and which embrace the generally recognized relationship of teacher and student" are exempt from real property taxation.

Exempting educational institutions from the real property tax is standard practice throughout the United States. Both Virginia and Maryland exempt educational institutions from real property taxation.

PURPOSE: The exemption supports a general policy of providing property tax exemptions to non-profit organizations that provide religious, charitable, social, scientific, literary, educational, or cultural benefits to the public.

IMPACT: Educational institutions benefit directly from the exemption, which is also expected to provide broader societal benefits such as a better-informed citizenry and a more productive workforce. During the tax year 2024, 461 properties received the educational institution's exemption.[441]

Educational institutions account for 7.4 percent of the total assessed value of tax-exempt property in the District of Columbia.[442] The tax exemptions given to certain properties shift the burden of paying for public services to taxable properties and may result in those properties paying a higher tax rate.

[441] Real Property Tax Administration Properties Exempt from taxation in TY 2024 for Tax Types: DC, E0-E9 and US. Available at https://otr.cfo.dc.gov/sites/default/files/dc/sites/otr/publication/attachments/Properties_Exempt_From_Taxation_in_2024.pdf

[442] In the tax year 2024, the tax-exempt property of educational institutions was valued at almost 9.3 billion. The total value of tax-exempt properties in the District of Columbia was $125.8 billion. From "Tax Facts 2024." Office of Revenue Analysis, OCFO. https://ora-cfo.dc.gov/page/dc-tax-facts, p. 52.

*Exemptions*

## 141. Higher education institutions

District of Columbia Code: D.C. Official Code § 47-1002(10A)
Sunset Date: None
Year Enacted: 2016

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $130 | $134 | $138 | $142 |

DESCRIPTION: Buildings belonging to a foundation that is not organized or operated for private gain and that is organized and operated exclusively for the benefit of a college or university that directly uses the building under a lease from the foundation with a term of at least one year to provide dormitory, classroom, and related facilities for its students is exempted from real property taxes.

According to the committee report, some states nationwide do not allow state-funded institutions to own property outside the state. In response to these laws, the institutions establish non-profit foundations. The legislation allows public and private higher education institutions to own property through their foundation in the District and receive a real property tax exemption. Institutions can establish satellite campuses in the District providing housing and courses to students.

PURPOSE: The exemption supports a general policy of providing property tax exemptions to non-profit organizations that provide education to the public.

IMPACT: Foundations benefit directly from the exemption, which is also expected to provide broader societal benefits such as a better-informed citizenry and a more productive workforce.

***Real Property Tax***
*Exemptions*

## 142. Libraries

District of Columbia Code: D.C. Official Code § 47-1002(7)
Sunset Date: None
Year Enacted: 1942

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $480 | $488 | $503 | $515 |

DESCRIPTION: Library buildings that belong to and are operated by organizations that are not organized or operated for private gain and are open to the public generally are exempt from real property taxation.

It is unclear whether private, non-profit libraries in other states are exempt from real property taxation. Libraries may qualify for real property exemptions granted to educational institutions or art and cultural organizations, depending on the specific definitions of those categories in each state and how the statutory language has been interpreted.

PURPOSE: The exemption supports a general policy of providing property tax exemptions to non-profit organizations that provide religious, charitable, social, scientific, literary, educational, or cultural benefits to the public.

IMPACT: Libraries benefit from the exemption, but there may be a wider social benefit because the libraries are open to the public and provide opportunities for learning and enrichment to the general populace. Presently, the Folger Shakespeare Library is the only library that qualifies for this exemption.

## *Real Property Tax*
*Exemptions*

# 143. Embassies, chanceries, and associated properties of foreign governments

District of Columbia Code: D.C. Official Code § 47-1002(3)
Sunset Date: None
Year Enacted: 1942

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $123,048 | $125,081 | $128,868 | $131,988 |

DESCRIPTION: Property belonging to foreign governments and used for diplomatic purposes is exempt from real property taxation in the District of Columbia. To claim the exemption, a foreign government must send a diplomatic note to the U.S. Department of State's Office of Foreign Missions, which submits the request for property tax exemption to the D.C. government along with a "Foreign Government Information Request Form" completed by the foreign government.[443]

Exempting embassies and chanceries from real property taxation is standard practice, but such property is concentrated in D.C. and New York City. Neighboring jurisdictions such as Montgomery County, Arlington County, and Fairfax County exempt the property of foreign governments from the real property tax.

PURPOSE: The purpose of the exemption is to uphold a principle of international law that foreign governments are entitled to a tax exemption for real property owned by the foreign government and used by its diplomatic mission. Any portion of the property that is not used for diplomatic or consular purposes is not exempt from the District's real property tax.

IMPACT: Foreign governments that own embassies, chanceries, and associated properties in the District of Columbia benefit from this exemption. During tax year 2024, 631 properties[444] received the exemption for embassies, chanceries, and associated properties of foreign governments. These properties account for 5.6 percent of the total assessed value of tax-exempt property in the District of Columbia.[445]

[443] U.S. Department of State, Office of Foreign Missions, "Diplomatic Note 06-01," dated April 12, 2006.
[444] Real Property Tax Administration Properties Exempt from taxation in TY 2024 for Tax Types: DC, E0-E9 and US. Available at https://otr.cfo.dc.gov/sites/default/files/dc/sites/otr/publication/attachments/Properties_Exempt_From_Taxation_in_2024.pdf
[445] In tax year 2024, tax-exempt property of foreign governments was valued at $7.1 billion. The total value of tax-exempt property in the District of Columbia was valued at $125.8 billion. From "Tax Facts 2024." Office of Revenue Analysis, OCFO. https://ora-cfo.dc.gov/page/dc-tax-facts, p. 52.

*Exemptions*

## 144. Federal government property

District of Columbia Code: D.C. Official Code § 47-1002(1)
Sunset Date: None
Year Enacted: 1942

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $1,188,257 | $1,129,878 | $1,100,251 | $1,081,091 |

DESCRIPTION: Property belonging to the United States is exempt from real property taxation in the District of Columbia "unless the taxation of same has been authorized by Congress."[446]

PURPOSE: This exemption recognizes the federal government's immunity from taxation by states or municipalities. This immunity has been established in numerous court decisions, beginning with *McCulloch v. Maryland*, 17 U.S. 316 in 1819, and has been reinforced in other cases including *Clallam County v. United States*, 263 U.S. 341 in 1923; *Cleveland v. United States*, 323 U.S. 329, 333 in 1945; *United States v. Mississippi Tax Commission*, 412 U.S. 363 in 1973; and *United States v. Mississippi Tax Commission*, 421 U.S. 599 in 1975.

IMPACT: The United States government benefits from this exemption. During tax year 2024, 2,958 properties[447] received the federal government exemption. These properties account for 50.4 percent of the total assessed value of tax-exempt property in the District of Columbia.[448]

[446] See D.C. Official Code § 47-1002(1).
[447] Real Property Tax Administration Properties Exempt from taxation in TY 2024 for Tax Types: DC, E0-E9 and US. Available at https://otr.cfo.dc.gov/sites/default/files/dc/sites/otr/publication/attachments/Properties_Exempt_From_Taxation_in_2024.pdf
[448] In tax year 2024, tax-exempt property of the U.S. government was valued at $63.4 billion. The total value of tax-exempt property in the District of Columbia was valued at $125.8 billion. From "Tax Facts 2024." Office of Revenue Analysis, OCFO. https://ora-cfo.dc.gov/page/dc-tax-facts, p. 52.

*Exemptions*

## 145. District of Columbia government property

District of Columbia Code: D.C. Official Code § 47-1002(2)
Sunset Date: None
Year Enacted: 1942

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $301,986 | $287,150 | $279,620 | $274,751 |

DESCRIPTION: "Property belonging to the District of Columbia and used for governmental purposes (as determined by the Mayor), unless otherwise provided by law" is exempt from taxation in the District of Columbia.[449]

PURPOSE: This exemption recognizes the District government's exemption from its property tax.

IMPACT: The District of Columbia benefits from this exemption. During the tax year 2024, 3,267 properties[450] received the District government exemption. These properties account for 14.7 percent of the total assessed value of tax-exempt property in the District of Columbia.[451]

[449] See D.C. Official Code § 47-1002(2).
[450] Real Property Tax Administration Properties Exempt from taxation in TY 2024 for Tax Types: DC, E0-E9 and US. Available at https://otr.cfo.dc.gov/sites/default/files/dc/sites/otr/publication/attachments/Properties_Exempt_From_Taxation_in_2024.pdf
[451] In tax year 2024, tax-exempt property of the D.C. government was valued at $18.4 billion. The total value of tax-exempt property in the District of Columbia was valued at $125.8 billion. From "Tax Facts 2024." Office of Revenue Analysis, OCFO. https://ora-cfo.dc.gov/page/dc-tax-facts, p. 52.

***Real Property Tax***
*Exemptions*

## 146. Miscellaneous properties

District of Columbia Code: Title 47 of the D.C. Official Code, Chapters 10 and 46
Sunset Date: Varies[452]
Year Enacted: Multiple years

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $63,215 | $62,825 | $63,333 | $64,108 |

DESCRIPTION: This tax expenditure includes (1) properties that qualify for a tax exemption based on multiple categories and (2) individual properties that were granted statutory exemptions but did not fall into any of the other categories of tax-exempt property, such as non-profit educational institutions, non-profit hospitals, and charitable organizations. Real property exemptions for individual properties are found in Chapter 10 ("Property Exempt from Taxation") and Chapter 46 ("Special Tax Incentives") of Title 47 ("Taxation, Licensing, Permits, Assessments, and Fees") of the D.C. Official Code.

An example of property that would qualify as exempt based on multiple categories is land owned by the Washington Metropolitan Area Transit Authority (tax-exempt), which is the site of a tax-exempt affordable housing development.

PURPOSE: The purpose of the exemptions is to reflect special circumstances that were determined to justify a real property tax exemption by the D.C. Council or the U.S. Congress.

IMPACT: The property owners who benefit from these tax exemptions represent a diverse array of organizations and commercial enterprises. During tax year 2024, 642 tax-exempt properties fell into the miscellaneous category. These properties account for 14.5 percent of the total assessed value of tax-exempt property in the District of Columbia.[453] The tax exemptions given to certain properties shift the burden of paying for public services to taxable properties and may result in those properties paying a higher tax rate.

Examples of organizations that have been awarded individual tax exemptions include the Basilica of the National Shrine of the Immaculate Conception, the National League of American Pen Women, the American College of Cardiology and American College of Cardiology Foundation, the National Education Association, the Young Men's Christian Association, the Woolly Mammoth Theatre Company, the Rosedale Conservatory, the Capitol Hill Community Garden Land Trust, and the Audi Soccer Stadium. A full listing of the local individual tax exemptions and abatements is located on pages xxxii-xxxvi.

[452] Some of the individual properties have sunset dates for their tax exemptions, but the more common restriction is that the exemption is valid so long as the property continues to be used for the same purpose as when the exemption was granted.
[453] In tax year 2024, tax-exempt miscellaneous properties were valued at $14.5 billion. The total value of tax-exempt property in the District of Columbia was valued at $125.8 billion. From "Tax Facts 2024." Office of Revenue Analysis, OCFO. https://ora-cfo.dc.gov/page/dc-tax-facts, p. 52.

Several international organizations with tax-exempt property fall into this category, including the World Bank, the International Monetary Fund, and the Inter-American Development Bank.

***Real Property Tax***
*Exemptions*

## 147. Hospital buildings

District of Columbia Code: D.C. Official Code § 47-1002(9)
Sunset Date: None
Year Enacted: 1942

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $16,431 | $16,703 | $17,209 | $17,625 |

DESCRIPTION: Hospital buildings that belong to and are operated by organizations "which are not organized or operated for private gain" are exempt from real property taxation.[454]

Exempting non-profit hospitals from the real property tax is standard practice throughout the United States. Virginia and Maryland exempt non-profit hospitals from real property taxation, but Maryland's exemption is limited to 100 acres of real property.

PURPOSE: The exemption supports a general policy of providing property tax exemptions to non-profit organizations that provide religious, charitable, social, scientific, literary, educational, or cultural benefits to the public.

IMPACT: The exemption benefits non-profit hospitals, but the public is also intended to benefit from this subsidy to hospital care. During the tax year 2024, 8 properties received the hospital building exemption.

Hospitals account for 0.5 percent of the total assessed value of tax-exempt property in the District of Columbia.[455] The tax exemptions given to certain properties shift the burden of paying for public services to taxable properties and may result in those properties paying a higher tax rate.

[454] See D.C. Official Code § 47-1002(9).
[455] In tax year 2024, tax-exempt property of hospitals was valued at $596.4 million. The total value of tax-exempt property in the District of Columbia was $125.8 billion. From "Tax Facts 2024." Office of Revenue Analysis, OCFO. https://ora-cfo.dc.gov/page/dc-tax-facts, p. 52.

***Real Property Tax***
*Exemptions*

## 148. Historic property

District of Columbia Code: D.C. Official Code § 47-842 - § 47-844
Sunset Date: None
Year Enacted: 1974

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $0 | $0 | $0 | $0 |

DESCRIPTION: The D.C. Council is authorized to grant tax relief to the owners of buildings designated as historic by the Historic Preservation Review Board.[456] The tax relief is provided through agreements between the D.C. government and the property owners lasting at least 20 years to assure the continued maintenance of the historic buildings.

The authorizing statute provides that the agreements "shall, as a condition for tax relief, require reasonable assurance that such buildings will be used and properly maintained and such other conditions as the Council finds to be necessary to encourage the preservation of historic buildings."[457] If the conditions for the exemption are not fulfilled, the D.C. government can seek recovery of back taxes with interest.

Montgomery County provides a Historic Preservation Tax Credit against the real property tax, equal from 10 to 25 percent of the amount expended by the taxpayer for restoring or preserving a historic property. Maryland and Virginia offer state historic preservation tax credits against other taxes (personal income, corporate income, insurance premiums taxes in both states and the bank franchise tax in Virginia).

PURPOSE: This provision protects historic buildings and landmarks in the District of Columbia, preserves the city's historic, aesthetic, and cultural heritage, fosters civic pride, and enhances the city's attractiveness to visitors, thereby promoting economic development.

IMPACT: The tax relief directly benefits the owners of historic buildings, but there may be a broader benefit to D.C. residents from the preservation of the city's cultural and social history and neighborhood beautification and improvement.

As of 2021, only one property has received partial tax exemptions due to its historical status. Therefore, the revenue loss estimate is for the historic property, the Potomac Boat Club, at 3530 K Street, N.W.[458]

[456] Although the statute cites the Joint Committee on Landmarks of the National Capital as the designating authority, the Joint Committee was replaced by the Historic Preservation Review Board in 1978.
[457] See D.C. Official Code § 47-844.
[458] Recently, the property has received zero tax relief. It was fully billed, and a full payment was made in the second half of FY 2021 and FY 2022. According to MITS, the exemption period ended 3/31/21. However, there was an abatement application submitted for the property on 5/3/21. The status of the application is unknown. If the application is denied, there is no forgone revenue.

***Real Property Tax***
*Exemptions*

## 149. Homestead deduction

District of Columbia Code: D.C. Official Code § 47-850
Sunset Date: None
Year Enacted: 1978

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $73,471 | $73,472 | $75,603 | $77,872 |

DESCRIPTION: Taxpayers who live in their own homes in the District of Columbia may take a homestead deduction that reduces the taxable value of their home. The homestead deduction is $87,050 for tax year 2024. Annual cost-of-living adjustments to the homestead deduction were suspended for several years due to the budget crisis that resulted from the economic recession, but the adjustments resumed on October 1, 2012.

To qualify for the homestead deduction, a taxpayer must apply with the Office of Tax and Revenue. Only homes with five or fewer dwelling units, including the unit occupied by the owner, are eligible. Taxpayers may not claim the deduction for more than one home.

The FY 2023 Budget Support Act of 2022 provides a separate deduction for veteran homeowners with permanent disability. The law allows veterans certified as having a total and permanent disability to deduct $445,000 from the assessed value of their homestead property, reducing the tax obligation for that property. Homeowners requesting such a deduction must apply to the Office of Veteran's Affairs (OVA), and qualified applicants must be certified by OVA to the Office of Tax and Revenue (OTR). A real property receiving this deduction would no longer be eligible for the reduction in tax liability for persons over age 65 and those with disabilities, and the owner-occupied residential tax credit (the homestead deduction). The law also exempts the disabled veterans' homestead from the requirement that residential property's taxable assessments cannot be less than 40 percent of the current year's assessed value.

Although neighboring jurisdictions in Maryland and Virginia provide a variety of property tax reductions to homeowners, they do not offer a provision like the District's homestead deduction. Maryland offers a "circuit breaker" program that allows credits against a homeowner's property tax bill if property taxes exceed a certain percentage of gross income.[459] Additionally, Maryland allows counties to grant property tax exemptions like a homestead deduction. The Virginia Constitution authorizes localities to grant real property tax exemptions or deferrals to the elderly and disabled homeowners (subject to conditions established in statute by the Virginia General Assembly, but Virginia law does not allow a homestead exemption similar to the District's). The Virginia Constitution also mandates that localities grant a real property tax exemption to veteran homeowners who are permanently and totally disabled or to the surviving spouse of the veteran.

[459] This credit is somewhat similar to the District's "Schedule H" program, but in Maryland the credit is offered against the property tax bill.

PURPOSE: The homestead deduction encourages individuals to own and occupy homes in the District of Columbia and provides tax relief to resident homeowners. Homestead properties account for 32 percent of the total assessed value of taxable property in the District of Columbia.[460]

IMPACT: District of Columbia residents who own their homes benefit from this provision. In tax year 2022, 101,142 owner-occupied residential properties received the homestead exemption. Mark Haveman and Terri Sexton point out that "Exemptions and credits for specified dollar amounts will result in a greater percentage tax reduction for owners of low-value homes, while exemptions and credits for a percentage of value will provide greater dollar savings to owners of high-value homes."[461] The homestead deduction is found to be progressive when comparing lower to higher assessed homes (since assessed values are positively correlated with income) because the deduction is a fixed dollar amount, and the tax rate is a flat rate across all residential properties.[462]

[460] In tax year 2024, homestead properties were valued at $76 billion. The total value of taxable and tax-exempt property in the District of Columbia was $ 375.3 billion. From "Tax Facts 2024." Office of Revenue Analysis, OCFO. https://ora-cfo.dc.gov/page/dc-tax-facts, p. 52.

*Exemptions*

## 150. Lower-income homeownership households and cooperative housing associations

District of Columbia Code: D.C. Official Code § 47-3503
Sunset Date: None
Year Enacted: 1983

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $12,288 | $12,711 | $13,063 | $13,450 |

DESCRIPTION: Certain property transferred to a "qualifying lower income homeownership household" is exempt from real property taxation. A qualifying lower-income homeownership household must meet two requirements: (1) household income can be no greater than 120 percent of the lower-income guidelines established for the Washington metropolitan area by the U.S. Department of Housing and Urban Development (HUD), and (2) the household must own the property in fee simple or receive at least a 5 percent qualified ownership interest as part of a shared equity financing agreement. The fair market value of the property being transferred cannot exceed 80 percent of the median sale price for homes in the District of Columbia.

In addition, if a shared equity financing agreement is in place, the renting household must receive a "credit against rent" equal to the value of the property tax exemption multiplied by the percentage of the household's qualified ownership interest.

The real property tax exemption is valid until the end of the fifth tax year following the year the property was transferred. During this five-year period, the owner must continue to occupy the property. If the property is owned by a cooperative housing association, it must continue to rent at least 50 percent of the units to households that meet the income standard for a qualifying lower-income homeownership household and benefit from the "credit against rent" requirement throughout the five-year period.

PURPOSE: The authorizing statute states, "The purpose of this act is to expand homeownership opportunities for lower-income families to the maximum extent possible at the lowest possible cost to the District of Columbia."[463]

IMPACT: Households with annual income no greater than 120 percent of the lower-income guidelines established for the Washington metropolitan area benefit from this exemption. There may be spillover benefits for society if homeownership leads to neighborhood improvement and stability by giving people a greater stake in their communities.

[463] See D.C. Official Code § 47-3501(7).

## *Real Property Tax*
*Exemptions*

# 151. Multi-family and single-family rental and cooperative housing for low- and moderate-income persons

District of Columbia Code: D.C. Official Code § 47-1002(20)
Sunset Date: None
Year Enacted: 1978

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $1,365 | $1,412 | $1,451 | $1,494 |

DESCRIPTION: Multi-family and single-family rental and cooperative housing, as well as individual condominium units, are exempt from the real property tax if they are rented to low- and moderate-income persons and qualify for at least one of the following federal programs: (1) the mortgage interest subsidy program for owners of rental housing projects for lower-income families, (2) the "Section 8" housing voucher program, (3) the rent supplement program for needy tenants, (4) the mortgage insurance program for moderate-income and displaced families, and (5) the supportive housing direct loan program for the low-income elderly.

PURPOSE: The purpose of this provision is to increase and maintain the stock of affordable housing in the District of Columbia.

IMPACT: This provision benefits the owners and tenants of housing that is rented to low—and moderate-income families.

***Real Property Tax***
*Exemptions*

## 152. Nonprofit housing associations

District of Columbia Code: D.C. Official Code § 47-3505
Sunset Date: None
Year Enacted: 1983

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $13,653 | $14,123 | $14,515 | $14,944 |

DESCRIPTION: Property transferred to a qualifying non-profit housing association[464] is exempt from the real property tax through the end of the third year in which the property was transferred, provided that the association certifies its intent to transfer the property to (1) a qualifying lower-income ownership household, (2) a multi-family housing property where at least 35 percent of the households are qualifying lower income ownership households, or (3) a cooperative housing association where at least 50 percent of the units are occupied by qualifying lower income ownership households and receive a "credit against rent."[465]

A qualifying lower-income homeownership household must meet two requirements: (1) household income can be no greater than 120 percent of the lower-income guidelines established for the Washington metropolitan area by the U.S. Department of Housing and Urban Development (HUD), and (2) the household must own the property in fee simple or receive at least a 5 percent qualified ownership interest as part of a shared equity financing agreement.

Maryland exempts property owned by a non-profit housing corporation from the state real property tax.

PURPOSE: The authorizing statute states that "The purpose of this act is to expand homeownership opportunities for lower-income families to the maximum extent possible at the lowest possible cost to the District of Columbia."

IMPACT: This provision benefits non-profit housing associations and the lower-income residents they assist in attaining homeownership. If homeownership leads to neighborhood improvement and stability by giving people a greater stake in their communities, there may be spillover benefits for society.

[464] Specifically, an eligible non-profit housing association is one that is exempt from federal income tax under sections 501(c)(3) or 501(c)(4) of the U.S. Internal Revenue Code.
[465] The credit against rent is equal to the value of the property tax exemption multiplied by the percentage of the household's qualified ownership interest.

***Real Property Tax***
*Exemptions*

## 153. Nonprofit affordable housing developers

District of Columbia Code: D.C. Official Code § 47-1005.02
Sunset Date: None
Year Enacted: 2012

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $800 | $824 | $849 | $874 |

DESCRIPTION: Non-profit affordable housing developers can maintain their real property tax exemption when a project is under the restrictions of the federal low-income housing tax credit (LIHTC) program. This exemption is necessary because property developed through the LIHTC program is usually transferred to a private, for-profit subsidiary of the developer. Without this exemption, the non-profit organization would have to pay tax on property it is developing as affordable housing. The exemption also applies to security interest instruments, including a mortgage or deed of trust, used in securing debt to acquire, develop, or redevelop or to refinance or modify a debt on the property through the FY 2019 Budget Support Act of 2018 (Title VII-Subtitle H). Moreover, the FY 2022 Budget Support Act of 2021 exempts from real property taxes affordable housing developed or to be developed on a real property that has been awarded financial assistance in the form of a grant or loan from the Housing Production Trust Fund or other District government low-income housing financing assistance program to provide housing affordable to households earning not more than 80% of the adjusted median income as long as the assistance was awarded after August 23, 2021, the real property and owner or lessee has been certified by the Mayor, and the real property complies with the restrictive covenants governing the income of residents that occupy or will occupy the affordable housing units developed or to be developed on the real property.

The LIHTC program was established by Congress in 1986 to provide the private market with an incentive to invest in affordable rental housing. State housing finance agencies award federal housing tax credits to developers of qualified projects, who usually sell the credits to investors to raise capital or equity for their projects.[466] The credit purchaser must be part of the property ownership entity; this transfer is usually accomplished by creating a limited partnership or limited liability company.

This approach reduces the debt that the developer would otherwise incur and thereby makes it possible for an affordable housing project to offer lower rents. If the project maintains compliance with LIHTC program requirements, investors receive a dollar-for-dollar credit against their federal tax liability for a 10-year period. Projects eligible for housing tax credits must meet low-income occupancy requirements.[467]

PURPOSE: The exemption ensures that non-profit developers of affordable housing are not subject to real property taxation when they participate in the LIHTC program.

[466] The developer typically sells the credit to raise up-front cash for the affordable housing project.
[467] Developers are required to set aside at least 20 percent of their units for households with incomes at or below 50 percent of the area median, or at least 40 percent of their units for households at or below 60 percent of the area median (adjusted for family size).

IMPACT: The exemption supports the operations of a program that the D.C. Housing Finance Agency (which awards LIHTC credits in the District of Columbia) describes as one of the two primary long-term financing programs used to develop affordable multi-family rental housing projects.[468]

[468] See www.dchfa.org.

***Real Property Tax***
*Exemptions*

## 154. Nonprofit workforce housing properties

District of Columbia Code: D.C. Official Code § 47–1005.03
Sunset Date: None
Year Enacted: 2019

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $598 | $594 | $599 | $606 |

DESCRIPTION: Land and buildings used by a nonprofit owner to provide rental housing is exempted from District of Columbia real property taxation as of the date of acquisition by the nonprofit owner; 1) if at least 50% of the occupied units are occupied by tenants with household income, for the year preceding the later of the date of acquisition by the nonprofit owner or initial occupancy by such tenants, the maximum of 80% of the adjusted median income; 2) the remaining occupied units are occupied by tenants with household income capped at 120% of the adjusted median income and; 3) rents charged to the tenants are not more than 30% of their adjusted median income for a household consisting of the number of persons indicated by the occupancy standard for the unit occupied by such tenant; provided, that the total rent paid to the non-profit landlord for any individual unit shall not exceed the greater of the Housing Choice Voucher Program rent for the submarket in which the property is located or in any submarket immediately adjacent to the property, established annually by the District of Columbia Housing Authority. Finally, the law requires that certified nonprofit owners maintain a policy to retain the tenants even when they cannot pay rent due to financial hardship and that the owners maintain a reserve to support such policy.

PURPOSE: The provision aims to increase the number of affordable housing units available to low-income residents in D.C.

IMPACT: Nonprofit entities that provide affordable housing to low-income residents benefit from this provision.

***Real Property Tax***
*Exemptions*

## 155. Correctional Treatment Facility

District of Columbia Code: D.C. Official Code § 47-1002(25)
Sunset Date: None
Year Enacted: 1997

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $4,643 | $4,394 | $4,261 | $4,175 |

DESCRIPTION: The Correctional Treatment Facility (CTF), located at 1901 E Street, S.E. (SSL: RES 001300001112E 0007), is exempt from real property taxation if the facility on that site is used as a correctional facility housing inmates in the custody of the Department of Corrections (DOC).

The Corrections Corporation of America owns and manages the CTF, which houses all of DOC's female and juvenile prisoners as well as some male prisoners who are a medium-security risk or lower. The company purchased the facility from the D.C. government in 1997 under a sale/leaseback arrangement that lasted for 20 years.

PURPOSE: This provision maintains the CTF's tax-exempt status following its change from government to private ownership.

IMPACT: This provision benefits the CTF operators. It was offered as part of a larger agreement in which the D.C. government received up-front revenue from the sale of the CTF. As of 2021, only one CTF benefits from this provision.

***Real Property Tax***
*Exemptions*

## 156. Art galleries

District of Columbia Code: D.C. Official Code § 47-1002(6)
Sunset Date: None
Year Enacted: 1942

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $3,274 | $3,328 | $3,428 | $3,511 |

DESCRIPTION: Art gallery buildings belonging to and operated by "organizations which are not organized or operated for private gain" are exempt from real property taxation if they are open to the public generally and do not charge admission more than two days per week.

Non-profit art and cultural organizations are exempt from real property taxation in Maryland and not Virginia.

PURPOSE: The exemption supports a general policy of providing property tax exemptions to non-profit organizations that provide religious, charitable, scientific, literary, educational, or cultural benefits to the public.

IMPACT: Art galleries benefit from the exemption, but there may be a wider social benefit because the galleries are open to the public and provide general cultural enrichment. At the same time, the tax exemptions given to certain properties shift the burden of paying for public services to taxable properties and may result in those properties paying a higher tax rate.

Several galleries or museums benefit from this exemption, including The Phillips Collection, the National Trust for Historic Preservation, the David Lloyd Kreeger Foundation, the Hillwood Estate Museum, and the National Museum of Women in the Arts. Other galleries or museums are exempt through other provisions of the property tax code; for example, some are located on federal property, and others have been exempted from real property taxation by a special act of Congress.

***Real Property Tax***
*Exemptions*

## 157. Theater, Music, or Dance Buildings

District of Columbia Code: § 47-1002(19)
Sunset Date: None
Year Enacted: 1996

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $1,423 | $1,455 | $1,497 | $1,542 |

Note: FY 2020 is the first year theater-related property tax exemptions have been identified and counted as a group. In previous Tax Expenditure Reports, the exemption amounts had been included in the Property Tax Exemption for Miscellaneous Properties.

DESCRIPTION: Buildings that are owned by, occupied, and used for legitimate theater, music, or dance purposes (and open to the public and not organized or operated for commercial purposes or for private gain) are exempt from all real property taxation so long as the property continues to be so owned and occupied and used for the exempt purposes described in § 47-1002(18) and § 47-1002(19), which provide for exemption of certain real properties.

PURPOSE: The exemption supports a general policy of providing property tax exemptions to non-profit organizations that provide religious, charitable, scientific, literary, educational, or cultural benefits to the public.

IMPACT: Theaters benefit from the exemption, but there may be a wider social benefit because the theaters provide general cultural enrichment. At the same time, the tax exemptions given to certain properties shift the burden of paying for public services to taxable properties and may result in those properties paying a higher tax rate.

At least seven theaters benefit from this exemption, including the Avalon Theater Project, the Andrew Keegan Theater, the Studio Theater, the Lansburgh Theater, the Shakespeare Theater, the Atlas Performing Arts Center, and DC Wheel Productions (Dance Place).

***Real Property Tax***
*Exemptions*

## 158. Cemeteries

District of Columbia Code: D.C. Official Code § 47-1002(12)
Sunset Date: None
Year Enacted: 1942

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $8,262 | $8,399 | $8,653 | $8,862 |

DESCRIPTION: Cemeteries dedicated to and used solely for burial purposes and not organized or operated for private gain, including buildings and structures reasonably necessary and usual to the operation of a cemetery, are exempt from real property taxation.

Real property tax exemptions for non-profit cemeteries are standard nationwide. Both Maryland and Virginia exempt non-profit cemeteries from real property taxation.

PURPOSE: The exemption supports a general policy of providing property tax exemptions to non-profit organizations that provide religious, charitable, scientific, literary, educational, or social benefits to the public.

IMPACT: Non-profit cemeteries benefit from the exemption, but there may also be a wider social benefit.

22 cemetery properties received this exemption during the tax year 2024. Cemeteries account for 0.34 percent of the total assessed value of tax-exempt property in the District of Columbia.[469]

[469] In tax year 2024, tax-exempt property of cemeteries was valued at $429.8 million. The total value of tax-exempt property in the District of Columbia was $125.8 billion. From "Tax Facts 2024." Office of Revenue Analysis, OCFO. https://ora-cfo.dc.gov/page/dc-tax-facts, p. 52.

***Real Property Tax***
*Exemptions*

## 159. Charitable organizations

District of Columbia Code: D.C. Official Code § 47-1002(8)
Sunset Date: None
Year Enacted: 1942

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $20,983 | $20,413 | $20,252 | $20,205 |

DESCRIPTION: Buildings belonging to and operated by institutions "which are not organized or operated for private gain," and are used "for purposes of public charity principally in the District of Columbia,"[470] are exempt from real property taxation.

Real property exemptions for charitable organizations represent standard practice throughout the United States. Maryland and Virginia exempt charitable organizations from the real property tax.

PURPOSE: The exemption supports a general policy of providing property tax exemptions to non-profit organizations that provide religious, charitable, scientific, literary, educational, or cultural benefits to the public.

IMPACT: Charitable organizations benefit directly from the exemption, which is also expected to provide broader societal benefits by encouraging the voluntary provision of social services. In the tax year 2024, 398 properties received the charitable use exemption.[471]

Some experts have pointed out that the exemption may be poorly targeted because it favors charitable non-profits that own real estate and may encourage some non-profits to invest more in real property than is optimal for maximizing social welfare (for example, the investment in real estate could come at the expense of an organization's charitable mission itself).

Property owned by charitable organizations accounts for 0.8 percent of the total assessed value of tax-exempt property in the District of Columbia.[472] The tax exemptions given to certain properties shift the burden of paying for public services to taxable properties and may result in those properties paying a higher tax rate.

[470] See D.C. Official Code § 47-1002(8).
[29] "Property Exempt from Taxation TY2022." Office of Tax and Revenue. OCFO. https://otr.cfo.dc.gov/publication/properties-exempt-taxation-fy-2022
[472] In tax year 2024, tax-exempt property of charitable organizations was valued at $1.1 billion. The total value of tax-exempt property in the District of Columbia was $125.8 billion. From "Tax Facts 2024." Office of Revenue Analysis, OCFO. https://ora-cfo.dc.gov/page/dc-tax-facts, p. 52.

***Real Property Tax***
*Exemptions*

## 160. Churches, synagogues, and mosques

District of Columbia Code: D.C. Official Code § 47-1002(13)-(16)
Sunset Date: None
Year Enacted: 1942

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $71,151 | $72,930 | $74,753 | $76,622 |

DESCRIPTION: Churches, including buildings and structures reasonably necessary and usual in performing the church's activities, are exempt from real property taxation. A church building is defined as a building "primarily and regularly used by its congregation for public religious worship."[473]

In addition, the following types of property belonging to religious orders or societies are exempt from real property taxation: buildings belonging to religious corporations or societies primarily and regularly used for religious worship, study, training, and missionary activities; pastoral residences owned by a church and occupied by the church's pastor, rector, minister, or rabbi (with a limit of one pastoral residence for any church or congregation); and Episcopal residences owned by a church and used exclusively as the residence of a bishop of the church.

Real property tax exemptions for churches, synagogues, mosques, and other places of religious worship are standard nationwide. Maryland and Virginia exempt churches, synagogues, and mosques from real property taxation.

PURPOSE: The exemption reflects a general policy of providing property tax exemptions to non-profit organizations that provide religious, charitable, scientific, literary, educational, or cultural benefits to the public. More specifically, the exemption is intended to promote the free exercise of religion and respect the separation of church and state.

IMPACT: The exemption benefits churches, synagogues, mosques, and other places of worship, but it is also intended to benefit society more broadly by promoting the free exercise of religion and the separation of church and state. In the tax year 2024, there were 1078 tax-exempt church properties (sometimes, one church owns several properties).[474] Churches, synagogues, and mosques own 3.3 percent of the total assessed value of tax-exempt property in the District of Columbia.[475]

[473] See D.C. Official Code § 47-1002(13).
[474] A list of properties receiving the religious exemption can be found in the online Exempt Property Report, located at: https://otr.cfo.dc.gov/publication/properties-exempt-taxation-fy-2024
[475] In tax year 2024, tax-exempt property of churches, synagogues, and mosques was valued at $4.2 billion. The total value of tax-exempt property in the District of Columbia was $125.8 billion. From "Tax Facts 2024." Office of Revenue Analysis, OCFO. https://ora-cfo.dc.gov/page/dc-tax-facts, p. 52.

***Real Property Tax***
*Exemptions*

## 161. Continuing care retirement community

District of Columbia Code: D.C. Official Code § 47-1002(32)
Sunset Date: None
Year Enacted: 2017

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $3,918 | $3,895 | $3,926 | $3,973 |

DESCRIPTION: Real property belonging to an organization that is not organized or operated for private gain and that maintains a current license as a continuing care retirement community (CCRC), as provided by § 44-151.02, or any successor provision, shall be exempt from taxation; provided, that the real property is used as a continuing care retirement community.

PURPOSE: The legislation authorizing the property tax exemption was originally introduced to make fully exempt the property of the Ingleside Presbyterian Retirement Community, Inc. Before the exemption passed, the Office of Tax and Revenue determined that while the portion of the Ingleside property that was used for nursing care and assisted living was tax-exempt under District law, the portion attributable to independent living was not eligible for an exemption. As a result, approximately 62 percent of the property became taxable, or the portion of the property used for independent living residences. The Committee Report of the legislation noted numerous property tax relief provisions for seniors. However, none apply to independent living residences for seniors at a CCRC. As such, the purpose was to provide equity among the various types of senior housing. Upon final passage, the legislation was amended to include all CCRCs so long as they remain eligible.

IMPACT: This exemption benefits a facility that operates as a continuing care retirement community. There are currently four companies with continuing care retirement community licensees, with two receiving the exemption: the Ingleside Presbyterian Retirement Community, Inc., and the Army Distaff Foundation, Inc., which runs the Knollwood Military Life Plan Community. Prior to the enactment of the legislation, Ingleside and Army Distaff Foundation had previously enjoyed partially tax-exempt status, as both are run by nonprofit organizations and federally tax-exempt.

***Real Property Tax***
*Exemptions*

## 162. Nonprofit stormwater infrastructure

District of Columbia Code: D.C. Official Code § 47-1005
Sunset Date: None
Year Enacted: 2018

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $25 | $26 | $27 | $28 |

DESCRIPTION: This property tax exemption allows a tax-exempt entity that uses its property to generate stormwater retention credits to maintain its exemption from District property taxation.

PURPOSE: The property tax exemption is necessary to prevent tax-exempt organizations that generate revenue from stormwater retention credits from being subject to real property taxation on the portion of land leased for stormwater management. The portion of land protected by the provision generally represents less than 0.5 percent of the nonprofits' total lots.

IMPACT: Nonprofit organizations that generate stormwater retention credits due to the installation of green infrastructure or the removal of impervious surfaces will benefit from this exemption. Nine organizations currently use the provision, and a Department of Energy and Environment official confirmed that the exemption is an important assurance for nonprofit organizations that install river-protecting green infrastructure that their tax-exempt status will not be affected.

***Real Property Tax***
*Exemptions*

## 163. Vault tax exemption

District of Columbia Code: D.C. Official Code §10-1103.04(d)(3) and §10-1103.04(d)(4)
Sunset Date: None
Year Enacted: 2016

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $41 | $42 | $42 | $43 |

DESCRIPTION: Theaters, music venues, and dance studios are exempted from real property taxes, and real property located at Square 287, Lot 812 (National Museum of Women in the Arts) is exempted from vault taxes. A vault is an underground storage area like a parking garage, electrical transformers, or other utilities that travel underneath the roadway. Vaults are taxed separately from a building's real property taxes in the District. The vault tax rate is dependent on the type of vault, and the assessed value of the land where the vault is located times the square footage of the vault times the utilization factor.

PURPOSE: The exemption supports a general policy of providing property tax exemptions to non-profit organizations that provide cultural benefits to the public.

IMPACT: Owners of theaters, music venues, dance studios, and the National Museum of Women in the Arts benefit from the exemption, but there may be a wider social benefit because the galleries are open to the public and provide general cultural enrichment.

***Real Property Tax***
*Exemptions*

## 164. Washington Metropolitan Area Transit Authority properties

District of Columbia Code: D.C. Official Code § 9-1107.01
Sunset Date: None
Year Enacted: 1966

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $12,930 | $12,579 | $12,480 | $12,450 |

DESCRIPTION: The Washington Metropolitan Area Transit Authority Compact establishes the rules that govern the operation and administration of the regional mass transit system, commonly known as "Metro." The District of Columbia, the State of Maryland, and the Commonwealth of Virginia are signatories to the Compact. Article XVI ("General Provisions"), Section 78 of the Compact, exempts the Washington Metropolitan Area Transit Authority (WMATA) and its Board from all taxes or assessments on any property that WMATA owns or controls.

PURPOSE: As stated in the Compact, WMATA's mission "is in all respects for the benefit of the people of the signatory states and is for a public purpose."[476] WMATA's exemption from all taxes or assessments on its property helps WMATA fulfill its mission of improving transportation throughout the region. It extends to this regional organization the tax exemption provided to federal and local government property.

IMPACT: Residents of the Washington metropolitan area, as well as businesses and visitors who rely on the Metro system, benefit from this tax exemption. The exemption allows WMATA to devote more resources to serving the public. Nevertheless, the tax exemption may reduce the costs of keeping land undeveloped.

During tax year 2024, there were 397 tax-exempt WMATA properties in the District of Columbia.[477] These properties account for 0.5 percent of the total assessed value of tax-exempt property in the District of Columbia.[478]

[476] See Article XVI, Section 70 of the Washington Metropolitan Area Transit Authority Compact.
[477] A list of properties receiving the tax exemption can be found in the online Exempt Property Report, located at: https://otr.cfo.dc.gov/publication/properties-exempt-taxation-fy-2024
[478] In the tax year 2024, the tax-exempt property of WMATA properties was valued at $633.5 million. The total value of tax-exempt property in the District of Columbia was $125.8 billion. From "Tax Facts 2024." Office of Revenue Analysis, OCFO. https://ora-cfo.dc.gov/page/dc-tax-facts, p. 52.

***Real Property Tax***
*Credits*

## 165. Assessment increase cap

District of Columbia Code: D.C. Official Code § 47-864
Sunset Date: None
Year Enacted: 2001

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $24,864 | $21,739 | $17,693 | $16,885 |

DESCRIPTION: Homeowners who qualify for a homestead deduction (those who occupy a home in the District of Columbia as their principal residence) are also eligible for an annual assessment cap credit. This credit limits the taxable assessed value of the individual's home to a 10 percent increase from the prior tax year.

The FY 2019 Budget Support Act of 2018 (Title VII-Subtitle A) decreased the taxable assessed value for homestead-qualified residents who are over the age of 65 or a homestead-qualified resident with a permanent disability and have a household adjusted gross income of less than $125,000[479] from 10 percent to a 5 percent increase from the prior tax year.

The FY 2023 Budget Support Act of 2022 decreased the taxable assessed value for homestead-qualified residents over 65 or a homestead-qualified resident with a permanent disability from five (5) percent to two (2) percent.

If the property was sold during the prior tax year, its value was increased due to a change in its zoning classification, or the assessment of the property was clearly erroneous due to an error in the calculation or measurement of improvements, then the taxpayer does not qualify for the assessment increase cap. In addition, the statute provides that the taxable assessment of a property eligible for a homestead deduction shall not fall below 40 percent of the current tax year's assessed value.

For the state property tax, Maryland also imposes a 10 percent cap on the annual increase in the taxable assessed value of an owner-occupied home. The 10 percent cap also applies to local property taxes in Maryland, but local governments can adopt a cap lower than 10 percent. Virginia law limits the property tax growth in each locality to a 1 percent annual increase, excluding increases in property tax values that result from new construction or improvements, but localities may exceed the 1 percent cap after holding a public hearing on the issue (there is no state property tax in Virginia).

PURPOSE: The purpose of the cap is to protect resident homeowners from sharp growth in property values and assessments. In the early to middle part of the past decade, the value of residential real property soared in the District of Columbia. Assessed values often rose by more than 20 percent annually and sometimes more than doubled in a year. From fiscal year 2014 to fiscal year 2023, the assessed value of residential real property in the District increased by about

[479] Per D.C. Official Code § 47-863. The maximum adjusted gross income increased by a senior/disabled cost of living each year.

79.5 percent from $85.5 billion to $153.4 billion.[480] A 6.7 percent average increase in assessed value per year. The cap was intended to protect resident homeowners from these rapid increases in real property tax liability. It was also designed to smooth the transition from triennial to annual assessments.

IMPACT: Homeowners with a principal residence in the District of Columbia benefit from the assessment increase cap. In the tax year 2024, 31,636 owner-occupied households enjoyed lower taxes due to the cap. ORA found that the "home value of most of the beneficiaries of the assessment cap credit was between $250,000 and $750,000 for eligible homeowners between 2017 and 2022. This group also received more benefit in the value of assessed homes not taxed due to the credit, although beneficiaries with a home value between $500,000 and $750,000 have received the most benefit amongst all assessed value groups."[481] However, since FY 2010, the estimated revenue loss from the cap and the number of beneficiaries has dropped as growth in assessed value has moderated.

Due to the variation in rates of property value growth in different neighborhoods, the assessment increase cap can create equity problems. Some taxpayers will pay real property tax based on the full assessed value, while others who live in rapidly appreciating areas that benefit from the cap will not.

In a paper prepared for the D.C. Tax Revision Commission, University of Georgia professor David Sjoquist found that owners of more expensive houses typically have a smaller percentage reduction in taxable value due to the assessment cap.[482] In addition, the cap creates inequities in the taxable percentage of assessed value by neighborhood.[483]

Professor Sjoquist also found that senior citizens benefit more from the assessment cap (their taxable value is lower as a percentage of assessed value) than non-seniors, possibly because they stay in their homes longer.[484] He also estimated that a 10 percent reduction in a homeowner's tax bill due to the D.C. assessment cap reduces the probability that the owner will move by 2.26 percent. The reduction in mobility is attributed to the sharp rise in property taxes that an owner might face in a new home, which is assessed at market value after being purchased.[485]

## 166. Credit for senior citizens and persons with disabilities

District of Columbia Code: D.C. Official Code § 47-863
Sunset Date: None
Year Enacted: 1986

| (Dollars in thousands) | FY 2024 | FY 2024 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $38,187 | $39,041 | $40,174 | $41,379 |

DESCRIPTION: Senior citizens (age 65 or older) and persons with disabilities qualify for a 50 percent reduction in real property tax liability on a home that they own and occupy in the District of Columbia, provided that their household adjusted gross income is less than $154,750 in 2024 and they own at least 50% of the property. The maximum is adjusted for changes in the Consumer Price Index.

To qualify, taxpayers must file an application with the Office of Tax and Revenue. A senior citizen or person with a disability must own at least 50 percent of the property or cooperative unit, which must be the taxpayer's principal place of residence.

Montgomery County offers a real property Senior Tax Credit equal to 50 percent of a taxpayer's combined State Homeowners' Tax Credit and the County Supplement to that credit (individuals must be 65 or older). As authorized by Virginia law, the city of Alexandria and Arlington and Fairfax counties provide full or partial real property tax exemptions, to low- and moderate-income senior citizens and those who are permanently and totally disabled. The amount of the exemption depends on household gross income, but the maximum income levels are lower in Virginia,[486] and there is also an asset limit for eligible households.

PURPOSE: The purpose of the credit is to protect senior citizens and people with disabilities, who often live on fixed incomes, from real property tax liabilities that may be difficult or impossible for them to pay. In 2012, when the Council raised the maximum household income from $100,000 to $125,000 (with an annual cost of living adjustment), proponents pointed out that senior citizens and persons with disabilities of modest income might otherwise be ineligible because *household* income (including income of those who are not senior citizens or do not have a disability) is measured.[487]

IMPACT: The beneficiaries of this provision are senior citizens and people with disabilities who live in their own homes in the District of Columbia and have household-adjusted gross income less than the maximum income limit of $154,750. In the tax year 2024, 19,148 properties qualified for the credit. The credit violates the principle of horizontal equity because other homeowners with adjusted gross income of less than $154,750 do not receive the same relief.

[486] The maximum income level in Alexandria City is $100,000; $90,000 in Fairfax County; and in Arlington County, the maximum income is $88,094.

## 167. Condominium and cooperative trash collection

District of Columbia Code: D.C. Official Code § 47-872 (condominiums) and § 47-873 (cooperatives)
Sunset Date: None
Year Enacted: 1990

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $3,646 | $3,830 | $4,024 | $4,228 |

DESCRIPTION: Owners of condominium and cooperative dwelling units may qualify for a trash collection credit against their real property tax liability if they pay for garbage collection instead of receiving city garbage service. The credit, $129 for tax year 2024, is adjusted annually for inflation.

To qualify for the credit, the property must be occupied by the owner and used for non-transient residential purposes. It must also be located in a condominium or cooperative housing building with more than four dwelling units.

PURPOSE: The purpose of the credit is to help defray the costs of garbage collection for real property owners who do not receive trash collection services from the D.C. government.

IMPACT: Condominium or cooperative housing owners who pay for garbage collection benefit from this credit. In the tax year 2024, about 29,168 homeowners received this credit.

*Rebate*

## 168. Public charter school tax rebate

District of Columbia Code: D.C. Official Code § 47-867
Sunset Date: None
Year Enacted: 2005

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $958 | $952 | $960 | $972 |

DESCRIPTION: A public charter school that leases a school facility from an entity subject to the District's real property tax is entitled to a rebate equal to the school's pro-rata share of the lessor's tax on the property, provided that the school is liable under its lease for that share of the tax and the lessor pays the tax.

Public charter schools must apply for the rebate by filing Form FP-305 with the Office of Tax and Revenue.

PURPOSE: The purpose of the rebate is to put public charter schools that lease their facilities on an equal footing with other public schools that own their facilities and are exempt from taxation on the real property.

IMPACT: Public charter schools that lease their school buildings benefit from this provision. In the most recent full year for which data are available, 16 rebates were issued to 10 charter schools (there are often multiple plots of land per school) for a total of $967,796.

During the 2022-2023 school year there were 135 public charter schools managed by 69 independently run nonprofits with 45,251 students or 48%.[488]

***Real Property Tax***
*Deferrals*

## 169. Low-income homeowners

District of Columbia Code: D.C. Official Code § 47-845.02
Sunset Date: None
Year Enacted: 2005

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $113 | $116 | $119 | $123 |

DESCRIPTION: A taxpayer who occupies a home or condominium in the District of Columbia as his or her principal place of residence can defer any real property tax above his or her real property tax for the prior year if the taxpayer has a household adjusted gross income of less than $50,000. Real property tax deferred following this provision bears interest at 6 percent annually (decreased from 8 percent beginning in 2015). The amount of real property tax deferred, including the interest on amounts deferred in prior years, cannot exceed 25 percent of the property's assessed value in the current tax year.

To qualify for the deferral, the taxpayer must file an application with the Office of Tax and Revenue. Senior citizens (those 65 or older) must undergo home equity conversion mortgage counseling.

Montgomery County also allows certain homeowners to defer paying the amount by which their real property tax liability exceeds the amount due the prior year. To qualify, the household must have had a gross income of $120,000 or less the previous year, and at least one of the owners must have lived in the home as his or her principal residence for the prior five years. Interest on the deferred taxes accrues at a rate set annually by the county.

PURPOSE: The deferral protects low—and moderate-income property owners from sharp increases in real property tax liability that may outpace their income growth.

IMPACT: Homeowners with annual household adjusted gross income less than $50,000 are the intended beneficiaries of this provision. In 2024, there were 177 claimants in this program. While the interest rate is 6 percent, it still may discourage the use of the deferral, particularly during a period of low interest rates. It is also possible that the deferral could lead to more financial hardship for low-income homeowners by compounding their debt. Research by the American Association of Retired Persons (AARP) has found that participation rates in property tax deferral programs are generally very low (less than 1 percent).[489]

*Deferrals*

## 170. Low-income, senior-citizen homeowners

District of Columbia Code: D.C. Official Code § 47-845.03
Sunset Date: None
Year Enacted: 2005

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $74 | $76 | $78 | $81 |

DESCRIPTION: A taxpayer who is 65 years of age or older, occupies a home or condominium in the District of Columbia as his or her principal place of residence, and has a household adjusted gross income of less than $50,000 can defer any real property tax owed in a given tax year. The deferred taxes bear interest at the rate charged by the U.S. Internal Revenue Service on underpayments of federal income taxes. Still, they will not exceed 6 percent yearly (the interest rate was 8 percent before 2015). The amount of tax-deferred, plus interest accrued on the taxes deferred in previous years, is limited to 25 percent of the assessed value of the property in the current tax year. The Budget Support Act of 2015 amended the deferral so that if the homeowner is 75 years of age or older, has less than $12,500 of household interest and dividend income, and has owned a residence in the District for at least the immediately preceding 25 years, would pay no interest shall on taxes.

Several additional requirements apply. The homeowner must live in a home with no more than five dwelling units, and the senior citizen or citizens must own at least 50 percent of the house or condominium. The homeowner must also undergo home equity conversion mortgage counseling and apply with the Office of Tax and Revenue to qualify for the deferral. This tax deferral differs from the deferral available for low-income homeowners described on the previous page (see tax expenditure #169, "Low-income homeowners") by covering the *entire* property tax bill, rather than just the yearly increase in property tax liability.

The City of Alexandria and Arlington County allow tax deferrals for senior citizens and persons with disabilities. To qualify for a property tax deferral in Alexandria, the taxpayer's household gross income must range between $100,000 and $120,000 in 2024, and assets (excluding the home and surrounding two acres) may not exceed $430,000. In Arlington County, senior citizens and people with disabilities may receive a property tax deferral only if they meet income limits (which vary based on household size) and have assets, excluding home, less than $486,098.

Montgomery County also allows certain homeowners (elderly) to defer paying the amount by which their real property tax liability exceeds the amount due the prior year. To qualify, the household must have had a gross income of $80,000 or less the previous year, and at least one of the owners must have lived in the home as his or her principal residence for the prior five years. Interest on the deferred taxes accrues at a rate set annually by the county. In addition to the District of Columbia, 26 states offer some property tax deferral programs.[490]

[490] *Significant Features of the Property Tax.* Lincoln Institute of Land Policy and George Washington Institute of Public Policy. (Residential Property Tax Relief Programs, Accessed May 4, 2016.)

PURPOSE: The tax deferral protects low—and moderate-income senior citizens from real property tax burdens that they cannot afford. This provision recognizes that many senior citizens are "house-rich" but "cash-poor" because they live on fixed incomes that may not keep pace with the assessed value of their homes.

IMPACT: Senior citizen homeowners with annual household adjusted gross income less than $50,000 benefit are the intended beneficiaries of this provision. About 102 seniors received a deferral in 2024. Research by the American Association of Retired Persons (AARP) has found that participation rates in property tax deferral programs are generally very low (less than 1 percent).[491]

The deferral violates the principle of horizontal equity because non-elderly homeowners with household adjusted gross income of less than $50,000 do not receive similar tax relief (the deferral option for low-income homeowners is more limited). The deferral might also compound the financial difficulties of low-income senior citizens by encouraging the buildup of debt.

## 171. Public space permit fees

District of Columbia Code: D.C. Official Code § 10–1141.03a
Sunset Date: None
Year Enacted: 2016

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | n/a | n/a | n/a | n/a |

DESCRIPTION: The Civic Associations Public Space Permit Fee Waiver Amendment Act of 2016 allows civic associations to waive or reduce permit fees, except application fees, for the use of public space, public rights of way, and public structures for events or projects that civic associations conduct. Civic associations are organizations comprised of residents of the community within which the public space, public right of way, or public structure is located; mostly used for the improvement of the community within which the public space, public right of way, or public structure is located; and are exempt from taxation under section 501(c)(3) or (4) of the Internal Revenue Code of 1954, approved August 16, 1954 (68A Stat. 163; 26 U.S.C. § 501(c)(3), (4)).

PURPOSE: The provision reduces the operating cost of civic associations that provide services to local communities in D.C.

IMPACT: Civic organizations like a farmers market would benefit from this provision. The public permit waiver or fee reduction reduces the operating cost of civic organizations that provide valuable services to the community.

# DEED RECORDATION AND TRANSFER TAX

### *Deed Recordation and Transfer Tax*
*Exemptions*

## 172. Educational institutions

District of Columbia Code: D.C. Official Code § 42-1102(3) for the deed recordation tax
D.C.Official Code § 47-902(3) for the transfer tax
Sunset Date: None
Year Enacted: 1962 (deed recordation tax) and 1980 (transfer tax)

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $613 | $695 | $787 | $875 |

DESCRIPTION: Organizations exempt from real property taxation in the District of Columbia pursuant to D.C. Official Code § 47-1002 are also exempt from the deed recordation and transfer taxes. Educational institutions are among the groups covered under § 47-1002 that qualify for this blanket exemption.

PURPOSE: The purpose of the exemption is to extend the real property tax exemption for educational institutions to the other two taxes related to real property: the deed recordation tax and the transfer tax. As a result, there is uniform treatment under the real property, deed recordation, and transfer taxes for educational institutions.

IMPACT: Educational institutions benefit from this exemption, which would also be expected to have spillover benefits for their employees and students. Moreover, there could be broader societal benefits because education promotes a better-trained workforce and a more informed citizenry.

### *Deed Recordation and Transfer Tax*
*Exemptions*

## 173. Embassies, chanceries, and associated properties of foreign governments

District of Columbia Code: D.C. Official Code § 42-1102(3) for the deed recordation tax
D.C. Official Code § 47-902(3) for the transfer tax
Sunset Date: None
Year Enacted: 1962 (deed recordation tax) and 1980 (transfer tax)

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $794 | $901 | $1,019 | $1,134 |

DESCRIPTION: Organizations exempt from real property taxation in the District of Columbia pursuant to D.C. Official Code § 47-1002 are also exempt from deed recordation and transfer taxes. Foreign governments are among the groups covered under § 47-1002 that qualify for this blanket exemption, which applies to embassies and other properties that foreign governments use for diplomatic purposes.

PURPOSE: The exemption upholds the principle of international law that foreign governments are entitled to exemption from taxation of real property owned by the foreign government and used by its diplomatic mission. Any portion of the property not used for diplomatic or consular purposes is not exempt from the District's deed recordation or transfer tax. The exemption also ensures uniform treatment under the real property, deed recordation, and transfer taxes for properties purchased by foreign governments for diplomatic uses.

IMPACT: Foreign governments that buy or sell embassies, chanceries, and assoc}"iated properties in the District of Columbia benefit from this exemption.

***Deed Recordation and Transfer Tax***
*Exemptions*

## 174. Federal government and District of Columbia government

District of Columbia Code: D.C. Official Code § 42-1102(2) for the deed recordation tax
D.C. Official Code § 47-902 (2) for the transfer tax
Sunset Date: None
Year Enacted: 1962 (deed recordation tax) and 1980 (transfer tax)

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $3,626 | $4,112 | $4,654 | $5,177 |

DESCRIPTION: Property acquired by the United States government is exempt from the deed recordation and transfer taxes unless taxation of the property has been specifically authorized by the U.S. Congress.

PURPOSE: This exemption recognizes that the federal government is immune from taxation by the states or municipalities. This immunity has been established in numerous court decisions, beginning with *McCulloch v. Maryland*, 17 U.S. 316 in 1819, and has been reinforced in other cases including *Clallam County v. United States*, 263 U.S. 341 in 1923; *Cleveland v. United States*, 323 U.S. 329, 333 in 1945; *United States v. Mississippi Tax Commission*, 412 U.S. 363 in 1973; and *United States v. Mississippi Tax Commission*, 421 U.S. 599 in 1975.

IMPACT: The United States and District of Columbia governments benefit from this exemption.

***Deed Recordation and Transfer Tax***
*Exemptions*

## 175. Other properties exempt from real property taxation

District of Columbia Code: D.C. Official Code § 42-1102(4) for the deed recordation tax
D.C. Official Code § 47-902(3) for the transfer tax
Sunset Date: None
Year Enacted: 1962 (deed recordation tax) and 1980 (transfer tax)

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $6,364 | $7,217 | $8,167 | $9,085 |

DESCRIPTION: Properties exempted from the real property tax by D.C. Official Code § 47-1002 also receive a blanket exemption from the deed recordation and transfer taxes.[492] In addition to some major types of tax-exempt properties that are specifically exempted by statute from the deed recordation and transfer tax (churches, educational institutions, embassies, and charitable organizations), a number of other institutions also receive the deed recordation and transfer tax exemptions through this blanket exemption. These institutions, which are included in the estimate of forgone revenue shown above, include non-profit hospitals, libraries, art galleries, and cemeteries.

PURPOSE: This exemption promotes equitable treatment for non-profit institutions under the real property tax, the deed recordation tax, and the transfer tax. In addition, the exemption recognizes and encourages the public benefits provided by many non-profit entities, such as hospitals and libraries.

IMPACT: The owners of non-profit hospitals, libraries, art galleries, cemeteries, and other organizations exempt from real property taxation in the District of Columbia benefit from this parallel exemption from the deed recordation and transfer taxes.

[492] There are two narrow exceptions to this rule. D.C. law provides that the following tax-exempt properties do not receive corresponding exemptions from the deed recordation and transfer taxes: (1) property for which payments in lieu of taxes (PILOTs) are being made pursuant to a PILOT agreement, and (2) land in the Capper/Carrollsburg PILOT area that is not otherwise exempt from real property taxation.

***Deed Recordation and Transfer Tax***
*Exemptions*

## 176. Cooperative housing associations

District of Columbia Code: D.C. Official Code § 42-1102(14), § 47-3503(a)(2), and § 47-3503(a)(3) for deed recordation tax
D.C. Official Code § 47-902(11) and § 47-3503(b)(2) for transfer tax
Sunset Date: None
Year Enacted: 1983

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $37 | $42 | $48 | $53 |

DESCRIPTION: A property acquired by a cooperative housing association is exempt from the deed recordation and transfer taxes if households occupy at least 50 percent of the units with an annual income no greater than 120 percent of the lower-income guidelines established by the U.S. Department of Housing and Urban Development (HUD) for the Washington metropolitan area.

The cooperative housing association must receive a credit against the purchase price of the property equal to the total transfer tax that would have been due without the exemption. This provision is necessary because the transfer tax is usually paid by the property's seller.

PURPOSE: The authorizing statute states that "The purpose of this act is to expand homeownership opportunities for lower-income families to the maximum extent possible at the lowest possible cost to the District of Columbia."[493] The statute further states, "Expansion of homeownership opportunities for lower-income families is beneficial to the public peace, health, safety and general welfare."[494]

IMPACT: Cooperative housing associations with at least 50 percent of units occupied by lower-income households benefit from this provision.

[493] See D.C. Official Code § 47-3501(7).
[494] See D.C. Official Code § 47-3501(6).

***Deed Transfer Tax***
*Exemptions*

## 177. Inclusionary zoning program

District of Columbia Code: D.C. Official Code § 47-902(23)
Sunset Date: None
Year Enacted: 2007

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $112 | $112 | $123 | $135 |

DESCRIPTION: Property transfers to a qualifying low-to-moderate income household under the Inclusionary Zoning (IZ) program are exempt from the transfer tax on real property. IZ requires affordable housing set aside in new developments of 10 or more units or a substantial rehabilitation that expands an existing building's floor-area ratio (FAR) by 50 percent or more and adds 10 or more units in exchange for an increase in density. There are exemptions for certain zones and historic districts, and some housing construction projects have been exempt due to geographic location because they received development approvals before the effective date of IZ or because they were subject to housing affordability requirements as a planned unit development or through other D.C. government programs.[495]

IZ is targeted at households earning less than 50 percent of the area median income (AMI) and between 50 percent and 80 percent of AMI, depending on the zoning and the type of construction. The amount of affordable housing set aside (which ranges between 8 and 10 percent of the residential space) also varies depending on the zoning and construction type. Affordable units offered through the IZ program have rental or sales price caps tied to AMI. Developers receive a 20 percent bonus density in return for providing affordable units.

After housing is built under the IZ program, the developer or owner of the affordable unit issues a notice of availability to the Department of Housing and Community Development (DHCD), which then holds a lottery to select an eligible household for each unit. Prospective renters and buyers must submit information about their income and household size, a declaration of eligibility, a mortgage pre-qualification (if applicable), and any other documents the Mayor requires.

PURPOSE: The exemption aims to further the IZ program's goals of producing affordable housing for residents, creating mixed-income neighborhoods, and increasing homeownership opportunities for low-to-moderate-income households.

IMPACT: This provision is intended for low—and moderate-income households. According to DHCD, 413 IZ units were either sold or rented in FY 2023, and 57 were sold.[496] From program inception through the end of FY2023, a total of 373 units have been sold. While this provision represents forgone revenue to the District, the bonus density that is allowed because of the IZ units will generate additional tax revenue for the District.

[496] Communication with Department of Housing and Community Development official, May 22, 2024.

***Deed Recordation and Transfer Tax***
*Exemptions*

## 178. Lower-income homeownership households

District of Columbia Code: D.C. Official Code § 42-1102(12), § 47-3503(a)(1), and § 47-3503(a)(3) for deed recordation tax
D.C. Official Code § 47-902(9) and § 47-3503(b)(1) for transfer tax
Sunset Date: None
Year Enacted: 1983

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $94 | $107 | $121 | $134 |

DESCRIPTION: Property transferred to a "qualifying lower-income homeownership household" is exempt from the deed recordation and transfer taxes. A qualifying lower-income homeownership household must meet two requirements: (1) household income can be no greater than 120 percent of the lower-income guidelines established for the Washington metropolitan area by the U.S. Department of Housing and Urban Development (HUD), and (2) the household must own the property in fee simple or receive at least a 5 percent qualified ownership interest as part of a shared equity financing agreement. The lower-income household must occupy the unit that qualifies for the deed recordation and transfer tax exemption. The fair market value of the property being transferred cannot exceed 80 percent of the median sale price for homes in the District of Columbia.

The lower-income purchaser or the persons acquiring qualified ownership interests under a shared equity financing agreement must receive a credit against the purchase price of the property equal to the total transfer tax that would have been due without the exemption. This provision is necessary because the seller usually pays the transfer tax.

PURPOSE: The authorizing statute states, "The purpose of this act is to expand homeownership opportunities for lower-income families to the maximum extent possible at the lowest possible cost to the District of Columbia."[497] The statute states, "Expansion of homeownership opportunities for lower-income families is beneficial to the public peace, health, safety, and general welfare."[498]

IMPACT: If they meet the other eligibility criteria described above, families with an annual income no greater than 120 percent of the low-income guidelines set by HUD for the Washington metropolitan area benefit from this tax expenditure.

[497] See D.C. Official Code § 47-3501(7).
[498] See D.C. Official Code § 47-3501(6).

***Deed Recordation and Transfer Tax***
*Exemptions*

## 179. Nonprofit housing associations

District of Columbia Code: D.C. Official Code § 42-1102(13) and § 47-3505(c) (deed recordation tax)
D.C. Official Code § 47-902(10) and § 47-3505(b) (transfer tax)
Sunset Date: None
Year Enacted: 1983

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $319 | $362 | $409 | $455 |

DESCRIPTION: Property that is transferred to a "qualifying nonprofit housing organization"[499] is exempt from the deed recordation and transfer taxes if the organization certifies its intent to do the following within the next 36 months: (1) transfer the property to a household with annual income no greater than 120 percent of the lower-income guidelines established by the U.S. Department of Housing and Urban Development for the Washington metropolitan area, (2) transfer at least 35 percent of the units in a multi-family property to households meeting the lower-income standard described above, or (3) transfer the property to a cooperative housing association that will make at least 50 percent of the units available to households meeting the lower-income standard.

An additional requirement for the transfer tax exemption is that the non-profit housing association receive a credit against the purchase price of the property equal to the transfer tax that would have been due without the exemption. This provision is necessary because the seller usually pays the transfer tax.

PURPOSE: The authorizing statute states, "The purpose of this act is to expand homeownership opportunities for lower-income families to the maximum extent possible at the lowest possible direct cost to the District of Columbia."[500] The statute further states that "Additional support for nonprofit housing organizations … through property tax abatements and other incentives can expand homeownership for lower-income families at little or no additional cost to the District of Columbia."[501]

IMPACT: Nonprofit housing associations and the lower-income households they serve benefit from this provision.

[499] A "qualifying nonprofit housing association" has been approved by the U.S. Internal Revenue Service as exempt from federal income taxation under section 501(c)(3) or 501(c)(4) of the Internal Revenue Code.
[500] See D.C. Official Code § 47-3501(7).
[501] See D.C. Official Code § 47-3501(5).

## *Deed Recordation and Transfer Tax*
*Exemptions*

# 180. Deeds to property transferred to a named beneficiary of a revocable transfer on death

District of Columbia Code: D.C. Official Code § 42-1102(34) and § 19-604
Sunset Date: None
Year Enacted: 2015

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | no estimate | no estimate | no estimate | no estimate |

DESCRIPTION: Deeds to property are transferred to a named beneficiary of a revocable transfer on death deed by reason of the grantor's death. The provision was part of the Residential Real Property Equity and Transparency Act of 2014.

PURPOSE: The provision's purpose is unclear, but it was included in the real property tax overhaul in the Residential Real Property Equity and Transparency Act of 2014.

IMPACT: The tax exemption prevents the double payment of deed tax on transferring a revocable property.

***Deed Recordation and Transfer Tax***
*Exemptions*

## 181. Security interest instrument

District of Columbia Code: D.C. Official Code § 42-1102(33)
Sunset Date: None
Year Enacted: 2015

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | no estimate | no estimate | no estimate | no estimate |

DESCRIPTION: A security interest instrument executed by a borrower in connection with a loan under the Industrial Revenue Bond Forward Commitment Program is entitled to an exemption, provided that a certification from the Mayor that the security interest instrument is entitled to this exemption accompanies it at the time it is presented for recordation. The provision helps to minimize risk related to these transactions by helping to indemnify the District.

PURPOSE: The exemption memorializes and documents the current practice related to these IRB transactions.

IMPACT: Most entities that take advantage of IRBs are tax-exempt and, therefore, not subject to recordation tax under current law. There are a few commercial and nonprofit entities that are not exempt from real property taxes and would be subject to recordation tax; however, they are not taxed because the District's practice has been to exempt these instruments, regardless of the entity's underlying tax status, from recordation.

The practice has been to exempt these transactions from recordation taxes because the security instruments are unified deeds of trust and, therefore, involve the financial interests of the borrowing entity and the District Government. The District's financial interest is a small share of the total bond issuance.

### *Deed Recordation and Transfer Tax*
*Exemptions*

## 182. First-time homebuyer recordation-local portion only

District of Columbia Code: D.C. Official Code § 42-1101 and § 42-1103(e)
Sunset Date: None
Year Enacted: 2017

| (Dollars in thousands) | FY 2024 | FY 2026 | FY 2027 | FY 2028 |
|---|---|---|---|---|
| Revenue Loss | $1,428 | $1,619 | $1,832 | $2,038 |

DESCRIPTION: First-time homebuyers in the District are entitled to a partial recordation tax exemption that meets the following criteria: the buyer must be a bona fide District of Columbia resident; the combined federal adjusted gross income is no higher than 180% of the Area Median Income as provided before the beginning of the real property tax year by the Department of Housing and Urban Development; provide proof that the real property to be purchased is eligible; and provide a copy of the homestead deduction application for the eligible property, signed by the applicant.

The tax rate for deed recordation tax is reduced by 34 percent to 0.725 percent of consideration or fair market value for residential property transfers less than $400,000 and 50 percent of consideration or fair market value for residential property transfers greater than or equal to $400,000. For qualified first-time buyers of an economic interest in a cooperative unit, the rate for an economic interest in a cooperative unit is reduced by 17 percent to 1.825 percent when consideration allocable to the real property is less than $400,000 or reduced by 28 percent to 2.175 percent when consideration allocable to the real property is $400,000 or greater.

PURPOSE: The exemption encourages homeownership to combat homelessness and housing affordability in the District.

IMPACT: This legislation benefits first-time homebuyers in the District. The exemption helps make homebuying in DC achievable for those who may not be income-eligible for other homeownership programs offered by the District.

***Deed Recordation and Transfer Tax***
*Exemptions*

## 183. Charitable organizations

District of Columbia Code: D.C. Official Code § 42-1102(3) for the deed recordation tax
D.C. Official Code § 47-902 (3) for the transfer tax
Sunset Date: None
Year Enacted: 1962 (deed recordation tax) and 1980 (transfer tax)

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $1,282 | $1,453 | $1,645 | $1,830 |

DESCRIPTION: Organizations exempt from real property taxation in the District of Columbia under D.C. Official Code § 47-1002 are exempted from the deed recordation and transfer taxes. Charitable entities are among the groups covered by § 47-1002 that qualify for this blanket exemption.

PURPOSE: The exemption extends the real property tax exemption for charitable entities to the other two taxes on real property: the deed recordation tax and the transfer tax. As a result, charitable organizations are treated uniformly under real property, deed recordation, and transfer taxes.

IMPACT: Charitable entities benefit from this exemption, which might also have spillover benefits for those who receive goods or services from charitable organizations.

### *Deed Recordation and Transfer Tax*
*Exemptions*

## 184. Churches, synagogues, and mosques

District of Columbia Code: D.C. Official Code § 42-1102(3) for the deed recordation tax
D.C. Official Code § 47-902(3) for the transfer tax
Sunset Date: None
Year Enacted: 1962 (deed recordation tax) and 1980 (transfer tax)

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $293 | $332 | $375 | $418 |

DESCRIPTION: Organizations exempt from real property taxation in the District of Columbia under D.C. Official Code § 47-1002 are also exempt from the deed recordation tax and transfer taxes. Churches, synagogues, and mosques are among the groups covered under § 47-1002 that qualify for this blanket exemption.

PURPOSE: The exemption extends the real property tax exemption for places of worship to the two other taxes related to real property: the deed recordation tax and the transfer tax. As a result, churches, synagogues, mosques, and other places of worship are treated uniformly under the real property, deed recordation, and transfer taxes.

IMPACT: Churches, synagogues, mosques, and other places of worship benefit from this exemption when their property is sold.

# SALES TAX

***Sales Tax***
*Exemptions*

## 185. Energy products used in manufacturing

District of Columbia Code: D.C. Official Code § 47-2005(11) and (11A)
Sunset Date: None
Year Enacted: 1949

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $8,340 | $8,502 | $8,756 | $9,030 |

DESCRIPTION: Gross receipts from the sale of natural or artificial gas, oil, electricity, solid fuel, or steam are exempt from the sales tax when these energy products are used for (1) manufacturing, assembling, processing, or refining, or (2) preparing or refrigerating goods when used in a restaurant, including a hotel restaurant.

The exemption for energy used to produce goods in a restaurant took effect on January 1, 2010. The rest of the exemption for energy used in manufacturing dates back to 1949, when the District's sales tax was first established.

Similar exemptions are common in many states but are sometimes provided under broader sales tax exemptions. For example, Virginia exempts manufacturing and agricultural businesses from paying sales taxes on their purchases of materials, machinery, and equipment based on the principle that these inputs are included in the value of goods taxed at the retail level.

PURPOSE: The exemption recognizes that energy products used in manufacturing are ordinary and necessary expenses in the production process rather than outputs offered for retail sale. The sales tax is intended to be a consumption tax rather than a tax on intermediate goods and services consumed or directly used in production.

IMPACT: Manufacturing businesses and restaurants benefit from the exemption. Nevertheless, the exemption creates questions of horizontal equity because many service industries use energy products as inputs but do not receive a sales tax exemption for the costs of natural or artificial gas, oil, electricity, solid fuel, or steam that they use.

*Exemptions*

## 186. Internet access service

District of Columbia Code: D.C. Official Code § 47-2001(n)(2)(F)
Sunset Date: None
Year Enacted: 1999

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $14,682 | $14,967 | $15,415 | $15,896 |

DESCRIPTION: Gross receipts from sales of Internet access services are exempt from the sales tax. "Internet access service" is defined as a service that "enables users to access content, information, electronic mail, or other services offered over the Internet and may also include access to proprietary content, information, and other services as part of a package of Internet access services offered to customers."[502]

Internet access service does not include (1) the sales of data processing and information services that do not involve content, information, electronic mail, or other services offered over the Internet or (2) telecommunication services. The exemption also does not cover online purchases.

The 1998 Internet Tax Freedom Act, approved by Congress, barred state and local taxation of Internet access. The federal Act became permanent law on February 24, 2016, in the Trade Facilitation and Trade Enforcement Act of 2015.

PURPOSE: Proponents of the tax exemption for Internet access contend that it will stimulate the continued growth of a technology with very positive economic and social impacts.

IMPACT: Individuals or firms selling Internet access services benefit from this exemption, as do their customers. Nevertheless, sales tax exemptions of this nature may create economic inefficiencies (by favoring the consumption of some items rather than others based on the tax rather than the value of the product) and raise issues of horizontal equity. For example, some experts argue that it is inequitable to tax the computer hardware that provides Internet access but not the Internet access itself.

[502] See D.C. Official Code § 47-2001(n)(2)(F).

***Sales Tax***
*Exemptions*

## 187. Materials used in development of a qualified supermarket

District of Columbia Code: D.C. Official Code § 47-2005(28)
Sunset Date: None
Year Enacted: 2000

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 20257 |
|---|---|---|---|---|
| Revenue Loss | $302 | $310 | $320 | $327 |

DESCRIPTION: Gross receipts from the "sales of building materials related to the development of a qualified supermarket"[503] are exempt from the sales tax. A qualified supermarket is in a census tract where more than half of the households have incomes below 60 percent of the area median, as determined by the U.S. Department of Housing and Urban Development.

PURPOSE: The exemption encourages the construction and operation of supermarkets in underserved areas of the city.

IMPACT: Individuals and organizations constructing and operating supermarkets in the target areas benefit from this provision. Consumers are also intended beneficiaries of this exemption because it incentivizes supermarkets to locate in areas that lack them. The exemption violates the principle of horizontal equity because other businesses locating in the target areas do not receive an exemption on the purchase of building materials.

The estimate of forgone revenue shown above assumes that three qualified supermarkets will be constructed each year.

[503] See D.C. Official Code § 47-2005(28).

***Sales Tax***
*Exemptions*

## 188. Professional and personal services

District of Columbia Code: D.C. Official Code § 47-2001(n)(2)(B)
Sunset Date: None
Year Enacted: 1949

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $276,079 | $281,443 | $289,862 | $298,923 |

DESCRIPTION: Gross receipts from sales of professional, insurance, or personal services are exempt from sales tax. Examples of exempt sales include accounting and bookkeeping, architectural, consulting, dental, engineering, legal, and physician services.

The Tax Revision Commission Implementation Amendment Act of 2014 (BSA Subtitle (VII) (B)) expanded the sales tax base to include some services not previously taxed in the District of Columbia. These include bottled water delivery services and other direct-selling establishments, carpet and upholstery cleaning services, fitness and recreational sports centers, and other personal care services such as tanning, car washes, bowling centers, and billiard parlors.

Maryland and Virginia provide similar professional, insurance, and personal services exemptions. Only four states (Hawaii, New Mexico, South Dakota, and Washington State) tax professional services, including accounting and bookkeeping, architectural, dental, engineering, legal, and medical services.[504]

PURPOSE: This exemption is part of most state tax systems because the sales tax originated as a levy on purchases of tangible personal property by individuals and businesses rather than a tax on all consumption. Even as the service economy has grown, policymakers have kept exempting professional, insurance, or personal services from the sales tax.

IMPACT: Firms providing professional, insurance, or personal services and their consumers benefit from this exemption. Nevertheless, many experts have pointed out that the substantial growth of services as a percentage of the economy means that a large share of consumption expenditures is not taxed and that tax rates on tangible goods may, therefore, be higher than they otherwise would be.[505] Moreover, the exemption violates the principle of horizontal equity because two taxpayers with equal levels of consumption will pay different amounts of sales tax if one consumes more professional services than the other.

[504] A state-by-state analysis of charging sales tax on services. Available at https://www.avalara.com/us/en/learn/whitepapers/service-taxability-by-state.html

[505] See, for example, Virginia Joint Legislative Audit and Review Commission, Review of the Effectiveness of Virginia Tax Preferences, report to the Governor and General Assembly of Virginia (January 2012), pp. 20-22.

***Sales Tax***
*Exemptions*

## 189. Transportation and communication services

District of Columbia Code: D.C. Official Code § 47-2001(n)(2)(A)
Sunset Date: None
Year Enacted: 1949

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $89,276 | $91,010 | $93,733 | $96,663 |

DESCRIPTION: Gross receipts from transportation and communication services sales are exempt from the retail sales tax. The exemption does not include the sales of data processing services, information services, or local telephone service.

Maryland and Virginia provide similar exemptions for transportation and communication services.

PURPOSE: This exemption was included in the original establishment of the D.C. sales tax in 1949, likely because the sales tax originated as a levy on purchases of tangible personal property by individuals and businesses rather than taxes on all consumption. Even as the service economy has grown, policymakers continue to exempt most services from the sales tax.

IMPACT: This exemption benefits firms providing transportation and communication services. However, it violates the principle of horizontal equity because firms in other industries do not receive similar treatment.

***Sales Tax***
*Exemptions*

## 190. Federal and D.C. governments

District of Columbia Code: D.C. Official Code § 47-2005(1)
Sunset Date: None
Year Enacted: 1949

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $368,911 | $376,078 | $387,329 | $399,436 |

DESCRIPTION: Gross receipts from sales to the United States government, the District of Columbia government, or any instrumentalities of either government are exempt from the sales tax, except for sales to national banks and federal savings and loan associations.

Maryland and Virginia also exempt the state and its political subdivisions (such as counties, cities, and townships) from the sales tax and the federal government exemption.

PURPOSE: The exemption for sales to the U.S. government recognizes the federal government's immunity from taxation by the states or municipalities. This immunity has been established in numerous court decisions, beginning with *McCulloch v. Maryland*, 17 U.S. 316 in 1819, and has been reinforced in other cases including *Clallam County v. United States*, 263 U.S. 341 in 1923; *Cleveland v. United States*, 323 U.S. 329, 333 in 1945; *United States v. Mississippi Tax Commission*, 412 U.S. 363 in 1973; and *United States v. Mississippi Tax Commission*, 421 U.S. 599 in 1975.

The sales tax exemption for the District government eliminates a cost that would ultimately be borne by D.C. taxpayers and can be justified because the local government is usually an intermediate consumer of goods and services rather than the end user.

IMPACT: The federal and District of Columbia governments benefit from this exemption.

***Sales Tax***
*Exemptions*

## 191. Medicines, pharmaceuticals, and medical devices

District of Columbia Code: D.C. Official Code § 47-2005(14) and (15)
Sunset Date: None
Year Enacted: 1949

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $12,318 | $12,558 | $12,933 | $13,337 |

DESCRIPTION: Gross receipts from retail sales of medicines, pharmaceuticals, drugs, and medical devices are exempt from the sales tax. Maryland and Virginia exempt medicine, pharmaceuticals, and medical supplies from the sales tax, a standard practice nationwide. [506] However, D.C., Maryland, and Virginia are among only 10 states exempting non-prescription drugs; one state (Illinois) charges a preferential rate of 1 percent.[507]

PURPOSE: The purpose of the exemption is to make the sales tax more equitable by exempting necessities that absorb a relatively large share of the income of low-income households and to avoid adding to the expense of potentially life-saving medicines, drugs, and medical devices. In addition, the exemption protects the elderly and people in poor health, who spend more on medical care, drugs, and medical products.

IMPACT: This exemption benefits sellers and purchasers of medicines, pharmaceuticals, drugs, and medical devices, as do consumers—particularly those with high medical costs, such as the elderly and individuals with chronic conditions. Nevertheless, the exemption may not be well targeted at helping low-income individuals and families because it is available to all taxpayers. Data on consumer expenditures show that out-of-pocket expenditures on drugs and medical care rise along with income.[508]

Nevertheless, Virginia's Joint Legislative Audit and Review Commission (JLARC) concluded that the sales tax exemption for medicine and other health products significantly benefits the elderly. In examining the impact of the exemption in Virginia, JLARC stated that "(A)verage out-of-pocket reductions in tax liability to households with at least one member 65 or older was $66 in 2008, which was above the statewide average ($38) for all households. Their savings enabled them to purchase a year-and-a-half of prescription drugs for common conditions such as arthritis or diabetes, according to prices under a major retailer's discount prescription drug program."[509]

*Exemptions*

## 192. Groceries

District of Columbia Code: D.C. Official Code § 47-2001(n)(2)(E)
Sunset Date: None
Year Enacted: 1949

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $114,228 | $116,448 | $119,931 | $123,680 |

DESCRIPTION: Gross receipts from sales of food or drinks that are defined as eligible foods under the federal Supplemental Nutrition Assistance Program (SNAP, which was formerly known as the "Food Stamp" program) are exempt from sales tax, except sales of food or drink for immediate consumption or the sale of soft drinks.[510] Snack food is exempt from the sales tax due to a statutory change the district adopted in 2001.[511]

Maryland exempts groceries from the sales tax, while in Virginia, groceries are subject to a one-percent sales tax instead of the general sales tax rate of 5.3.[512] Virginia is one of only five states to impose the sales tax on food and all six states charge a lower rate.[513]

PURPOSE: The exemption makes the sales tax more equitable by exempting necessities that absorb a large share of low-income households' income.

IMPACT: All residents benefit from exempting groceries from the sales tax, but the exemption is particularly important for low-income individuals and families. Some have observed that the benefit for low-income families is smaller than expected because federal law bars sales taxation of food purchased through the SNAP program.

Some experts further contend that sales tax exemptions and reductions for food are poorly targeted because they do not depend on income. Virginia's Joint Legislative Audit and Review Commission reported that households earning more than $70,000 accounted for 44 percent of Virginia households in 2008 but claimed 58 percent of the reduction in tax liability from the partial sales tax exemption for food. At the same time, households earning less than $20,000 comprised 14 percent of Virginia households but received only 7 percent of the total benefit from the lower tax rate.[514] In a report prepared for the D.C. Tax Revision Commission, University of Tennessee professor William Fox stated: "Food could be taxed and low-income households compensated with credits

[510] Food prepared for immediate consumption is taxed at a 10.25 percent rate, compared to the 6 percent general sales tax rate.
[511] This change was part of D.C. Law 13-305, the "Tax Clarity Act of 2000," effective June 9, 2001.
[512] Virginia's sales tax became more complicated due to legislation enacted in 2013. The base rate for the general sales tax is now 5.3 percent, but in the Northern Virginia and Hampton Roads areas, a 0.7 percent add-on raises the total tax to 6 percent. The regional add-on generates revenue for transportation projects.
[513] Federation of Tax Administrators, "State Sales Tax Rates and Food & Drug Exemptions," available at www.taxadmin.org.
[514] Virginia Joint Legislative Audit and Review Commission, p. 33.

against the personal income tax or a smart card could be provided to low-income households to use as payment of sales tax on food purchases."[515]

## 193. Electric motor vehicle excise tax exemption

District of Columbia Code: D.C. Official Code § 50-2201.03(j)(3)(J)
Sunset Date: None
Year Enacted: 2019

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $2,070 | $2,091 | $2,124 | $2,158 |

DESCRIPTION: The electric motor vehicle excise tax exemption, part of the CleanEnergy DC Omnibus Amendment Act of 2018, allows electric motor vehicles to be exempt from the District's motor vehicle excise tax on the issuance of every original certificate of title for a motor vehicle or trailer in the District of Columbia and every subsequent certificate of title issued in the District of Columbia in the case of a sale, resale, or gift, except in the case of a bona fide gift of a vehicle already titled in the District given between spouses, parent and child, or domestic partners. The exemption is an extension of the energy conservation and efficiency initiatives to reduce greenhouse gas emissions in the District.

PURPOSE: The purpose of the exemption is to protect the environment by setting more aggressive renewable energy goals and encouraging reductions in energy use through encouraging consumer choices to reduce emissions in the transportation sector.

IMPACT: The exemption benefits the DC residents who buy electric cars.

***Sales Tax***
*Exemptions*

## 194. Diapers

District of Columbia Code: D.C. Official Code § 47-2005 (39)
Sunset Date: None
Year Enacted: 2019

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $1,904 | $1,941 | $1,999 | $2,061 |

DESCRIPTION: Gross receipts from diaper sales are exempt from the sales tax. For the purposes of the exemption, a diaper is "an absorbent incontinence product that is washable or disposable and worn by a person, regardless of age or sex, who cannot control bladder or bowel movements."[516]

Maryland exempts adult diapers from the sales tax as they are considered medical products; however, diapers for babies and children are fully taxable. Virginia reduced the sales tax rate on diapers and other personal hygiene products to 2.5 percent, the same as the tax rate on food.

PURPOSE: The sales tax exemption on diapers removes items that many consider necessities from the tax code.

IMPACT: Proponents of the exemption note that sales taxes, in general, are regressive and, therefore, disproportionately impact lower-income families.[517]

[516] DC Official Code § 47-2005 (39)
[517] Davis, Aaron C. "The 'tampon tax' fight has reached D.C." *The Washington Post*, April 4, 2016.

*Exemptions*

## 195. Female hygiene products

District of Columbia Code: D.C. Official Code § 47-2005 (38)
Sunset Date: None
Year Enacted: 2019

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $588 | $599 | $617 | $637 |

DESCRIPTION: Gross receipts from sales of feminine hygiene products are exempt from the sales tax. For the purposes of the exemption, feminine hygiene products include "sanitary napkin, sanitary towel, tampon, menstrual cup, or sanitary pad."[518]

Maryland exempts feminine hygiene products from the sales tax as they are considered medical products. In 2019, Virginia reduced the tax rate to 1.5 percent by classifying female hygiene products as necessities similar to food. In July 2022, Virginia removed the sales tax on essentials. The bill went into effect on January 1, 2023.

PURPOSE: The sales tax exemption of feminine hygiene products removes items that many consider necessities from the tax code.

IMPACT: Proponents of the exemption note that sales taxes are generally regressive and, therefore, disproportionately impact lower-income women.[519] Researchers on the topic of menstrual equity have noted that limited access to feminine hygiene products is a problem both across the globe and in the US, leading to school absenteeism, among other problems.[520]

## 196. Materials used in war memorials

District of Columbia Code: D.C. Official Code § 47-2005(16)
Sunset Date: None
Year Enacted: 1957

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $326 | $337 | $349 | $358 |

DESCRIPTION: Gross receipts from the "sales of material to be incorporated permanently in any war memorial authorized by Congress to be erected on public grounds of the United States" are exempt from the sales tax.[521]

PURPOSE: The purpose of the exemption is to facilitate the construction of war memorials on public grounds in the District of Columbia.

IMPACT: The exemption benefits the U.S. government by providing a sales tax exemption for materials used in the construction of war memorials that are authorized by Congress and built on federally owned land.

According to the National Capital Planning Commission (NCPC), work for the World War I Memorial at Pershing Park in Washington, D.C., is underway. The memorial is expected to be completed in Fall 2024. A Desert Storm/Desert Shield Memorial is a new national monument to be built at the National Mall in Washington, D.C. The groundbreaking ceremony occurred on July 14, 2022.

[521] See D.C. Official Code § 47-2005(16).

***Sales Tax***

## 197. Nonprofit (501(c)(4)) organizations

District of Columbia Code: D.C. Official Code § 47-2005(22)
Sunset Date: None
Year Enacted: 1987

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $166,954 | $170,198 | $175,289 | $180,769 |

DESCRIPTION: Gross receipts from sales to an organization exempt from federal corporate income tax under section 501(c)(4) of the Internal Revenue Code are exempt from District of Columbia sales taxation. Organizations covered by section 501(c)(4) include "civic leagues or organizations not organized for profit but operated exclusively for the promotion of social welfare, or local associations of employees, the membership of which is limited to the employees of a designated person or persons in a particular municipality, and the net earnings of which are devoted exclusively to charitable, educational, or recreational purposes."[522]

Maryland and Virginia exempt non-profit organizations from the sales tax, as do all but five states with a broad-based sales tax.[523]

PURPOSE: The purpose of the exemption is to support the activities of non-profit organizations that promote social welfare.

IMPACT: Tax-exempt organizations under section 501(c)(4) of the Internal Revenue Code and the people those organizations serve benefit from this exemption. Still, sales tax exemptions for organizations narrow the tax base and may result in a higher sales tax rate for non-exempt individuals and organizations. Another consideration is that tax benefits for non-profits give them an advantage in direct competition with for-profit firms.[524]

In a recent study, the Virginia Joint Legislative Audit and Review Commission (JLARC) found that the rate of increase in non-profit activity (as measured by per-capita expenditures) did not change significantly after 2004 when statutory changes broadened the number of non-profits eligible for Virginia's sales tax exemption. JLARC found that many charitable non-profits operating in Virginia did not use the exemption. Nevertheless, JLARC concluded that the exemption helps organizations that meet important needs such as emergency medical services, food, and housing assistance and that the non-profits that provide the services reduce the state's burden of directly providing or funding the services.[525]

## 198. Semi-public institutions

District of Columbia Code: D.C. Official Code § 47-2005(3)
Sunset Date: None
Year Enacted: 1949

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $53,411 | $54,449 | $56,078 | $57,831 |

DESCRIPTION: Gross receipts from sales to semi-public institutions are exempt from the sales tax if (1) the institution obtains a certificate from the Mayor stating that the institution is entitled to the sales tax exemption, (2) the vendor keeps a record of each sale, (3) the institution is located in the District of Columbia, and (4) the property or services purchased are for use or consumption, or both, in maintaining and operating the institution for the purpose for which it was established, or for honoring the institution or its members.

A semi-public institution is defined as "any corporation, and any community chest, fund, or foundation, organized exclusively for religious, scientific, charitable, or educational purposes, including hospitals, no part of the net earnings of which inures to the benefit of any private shareholder or individual."[526]

Maryland and Virginia exempt non-profit organizations from the sales tax, as do all but five states with a broad-based sales tax.[527]

PURPOSE: The exemption supports the mission of private, non-profit institutions that provide religious, educational, social, philanthropic, and other services that have important public benefits. It recognizes and encourages the public benefits provided by many non-profit entities, such as hospitals and libraries.

IMPACT: Semi-public (non-profit) institutions and the people they serve benefit from this exemption. Still, sales tax exemptions for particular organizations narrow the tax base and may result in a higher sales tax rate for non-exempt individuals and organizations. Another consideration is that tax benefits for non-profits give them an advantage in direct competition with for-profit firms.[528]

In a recent study, the Virginia Joint Legislative Audit and Review Commission (JLARC) found that the rate of increase in non-profit activity (as measured by per-capita expenditures) did not change significantly after 2004 when statutory changes broadened the number of non-profits eligible for Virginia's sales tax exemption. JLARC found that many charitable non-profits operating in Virginia did not use the exemption. Nevertheless, JLARC concluded that the exemption helps organizations that meet important needs such as emergency medical services,

## 199. Miscellaneous

District of Columbia Code: D.C. Official Code § 47-2005
Sunset Date: None
Year Enacted: 1949 and subsequent years

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | no estimate | no estimate | no estimate | no estimate |

DESCRIPTION: D.C. law includes a few sales-tax exemptions that are relatively small in scope. These miscellaneous exemptions cover gross receipts from (1) sales of materials and services to the printing clerks of the U.S. House of Representatives, and sales of materials and services by the printing clerks, (2) casual and isolated sales by a vendor who is not regularly engaged in the business of retail sales, (3) sales of food, beverages, and other goods made for use in the U.S. House of Representatives cloakrooms, and sales of food, beverages, and other goods made by anyone involved in operating the cloakrooms, (4) sales of food or beverages on a train, airline, or other form of transportation operating in interstate commerce, (5) food or drink that is delivered and sold without profit by a non-profit volunteer organization to persons who are confined to their homes, (6) sales of food or drink made by a senior citizen residence to the residents, guests, and employees of the senior residence, (7) sales of vessels that are subject to Article 29 of the Police Regulations, (8) sales of residential cable television services and commodities,[530] (9) sales of printing services and tangible personal property to a publisher that prints and distributes its own newspaper in the District of Columbia free of charge, (10) sales of two-way land mobile radios used for taxicab dispatch and communication, (11) sales of material or equipment used in the construction, repair, or alteration of real property, provided that the materials are temporarily stored in the District of Columbia for not longer than 90 days to transport the property outside the District for use solely outside the District, and (12) sales by the U.S. government or the District government.

Sales tax exemptions for infrequent or isolated transactions are common in other states.

PURPOSE: The miscellaneous exemptions serve a variety of purposes, including (1) avoiding an administrative burden on those who sell goods or services infrequently or incidentally, (2) preventing double-taxation for certain goods or services subject to other taxes when they are sold, (3) exempting goods or carriers that are passing through the District through interstate commerce or transportation, and (4) promoting the purchase of certain items.

IMPACT: As described above, these exemptions benefit various groups of vendors and consumers. The Office of Tax and Revenue may also benefit because the cost of collecting sales tax on incidental or unusual transactions might exceed the revenue generated. There is no estimate of the forgone revenue for these provisions because most of the individual items are very small and difficult to estimate.

[530] These sales are subject to a gross receipts tax.

***Sales Tax***
*Exemptions*

## 200. State and local governments

District of Columbia Code: D.C. Official Code § 47-2005(2)
Sunset Date: None
Year Enacted: 1949

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | Minimal | minimal | minimal | minimal |

Note: "Minimal" means that the forgone revenue is estimated as less than $50,000 per year, although precise data are lacking.

DESCRIPTION: Gross receipts from sales to a state or any of its political subdivisions (counties, cities, townships) are exempt from the sales tax, provided that the state grants a similar exemption to the District of Columbia. The term "state" refers to the states, territories, and possessions of the United States.

PURPOSE: The exemption recognizes that purchases made by state and local governments are not meant for final consumption but rather as inputs to the provision of goods and services by those governments.

IMPACT: State and local governments, as do the taxpayers in those jurisdictions, benefit from the exemption. The District of Columbia also benefits indirectly because it will not receive an exemption from the sales tax in other jurisdictions if it does not provide a reciprocal exemption.

***Sales Tax***
*Exemptions*

## 201. Valet parking services

District of Columbia Code: D.C. Official Code § 47-2001 (n)(1)(L)(iv-I)
Sunset Date: None
Year Enacted: 2002

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $83 | $85 | $88 | $90 |

DESCRIPTION: Gross receipts from sales of valet parking services are exempt from the sales tax.

PURPOSE: The District's sales tax generally includes "the sale of or charge for the service of parking, storing, or keeping motor vehicles or trailers."[531] Nevertheless, the District had never levied the tax on valet parking services, and policymakers decided to codify the sales tax exemption for valet parking services.[532]

IMPACT: Valet parking providers and their customers benefit from this exemption. The exemption creates a horizontal inequity because other forms of parking are not exempt from taxation.

In 2022, the District Department of Transportation reported that 14 valet parking permits were in effect.

[531] See D.C. Official Code § 47-2001(n)(1)(L).
[532] Office of the Chief Financial Officer, "Fiscal Impact Statement: 'Fiscal Year 2003 Budget Support Act of 2002,'" June 4, 2002, p. 7.

# PERSONAL PROPERTY TAX

***Personal Property Tax***
*Exemptions*

## 202. Qualified supermarkets

District of Columbia Code: D.C. Official Code § 47-1508(a)(9)
Sunset Date: None
Year Enacted: 2000

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $349 | $301 | $304 | $307 |

DESCRIPTION: The personal property of a "qualified supermarket" is exempt from personal property taxation for 10 years, subject to several conditions. First, the real property where the personal property is located must continue to be used as a supermarket. Second, if the supermarket leases the real property where it is located, the property owner must reduce the rent charged to the supermarket by the amount of any real property tax exemption it receives for being the site of a qualified supermarket. Third, the supermarket must meet its requirements under the "First Source" program, which requires private organizations receiving D.C. government aid to prioritize D.C. residents filling new jobs.[533]

A "qualified supermarket" is located in a census tract in an eligible area.
Generally, an eligible area is:

(i) An area consisting of those properties within or abutting the boundaries of low-income census tracts where a significant number of residents are more than 1/2 mile from the nearest supermarket, as designated based on the 2019 data from the United States Department of Agriculture Food Access Research Atlas; or
(ii) An area consisting of properties within or abutting proximal neighborhood groups with over 20% participation in the Supplemental Nutrition Assistance Program or other public assistance programs as designated in the 2018 District of Columbia Health Equity Report.

For supermarkets under construction as of January 1, 2021, with a certificate of occupancy issued and an application for certification to get the exemption filed by July 1, 2023, an eligible area is:

(i) A historically underutilized business zone, as defined by section 3(p)(1) of the Small Business Act; or
(ii) Census tracts 103, 33.01, 94, 95.05, 95.07, or 95.08.[534]

PURPOSE: The exemption encourages the construction and operation of supermarkets in underserved areas of the city.

IMPACT: Individuals and organizations constructing and operating supermarkets in the target areas benefit from this provision. By extension, residents of these areas benefit by gaining greater access to a wider range of food in their neighborhoods. The exemption violates the principle of horizontal equity because other businesses that locate in the same areas do not receive similar treatment, nor do supermarkets located outside of the eligible areas.

[533] Specifically, the beneficiaries of D.C. government aid are expected to hire D.C. residents for at least 51 percent of their new jobs.
[534] D.C. Official Code § 47-1508(1D)

## 203. BID corporations

District of Columbia Code: D.C. Official Code § 47-4668
Sunset Date: None
Year Enacted: 1902

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | n/a | n/a | n/a | n/a |

DESCRIPTION: The personal property of any non-profit organization organized exclusively for religious, scientific, charitable, or educational purposes, including hospitals, is exempt from personal property taxation, provided that the organization obtains a letter from the Chief Financial Officer stating that it is entitled to the exemption. Any personal property used for activities that generate unrelated business income subject to tax under section 511 of the U.S. Internal Revenue Code of 1986 is not exempt from the personal property tax.

PURPOSE: The exemption supports a general policy of providing tax exemptions to non-profit organizations that provide religious, scientific, charitable, educational, or cultural benefits to the public.

IMPACT: This exemption benefits non-profit organizations organized exclusively for religious, scientific, charitable, educational, or cultural purposes. The narrowing of the tax base may make it possible. By narrowing the tax base, this and similar exemptions may increase the tax rate on entities that must pay the tax.

***Personal Property Tax***
*Exemptions*

## 204. Non-profit organizations

District of Columbia Code: D.C. Official Code § 47-1508(a)(1)
Sunset Date: None
Year Enacted: 1902

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $6 | $6 | $6 | $6 |

DESCRIPTION: The personal property of any non-profit organization organized exclusively for religious, scientific, charitable, or educational purposes, including hospitals, is exempt from personal property taxation, provided that the organization obtains a letter from the Chief Financial Officer stating that it is entitled to the exemption. Any personal property used for activities that generate unrelated business income subject to tax under section 511 of the U.S. Internal Revenue Code of 1986 is not exempt from the personal property tax.

PURPOSE: The exemption supports a general policy of providing tax exemptions to non-profit organizations that provide religious, scientific, charitable, educational, or cultural benefits to the public.

IMPACT: This exemption benefits non-profit organizations organized exclusively for religious, scientific, charitable, educational, or cultural purposes. The narrowing of the tax base may make it possible. By narrowing the tax base, this and similar exemptions may increase the tax rate on entities that must pay the tax.

*Exemptions*

## 205. Motor vehicles and trailers

District of Columbia Code: D.C. Official Code § 47-1508(a)(3)
Sunset Date: None
Year Enacted: 1954

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2024 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $375 | $379 | $382 | $387 |

DESCRIPTION: Any motor vehicle or trailer registered in the District of Columbia is exempt from personal property taxation, except that special equipment mounted on a motor vehicle or trailer not used for transporting persons or property is taxed as tangible personal property. The District's personal property tax applies only to business property, so the motor vehicles owned by District residents for their personal use would not be taxed even if this exemption were not in place.

PURPOSE: The reason for the exemption is unknown, but many states do not include motor vehicles in their personal property tax.[535] Motor vehicles are exempt from the personal property tax in Maryland, but personal and commercial motor vehicles in Virginia are subject to the personal property tax.[536]

IMPACT: Owners of commercial motor vehicles and trailers benefit from this exemption. As of June 2023, there were 12,511 commercial vehicles registered in the District of Columbia, according to the D.C. Department of Motor Vehicles.

The exemption violates the principle of economic neutrality because firms' personal property tax liability could vary depending on the type of property owned, even if they have the same level of income or assets.

[535] John Bowman, "Personal Property Taxation" in District of Columbia Tax Revision Commission, *Taxing Simply, Taxing Fairly: Full Report* (1998), Chapter H, p. 204.
[536] In Virginia, each city or county sets its own personal property tax rate, and the state subsidizes some personal property tax relief for non-commercial motor vehicles.

# LOCAL TAX EXPENDITURES (unknown if used)

***Income Tax***
*Credits*

## 206. Paid leave for organ or bone marrow donors

District of Columbia Code: D.C. Official Code § 47-1807.08 and § 47-1808.08
Sunset Date: None
Year Enacted: 2006

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Business Income Tax Loss | no estimate | no estimate | no estimate | no estimate |
| Personal Income Tax Loss | $0 | $0 | $0 | $0 |
| **Total** | **no estimate** | **no estimate** | **no estimate** | **no estimate** |

DESCRIPTION: A business that provides its employees with a paid leave of absence to serve as organ or bone marrow donors may claim a non-refundable credit equal to 25 percent of the regular salary paid during the leave of absence, not to exceed 30 days for an organ donation and seven days for a bone marrow donation.

To qualify for the credit, the leave provided by the business must be in addition to any medical, personal, or other paid leave provided to the employee. In addition, the credit does not apply if the employee is eligible for leave under the U.S. Family and Medical Leave Act of 1993. The credit does not reduce a business's minimum tax liability, and the business cannot deduct the salary paid to the employee during any period for which the paid leave is in effect.

Neither Maryland nor Virginia offers employer incentives to encourage organ or bone marrow donations. However, Virginia allows organ and tissue donors to take personal income tax deductions of up to $5,000 (10,000 for joint filers) or the actual amount paid, whichever is less, for unreimbursed medical expenses that have not been claimed as a medical deduction on the taxpayer's federal income taxes. In addition, Virginia allows taxpayers to deduct from their taxable income the fee paid for an initial screening to become a bone marrow donor, provided that the individual was not reimbursed for the fee and did not claim a deduction for the fee on his or her federal return. Maryland provides up to $10,000 tax credit to people donating all or part of their liver, kidney, pancreas, intestine, lung, or bone marrow and up to 30 days (in any 12-month period) of paid leave to state employees for organ donation.

PURPOSE: The purpose of the credit is to increase the number of private employers who allow their employees paid leave to serve as organ and bone marrow donors.

IMPACT: Employers who provide their employees with paid leave to serve as organ or bone marrow donors are the intended beneficiaries of this provision, which should also generate indirect benefits by expanding the number of organ or bone marrow donors.

The revenue loss for FY 2024-FY 2027 cannot be estimated, because ORA follows the policy of the U.S. Internal Revenue Service providing that, "No statistical tabulation may be released outside the agency with cells containing data from fewer than three returns." [537] This policy is intended to protect the confidentiality of individual tax records.

[537] U.S. Internal Revenue Service, Publication 1075, "Tax Information Security Guidelines for Federal, State, and Local Agencies and Entities" (September 2016), p. 125.

*Credits*

## 207. Employer-assisted home purchases

District of Columbia Code: D.C. Official Code § 47-1807.07 and § 47-1808.07
Sunset Date: None
Year Enacted: 2002

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Business Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $0 | $0 | $0 | $0 |
| **Total** | **$0** | **$0** | **$0** | **$0** |

DESCRIPTION: A business in the District of Columbia with at least one employee may receive a tax credit equal to one-half of the amount of homeownership assistance provided to its employees during the taxable year, provided that (1) the credit received for each employee shall not exceed $2,500, (2) the assistance is provided through a certified employer-assisted home purchase program, (3) the assistance is used for the purchase of a qualified residential real property, and (4) the eligible employee is a new homebuyer (someone who did not own a principal place of residence in the District in the prior 12 months).

To be eligible, an employee must have a household income less than or equal to 120 percent of the area median income.

PURPOSE: The credit's purpose is to leverage private-sector assistance for new homeownership in the District of Columbia among low—to moderate-income individuals and families. By providing a tax credit equal to 50 percent of the housing assistance provided by a business, up to $2,500 annually, the District has, in effect, created a matching incentive for employer-assisted home purchases.

IMPACT: This tax credit benefits low—to moderate-income taxpayers who are eligible for an employer-assisted home purchase program. There may also be spillover benefits in terms of a stronger tax base for the District, increased demand for housing, and more stable neighborhoods.

# UNUSED LOCAL TAX EXPENDITURES (not taken)

*Subtractions*

## 208. Housing relocation and assistance payments

District of Columbia Code: D.C. Official Code § 42-2851.05, § 42-3403.05, and 47-1803.02(a)(2)(R)
Sunset Date: None
Year Enacted: 1980 (rental housing conversion) and 2002 (federal housing assistance programs)

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Business Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $0 | $0 | $0 | $0 |
| **Total** | **$0** | **$0** | **$0** | **$0** |

DESCRIPTION: The "Rental Housing Conversion and Sale Act of 1980" (D.C. Law 3-86) requires an owner who converts rental housing into a condominium or cooperative to provide a relocation payment to each tenant who does not purchase a unit, share, or sign a lease of at least five years. In addition, the Department of Housing and Community Development (DHCD) must provide a housing relocation payment of up to $1,000 and housing assistance payments for three years to each low-income tenant who does not purchase a unit or share in a condominium or cooperative conversion. The formula for determining the housing assistance payment is outlined in § 42-3403.04 of the D.C. Official Code. Housing relocation and assistance payments are excluded from D.C. income tax.

In addition, the "Housing Act of 2002" (D.C. Law 14-114) authorizes the Mayor to provide relocation services to the tenants of a building that discontinues its participation in a federal housing assistance program. The relocation services include information about available housing and relevant assistance programs and relocation payments of as much as $500 per tenant. The relocation payments are excluded from D.C. income tax.

PURPOSE: The exclusions for housing relocation and assistance payments aim to protect tenants, particularly low-income tenants, who are displaced by a landlord's decision to convert rental housing into owner-occupied housing or to cease participating in a federal housing assistance program.

IMPACT: Tenants receiving housing relocation and assistance payments are the intended beneficiaries of this provision. Although DHCD advertises the availability of housing relocation and assistance payments to tenants displaced by a rental housing conversion, no one has applied in about five years. Because of the small scale of the housing relocation and assistance program, the revenue loss for fiscal years 2024 through 2027 is estimated as "0".

***Real Property Tax***
*Abatements*

## 209. Non-profit organizations locating in designated neighborhoods

District of Columbia Code: D.C. Official Code § 47-857.11 - § 47-857.16
Sunset Date: None
Year Enacted: 2010

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $0 | $0 | $0 | $0 |

DESCRIPTION: Non-profit organizations,[538] and property owners who lease office space to non-profits can qualify for real property tax abatements for a period of 10 years if they are in an "eligible non-profit zone." The authorizing statute defines five non-profit zones and allows the Mayor to designate additional zones, which an act of the Council must approve.

Eligible non-profits or property owners can receive a real property tax abatement of $8 per square foot for 10 consecutive years if they: (1) purchase or lease 5,000 square feet of office space, (2) occupy at least 75 percent of the space, (3) purchase or lease the space at the market rate, and net of any real estate taxes, (4) do not receive any other real property tax abatement or tax-increment financing for the office space, and (5) occupy the new space by September 30, 2013, if located in the Capitol Riverfront, Mount Vernon Triangle, or NOMA zones, or by September 30, 2016, if located in the Anacostia zone, the Minnesota-Benning zone, or a zone designated by the Mayor.

Eligible non-profits or property owners cannot claim the abatement for more than 100,000 square feet of office space, and the annual abatement cannot exceed their real property tax liability. The total annual abatement is capped at $500,000, and the total abatement for each zone over 10 years is capped as follows: $600,000 for the Anacostia zone, $2.6 million for the Capitol Riverfront zone, $800,000 in zones designated by the Mayor; $600,000 in the Minnesota-Benning zone, $1.2 million in the Mount Vernon Triangle zone, and $2.6 million in the NOMA zone. Non-profits must apply to the Mayor and receive a certification of eligibility to claim an abatement.

PURPOSE: The purpose of the abatement is "to provide an incentive for (non-profits) to locate their offices in emerging commercial neighborhoods of the District of Columbia."[539]

IMPACT: Eligible non-profits and property owners who lease space to the non-profits benefit from the abatements. Two non-profits, the American Iron and Steel Institute at 25 Massachusetts Avenue, N.W., and Case Western Reserve, at 820 First Street, N.E., have been approved for the abatements and received them through FY 2021,[540] but there are no plans to approve additional abatements at this time.

[538] For purposes of this program, eligible non-profit organizations are those that are exempt from federal income tax under sections 501(c)(3), (4), and (6) of the U.S. Internal Revenue Code.
[539] See Title 10-B, Section 6300.1 of the D.C. Municipal Regulations.
[540] Although the Office of Revenue Analysis normally does not provide tax information about specific individuals or organizations, D.C. Official Code § 47-1001 allows disclosure of tax-exempt properties.

***Real Property Tax***
*Abatements*

## 210. Improvements to low-income housing

District of Columbia Code: D.C. Official Code § 47-866
Sunset Date: None
Year Enacted: 2002

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $0 | $0 | $0 | $0 |

DESCRIPTION: If the owner of an eligible housing accommodation makes improvements of at least $10,000 per housing unit in a 24-month period, the owner is eligible for a tax abatement equal to the increase in real property tax liability for each of the subsequent five years, relative to a base year before the improvements were completed.

To qualify, the owner must offer at least 25 percent of the units at affordable rents to households below 50 percent of the area median. In addition, the owner must maintain the property as low-income housing throughout the five-year period and is not eligible for the abatement if he or she has recovered the renovation costs through another program.

The total abatements provided through this tax provision are capped at $1 million annually. To receive the benefit, the property owner must apply to the Mayor at least 30 days before the physical improvements begin and receive certification from the Mayor after the improvements are completed. The Mayor must also determine that the improvements are unlikely to be made without the tax abatement. In Mayor's Order 2009-202, dated November 25, 2009, Mayor Fenty designated the Department of Housing and Community Development (DHCD) as the agency responsible for administering this tax abatement program.[541]

PURPOSE: The abatements are intended to preserve and upgrade the supply of affordable housing by encouraging owners to rehabilitate their housing units and making the abatements contingent on the affordability of the housing to low-income individuals and families.

IMPACT: This provision intends to benefit the owners of affordable housing accommodations who improve their housing, along with the low-income residents who live in the housing units. Nevertheless, DHCD has not received any applications for the abatement in recent years.

[541] Mayor's Order 2009-202, entitled "Delegation of Authority – Tax Abatements under Section 291 of the Housing Act of 2002," was published in the D.C. Register, Vol. 56, No. 49, p. 9222, December 4, 2009.

Year Enacted: 2001

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $0 | $0 | $0 | $0 |

DESCRIPTION: Two types of non-residential or mixed-use buildings are eligible for a five-year property tax freeze if more than 50 percent of the tenants are qualified high-technology companies or at least 50 percent of the aggregate square footage is leased to a qualified high-technology company using the premises as an office or retail space.

First, new buildings that received their initial certificate of occupancy after December 31, 2000, are eligible for the property tax freeze. In addition, existing buildings that were improved to adapt or convert the property for use by a qualified high-technology company are also eligible for tax abatement.

As of 2020, a high-technology company is considered "qualified" if it (1) has ten or more employees in the District and (2) derives at least 51 percent of gross revenues earned in the District from technology-related goods and services such as Internet-related services and sales; information and communication technologies, equipment and systems that involve advanced computer software and hardware; and advanced materials and processing technologies. The property tax abatements are part of incentives for high-technology firms authorized by D.C. Law 13-256, the "New E-conomy Transformation Act of 2000."[542]

In recent years, the Downloading Lost Revenues Amendment Act of 2019 and the QHTC Tax Incentives Modification Amendment Act of 2020 (Subtitle (VII)(M) of the FY 2021 Budget Support Act of 2020) have amended or repealed other QHTC provisions, as described elsewhere in this report.

Prince George's County offers a real property tax credit for businesses that are involved primarily in high-technology manufacturing, fabrication, assembling, or research and development and have (1) made at least a $500,000 investment in 5,000 square feet or more of real property that is newly constructed or substantially renovated, and (2) create at least 10 new full-time positions over three years. The credit offsets the property tax arising from any increase in the firm's real property assessment in the first year and is then phased out over the next four years.

PURPOSE: The abatement ensures that high-technology companies have adequate space and protects property owners against sharp increases in their tax liability that may accompany the development or conversion of space for use by high-technology companies. More generally, the

[542] The other incentives, which include increased expensing of capital assets, a reduced corporate tax rate, employment credits, sales tax exemptions, and personal property tax exemptions, are discussed elsewhere in this section.

tax abatement is intended to encourage the growth of high-technology companies in the District of Columbia and thereby expand the District's economy and employment base.

IMPACT: High-technology companies in the District of Columbia and the property owners who lease space to high-technology companies are the intended beneficiaries of this provision. One property in the District of Columbia received the tax abatement for leasing space to a QHTC, and the Office of Tax and Revenue reported that the abatement on that property lasted through the end of FY 2017. The abatement violates the principle of horizontal equity because property owners renting to tenants who are not qualified high-technology companies are not eligible for similar tax relief.

## 212. Preservation of section 8 housing in qualified areas

District of Columbia Code: D.C. Official Code § 47-865
Sunset Date: None
Year Enacted: 2002

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $0 | $0 | $0 | $0 |

DESCRIPTION: If the owner of a housing accommodation who receives subsidies through a project-based housing assistance program ("Section 8" program) of the U.S. Department of Housing and Urban Development (HUD) renews or extends the HUD contract with substantially the same conditions for at least five years, the owner is eligible for a tax abatement. To qualify, the housing must be located in an area where the average rent for one-bedroom and two-bedroom apartments exceeds the fair-market rent (as defined by HUD) by 25 percent or more.

If the contract is renewed for five years, the owner qualifies for a tax abatement for each of the five years equal to 75 percent of any increment to his or her real property tax liability compared to a base year immediately before the first year of the abatement. If the contract is renewed for 10 years, the owner qualifies for a tax abatement for each year equal to 100 percent of the increment to his or her real property tax liability compared to the base year.

The Department of Housing and Community Development administers this tax abatement.[543]

PURPOSE: The abatement aims to preserve affordable housing by encouraging landlords to continue participating in federal housing programs for low-income households. The abatements are limited to areas where the average rent exceeds the fair-market rent by 25 percent to target the benefits where they are most needed.[544]

IMPACT: This provision intends to benefit the owners of housing accommodations in qualified areas who renew their contracts with HUD to provide Section 8 housing and residents of federally subsidized housing located in qualified areas. However, there are presently no participants in this abatement program. Only one property owner has claimed the abatement for preserving section 8 housing, but that abatement has expired.

[543] See Mayor's Order 2009-202, entitled "Delegation of Authority – Tax Abatements under Section 291 of the Housing Act of 2002," D.C. Register, Vol. 56, No. 49, p. 9222, December 4, 2009.
[544] This summary draws on the Council of the District of Columbia, Committee on Finance and Revenue, "Committee Report on Bill 14-183, the 'HomeStart Financial Incentives Act of 2001," dated November 13, 2001. The tax abatements for preservation of section 8 housing originated in Bill 14-183, which became Law 14-114, the "Housing Act of 2002," effective April 19, 2002.

***Real Property Tax***
*Abatements*

## 213. Single-room-occupancy housing

District of Columbia Code: D.C. Official Code § 42-3508.06
Sunset Date: None
Year Enacted: 1994

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $0 | $0 | $0 | $0 |

DESCRIPTION: The Mayor is authorized to provide tax abatements, as well as deferral or forgiveness of water and sewer fees and other indebtedness to the District government, to encourage the development of single-room-occupancy housing for low- and moderate-income tenants. These incentives would be granted following negotiations and the signing of a written agreement between the Mayor and housing providers who are developing or operating single-room-occupancy housing accommodations.

The written agreement may establish a formula for abating property tax liability for the relevant property or properties. The abatement applies for a period of no longer than 10 years, beginning during the first year that the newly constructed or rehabilitated single-room occupancy housing becomes available for occupancy.

To qualify for the incentives, a housing provider must demonstrate to the satisfaction of the Mayor that the single-room-occupancy housing (1) is affordable to low- and moderate-income tenants and that the rent is reduced by the benefits received, (2) complies with the District's zoning regulations, (3) includes at least 95 square feet of space and a clothing storage unit, (4) provides toilet and shower or bathing facilities on each floor, (5) includes common day room, kitchen, and laundry facilities, (6) provides a 24-hour manual or electronic security system, and (7) is supervised by a manager who resides on the premises.

PURPOSE: The incentives aim to encourage the development of single-room-occupancy housing for low- and moderate-income tenants.

IMPACT: This provision is intended to benefit organizations that develop or operate single-room occupancy housing for low—and moderate-income tenants and tenants who need affordable housing. Nevertheless, there is no evidence that the incentives have been used.

***Real Property Tax***
*Abatements*

## 214. Vacant rental housing

District of Columbia Code: D.C. Official Code § 42-3508.02
Sunset Date: None
Year Enacted: 1985

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $0 | $0 | $0 | $0 |

DESCRIPTION: An owner of newly constructed rental housing accommodations is eligible for tax abatements equal to 80 percent of tax liability during the first year the housing becomes available for rental. Each succeeding year, the tax abatement would be reduced by 16 percentage points until the property is fully taxable.

When vacant rental accommodations that have been rehabilitated become available, the property owner also becomes eligible for an 80 percent reduction of the increased tax liability that results from the rehabilitation. In each succeeding year, the tax abatement would be reduced by 16 percentage points until the full value of the property is taxable. In addition, the Mayor may defer or forgive any indebtedness owed to the District or forgive any outstanding tax liens when a vacant rental accommodation is being rehabilitated under this program.

A project eligible for tax abatement or forgiveness of any indebtedness or tax lien through this program must be certified by the Mayor as being "in the best interest of the District and … consistent with the District's rental property needs in terms of its location, type, and variety of sizes or rental units."[545] A property is not eligible for this program if the property receives tax incentives for new residential development in targeted neighborhoods (see tax expenditures #133 and #134).

PURPOSE: The abatement's purpose is to expand the supply of safe and affordable rental housing for low—to moderate-income residents of the District of Columbia.

IMPACT: This tax incentive is intended for renters and owners of newly constructed or rehabilitated rental housing. Nevertheless, there is no evidence that any abatements have been awarded through this program in recent years.

***Real Property Tax***
*Exemptions*

## 215. Resident management corporations

District of Columbia Code: D.C. Official Code § 47-1002(24)
Sunset Date: None
Year Enacted: 1992

| (Dollars in thousands) | FY 2024 | FY 2026 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $0 | $0 | $0 | $0 |

DESCRIPTION: Public housing transferred to a qualifying resident management corporation is exempt from deed recordation and transfer taxes. A resident management corporation is a non-profit corporation where public housing residents are the sole voting members.

PURPOSE: The exemption's purpose is to expand the opportunities of low-income families who live in a public housing project to become owners of the housing. Resident ownership is also expected to help stabilize neighborhoods by giving residents a greater stake in the safety and upkeep of the community.

IMPACT: Resident management corporations and the individuals they serve are the intended beneficiaries of this provision. According to the D.C. Housing Authority, the Kenilworth-Parkside project is the only property transferred to a resident management corporation (this transfer took place in 1992). Presently, no exemptions are projected for the FY 2024 through FY 2027 period.

***Real Property Tax***
*Multiple*

## 216. Economic development zone incentives

District of Columbia Code: D.C. Official Code § 6-1501 - § 6-1503
Sunset Date: None
Year Enacted: 1988

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $0 | $0 | $0 | $0 |

DESCRIPTION: The D.C. law designates three economic development zones eligible for tax and other development incentives: the Alabama Avenue zone, the D.C. Village zone, and the Anacostia zone. The Mayor may also designate additional economic development zones, subject to Council approval by resolution. The designation of additional zones must be based on evidence of economic distress, such as high levels of poverty, unemployment, low income, population loss, and other criteria outlined in the authorizing statute.

The real property incentives include property tax reductions that are gradually phased out over five years (the reduction is 80 percent the first year and is then reduced by 16 percent each year until reaching zero in year six); the deferral or forgiveness of any property tax owed on the property; and the forgiveness of costs or fees associated with a nuisance property infraction. To qualify, a property owner in an eligible zone must have constructed or substantially rehabilitated the property after October 20, 1988, and comply with zoning regulations.

The Mayor must submit, and the Council must approve a resolution that qualifies the property for the incentives. The resolution must identify the real property and its owner, specify each tax or charge to be reduced, deferred, or forgiven, and state the dollar amount of each tax incentive.

Montgomery County offers enterprise zone real property tax credits to businesses that are located in designated areas of downtown Silver Spring, Takoma Park/Long Branch, and Wheaton. The credits start at 80 percent of the increase in real property liability, relative to a base year, and are phased out over 10 years. Prince George's County offers revitalization tax credits for construction or renovation of commercial and residential structures. The credits equal 100 percent of the increased assessment value relative to a base year and are then phased out in 20 percent annual increments. Virginia replaced its enterprise zone tax credits with a grant program.

PURPOSE: The incentives encourage commercial, industrial, and residential development, thereby creating jobs, increasing homeownership, and stabilizing neighborhoods marked by high poverty and unemployment rates, low-income levels, population loss, and other indicators of economic distress.

IMPACT: The incentives are intended for owners of newly constructed or improved real property in an economic development zone. However, only two incentive packages have been approved since the zones were created, and neither is in effect today.

***Real Property Tax***
*Multiple*

## 217. Homeowners in enterprise zones

District of Columbia Code: D.C. Official Code § 47-858.01 - § 47-858.05
Sunset Date: None
Year Enacted: 2002

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $0 | $0 | $0 | $0 |

DESCRIPTION: The D.C. government provides real property tax abatements for homeowners who substantially rehabilitate their homes in an enterprise zone. Census tracts with 20 percent or more poverty rates qualify as enterprise zones.

To qualify for the abatements, a property owner must have a household income of less than 120 percent of the area median income. To receive a tax abatement, an owner must receive certification from the Mayor that the property and rehabilitation meet the law's requirements.

The tax abatement is a percentage of the amount the homeowner's tax liability for the property increased after the substantial rehabilitation. During the year the rehabilitation is completed, and the following three years, the taxpayer can deduct 100 percent of the increased tax liability. In the fourth year, the taxpayer can deduct 75 percent; in the fifth year, 50 percent; and in the sixth year, 25 percent. In the seventh year, the property is fully taxable after completing rehabilitation.

PURPOSE: The abatement promotes the revitalization of neighborhoods classified as enterprise zones, attracts new residents to the District of Columbia, and strengthens the District's tax base.

IMPACT: These provisions are intended for low—to moderate-income homeowners of homes in enterprise zones. They are also expected to create spillover benefits for neighborhoods with poverty rates of 20 percent or more. Presently, there are no beneficiaries of these tax abatements, and none are projected for the FY 2024 to FY 2027.

***Deed Recordation Tax***
*Exemptions*

## 218. Special act of Congress

District of Columbia Code: D.C. Official Code § 42-1102(4)
Sunset Date: None
Year Enacted: 1962

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $0 | $0 | $0 | $0 |

DESCRIPTION: A deed to property acquired by an institution, organization, corporation, or association entitled to an exemption from real property by a special act of Congress is exempt from the deed recordation tax, provided that the property is acquired "solely for a purpose or purposes for which such special exemption was granted."[546]

D.C. Law 14-282, the "Tax Clarity and Recorder of Deeds Act of 2002," which took effect on April 4, 2003, repealed a similar exemption applicable to the transfer tax.[547]

PURPOSE: This exemption extends the deed recordation tax exemption to properties that have been exempted from real property taxation in the District of Columbia by a special act of Congress. Exempting the properties from both taxes promotes uniformity and equity in property taxation.

IMPACT: Property owners who qualify for a real property tax exemption in the District of Columbia by a special act of Congress benefit from this exemption. Examples of past recipients include properties owned by the Daughters of American Revolution, the National Education Association, the American Veterans of World War II, the American Association of University Women, and Woodrow Wilson House.

[546] See D.C. Official Code § 42-1102(4).
[547] See section 11(o)(4) of this legislation.

***Deed Transfer Tax***
*Exemptions*

## 219. Bona-fide gifts to the District of Columbia

District of Columbia Code: D.C. Official Code § 47-902(24)
Sunset Date: None
Year Enacted: 2011

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $0 | $0 | $0 | $0 |

DESCRIPTION: Real property transferred to the District of Columbia as a "bona fide gift" at the D.C. government's request and without any consideration for the transfer is exempt from the real property transfer tax.[548]

PURPOSE: The enactment of this provision was motivated by the 2008 transfer of property from PEPCO to the D.C. government. The property was conveyed as a gift so the D.C. government could complete a portion of the Metropolitan Branch Pedestrian and Bicycle Trail.[549]

IMPACT: The D.C. government and donors of property are the intended beneficiaries of this exemption. The transfer from PEPCO is the only gift of property to the D.C. government known to have occurred in recent years. A more common way of transferring private land to the District involves the exchange of privately owned land for a publicly owned parcel.

[548] The transfer tax on real property is based on consideration paid for the transfer, but when there is no consideration, the tax is based on the fair market value of the property conveyed.
[549] PEPCO was reimbursed by the D.C. government for the $47,850 transfer tax PEPCO paid on transferring the property.

### *Deed Recordation and Transfer Tax*
*Exemptions*

## 220. Resident management corporations

District of Columbia Code: D.C. Official Code § 42-1102(20) and § 47-3506.01(b)(1) for recordation tax
D.C. Official Code § 47-902(15) and § 47-3506.01(b)(2) for transfer tax
Sunset Date: None
Year Enacted: 1992

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $0 | $0 | $0 | $0 |

DESCRIPTION: Public housing transferred to a qualifying resident management corporation is exempt from deed recordation and transfer taxes. A resident management corporation is a non-profit corporation in which public housing residents are the sole voting members.

PURPOSE: The exemption expands the opportunities for low-income families who live in a public housing project to become housing owners. Resident ownership is also expected to help stabilize neighborhoods by giving residents a greater stake in the safety and upkeep of the community.

IMPACT: This provision is intended for resident management corporations and the individuals they serve. According to the D.C. Housing Authority, the Kenilworth-Parkside project is the only property transferred to a resident management corporation (this transfer took place in 1992). Presently, no exemptions are projected for FY 2024 through FY 2027.

### *Deed Recordation and Transfer Tax*
*Exemptions*

## 221. Tax-exempt entities subject to a long-term lease

District of Columbia Code: D.C. Official Code § 42-1102(27) for the deed recordation tax
D.C. Official Code § 47-902(21) for the transfer tax
Sunset Date: None
Year Enacted: 2003

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $0 | $0 | $0 | $0 |

DESCRIPTION: A property is exempt from the deed recordation and transfer taxes if it is subject to a lease or ground rent for a term of at least 30 years and if the lessor would have been exempt from real property taxation under D.C. Official Code § 47-1002 if it had owned the property outright.

PURPOSE: This exemption was created to provide equitable treatment under the deed recordation and transfer taxes for properties under the control of organizations exempt from the real property tax. This provision extends the exemption these entities receive when they acquire a property in fee simple to the conveyance of property subject to a lease or ground rent of at least 30 years.

IMPACT: Organizations that are exempt from the real property tax and assume control of a property through a lease of 30 years or more benefit from this provision. Estimating the revenue loss from this exemption was impossible because deed recordation and transfer tax exemptions are not categorized in a way that identifies tax-exempt entities subject to a long-term lease.

***Personal Property Tax***
*Exemptions*

## 222. Digital audio radio satellite companies

District of Columbia Code: D.C. Official Code § 47-1508(a)(8)
Sunset Date: None
Year Enacted: 2000

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $0 | $0 | $0 | $0 |

DESCRIPTION: The personal property of a digital audio radio satellite service company with a license granted by the Federal Communications Commission is exempt from the personal property tax, provided that the company is subject to a gross receipts tax.

PURPOSE: The purpose of the exemption is to prevent double taxation.

IMPACT: Digital audio radio satellite companies benefit from this exemption. The Office of Revenue Analysis (ORA) cannot estimate the revenue forgone from the exemption because there is only one provider of digital radio service located in the District of Columbia. ORA follows the policy of the U.S. Internal Revenue Service, which states that " no statistical tabulation may be released with cells containing data from fewer than three returns" to protect the confidentiality of individual tax records.[550]

[550] U.S. Internal Revenue Service, Publication 1075, "Tax Information Security Guidelines for Federal, State, and Local Agencies and Entities" (January 2014), p. 116.

***Personal Property Tax***
*Exemptions*

## 223. Solar energy systems

District of Columbia Code: D.C. Official Code § 47-1508(a)(11)
Sunset Date: None
Year Enacted: 2013

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $0 | $0 | $0 | $0 |

DESCRIPTION: Solar energy systems are exempt from the personal property tax. "Solar energy" is defined as "radiant energy, direct, diffuse, or reflected, received from the sun at wavelengths suitable for conversion into thermal, chemical, or electrical energy, that is collected generated, or stored for use at a later time."[551]

The section of D.C. Code authorizing this exemption states that "Systems using exclusively solar energy as defined in § 34-1431(14); provided, that, notwithstanding any other provision of law, the CFO shall transfer $120,000 from the certified revenues deposited in the Renewable Energy Development Fund established by § 34-1436 to the unrestricted fund balance of the General Fund of the District of Columbia and shall recognize the $120,000 as local funds revenue in fiscal year 2013 and in each subsequent fiscal year." Yet, this transfer has not occurred, as there is no indication that the exemption has been taken.

PURPOSE: The exemption encourages the installation of large, commercial solar energy systems and thereby helps the District achieve its target of using at least 2.5 percent of energy from solar sources by 2023.[552]

IMPACT: Proponents argue that solar energy systems are not financially viable without the personal property tax exemption, especially considering the significant capital investment that the systems require. Nevertheless, a "Tax Abatement Financial Analysis" issued by the Chief Financial Officer found that "Because District renewable energy portfolio standards, along with Federal renewable energy incentives currently in place, are sufficient to make investment in solar systems a profitable investment … solar energy exemptions are not generally necessary for solar power systems to be developed in the District."[553]

[551] See D.C. Official Code § 34-1431(14).
[552] See Council of the District of Columbia, "Report on Bill 19-749, the 'Energy Innovation and Savings Amendment Act of 2012,'" dated October 24, 2012, pp. 2, 5-6.
[553] Office of the Chief Financial Officer, "Tax Abatement Financial Analysis: 'Energy Innovation and Savings Amendment Act of 2012,'" dated June 29, 2012, p. 1.

***Personal Property Tax***
*Exemptions*

## 224. Cogeneration systems

District of Columbia Code: D.C. Official Code § 47-1508(a)(12)
Sunset Date: None
Year Enacted: 2013

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $0 | $0 | $0 | $0 |

DESCRIPTION: Beginning on October 1, 2016, cogeneration systems that produce both electric energy and steam or forms of useful energy (such as heat) for industrial, commercial, heating, or cooling purposes are exempt from the personal property tax.

PURPOSE: The exemption encourages the development of cogeneration systems and promotes more efficient energy use. Although traditional power sources are only 33 percent efficient, meaning they waste approximately two-thirds of the energy they produce, cogeneration systems have an efficiency rate of 60 to 80 percent.[554]

IMPACT: The exemption is expected to benefit a cogeneration project planned for a large development on the Southwest waterfront, which was set for a phased delivery beginning in 2016. DOEE stated that the cogeneration plant was constructed in 2017 and sits atop the Channel Apartments at 950 Maine Ave SW. However, whether the system is exempted from personal property tax is unclear. Proponents argue that cogeneration systems are not financially viable without the personal property tax exemption, especially considering the significant capital investment the systems require.

Nevertheless, a "Tax Abatement Financial Analysis" (TAFA) issued by the Chief Financial Officer found that "(C)ogeneration exemptions are … unlikely to be necessary, as cogeneration systems generally provide a reasonable return on investment." The TAFA pointed out that the long-term energy savings from cogeneration can justify the initial up-front capital investment.[555]

[554] Council of the District of Columbia, "Report on Bill 19-749, the 'Energy Innovation and Savings Amendment Act of 2012,'" dated October 4, 2012, pp. 2, 6-7.
[555] Office of the Chief Financial Officer, "Tax Abatement Financial Analysis: 'Energy Innovation and Savings Amendment Act of 2012,'" dated June 29, 2012, pp. 1-2.

***Personal Property Tax***
*Exemptions*

## 225. Wireless telecommunication companies

District of Columbia Code: D.C. Official Code § 47-1508(a)(7)
Sunset Date: None
Year Enacted: 1998

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $0 | $0 | $0 | $0 |

Note: "Minimal" means that the forgone revenue is estimated as less than $50,000 per year, although precise data are lacking.

DESCRIPTION: The personal property of a wireless telecommunication company is exempt from personal property taxation, except for office equipment or office furniture. This exemption includes resellers that purchase telecommunications services from another telecommunications service provider and then resell or integrate the purchased services into a mobile telecommunication service. The exemption is valid whether the wireless company uses the property to provide a service subject to the toll telecommunications tax.

PURPOSE: The exemption provides wireless telecommunication companies with a personal property tax exemption equivalent to that provided to other telecommunication companies.

IMPACT: Wireless telecommunication companies benefit from the exemption. Nevertheless, the number of firms that claim the exemption and the associated reduction in tax are unknown because wireless telecommunication companies do not have to file a form with the Office of Tax and Revenue to be eligible.

The estimated revenue loss is "minimal" (less than $50,000 per year) because U.S. Census Bureau data show that wireless telecommunication companies are typically small (approximately 30 employees).[556] D.C. law exempts the first $225,000 of taxable personal property from the tax, and most wireless telecommunication companies might therefore be exempt, due to their size, even without this blanket exemption. Most D.C. businesses have no personal property tax liability because of the $225,000 exemption.

The exemption violates the principle of horizontal equity because other firms with similar amounts or stocks of personal property do not receive similar treatment.

[556] Specifically, the 2012 Economic Census reported that there were 45 wireless telecommunication companies in the District of Columbia with 510 employees, an average of 11.3 employees per firm.

***Personal Property Tax***
*Exemptions*

## 226. Works of art lent to the National Gallery of Art by non-residents

District of Columbia Code: D.C. Official Code § 47-1508(a)(2)
Sunset Date: None
Year Enacted: 1950

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $0 | $0 | $0 | $0 |

DESCRIPTION: Works of art owned by an individual who is not a resident or a citizen of the United States are exempt from the personal property tax, provided that they are lent to the National Gallery of Art solely for exhibition without charge to the public.

PURPOSE: The U.S. Congress established the exemption to facilitate a National Gallery of Art exhibition of the paintings of oil magnate Calouste Gulbenkian, who was considered to have one of the best private art collections in the world. Mr. Gulbenkian was unwilling to lend his paintings to the National Gallery without assurances that they would be exempt from federal and District of Columbia taxation, particularly if he were to pass away while the paintings were on loan.[557] Therefore, on September 1, 1950, Congress enacted P.L. 81-749, which established that works of art owned by a non-resident of the United States who is not a citizen of the U.S. and lent for exhibition by the National Gallery of Art are exempt from the federal estate tax and from the D.C. inheritance and personal property taxes.[558]

The exhibit, "European Paintings from the Gulbenkian Collection," was open to the public from October 8, 1950, to May 31, 1951. Included were works by Ghirlandaio, Rubens, Van Dyck, Rembrandt, Fragonard, Gainsborough, Corot, Manet, Monet, Degas, and Renoir.

IMPACT: There is no evidence that the exemption has been used in any cases besides the Gulbenkian exhibit.

[557] U.S. House of Representatives, Committee on Ways and Means, 81st Congress, Report to Accompany House J. Res. 497 (Report No. 2724), July 24, 1950, pp. 1-2.
[558] The relevant provision of the inheritance tax was repealed when the inheritance tax law was rewritten in 1987.

## 227. Environmental savings account contributions and earnings

District of Columbia Code: D.C. Official Code § 8-637.03
Sunset Date: None
Year Enacted: 2001

| (Dollars in thousands) | FY 2022 | FY 2023 | FY 2024 | FY 2025 |
|---|---|---|---|---|
| Business Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $0 | $0 | $0 | $0 |
| **Total** | **$0** | **$0** | **$0** | **$0** |

DESCRIPTION: An individual, partnership, corporation, trust, or government agency may establish an environmental savings account (ESA) to accumulate funds for the cleanup or redevelopment of brownfields. Brownfields are defined as "abandoned, idled property or industrial property where expansion or redevelopment is complicated by actual or perceived environmental contamination."[559] Funds deposited in an ESA and the interest earned on them are exempt from District of Columbia income tax. However, any funds withdrawn and unused for the cleanup and redevelopment of a contaminated property will be subject to income tax and a 10 percent penalty.

A review did not identify similar income tax incentives offered by Virginia. Maryland has a Brownfields Revitalization Incentive Program, which offers tax credits, among other incentives, for brownfield cleanup. Maryland also authorizes local governments to provide property tax credits equal to 50 to 70 percent of the increase in property taxes for property owners participating in the state's Voluntary Cleanup Program. The tax credits may be granted for five or 10 years if the property is in an enterprise zone. Montgomery County and Baltimore City are among the jurisdictions that offer property tax credits.

PURPOSE: The subsidy provides incentives for individuals and organizations to clean up brownfields voluntarily, which would reduce public health risks and promote economic development by encouraging the reuse of contaminated properties.

IMPACT: Owners of property that is contaminated by hazardous substances may benefit from this provision. The subtraction would be claimed on a line of the tax form that includes other subtractions; therefore, there are no data on use of the provision or associated revenue loss. However, according to officials in the D.C. Department of the Environment, the accounts are not being used as there are no implementing regulations.

[559] See D.C. Official Code § 8-631.02(2).

## 228. Brownfield revitalization and cleanup

District of Columbia Code: D.C. Official Code § 8-637.01
Sunset Date: None
Year Enacted: 2001

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Business Income Tax Loss | $0 | $0 | $0 | $0 |
| Personal Income Tax Loss | $0 | $0 | $0 | $0 |
| **Total** | **$0** | **$0** | **$0** | **$0** |

DESCRIPTION: The Mayor is authorized to submit proposed rules to the Council to establish business franchise tax credits for businesses that clean up and redevelop "brownfields," which are defined as "abandoned, idled property or industrial property where expansion or redevelopment is complicated by actual or perceived environmental contamination."[560] The total credits awarded to a business would be capped at 100 percent of the costs of cleaning up and 25 percent of the costs of developing the brownfield.

A review did not identify similar income tax incentives offered by Virginia. Maryland has a Brownfields Revitalization Incentive Program, which offers tax credits, among other incentives, for brownfield cleanup. Maryland also authorizes local governments to provide property tax credits equal to 50 to 70 percent of the increase in property taxes for property owners participating in the state's Voluntary Cleanup Program. The tax credits may be granted for five or 10 years if the property is in an enterprise zone. Montgomery County and Baltimore City are among the jurisdictions that offer property tax credits.

PURPOSE: This tax expenditure intends to provide incentives for businesses to clean up brownfields voluntarily, which would, in turn, reduce public health risks and promote economic development by encouraging the reuse of contaminated properties.

IMPACT: Businesses that own contaminated property are the intended beneficiaries of this provision, which is also designed to have spillover benefits to society by reducing environmental risks and contaminants while promoting the redevelopment of brownfields. Nevertheless, the credits have not been offered because implementing regulations have not been proposed.[561]

[560] See D.C. Official Code § 8-631.02(2).
[561] If the Mayor proposed regulations, the Council would have 45 days to review them (excluding Saturdays, Sundays, legal holidays, and periods of Council recess). If the Council did not act within this period, the rules would be deemed approved.

## 229. Brownfield revitalization and cleanup

District of Columbia Code: D.C. Official Code § 8-637.01
Sunset Date: None
Year Enacted: 2001

| (Dollars in thousands) | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| Revenue Loss | $0 | $0 | $0 | $0 |

DESCRIPTION: The Mayor is authorized to submit proposed rules to the Council to establish real property tax credits for property owners who clean up and redevelop "brownfields," which are defined as "abandoned, idled property or industrial property where expansion or redevelopment is complicated by actual or perceived environmental contamination."[562] The total credits awarded to a property owner would be capped at 100 percent of the cleanup costs and 25 percent of the costs for developing the contaminated property.

Maryland authorizes local governments to provide property tax credits equal to 50 to 70 percent of the increase in property taxes for property owners participating in the state's Voluntary Cleanup Program. The tax credits may be granted for five or 10 years if the property is in an enterprise zone. Montgomery County and Baltimore City are among the jurisdictions that offer property tax credits.

PURPOSE: This tax expenditure provides incentives for property owners to clean up brownfields voluntarily, which would reduce public health risks and promote economic development by encouraging the reuse of contaminated properties.

IMPACT: This provision is intended to benefit the owners of contaminated property and have spillover effects that benefit the public by reducing environmental risks and contaminants while promoting the redevelopment of brownfields. Nevertheless, the credits have not been offered because the implementing regulations have not been proposed.[563]

[562] See D.C. Official Code § 8-631.02(2).
[563] If the Mayor proposed regulations, the Council would have 45 days to review them (excluding Saturdays, Sundays, legal holidays, and periods of Council recess). If the Council did not act within this period, the rules would be deemed approved.

## N O T E

The estimates in the 2025 edition of the Florida Tax Handbook are as accurate as possible given the scope of the document. An attempt has been made to provide point estimates for the fiscal impact of all current exemptions, refunds and allowances, and potential rate changes. Such point estimates, however, may imply greater accuracy than was possible with the time and resources available. In many cases the estimates should be viewed more as an indication of the approximate or relative impact of a law change. As specific legislation is identified during the course of each session, more in-depth analysis will be undertaken which may lead to revisions.

The estimates presented in this book show the revenue impact as if the proposed tax law changes were in effect for the entire year. Normal delays caused by collection and implementation lags will reduce the actual revenue impact in the first year. Tax law changes that only affect revenues for part of a year will further modify the estimates. As a general rule, these estimates make no adjustments for the changes in quantity demanded resulting from changes to the tax rate, nor do they reflect potential losses due to tax avoidance behavior or unusual compliance and enforcement problems. It should also be noted that estimates presented in these analyses are based on historical data from annual collections through Fiscal Year 2024-25.

As each session begins, Impact Conferences are held to consider specific legislative proposals. Those results should be considered the most recent and complete expressions of fiscal impact. The results can be viewed online at http://edr.state.fl.us/Content/conferences/revenueimpact/index.cfm. Please note that the underlying revenue forecasts are typically updated three times each year: in preparation for the Long-Range Financial Outlook, the Governor's budget recommendations, and the General Appropriations Act enacted by the Legislature. The latest forecasts can be viewed online at http://edr.state.fl.us/Content/conferences/index.cfm.

With one exception, all estimates and projections used in this Handbook are based on the series of estimating conferences held June 30, 2025 through August 15, 2025. The exception was supplemental material adopted at the Ad Valorem conference held on October 24, 2025. For additional information regarding a specific revenue source, please contact the Legislative Office of Economic and Demographic Research at (850) 487-1402.

# FOREWORD

The Revenue Estimating Conference is pleased to provide the 2025 edition of the Florida Tax Handbook, Including Fiscal Impact of Potential Changes. The Handbook provides statutory and administering authority for all major revenue sources, a review of tax collections and dispositions, base and rate information, and a brief history of the individual sources. The Handbook also provides current revenue estimates and presents a comprehensive and systematic look at the revenue potential of selected alternative tax sources. The information can be used to analyze the revenue effects of proposals for tax relief, tax increases, dealer allowances, changes in exemptions, or alterations to the tax base. The staffs of the Senate Committee on Finance and Tax, the House Ways & Means Committee, the Legislative Office of Economic and Demographic Research, the Governor's Office of Policy and Budget, the Florida Gaming Control Commission, and the Departments of Revenue, Highway Safety and Motor Vehicles, and Lottery provided the various analyses and updates.

The Handbook is divided into six sections.

Section I presents an overview of Florida's financial structure, including a summary of state tax preferences.

Section II presents an analysis of major and minor state revenue sources. For each major tax source, estimates are provided for the value of an incremental change (increase or decrease) in the existing rate. In addition, for each major tax, estimates are provided for the value of all major exemptions, refunds credits, dealer allowances, deductions, and current distributions. Where possible, estimates are also provided for alternative bases. The values of rate changes are not provided for the minor state revenue sources.

Section III contains information about major local government revenue sources that are explicitly authorized in the Florida Constitution or the Florida Statutes. Not included in this section are local government revenue sources that counties and municipalities impose under their home rule powers (e.g., impact fees, special assessments, fees, etc.); revenue sources authorized by special or local bills; and minor revenue sources authorized in the Florida Statutes. For a more comprehensive description of local government revenue sources, please refer to the Local Government Financial Information Handbook which can be accessed at http://edr.state.fl.us/Content/local-government/reports/index.cfm#local-government. As in Section II, estimates and analyses are provided where available.

Section IV analyzes several alternative tax sources that are significant. Attempts have been made, where information for analysis is available, to present estimates of revenues generated by these alternative taxes. A brief summary of the major advantages and disadvantages of each source is usually presented.

Section V discusses major pending litigation which may affect Florida's tax revenues in the future.

For further information or inquiries, contact the Legislative Office of Economic and Demographic Research, Room 574, Claude Pepper Building, 111 W. Madison Street, Tallahassee, Florida 32399-6588, (850) 487-1402. Notice of any errors appearing in this publication should be sent to the staff of the Legislative Office of Economic and Demographic Research. Please feel free to offer suggestions for improvement of future editions. Copies of this and previous Tax Handbooks can be accessed online at http://edr.state.fl.us/Content/revenues/reports/tax-handbook/index.cfm.

# FLORIDA'S FINANCIAL STRUCTURE

# FLORIDA STATE TREASURY FUNDS

All money received by a state agency is required to be deposited into the treasury, unless specifically exempted from this requirement. Fund receipts can be made through a direct deposit or through a transfer from another fund. Disbursements from the treasury are by warrant drawn upon the treasury by the Chief Financial Officer after an agency that is authorized to make the expenditure initiates the action.

The state treasury consists of three types of funds in the custody of the Chief Financial Officer: (1) the General Revenue Fund; (2) Trust Funds; and (3) the Budget Stabilization Fund.

1. General Revenue Fund consists of all moneys received by the state from every source, except moneys deposited into trust funds and the Budget Stabilization Fund. In Fiscal Year 2024-25, about 39 percent of all taxes, licenses, fees, and other operating receipts were credited to General Revenue, either directly upon deposit into the treasury or by transfer from various clearing and distribution accounts of the trust funds. Beginning in Fiscal Year 2009-10, an 8 percent service charge on all income of a revenue nature deposited into trust funds is also deducted and deposited into the General Revenue Fund. Partial and full exceptions from this requirement are made for trust funds enumerated in subsection (2) of s. 215.20, F.S., and in s. 215.22, F.S. In this regard, specific trust funds and revenues in the Department of Agriculture and Consumer Services and the Department of Citrus are assessed a 4 percent service charge, and other trust funds are exempt entirely.

2. Trust Funds consist of receipts that are earmarked for a specific purpose, either by general law, the Constitution, or a trust agreement. Each receipt is credited to the account related to the trust fund. Based on their principal uses, trust fund accounts can be grouped into the following distinct types:

a. *Operations or operating* – program operations funded by program revenues.
b. *Operations and maintenance* – depository for client services funded by third-party payers.
c. *Administrative* – management activities that are departmental in nature funded by indirect cost earnings and assessments against trust funds.
d. *Grants and donations* – grant or donor agreement activities funded by restricted contractual revenue from private and public nonfederal sources.
e. *Agency working capital* – data processing centers (see s. 216.272, F.S.).
f. *Clearing funds* – depository for collections pending distributions to other funds or lawful recipients.
g. *Federal grant* – grant activities funded by restricted program revenues from federal sources.

3. Budget Stabilization Fund is required by the Florida Constitution and must be maintained at not less than 5 percent of the last completed fiscal year's General Revenue collections. Moneys in the fund may only be used to cover revenue shortfalls in the General Revenue Fund and for emergencies as defined by general law. Please see the separate section on the Budget Stabilization Fund within this document for additional detail.

Until 2005, Florida law provided for a separate Working Capital Fund consisting of the money in the General Revenue Fund that was in excess of the amount needed to meet General Revenue Fund appropriations. In 2005, the Working Capital Fund was repealed, and the following language was added to s. 215.32(2)(a), F.S., describing the General Revenue Fund: "Unallocated general revenue shall be considered the working capital balance of the state and shall consist of moneys in the General Revenue Fund that are in excess of the amount needed to meet General Revenue Fund appropriations for the current fiscal year."

Constitution of Florida: Article III, Section 19.

Florida Statutes: Sections 215.18; 215.20; 215.211; 215.22; 215.31; 215.32; 215.35, 216.222; 216.272.

Laws of Florida: 22833(1945); 59-91; 59-257; 61-119; 73-196; 73-316; 87-247; 89-255; 89-356; 94-250; 98-73; 2000-371; 2001-376; 2005-152; 2009-71; 2009-78.

# BUDGET STABILIZATION FUND

The Budget Stabilization Fund (BSF) was created upon approval of a constitutional amendment placed on the November 1992 ballot by the Taxation and Budget Reform Commission. The relevant portion of that amendment states:

> (g) BUDGET STABILIZATION FUND. Beginning with the 1994-95 fiscal year, at least 1 percent of an amount equal to the last completed fiscal year's net revenue collections for the General Revenue Fund shall be retained in the BSF. The BSF shall be increased to at least 2 percent of said amount for the 1995-96 fiscal year, at least 3 percent of said amount for the 1996-97 fiscal year, at least 4 percent of said amount for the 1997-98 fiscal year, and at least 5 percent of said amount for the 1998-99 fiscal year and thereafter. Subject to the provisions of this subsection, the BSF's principal balance shall be maintained at an amount equal to at least 5 percent of the last completed fiscal year's net revenue collections for the General Revenue Fund. The BSF's principal balance shall not exceed an amount equal to 10 percent of the last completed fiscal year's net revenue collections for the General Revenue Fund. The Legislature shall provide criteria for withdrawing funds from the BSF in a separate bill for the purpose only of covering revenue shortfalls of the General Revenue Fund or for the purpose of providing funding for an emergency, as defined by general law. General law shall provide for the restoration of this fund. The BSF shall be comprised of funds not otherwise obligated or committed for any purpose.

Section 216.222, F.S., establishes criteria for transferring money from the BSF. The BSF may be used to offset a deficit in the General Revenue Fund and to provide funding for an emergency as defined in s. 252.34, F.S., which is part of the State Emergency Management Act.

> **216.222 Budget Stabilization Fund; criteria for withdrawing moneys.--**
>
> (1) Moneys in the BSF may be transferred to the General Revenue Fund for:
>
> (a)1. Offsetting a deficit in the General Revenue Fund. A deficit is deemed to occur when the official estimate of funds available in the General Revenue Fund for a fiscal year falls below the total amount appropriated from the General Revenue Fund for that fiscal year. Such a transfer must be made pursuant to s. 216.221, or pursuant to an appropriation by law.
>
> 2. Notwithstanding the requirements of s. 216.221, if, after consultation with the Revenue Estimating Conference, the Chief Financial Officer believes that a deficit will occur in the General Revenue Fund and if:
>
> a. Fewer than 30 but more than 4 days are left in the fiscal year, the Legislature is not in session, and neither the Legislature nor the Legislative Budget Commission is scheduled to meet before the end of the fiscal year, or
>
> b. Fewer than 5 days are left in the fiscal year and the Governor and the Chief Justice, the Legislature, or the Legislative Budget Commission have not implemented measures to resolve the deficit, the Chief Financial Officer shall certify the deficit to the Governor, the Chief Justice, the President of the Senate, and the Speaker of the House of Representatives, and may thereafter withdraw funds from the BSF to offset the projected deficit in the General Revenue Fund. The Chief Financial Officer shall consult with the Governor and the chair and vice chair of the Legislative Budget Commission before any funds may be withdrawn from the BSF. At the beginning of the next fiscal year, the Chief Financial Officer shall promptly determine the General Revenue Fund balance to be carried forward. The Chief Financial Officer shall immediately repay the BSF for the withdrawn amount, up to the amount of the balance. If the General Revenue Fund balance carried forward is not sufficient to fully repay the BSF, the repayment of the remainder of the withdrawn funds shall be as provided in s. 215.32(2)(c)3.

(b) Providing funding for an emergency as defined in s. 252.34. The emergency must have been declared by the Governor pursuant to s. 252.36 or declared by law. Such a transfer must be made pursuant to s. 252.37, subject to the conditions in that section, or pursuant to an appropriation by law.

(c) Providing temporary transfers to the General Revenue Fund pursuant to s. 215.18.

(2)(a) Moneys in the BSF may be transferred to the State Risk Management Trust Fund to provide funding for an emergency. For purposes of this subsection, an emergency exists when uninsured losses to state property exceed $2 million per occurrence or $5 million annual aggregate, as this constitutes an unanticipated financial need that the Legislature has found must be funded to serve an essential state responsibility.

(b) At such time that the Division of Risk Management certifies that uninsured property losses exceed $2 million per occurrence or $5 million annual aggregate, the division shall request a budget amendment through the procedures set out in s. 216.181. Transfers into the State Risk Management Trust Fund pursuant to this paragraph may not exceed $38 million in any fiscal year.

Section 215.32(2)(c), F.S., provides for restoration of transfers from the BSF to the General Revenue Fund. Unless otherwise provided by law, these transfers (referred to as expenditures) must be returned in five equal annual installments beginning in the third year after the withdrawal. During Fiscal Years 2004-05, 2005-06, and 2006-07, disbursements were made to the Casualty Insurance Risk Management Trust Fund. In addition, pursuant to Section 77 of the 2008-09 General Appropriations Act (HB 5001/Chapter 2008-152, L.O.F.), $672.4 million was transferred to the General Revenue Fund in September 2008 to offset a deficit in the General Revenue Fund. Another $400 million was transferred in February 2009 pursuant to Section 51 of Chapter 2009-1, L.O.F. (SB 2-A). All transfers have since been repaid.

**215.32 State funds; segregation.--**

(2)(c)1. The BSF shall consist of amounts equal to at least 5 percent of net revenue collections for the General Revenue Fund during the last completed fiscal year. The BSF's principal balance shall not exceed an amount equal to 10 percent of the last completed fiscal year's net revenue collections for the General Revenue Fund. As used in this paragraph, the term "last completed fiscal year" means the most recently completed fiscal year prior to the regular legislative session at which the Legislature considers the General Appropriations Act for the year in which the transfer to the BSF must be made under this paragraph.

2. By September 15 of each year, the Governor shall authorize the Chief Financial Officer to transfer, and the Chief Financial Officer shall transfer pursuant to appropriations made by law, to the BSF the amount of money needed for the balance of that fund to equal the amount specified in subparagraph 1., less any amounts expended and not restored. The moneys needed for this transfer may be appropriated by the Legislature from any funds.

3. Unless otherwise provided in this subparagraph, an expenditure from the BSF must be restored pursuant to a restoration schedule that provides for making five equal annual transfers from the General Revenue Fund, beginning in the third fiscal year following that in which the expenditure was made. For any Budget Stabilization Fund expenditure, the Legislature may establish by law a different restoration schedule and such change may be made at any time during the restoration period. Moneys are hereby appropriated for transfers pursuant to this subparagraph.

House Bill 5011 (Ch. 2021-43, L.O.F.) directed the State Board of Administration to liquidate the assets in the Lawton Chiles Endowment Fund by June 30, 2022, and to transfer all balances remaining to the Budget Stabilization Fund. As of June 30, 2025, the State Board of Administration had transferred $1,056.4 million from the Lawton Chiles Endowment Fund and is expected to transfer an additional $0.1 million in the future.

The Legislature passed House Joint Resolution 5019 proposing an amendment to the Florida Constitution to increase the amount of funds that may be retained in the fund from 10 percent to 25 percent of net general revenue collections. The amendment also requires an annual transfer to the BSF equal to $750 million or the amount required to reach 25 percent maximum no later than June 30th of each fiscal year. The proposed amendment must be approved by at least 60 percent of the electors voting on the measure at the next general election. If approved, the amendment would take effect on January 12, 2027.

Further, the Legislature authorized the transfers of $300.0 million from the General Revenue Fund in the Fiscal Year 2024-25 General Appropriations Act and $429.6 million in Fiscal Year 2025-26, which were transferred to the Budget Stabilization Fund on July 19, 2024, and August 11, 2025, respectively. The current balance in the fund is $4,870.2 million which equals the maximum fund balance for Fiscal Year 2025-26. Because the BSF's principal balance exceeds the required minimum fund balance through Fiscal Year 2030-31, no other transfers are required during this forecast period. Any interest earned on the BSF accrues to the General Revenue Fund.

**BUDGET STABILIZATION FUND CALCULATION**

# CONSENSUS ESTIMATING CONFERENCE PROCESS

Economic, demographic, resource-demand and revenue forecasts are essential for a variety of governmental planning and budgeting functions. Most importantly, revenue and resource-demand estimates are needed to ensure that Florida meets its constitutional balanced budget requirement. In this regard, the various forecasts are primarily used in the development of the constitutionally required Long-Range Financial Outlook, the Governor's budget recommendations and the General Appropriations Act. Economic and demographic forecasts are also used to support the other estimates of revenues and demands for state services.

Florida's revenue forecasting system is founded on a base forecast which typically assumes a "current law, current administration" structure in which no changes are allowed to the legal setting and practices known at the time of the forecast. This multi-stage process begins with the adoption of a national economic forecast based in part on information from a private forecasting firm, and the subsequent development of a Florida-specific economic forecast linked to major elements from the national forecast. Key state economic variables are then used to model the likely growth paths of individual revenue sources. They are further adjusted by recent revenue collection trends and calibrated to current receipts.[1] This process determines the baseline forecasts, and proposed law changes are modeled as deviations from the projected base. In the next round of forecasts, the process begins again, and the baseline is updated to account for any new or changed information, such as data revisions and law changes. All revenue estimates are made on a "cash" basis where revenues are assigned to the fiscal year in which they are likely to be received. The resource-demand conferences follow a similar process, and most rely heavily on the shape of the Florida-specific economic and population forecasts.

Rather than constitutional or statutory guidance, the classification of recurring and non-recurring revenues is based on institutional forecasting conventions developed over time by the principals of the Revenue Estimating Conference. Typically, the forecasted revenue level for each baseline year is deemed to be the "recurring" amount of funds for that year, regardless of the projected levels in subsequent years. Narrow exceptions are made for one-time events such as hurricanes and the receipt of special federal funds, as well as time-limited statutory provisions. Recent estimates have included at least five complete fiscal years in the forecast adopted at the conference. Moreover, the annual Long-Term Revenue Analysis adopted each fall contains 10-year forecasts for all revenues.

Consensus estimating informally began in 1970 and was limited to forecasts of the General Revenue Fund. The law establishing the conference process in statute did not pass until 1985 (Chapter 85-26, L.O.F.). The use of consensus forecasting to support the planning and budgeting process has expanded in the years since, and there are now ten estimating conferences formally identified in statute:

1. Economic Estimating Conference
    a. Florida Economic
    b. National Economic
2. Florida Demographic Estimating Conference
3. Revenue Estimating Conference
    a. Ad Valorem
    b. Article V Fees & Transfers
    c. Documentary Stamp Tax
    d. General Revenue
    e. Gross Receipts/Communications Services Tax
    f. Highway Safety Fees

[1] Designated principals also use independent (but informed) judgment to alter the forecast.

g. Indian Gaming
h. Long-Term Revenue Analysis
i. Lottery
j. Pari-Mutuels
k. Public Education Capital Outlay (PECO)
l. Slot Machines
m. Tobacco Settlement
n. Tobacco Tax and Surcharge
o. Transportation Revenue
p. Unclaimed Property/State School Trust Fund
q. Unemployment Compensation Trust Fund

4. Education Estimating Conference

   a. Public Schools Enrollment
   b. Public Schools Capital Outlay Full-Time Equivalent Enrollment
   c. Florida College System Enrollment
   d. Post-Secondary Financial Aid

5. Criminal Justice Estimating Conference

6. Social Services Estimating Conference

   a. TANF/WAGES
   b. Medicaid Caseload and Expenditures
   c. Federal Medical Assistance Percentage (FMAP)
   d. Kidcare Caseload and Expenditures

7. Labor Market Estimating Conference

8. Early Learning Programs Estimating Conference

   a. School Readiness Program
   b. Voluntary Prekindergarten Education Program

9. Self-Insurance Estimating Conference

   a. Risk Management Trust Fund
   b. State Employees' Health Insurance

10. Florida Retirement System Actuarial Assumption Estimating Conference

    a. Florida Retirement System
    b. Retiree Health Insurance Subsidy and Florida National Guard Benefits

While references to specific conferences exist in several places within the Florida Statutes, general statutory authority for the consensus process is provided in sections 216.133 through 216.138, F.S., which specifies the duties of each conference and designates the conference principals and participants. Conference principals can call conferences and are generally responsible for developing and choosing the forecasts. Participants may be requested to provide alternative forecasts and to generate supporting information. All conferences are open, public meetings.

The four principals for each conference are designated professional staff representing the Governor's Office, Senate, House of Representatives, and Legislative Office of Economic and Demographic Research. Historically, the revenue representatives of the House and Senate have been the staff directors of the tax committees, and the policy coordinator overseeing tax issues has represented the Governor's Office. In the other conferences, the principals represent the same offices, but they are specifically chosen for their subject-matter expertise in the area represented by

the conference. An exception is made for the Coordinator of the Legislative Office of Economic and Demographic Research who – by law – sits as a principal on all conferences.

Consensus forecasting requires the conference principals to agree on the forecasts before they are finalized. Section 216.133(3), F.S., defines "consensus" as "the unanimous consent of all of the principals," essentially meaning that each principal has a veto. All state agencies and the judicial branch must use the official results adopted by the conferences in carrying out their duties under the state planning and budgeting process; however, the Legislature is not bound to use the official consensus forecasts. Nevertheless, since 1970, the Florida Legislature has consistently used the results of these conferences in its official duties.

Over the course of each year, the principals meet in a series of regularly scheduled Consensus Estimating Conferences to provide the forecasts needed to support the planning and budgeting process. Typically, these conferences have occurred in three "seasons" that are geared to the major events of the annual planning and budgeting cycle. In addition, impact conferences are held when estimates are needed to determine the impact of changes or proposed changes to current law or current administration. The statutes do not specify the methods, techniques, or approaches for developing estimates or forecasts; however, the impact conferences typically use static analyses with modest adjustments for likely behavioral changes when conditions warrant their inclusion.

A special case of the estimating conference process has been developed for evaluating the fiscal impact of petition initiatives. In 2004, a constitutional amendment passed that requires initiative petitions be filed with the Secretary of State by February 1st of each general election year to be eligible for ballot consideration. In 2025, the Legislature passed CS/HB 1205 (Chapter 2025-21, L.O.F.), substantially amending the requirements for petition initiatives. Section 100.371(2), F.S., requires the Secretary of State to submit a copy of all proposed amendments to the Office of Economic and Demographic Research on behalf of the Financial Impact Estimating Conference (FIEC) for potential review, analysis, and estimation of the financial impact of the proposed amendment. A formal FIEC may be convened only by the President of the Senate and the Speaker of the House of Representatives, jointly (s. 100.371(16)(c), F.S.). The FIEC consists of four principals: one person from the Executive Office of the Governor; the coordinator of the Legislative Office of Economic and Demographic Research, or his or her designee; one person from the professional staff of the Senate; and one person from the professional staff of the House of Representatives. Each principal must have appropriate fiscal expertise in the subject matter of the initiative. A separate FIEC is appointed for each initiative.

Another special case of the estimating conference process has been developed for evaluating legislative proposals—whether statutory or budgetary—based on tools and models not generally employed by the consensus estimating conferences, including cost-benefit, return-on-investment, or dynamic scoring techniques, when suitable and appropriate for the legislative proposals being evaluated. In 2010, HB 1178 was passed and signed into law (Chapter 2010-101, L.O.F) establishing section 216.138, F.S., authorizing the President of the Senate and the Speaker of the House of Representatives to request special impact estimating conferences employing such tools and models. The Special Impact Estimating Conference consists of four principals: one person from the Executive Office of the Governor; the coordinator of the Legislative Office of Economic and Demographic Research, or his or her designee; one person from the professional staff of the Senate; and one person from the professional staff of the House of Representatives. Each principal must have appropriate fiscal expertise in the subject matter of the legislative proposal. A separate Special Impact Estimating Conference may be appointed for each proposal.

## SUMMARY OF THE CONSTITUTIONAL STATE REVENUE LIMITATION

In November 1994, the voters approved a constitutional amendment to limit state revenues (Article VII, Section 1, Florida Constitution). Placed before the voters by act of the Legislature (HJR 2053), the amendment limits state revenues to a specific dollar amount that is increased annually by an approximation of the growth rate in Florida's economy. If more revenue is collected than is permitted by this limit, it may not be spent; excess revenues must be deposited in the Budget Stabilization Fund until the fund reaches its maximum allowable balance, and thereafter refunded to taxpayers. The Legislature, by two-thirds vote of both houses, may decide to do otherwise. In any year, the revenue limit is determined by multiplying the average annual growth rate in Florida personal income over the previous five years by the amount of revenue permitted under the cap in the previous year.

State revenue is defined as taxes, licenses, fees, and charges for services (but not for goods) imposed by the Legislature on individuals, businesses, or agencies outside of state government. The definition of state revenues includes the proceeds of lottery ticket sales. Exempt from the limitation, either implicitly, through the definition of revenue, or explicitly, through specific exemption, are the following items:

1. Lottery receipts returned as prizes.
2. Balances carried forward from prior years.
3. The proceeds of sales of goods (e.g., land, buildings, surplus property).
4. Funds used for debt service and other payments related to debt.
5. State funds used to match federal money for most of Medicaid (see below).
6. Receipts of the Hurricane Catastrophe Trust Fund.
7. Revenues required to be imposed by amendment to the Constitution after July 1, 1994.

The revenues of cities, counties, school districts, and special districts are not subject to the revenue limitation. In particular, required local effort millage levied by school districts and local option taxes authorized by state law, but levied at the discretion of local governments, are not subject to the revenue limitation. However, state revenues, such as the motor fuel tax, cigarette tax, and sales tax, which are levied and collected by the state and shared, in part, with local governments through a variety of statutory revenue sharing formulas, are subject to the revenue limitation.

State funds used to match federal funds for Medicaid are partially exempt from the revenue limitation. A portion of the state money used to match federal Medicaid funds is appropriated from the Public Medical Assistance Trust Fund (PMATF), a fund originally established for discretionary Medicaid programs. A tax on hospitals, and some cigarette tax revenues provide state support for the PMATF. Since the reason for exempting Medicaid from the revenue limitation is that it is in large part a federal mandate, and since the programs funded from the PMATF were, at least initially, voluntary, the revenues of the PMATF were made subject to the revenue limitation. However, other revenues used to match federal Medicaid money were exempted from the revenue limitation. Additionally, state matching funds for expansions of the Medicaid program voluntarily undertaken by the state after July 1, 1994, are subject to the revenue limitation.

The Constitution requires the Legislature to establish, by general law, the procedures necessary to administer the revenue limitation; however, such legislation has yet to be enacted. In addition, the Legislature is required to provide general law guidelines for adjusting the state revenue limit when the responsibility for providing specific governmental services is transferred between the state and other levels of government.

Over a two-year period beginning in Fiscal Year 2002-03, revenue from the State University System (SUS) was devolved from state accounts to each university's local accounting system. Chapter 2002-387, L.O.F. (SB 20-E), directed the Revenue Estimating Conference to reduce the total receipts subject to the limitation to reflect that transfer. The conference made a one-time adjustment in Fiscal Year 2003-04

after the devolution was complete. From Fiscal Year 2003-04 forward, no SUS revenues are included in state revenues. Additionally, no SUS-related debt service deductions are made.

In 1998, the Constitution was amended (Article V, section 14(b)) to require that "All funding for the offices of the clerks of the circuit and county courts performing court-related functions, except as otherwise provided in this subsection and subsection (c), shall be provided by adequate and appropriate filing fees for judicial proceedings and service charges and costs for performing court-related functions as required by general law." General law has since been passed to impose the required fees. The imposed fees generate revenues higher than necessary to perform the stated functions, and the excess money from those fees is transferred to the General Revenue Fund. The conference interpreted this to mean that any revenues used to perform the stated functions should not be counted as state revenue, while any additional funds should be included. Therefore, only Article V revenues that are transferred to the General Revenue Fund are included as state revenue.

**Impacts of the Constitutional Revenue Limitation**

In the first few years after the adoption of the revenue limitation, actual revenues were close to the constitutional cap. Over the subsequent years, revenues subject to the cap have generally grown more slowly than personal income. Since 1999, the Florida Legislature has enacted significant measures to reduce state revenue. The intangibles tax, sales and use tax, beverage tax, corporate income tax, vehicle emissions testing, health care assessments, unemployment tax, and pari-mutuel tax have all been reduced by the Legislature. Additionally, changes in federal law have effectively eliminated Florida's estate tax. These changes in tax laws contributed to a widening gap between actual revenues and the revenue limit through Fiscal Year 2002-03 when revenues were almost $5 billion below the limit. Over the next three years and despite the tax reductions mentioned above, state revenues grew faster than growth in the limit. As a result, Fiscal Year 2005-06 revenues subject to the limitation were only $658 million below the constitutional cap. This surge in revenues was related to the boom in real estate activity and associated construction spending, as well as the tax revenues derived from rebuilding following the hurricanes in 2004 and 2005. However, state revenue collections fell in Fiscal Years 2006-07 through 2008-09 and grew less than the cap growth rate in Fiscal Year 2009-10. Total receipts grew in the 2010-11 and 2011-12 fiscal years; however, the state match for Medicaid, which is exempt from the cap, grew even faster.

Revenue growth returned to more typical levels beginning in Fiscal Year 2011-12 and continuing through Fiscal Year 2018-19. As result of the Coronavirus pandemic-induced economic contraction that began in Fiscal Year 2019-20, state revenue collections were down $2.1 billion from Fiscal Year 2018-19, widening the gap between actual revenues and the revenue limit. In addition, Medicaid caseload increases as a result of the pandemic and legislative measures affecting corporate income tax refunds further widened the gap. Consequently, state revenues subject to the revenue limitation were $25.4 billion below the constitutional revenue limit in Fiscal Year 2019-20.

In Fiscal Year 2020-21, much of the economy began to recover from the worst of the pandemic effects. In addition, the 2021 Legislature made a revision to the collection of online sales tax revenue beginning Fiscal Year 2021-22. These actions began to close the gap seen in Fiscal Year 2019-20, but it still remained significant. For Fiscal Year 2022-23 and even more so in Fiscal Year 2023-24, the gap began once again to widen as the Legislature initiated state debt reduction projects, and as Medicaid expenditures continued to grow. Although the constitutional revenue limit for Fiscal Year 2024-25 has yet to be completed, it is expected that state revenues will continue to be well below the revenue limit as a result of various, significant recurring tax reductions enacted in the 2022, 2023, and 2024 legislative sessions, as well as additional tax reductions in the 2025 legislative session.

# TAX PREFERENCES

For the individual tax sources included in the Handbook, the preparers of this document have attempted to provide estimates for all current tax preferences, including exemptions, deductions, allowances, exclusions, credits, preferential rates, and deferrals. While individual estimates have not been possible for all, a large portion of the total preferences have been estimated. This section presents these estimates of forgone revenue in a single table to show their relative and absolute magnitude. Preferential tax treatments reduce government revenue and compete with programs funded by appropriations for state and local use.

There are a number of important distinctions between appropriations and tax preferences. Once adopted, tax preferences often receive less scrutiny than appropriations, which must be enacted every year. In contrast, tax preferences typically remain effective until an affirmative action is taken to change them. Also, unlike appropriations which are for fixed amounts, tax preferences are often open-ended.

The following table presents summary estimates of the tax preferences identified in this book by type of preference for each tax source.

# ESTIMATE of FISCAL YEAR 2026-27 STATE TAX PREFERENCES
## (in millions)

| TAX | INCLUDED TAX SOURCE COLLECTIONS | EXEMPTIONS | PREFERRED/ DIFFERENTIAL RATES | CREDITS | REFUNDS | DEDUCTIONS/ ALLOWANCES | TOTAL TAX PREFERENCES |
|---|---|---|---|---|---|---|---|
| Beverage Tax | 294.6 | 3.6 | | 489.4 | 0.1 | 12.8 | 505.9 |
| Cigarette and Other Tobacco Tax | 769.4 | 13.8 | | | 0.6 | 3.5 | 17.9 |
| Communications Services Tax | 1,121.1 | 681.5 | | | | 10.7 | 692.2 |
| Corporate Income and Emergency Excise Tax*** | 5,765.7 | 2,912.2 | | 247.4 | | | 3,159.6 |
| Documentary Stamp Tax | 3,900.2 | 235.1 | 44.8 | | | 17.7 | 297.6 |
| Gross Receipts Tax | 1,402.9 | 626.2 | | | | | 626.2 |
| Insurance Premium Tax | 1,961.3 | 245.0 | | 1,392.1 | | 20.0 | 1,657.1 |
| Intangibles Tax | 529.5 | * | | | 2.6 | 0.8 | 3.4 |
| Lottery | 9,341.7 | | | | | 558.0 | 558.0 |
| Motor Fuel & Diesel Fuel Tax | 3,715.0 | 5.0 | | | 39.0 | 5.5 | 49.5 |

| Sales and Use Tax** | 41,844.0 | 26,872.1 | | 189.7 | | 87.8 | 27,149.6 |
| Severance Tax Oil & Gas | 1.1 | | | 0.4 | | | 0.4 |
| **TOTAL** | **70,960.2** | **31,595.5** | **44.8** | **2,319.0** | **42.3** | **716.8** | **34,718.4** |

* Indeterminate

** The total of Sales and Use Tax exemptions does not include $42.9 billion of sales tax that could be collected if sales of services were subject to sales tax in Florida. Services are not exempt from the sales tax, instead, they are "excluded" from the tax base because the sales tax generally applies to the sale of tangible personal property, not services.

*** The total of Corporate Income Tax exemptions does not include $1.8 billion of tax that could be collected if S Corporations, Limited Partnerships and Limited Liability Companies were subject to Corporate Income Tax in Florida. These entities are not exempt from the Corporate Income Tax; instead, they are “excluded” from the tax base because the Corporate Income Tax generally applies to “C” corporations and does not apply to these entities.

NOTE: Some exemptions overlap so that repeal of all exemptions would not yield the total shown.

# STATE REVENUE SOURCES

# ARTICLE V FEES AND TRANSFERS

FLORIDA STATUTES: The authority for Article V fees and transfers is provided in Chapters 25, 27, 28, 34, 44, 57, 142, 318, 501, 741, and 775, Florida Statutes. The specific statutory citation and corresponding fees, service charges and fines collected by the Florida Clerks of the Court and remitted to the state for deposit in the General Revenue Fund and various state trust funds are as follows:

| Statutory Citation | Fee, Service Charge, or Fine Description |
|---|---|
| 34.041(1)(b) | First $10 of the filing fees for county civil claims under subparagraph 34.041(1)(a)7 |
| 34.041(1)(b) | $15 of the filing fees for county civil claims under subparagraph 34.041(1)(a)4 |
| 34.041(1)(e) | $195 of the first $200 filing fees for Non-Foreclosure payable under subparagraph (a)5 between $15,001-$50,000 |
| 34.041(1)(e) | $1 of the first $200 filing fees payable under subparagraph (a)5 |
| 34.041(1)(e) | $4 of the first $200 filing fees payable under subparagraph (a)5 |
| 34.041(1)(b) | $3.50 of additional $4 filing fee for county civil claims |
| 34.041(1)(b) | $0.50 of additional $4 filing fee for county civil action |
| 318.21(2)(a) | 20.6 percent of remainder of civil penalties received pursuant to Ch. 318 |
| 318.21(2)(b) | 7.2 percent of remainder of civil penalties received pursuant to Ch. 318 |
| 318.21(2)(c) | 5.1 percent of remainder of civil penalties received pursuant to Ch. 318 |
| 318.21(2)(d) | 8.2 percent of remainder of civil penalties received pursuant to Ch. 318 |
| 318.21(2)(e) | 2 percent of remainder of civil penalties received pursuant to Ch. 318 |
| 318.18(20)(a) | $5 of the $10 fine for all noncriminal moving and nonmoving traffic violations under chapter 316, 320 & 322. |
| 318.18(20)(b) | $3.33 of the $10 fine for all noncriminal moving and nonmoving traffic violations under chapter 316, 320 & 322. |
| 318.18(20)(c) | $1.67 of the $10 fine for all noncriminal moving and nonmoving traffic violations under chapter 316, 320 & 322. |
| 318.21(20) | $25 increase in fines assessed under s. 318.18(3) for unlawful speed |
| 318.18(16)(a)1. | Remaining $30 of $158 civil penalty for violation of ss. 316.075(1)(c)1 or 316.074(1) |
| 318.18(16)(a)1. | Remaining $ 3 of $158 civil penalty for violation of ss. 316.075(1)(c)1 or 316.074(1) |
| 28.101(1)(a) | $5 additional charge for petitions for dissolution of marriage |
| 28.101(1)(c) | $55 additional charge for petitions for dissolution of marriage |
| 28.241(1)(a)1.b. | $95 of first $100 in filing fees for circuit civil action |
| 28.241(1)(a)1.b. | $1.00 of first $100 in filing fees for circuit civil action |
| 28.241(1)(a)1.b. | $4.00 of first $100 in filing fees for circuit civil action |
| 28.241(1)(a)1.a. | $195 of first $200 in filing fees for circuit civil action |
| 28.241(1)(a)1.a. | $1.00 of first $200 in filing fees for circuit civil action |
| 28.241(1)(a)1.a. | $4.00 of first $200 in filing fees for circuit civil action |
| 28.241(1)(a)1.c. & e. | $3.50 of additional $4 filing fee for circuit civil action |
| 28.241(1)(a)1.c. & e. | $0.50 of additional $4 filing fee for circuit civil action |
| 28.2401(1) | $115 of each filing fee collected under paragraphs (1)(a), (1)(c) - (i), and (1)(k) in probate matters |
| 28.2401(3) | $3.50 of additional $4 service charge in probate matters |
| 28.2401(3) | $0.50 of additional $4 service charge in probate matters |
| 25.241, 35.22 | $50 of Supreme Court filing fee (from State Courts Operating TF) |
| 25.241, 35.22 | Supreme Court & DCA filing fees & service charges |
| 34.041(1)(c) | $295 counterclaim filing fee for county civil action |
| 44.108(1) | $1 filing fee on all circuit and county proceedings |
| 44.108(2) | Fees collected for court-ordered mediation services |
| 44.106 | Licenses Mediation Certification |
| 741.01(4) | $25 additional fee upon receipt of application for marriage license |
| 28.241(6) | $100 fee for attorneys appearing pro hac vice in circuit court |
| 34.041(8) | $100 fee for attorneys appearing pro hac vice in county court |
| 27.52(7)(b) | 75 percent of any amount recovered by state attorney for fraudulent indigency claims in criminal proceedings |
| 57.082(7)(b) | 75 percent of any amount recovered by state attorney for fraudulent indigency claims in civil proceedings |

| | |
|---|---|
| Ch. 2010-134 | $50 administration fee per trustee deed for each deed recorded pursuant to the trustee foreclosure procedures set forth in ss. 721.855 and 72 |
| 501.2075 | Up to $10,000 civil penalty assessed against persons found to have committed deceptive and unfair trade practices |
| Ch. 2008-111 | Additional Revenue pursuant to Chapter 2008-111, L.O..F. |
| 34.041(1)(e) | $195 of the first $200 filing fees for Foreclosure payable under subparagraph (a)5 between $15,001-$50,000 |
| 28.241(1)(a)2.d. | $195 in filing fees for circuit civil action relating to real property or mortgage foreclosure |
| 28.241(1)(a)2.d. | $350 in filing fees for circuit civil action relating to real property or mortgage foreclosure |
| 28.241(1)(a)2.d. | $770 in filing fees for circuit civil action relating to real property or mortgage foreclosure |
| 28.241(1)(a)2.d. | $930 in filing fees for circuit civil action relating to real property or mortgage foreclosure |
| 28.241(1)(a)2.d. | $1.00 in filing fees for circuit civil action relating to real property or mortgage foreclosure |
| 28.241(1)(a)2.d. | $4.00 in filing fees for circuit civil action relating to real property or mortgage foreclosure |

ADMINISTERED BY: Florida Department of Revenue, the State Court System, the Justice Administrative Commission, and Florida Clerks of the Court

SUMMARY:
The 67 Clerks of the Court collect fees, service charges, and fines imposed pursuant to law. A portion of these fees, service charges, and fines are remitted monthly to the Florida Department of Revenue for deposit into the General Revenue Fund, State Court Revenue Trust Fund, Clerks of the Court Trust Fund, and various other state trust funds. By February 1 of each year, 50 percent of the cumulative excess revenues remaining in the Clerks of the Court Trust Fund beyond what is needed for current year operations is transferred to the General Revenue Fund pursuant to section 28.37(4), F.S.

REVENUE:

| Fiscal Year | Total Collections | Annual Change % | Article V Fees General Revenue | Adjustments to General Revenue** | Trust Funds |
|---|---|---|---|---|---|
| 2026-27* | 185,900,000 | -4.72% | 56,500,000 | 0 | 129,400,000 |
| 2025-26* | 195,100,000 | 4.37% | 56,500,000 | 9,800,000 | 128,800,000 |
| 2024-25 | 186,938,150 | -12.44% | 52,533,581 | 10,855,958 | 123,548,611 |
| 2023-24 | 213,500,903 | -7.35% | 83,000,000 | 14,209,685 | 116,291,218 |
| 2022-23 | 230,445,878 | 9.19% | 97,677,076 | 2,719,383 | 130,049,419 |
| 2021-22 | 211,047,472 | 13.73% | 88,668,406 | 12,183,091 | 110,195,975 |
| 2020-21 | 185,570,420 | -11.98% | 77,231,862 | 0 | 108,338,558 |

*Estimate
**Pursuant to s. 28.37(4) F.S., not less than 50% the cumulative excess of all fines, fees and charges is to be transferred to General Revenue no later than February 1, 2022 and each year thereafter. The forecasted amount of these funds is $9.8 million for February 1, 2026.

HISTORY:
On November 3, 1998, Florida voters approved Revision 7 to Article V, Section 14 (b) of the Florida Constitution providing that circuit and county courts performing court-related functions be funded by adequate and appropriate filing fees for judicial proceedings, and service charges and costs for performing court-related functions as required by general law.

During the 2000 Legislative Session, the Legislature approved Chapter 2000-237, L.O.F. (SB 1212), setting forth a process for the clerks to develop and propose a schedule of fees and services to the Legislature for consideration.

In 2003, the Legislature approved Chapter 2003-402, L.O.F. (HB 113-A), regarding the implementation of Revision 7 to Article V, section 14 (b) of the Florida Constitution, which was developed in accordance with the process established in Chapter 2000-237, L.O.F. Chapter 2003-402, L.O.F. (HB 113-A), also provided a schedule of fines, fees, and service charges as well as the disposition of revenues to the various entities, funds, and trust funds.

During the 2004 and 2005 Legislative Sessions, the Legislature approved Chapters 2004-265 and 2005-236, L.O.F. (SB 2962 and HB 1935), revising a number of fees, fines, and service charges.

During the 2008 Legislative Session, the Legislature approved Chapter 2008-111, L.O.F. (SB 1790), establishing several new and increasing many existing fines, fees, and service charges.

During the Special Legislative Session held in January 2009, the Legislature approved Chapter 2009-6, L.O.F. (SB 12-A), revising some fines and providing several new fines and fees to be collected by the Clerks of the Court for remission to the state and deposit in the newly created State Courts Revenue, Public Defenders Revenue, and State Attorneys Revenue Trust Funds. During the regular 2009 Legislative Session, Chapters 2009-61 and 2009-204, L.O.F. (SB 1718 and SB 2108), were approved, further revising fees and fines, redirecting some revenues, and changing the manner in which Clerks of the Court revenues and budgets were administered.

The 2013 Legislature approved Chapter 2013-44, L.O.F. (SB 1512), redirecting $80 of circuit filing fee revenues from General Revenue to the Clerks of Court and, in effect, reinstituting the manner in which Clerks of the Court revenues and budgets were administered prior to the 2009 legislative changes.

The 2017 Regular and Special Legislative Sessions made numerous changes to Article V fees. The Displaced Homemaker Trust Fund was abolished and its fees related to dissolution of marriage redirected into the General Revenue Fund. In addition, various fees which were distributed into the General Revenue Fund where instead directed to be distributed into the Clerk's Fine and Forfeiture Funds. The Clerks were also directed to deposit the 10 percent of fines which the Clerks previously received per s. 28.37, F.S. into the Fine and Forfeiture Funds. The Clerk's new revenue was accompanied by the requirement that the total combined budgets of the clerks of court not exceed the revenue estimates established by the most recent Revenue Estimating Conference.

Chapter 2018-118, L.O.F. (HB 7087), passed during the 2018 session, reduced traffic fines when the person elects to attend traffic improvement school and redirected fees to offset the impact to the State Courts Revenue Trust Fund.

During the 2019 session, the Legislature passed Chapter 2019-42, L.O.F. (HB 7123) directing that the State Courts Revenue Trust Fund portion of traffic fines when the person elects to attend traffic improvement school be eliminated with further fee redirects from General Revenue used to offset the loss to the trust fund. The 2019 Legislature also passed Chapter 2019-58, L.O.F, (HB 337), which dealt with numerous court fee issues: most importantly, effective January 1, 2020, the county court jurisdictional threshold was increased from $15,000 to $30,000. Effective January 1, 2023, the county court jurisdictional threshold was further increased from $30,000 to $50,000. As the jurisdictional limit for these cases changes, the filing fees move from circuit court to county court; however, the law was written so that the impact to the various receiving funds was negated. The 2019 legislation also revised numerous statutes referencing the fines, fees, and charges originally increased by Ch. 2008-111 L.O.F. to specify that those fees were to be deposited into the General Revenue Fund. These changes were remedial and clarifying in nature and applied retroactively to July 1, 2008.

The 2020 Legislature passed Chapter 2020-61, L.O.F. (SB 1392), which stated that the circuit courts would no longer have jurisdiction over appeals from county court with certain exceptions effective January 1, 2021.

The 2023 Legislature passed Chapter 2023-284 L.O.F. (HB 977), which shifted fees from the General Revenue Fund to the Clerk's Fine and Forfeiture Funds. These include portions of the fees for Marriage Dissolutions and Foreclosures, as well as a collection of Summons and Probate fees that were previously included as part of the Ch. 2008-111 group.

The 2024 Legislature passed Chapter 2024-153 L.O.F. (CS CS HB 1077), which shifted fees from the General Revenue Fund to the Clerk's Fine and Forfeiture Funds and County funds. These include a collection of Summons and Traffic fees that were previously included as part of the Ch. 2008-111 group. In addition, any interest earned in Clerk's Fine and Forfeiture Funds must be transferred to County funds.

BASE AND RATE:
First $10 of the filing fees for county civil claims under subparagraph 34.041(1)(a)7; $15 of the filing fees for county civil claims under subparagraph 34.041(1)(a)4; $195 of the first $200 filing fees for Non-Foreclosure payable under subparagraph (a)5 between $15,001-$50,000; $1 of the first $200 filing fees payable under subparagraph (a)5; $4 of the first $200 filing fees payable under subparagraph (a)5; $3.50 of additional $4 filing fee for county civil claims; $0.50 of additional $4 filing fee for county civil action; 20.6 percent of remainder of civil penalties received pursuant to Ch. 318; 7.2 percent of remainder of civil penalties received pursuant to Ch. 318; 5.1 percent of remainder of civil penalties received pursuant to Ch. 318; 8.2 percent of remainder of civil penalties received pursuant to Ch. 318; 2 percent of remainder of civil penalties received pursuant to Ch. 318; $5 of the $10 fine for all noncriminal moving and nonmoving traffic violations under chapter 316, 320 & 322.; $3.33 of the $10 fine for all noncriminal moving and nonmoving traffic violations under chapter 316, 320 & 322.; $1.67 of the $10 fine for all noncriminal moving and nonmoving traffic violations under chapter 316, 320 & 322.; $25 increase in fines assessed under s. 318.18(3) for unlawful speed; remaining $30 of $158 civil penalty for violation of ss. 316.075(1)(c)1 or 316.074(1); remaining $ 3 of $158 civil penalty for violation of ss. 316.075(1)(c)1 or 316.074(1); $5 additional charge for petitions for dissolution of marriage; $55 additional charge for petitions for dissolution of marriage; $95 of first $100 in filing fees for circuit civil action; $1.00 of first $100 in filing fees for circuit civil action; $4.00 of first $100 in filing fees for circuit civil action; $195 of first $200 in filing fees for circuit civil action; $1.00 of first $200 in filing fees for circuit civil action; $4.00 of first $200 in filing fees for circuit civil action; $3.50 of additional $4 filing fee for circuit civil action; $0.50 of additional $4 filing fee for circuit civil action; $115 of each filing fee collected under paragraphs (1)(a), (1)(c) - (i), and (1)(k) in probate matters; $3.50 of additional $4 service charge in probate matters; $0.50 of additional $4 service charge in probate matters; $50 of Supreme Court filing fee (from State Courts Operating TF); Supreme Court & DCA filing fees & service charges; $295 counterclaim filing fee for county civil action; $1 filing fee on all circuit and county proceedings; fees collected for court-ordered mediation services ; licenses Mediation Certification; $25 additional fee upon receipt of application for marriage license; $100 fee for attorneys appearing pro hac vice in circuit court; $100 fee for attorneys appearing pro hac vice in county court; 75 percent of any amount recovered by state attorney for fraudulent indigence claims in criminal proceedings; 75 percent of any amount recovered by state attorney for fraudulent indigence claims in civil proceedings; $50 administration fee per trustee deed for each deed recorded pursuant to the trustee foreclosure procedures set forth in ss. 721.855 and 72; up to $10,000 civil penalty assessed against persons found to have committed deceptive and unfair trade practices; additional Revenue pursuant to Chapter 2008-111, L.O.F; $195 of the first $200 filing fees for Foreclosure payable under subparagraph (a)5 between $15,001-$50,000; $195 in filing fees for circuit civil action relating to real property or mortgage foreclosure; $350 in filing fees for circuit civil action relating to real property or mortgage foreclosure; $770 in filing fees for circuit civil action relating to real property or mortgage foreclosure; $930 in filing fees for circuit civil action relating

to real property or mortgage foreclosure; $1.00 in filing fees for circuit civil action relating to real property or mortgage foreclosure; and $4.00 in filing fees for circuit civil action relating to real property or mortgage foreclosure.

DISPOSITION:
The Clerks of the Court collect fees, service charges, and fines from individuals and remit them to the Florida Department of Revenue by the tenth of each month following their collection. The revenues are deposited by the Department of Revenue into the General Revenue Fund and designated state trust funds as provided by law.

THE AFFECTED TRUST FUNDS ARE:

1) COCTF – Clerks of the Court Trust Fund
2) SCRTF – State Courts Revenue Trust Fund
3) DFSATF - Department of Financial Services Administrative Trust Fund
4) CETF – Court Education Trust Fund
5) SARTF – State Attorneys Revenue Trust Fund
6) BSCITF – Brain and Spinal Cord Injury Trust Fund
7) ACCTF – Additional Court Costs Trust Fund
8) EMSTF – Emergency Medical Services Trust Fund
9) DVTF – Domestic Violence Trust Fund
10) DHTF – Displaced Homemaker Trust Fund
11) CWTF – Child Welfare Trust Fund
12) GDTFDVR – Grants and Donations Trust Fund of the Division of Vocational Rehabilitation
13) ICDTF – Indigent Criminal Defense Trust Fund

OTHER STATES:
According to the National Center for State Courts, all 50 states, the District of Columbia, Guam, Puerto Rico, the Virgin Islands, and the U.S. Federal Court System impose some form of court fees.

# AUTO TITLE AND LIEN FEES

FLORIDA STATUTES: Chapter 319

ADMINISTERED BY: Department of Highway Safety and Motor Vehicles

SUMMARY:
Fees are imposed on motor vehicles titled in Florida. For each original certificate of title and for each duplicate copy, the fee is $70.00. An additional $10.00 fee is imposed on each original certificate of title issued for a motor vehicle previously registered outside Florida.

REVENUE:

| Fiscal Year | Total Collections | Annual Change % | General Revenue | State Transportation Trust Fund | Other State Trust Fund |
|---|---|---|---|---|---|
| 2026-27* | 497,300,000 | 0.81% | 110,000,000 | 318,155,355 | 69,144,645 |
| 2025-26* | 493,300,000 | -1.95% | 107,400,000 | 316,980,809 | 68,919,191 |
| 2024-25 | 503,122,082 | 3.50% | 113,355,515 | 319,248,762 | 70,517,805 |
| 2023-24 | 486,103,669 | -3.59% | 101,160,690 | 317,476,062 | 67,466,917 |
| 2022-23 | 504,183,388 | -1.07% | 112,025,590 | 321,858,184 | 70,299,614 |

| 2020-21 | 498,664,231 | 14.47% | 141,164,468 | 319,569,838 | 37,929,925 |

* Estimate

HISTORY:
In 1923, Florida passed an act to protect the title of motor vehicles within the state. The act provided for the issuance and registration of certificates of ownership. The motor vehicle title law was revised in 1941, and fees were imposed for the first time. Fees were increased in 1947 and 1967. In 1990, the fee for each original certificate of title and each duplicate copy of a certificate of title on all motor vehicles, except those for hire, was increased from $3 to $24. The $21 increase is for deposit into the State Transportation Trust Fund. Chapter 98-397, L.O.F. (HB 271), required the Department of Highway Safety and Motor Vehicles to charge a fee of $7.00 for each lien placed on a motor vehicle by the state child support enforcement program for deposit into the General Revenue Fund. Effective July 1, 2000, Chapter 2000-257, L.O.F. (SB 862), eliminated the 7 percent General Revenue Service Charge on the $24 original certificate of title fee and each duplicate copy fee, which increased the distribution to the State Transportation Trust Fund. Chapter 2002-235, L.O.F. (SB 522), required all auto title and lien revenues collected by county officials to be submitted by electronic funds transfer to the State Treasury no later than five working days, instead of seven working days as provided for in Chapter 116, F.S., after the close of the business day in which the funds were received. As a result of the 2009 Regular Legislative Session, Chapter 2009-71, L.O.F. (SB 1778), raised fees beginning September 1, 2009.

Chapter 2012-128, L.O.F. (SB 1998), redirected $47 of the title lien revenues then deposited in the General Revenue Fund to the State Transportation Trust Fund. Deposits to the State Transportation Trust Fund resulting from the redirect were limited to $200 million in any fiscal year; any collections in excess of the $200 million cap were deposited into the General Revenue Fund. From the same $47 portion of title fees, Chapter 2022-155 redirected an additional $30 million to the Highway Safety Operating Trust Fund. General Revenue was limited to collections in excess of the $200 State Transportation Trust fund cap and the $30 million Highway Safety Operating Trust Fund cap – a total trust fund cap of $230 million.

# AUTO TITLE AND LIEN FEES

BASE AND RATE:
In accordance with s. 319.32, F.S., a $70.00 fee is levied for original certificate of title and duplicates of title of all motor vehicles except for a motor vehicle for hire registered under s. 320.08(6), F.S. There is an additional $4.25 service charge for the transfer of any certificate of title and a $2.00 fee for assignment by a lien holder, memorandum certificates, and noting a lien and its satisfaction. There is a $1.25 service charge for the recordation or notation of a lien which is not related to the purchase of a vehicle. A service fee of $2.50, for deposit into the Highway Safety Operating Trust Fund, is charged for the shipping and handling of each paper title mailed by the department. A fee of $10 for motor vehicles and mobile homes and $5 for vessels is charged for certain types of expedited services, which is in addition to the fees imposed by s. 319.32, F.S. The fee, after deducting the $1 odometer fee amount referenced by s. 319.324, F.S., and $3.50 to be retained by the processing agency, is deposited into the General Revenue Fund. An additional service charge of not more than $0.50 may be imposed by the tax collector when any of the above mentioned transactions occur at a tax collector's branch office. Application for title must be made within 30 days of acquisition, subject to a $20 late fee penalty.

DISPOSITION:
General Revenue Fund: $48 per each original certificate of title and each duplicate copy of a certificate of title and all other fees collected by the department not specifically earmarked for deposit into a trust fund from a For Hire vehicle. $1 per each original certificate of title and each duplicate copy of a certificate of title and all other fees collected by the department not specifically earmarked for deposit into a trust fund from vehicles other than For Hire vehicles.

State Transportation Trust Fund: $21 per each original certificate of title and each duplicate copy of a certificate of title. This fee is not currently charged on For Hire vehicles per s. 319.32(1), F.S. Titles for vehicles other than For Hire distribute $47 to the State Transportation Trust Fund which is capped at $200 million.

Highway Safety Operating Trust Fund: Titles for vehicles other than For Hire distribute $47 to the Highway Safety Operating Trust Fund which is capped at $30 million. Any amount collected above $230 million is distributed to the General Revenue Fund.

Non-game Wildlife Trust Fund: An additional $10 per each original certificate of title issued for a vehicle previously registered outside Florida.

OTHER STATES:
All states, plus the District of Columbia, assess a fee or a tax for issuing a certificate of title or ownership. Most states charge a fee, ranging from $1 to $35, while others incorporate title fees into auto sales excise taxes. The most frequently occurring fees are in the range of $1 to $10.

| | 2026-27 (millions) |
|---|---|
| VALUE OF RATE CHANGE: | |
| Value of $1 on all titles issued | $ 6.5 |

# BEVERAGE LICENSES

FLORIDA STATUTES: Chapters 561 - 568

ADMINISTERED BY: Department of Business and Professional Regulation, Division of Alcoholic Beverages and Tobacco

SUMMARY:
Beverage licenses are required for any person or entity that would manufacture, bottle, distribute, sell, or in any way deal with the commerce of alcoholic beverages.

REVENUE:

| | | | Beverage License Distributions | | |
|---|---|---|---|---|---|
| Fiscal Year | Total Collections | Annual Change % | Cities & Counties | Trust Fund | General Revenue Service Charge |

HISTORY:
Florida legalized the manufacturing and selling of alcoholic beverages in 1933, subject to county approval. The same form and rates of licenses were in effect from 1935 until 1971. The 1971 Legislature rewrote the alcoholic beverage laws. License fees were increased substantially for vendors of wine and liquor. Vendors' licenses for liquor sales were limited to one per 2,500 residents, but special licenses were issued to certain organizations. Until 1986, distributions of license revenues were as follows: 24 percent to the county where collected; 38 percent to the city where collected; and the remainder to the General Revenue Fund. Beginning July 1, 1986, all beverage license revenue, less distributions to counties and cities, was earmarked for deposit into the Alcoholic Beverage and Tobacco Trust Fund, to be used to operate the Division of Alcoholic Beverages and Tobacco. A surtax of 40 percent of license fees for beer and wine vendors was imposed, for deposit into the trust fund. Bottle clubs became subject to the licensing provisions of Chapter 561, F.S., in 1990, with an annual license fee of $500. In 1992, the Legislature expanded the definition of "licensed premises" to include sidewalks and other outside areas, increased the Hughes Act fee for a new liquor license from $5,000 to $10,750, and revised the formula for the issuance of quota alcoholic beverage licenses. The Legislature also provided for the issuance of a special license for consumption on-premises only, for a qualified performing arts center.

In 1997, the Legislature amended s. 561.24, F.S., to prohibit a wine manufacturer from being dually licensed as a distributor and registered as an exporter. A grandfather clause was added to exempt any manufacturer of wine that held a distributor's license on April 1, 1997, from the new prohibition. An additional exemption was provided for certified Florida Farm Wineries as defined in s. 599.004, F.S., to hold a manufacturer's license and a distributor's license. The Legislature also clarified that the licensure of distributors' salesmen of spirituous or vinous beverages does not apply for cider. Chapter 2000-191, L.O.F. (HB 2281), provided the following changes to the beverage license laws: increased the quota license restriction from one license for every 5,000 residents to one license for every 7,500 residents in a county; required that a transfer fee equal to fifteen times the annual license fee be assessed on the transfer

of any quota license issued after October 1, 2000, which is in addition to the transfer fees assessed in s. 561.32(3)(a), F.S.; and created a special alcoholic beverage license for caterers.

In 2007, legislation was passed prohibiting a licensed alcoholic beverage establishment from denying service to a designated driver. In 2008, the Tied House Evil laws were extended to include importers, primary American sources of supply, brand owners or registrants, or any related brokers, sales agents, or salespersons to the prohibitions of giving financial aid and assistance to vendors. The law was extended to allow vendors to own brands, brand names, or labels of alcoholic beverages.

In 2017, Chapter 2017-137 L.O.F. (HB 689) was amended to eliminate the temporary beverage license fee of $100 and reduce craft distillery licensing fees from $4,000 to $1,000.

In 2021, the Legislature created s. 565.02 (12), F.S., to provide a quota license exemption for a craft distillery's vendor's license if the craft distillery is located on a property within a destination entertainment venue and open for tours during normal business hours. The legislation also amended s. 565.03, F.S., to increase the production limit for distilleries to qualify as craft distilleries from 75,000 gallons per year to 250,000 gallons per year. Effective July 1, 2026, a minimum of 60 percent of a craft distillery's total finished branded products must be distilled in the state and contain one or more of Florida's agricultural products.

In 2023, Section 561.20, F.S. was revised to expand the types of establishments that will be eligible for exemptions to the limitation of special beverage licenses per county. The minimum square footage and seating requirements were lowered but the requirement that 51% of revenue come from food or non-alcoholic drink sales remained unchanged.

BASE AND RATE:
Beer: Vendor, on-premises $40 to $200 depending on the size of the county; off-premises 50 percent of on-premises rate; surtax of 40 percent of license fee. Manufacturers of only malt liquor $3,000; Manufactures brewing less than 10,000 kegs $500. Distributors $1,250.

Wine: Vendor, on-premises $120 to $280 depending on the size of the county; off-premises 50 percent of on-premises rate; surtax of 40 percent of license fee. Manufacturers of wine $l,000; Manufacturers of wine and cordials $2,000. Distributors $50 - $1,250.

Spirits: Vendor, on-premises $624 to $1,820 depending on the size of county and the number of locations on the premises where consumption occurs; off-premises are 75 percent of on-premises rate. Different rates for vendor licenses apply to transportation companies, nightclubs, private clubs, racetracks, and jai alai frontons. License rates are stated as state, county, and city licenses. Manufacturers of liquors $4,000; Craft Distilleries $1,000. Distributors $4,000.

DISPOSITION:
Of the base license tax imposed and collected within a county, 24 percent is returned to the county tax collector; 38 percent of the license tax imposed and collected within an incorporated municipality is returned to the municipality; the remainder plus 100 percent of the surtax on beer and wine licenses is deposited into the Alcoholic Beverage and Tobacco Trust Fund.

OTHER STATES:
There are 17 states that control the sale of beer, wine, or spirits and 33 states and the District of Columbia that license the sale of liquor. Every state that allows alcoholic beverages to be sold by private industry imposes a vendor's license fee. All states impose a license fee on the manufacture or distribution of alcoholic beverages. Some states charge a licensing fee for importers in addition to wholesale license

fees.[1] There is no uniform rate schedule among the states for comparisons, but among the states for which comparisons can be made in the amount of revenues raised, Florida ranks high. Florida collects approximately 9 percent of the total alcoholic beverage license fee revenues in the United States annually, with only Texas, New York, and California collecting more revenues.[2]

# BEVERAGE TAX

FLORIDA STATUTES: Chapters 561 - 568

ADMINISTERED BY: Department of Business and Professional Regulation, Division of Alcoholic Beverages and Tobacco.

SUMMARY:
Taxes on alcoholic beverages are levied at the wholesale level in Florida. An excise tax is imposed on the distributor for each gallon, depending on the alcohol by volume (ABV). Beer is taxed at $0.48 per gallon, wine at $2.25 to $3.50 per gallon, cider at $0.89 per gallon, and spirits at $2.25 to $9.53 per gallon. Of the monthly collections of the excise taxes on alcoholic beverages, 2 percent is deposited into the Alcoholic Beverage and Tobacco Trust Fund to meet the division's appropriation for the state fiscal year. In addition, a flat $60 million is distributed each year to select medical centers. The remainder of the excise taxes is credited to the General Revenue Fund.

** Calculation

HISTORY:
In 1933, Florida authorized the sale of alcoholic beverages, and a tax was placed on manufacturers, distributors, and vendors of beer and liquor. In 1935, the beverage tax was extended to include beer, wine, and liquor. The tax rates were increased on specific beverage categories in 1937, 1941, 1947, 1949, 1967, 1968, and 1972. The primary tax rates were increased in 1945, 1963, 1977, and 1983 on all alcoholic beverages, and the classification of beverages was established as they now exist. The drinking age was increased from 19 to 21 in 1985. In 1986, the measurement for alcoholic content was changed

from percent of alcohol by weight to percent of alcohol by volume. In 1985, a lower tax rate was imposed for wines and liquors manufactured from Florida citrus products and sugarcane. In 1988, the Supreme Court of Florida ruled that the lower state tax rates for wines and liquors were unconstitutional. The 1988 Legislature imposed an import tax on alcoholic beverages imported into the state, which was later declared unconstitutional by the 2nd Judicial Circuit Court. As a result, all alcoholic beverages sold in the state became subject to the full state excise tax.

In 1990, a surcharge of $0.10 per ounce of liquor, $0.10 per 4 ounces of wine, and $0.04 per 12 ounces of beer was imposed on alcoholic beverages sold for on-premise consumption, to be paid by the retail vendor. In 1997, several provisions increasing enforcement for unlawful shipments of beverages from out-of-state were passed, and the surcharge rate on cider was reduced from $0.10 per 4-ounce serving to $0.06 per 12-ounce serving. In 1999, all surcharge tax rates were reduced by one-third, and in 2000 they were reduced again by one-half. In 2001, the Legislature removed the 8, 12, and 16-ounce restrictions on container sizes of malt beverages sold at retail, allowing malt beverages to be sold in individual containers of any size of 32 ounces or less.

Chapter 2004-2, L.O.F. (SB 2002), directed the following distributions from beverage excise tax collections: Grants and Donations Trust Fund, Department of Elder Affairs - $15 million annually; Biomedical Research Trust Fund - $6 million annually; and the Florida State University School of Chiropractic Medicine - $9 million annually. Chapter 2006-182, L.O.F. (HB 1027), eliminated the distributions to the Grants and Donations Trust Fund in the Department of Elder Affairs, the Biomedical Research Trust Fund, and the Florida State University School of Chiropractic Medicine and restored the funds to the General Revenue Fund. Chapter 2006-162, L.O.F. (HB 7105), repealed the on-premises consumption surcharge, effective July 1, 2007. Chapter 2010-24, L.O.F. (SB 2126), expanded the revenue sources against which tax credits may be granted for contributions to the Florida Tax Credit Scholarship Program to include alcoholic beverage taxes.

Chapter 2016-220, L.O.F. (HB 7099) replaced the beverage and tobacco taxes that cruise lines pay with a new, simplified tax based on ship capacity and the number of times a ship embarks from Florida.

Chapter 2024-158 (HB 7073) created s. 561.1214, F.S., to establish Child Care Tax Credits against beverage tax. Beginning January 1, 2024, a credit is allowed pursuant to s. 402.261 against any tax due under s. 563.05, s. 564.06, or s. 565.12, except excise taxes imposed on wine produced by manufacturers in this state from products grown in this state. There are maximum limits to credits allowed under the section. The credits result only in a reduction in distributions to the General Revenue Fund.

Chapter 2024-158, L.O.F. (HB 7073) amends s. 561.121, F.S., to create a total annual distribution of $30 million to certain medical research centers and programs. Beginning July 1, 2024, after the distribution to the Alcoholic Beverage and Tobacco Trust Fund, 13% of monthly collections, pursuant to ss. 563.05, 564.06, 565.02(9), and 565.12 will be allocated to the University of Miami Sylvester Comprehensive Cancer Center, the Mayo Clinic Comprehensive Cancer Center in Jacksonville, the Brain Tumor Immunotherapy Program at the University of Florida Health Shands Cancer Center, and the Norman Fixel Institute for Neurological Diseases at the University of Florida.

Chapter 2025-208, L.O.F. (HB 7031) amends s. 561.121, F.S., to increase the annual distributions to certain medical research centers and programs from $30 million to $60 million. Beginning July 1, 2025, after the distribution to the Alcoholic Beverage and Tobacco Trust Fund, 26% of monthly collections, pursuant to ss. 563.05, 564.06, 565.02(9), and 565.12 will be allocated to the University of Miami Sylvester Comprehensive Cancer Center ($20 million); the Mayo Clinic Comprehensive Cancer Center in Jacksonville ($20 million); the Brain Tumor Immunotherapy Program at the University of Florida Health

Shands Cancer Center ($10 million) and the Norman Fixel Institute for Neurological Diseases at the University of Florida ($10 million). The distributions are repealed on June 30, 2054.

BASE AND RATE:

| Type of Beverage | Alcohol By Volume | Per Gallon |
|---|---|---|
| Beer | 0.500% or more | $0.48 |
| Wine | Less than 17. 259% | $2.25 |
| Wine | 17.259% or more | $3.00 |
| Sparkling Wine | All | $3.50 |
| Wine Coolers | All | $2.25 |
| Cider | All | $0.89 |
| Liquor | Less than 17.259% | $2.25 |
| Liquor | 17.259% to 55.780% | $6.50 |
| Liquor | 55.780% or more | $9.53 |

Beer distributors are allowed 2.5 percent of taxes collected and remitted, liquor distributors are allowed 1 percent of taxes collected and remitted, and wine distributors are allowed 1.9 percent of taxes collected and remitted as a dealer collection allowance.

DISPOSITION:

Viticulture Trust Fund: 50 percent of all revenue collected from the excise taxes imposed on wine products produced by Florida manufacturers from products grown in the state.

Alcoholic Beverage and Tobacco Trust Fund: 2 percent of the Excise Tax for beer, wine, and liquor, excluding the impact of credits.

General Revenue Fund: Receives the remainder of the proceeds, as well as the 8 percent General Revenue Service Charge.

OTHER STATES:

All states, plus the District of Columbia, tax the sale of alcoholic beverages. There are 17 states that control the sale of liquor, and 33 states plus the District of Columbia that license the sale of liquor. Among the states for which comparisons can be made, Alaska and Georgia are the only states with higher excise tax rates for wine. Florida ranks fifth for excise tax on beer. Lastly, excluding states that control the sale of liquor, Florida is ranked fourth in excise taxes on liquor with Washington, Alaska, and Illinois being higher.[1]

| | 2026-27 (millions) |
|---|---|
| VALUE OF RATE CHANGE: | |
| Value of 1 cent per gallon levy on beer | $4.0 |
| Value of 10 cents per gallon levy on liquor | $7.7 |
| Value of 10 cents per gallon levy on wine | $7.0 |

| Dealer allowance on liquor (1 percent) (s. 565.13) | $3.8 |
| Tax Refunds | $0.1 |

ALTERNATIVE BASES:

Price-Based Alcoholic Beverage Tax: The current alcoholic beverage tax is an ABV tax. Growth in tax revenue is tied, therefore, to increases in consumption and not increases in price. As an alternative to the current tax base, the alcoholic beverage tax could be converted to a price-based tax. The rate could be either fixed or varied based on an item's alcoholic content. The price used could be at the manufacturing, wholesale, or retail level.

Indexed Alcoholic Beverage Tax: Another option would be to index the current alcoholic beverage tax rate based on general price increases or a percentage increase in alcoholic beverage prices. For example, alcoholic beverage taxes could be annually adjusted by the percentage change in the Consumer Price Index. This would allow taxes to be adjusted for inflation.

# CIGARETTE AND OTHER TOBACCO PRODUCTS TAX AND SURCHARGE

FLORIDA STATUTES: Chapter 210

ADMINISTERED BY: Department of Business and Professional Regulation, Division of Alcoholic Beverages and Tobacco

SUMMARY:
Taxes are imposed on the sale of cigarettes and other tobacco products in Florida. The tax is paid by the wholesale dealer at the time of first sale within the state. For cigarettes of common size, the rate is $0.339 per pack, with rates varying proportionately for cigarettes and packs of non-standard size. Additionally, a $1.00 surcharge per pack of common-size cigarettes is imposed, with rates varying proportionately for cigarettes and packs of non-standard size. For other tobacco products, the tax rate is 25 percent of the wholesale price, with an additional surcharge of 60 percent of the wholesale price.

HISTORY:
Florida began taxing cigarettes at 3 cents per pack in 1943. The tax rate was increased in 1949, 1963, 1971, 1977, 1986, and 1990. In 1949, cities were authorized by the state to levy a 2-cent cigarette tax which was credited against the state tax and collected by the state. In 1971, the cigarette tax was increased by 2 cents per pack for a total of 17 cents. The additional 2 cents per pack was deposited into the Municipal Financial Assistance Trust Fund. In 1972, municipal authority to levy a cigarette tax was repealed. In the Revenue Sharing Act of 1972, cities were allocated 13/17, counties 1/17, and the General Revenue Fund 3/17 of net collections. In 1982, the first proceeds of funds earmarked for deposit in the General Revenue Fund, up to a certain amount, were directed to be deposited in the Chronic Disease Research and Treatment Center Trust Fund for a period of three years. Chapter 85-141, L.O.F., imposed a 25 percent tax on the wholesale price of chewing tobacco, snuff, and loose tobacco for the first time. Chapter 90-132, L.O.F. (HB 3695), provided for a cigarette tax increase of 9.9 cents per pack, earmarked for deposit into the Public Medical Assistance Trust Fund, and authorized the Division of Alcoholic Beverages and Tobacco to withhold 0.9 percent of cigarette tax collections for deposit into the Alcoholic Beverage and Tobacco Trust Fund to fund the division. Chapter 98-286, L.O.F. (HB 3783), provided for a 10-year distribution of 2.59 percent to the H. Lee Moffitt Cancer Center and Research Institute and reduced the General Revenue distribution accordingly. Chapter 2000-355, L.O.F. (HB 2433), eliminated the distribution from cigarette tax to the Municipal Revenue Sharing Trust Fund and the Municipal Financial Assistance Trust Fund, resulting in an increase in the distribution to the General Revenue Fund. Chapter 2002-393, L.O.F. (HB 41-E), provided for an additional distribution to the H. Lee Moffitt Cancer Center and Research Institute: 0.2632 percent in 2002-03 and 2003-04; and 1.47 percent in 2004-05 through 2015-16, with the General Revenue distribution reduced accordingly. Chapter 2002-393, L.O.F. (HB 41-E), determined that from Fiscal Year 2004-2005 forward, the appropriation to Moffitt Center should not be less than the amount that would have been paid in Fiscal Year 2001-2002 had subparagraph (2)(b) of s. 210.20, F.S., been in effect. Chapter 2009-79, L.O.F. (SB 1840), imposed a surcharge of $1.00 per pack of standard sized cigarettes, with proportionate surcharges on non-standard sized cigarettes. Additionally, a surcharge of 60 percent of the wholesale price was imposed on other tobacco products. Enforcement was strengthened concerning phone, mail, delivery service, and Internet sales of tobacco products. Indian-tax-exemption coupons were created to limit sale of untaxed cigarettes on Indian reservations.

Chapter 2009-58, L.O.F. (SB 1664), extended the 1.47 percent Moffitt Center distribution through 2019-20, with a corresponding reduction in the distribution to General Revenue. Chapter 2012-32, L.O.F. (HB 7087), ended the 1.47 percent Moffitt Center distribution and provided for a 2.75 percent distribution from cigarette excise tax beginning July 1, 2013, and continuing through June 30, 2033. Chapter 2014-38, L.O.F. (HB5601), increased the Moffitt Center distribution to 4.04 percent, which resulted in a recurring $5 million increase in the distribution and a $5 million decrease to General Revenue. Additionally, the legislation created s. 210.21(2)(c), F.S., to provide a 1 percent distribution from cigarette excise tax to the Biomedical Research Trust Fund in the Department of Health beginning July 1, 2013, and continuing through June 30, 2021. Chapter 2013-42, L.O.F. (SB 406), extended the distribution to the Biomedical Research Trust Fund through June 30, 2033.

Chapter 2016-220, L.O.F. (HB 7099) replaced the beverage and tobacco taxes that cruise lines pay with a new, simplified tax based on ship capacity and the number of times a ship embarks from Florida.

Chapter 2021-31, L.O.F (HB 7061) increased the portion of net cigarette taxes distributed to the Moffitt Cancer Center from 4.04 percent to 7 percent from July 1, 2021 through June 30, 2024. Thereafter, the law increases the portion of net cigarette taxes distributed to the Moffitt Cancer Center from 7 percent to 10 percent; this treatment begins July 1, 2024, and continues through June 30, 2054.

BASE AND RATE:
Cigarettes of common size (not over 3 lbs. per 1,000) are $1.339 per pack ($.339 tax and $1.00 surcharge). For larger sizes and non-standard packs, other rates are specified (see ss. 210.02 and 210.011, F.S.). All non-cigarette tobacco products other than cigars are taxed at the rate of 85 percent (25 percent tax and 60 percent surcharge) of the wholesale sales price.

DISPOSITION:
Cigarette Tax: Deductions from total collections include 8 percent for the General Revenue Service Charge and 0.9 percent to the Alcoholic Beverage and Tobacco Trust Fund. Distributions are then made from the remaining revenue as follows: 2.9 percent to County Revenue Sharing, 29.3 percent to the Public Medical Assistance Trust Fund, 10 percent to the Board of Directors of the H. Lee Moffitt Cancer Center and Research Institute (shall not be less than the amount that would have been paid to in fiscal year 2001-2002, had the distribution been in effect), 1 percent to the Biomedical Research Trust Fund, and the remainder to General Revenue. Effective 2017, the funds distributed to the Biomedical Research Trust Fund are paid annually to The Florida Consortium of National Cancer Institute Centers Program rather than the Sanford-Burnham Medical Research Institute, s. 210.20(2)c, F.S., (SB 2514).

Cigarette Surcharge: After a deduction of 8 percent for the General Revenue Service Charge, the remainder is distributed to the Health Care Trust Fund within the Agency for Health Care Administration.

Other Tobacco Products Tax: General Revenue Fund

Other Tobacco Products Surcharge: After a deduction of 8 percent for the General Revenue Service Charge, the remainder is distributed to the Health Care Trust Fund within the Agency for Health Care Administration.

OTHER STATES:[1]
All states and the District of Columbia tax cigarettes at varying rates, ranging from $0.17 in Missouri to $5.35 in New York. Thirty-three states and the District of Columbia currently have higher cigarette tax rates than Florida (including the $1.00 per pack surcharge).

| | 2026-27 (millions) |
|---|---|
| VALUE OF RATE CHANGES: | |
| Cigarette Tax: | |
| Value of 1 cent per pack tax levy | $4.9 |
| (Note: this estimate assumes no reduction in consumption would result from a tax increase. With higher increases in the tax, consumption effects would likely occur reducing the associated per penny increase in tax collections.) | |
| Other Tobacco Products Tax: | |
| Value of 1 percent levy on currently taxed products | $1.3 |
| | |
| VALUE OF EXEMPTIONS: | |
| Cigarette Tax: | |
| Cigarettes sold at federal installations (s. 210.04(4)(a), F.S.) | $0.6 |
| (Note: Title 4, Section 107 USC (Buck Act), prohibits states from levying excise taxes on cigarettes sold at federal installations.) | |
| Cigarettes sold on Indian reservations (s. 210.05(5), F.S.) | $5.9 |
| Other Tobacco Products Tax: | |
| Other Tobacco Products sold at federal installations (s. 210.30(5), F.S.) | $1.1 |
| | |
| VALUE OF REFUNDS AND ALLOWANCES: | |
| Dealer collection allowance (s. 210.05(3)(a), F.S.) | $3.5 |
| (2 percent of taxes collected and due calculated on a 24-cent tax rate) | |
| Refund for unsold products (s. 210.11, F.S.) | $0.6 |

# CITRUS TAXES

FLORIDA STATUTES: Chapter 601

ADMINISTERED BY: Florida Citrus Commission

SUMMARY:
Each box of fresh and processed citrus grown and placed into the primary channel of trade in this state is subject to an assessment levied and imposed on citrus. The annual per box assessment rates are determined by the Florida Citrus Commission each year, but cannot exceed maximum rates set forth in s. 601.15, F.S. Florida also imposes an "equalizing" assessment (s. 601.155, F.S.) on processed citrus products imported into the state.

REVENUE:

| Fiscal Year | Total Collections | Annual Change % |
|---|---|---|
| 2026-27* | 5,450,000 | -0.91% |
| 2025-26* | 5,500,000 | -2.59% |
| 2024-25 | 5,646,246 | -2.34% |
| 2023-24 | 5,781,276 | 6.20% |
| 2022-23 | 5,443,741 | -19.54% |
| 2021-22 | 6,765,441 | -13.44% |
| 2020-21 | 7,815,569 | 28.12% |

* Estimate

HISTORY:
The Florida Citrus Commission was established in 1935 to protect and to stabilize the citrus industry in the state. The citrus tax was increased in 1953, 1970, 1971, and 1973, and over the years, various minor rate changes and restrictions on Commission actions have been passed. The "box" tax is imposed upon each box of citrus fruit grown and placed into the primary channel of trade in Florida subject to maximum annual tax rates, determined each season from the tables in s. 601.15, F.S., based upon the previous season's actual statewide production as reported by the USDA and subject to additional maximum limits imposed by the Legislature. Section 601.156, F.S., which imposed an additional excise tax of 2 cents per box on each box of oranges grown in Florida and sold or delivered for processing, was repealed, effective July 1, 1995.

Florida also imposes an "equalizing" assessment (s. 601.155, F.S.) on processed citrus products imported into the state. Products grown within the United States are exempt from this assessment. The equalizing assessment was originally set at a rate equal to the per box assessment. However, in 2002, the Polk County Circuit Court ruled that the equalizing assessment found in s. 601.155, F.S., was unconstitutional as it violated the Commerce Clause.[1] In 2004, the Legislature passed CS/CS/SB 96 which codified the resulting settlement agreement and authorized any person liable for the equalizing assessment to opt out of two-thirds of the payment.

In 2011, legislation removed the tax rate tables based on production and limited the maximum rate to the rate in effect May 1, 2011, effective July 1, 2011. The rate for fresh oranges was capped at 7 cents per

[1] Subsequent to this ruling, the 2002 Legislature passed CS/SB 462, that modified s. 601.155(5), F.S., and removed the exemption from the equalizing tax on products grown in the U.S., replacing it with an exemption for products that have been levied a tax equivalent to Florida's citrus tax.

box, fresh grapefruit at 36 cents per box, and 16 cents per box for other varieties. For processed citrus products, the rates were capped at 25 cents per box for oranges, 36 cents per box for grapefruit, and 25 cents per box for other varieties.

In 2012, the Legislature passed HB 1237 (Chapter 2012-182, L.O.F.), re-designating "excise tax" on citrus fruit as "assessments." The bill also revises the maximum assessment for grapefruit, oranges, tangerines, and citrus hybrids regulated by the Department of Citrus that enter the primary channel of trade for use in processed and fresh form.

In 2020, the Legislature passed SB 1276 (Chapter 2020-151, L.O.F.), creating the "Friends of Florida Citrus Program" that allows private corporations to donate direct funds to the Florida Citrus Advertising Trust Fund.

BASE AND RATE:
The assessment rates per box grown and placed into the primary channel of trade in this state for FY 2025-26 are:

Fresh – 5 cents for oranges, 7 cents for grapefruit, and 7 cents for other varieties.
Processed – 12 cents for oranges, 7 cents for grapefruit, and 7 cents for other varieties.

The effective equalizing assessment on imported citrus is 4 cents for oranges and 2.3 cents for grapefruits (1/3 of the rates for processed oranges and grapefruit).

DISPOSITION:
Citrus Advertising Trust Fund

OTHER STATES:
The nature of this assessment precludes an interstate comparison, but some other states have similar taxes used to promote specific agricultural products.

# COMMUNICATIONS SERVICES TAX

FLORIDA STATUTES: Chapter 202

ADMINISTERED BY: Department of Revenue

SUMMARY:
The communications services tax is imposed on retail sales of communications services which originate and terminate in Florida or originate or terminate in Florida and are billed to a Florida address. Communications services include all forms of telecommunications previously taxed by the gross receipts tax plus cable television and direct-to-home satellite service. The law specifically states that the tax also applies to communications services provided through any "other medium or method now in existence or hereafter devised." The tax imposed by Chapter 203, F.S., on communications services is also administered under Chapter 202, F.S.

REVENUE (in millions):

| **Fiscal Year** | Total Collections | Annual Change % | Distributed by Sales Tax Distribution Formula | Tax on Direct-to-Home Satellite Services ** | Gross Receipts Tax |
|---|---|---|---|---|---|
| 2026-27* | 1121.1 | 2.16% | 714.8 | 29.8 | 376.5 |
| 2025-26* | 1097.4 | 2.27% | 698.3 | 29.9 | 369.2 |
| 2024-25 | 1073.0 | 5.59% | 680.4 | 31.7 | 360.9 |
| 2023-24 | 1016.2 | 1.19% | 627.5 | 37.4 | 351.3 |
| 2022-23 | 1004.2 | 4.09% | 614.7 | 42.6 | 346.9 |
| 2021-22 | 964.8 | 1.32% | 583.6 | 47.1 | 334.0 |
| 2020-21 | 952.2 | -3.20% | 571.6 | 50.8 | 329.7 |

* Estimate
** Distributed to local governments through the Local Government Half-Cent Clearing Trust Fund.
Source: CST-GRUT Estimating Conference, July 2025

HISTORY:
Prior to 2001, nonresidential telecommunications services were subject to sales and use tax under Chapter 212, F.S., at the rate of 7 percent. Cable television and direct satellite television were subject to sales and use tax at a rate of 6 percent. Telecommunications services were also subject to gross receipts tax at the rate of 2.5 percent under Chapter 203, F.S. Chapter 2000-260, L.O.F. (SB 1338), created the Communications Services Tax Simplification Law which provided for a new statewide tax on communications services to replace the sales and use tax on telecommunications services, cable, and direct satellite television. It also provided for a different administration of the gross receipts tax on telecommunications services and extended that tax to cable and direct satellite television. The Communications Services Tax Simplification Law, which applied to bills issued by communications services providers on or after October 1, 2001, also provided for locally imposed communications services tax to be administered by the Department of Revenue. Chapter 2001-140, L.O.F. (SB 1878), established the revenue-neutral tax rates for the state-wide and local communications services taxes. Chapter 2002-48, L.O.F. (HB 1511), conformed the communications services tax exemption for religious and educational institutions to similar provisions in the sales tax statute. It also provided an exemption for the public lodging industry from the requirement that dealers separately state the communications services tax. Chapter 2003-254, L.O.F. (SB 1176), exempted homes for the aged from the tax on communications services. Chapter 2005-187, L.O.F. (SB 2070), repealed the tax on substitute communications systems and provided that the Department of Revenue would not assess this tax back to October 1, 2001, when the communications services tax was implemented. Chapter 2006-229, L.O.F.

(HB 293), redistributed communications services tax revenue from the Local Government Half-Cent Clearing Trust Fund to fiscally constrained counties. Of the tax on direct-to-home satellite services that had been transferred to the Local Government Half-Cent Clearing Trust Fund, 30 percent was redirected to fiscally constrained counties, which are defined as counties for which a mill of property tax will raise no more than $5 million. Chapter 2010-138, L.O.F. (HB 7157), clarified that the partial exemption for residential households described in s. 202.125, F.S., does not apply to any residence that constitutes all or part of a transient public lodging establishment as defined in Chapter 509, F.S. Chapter 2010-83, L.O.F. (HB 281), allowed dealers to report credits for bad debts by netting the credit directly against communications services tax due. Chapter 2010-149, L.O.F. (SB 2024), decreased the sales tax rate to 6.65 percent and increased the gross receipts tax rate to 2.52 percent – effectively shifting 0.15 percent from the sales tax component to the gross receipts tax component – while retaining the exemption for residential households provided by s. 202.125(1), F.S., on the additional 0.15 percent gross receipts tax rate. Chapter 2011-120, L.O.F. (HB 887), required the tax to be calculated using the traditional "4-5" rounding rule, whereby the amount is rounded up if the third decimal place is greater than four, and allows the dealer to utilize rounding on the sales tax portion and gross receipts and at the item or invoice level. Chapter 2012-70, L.O.F. (HB 809), revised provisions of the law holding communications dealers liable for misallocation of taxes across local governments and allowing dealers to unbundle taxable and non-taxable items stated jointly on a customer's bill as long as the dealer could identify the items in its books and records. Chapter 2014-38, L.O.F. (HB 5601), revised the definition of prepaid calling arrangements to include services other than telephone calls, and services which terminate upon the expiration or exhaustion of all prepaid units and do not require the purchase of additional units. Chapter 2015-221, L.O.F. (HB 33A), revised the rate applied to Direct-to-Home (DTH) Satellite Communication Services Tax to 9.07 percent, and non-satellite CST to 4.92 percent as of July 1, 2015. Furthermore, the law revised statutory distributions of CST revenue to ensure local government distributions of the tax imposed on direct-to-homes satellite service pursuant to section 212.20(6), the Local Government Half-cent Sales Tax Clearing Trust Fund pursuant to s. 218.61, F.S., the Local Government Half-cent Sales Tax Clearing Trust Fund– Emergency Distribution pursuant to s. 218.65, F.S., the Revenue Sharing Trust Fund for Counties pursuant to s. 218.215, F.S. and the Revenue Sharing Trust Fund for Municipalities pursuant to s. 218.215; F.S. were not affected by the rate change.

BASE AND RATE:
Gross Receipts CST is derived from two different tax rates plus a portion of direct-to-home satellite collections. First, a tax rate of 2.37 percent is applied to the cable, wireless, landline and miscellaneous services tax bases. Second, an additional tax rate of 0.15 percent is applied to the same tax bases, excluding landlines in residential households. The dollars generated by both of these tax rates, plus 20.7 percent of total direct-to-home satellite collections, comprise total Gross Receipts CST collections.

The tax rate for Sales CST is currently set at 4.92 percent. Sales CST Collections are generated by applying the tax rate against the cable, wireless, landline and miscellaneous services tax bases, coupled with 44.32 percent of total direct-to-home satellite collections. As part of the calculation, the landline tax base is reduced by the residential household telephone exemption for Sales Tax CST. Because the weakening landline base impacts Gross Receipts CST to a greater degree than Sales CST, Sales CST has moderately stronger growth rates.

The tax rate for direct-to-home satellite service is currently set at 11.44 percent. The tax revenue is distributed between Gross Receipts CST, Sales CST, and local governments.

DISPOSITION:
Except for the tax on direct-to-home satellite service, the state tax collected under this chapter is distributed by the same formula as the sales and use tax, as prescribed in s. 212.20(6), F.S. Of the tax on direct-to-home satellite, 55.9 percent is distributed by the sales tax formula (with an adjustment to s.

212.20(6)(d), F.S.) and the remainder is transferred to the Local Government Half-Cent Clearing Trust Fund and is allocated in the same proportion as the half-cent sales tax under s. 218.61, F.S., the emergency distribution under s. 218.65, F.S., and the fiscally constrained counties distribution under s. 218.67, F.S. The gross receipts tax which is administered under this law goes to the Public Education Capital Outlay and Debt Service Trust Fund.

OTHER STATES:
Wireless Telecommunication Services are taxed by all 50 states and the District of Columbia. A state-by-state comparison of tax rates in 2025 is available from the Tax Foundation at:
https://taxfoundation.org/data/all/state/wireless-taxes-cell-phone-tax-rates-by-state-2025/#State

| | 2026-27 (millions) |
|---|---|
| VALUE OF RATE CHANGE: | |
| Value of 1 percent levy on tax base: | |
| Cable Telecommunication Services | $25.5 |
| Wireless Telecommunication Services | $21.5 |
| Direct-to-Home Satellite Telecommunication Services | $7.6 |
| Landline Telephone Services | $8.4 |
| Other Telecommunication Services | $87.6 |
| Total Telecommunication Services | $150.6 |
| VALUE OF EXEMPTIONS: | |
| Residential telephone (not including mobile telephone) (s. 202.125, F.S.) | $34.4 |
| Sales to government agencies, religious or educational 501(c)(3) organizations, and homes for the aged (s. 202.125, F.S.) | $249.4 |
| $100,000 cap on taxes on incoming interstate communications services for holder of direct-pay permits (s. 202.12(3), F.S.)* | $0 |
| Internet access (s. 202.11(1), F.S.) | $397.7 |
| Dealer collection allowance (s. 202.28(1), F.S.) | $10.7 |

**The exemption is limited to holders of direct-pay permits, and for those permitholders, limited to tax in excess of $100,000 due on sales of interstate communications services. No exemption has been claimed since FY 16-17 wherein the total amount claimed was approximately $1,000.*

# CORPORATE INCOME AND EMERGENCY EXCISE TAX

FLORIDA STATUTES: Chapter 220; Florida Constitution Article VII, Subsection 5(b)

ADMINISTERED BY: Department of Revenue

SUMMARY:
Certain corporations doing business in Florida must pay tax of 5.5 percent on income earned in Florida. Florida "piggybacks" the federal income tax code in its determination of taxable income. Taxable income earned by corporations operating in more than one state is taxed in Florida on an apportioned basis using a formula based 25 percent on property, 25 percent on payroll and 50 percent on sales. The first $50,000 of net income is exempt, effective with tax years beginning January 1, 2013.

REVENUE:

| Fiscal Year | Gross Collections | Annual Change % | Refunds | Annual Change % | Net Collections |
|---|---|---|---|---|---|
| 2026-27* | 5,765,700,000 | 0.52% | 325,200,000 | -0.37% | 5,440,500,000 |
| 2025-26* | 5,736,100,000 | -1.25% | 326,400,000 | 0.48% | 5,409,700,000 |
| 2024-25 | 5,808,887,834 | -3.44% | 324,834,078 | -4.12% | 5,484,053,756 |
| 2023-24 | 6,015,780,575 | 9.04% | 338,805,065 | 12.03% | 5,676,975,510 |
| 2022-23 | 5,517,203,760 | 46.67% | 302,411,779 | -64.43% | 5,214,791,981 |
| 2021-22 | 3,761,581,968 | 10.78% | 850,130,851 | 123.16% | 2,911,451,117 |
| 2020-21 | 3,395,582,342 | 37.28% | 380,946,475 | -52.48% | 3,014,635,867 |

* Estimate

HISTORY:
In response to a constitutional amendment which authorized the levy of a state corporate income tax, the 1971 Legislature adopted a 5 percent corporate income tax, which became effective on corporate incomes earned after January 1972. In 1982, a 2 percent Emergency Excise Tax was enacted to counter federal changes to the Internal Revenue Code. The 1983 Legislature significantly changed Florida's corporate income tax base by: (1) adopting a worldwide unitary approach for determining income; (2) distinguishing between business and non-business income for taxation purposes; (3) adopting a "throwback rule" for sales to the federal government and to entities where profits cannot be taxed; and (4) repealing the exemption on profits from foreign sales and foreign source dividends. In a December 1984 special session, the unitary apportionment, both domestic and worldwide, was repealed along with the taxation of foreign source dividends and the "throwback rule" and replaced with an increase in the tax rate. The corporate income tax rate was increased to 5.5 percent, and the emergency excise tax was increased to 2.2 percent.

In 1990, a general definition of "taxable income" was provided for any taxpayer whose taxable income is not otherwise defined, and the Alternative Minimum Tax Credit allowed in later years was clarified. The 1991 Legislature merged most of Ch. 214 (Administrative Procedures and Judicial Review) with Ch. 220, F.S. In 1994, the community contribution tax credit was extended from June 30, 1994, to June 30, 2005, but was restricted to projects within enterprise zones or benefiting low-income housing. The allowable annual contribution amount was reduced from a total of $3 million annually to $2 million annually. The 1996 Legislature adopted a 15 percent enterprise zone job credit for WAGES participants and a 5 percent job credit was adopted for non-WAGES employees whose wages exceed $1,500 a month. In 1997, Chapter 97-50, L.O.F. (SBs 780, 520, 692), created the Rural Job Tax Credit Program and the Urban High Crime Area Job Tax Credit Program. Each program authorizes qualified corporations to take a tax credit per eligible employee of $500, $1,000, or $1,500. This credit can be taken against the corporate income tax or the sales and use tax, but not both.

The 1998 Legislature provided for eight changes in the Florida Income Tax Code in addition to the annual adoption of the Internal Revenue Code in Chapter 98-100, L.O.F (SB 608). The new laws: (1) adjusted the formula for apportionment of federal income to exclude research and development activities through a university (Chapter 98-325, L.O.F., HB 3351); (2) created a capital investment tax credit equal to 5 percent of the capital costs generated by a project (Chapter 98-61, L.O.F., HB 3681); (3) increased the credits available for community revitalization from $2 to $5 million (Chapter 98-219, L.O.F., HB 3113); (4) created a credit for establishing or providing child care facilities scheduled to sunset in 2008 (Chapter 98-293, L.O.F., HB 193); (5) expanded the scope of qualifying employees for the enterprise zone jobs credit (Chapter 98-57, L.O.F., SB 1114); (6) created an exemption for limited liability companies (Chapter 98-101, L.O.F., SB 704); (7) repealed the intangible tax credit for banks (Chapter 98-132, L.O.F., SB 1450); and (8) created a credit for the rehabilitation of contaminated sites (Chapter 98-189, L.O.F., SB 244).

In 1999, in addition to the annual adoption of the Internal Revenue Code in Chapter 99-208, L.O.F. (SB 676), the Legislature: (1) provided that a citrus processing company may elect to use an apportionment formula determined solely by the sales factor; (2) eliminated an apportionment option available to insurance companies; and (3) increased the community contribution tax credit from $5 million to $10 million (Chapter 99-265, L.O.F., SB 290). The 2001 Legislature introduced a new tax credit for contributions made by Florida corporations to non-profit scholarship funding organizations (SFOs) capped at $50 million per state fiscal year in Chapter 2001-225 (HB 21), as well as making administrative adjustments to the terms of the Enterprise Zone Jobs Credit and the Community Contribution Tax Credit in Chapter 2001-201 (HB 1225). The 2002 Legislature provided for piggybacking of the Internal Revenue Code by the Florida Income Tax Code, including the accelerated/bonus depreciation provisions of the Federal Job Creation and Worker Assistance Act of 2002, P.L. 107-147, in Chapter 2002-283 (SB 2028). Other changes pertained to the expansion of the SFO credit scholarship recipients to students in kindergarten and first grade (Chapter 2002-387, L.O.F., SB 20-E), the change in the apportionment factor for industries in NAICS 311411 (SIC 2037, frozen fruit juices, and vegetables) (Chapter 2002-218, L.O.F., SB 426), and the change in the manner of calculating interest on tax deficiencies (Chapter 2002-218, L.O.F., SB 426).

The 2003 Legislature adopted the 2003 Internal Revenue Code in Chapter 2003-85, L.O.F. (HB 1839), and included certain financial services facilities as qualified projects for the capital investment tax credit (Chapter 2003-270, L.O.F., HB 691). Chapter 2003-395, L.O.F. (SB 18-A), created an amnesty program for taxpayers. This law also increased the interest rate on certain tax deficiencies to prime plus 4 percent. Chapter 2003-173, L.O.F., (HB 1123) modified the Contaminated Site Rehabilitation Credit to allow a new five-year carryforward period for the transferee of any credit transferred during the original taxpayer's five year carryforward period. Chapter 2003-391, L.O.F. (SB 30-A), amended the corporate income tax credit scholarship program to provide a cap of $88 million in annual tax credits and allow the carry forward of tax credits for three years. In special session 2003E, the Legislature subsequently reduced from $88 million to $50 million the maximum amount of corporate tax credits and carryforward tax credits for contributions to SFO's for Fiscal Year 2003-04 (Chapter 2003-424, SB 22-E).

The 2004 Legislature adopted the Internal Revenue Code of 2004 in Chapter 2004-262, L.O.F. (SB 1826), and reduced the SFO credits limitation from $88 million to $50 million for Fiscal Year 2004-05 (Chapter 2004-271, L.O.F., HB 1867). The 2005 Legislature adopted the Internal Revenue Code of 2005 in Chapter 2005-112, L.O.F. (SB 1798). In Chapter 2005-178 (SB 1300), it extended the time to file for refunds from two years to three years from the due date of the return with regard to extension. Chapter 2005-282, L.O.F. (SB 202), extended the community contribution tax program through June 30, 2015, and increased the annual cap on the total amount of tax credits granted under the program from $10 million to $12 million. The legislation also allowed the Office of Tourism, Trade, and Economic Development to waive the sector requirements of the Capital Investment Tax Credit Program to induce

the location or expansion of a facility that creates or retains 1,000 jobs, provided that 100 are new jobs, pays an average wage of at least 130 percent of the average private sector wage, and makes a cumulative capital investment of at least $100 million. Chapter 2005-287, L.O.F. (HB 1725), made a number of changes to the Enterprise Zone Job Credit and Enterprise Zone Property Tax Credit, to reflect the extension of the Enterprise Zone program from 2005-2015 in that bill.

Chapter 2006-230, L.O.F. (SB 888), authorized a corporate income tax credit for a new or expanded Florida renewable energy facility. Total credits may not exceed $5 million for any tax year and can be claimed for a maximum period of ten years. The legislation also provided a corporate income tax credit of 75 percent of all capital costs, operation and maintenance costs, and research and development costs incurred between July 1, 2006, and June 30, 2010, up to a limit of $3 million per fiscal year, in connection with an investment in hydrogen powered vehicles and hydrogen vehicle fuel stations in Florida. Chapter 2006-78, L.O.F. (HB 821), increased the annual community contribution tax credit by $2 million. Chapter 2006-55, L.O.F. (SB 2728), established the Florida Capital Investment Trust, the Florida Opportunity Fund Management Corporation, and the Florida Opportunity Fund for the purpose of increasing the availability of seed capital and early stage venture capital for emerging companies in Florida. It provided for a total of $75 million in tax credits, with tax credits exercisable only between July 1, 2011, and June 30, 2036, with an annual cap of $20 million. No major changes were made by the 2007 Legislature other than the annual "piggybacking" legislation in Chapter 2007-35, L.O.F. (SB 1014).

The 2008 Legislature made several major changes. Chapter 2008-206, L.O.F. (HB 5065), provided for piggybacking of the Internal Revenue Code by the Florida Income Tax Code. However, the temporarily increased asset expensing and temporary additional depreciation allowances enacted by Congress in the Economic Stimulus Act of 2008 were disallowed for Florida income tax purposes. Additionally, the legislation slightly accelerated the timing of all estimated payments by requiring remittance only before the first day of the month, not on the first day. Chapter 2008-241, L.O.F. (HB 653), increased the total annual tax credits allowed for contributions made by Florida corporations to non-profit scholarship funding organizations from $88 million to $118 million. Chapter 2008-153, L.O.F. (HB 5003), increased from $10.5 million to $13 million, for Fiscal Year 2008-09 only, the allowed total credits for the portion of the Community Contribution Tax Credit program dedicated to homeownership for low-income and very-low-income households. Chapter 2008-239, L.O.F. (HB 527), added to the Contaminated Site Rehabilitation Tax Credit (brownfields) new allowances for recovering the cost of solid waste removal and the cost of constructing a health care facility. In addition to various clarifications of renewable energy tax credit provisions, Chapter 2008-227, L.O.F. (HB 7135), allowed for the transferability of the corporate tax credits for renewable energy technologies investment.

The 2009 Legislature also made several changes. Chapters 2009-18 and 2009-192, L.O.F. (SB 1112 and SB 2504), required taxpayers to "add back" to Florida income, deductions allowed for federal income tax purposes under the Economic Stimulus Act of 2008 and the American Recovery and Reinvestment Act of 2009, for increased asset expensing and additional depreciation allowances in the same manner as Chapter 2008-206, L.O.F. (HB 5065). However, the 2009 legislation allowed such taxpayers to decrease their Florida taxable income by an amount equal to one-seventh of this "add back" amount for a seven-year period. The American Recovery and Reinvestment Act of 2009 also allowed taxpayers, for federal income tax purposes, to elect to defer recognition of income for certain debt acquisitions, modifications, and forgiveness. Chapter 2009-192, L.O.F. (SB 2504), required taxpayers making such an election to "add back" to Florida income those amounts deferred for federal income tax purposes. Taxpayers are allowed to subtract such amounts from Florida income when such amounts are ultimately recognized for federal income tax purposes. Chapter 2009-50, L.O.F. (HB 485), created the Florida New Markets Development Program to provide state tax credits for investments in low-income communities. These tax credits may be used to offset corporate income or insurance premium tax liabilities. Credits available are capped at $20 million annually and $97.5 million for the life of the program. Chapter 2009-108, L.O.F.

(HB 453), renamed the Corporate Income Tax Scholarship Program the Florida Tax Credit Scholarship Program and expanded the program to include insurance premium tax credits as eligible contributions to the scholarship program. Taxpayers claiming the insurance premium tax credit are not eligible for the corporate income tax credit.

Chapter 2010-24, L.O.F. (SB 2126), increased the Florida Tax Credit Scholarship Program cap from $118 million to $140 million for Fiscal Year 2010-11. For Fiscal Year 2011-12 and thereafter, the cap will increase by 25 percent whenever tax credits approved in the prior fiscal year are equal to or greater than 90 percent of the tax credit cap amount for that year. The law also expanded the revenue sources against which tax credits may be granted for contributions to the program to include: (1) severance taxes on oil and gas production; (2) self-accrued sales tax liabilities of direct pay permit holders; and (3) alcoholic beverage taxes. Chapter 2010-147, L.O.F. (SB 1752), created the Jobs for the Unemployed Tax Credit. The program provides $10 million in total corporate income tax credits over Fiscal Years 2010-11 and 2011-12 to any new or existing qualified targeted industry business that hires a new employee who is unemployed. The legislation also created a five-year, $242 million transferable tax credit incentive program for Florida's film and entertainment industry. Generally, the credits are 20 percent of qualified expenditures, with additional amounts available in certain circumstances. The law provided that credits awarded may be used to offset corporate income tax or sales and use tax liabilities.

Chapter 2011-229, L.O.F. (HB 7185), required taxpayers to "add back" to Florida income, deductions allowed for federal income tax purposes under the Small Business Jobs Act of 2010 and the Tax Relief, Unemployment Insurance Reauthorization, and Job Creation Act of 2010, for increased asset expensing and additional depreciation allowances in the same manner as Chapter 2009-18, L.O.F. (SB 1112), and allowed such taxpayers to decrease their Florida taxable income by an amount equal to one-seventh of this "add back" amount for a seven-year period.

Chapter 2011-76, L.O.F. (HB 143), made several changes. The law allowed qualified corporations to use a single sales factor apportionment formula to calculate their corporate income tax liability, instead of the current three factor formula that uses sales, property, and payroll. To qualify, a business must invest a total of $250 million in qualifying capital expenditures within Florida over a two-year period beginning no earlier than July 1, 2011. The law provided an annual corporate income tax credit for qualifying research and development expenses in Florida. The credit will be equal to 10 percent of the current year's expenses that exceed the average expenses over the past four years. The amount of credits available to be awarded under the bill is $9 million. The law increased from $2 million to $5 million the corporate income tax credits that are annually available to partially compensate taxpayers that voluntarily clean up drycleaning-solvent-contaminated or brownfield sites. The law allowed a certified spaceflight business to apply for a credit equal to 50 percent of the business's corporate income tax liability in a given year. A certified spaceflight business may also convert net operating losses into transferable corporate income tax credits. A business wishing to take advantage of either type of credit created by this program must demonstrate that it engaged in spaceflight projects, created 35 new jobs, and invested $15 million dollars in the three years prior to being certified for the credits. The total amount of credits that may be approved under the legislation is $10 million. The law repealed the corporate income emergency excise tax, but allowed taxpayers with unused credits related to the tax to take such credits against corporate income tax. The law increased funding for the film and entertainment tax credit program from $38 million to $42 million per year for Fiscal Years 2012-13, 2013-14, and 2014-15. The law also created three new bonus credit programs and made other changes to qualification criteria and reporting requirements.

Chapter 2011-223, L.O.F. (HB 879), allows certain qualifying businesses that do not have sufficient business tax liability to carry forward and use the capital investment tax credit in years 21-30 after the commencement of operations of the qualified project. Chapter 2011-229, L.O.F. (HB 7185), increased the corporate income tax exemption amount from $5,000 to $25,000 effective for tax years beginning on or

after January 1, 2012. Previously, under the Florida Tax Credit Scholarship Program, corporate income tax credits were limited to 75 percent of the tax due. Chapter 2011-123, L.O.F. (HB 965), removed this limitation.

Chapter 2012-145, L.O.F. (HB 5701), provided that any estimated tax payment originally due on June 30, 2013, must now be made on or before June 28, 2013. The result shifted an estimated $100 million of revenue from Fiscal Year 2013-14 to 2012-13. Chapter 2012-32, L.O.F. (HB 7087), increased the corporate income tax exemption amount from $25,000 to $50,000 effective for tax years beginning on or after January 1, 2013. The legislation provided an additional $42 million for tax credits for the Entertainment Industry Financial Incentive Program for Fiscal Year 2015-16. The legislation also increased the total amount of tax credits available for the New Markets Development Program from $97.5 million to $163.8 million and increased the amount of credits that may be taken in a given fiscal year from $20 million to $33.6 million. Chapter 2012-117, L.O.F. (HB 7117), reinstated and modified the Florida Renewable Energy Production Credit for electricity produced and sold on or after January 1, 2013, through June 30, 2016. The legislation also reinstated the Renewable Energy Technologies Investment Tax Credit for 75 percent of all capital costs, operation and maintenance costs, and research and development costs in connection with an investment in the production, storage, and distribution of biodiesel and ethanol in Florida incurred between July 1, 2012, and June 30, 2016. The law limited the annual tax credits for all applicants to $5 million for Fiscal Year 2012-13 and $10 million for Fiscal Years 2013-14 through 2016-17.

Similar to legislation passed in 2009 and 2011, Chapter 2013-46, L.O.F. (SB 1516), required taxpayers to "add back" to Florida income, deductions allowed for federal income tax purposes under the American Taxpayer Relief Act of 2012 for increased asset expensing and additional depreciation allowances. Additionally, Chapter 2013-42, L.O.F. (SB 406) increased the lifetime cap of New Markets Development Program Credits from $163.8 million to $178.8 million, and the annual cap from $33.6 million to $36.6 million.

In addition to the annual "piggybacking" legislation, the 2014 Legislature passed three bills which impact the corporate income tax. First, Chapter 2014-38, L.O.F. (HB 5601), increased the total amount of tax credits available for the New Markets Development Program from $178.8 million to $216.34 million. Second, Chapter 2014-38, L.O.F. (HB 5601), delayed the repeal of the Community Contributions Tax Credit program by one year and increased the annual cap for that program from $14.0 million to $21.9 million. Third, Chapter 2014-184 L.O.F. (SB 850), revised the Florida Tax Credit Scholarship program by allowing eligible tax credits, once earned, to be taken against the next estimated payment and to be conveyed, transferred, or assigned between members of an affiliated group upon approval of the Department of Revenue.

Chapter 2015-221, L.O.F. (HB 33A), extended the Community Contributions Tax program with a $21.4 million cap in FYs 2016-17 and 2017-18. Chapter 2015-221, L.O.F., also provided a one-time increased allowance for tax credits of $21.6 million for FY 2015-16 under the Contaminated Site Rehabilitation (brownfield) program. Chapter 2015-221, L.O.F., also modified the Research and Development tax credit by narrowing the types of businesses that qualify, providing a one-week window for applications, providing for allocation of credits on a pro-rata basis and increasing the amount available to be awarded in calendar year 2016 to $23 million.

Similar to legislation passed in 2009, 2011, 2013, and 2015, Chapter 2016-220, L.O.F. (HB 7099), required taxpayers to "add back" to Florida income, deductions allowed for federal income tax purposes under the Consolidated Appropriations Act, 2016 for increased asset expensing (bonus depreciation). However, this legislation adopted a permanent increase in the amount of capital costs that may be

expensed under 26 U.S.C. § 179 from $25,000 to $500,000. The legislation also adjusted several Florida tax return due dates to reflect federal due date changes.

Chapter 2017-36, L.O.F. (HB 7109), increased the tax credits available under the Contaminated Site Rehabilitation (brownfield) program from $5 to $10 million per year, increased the amount available for research and development tax credits in calendar year 2018 from $9 million to $16.5 million, and made the Community Contribution Tax Credit permanent, with $14 million in tax credits available each fiscal year beginning in FY 2018-19. The bill also extended the filing deadline applicable to calendar-year corporate income tax payers to 6 months after the original due date and modified the estimated corporate income tax payment deadline at the end of June when the last day of the month is a weekend day to require the payment to be made on or before the last Friday of June.

Chapter 2018-119, L.O.F. (HB 7093), required tax payers to "add back" to Florida income any deductions for increased bonus depreciation allowed for federal tax purposes under the Tax Cuts and Jobs Act of 2017 (Pub. L. 115–97). However, the bill allowed taxpayers to decrease their Florida taxable income by an amount equal to one-seventh of this "add back" amount for a period of seven years.

The bill also required the Department of Revenue to examine the effects of the Tax Cuts and Jobs Act on state corporate income tax and corporate income taxpayers, conduct public workshops, and to submit a comprehensive report discussing the potential effects of the Act on the state corporate income tax structure and revenues. Further, the bill created an automatic corporate income tax rate adjustment mechanism that will reduce the Florida corporate income tax rate for taxable years beginning on or after January 1, 2019, if net collections exceed forecasted collections by at least seven percent during Fiscal Year (FY) 2018-2019. However, the tax rate adjustment would only be effective for one year. The bill further requires the Department of Revenue to refund any excess collections received during FY 2018-2019 to eligible corporate taxpayers by March 1, 2020. Finally, the bill required the 2019 Legislature to consider the Department of Revenue's report to determine if adjustments to the automatic tax rate mechanism were needed.

Chapter 2018-118, L.O.F. (HB 7087), provided an additional $8.5 million for tax credits for FY 2018-2019 for voluntary brownfields clean-up. The bill further provided an additional $5 million for community tax credits to be spread over the next two fiscal years. This credit may also be taken against sales tax.

In addition, Chapter 2018-6, L.O.F. (HB 7055), extended the period in which a corporate income taxpayer may carry forward unused tax credits under the Florida Tax Credit Scholarship Program (FTC) from five years to 10 years and eliminated the requirement to apply for carryforwards. Further, the bill allowed corporate income taxpayers to use tax credits earned from making contributions under the FTC against any of their estimated tax payments due instead of against the estimated payment due immediately following the contribution date. The bill required corporate income taxpayers to make eligible contributions to the SFO on or before the date the taxpayer is required to file a final tax return and prohibits the corporate income taxpayer from using the tax credits to reduce the amount of tax due, after requesting an extension to file a return, for purposes of determining compliance with filing and tentative tax payment requirements.

As a result of Chapter 2018-119, L.O.F. (HB 7093), the automatic corporate income tax rate adjustment mechanism reduced the Florida corporate income tax rate for taxable years beginning on or after January 1, 2019, to 4.458%. Chapter 2019-168, L.O.F. (HB 7127), extended this rate change to last through taxable years beginning on or before December 31, 2021 (subject to further downward revision if net collections exceed forecasted collections by at least seven percent during Fiscal Year 2019-2020 or 2020-2021). The rate will return to 5.5% for taxable years beginning on or after January 1, 2022. Chapter

2019-168, L.O.F., further requires the Department of Revenue to refund any excess collections received during Fiscal Years 2019-2020 and 2020-2021 to eligible corporate taxpayers by May 1 of the following year. This distribution date also applies to refunds authorized under Chapter 2018-119, L.O.F., for FY 2018-2019, which originally had a distribution date of March 1, 2020. Pursuant to this provision, $531 million was distributed in April 2020, related to excess collections in FY 2018-2019.

In addition to specific language related to rate adjustments and refunds, Chapter 2019-168, L.O.F., also provided for the annual adoption of the Internal Revenue Code for the Florida Income Tax Code, with one notable exception. The bill provides for a new subtraction from federal taxable income for the amount of global intangible low-taxed income (GILTI) included in that amount (net of expenses). The bill also requires any business that filed a Florida Corporate Income/Franchise Tax Return for a taxable year beginning in 2018 or 2019 to submit an informational return. The required submission includes business-specific information about credits, deductions, and base adjustments caused by the federal tax changes.

Chapter 2020-10, L.O.F. (HB 7097), made a retroactive amendment to the refund provision in s. 220.1105(4), F.S., to ensure that the calculation of refunds under that section treated the use of credit for contributions to a scholarship-funding organization as tax paid to the state. The annual adoption of the Internal Revenue Code was also adopted in Chapter 2020-184, L.O.F. (HB 7095).

Chapter 2021-242, L.O.F. (HB 7059), contained the annual adoption of the Internal Revenue Code, with four exceptions related to federal changes to the Internal Revenue Code made by the Coronavirus Aid, Relief, and Economic Security Act (CARES Act) and the Consolidated Appropriations Act, 2021 (CAA). These exceptions included decoupling from the temporary increase in business interest expense allowable for 2019 and 2020, decoupling from the temporary increase in the allowable deduction for business meal expenses in 2021 and 2022, decoupling from a provision that altered the depreciable life of certain qualified improvement property, and decoupling from the temporary extension through 2025 of certain film, television, and live theatrical production expensing provisions. Other changes made at the federal level were adopted through this bill, including a temporary increase in the allowable Net Operating Loss deduction for 2018, 2019, and 2020; a temporary increase in the limitation on the charitable contribution deduction for contributions in 2020 and 2021; and assorted smaller changes. In addition, the Florida Corporate Income Tax collections were impacted by the Paycheck Protection Program, established by the CARES Act, which essentially granted funds to Florida businesses through a loan forgiveness program, on which no cancellation of debt income was generated, and which was usable for otherwise deductible purposes.

Chapter 2021-31, L.O.F. (HB 7061), made several additional changes to the corporate income tax. First, it increased the credits available to be awarded under the Contaminated Site Rehabilitation (brownfield) Tax Credit program from $10 million to $27.5 million for the 2021-22 fiscal year. Second, it created a temporary Florida Internship Tax Credit Program available for use against corporate income tax, capped at $2.5 million in fiscal years 2021-22 and 2022-23. Third, it created the New Worlds Reading Initiative. The program provides dollar-for-dollar tax credits to businesses that make monetary donations to the administrator of the New Worlds Reading Initiative, a book delivery program for Florida students. Chapter 2021-193, L.O.F. (HB 3), created the Strong Families Tax Credit Program. The program provides dollar-for-dollar tax credits for businesses that make monetary donations to certain eligible charitable organizations that provide services focused on child welfare and well-being. The New Words Reading Initiative and Strong Families tax credits can be taken against severance taxes on oil and gas production, self-remitted sales tax, corporate income tax, alcoholic beverage taxes, or insurance premium taxes. The credits against corporate income tax are available for tax years beginning on or after January 1, 2022.

In addition, ongoing impact from Chapter 2019-168, L.O.F. (HB 7127), further impacted collections by adjusting the tax rate downward from 4.458% (applying to taxable years beginning January 1, 2019 through December 31, 2020) to 3.535% for taxable years beginning in 2021. The rate returned to 5.5% for taxable years beginning on or after January 1, 2022.

Chapter 2022-97, L.O.F. (HB 7071), included the annual adoption of the Internal Revenue Code. While no significant changes were made at the federal level in 2021 that affected the state, there was an amendment to the Internal Revenue Code in the Tax Cuts and Jobs Act of 2017 which was not effective until January 1, 2022. The adoption of the Internal Revenue Code in 2022 therefore picked up the federal change in the treatment of Research and Experimental expenditures, from a 100% first-year deduction ("expensing") to a five-year (domestic) or fifteen-year (foreign) amortization. The bill created a new credit in s. 220.1915, F.S., for qualified Class II or Class III railroad expenditures, equal to 50% of the qualified expenditures and limited based on the number of miles of track owned or leased by the railroad within Florida. The bill also made conforming changes throughout chapter 220, F.S., related to the new railroad credit. The bill amended the Community Contribution Tax Credit program to increase the housing-specific credit cap from $10.5 million to $14.5 million, and the credit cap for all other contributions from $3.5 million to $4.5 million for a total increase from $14 million to $19 million. Finally, the bill also made minor administrative changes to the New Worlds Reading Initiative and Strong Families Tax Credit programs to retroactively allow for corporate income tax donations for tax years beginning on or after January 1, 2021; as well as increasing the allowable credits in each program: from $5 million to $10 million for the Strong Families Tax Credit Program beginning in 2022-23, and from $50 million to $60 million for the New Worlds Reading Initiative Tax Credit Program beginning in 2023-24.

Ongoing impact from Chapter 2019-168, L.O.F., which required the Department of Revenue to refund any excess collections received during Fiscal Years 2019-2020 and 2020-2021 to eligible corporate taxpayers by May 1 of the following year, led to a $642.1 million distribution to taxpayers in April 2022, related to excess collections in FY 2020-21.

Chapter 2023-157, L.O.F. (HB 7063), included the annual adoption of the Internal Revenue Code, along with a permanent increase in the annual cap for the Contaminated Site Rehabilitation (Brownfield) Tax Credit Program from $10 million to $35 million beginning in fiscal year 2023-24, and the creation of two temporary credits against corporate income tax related to the installation of residential graywater systems (up to $2 million per developer or homebuilder per year in calendar years 2024-2026) and related to the production of human breast milk derived human milk fortifiers (up to $5 million per year in state fiscal years 2023-24 and 2024-25). Chapter 2023-17, L.O.F. (SB 102), increased the tax credits available through the Community Contribution Tax Credit Program for affordable housing from $14.5 million to $25 million annually, of which roughly 6% is typically taken against corporate income tax. That bill also created the Live Local Program Tax Credit, which allows up to $100 million in tax credits to be taken against corporate income tax or insurance premium tax. Chapter 2023-173 (HB 5) repealed provisions related to certain expired tax credit programs, and chapter 2023-81 (SB 240) renamed the Florida Internship Tax Credit Program to the Florida Experiential Learning Tax Credit Program and extended that program through 2024-25.

Chapter 2024-158, L.O.F. (HB 7073), included the annual adoption of the Internal Revenue Code, along with revising the timing and application process for the existing credit for qualified railroad expenditures. That bill also recreated the Child Care Tax Credit (can be taken against corporate income tax, insurance premium taxes, severance taxes on oil and gas production, alcoholic beverage tax on beer, wine, and spirits, or self-accrued sales tax liability of direct pay permit holders) and created a credit for companies that employ individuals with unique abilities. Each of these two programs has a $5 million cap for a total of three state fiscal years. The bill also increased the annual cap for the Strong Families Tax Credit

program from $20 million to $40 million, revised criteria for entities that can receive contributions through the program, and clarified when applications for that credit become available. Finally, the bill provided for an automatic extension for filing a state income tax return for a taxpayer that has been granted an extension to file its federal income tax return due to a federally declared disaster that included locations within Florida.

Chapter 2025-208, L.O.F. (HB 7031), included the annual adoption of the Internal Revenue Code and excluded charitable trusts from the definition of a corporation. The bill also created the Home Away from Home Tax Credit and the Rural Community Investment Program. The Home Away from Home Tax Credit is a credit for contributions made to entities that provide low-cost or no-cost housing to family members of critically ill children receiving medical treatment. One hundred percent of the contributions must be used to expand or construct facilities for housing such family members. The tax credit cap is $13 million each fiscal year, and no new applications may be approved for fiscal years after Fiscal Year 2031-32. The Rural Community Investment Program allows a credit based on the amount of a taxpayer's investment in a rural fund which must invest contributions into businesses in rural or agricultural areas. Beginning in Fiscal Year 2025-2026, the tax credit cap amount for the program is $7 million in each state fiscal year, excluding any credits carried forward. The department may not approve a cumulative amount of tax credits that may result in the claim of more than $35 million in tax credits during the existence of the program.

BASE AND RATE:
The Corporate Income Tax is 5.5 percent of net income minus a $50,000 exemption. Section 220.15, F.S., defines net income as the share of adjusted federal income which is apportioned to this state for any given year. Apportionment is weighted by factors of sales (50 percent), property (25 percent) and payroll (25 percent). All business income is apportioned. Nonbusiness income is allocated to a single jurisdiction, generally the state of commercial domicile.

DISPOSITION:
General Revenue Fund

OTHER STATES:
All states and the District of Columbia currently impose some form of corporate income or franchise tax, or business gross receipts tax, except for South Dakota and Wyoming. Nevada, Ohio, Texas and Washington do not have a corporate income tax, but do have business gross receipts taxes. Most levying states and the District of Columbia have flat tax rates. These rates range from 2.5 percent to 9.8 percent. Fifteen states use graduated rates, which fall between 1.0 and 9.4 percent. More comparisons can be found at http://www.taxfoundation.org/data.

| VALUE OF RATE CHANGE: | | 2026-27 (millions) |
|---|---|---|
| Value of a 1 percent levy on apportioned net income | | $1,043.9 |

| | |
|---|---|
| Base Expansion Measures: | |
| Delete the deduction for advertising expenditures | $577.6 |
| Delete the deduction for interest expenses (include financial institutions) | 2,093.3 |
| Delete the deduction for interest expenses (exclude financial institutions) | 659.1 |
| Limit net loss carryforward to one year | Indeterminate |
| Impose a minimum payment requirement of $200: | |
| On C Corporations Only | $52.9 |
| On C and S Corporations | 162.7 |
| Require combined reporting of all domestic corporations (waters-edge unitary apportionment) | Positive Indeterminate |
| Adopt the throwback rule | Positive Indeterminate |
| Apply the tax to gross receipts rather than net profits: | |
| C Corporations (replace CIT) | $81,415.6 |
| Partnerships | 20,232.1 |
| S Corporations | 25,933.0 |
| Proprietorships | 5,047.9 |
| Total | 132,628.6 |

| Apply the tax to Earned Surplus (gross profits plus compensation of officers): | |
|---|---|
| C Corporations (replace CIT) | $37,384.8 |
| Partnerships | 8,687.2 |
| S Corporations | 11,715.4 |
| Proprietorships | 3,640.3 |
| Total | 61,427.7 |

Notes:

1. The Florida Constitution states that there shall be exempt not less than $5,000 (Article VII, Section 5(b)).
2. The deduction for bonus depreciation represents the sum of bonus depreciation deductions taken by all taxpayers in a fiscal year. This number is comprised of 1/7 of the value of property placed in service in that year and 1/7 of the property placed in service in each of the six previous years. The deduction for bonus depreciation is offset in the first year of service through an addition to taxable income pursuant to 220.13(1)(e)1.a., F.S.
3. "All other deductions" represents "Other Subtractions" taken on Schedule II of the Florida Corporate Income Tax Return. This may contain, among other things, subtractions related to partnership adjustments, certain foreign taxes, cancellation of indebtedness income that was deferred, and a subtraction for wages and salaries paid to new employees that was disallowed at the federal level.
4. The forecast for the next five years does not anticipate an additional increase in the cap.
5. Following publication of the 2022 Tax Handbook, a significant effort was made by professional staff from the Senate Committee on Finance and Tax, the House Ways & Means Committee, the Legislative Office of Economic and Demographic Research, the Governor's Office of Policy and Budget, and the Department of Revenue to review the underlying processes, methodologies, and assumptions used for Corporate Income Tax estimates in the Tax Handbook. This effort revealed several opportunities for improvements based primarily upon better sources of state and federal income tax data than had been used in previous editions of the Tax Handbook. Those improvements, including the improved data sources, were used for updates to the Corporate Income Tax section of the Tax Handbook beginning with the 2023 edition.

# CORPORATION FEES

FLORIDA STATUTES: Sections 15.09, 607.0122, 607.193, 605.0213, 609.02, 617.0122, 620.1109, 620.81055, and 679.525

ADMINISTERED BY: Department of State, Division of Corporations

SUMMARY:
All corporations doing business in Florida must file annually with the Department of State. Business entities must pay various fees for the right to do business in Florida. The major fees are the annual report filing fee, corporate filing fees, and the supplemental corporate fee. A comprehensive list of fees can be found in the Florida Statutes sections detailed above. All funds collected by the Division of Corporations are deposited in the General Revenue Fund (s.15.09(4), F.S.).

REVENUE:

| Fiscal Year | Partnership Fees | Annual Report Fees (a) | Corporate Fees | Supple-mental Corporate Fees | Late / Reinstate Fees | Misc Fees (b) | Total Fees | General Revenue Distribution (c) |

* Estimate

** Pursuant to Executive Order No. 20-52 and the Department of State Emergency Order 2020-01, the May 1st due date for the 2020 annual reports was delayed to June 30th, 2020. The change in due date shifted a significant portion of revenue from Fiscal Year 2019-20 into Fiscal Year 2020-21.

(a) Annual report fees include annual reports for the arts.

(b) Miscellaneous fees include: trademarks, service of process, liens, fictitious names, federal tax liens, penalties for NSF, certificates, certified copies, and photocopies.

(c) The General Revenue distribution does not equal total fees collected due to both timing of deposits and miscellaneous fees that are included in "Other" General Revenue categories.

HISTORY:
In 1943, the Uniform Limited Partnership Law was enacted. Fees of not less than $l0 or more than $500 were adopted; increases were made in 1967, 1971, and 1990. Filing fees for corporations-not-for-profit were first introduced in 1959 and increased by the 1967, 1989, and 1990 Legislatures. In 1965, fees for filing financial statements under chapter 679 of the Uniform Commercial Code were established and increased in 1967, 1971, 1989, 1990, and 1992. In 1987, 1988, and 1990, a number of corporate filing fees for corporations-for-profit were increased.

The 1989 Legislature adopted the Revised Model Business Corporation Act, which went into effect July 1, 1990. In 1990, all fees processed by the Department of State and deposited into the Corporations Trust Fund were increased by 75 percent with 43 percent of all moneys deposited each month into the trust fund to be transferred to the General Revenue Fund. Also in 1990, a supplemental corporate fee of $138.75 was imposed on each business entity authorized to do business in Florida and required to file an annual report with the Department of State. Revenues from the supplemental fee were for deposit into the General Revenue Fund. The date for filing the annual report was changed from July 1 to May 1 of each year.

In 1993, the annual report filing fee was increased for limited liability companies. In 1995, the supplemental corporate fee for not-for-profit corporations was reduced from $138.75 to $68.75, and the fee for not-for-profit corporations was repealed on January 1, 1996. On January 1, 1997, the supplemental corporate fee for corporations-for-profit was reduced from $138.75 to $103.75 and to $88.75 on January 1, 1998. In addition, the supplemental corporate fee late charge was increased from $25 to $385 on January 1, 1997, and increased to $400 on January 1, 1998. In 2001, the Legislature authorized the Department of State to reduce the annual filing fee by an amount equal to the convenience fee for electronic filings. Also, authorization was granted to the department to waive supplemental corporate late charges for filers who had not received the department's prescribed forms.

In 2003, the Corporations Trust Fund was eliminated with all current balances transferred to the General Revenue Fund. Chapter 2007-5, L.O.F. (HB 7003) corrected a reference in s. 607.193, F.S., to render limited liability companies subject to the supplemental filing fee.

Section 679.527, F.S., authorizes the Department of State to select and contract with a private vendor to populate and maintain the Florida Secured Transaction Registry. The collections of the nonrefundable processing fees from secured transactions under the Uniform Commercial Code cover payment to the vendor, with the remaining amount deposited in the General Revenue Fund. Section 679.525(1)(a), F.S., sets a nonrefundable $25 processing fee for filing an initial financing statement. In 2009, SB 1780 (Chapter 2009-72, L.O.F.) was enacted to add paragraph (h) to s. 679.525(1), F.S., to authorize an additional nonrefundable $10 processing fee for the filing of the initial financing statement. The receipts of this fee are deposited into the General Revenue Fund and are not used in the calculation of the private vendor's compensation for performing services regarding the Florida Secured Transaction Registry.

Section 607.193(2) (b), F.S., imposes a late charge of $400 on entities failing to file the supplemental corporate filing fee by May 1 of each year, unless the entity "did not receive the uniform business report prescribed by the department." In 2010, HB 5505 (Chapter 2010-152, L.O.F.) struck the language allowing an exemption from the late fee and also required that entities seeking reinstatement after dissolution or revocation pay the applicable reinstatement fee.

Chapter 2012-71, L.O.F., (HB 827) allows Limited Agricultural Associations to convert to a not-for-profit corporation for a $35 fee.

BASE AND RATE:
Specific fees are charged for each type of filing required by law. The current fee schedule for each type of entity is detailed below:

<u>For corporations (s. 607.0122, F.S):</u>
(1) Articles of incorporation: $35.
(2) Application for registered name: $87.50.
(3) Application for renewal of registered name: $87.50.
(4) Corporation's statement of change of registered agent or registered office or both if not included on the annual report: $35.
(5) Designation of and acceptance by registered agent: $35.
(6) Agent's statement of resignation from a corporation that has not been dissolved: $87.50.
(7) Agent's statement of resignation from a dissolved corporation or a composite statement of resignation from two or more dissolved corporations pursuant to s. 607.0502(6): $35.
(8) Amendment of articles of incorporation: $35.
(9) Restatement of articles of incorporation with amendment of articles: $35.
(10) Articles of merger or share exchange for each party thereto: $35.
(11) Articles of dissolution: $35.

(12) Articles of revocation of dissolution: $35.
(13) Application for reinstatement following administrative dissolution: $600.
(14) Application for certificate of authority to transact business in this state by a foreign corporation: $35.
(15) Application for amended certificate of authority: $35.
(16) Application for certificate of withdrawal by a foreign corporation: $35.
(17) Annual report: $61.25.
(18) Articles of correction: $35.
(19) Application for certificate of status: $8.75.
(20) Certificate of domestication of a foreign corporation: $50.
(21) Certified copy of document: $52.50.
(22) Serving as agent for substitute service of process: $87.50.
(23) Supplemental corporate fee: $88.75 (s. 607.193, F.S).
(24) Any other document required or permitted to be filed by this act: $35.
(25) Late fee for paying supplemental filing fee after May 1: $400 (s. 607.193, F.S.).

For limited liability corporations (s. 605.0213, F.S):
(1) For furnishing a certified copy, $30.
(2) For filing original articles of organization, articles of revocation of dissolution, or a foreign limited liability company's application for a certificate of authority to transact business, $100.
(3) For filing a certificate of merger of limited liability companies or other business entities, $25 per constituent party to the merger, unless a specific fee is required for a party in other applicable law.
(4) For filing an annual report, $50.
(5) For filing an application for reinstatement after an administrative or judicial dissolution or a revocation of authority to transact business, $100.
(6) For filing a certificate designating a registered agent or changing a registered agent, $25.
(7) For filing a registered agent's statement of resignation from a limited liability company that has not been dissolved, $85.
(8) For filing a registered agent's statement of resignation from a dissolved limited liability company or a composite statement of resignation from two or more dissolved limited liability companies pursuant to s. 605.0115(6), $25.
(9) For filing a certificate of conversion of a limited liability company, $25.
(10) For filing any other limited liability company document, $25.
(11) For furnishing a certificate of status, $5.
(12) Supplemental corporate fee: $88.75 (s. 607.193, F.S.).
(13) Late fee for paying supplemental filing fee after May 1: $400 (s. 607.193, F.S.).

For corporations not for profit (s. 617.0122, F.S):
(1) Articles of incorporation: $35.
(2) Application for registered name: $87.50.
(3) Application for renewal of registered name: $87.50.
(4) Corporation's statement of change of registered agent or registered office or both if not included on the annual report: $35.
(5) Designation of and acceptance by registered agent: $35.
(6) Agent's statement of resignation from a corporation that has not been dissolved: $87.50.
(7) Agent's statement of resignation from a dissolved corporation or a composite statement of resignation from two or more dissolved corporations pursuant to s. 617.0502(2)(b): $35.
(8) Amendment of articles of incorporation: $35.
(9) Restatement of articles of incorporation with amendment of articles: $35.
(10) Articles of merger for each party thereto: $35.
(11) Articles of dissolution: $35.
(12) Articles of revocation of dissolution: $35.

(13) Application for reinstatement following administrative dissolution: $175.
(14) Application for certificate of authority to transact business in this state by a foreign corporation: $35.
(15) Application for amended certificate of authority: $35.
(16) Application for certificate of withdrawal by a foreign corporation: $35.
(17) Annual report: $61.25.
(18) Articles of correction: $35.
(19) Application for certificate of status: $8.75.
(20) Certified copy of document: $52.50.
(21) Serving as agent for substitute service of process: $87.50.
(22) Certificate of conversion of a limited agricultural association to a domestic corporation: $35.
(23) Any other document required or permitted to be filed by this chapter: $35.

For partnerships (s. 620.81055, F.S.):
(1) Partnership registration statement: $50.
(2) Statement of partnership authority: $25.
(3) Statement of denial: $25.
(4) Statement of dissociation: $25.
(5) Statement of dissolution: $25.
(6) Statement of qualification: $25.
(7) Statement of foreign qualification: $25.
(8) Limited liability partnership annual report: $25.
(9) Certificate of merger for each party thereto: $25.
(10) Amendment to any statement or registration: $25.
(11) Cancellation of any statement or registration: $25.
(12) Certified copy of any recording or part thereof: $52.50.
(13) Certificate of status: $8.75.
(14) Certificate of conversion: $25.
(15) Any other document required or permitted to be filed by this act: $25.
(16) Supplemental corporate fee: $88.75 (s. 607.193, F.S.).
(17) Late fee for paying supplemental filing fee after May 1: $400 (s. 607.193, F.S.).

For limited liability partnerships (s. 620.1109, F.S):
(1) For furnishing a certified copy, $52.50 for the first 15 pages plus $1.00 for each additional page.
(2) For filing an original certificate of limited partnership, $965.
(3) For filing an original application for registration as a foreign limited partnership, $965.
(4) For filing certificate of conversion, $52.50.
(5) For filing certificate of merger, $52.50 for each party thereto.
(6) For filing a reinstatement, $500 for each calendar year or part thereof the limited partnership was administratively dissolved or foreign limited partnership was revoked in the records of the Department of State.
(7) For filing an annual report, $411.25.
(8) For filing a certificate:
    (a) Designating a registered agent, $35;
    (b) Changing a registered agent or registered office address, $35;
    (c) Resigning as a registered agent, $87.50; or
    (d) Of amendment or restatement of the certificate of limited partnership, $52.50;
(9) For filing a statement of termination, $52.50.
(10) For filing a notice of cancellation for foreign limited partnership, $52.50.
(11) For furnishing a certificate of status or authorization, $8.75.
(12) For filing a certificate of dissolution, $52.50.
(13) For filing a certificate of revocation of dissolution, $52.50.

(14) For filing any other domestic or foreign limited partnership document, $52.50.
(15) Supplemental corporate fee: $88.75 (s. 607.193, F.S.).
(16) Late fee for paying supplemental filing fee after May 1: $400 (s. 607.193, F.S.).

For common-law declarations of trust (s. 609.02, F.S.):
For filing a copy of the declaration of trust, $350.

For first page of initial financing statement (s. 679.525(1)(h), F.S.):
For filing the first page of an initial financing statement, $10 to General Revenue.

DISPOSITION:
All corporate filing fees collected by the Department of State are deposited into the General Revenue Fund. In addition, the Florida Secured Transaction Registry must deposit the fee specified in s. 679.525(1)(h), F.S., to the General Revenue Fund.

OTHER STATES:[1]
All fifty states and the District of Columbia require corporate filing, annual reports, and general fees for doing business in their respective jurisdictions.

# COUNTIES' MEDICAID SHARE

FLORIDA STATUTES: Section 409.915

ADMINISTERED BY: Agency for Health Care Administration

SUMMARY:
Counties' Medicaid Share, previously known as Medical Hospital Fees (also known as county contributions to Medicaid) are payments made to the state as reimbursement for a portion of the cost of certain services provided to county residents through Florida's Medicaid program.

REVENUE:

| Fiscal Year | Collections | Annual Change % |
|---|---|---|
| 2026-27* | 411,600,000 | -3.54% |
| 2025-26* | 426,700,000 | 15.72% |
| 2024-25 | 368,738,413 | 18.83% |
| 2023-24 | 310,300,236 | 8.08% |
| 2022-23 | 287,093,780 | -2.74% |
| 2021-22 | 295,183,298 | -2.89% |
| 2020-21 | 303,959,493 | 0.76% |

* Estimate

HISTORY:
Chapter 72-225, L.O.F., created s. 409.267, F.S., which required county participation in the cost of the following items provided under Medicaid: 35 percent of the cost of inpatient hospitalization in excess of 12 days and 35 percent of the cost of nursing home or intermediate care facilities in excess of $170 per month. In 1975, a limitation of $55 per resident per month on the required reimbursements for services provided by nursing home and intermediate care facilities was enacted. In 1991, s. 409.267, F.S., was repealed and replaced with s. 409.915, F.S. An exemption for county residents in the Medically Needy program component of Medicaid was also enacted at this time. In 1996, required reimbursements were extended to services provided to health maintenance organization members if the services would have been reimbursable in a fee-for-service setting. In 2001, the 12 day exclusion for inpatient hospital services was reduced to 10 days, and an exemption for the cost of adult lung transplant services was established. In 2012, the law was changed to allow payments to be withheld from the distribution of the half-cent sales tax to the counties, rather than having the counties pay directly.

For the period from State Fiscal Year 1994-95 through Fiscal Year 2006-07, county contributions to Medicaid collections were approximately 93 percent of total billings in any fiscal year. For Fiscal Year 2007-08 through Fiscal Year 2011-12, county contributions to Medicaid collections dropped to less than 90 percent of total billings, with only 64.7 percent of billings in Fiscal Year 2010-11 being paid in that year. The decline in collections was caused mainly by the inability of the agency and individual counties to reach agreement on whether certain Medicaid recipients were residents of the county. The decline in the amount of billings collected resulted in a large backlog of past due billings.

In 2012, the Legislature reacted to this situation by enacting Chapter 2012-33, L.O.F. (HB 5301). That law provided specific processes whereby the agency worked with the counties and the Department of Revenue (DOR) to address payment backlog, prospective billings, and an administrative review and appeal for the billing and refund process.

# COUNTIES' MEDICAID SHARE

Chapter 2013-48, L.O.F. (SB 1520), amended s. 409.915, F.S., to revise the current process for county Medicaid billings. Instead of the current practice based on certain Medicaid expenditures incurred on behalf of a county's residents, the bill provided for an annual county contribution for Medicaid. The bill established a total contribution of $269.6 million for State Fiscal Year 2013-14 and $277.0 million for State Fiscal Year 2014-15. For State Fiscal Years 2015-16 through 2019-20, the total annual amount of the counties' contribution is adjusted by one half of the percentage change in state Medicaid expenditures over the two most recently completed State Fiscal Years. For each State Fiscal Year after 2019-20, the total amount of the counties' annual contribution shall be the total contribution for the prior State Fiscal Year adjusted by the percentage change in the state Medicaid expenditures as determined by the Social Services Estimating Conference.

The agency is responsible for calculating the amount of each county's annual contribution and providing that information to DOR by May 15 of each year.

By June 1 of each year, DOR must notify each county of its annual contribution. Counties must pay, via check or electronic transfer, 1/12th of the total, by the 5th of each month. If a county fails to remit payment by the 5th of the month, DOR is directed to reduce the county's monthly distribution from the Local Government Half-Cent Sales Tax Trust Fund by the amount of the monthly installment. The payments and the amounts by which the distributions are reduced are transferred to the General Revenue Fund.

BASE AND RATE:
The statute establishes a total contribution of $269.6 million for State Fiscal Year 2013-14 and $277.0 million for State Fiscal Year 2014-15. For State Fiscal Years 2015-16 through 2019-20, the total annual amount of the counties' contribution is adjusted by one half of the percentage change in state Medicaid expenditures over the two most recently completed State Fiscal Years. For each State Fiscal Year after 2019-20, the total amount of the counties' annual contribution shall be the total contribution for the prior State Fiscal Year adjusted by the percentage change in the state Medicaid expenditures as determined by the Social Services Estimating Conference.

DISPOSITION:
Reimbursements are deposited into the General Revenue Fund.

OTHER STATES:
Research by the National Association of Counties shows that at least sixteen states (including Florida) require counties to contribute to the non-federal share of Medicaid, while others are required to cover administrative and/or program costs. The research did not capture the level of these contributions.

VALUE OF RATE OR TAX BASE CHANGE:
See BASE AND RATE above.

# DOCUMENTARY STAMP TAX

FLORIDA STATUTES: Chapter 201

ADMINISTERED BY: Department of Revenue

SUMMARY:
The documentary stamp tax comprises two taxes imposed on different bases at different tax rates. The tax on deeds and other documents related to real property is 70 cents per $100. The tax on certificates of indebtedness, promissory notes, wage assignments and retail charge account agreements is 35 cents per $100. Revenue from documentary stamps is divided between the General Revenue Fund and various trust funds. In 2014, Florida voters approved an amendment to the State Constitution that requires 33 percent of documentary stamp tax revenue, net of collection costs, to be transferred to the Land Acquisition Trust Fund and expended for specific environmental purposes, as provided by law. These provisions expire July 1, 2035.

REVENUE:

| Fiscal Year | Collections | Annual Change % |
|---|---|---|
| 2026-27* | 3,900,233,333 | 3.85% |
| 2025-26* | 3,755,733,333 | 1.48% |
| 2024-25 | 3,701,128,087 | 3.46% |
| 2023-24 | 3,577,420,944 | -7.44% |
| 2022-23 | 3,864,772,481 | -27.88% |
| 2021-22 | 5,359,020,713 | 31.26% |
| 2020-21 | 4,082,822,038 | 42.02% |

* Estimate

** Before Fiscal Year 2015-16, this distribution included additional distributions to the DACS General Inspection Trust Fund

*** Beginning Fiscal Year 2015-16, 33 percent of documentary stamp tax revenue, net of collection costs, must be transferred to the Land Acquisition Trust Fund and expended only for specific environmental purposes. Before Fiscal Year 2015-16 there were distributions to several other trust funds for various environmental purposes.

**** Beginning Fiscal Year 2021-22, these trust funds will each receive 5.42 percent of available funds to be used for specified purposes.

[v] Beginning Fiscal Year 2023-24, and running through July 1, 2033, 8 percent of available funds (up to $150m) were to be transferred to the State Housing Trust Fund and used for affordable housing purposes consistent with provisions of the Live Local Act in Chapter 2023-17 (SB102). Chapter 2025-208, L.O.F. (HB 7031), eliminated the $150 million distribution beginning July 1, 2025.

HISTORY:

*Tax Rate:*

Florida first enacted a documentary stamp tax in 1931, at the rate of 10 cents per $100 of consideration. In 1957, the tax on documents relating to realty (mainly deeds) was raised to 20 cents per $100 of

consideration, and the tax has been assessed at two separate rates on deeds and notes ever since. Major rate increases occurred in 1957, 1963, 1979, 1981, 1985, 1987, 1990, 1991, and 1992, when the current rates—70 cents per $100 for documents relating to realty and 35 cents per $100 for notes of indebtedness—were set. (The tax rate on documents relating to realty is 60 cents in Miami-Dade County, which since 1983 has levied a discretionary surtax on deeds of 45 cents for each $100 of consideration except for deeds on single family residences.)

*Disposition of Tax Proceeds:*
Until 1967, all proceeds from documentary stamps were deposited into the General Revenue Fund. In that year, a surtax was imposed on documents relating to realty with the proceeds going to the Land Acquisition Trust Fund. The surtax was repealed in 1979 and replaced with an increase in the documentary stamp tax on deeds and the Land Acquisition Trust Fund was given a distribution from the tax. Since 1979, increases in the documentary stamp tax rate have been used to fund several programs, including the acquisition of environmentally sensitive land, state infrastructure, and affordable housing.

In 1990, the General Revenue Service Charge was extended to the Documentary Stamp Clearing Trust Fund (among other trust funds), which reduced all distributions from this fund by 7 percent. (The General Revenue Service Charge was increased to 8 percent in 2009.) Chapter 90-217, L.O.F., (HBs 1911, 1039, 1815, 3141), authorized a portion of documentary stamp tax proceeds which had been allocated to General Revenue to be used for Preservation 2000 debt services. (By 2000, nine P2000 bond series were authorized by the Legislature.) In 1992, the Legislature reduced the General Revenue distribution by 8.66 percent and redirected funds to the State Housing Trust Fund, effective July 1, 1995 (Chapter 92-317, L.O.F. (SB 94-H). Chapter 98-311, L.O.F. (HB 3427), required that a portion of documentary stamp tax receipts be deposited in the Ecosystem Management and Restoration Trust Fund for the purpose of funding erosion control; beach preservation, restoration, and re-nourishment; and storm and hurricane protection.

In 1999, the Legislature authorized a portion of documentary stamp tax proceeds which had been allocated to General Revenue to be used for Florida Forever debt services (Chapter 99-247, L.O.F. (SB 908). Additional debt service was limited to $30 million in each fiscal year for ten years, and the total annual debt service was limited to $300 million. This legislation also reduced the documentary stamp distribution to the Water Management Lands Trust Fund and the Conservation and Recreation Lands Trust Fund and provided for distributions to the State Game Trust Fund, the Aquatic Plant Control Trust Fund, the Department of Environmental Protection Water Quality Assurance Trust Fund, and the Department of Agriculture and Consumer Affairs (DACS) General Inspection Trust Fund. In 2000, the Legislature provided that $2 million be paid into the Marine Resources Conservation Trust Fund annually from the documentary stamp tax General Revenue distribution (Chapter 2000-197, L.O.F. (SB 186).

Chapter 2002-261, L.O.F., (HB 813), provided for a portion of the documentary stamp tax collections to be used to pay the debt service on Everglades Restoration Bonds.

Chapter 2005-92, L.O.F., (HB 1889), capped the amounts distributed from documentary stamp tax collections to the Land Acquisition Trust Fund, Water Management Lands Trust Fund, Invasive Plant Control Trust Fund, State Game Trust Fund, State Housing Trust Fund, and Local Government Housing Trust Fund. The law included a growth factor which increased the cap for each fund based on growth in documentary stamp collections. Calculated distributions in excess of the limits specified in the bill were credited to the General Revenue Fund. Chapter 2005-290, L.O.F., (SB 360), provided $750 million annually to fund specified transportation, school, and water projects, effective July 1, 2007. Chapter 2006-185, L.O.F., (HB 1249), repealed the 50 cents per bag surcharge on oysters harvested from the waters of the Apalachicola Bay and replaced the surcharge with a $300,000 annual documentary stamp tax distribution to the DACS General Inspection Trust Fund to fund oyster management and restoration

programs in the bay and other areas of the state. Chapter 2007-60, L.O.F., (SB 1060), eliminated a $105 million annual distribution to the PECO Trust Fund and directed that amount to the General Revenue Fund. Chapter 2007-72, L.O.F., (SB 2800), authorized the sale of $300 million in new Florida Forever bonds and $100 million in new Everglades Restoration bonds.

Chapter 2008-24, L.O.F., (HB 7019), repealed s. 201.022, F.S., which required a return to be filed with the clerk of the circuit court, and provided a commission to the clerks for processing these returns. Chapter 2008-49, L.O.F., (SB 1552), extended authorization for the sale of Everglades Restoration bonds through Fiscal Year 2019-20 and authorized additional bonds to be sold for four years to fund the Florida Keys Area of Critical State Concern protection program. Chapter 2008-114, L.O.F., (SB 1882), changed the distribution of documentary stamp revenues by calculating trust fund distributions as a percentage of available revenue, capped at a dollar amount, and assessing the cost of administering the tax to all funds that receive revenue from it. Chapter 2008-152, L.O.F., (HB 5001), authorized the sale of $300 million in new Florida Forever bonds, and Chapter 2008-229, L.O.F., (SB 542), extended the statutory authority for Florida Forever bond sales through Fiscal Year 2019-20.

Chapter 2011-142, L.O.F., (SB 2156), provided that certain documentary stamp distributions to the State Transportation Trust Fund and the State Housing Trust Fund must be transferred to the newly-created State Economic Enhancement and Development Trust Fund within the Department of Economic Opportunity, beginning in the 2012-13 fiscal year. The total amount to be transferred is $125 million in Fiscal Year 2012-13, $140 million in Fiscal Year 2013-14, and $150 million in subsequent years. The Local Government Housing Trust Fund was also affected by this transfer, since the amount available for distribution to it from the State Housing Trust Fund was reduced. This legislation also removed the statutory caps on distributions to the housing trust funds that were enacted in 2005.

In 2014, Florida voters approved an amendment to the State Constitution that requires 33 percent of documentary stamp tax revenue, net of collection costs, to be transferred to the Land Acquisition Trust Fund and expended for specific environmental purposes, as provided by law. The amendment took effect July 1, 2015 and applies for a period of 20 years. Ch. 2015-229, L.O.F. (SB 2516-A), implemented the amendment, and reduced distributions to General Revenue and certain transportation purposes. It also terminated certain environmental trust funds that had received statutory distributions. Going forward, the Land Acquisition Trust Fund will be the source of documentary stamp tax revenue expended for environmental purposes.

Chapter 2016-220, L.O.F. (HB 7099), required specified minimum distributions from the Land Acquisition Trust Fund (LATF) to fund Everglades projects that implement the Comprehensive Everglades Restoration Plan, including the Central Everglades Planning Project, the Long-Term Plan, and the Northern Everglades and Estuaries Protection Program. In addition, the bill required a minimum distribution from the LATF to fund springs restoration, protection, and management projects, an annual amount to be appropriated to the St. Johns Water Management District for projects dedicated to the restoration of Lake Apopka, and an annual amount to be appropriated to the Southwest Florida Water Management District for projects dedicated to the restoration of Kings Bay or Crystal River. The 2016 legislation also provided an adjustment to the calculation of each distribution for the Everglades, Springs, Lake Apopka, and Kings Bay or Crystal River if debt service is paid on bonds issued after July 1, 2016, for the purposes outlined above.

Chapter 2017-233, L.O.F. (HB 1-A), deleted a $75 million annual transfer from the State Transportation Trust Fund to the State Economic Enhancement and Development Trust Fund and replaced it with a $75 million transfer to the General Revenue Fund.

Chapter 2021-39, L.O.F. (SB 2512, 2021), made multiple changes to the distribution of Documentary Stamp Tax revenue. These changes reduced transfers to the State Transportation Trust Fund, the State Housing Trust Fund, and the Local Government Housing Trust Fund, and created new distributions of tax revenue to the Water Protection and Sustainability Program Trust Fund (2005-289, SB 332) for funding wastewater grants and to a newly-created Resilient Florida Trust Fund (2021-29, SB 2514) where the funds will be used for statewide flood and sea level rise resiliency plans. In addition, a new earmark was created within the LATF for the Lake Okeechobee Watershed Restoration Project.

Chapter 2023-17, L.O.F. (SB 102), also cited as the Live Local Act, suspends the General Revenue Service Charge for 10 years (effective July 1, 2023) and provided an additional distribution to the State Housing Trust Fund—the lesser of 8 percent of the collections remaining after the Land Acquisition Trust Fund distribution or $150 million to the State Housing Trust Fund for projects under the State Apartment Incentive Loan (SAIL) Program (s.201.15 (4), F.S.). If 8 percent of the remainder is greater than $150 million in any fiscal year, the difference is paid to the General Revenue Fund.

Chapter 2025-208, L.O.F. (HB 7031), made three changes to documentary stamp tax revenue distributions. The law eliminated the distribution for the New Starts Transit Program and the Florida Rail Enterprise. The law also eliminated the $150 million distribution to the State Housing Trust Fund created in the Live Local Act (Chapter 2023-17, L.O.F) beginning July 1, 2025, rather than expiring July 1, 2033. Other housing trust fund distributions were unaffected. Finally, the law reapplied the general revenue service charge to all taxes collected, except taxes distributed to the Land Acquisition Trust Fund, beginning July 1, 2025, rather than July 1, 2033.

*Exemptions and Limitations:*
In 1997, transactions of real property made pursuant to the dissolution of marriage were exempted from the tax. Chapter 98-187, L.O.F. (HB 4373), allowed promissory notes to be renewed at an increased level of obligation without the borrower having to pay documentary stamp tax on the full amount of the obligation, but only on the amount of the increase. Chapter 2002-218, L.O.F. (SB 426), capped the amount of documentary stamp tax due on unsecured loans at $2,450. Chapter 2002-218, L.O.F. (SB 426), repealed the tax on original issues of stock certificates. Chapter 2007-198, L.O.F. (HB 1375), provided a documentary stamp tax and intangibles tax exemption for all notes, mortgages, security agreements, letters of credit, or any other instruments connected with financing any housing under Chapter 420, F.S. Chapter 2018-118, L.O.F. (HB 7087), exempted the transfer of homestead property between spouses if the only consideration is the amount of the mortgage or other lien encumbering the homestead property at the time of transfer. The transfer must be recorded within 1 year after the date of marriage.

Chapter 2019-42, L.O.F. (HB 7123), removed the one-year limitation on the exemption for conveyances between spouses created in 2018.

Chapter 2022-97, L.O.F. (HB 7071), exempted any federal loan that is related to a state of emergency. Such emergency must be declared by executive order or proclamation of the Governor.

Chapter 2023-157, L.O.F. (HB 7063), specified that when the principal balance of a note or mortgage is increased, additional tax is owed only on the increased amount above the current principal balance if:

- The note or mortgage is part of an interim loan for purposes of debenture guarantee funding upon which documentary stamp tax has previously been paid, and
- The Small Business Administration is the obligee or mortgagee.

Chapter 2024-158, L.O.F. (HB 7073), made two changes with respect to the documentary stamp tax.

1. The law specified that only the principal limit of a home equity conversion mortgage, as determined at the time of closing, is subject to tax. The maximum claim amount or the stated mortgage amount is not subject to tax.
2. The law exempted from tax all non-interest-bearing promissory notes, all non-interest-bearing nonnegotiable notes, or all non-interest-bearing written obligations to pay money, or assignments of salaries, wages, or other compensation made, executed, delivered, sold, transferred, or assigned in the state, including such renewals, of $3,500 or less, when given by a customer to an alarm system contractor in connection with the sale of an alarm system. This exemption is repealed on June 30, 2027, unless renewed by the Legislature.

*Clarification of Legislative Intent:*
In 2009, the Legislature enacted Chapter 2009-131, L.O.F. (SB 2430), which expressed legislative findings and intent related to a 2005 decision of the Florida Supreme Court holding that the transfer of property between a grantor and its wholly owned grantee, absent any exchange of value, is not subject to the documentary stamp tax. Specifically, the law stated that the Supreme Court's decision in Crescent Miami Center, LLC v. Florida Department of Revenue, 903 So. 2d 913 (Fla. 2005), was inconsistent with the intent of the Legislature because it permits tax avoidance. Rather, the prior holding of the district court of appeal in this same case prevented tax avoidance and therefore was consistent with the intent of the Legislature at the time the relevant statute – s. 201.02, F.S. – was amended in 1990. Finally, the law expressed the intent of the Legislature to impose documentary stamp tax when the beneficial ownership of real property is transferred to a new owner by the use of techniques applicable in the Supreme Court case in combination with transfers of ownership of, or distributions from, artificial entities. Additionally, the law amended s. 201.02, F.S., to provide for the application of documentary stamp tax on certain conveyances of property involving a conduit entity and to impose documentary stamp tax on the transfer for consideration of a beneficial interest in real property. This legislation also provided for priority distribution of documentary stamp tax revenue for the benefit of Florida Forever bonds, Everglades Restoration bonds, and Preservation 2000 bonds issued prior to July 1, 2009, when required to meet these bond obligations. Chapter 2010-138, L.O.F. (HB 7157), codified existing Department of Revenue policy that the unpaid indebtedness that is forgiven or released by a mortgagee holding a mortgage on the grantor's interest in the property as part of a short sale transfer is not subject to documentary stamp tax. Chapter 2012-145, L.O.F. (HB 5701), extended the priority distribution of documentary stamp tax revenue for the benefit of Florida Forever bonds, Everglades Restoration bonds, and Preservation 2000 to bonds issued before January 1, 2013. Chapter 2014-61, L.O.F. (HB 5501), extended the priority distribution to bonds issued before January 1, 2015. Chapter 2016-220, L.O.F. (HB 7099), extended the priority distribution to bonds issued before January 1, 2017.

BASE AND RATE:
Deeds and other documents relating to realty: 70 cents per $l00 or fractional part of $100 of the consideration. (In Miami-Dade County the rate is 60 cents.) Corporate shares, bonds, certificates of indebtedness, promissory notes, wage assignments, retail charge account agreements: 35 cents per $100 or fractional part of $100 of the consideration.

DISPOSITION:
All taxes collected under this chapter are pledged to make payments when due on bonds issued pursuant to s. 215.618 or s. 215.619, F.S., or any other bonds authorized to be issued on a parity basis with such bonds. All taxes collected under this chapter, except taxes distributed to the Land Acquisition Trust Fund, are subject to the General Revenue service charge imposed in s. 215.20(1), F.S.

Before distribution pursuant to this section, the Department of Revenue shall deduct amounts necessary to pay the costs of the collection and enforcement of the tax levied by this chapter. The costs and service

charge may not be levied against any portion of taxes pledged to debt service on bonds to the extent that the costs and service charge are required to pay any amounts relating to the bonds.

All taxes remaining after deduction of costs shall be distributed as follows:
(1) Amounts necessary to make payments on bonds issued pursuant to s. 215.618 or s. 215.619, F.S., or on any other bonds authorized to be issued on a parity basis with such bonds shall be deposited into the Land Acquisition Trust Fund.
(2) If the amounts deposited pursuant to subsection (1) are less than 33 percent of all taxes collected after first deducting the costs of collection, an amount equal to 33 percent of all taxes collected after first deducting the costs of collection, minus the amounts deposited pursuant to subsection (1), shall be deposited into the Land Acquisition Trust Fund.
(3) Amounts on deposit in the Land Acquisition Trust Fund shall be used in the following order:
(a) Payment of debt service or funding of debt service reserve funds, rebate obligations, or other amounts payable with respect to Florida Forever bonds issued pursuant to s. 215.618, F.S. The amount used for such purposes may not exceed $300 million in each fiscal year.
(b) Payment of debt service or funding of debt service reserve funds, rebate obligations, or other amounts due with respect to Everglades restoration bonds issued pursuant to s. 215.619, F.S. Taxes distributed under paragraph (a) and this paragraph must be collectively distributed on a pro rata basis when the available moneys under this subsection are not sufficient to cover the amounts required under paragraph (a) and this paragraph.

Bonds issued pursuant to s. 215.618 or s. 215.619, F.S., are equally and ratably secured by moneys distributed to the Land Acquisition Trust Fund.
(4) After the required distributions to the Land Acquisition Trust Fund pursuant to subsections (1) and (2), and deduction of the service charge, the remainder shall be distributed as follows:
(a) The lesser of 20.5453 percent of the remainder or $360.08 million in each fiscal year shall be paid into the State Treasury to the credit of the State Transportation Trust Fund. The amount credited to the State Transportation Trust Fund shall be used for:
1. 13 percent to the Small County Outreach Program specified in s. 339.2818, F.S.;
2. 78 percent of the funds to the Strategic Intermodal System specified in ss. 339.61, 339.62, 339.63, and 339.64, F.S.;
3. The Transportation Regional Incentive Program specified in s. 339.2819, F.S., in the amount of 9 percent.
(b) The lesser of 0.1456 percent of the remainder or $3.25 million in each fiscal year shall be paid into the State Treasury to the credit of the Grants and Donations Trust Fund in the Department of Economic Opportunity to fund technical assistance to local governments.

Moneys distributed pursuant to paragraphs (a) and (b) may not be pledged for debt service unless such pledge is approved by referendum of the voters.

(c) An amount equaling 4.5 percent of the remainder in each fiscal year shall be paid into the State Treasury to the credit of the State Housing Trust Fund. The funds shall be used as follows:
1. Half of that amount shall be used for the purposes for which the State Housing Trust Fund was created and exists by law.
2. Half of that amount shall be paid into the State Treasury to the credit of the Local Government Housing Trust Fund and used for the purposes for which the Local Government Housing Trust Fund was created and exists by law.
(d) An amount equaling 5.20254 percent of the remainder in each fiscal year shall be paid into the State Treasury to the credit of the State Housing Trust Fund. Of such funds:

1. Twelve and one-half percent of that amount shall be deposited into the State Housing Trust Fund and expended by the Department of Economic Opportunity and the Florida Housing Finance Corporation for the purposes for which the State Housing Trust Fund was created and exists by law.
2. Eighty-seven and one-half percent of that amount shall be distributed to the Local Government Housing Trust Fund and used for the purposes for which the Local Government Housing Trust Fund was created and exists by law. Funds from this category may also be used to provide for state and local services to assist the homeless.
(e) The lesser of 0.017 percent of the remainder or $300,000 in each fiscal year shall be paid into the State Treasury to the credit of the General Inspection Trust Fund to be used to fund oyster management and restoration programs as provided in s. 379.362(3), F.S.
(f) A total of $75 million shall be paid into the State Treasury to the credit of the State Economic Enhancement and Development Trust Fund.
(g) An amount equaling 5.4175 percent of the remainder shall be paid into the Resilient Florida Trust Fund to be used for the purposes for which the Resilient Florida Trust Fund was created and exists by law. Funds may be used for planning and project grants.
(h) An amount equaling 5.4175 percent of the remainder shall be paid into the Water Protection and Sustainability Program Trust Fund to be used to fund wastewater grants as specified in s. 403.0673.
(5) Notwithstanding s. 215.32(2)(b)4.a., funds distributed to the State Housing Trust Fund and the Local Government Housing Trust Fund pursuant to paragraph (4)(c) and (d) may not be transferred to the General Revenue Fund in the General Appropriations Act.
(6) After the distributions provided in the preceding subsections, any remaining taxes shall be paid into the State Treasury to the credit of the General Revenue Fund.

OTHER STATES:
Thirty-five states and the District of Columbia and New York City levy taxes on the recording of certain documents or on property transfers (California authorizes local transfer taxes but does not levy a statewide tax). Alaska, Idaho, Indiana, Louisiana, Kansas, Missouri, Montana, New Mexico, North Dakota, Oregon, Texas, Utah, and Wyoming do not levy document or transfer taxes (however in Oregon, only one county has a real estate transfer tax). South Carolina and Wisconsin impose fees instead of taxes. Although some states levy document recording taxes only on documents relating to real estate transfers, others, including Florida, have a more general tax that is also levied on documents relating to indebtedness.

# DRIVER LICENSES

FLORIDA STATUTES: Chapter 322

ADMINISTERED BY: Department of Highway Safety and Motor Vehicles

SUMMARY:
Driver licenses fees are collected from individuals who apply for the following types of licenses (originals, renewals, and replacements): Learners, Class E operators, Class E with motorcycle endorsement, Class E motorcycle only license, and Class A, B, and C commercial driver licenses with or without endorsements. In addition, fees are collected for delinquent renewals, reinstatements following suspensions, revocations, disqualifications, and cancellations.

REVENUE:

| Fiscal Year | Collections | Annual Change % | General Revenue | Highway Safety Operating Trust Fund |
|---|---|---|---|---|
| 2026-27* | 477,700,000 | 0.29% | 243,300,000 | 234,400,000 |
| 2025-26* | 476,300,000 | 6.98% | 243,900,000 | 232,400,000 |

| 2020-21 | 370,514,188 | 7.31% | 218,633,753 | 151,880,435 |

* Estimate

HISTORY:
Driver licenses for operators and chauffeurs were established in 1939. Proceeds were earmarked for expenses of the Department of Public Safety. In 1951, earmarking ceased and collections were placed in the General Revenue Fund. In 1955, a 50 cent per year driver's education fee was added to the issuance of driver licenses and earmarked for public school driver education. Driver's license fee increases were adopted in 1941, 1945, 1955, 1971, 1984, 1989, 1991, 2008, and 2009. In 1983, a $4 fee was authorized in order to operate a motorcycle or motor-driven vehicle. The 1989 Legislature provided for re-classification of driver licenses and increased most chauffeur license fees to $50, effective April 1, 1991.

In 1986, reinstatement fees following a suspension or revocation of a license were increased, and such increase earmarked for deposit into the Accidents Report Trust Fund. Effective October 1, 1989, in order for a minor to receive a driver license, the minor must be enrolled in an approved educational program or have received a high school diploma, a high school equivalency or special diploma, or a certificate of high school completion. Beginning January 1, 1990, no new driver licenses may be issued until the applicant successfully completes the traffic law and substance abuse education course, as created by the 1989 Legislature. A $3 assessment fee was charged to participate in the course and deposited into the Drivers' Education Trust Fund. In 1990, the duplicate driver's license fee was raised from $5 to $10 and the replacement driver's license fee was raised from $1 to $10. The increased revenue was earmarked for deposit into the Accidents Report Trust Fund. On July 1, 1994, the Accidents Report Trust Fund and the Drivers' Education Trust Fund were re-designated as the Highway Safety Operating Trust Fund. During Special Session A of 2003, the Legislature increased reinstatement fees charged for a suspension or revocation by $10. In addition, identification card renewals were raised from $3 to $10 and a new re-exam fee was created. Drivers failing the written exam are charged $5 for each time they must retake the exam and $10 for each time they retake the driving exam. The 2006 Legislature imposed additional reinstatement fees for specific types of suspended or revoked licenses. Persons convicted of patient

brokering (s. 817.505, F.S.), solicitation (s. 817.234(8), F.S.), or participating in a staged crash (s. 817.234(9), F.S.) are subject to an additional fee of $180 for each offense. These funds are earmarked for the Highway Safety Operating Trust Fund.

In 2008, Chapter 2008-176, L.O.F. (SB 1992), became effective October 1, 2008 and the term of the driver license and identification card was changed from four or six (safe driver) years to eight years. However, applicants who are at least 80 years old will be issued a license valid for a six-year term. These changes resulted in the fees for driver licenses, identification cards, and license endorsements being raised to reflect the new terms. Duplicate and replacement licenses were combined and are all now labeled "replacements." This change caused the distribution of the funds to be modified; however, the General Revenue Fund and the Highway Safety Operating Trust Fund were both held harmless in this change.

As a result of the 2009 Regular Legislative Session, Chapter 2009-71, L.O.F. (SB 1778), raised the following fees effective September 1, 2009.

| Fee Type | Previous Fee | New Fee | New Distribution |
|---|---|---|---|
| Original Class E License | $27 | $48 | General Revenue |
| Renewal Class E License | $20 | $48 | General Revenue |
| Motorcycle Only License (Class E + $7 Endorsement) | $34 | $55 | General Revenue |
| Replacement License (Increased revenue distributed to General Revenue) | $10 | $25 | $18 to General Revenue<br>$7 to Highway Safety Operating TF |
| Commercial Driver License (Original / Renewal) | $67 | $75 | General Revenue |
| School Bus CDL | $27 | $48 | General Revenue |
| Delinquent Fee | $1 | $15 | General Revenue |
| Knowledge Re-Exam | $5 | $10 | $10 to Highway Safety Operating TF or<br>$10 to Tax Collector |
| Skills Re-Exam | $10 | $20 | $20 to Highway Safety Operating TF or<br>$20 to Tax Collector. |
| Identification Card - Original | $10 | $25 | General Revenue |
| Identification Card - Renewal / Replacement | $10 | $25 | $19 to General Revenue<br>$6 to Highway Safety Operating TF or<br>$6 to Tax Collector |
| D6 Reinstatement Fee (Increased revenue distributed to Highway Safety Operating Trust Fund) | $47.50 | $60 | $22.50 to Highway Safety Operating TF<br>$37.50 to Clerk of Court, Tax Collector, or General Revenue |
| Suspension Reinstatement Fee (Increased revenue distributed to Highway Safety Operating Trust Fund) | $35 | $45 | $15 to General Revenue<br>$30 to Highway Safety Operating TF or<br>$15 to Tax Collector/$15 to Highway Safety Operating TF |
| Revocation Reinstatement Fee (Increased revenue distributed to Highway Safety Operating Trust Fund) | $60 | $75 | $35 to General Revenue<br>$40 to Highway Safety Operating TF or<br>$20 to Tax Collector/$20 to Highway Safety Operating TF |
| Disqualification Reinstatement Fee (Increased revenue distributed to Highway Safety Operating Trust Fund) | $60 | $75 | $35 to General Revenue<br>$40 to Highway Safety Operating TF |
| Tax Collector Service Fee | $5.25 | $6.25 | $6.25 to Tax Collector |
| Administrative Review Filing Fee | $0 | $25 | $25 to Highway Safety Operating TF |
| Administrative Hearing Filing Fee | $0 | $12 | $12 to Highway Safety Operating TF |
| DUI Administrative Fee | $115 | $130 | $130 to Highway Safety Operating TF |

| | | | |
|---|---|---|---|
| Ignition Interlock Device Assessment Fee | $0 | $12 | $12 to Highway Safety Operating TF |
| 3-Year Transcript | $2.10 | $8 | $8 to Highway Safety Operating TF |
| 7-Year Transcript | $3.10 | $10 | $10 to Highway Safety Operating TF |
| Certified Transcript | $3.10 | $10 | $10 to Highway Safety Operating TF |

In 2011, Chapter 2011-66, L.O.F, (S.B. 2160), changed the fee split for replacement licenses. Beginning July 1, 2015, or upon completion of the transition to driver license issuance services, if the replacement driver license is issued by the tax collector, the tax collector shall retain the $7 that would otherwise be deposited into the Highway Safety Operating Trust Fund and the remaining revenues shall be deposited into the General Revenue Fund.

In 2018, Chapter 2018-129, L.O.F, (S.B. 322), changed the collection of the fee for subsequent knowledge and skills tests. Beginning July 1, 2018, an applicant who fails to pass the initial knowledge test incurs a $10 fee for each subsequent test, to be deposited into the Highway Safety Operating Trust Fund, unless a subsequent test is administered by the tax collector. In this case, the tax collector shall retain the $10 fee, less the general revenue service charge set forth in s. 215.20(1). Further, an applicant who fails to pass the initial skills test incurs a $20 fee for each subsequent test, to be deposited into the Highway Safety Operating Trust Fund, unless a subsequent test is administered by the tax collector. In that case, the tax collector shall retain such $20 fee, less the general revenue service charge set forth in s. 215.20(1).

In 2018, Chapter 2018-129, L.O.F, (S.B. 322), changed the procedure for handling and collecting the $45 reinstatement fee following a suspension and the $75 reinstatement fee following a revocation. Of the $45 fee received from a licensee for reinstatement following a suspension, the department shall deposit $15 in the General Revenue Fund and $30 in the Highway Safety Operating Trust Fund if it processes the reinstatement. If the reinstatement is processed by the tax collector, $15, less the general revenue service charge shall be retained by the tax collector, $15 shall be deposited into the Highway Safety Operating Trust Fund, and $15 shall be deposited into the General Revenue Fund. Of the $75 fee received from a licensee for reinstatement following a revocation or disqualification, if the reinstatement is processed by the department, the department shall deposit $35 in the General Revenue Fund and $40 in the Highway Safety Operating Fund. If the reinstatement is processed by the tax collector, $20, less the general revenue service charge, shall be retained by the tax collector, $20 shall be deposited into the Highway Safety Operating Trust Fund, and $35 shall be deposited into the General Revenue Fund. In 2025, Ch. 2025-125 L.O.F. set a deadline for transferring driver license services to county tax collectors of no later than June 30, 2027.

OTHER STATES:
All states license vehicle operators. Most states issue four-year licenses at costs ranging from $4.50 to $60. It is common to require somewhat higher fees for a commercial license than for an operator license.

| VALUE OF RATE CHANGE: | 2026-27 (millions) |
|---|---|
| Value of $1 levy on all driver licenses issued or renewed | $ 4.1 |

# DRY CLEANING TAX

FLORIDA STATUTES: Sections 206.9935, 376.303, 376.70, and 376.75

ADMINISTERED BY: Department of Environmental Protection and Department of Revenue

SUMMARY:
The dry-cleaning tax is levied in the amount of 2 percent on gross receipts of all dry-cleaning facilities from the dry-cleaning or laundering of clothing or other fabrics at the facility. The dry-cleaning facility may separately state the tax on retail receipts. An additional tax is imposed of $5.059 per gallon of perchloroethylene that is sold or imported by a dry-cleaning facility.

REVENUE:

| Fiscal Year | Total Collections | Annual Change % | Gross Receipts Tax Collections | Perchloroethylene Tax Collections | Registration Fee Collections |
|---|---|---|---|---|---|
| 2026-27* | 6,866,926 | 0.51% | 6,763,659 | 47,372 | 55,895 |
| 2025-26* | 6,832,083 | 0.46% | 6,729,340 | 47,131 | 55,612 |
| 2024-25 | 6,800,799 | -3.98% | 6,698,526 | 46,916 | 55,357 |
| 2023-24 | 6,959,912 | 1.52% | 6,822,406 | 55,656 | 81,850 |
| 2022-23 | 6,855,531 | 9.97% | 6,710,252 | 61,830 | 83,450 |
| 2021-22 | 6,234,059 | 36.83% | 6,085,405 | 65,130 | 83,525 |
| 2020-21 | 4,555,930 | -25.78% | 4,392,073 | 64,407 | 99,450 |

* Estimate

HISTORY:
Taxation of gross receipts from dry-cleaning and laundry services and the production and importation of perchloroethylene was enacted in 1994, with proceeds used to fund dry-cleaning facility restoration. Chapter 88-393, Laws of Florida, created a 25 cents per gallon tax on solvents, including Perchloroethylene. Chapter 89-171, Laws of Florida, amended that to be 5.9 cents per gallon on solvent. The 1995 Legislature adopted the following changes to the dry-cleaning tax: exempted uniform rental and linen supply services from the gross receipts tax, retroactive to October 1, 1994; exempted perchloroethylene not used by a dry-cleaning facility from the $5 per gallon tax; repealed the gross receipts tax sale-for-resale exemption; and increased the gross receipts tax from 1.5 percent to 2 percent effective January 1, 1996. The 1996 Legislature changed the disposition of funds from the Hazardous Waste Management Trust Fund to the Water Quality Assurance Trust Fund. In 1998, the Legislature clarified that the gross receipts tax applies to drop-off facilities, as well as dry-cleaning facilities. The Legislature also authorized a sale-for-resale exemption for services provided where gross receipts are collected for those same services.

BASE AND RATE:
Dry-cleaning Facilities and Wholesale Suppliers Registration Fee:
$100 annually

Tax on the Gross Receipts of Dry-cleaning Facilities:
2 percent of the gross receipts from the dry-cleaning or laundering of clothing or other fabrics

Tax on the Sale or Importation of Perchloroethylene:
Perchloroethylene sold to or imported into Florida by a dry-cleaning business is taxed at 5.9¢ per gallon for water quality tax as a solvent pursuant to s. 206.9935, F.S., and $5.00 per gallon for water quality tax as a dry-cleaning solvent pursuant to s. 376.75, F.S.

# DRY CLEANING TAX

DISPOSITION:
Total collections, less administrative costs and General Revenue Service Charge, are deposited in the Water Quality Assurance Trust Fund.

OTHER STATES:
Dry-cleaning services are taxed under the general sales or gross receipts tax systems in 21 states, at rates ranging from 0.4 percent to 7 percent, plus local sales or gross receipts tax rates. Connecticut, Illinois, Kansas, Minnesota, North Carolina, South Carolina, Oregon, Tennessee, and Wisconsin also levy environmental taxes on dry-cleaning services or materials.

# EARNINGS ON INVESTMENTS

FLORIDA STATUTES: Sections 17.57 and 17.61

ADMINISTERED BY: Chief Financial Officer

SUMMARY:
Cash balances not needed for day-to-day transactions are invested.

REVENUE:

| Fiscal Year | Collections | Annual Change % | General Revenue | Trust Funds |
|---|---|---|---|---|
| 2026-27* | 1,947,305,156 | -12.0% | 1,256,300,000 | 691,005,156 |
| 2025-26* | 2,212,825,632 | -7.2% | 1,427,600,000 | 785,225,632 |
| 2024-25 | 2,383,503,416 | 50.7% | 1,537,712,429 | 845,790,987 |
| 2023-24 | 1,581,372,348 | 142.0% | 1,093,866,150 | 487,506,197 |
| 2022-23 | 653,456,072 | 85.3% | 493,843,861 | 159,612,211 |

*Estimate

HISTORY:
Within the Department of Financial Services, the Division of Treasury manages a fixed-income investment portfolio for the state that includes General Revenue and trust fund balances. The Treasury Investment Portfolio is made up of internally and externally managed securities. Approximately 50 percent of the portfolio is invested in securities with maturities of three years or less. These short-term fixed-income investments are internally managed by the Treasury. The remainder is composed of intermediate-term fixed-income investments with maturities ranging from five to fifteen years. This portion of the portfolio is externally managed. The portfolio is managed with liquidity and capital preservation as primary goals in order to ensure funds are available to spend when needed. Agencies may request that trust fund balances be invested with earnings accruing to the trust fund. Otherwise, earnings accrue to the General Revenue Fund. Section 17.61, F.S., provides that earnings on specific trust funds accrue to the General Revenue Fund.

BASE AND RATE:
Not applicable.

DISPOSITION:
Earnings on certain trust fund balances accrue to the trust funds. Otherwise, earnings accrue to the General Revenue Fund.

OTHER STATES: All states have policies in place to invest cash balances.

# ESTATE TAX

FLORIDA STATUTES: Chapter 198

ADMINISTERED BY: Department of Revenue

SUMMARY:
The estate tax still exists in law and is imposed on an estate for the privilege of transferring property at death. It is limited to the amount allowable as a credit against federal estate tax for state death taxes paid, and does not increase the total amount of tax paid by the estate. A federal change effectively eliminated Florida's estate tax after December 31, 2004. Previously, federal law allowed a credit for state death taxes on the federal estate tax return. The federal government then changed the credit to a deduction for state estate taxes. Since Florida's estate tax was based solely on the federal credit, estate tax was no longer due on estates of decedents that died on or after January 1, 2005. However, the personal representative of an estate may still need to complete certain forms to remove the automatic Florida estate tax lien.

If the federal estate tax is changed to incorporate a credit for state taxes at some future point, the following amounts would be collected:

| Fiscal Year | (in millions) |
|---|---|
| 2025-26 | $3,029.23 |
| 2026-27 | $3,165.76 |
| 2027-28 | $3,200.90 |
| 2028-29 | $3,285.13 |
| 2029-30 | $3,392.70 |
| 2030-31 | $3,502.70 |
| 2031-32 | $3,614.46 |
| 2032-33 | $3,735.31 |
| 2033-34 | $3,867.13 |
| 2034-35 | $4,003.39 |

REVENUE:

| Fiscal Year | Total Collections | Annual Change % |
|---|---|---|
| 2024-25 | 0 | 0.00% |
| 2023-24 | 0 | 0.00% |
| 2022-23 | 0 | -100.00% |
| 2021-22 | 3,924 | 100.00% |
| 2020-21 | 0 | 0.00% |
| 2019-20 | 0 | -100.00% |
| 2018-19 | 2,771 | -99.86% |

# ESTATE TAX

HISTORY:
Prior to 1924, there were no restrictions on the imposition of a Florida estate or inheritance tax. In 1924, the Florida electorate adopted an amendment to the constitution to prohibit the imposition of inheritance and income taxation. In 1930, the electorate adopted a constitutional amendment allowing the imposition of estate or inheritance taxes on residents to the extent such tax was allowed to be credited against a similar tax imposed by the federal government. In 1984, the date for filing and paying the Florida estate tax was changed to coincide with the date for filing and paying the federal estate tax. In 1991, the Legislature imposed a late penalty of 5 percent of any unpaid tax for the first 30 days and 10 percent of any unpaid tax due for more than 30 days. In 1992, this late penalty was increased to 10 percent for the first 30 days and 20 percent for more than 30 days. The federal Economic Growth and Tax Relief Reconciliation Act of 2001 phased out the federal estate tax and repealed the state credit against the federal tax by 2005. This law, which was to expire on January 1, 2011, was modified in December 2010 and extended for two years. Under the revised law, the federal estate tax was set at 35 percent with a $5 million exemption, with the exemption increasing with inflation. There is, however, no credit for state taxes. As a result, 30 states resumed collecting estate taxes. On January 1, 2013, the American Taxpayer Relief Act of 2012 was passed which permanently established an exemption of $5 million (with an annual inflation adjustment) per person, with a maximum tax rate of 40% for the year 2013 and beyond. The Tax Cuts and Jobs Act (H.R. 1), which became law on December 22, 2017, doubled the estate tax exclusion amount from $5.6 million (the then-current inflation adjusted amount) to $11.2 million for 2018. In 2025, the exclusion amount increased to $13.99 million. Federal legislation, enacted July 4, 2025, made these increased exemption levels permanent and raised the exemption to $15 million per individual starting in 2026, indexed for inflation. Twelve states and the District of Columbia still have an estate tax. For the ones that conform to the federal estate tax, doubling the threshold could mean less revenue.

BASE AND RATE:
An estate tax is imposed on the estate for the privilege of transferring property at death. The tax on estates of resident decedents is equal to the amount allowable as a credit against federal estate tax for state death taxes paid, less any amount paid to other states. Thus, the Florida estate tax on resident decedents will not increase the total tax liability of the estate. The tax on estates of nonresident decedents is equal to the amount allowable as a credit against federal estate tax for state death taxes paid multiplied by the ratio of the value of the property taxable in Florida over the value of the entire gross estate.

DISPOSITION:
General Revenue Fund

OTHER STATES:
Before the enactment of the federal Economic Growth and Tax Relief Reconciliation Act of 2001, which phases out the federal estate tax and repeals the state credit against the federal tax, all 50 states plus the District of Columbia imposed an estate tax at least to the extent of the credit allowed against the federal estate tax, and some imposed additional estate and inheritance taxes. Since the enactment of the federal law, however, many states have amended their estate tax laws. As of 2025, Connecticut, Hawaii, Illinois, Maine, Maryland, Massachusetts, Minnesota, New York, Oregon, Rhode Island, Vermont, Washington, and the District of Columbia all levy estate taxes.

Recent Changes to State Estate Taxes:

- Connecticut matches the federal exemption amount at $13.99 million for 2025.
- Massachusetts increased its estate tax exemption from $1 million to $2 million effective January 1, 2023, through legislation signed October 4, 2023. A second amendment on September 16, 2024, changed the treatment of real and tangible personal property located outside of Massachusetts.
- New York's estate tax exemption increased to $7.16 million for 2025.
- Maryland passed legislation in 2014 that increased its estate tax exemption amount over time. In 2019 it became linked with the federal exemption amount.
- Hawaii restored its state estate tax effective May 1, 2010, with an exemption set at $5.49 million.
- Washington passed legislation in June 2013 that: (1) increased the top rate by 1 percentage point; (2) indexed the value of the exempt amount to the Seattle MSA CPI; (3) allowed a deduction of up to $2.5 million for qualified family-owned business interests; and (4) required a marital QTIP trust to be subject to the estate tax upon the second spouse's death.

States That Have Repealed Estate Tax:

- Arkansas: Simultaneous with the phase-out of the state credit
- Delaware: Beginning of 2018
- Georgia: April 28, 2014 (had been inactive since the phase-out of the credit)
- Indiana: January 1, 2022
- Kansas: January 1, 2010
- New Jersey: January 2018
- North Carolina: July 2013 (retroactive to January 1, 2013)
- Ohio: January 1, 2013
- Oklahoma: January 1, 2010
- Tennessee: January 1, 2016
- Virginia: July 1, 2007
- Wisconsin: January 1, 2008

States With Inheritance Tax:

As of 2025, Kentucky, Maryland, Nebraska, New Jersey, and Pennsylvania levy inheritance taxes. Maryland is the only state that levies both an estate tax and an inheritance tax. Nebraska's inheritance tax is levied at the county level.

Iowa fully phased out its inheritance tax as of January 1, 2025, after gradually reducing rates from 2021 through 2024.

# GROSS RECEIPTS TAX

FLORIDA STATUTES: Chapter 203; Constitution Article XII Section 9(a)

ADMINISTERED BY: Department of Revenue

SUMMARY:
The gross receipts tax is imposed at the rate of 2.5 percent on the gross receipts of sellers of utility services (electricity, and natural or manufactured gas). In addition, a rate of 2.6 percent is levied on sales of electricity to non-residential customers not otherwise exempt. Finally, a rate of 2.52 percent is levied on the gross receipts of sellers of communications services (CST). This is comprised of a tax rate of 2.37 percent on the cable, wireless, landline and miscellaneous services tax bases, and an additional tax rate of 0.15 percent that is applied to the same tax bases, excluding landlines in residential households. The dollars generated by both of these tax rates, plus 20.7 percent of total direct-to-home satellite collections, comprise total gross receipts CST collections.

REVENUE:

| Fiscal Year: | Collections: | Annual Change %: |
|---|---|---|
| 2026-27* | $ 1,402,930,000 | -0.73% |
| 2025-26* | $ 1,414,480,000 | -0.82% |
| 2024-25 | $ 1,379,400,000 | 2.54% |
| 2023-24 | $ 1,404,425,510 | -1.78% |
| 2022-23 | $ 1,374,993,538 | 2.14% |
| 2021-22 | $ 1,206,443,354 | 13.97% |
| 2020-21 | $ 1,109,420,048 | 8.75% |

* Estimate

HISTORY:
A tax on gross receipts of public utility firms was enacted in 1931. The rate was set at $1.50 per $100 of receipts and remained unchanged until 1990. In 1963, collections were earmarked by constitutional amendment for funding capital outlay needs of the universities and junior colleges and for bonds. A 1974 amendment to the state constitution opened up use of these funds to include public schools and authorized the issuance of general obligation bonds in lieu of the former authorization for revenue bonds only. In 1990, the 1.5 percent tax rate was increased to 2.0 percent, again to 2.25 percent on July 1, 1991, and to 2.5 percent on July 1, 1992. In addition, the tax base was expanded to include electricity produced by most cogeneration or small power producers that is in excess of electricity produced and not taxed during the 12-month period ending June 30, 1990. In 1991, the definition of "electricity" was clarified for the purpose of the tax base, and the exemption from gross receipts tax for separately stated tax for telecommunications was repealed. SJR 2H was placed on the November 1992 ballot by the 1992 Legislature and adopted by the electorate. The amendment removed the July 1, 2025, ending date for the bonding of gross receipts taxes, permanently allowing such bonding of revenues, but with a maturity date on the bonds not to exceed 30 years from date of issuance. In 1998, Internet access fees were exempted from gross receipts and other taxes. Effective October 1, 2001, the definition of telecommunications was changed as part of a communications tax overhaul. The new definition includes cable and direct satellite television, and the rate was decreased from 2.5 percent to 2.37 percent. The gross receipts tax on communications services is remitted as a component of the communications services tax, which includes sales tax and local government tax components as well. Chapter 2003-17, L.O.F. (SB 1430), exempted the sale of manufactured gas to an electric utility from the gross receipts tax and Chapter 2003-254,

L.O.F. (SB 1176), exempted homes for the aged from the gross receipts tax on communications services. Chapter 2010-149, L.O.F. (SB 2024), reduced the sales tax rate imposed on communication services that originate and/or terminate in Florida from 6.80 percent to 6.65 percent. The legislation also amended s. 203.01, F.S., to increase the gross receipts tax rate on communications services from 2.37 percent to 2.52 percent. Chapter 2014-38, L.O.F. (HB 5601), reduced the sales tax rate for charges for electrical power by 2.65 percent and increased the gross receipts tax rate for certain purchases of electricity to 2.6 percent.

BASE AND RATE:
A tax of 2.5 percent is imposed on the gross receipts from the sale of electricity, gas, and cogenerated electrical power transmission, and a tax of 2.52 percent is imposed on the sale of communications services. An additional 2.6 percent tax is levied on commercial electricity. Both privately held and publicly held corporations are required to pay the tax. Firms purchasing services for resale are granted a credit equal to the tax paid by their supplier. Gross receipts from the sale of gas used to generate electricity are exempt from the tax. Tax payments are due monthly. The gross receipts tax on communication services is remitted as a component of the communications services tax. Late penalties range from 10 percent to 50 percent of unpaid taxes.

DISPOSITION:
Public Education Capital Outlay and Debt Service Trust Fund

OTHER STATES:
A few states, such as Georgia and Indiana, tax public utilities the same as other businesses. Most states tax them by special forms of taxation, of which the most common is a gross receipts tax. In some states, gross receipts taxes are combined with other measures. Some special taxes on utilities are for revenue; some are simply sufficient to pay regulatory costs. Gross receipts tax rates vary from less than 1 percent to as much as 10 percent. Frequently, different rates are applied to nearly every type of utility. The Florida rate is low in comparison with states basing their tax on gross receipts; however, utilities are also subject to the Florida corporate income tax.

| | 2026-27 (millions) |
|---|---|
| VALUE OF RATE CHANGE: | |
| Value of 0.1 percent levy on the current utilities base | $33.3 |
| | |

# HEALTH CARE ASSESSMENTS

FLORIDA STATUTES: Sections 395.701 and 395.7015

ADMINISTERED BY: Agency for Health Care Administration

SUMMARY:
Health care assessments are imposed on net operating revenues of hospitals at the rate of 1.5 percent for inpatient services and 1.0 percent for outpatient services. Assessments are imposed also at the rate of 1.0 percent on net operating revenues of ambulatory surgical centers and clinical laboratories.

REVENUE:

| | | |
|---|---|---|
| 2026-27* | 946,514,832 | 0.00% |
| 2025-26* | 946,514,832 | 0.00% |
| 2024-25 | 946,514,832 | 11.32% |

| 2020-21 | 731,638,810 | 6.58% |
| 2019-20 | 686,493,312 | 5.28% |

* Estimate

HISTORY:
The assessment on hospitals was enacted in 1984 as part of the Health Care Consumer Protection and Awareness Act (Chapter 84-35, L.O.F.). The assessment was imposed on all hospitals other than those operated by the Department of Health and Rehabilitative Services (now, the Department of Children and Families) or the Department of Corrections, at the rate of 1.5 percent of annual net operating revenues. The Act created the Public Medical Assistance Trust Fund and specified its use to reimburse hospitals for uncompensated care provided to indigent patients. In July 1991, the assessment base was expanded to apply to ambulatory surgical centers, clinical laboratories, freestanding radiation therapy centers, and freestanding diagnostic imaging centers. In July 1992, an assessment was imposed on nursing home facilities in the amount of $1.50 for each patient day provided by the nursing home. The nursing home assessment was repealed on May 1, 1993. In 1998, outpatient radiation therapy services provided by a hospital were exempted from the assessment as well. Effective July 1, 2000, the assessment rate for outpatient services provided by hospitals was reduced from 1.5 percent to 1.0 percent.

The Second Judicial Circuit found the ambulatory assessment to be an unconstitutional income tax. In 2003, on appeal, the parties entered into a court-approved settlement agreement by which the ambulatory portion of the existing monies in the Public Medical Assistance Trust Fund was distributed, and the Agency for Health Care Administration (AHCA) discontinued the assessments. In 2003, a number of hospitals brought separate administrative actions challenging AHCA's implementation of those portions of Chapter 2000-256, L.O.F. (HB 2339), enacting the assessment rate changes currently in effect. A Final Order from the Division of Administrative Hearings supporting the hospitals was issued during calendar year 2006 and was later upheld by the First District Court of Appeals. Assessments subject to the Order were returned to providers during Fiscal Year 2007-08.

# HEALTH CARE ASSESSMENTS

BASE AND RATE:
The annual net operating revenue is determined by AHCA based on the health care entity's prior fiscal year financial reports. The assessment is payable in equal quarterly amounts on or before the first day of each calendar quarter of the assessment year.

DISPOSITION:
Public Medical Assistance Trust Fund

OTHER STATES:
As of FY 2017-18, health care provider taxes are levied in 49 states and the District of Columbia (DC); only Alaska does not levy a tax. Such taxes generally are levied as a percentage of net revenue or as a bed tax per patient day. Of the 49 states and DC, 42 levy assessments on hospitals, 44 tax nursing homes, 36 tax intermediate care facilities for the developmentally disabled, and 13 tax managed care organizations.

| | 2026-27 (millions) |
|---|---|
| VALUE OF RATE CHANGE: | |
| Increase hospital inpatient assessment by an additional percentage point | $438.3 |
| Increase hospital outpatient assessment by an additional percentage point | $289.0 |

# HIGHWAY SAFETY FEES
# LATE CIVIL PENALTIES

FLORIDA STATUTES: Section 318.18(8)(a), F.S.

ADMINISTERED BY: Penalties are collected by the various clerks of court and remitted by the 10th of the following month to the Florida Department of Revenue for deposit into the Highway Safety Operating Trust Fund and the General Revenue Fund.

SUMMARY: Section 318.18(8)(a), F.S., provides for an additional $16 civil penalty for failure to comply with requirements or pay specified penalties within 30 days.

REVENUE:

| Fiscal Year | Total Collections | Annual Change % | General Revenue | Highway Safety Operating Trust Fund |
|---|---|---|---|---|
| 2026-27* | 15,207,500 | 1.31% | 6,178,047 | 9,029,453 |
| 2025-26* | 15,011,519 | -4.96% | 6,098,430 | 8,913,089 |
| 2024-25 | 15,794,448 | 3.29% | 6,130,124 | 9,664,324 |
| 2023-24 | 15,290,799 | -1.93% | 5,842,938 | 9,447,861 |
| 2022-23 | 15,591,227 | 2.99% | 6,274,762 | 9,316,465 |
| 2021-22 | 15,139,203 | 20.87% | 6,094,347 | 9,044,856 |
| 2020-21 | 12,524,916 | -17.55% | 4,903,940 | 7,620,975 |

* Estimate

HISTORY:
The civil penalty was originally established by Chapter 86-154, L.O.F., at a rate of $10 per violation. Chapter 87-108, L.O.F., increased the amount to $12. Chapter 2009-14, L.O.F. (SB 40-A), further increased the amount to the current $16.

BASE AND RATE:
$16 per violation

DISPOSITION:
$9.50 of additional $16 civil penalty for failure to comply with court requirements or pay specified penalties within 30 days is deposited in the Highway Safety Operating Trust Fund, and $6.50 is deposited in the General Revenue Fund.

OTHER STATES: The National Center for State Courts provides comparative information regarding state traffic laws. However, the center does not provide data regarding the mechanism used by states to encourage timely payment of civil traffic penalties. According to the Department of Highway Safety and Motor Vehicles, most, if not all, states provide some mechanism for encouraging the timely payment of civil traffic penalties.

| | 2026-27 (millions) |

| VALUE OF RATE CHANGE: | |
| Value of 10 percent rate change | $1.5 |

# HIGHWAY SAFETY FEES
# TRAFFIC CAMERAS

FLORIDA STATUTES: Sections 316.0083(3), 318.18(15)(a)2. and 3., F.S., & 318.18(3)(d)1., F.S.

ADMINISTERED BY: Department of Highway Safety and Motor Vehicles, Department of Revenue, clerks of the court, and counties and municipalities operating traffic infraction detector programs.

SUMMARY:
Sections 316.0083(3) and 318.18(15)(a)2. and 3., F.S., provide for a civil penalty of $158 to be imposed on the owner of a motor vehicle when a traffic infraction detector has indicated that the driver has failed to stop at a traffic signal and the resulting traffic ticket has been issued by a state or local traffic enforcement officer. Notices of violations are issued by local governments and penalties are collected by those local governments when paid within 60 days of notification. Vehicle owners who do not pay on time or request a local hearing receive a traffic citation which must be paid to the clerk of the court in the county in which the violation occurred. Local governments and the clerks of court remit the state portion of revenues to the Florida Department of Revenue. Section 318.18(3)(d)1., F.S. provides for a civil penalty of $100 to be imposed on the owner of a motor vehicle when speeding in a school zone enforced by traffic infraction detection equipment. The fine is to be distributed as follows: $20 into the General Revenue Fund, $77 to the county/city, and $3 into Department of Law Enforcement Criminal Justice Standards and Training Trust Fund.

REVENUE:

| Fiscal Year | Total Collections | Annual Change % | General Revenue | Department of Health Emergency Medical Trust Fund | Brain & Spinal Cord Injury Trust Fund | Department of Law Enforcement Criminal Justice Standards and Training Trust Fund |
|---|---|---|---|---|---|---|
| 2026-27* | 80,567,812 | 1.80% | 68,273,918 | 8,040,536 | 2,609,181 | 1,644,177 |

| 2020-21 | 55,500,550 | -8.25% | 46,792,630 | 6,698,399 | 2,009,521 | 0 |

* Estimate

HISTORY:
Chapter 2010-80, L.O.F. (HB 325), establishing the Mark Wandall Traffic Safety Program and providing for the use of traffic infraction detectors, was approved by the 2010 Legislature and amended by Chapter 2013-160, L.O.F. (HB 7125), approved by the 2013 Legislature. Chapter 2023-174, L.O.F. (HB 657) establishing enforcement of school zone speed limits via traffic infraction detection equipment.

BASE AND RATE:
The penalty for failure to stop at a traffic signal is $158 per violation. The penalty for excessive speed in a school zone is $100 per violation.

DISPOSITION:
When a red light violation is issued by the Department of Highway Safety and Motor Vehicles, the Department of Revenue deposits $100 into the General Revenue Fund, $10 into the Department of Health Emergency Medical Trust Fund, and $3 into the Brain and Spinal Cord Injury Trust Fund. In addition, the

Department of Revenue or clerk of court remits $45 to the local jurisdiction issuing the violation. To date, the department has not initiated any civil penalties.

When a red light violation is issued by a local government, the Department of Revenue deposits $70 into the General Revenue Fund, $10 into the Department of Health Emergency Medical Trust Fund, and $3 into the Brain and Spinal Cord Injury Trust Fund. In addition, the local government retains, or the clerk of court remits, $75 to the local jurisdiction issuing the violation.

When a school speed violation is detected by traffic infraction detection equipment, the Department of Revenue deposits $20 into the General Revenue Fund and $3 into the Department of Law Enforcement Criminal Justice Standards and Training Trust Fund. In addition, the local government retains, or the clerk of court remits, $77 to the local jurisdiction issuing the violation.

OTHER STATES:
According to the Insurance Institute for Highway Safety, 343 communities in 22 states across the country currently participate in a red light camera program.

| | 2026-27 (millions) |
|---|---|
| VALUE OF RATE CHANGE: | |
| The value of a 10 percent increase in the red light penalty | $6.8 |
| The value of a 10 percent increase in the school speed penalty | $1.3 |

# HOTEL AND RESTAURANT LICENSES AND FEES

FLORIDA STATUTES: Sections 509.251, 509.302, 509.102, 399.01, 399.03, and 399.07

ADMINISTERED BY: Department of Business and Professional Regulation, Division of Hotels and Restaurants

SUMMARY:
Apartments, hotels, motels, rooming houses, timeshare projects, vacation rentals, and food service establishments must pay an annual license fee to the Department of Business and Professional Regulation to cover the cost of regulation. The Department is authorized by statute to establish rules to implement the fees. The fee is based on the number of units for public lodging or the number of seats or services for food service establishments.

REVENUE:

| Fiscal Year | Collections | Annual Change % |
|---|---|---|
| 2026-27* | 41,312,777 | 1.99% |
| 2025-26* | 40,507,394 | 1.31% |
| 2024-25 | 39,982,538 | -2.96% |
| 2023-24 | 41,203,767 | 6.51% |
| 2022-23 | 38,686,495 | 6.38% |
| 2021-22 | 36,367,156 | 5.09% |
| 2020-21 | 34,606,904 | 10.20% |

* Estimates

HISTORY:
Beginning in 1899, sanitary inspection of hotels and restaurants was assigned to the Board of Health and a $2 fee was prescribed. In 1913, hotel and restaurant inspections were taken over by a Hotel and Restaurant Commissioner. Fee changes have been made at frequent intervals by the Division of Hotels and Restaurants. From 1953 to 1975, all collections were deposited into the General Revenue Fund, from which administrative costs were appropriated. In 1975, an increase in fees was enacted and disposition of funds was changed to the Hotel and Restaurant Trust Fund. The $3 hospitality education fee was increased in 1990 to "no more than $6" and is to be "included in" instead of "in addition to" each lodging and food service license fee. In 1992, s. 559.925, F.S., providing for the licensure of receptive tour operators, was repealed. In 1993, the caps on various fees were increased. In 1996, the Legislature required that all hospitality education fees be used for the sole purpose of funding the Hospitality Education Program. Chapter 2001-186, L.O.F. (SB 336/190), increased the caps for various fees related to elevator safety. Chapter 2002-299, L.O.F. (SB 1808), increased the Hospitality Education Fee cap from $6 to $10, and excluded certain fees from the maximum aggregate license fee for public food service establishments. Chapter 2012-165, L.O.F. (HB 249), deregulated all rooming houses and any apartment buildings inspected by the U.S. Department of Housing and Urban Development that are designated primarily as housing for persons age 62 or older. Chapter 2014-721, L.O.F. (HB 807) created a new public lodging establishment classification for Timeshare Projects which also separated timeshares from vacation rentals. Chapter 2020-160, L.O.F. (HB 1193) created s. 509.102, F.S., defining mobile food dispensing vehicle. Chapter 2023-48, L.O.F. (SB 752) expanded s. 509.102, F.S, to include the definition of temporary commercial kitchen. As a result of Chapter 2023-48, L.O.F, a fee was established for temporary commercial kitchens.

# HOTEL AND RESTAURANT LICENSES AND FEES

BASE AND RATE:
Public Lodgings: Apartments - basic fee - transient unit - $125, non-transient unit - $95, plus additional amount based on number of units. Single unit (transient only) - $10; 2 (transient) or 5 (non-transient) to 25 units - $20; 26 to 50 units - $35; 51 to 100 units - $50; 101 to 200 units - $75; 201 to 300 units - $105; 301 to 400 units - $135; 401 to 500 units - $160; over 500 units - $190. Hotels & Motels - basic fee $170, plus additional amount based on number of units, same as apartments, ranging from $10-$190. Single and Group Vacation Rentals and Timeshare Projects - basic fee $150, plus additional amount based on number of units, same as hotels, motels, and rooming houses. Collective Vacation Rentals and Timeshare Projects- basic fee $150, plus $10 per unit up to $1,000 maximum fee (175 units).

Food Service: Each permanent seating establishment $185, plus additional amount according to seats: 1 to 49 seats - $55; 50 to 149 - $65; 150 to 249 - $85; 250 to 349 - $105; 350 to 499 - $125; 500 or more seats - $145. Theme park food carts - base fee $185, plus additional amount based on number of carts like seating, ranging from $55 to $145. Permanent nonseating Establishments - $220. Mobile food dispensing vehicle licenses - base fee $185, plus service type fee $135. Temporary commercial kitchen – base fee $185, plus service type fee $135. Caterers - base fee $185, plus service type fee $55. Vending machines - base fee $10. Temporary food service licenses – 1 to 3 day events - $77; 4 to 30 day events - $90; annual license - $425. A fee of approximately 5 percent is added to each food service license fee for epidemiological services provided by the Department of Health for food borne illness investigations. Except for annual temporary event licenses, aggregate fees per establishment may not exceed $400.

Hospitality Education Fee: Imposed on each lodging and food service establishment - $10.

Elevator Licensing Fees: Basic fee of $75 per device. Certificate of competency fee for elevator professionals is $50 per year.

DISPOSITION:
Hotel and Restaurant Trust Fund.

OTHER STATES:
It is common among the states to inspect and regulate hotels, motels, restaurants, and other food service establishments, by either state or local authority. This may be done by the health authorities or by some specially appointed agency.

# HUNTING AND FISHING LICENSES

FLORIDA STATUTES: Sections 379.353 - 379.357 and 379.361 - 379.377

ADMINISTERED BY: Fish and Wildlife Conservation Commission

SUMMARY:
Hunting and fishing in Florida generally requires a license unless an exemption applies. Permits are also required to hunt and fish certain species or seasons. Florida licenses and permits are issued by the Fish and Wildlife Conservation Commission (FWC). They may be purchased from tax collectors, or for an additional fee, from retail vendors and via the telephone and Internet. License fees are set by statute and are based on intended activity, duration of the license, location, and residency status. License fees support fish and wildlife resource conservation including species/habitat management, research, and law enforcement, and provide hunting and fishing opportunities.

REVENUE:

| Fiscal Year | Total Collections | Annual Change % | State Game Trust Fund | Marine Resources Conservation Trust Fund | Dedicated License Trust Fund | Lifetime Fish and Wildlife Trust Fund |

* Estimate

HISTORY:
Florida enacted a law requiring recreational hunting and freshwater fishing licenses in 1929. Recreational license and/or permit fees were increased in 1961, 1963, 1977, 1979, 1985, 1989, 1990, 2007, and 2009. There have been many new types of licenses created over the years, including combination hunting and fishing licenses established in 1985 and a resident sportsman license created in 1987. Beginning in 1989, the Legislature required a saltwater fishing license for the first time. In 1990, persons who operated charter boats (vessels carrying customers who fish for a fee) were required to obtain a saltwater vessel license (customers fishing from a licensed charter boat are exempted from having to obtain a personal recreational saltwater fishing license). Resident lifetime and 5-year hunting and fishing licenses were created in 1991. A special recreational spiny lobster license was created in 1993 (it was repealed during the 2014 Session in Chapter 2014-136, L.O.F. (HB 955)). Chapter 98-333, L.O.F. (HB 3673), eliminated the resident saltwater $10/10-day license; and reduced the resident 5-year hunting license fee from $270 to $55 (and excluded all permits from the license, requiring the licensee to buy permits individually).

In 1999, the Legislature implemented the constitutional amendment that created the Fish and Wildlife Conservation Commission from the former Game and Fresh Water Fish Commission, Marine Fisheries Commission, and marine programs from the Department of Environmental Protection; all hunting, freshwater fishing, and saltwater fishing licenses were transferred to FWC. Chapter 2000-362, L.O.F. (SB 386), created the following annual combination residential licenses: hunting, freshwater, and saltwater fishing; and freshwater and saltwater fishing. Chapter 2005-45, L.O.F. (HB 395), created the Military Gold Sportsman's license with a fee of $18.50 (for residents who are active or retired members of the U.S. Armed Forces, U.S. Armed Forces Reserves, National Guard, U.S. Coast Guard, or the U.S. Coast Guard Reserves). Chapter 2006-304, L.O.F. ( HB 471), created a $5 crossbow permit and,

accordingly, increased the annual fees of the Sportsman's license from $66 to $71 and the Gold Sportsman's license from $82 to $87. Chapter 2007-223, L.O.F. (HB 7173), established commercial license fees associated with the Blue Crab Effort Management Program, increased licenses fees for most recreational fishing and hunting licenses, created a nonresident recreational 3-day freshwater fishing license, and enabled FWC to solicit donations for youth hunting and fishing programs as a voluntary check-off at the time hunting and fishing licenses are sold. Chapter 2008-106, L.O.F. (SB 1286), provided for hunting and fishing license fees and vessel registration fees to be adjusted by the percentage change in the Consumer Price Index (CPI), starting in 2013 and every five years thereafter, unless otherwise provided by law; these provisions were repealed by Chapter 2013-56, L.O.F. (HB 5503).

Chapter 2009-86, L.O.F. (HB 1423), increased the following annual recreational permit fees, effective July 1, 2010: waterfowl permit from $3 to $5; resident turkey permit from $5 to $10; non-resident turkey permit from $100 to $125; snook permit from $2 to $10; and spiny lobster permit from $2 to $5. It also authorized an increase for the special use permit (to participate in limited entry hunting or fishing activities authorized by FWC) from $100 to $150 per day, or from $250 to $300 per week; and authorized an increase, from $25 to $30 per year, of the maximum fee for a management area permit to hunt or fish on land owned, leased, or managed by the FWC. The legislation also created a permit with a maximum fee of $5 per day or $30 per year for anyone to hike, camp, or otherwise engage in other outdoor recreational activities, except hunting or fishing, on management area lands; it also created a $5 annual deer permit.

Chapter 2009-65, L.O.F. (SB 1742), repealed the recreational saltwater shoreline exemption authorized for Florida residents; it required residents who saltwater fish from the shoreline or a structure fixed to the land to purchase a shoreline license at a cost of $7.50; the license is not required if they possess an annual saltwater fishing license or if they fall under an exemption.

Chapter 2010-146, L.O.F. (SB 1514), repealed the fee for the shoreline license created in 2009 (it did not repeal the requirement for the shoreline license).

Chapter 2012-95, L.O.F. (HB 7025), reduced the commercial blue crab/soft shell endorsement annual fee from $250 to $125.

Chapter 2013-194, L.O.F. (HB 333), exempted disabled veterans and active military from having to obtain a recreational hunting or fishing license when participating in a hunting or fishing special event whose organizing entity has obtained an FWC permit; this same legislation modified the restricted species criteria for certain veterans who wish to become commercial saltwater fishermen.

Chapter 2024-251, L.O.F. (HB 1329), provides fee exemptions for hunting, freshwater fishing and saltwater fishing licenses to any Florida resident who is a disabled veteran and honorably discharged, and certified by the United States Department of Veterans Affairs or by any branch of the United States Armed Forces as having a service-connected disability percentage rating of 50 percent or greater. Any license issued under this expanded fee exemption expires after five years and must be reissued, upon request, every five years thereafter.

BASE AND RATE:
Hunting/Game Licenses/Permits, annual unless otherwise specified: Licenses: Resident Hunting: $15.50; 5-year $77.50; Lifetime 4 years or younger $200, 5 - 12 years $350, 13 - 63 years $500. Non-Resident Hunting: $150; 10-day $45. Trapping: Resident $25; Non-Resident $25. Fur and hide dealers: Resident $100; Non-Resident $500. Private hunting preserve: $70; Commercial $500. Game farm $50. Permits, Resident or Non-Resident: Waterfowl $5; Deer $5; Management Area, for hunting and fishing, not to exceed $30; Management Area, for activities other than hunting and fishing, not to exceed $5/day

or $30/year; Muzzle-loading Gun $5; Archery $5; Crossbow $5. Turkey Permit: Resident $10; Non-Resident $125. Special use permits for limited entry hunting or fishing activities, not to exceed $150/day or $300/week.

Freshwater Fishing Recreational License, annual unless otherwise specified: Resident: $15.50; 5-year $77.50; Lifetime 4 years or younger $125; 5 - 12 years $225; 13 years or older $300. Non-Resident: 3-day $15.50; 7-day $28.50; annual $45.50.

Freshwater Fishing Commercial License, annual: Commercial Fishing: Resident $25; Non-Resident $100. Freshwater Fish Dealer: Resident (also allows Wholesale activities) $40; Non-Resident $100. Wholesale Fish Dealer, Non-Resident, $50 - $500. Fish Pond (greater than 20 acres) $3 per surface acre (allows those fishing to be exempt from freshwater fishing license requirement). Annual Gear license: Trawl Seines $50; Haul Seines $100. Lake Okeechobee Permits: Resident Trawl $50; Resident Haul Seines $100; Non-Resident or Alien Trawl or Haul Seines $500; Tag Fee (for sale of game fish commercially harvested from Lake Okeechobee) up to $.50/each.

Alligator Licenses, annual: Alligator Trapping: Resident $250; Non-Resident $1,000. Farming or Processing $250; Trapper or Farmer Agent $50.

Saltwater Fishing, Recreational Licenses/Permits, annual unless otherwise specified: Licenses: Resident $15.50; 5-year: $77.50; Shoreline: $0; Lifetime 4 years or younger $125; 5 - 12 years $225; 13 years or older $300. Non-Resident: 3-day $15.50; 7-day $28.50; annual $45.50. Special Recreational Spiny Lobster License $100. Fishing Pier $500 (allows those fishing to be exempt from saltwater fishing license requirement). Recreational Vessel $2,000 (allows those fishing to be exempt from saltwater fishing license requirement). Permits: Snook $10; Spiny Lobster $5; Tarpon tag $50/each.

Combination Recreational Licenses, annual unless otherwise specified: Hunting and freshwater fishing $31; Freshwater and saltwater fishing $31; Hunting, freshwater and saltwater fishing $46.50; Sportsman's $79; Sportsman's, 64 years and older $12 (lifetime); Gold Sportsman's $98.50; Military Gold Sportsman's $18.50. Resident Lifetime Sportsman: 4 years or younger $400; 5 - 12 years $700; 13 years or older $1,000. [1, 23]

Saltwater Fishing Licenses/Endorsements, Commercial (Saltwater Products), annual: Licenses: Individual Resident $50; Non-Resident $200; Alien $300. Individual/Vessel and all aboard: Resident $150; Non-Resident $600; Alien $900. Vessel and all aboard: Resident $100; Non-Resident $400; Alien $600. Oyster (Apalachicola Bay) Resident $100; Non-Resident $500. Live/dead bait/shrimp production, Tampa Bay, Resident $250, Non-Resident $1,000. Endorsements: Marine Life $75; Stone Crab $125 (plus trap certificate fees); Blue Crab/hard shell $125 (plus trap certificate fees); Blue Crab/soft shell $125 (plus trap certificate fees); Spiny Lobster $125 (plus trap certificate fees). Trap retrieval fee $10. St. Johns Seine Net permit $250. Gear License: purse seines $25.

[1] Executive Order Number 14-295, issued by Governor Rick Scott, authorized FWC to temporarily reduce the Lifetime Sportsman's License fee to $500 for residents aged 5 to 21 from November 24, 2014 through December 31, 2014.

[2] In December 2017, Governor Scott signed a proclamation that offered the Lifetime Sportsman's Licenses for Florida residents 17 years of age and younger at a 25% discount. The discount was available December 1, 2017 through December 31, 2017.

[3] Executive Order Number 23-209, issued by Governor Ron DeSantis, authorized FWC to provide 50% discounts to Floridians on the Gold Sportsman Hunting and Fishing Licenses from October 14, 2023 through January 13, 2024.

Wholesale and Retail Saltwater Products Dealer Licenses, annual: Wholesale/County: Resident $400; Non-Resident $600; Alien $1,100. Wholesale/State: Resident $550; Non-Resident $1,100; Alien $1,600. Retail: Resident $75 ($25 per additional location); Non-Resident $250 ($40 per additional location); Alien $300 ($65 per additional location).

Saltwater Charter Boat Licenses, annual: To carry more than 10 customers $800; to carry no more than 10 customers $400; to carry 6 or fewer customers $200.

Possessing, Selling, Exhibiting Captive Wildlife Licenses, annual: Personal Possession $0-140; Exhibition or Sale $50-$250; Venomous Reptile/Reptile of Concern $100.

DISPOSITION (into trust funds administered by FWC, unless otherwise noted):

Hunting, Freshwater Fishing, and Captive Wildlife Licenses, Fines, Forfeitures, and Administrative Fees: State Game Trust Fund.

Saltwater Fishing Licenses, Fines, Forfeitures, and Administrative Fees: Marine Resources Conservation Trust Fund; General Inspection Trust Fund and Florida Saltwater Products Promotion Trust Fund (administered by the Department of Agriculture and Consumer Services).

Lifetime Fishing and Hunting License Fees: Lifetime Fish and Wildlife Trust Fund.

5-Year Fishing and Hunting License Fees: Dedicated License Trust Fund.

OTHER STATES:
All states collect hunting and fishing license fees.

# INDIAN GAMING REVENUES

FLORIDA STATUTES: Chapter 285

ADMINISTERED BY: Section 16.712, Florida Statutes, designates the Florida Gaming Control Commission as the state compliance agency (SCA) and directs it to oversee the gaming compact with the Seminole Tribe of Florida.

SUMMARY:
Chapter 285 ratifies and approves the 2021 Compact between the Seminole Tribe of Florida and the State of Florida. The Compact recognizes the Tribe's right to offer certain Class III gaming and provides substantial exclusivity for such activities in exchange for a revenue sharing arrangement. The Compact allows the play of covered games at seven Seminole tribal facilities, which may be relocated, expanded, or replaced on Indian Lands as provided for in the compact.

REVENUE:

| Fiscal Year | Total Collections | Annual Change % | General Revenue | Indian Gaming Revenue Clearing Trust Fund |

HISTORY:
On November 14, 2007, the Governor and the Seminole Tribe of Florida executed a gaming agreement which was subsequently invalidated by the Florida Supreme Court. On August 28, 2009, and August 31, 2009, the Governor and the Tribe executed a replacement which was sent to the President of the Senate and the Speaker of the House of Representatives, but it was neither ratified nor approved by the Legislature. On April 7, 2010, the Governor and the Tribe executed a third agreement that was ratified by the Legislature as part of Chapter 2010-29, L.O.F. (SB 622), and approved by the United States Secretary of the Interior.

The first ratified Compact (referred to as the 2010 Compact) had a term of 20 years, which began the first day of the month following the publication of the notice of approval in the Federal Register (July 6, 2010), making it effective August 1, 2010. Based on this, the expiration date would have been July 31, 2030. An exception was made to the general expiration for certain named banking or banked card games (including baccarat, chemin de fer, and blackjack, but excluding roulette, craps, roulette-styled games, and craps-styled games); this specific authorization was set to expire after five years.

The 2010 Compact authorized play of covered games at seven Seminole tribal gaming facilities. The games included slot machines at all seven facilities and banked card games at five of the seven facilities. As part of this authorization, the Tribe was granted partial but substantial exclusivity for both the play of banked card games and the operation of slots in counties other than Broward and Miami-Dade. In exchange, the Tribe agreed to a revenue sharing arrangement with the State. The Compact provided that once the authorization for banked card games expired, revenue share payments from all banked card games and all Broward activity would cease. It also provided that the Tribe had 90 days, referred to as a grace period, to cease the operation of banked card games. The authorization for banked card games expired on July 31, 2015, and the grace period ended October 31, 2015. Beginning in November 2015 and running through July 2017, revenue sharing associated with banked card games was not included in the state's official revenue forecasts. The Revenue Estimating Conference met in August 2017 where it took two actions that affected the treatment of past and future receipts. First, based on the Settlement Agreement and Stipulation entered into between the Seminole Tribe of Florida and the State of Florida in July 2017, the payments associated with banked card games that the state had held in reserve ($233.8 million) since November 2015 were released. Of the total, $226.8 million belonged exclusively to the State; the remainder was distributed to local governments pursuant to s. 285.710, Florida Statutes. Second, all future revenue share payments, including those formerly placed in reserve, were treated as nonrecurring revenues since continuation of these payments depended on actions by the State and the Seminole Tribe that could not be anticipated with sufficient certainty. In this regard, the Settlement Agreement and Stipulation required that "...the state takes aggressive enforcement action against the continued operation of banked card games, including Designated Player Games that are operated in a banked game manner..." during a specified Forbearance Period. The original Forbearance Period ended March 31, 2018; however, an amendment to the Settlement Agreement was signed on April 18, 2018, effectively extending the Forbearance Period to May 31, 2019. After making its April 2019 payment, the Tribe ceased all revenue sharing with the State. The Revenue Estimating Conference met in July 2019 where it zeroed out the revenue forecast and projected a remaining $7.2 million local distribution in March of 2020, which was related to a prior State liability.

Florida voters approved a constitutional amendment at the 2018 General Election (Amendment 3) which created Article X, s. 30 of the Florida Constitution. This amendment made citizen's initiatives the exclusive method of authorizing casino gambling (as defined in the amendment), with an exception made for gaming compacts for the conduct of casino gambling on tribal lands.

The Governor and the Seminole Tribe of Florida signed a new Compact on April 23, 2021, with an amendment on May 17, 2021. It was subsequently ratified in Special Session as part of Chapter 2021-268, L.O.F. (CS/SB 2-A), which was approved by the Governor on May 25, 2021. The first part of the amendment removed a reference to online casino gambling (or other casino-style gaming) that broadly referenced all types of covered games. The original provision was dependent on the results of future good faith negotiations that were to occur within 36 months after the effective date of the Compact. The second part of the amendment addressed the initiation of sports betting no earlier than October 15, 2021.

The legislation required that, "Upon receipt of an act ratifying a tribal-state compact, the Secretary of State shall coordinate with the parties to the compact to formally submit a copy of the executed compact and the ratifying act to the United States Secretary of the Interior for his or her review and approval, in

accordance with 25 U.S.C. s. 2710(d)(8).” On August 11, 2021, the Department of Interior, Bureau of Indian Affairs, published a notice entitled “Indian Gaming; Approval by Operation of Law of Tribal-State Class III Gaming Compact in the State of Florida” in the Federal Register. This notice officially triggered the first revenue sharing cycle to begin on September 1, 2021. By operation, the 2010 Compact was superseded when the 2021 Compact became effective.

In addition to the previously authorized games, the 2021 Compact authorizes craps & roulette, sports betting, and fantasy sports contests. It also establishes a new bracket structure based on the different components of Net Win: Slot Machines, Raffles and Drawings + New Games; Table Games (including craps & roulette); Sports Betting – Tribe (direct); and Sports Betting – Qualified Pari-mutuel Permitholders. Further, the 2021 Compact includes a schedule of guaranteed minimum payments that apply to the first five revenue sharing cycles. The guarantees are:

- At least $400 million for any revenue sharing cycle during the first five years of the Compact;
- At least $1.5 billion by the end of the third revenue sharing cycle with the payment due within 30 calendar days after the end of the third cycle; and
- At least $2.5 billion by the end of the fifth revenue sharing cycle with the payment due within 30 calendar days after the end of the fifth cycle.

For this purpose, the end of the third revenue sharing cycle would be August 31, 2024, and the end of the fifth revenue sharing cycle would be August 31, 2026. There are, however, certain enumerated events which affect these calculations. Overall, the Tribe's obligation to make the Guaranteed Minimum Compact Term Payment ceases (i) if the State violates the Tribe's exclusivity and the State fails to cure such violation within 180 days after notice of such breach by the Tribe, or (ii) if the Tribe’s authorization to conduct the Covered Games is invalidated, in whole or in part, as a result of a court decision; provided, if at any time the Tribe is not legally permitted to offer Sports Betting as described in the 2021 Compact, including to patrons physically located in the State but not on Indian Lands, or the Tribe loses the exclusive right to offer Sports Betting, then the Tribe’s obligation to pay the full Guaranteed Minimum Compact Term Payment and the other minimum payments shall be reduced by ten (10) percent.

The State of Florida began receiving Indian Gaming payments pursuant to the 2021 Compact in October of 2021; however, the U.S. District Court for the District of Columbia set aside federal approval of the 2021 Compact on November 22, 2021. Nevertheless, the Seminole Tribe of Florida continued revenue sharing with the State of Florida through February 2022, after which time they discontinued all payments. Between October 2021 and February 2022, the state received 5 payments of $37.5 million, totaling $187.5 million. On June 30, 2023, the United States Court of Appeals, D.C. Circuit, vacated the District Court’s opinion, and directed it to enter judgment for the Secretary of the Department of Interior. The petitioners appealed, and the U.S. Supreme Court denied a petition for a writ of certiorari on June 17, 2024.

The Tribe resumed revenue sharing with the State while the litigation was still ongoing. After a soft opening on November 7, 2023, to test its sports betting platform, the Tribe formally launched the statewide reactivation of its sports betting program on December 7, 2023, as well as the newly authorized games of craps and roulette. The first payment was received in January 2024. The Revenue Estimating Conference formally recognized the renewed stream of receipts as nonrecurring revenue on February 20, 2024—and at its August 2024 Conference, began treating all receipts as recurring given the conclusion of the previously active litigation.

BASE AND RATE:
The revenue sharing bracket structure is based on the different components of net win as follows:

**2021 Compact Brackets for Revenue Sharing**

***Slot Machines, Raffles and Drawings + New Games***

| | |
|---|---|
| 0.120 | 12% of all amounts up to and including Two Billion Dollars ($2,000,000,000) of Net Win |
| 0.175 | 17.5% of all amounts greater than Two Billion Dollars ($2,000,000,000) up to and including Two Billion Five Hundred Million Dollars ($2,500,000,000) of Net Win |
| 0.200 | 20% of all amounts greater than Two Billion Five Hundred Million Dollars ($2,500,000,000) up to and including Three Billion Dollars ($3,000,000,000) of Net Win |
| 0.225 | 22.5% of all amounts greater than Three Billion Dollars ($3,000,000,000) up to and including Three Billion Five Hundred Million Dollars ($3,500,000,000) of Net Win |
| 0.250 | 25% of all amounts greater than Three Billion Five Hundred Million Dollars ($3,500,000,000) of Net Win |

***Table Games (including Craps & Roulette)***

| | |
|---|---|
| 0.150 | 15% of all amounts up to and including One Billion Dollars ($1,000,000,000) of Net Win |

DISPOSITION:
Legislation passed during the 2024 Session (CS/SB 1638; Chapter No. 2024-58) that significantly changed the expected distribution of receipts. Instead of entirely benefiting the General Revenue Fund, 96 percent of future distributions were directed to trust funds that provide funding for environmental resource management. In addition to recognizing this change, the Conference decided in August 2024 that the local government share distributions required by s. 285.710(10), F.S., and accomplished by nonoperating budget transfers from the General Revenue Fund should be shown on the State's Financial Outlook Statement as effective appropriations. As part of its 2025 Session actions, the Legislature reversed the 2024 statutory change and redirected all revenue share payments back to the General Revenue Fund (SB 2506; Chapter No. 2025-201).

OTHER STATES:
According to the International Center for Gaming Regulation, 29 states have tribal gaming operations within their borders that are regulated pursuant to the Indian Gaming Regulatory Act of 1988 (IGRA). Of these, 25 states permit Class III or "casino-style" gaming. With significant though not total overlap, there

are 22 states in which tribal sports wagering is authorized and/or currently operational, of which five states limit the authorization to in-person sports betting by tribal operators. Florida's model ("hub-and-spoke") is unique. The information regarding other states is current as of September 1, 2022.

# INSPECTION LICENSES AND FEES

FLORIDA STATUTES: Chapter 472; sections 487.041, 487.045, 496.405, 500.90, 500.459, 501.605, 525.09, 526.51, 531.60-531.66, 576.041, 578.08, 580.0365, 580.041, 601.28, 601.59, 603.12, 604.19, and 616.242

ADMINISTERED BY: Department of Agriculture and Consumer Services

SUMMARY:
The Department of Agriculture and Consumer Services is responsible for the regulation and inspection of a wide range of activities related to agriculture and certain consumer commodities. Inspection fees are expected to cover the cost of regulation and inspection.

REVENUE:

| Fiscal Year | Total Collections | Biennial Change % |
|---|---|---|
| 2026-27* | 85,232,628 | 1.63% |
| 2025-26* | 73,668,264 | 1.80% |
| 2024-25 | 83,863,708 | 1.46% |
| 2023-24 | 72,364,074 | -0.69% |
| 2022-23 | 82,660,354 | 2.65% |
| 2021-22 | 72,866,136 | 3.58% |
| 2020-21 | 80,528,439 | -0.87% |

* Estimate

HISTORY:
The following table provides a listing of the various types of fees and the date of their implementation:

| Type of Fee | Base and Rate | Date of Creation | Last Increase | Disposition |
|---|---|---|---|---|
| Citrus Inspection | Fees for inspection of citrus grade and maturity in continuous inspection packing houses, inspection for pounds solid and brix acid levels at processing plants, inspection of imported fruit at terminal markets. | 1949 | 2008 | Citrus Inspection Trust Fund |
| Citrus Licenses | Each applicant that qualifies for a citrus fruit dealer's license must pay a $25 per shipping season license fee. A $10 per shipping season registration fee is required for each agent of the licensed citrus fruit dealer. | 1949 | | Citrus Inspection Trust Fund |
| Gas and Kerosene Inspection | An inspection fee of one-eighth cent per gallon is assessed on all gasoline, | 1919 | | General Inspection Trust Fund |

| | | | | |
|---|---|---|---|---|
| | kerosene (except when used as aviation turbine fuel), and #1 fuel oil for sale or use in this state. | | | |
| Produce Dealers Licenses | A license is required before conducting business as a dealer in agricultural products. The license fee may not exceed $500. | 1941 | 2006 | General Inspection Trust Fund |
| Pesticide Licenses | A license is required for a pesticide applicator that uses or supervises the use of restricted use pesticides. The license fee varies by type of applicant. | 1975 | 2009 | General Inspection Trust Fund |
| Professional Surveyors and Mappers Licenses | A license is required from the department for a professional to practice surveying and mapping in the state. The initial license fee shall not exceed $200. | 1994 | | General Inspection Trust Fund |
| Fairs and Expos Permits | Fees are established by rule to cover the costs and expenditures associated with the Bureau of Fair and Rides Inspection. | 1986 | 2005 | General Inspection Trust Fund |
| Weights & Measures Instruments and Devices Commercial Use Permits | Fees are established to administer permits for the use of various weights & measures instruments and devices. The permit fee is based on the manufacturer's rated capacity, device design, or use and whether measuring by an inch, pound, or the metric equivalent. | 2009 | | General Inspection Trust Fund |
| Fruit and Vegetable Inspection | When requested by the shipper, the department will furnish car lot inspections of fruits, vegetables, nuts, grains, and other agricultural products at shipping point. The expense of the inspection is paid by the shipper in the form of inspection fees. | | 2008 | General Inspection Trust Fund |
| Feed Registration | Each distributor of commercial feed must annually obtain a master registration for each brand that will be distributed in the state. | 1905 | 2008 | General Inspection Trust Fund |

| | | | | |
|---|---|---|---|---|
| | The registration fee is determined by the number of tons of feed distributed in this state by the distributor during the previous year. | | | |
| Fertilizer Inspection | $1 per ton for fertilizer sold in the state. | 1966 | 2008 | General Inspection Trust Fund |
| Seed Registration | A seed dealer must obtain a license prior to selling seed in the state. The license fee is determined by the gross receipts from the sale of such seed for the preceding license year. | 1945 | 1992<br>2009 | General Inspection Trust Fund |
| Brake Fluid Permit | A permit fee of $50 for 12 months or $100 for 24 months is required for the registration of each brand of brake fluid sold in the state. Renewal fees are $50 per year, or $100 for two years. | 1961 | | General Inspection Trust Fund |
| Phosphate and Lime Nitrogen | 30 cents per ton for phosphate and lime sold or used for agricultural purposes in the state. | 2003 | | General Inspection Trust Fund |
| Telecommunication List Solicitor | A license fee of $1,500 is required for businesses to engage in commercial telephone solicitation in the state. | 1991 | | General Inspection Trust Fund |
| Water Vending Permits | A water vending machine permit is required of any person who establishes, maintains, or operates a water vending machine in the state. The permit fee is $35 per machine. | 1984 | | General Inspection Trust Fund |
| Plant Industry | The department regulates nurseries and the movement of nursery stock as may be necessary for the eradication, control, or prevention of the dissemination of plant pests or noxious weeds. | 1999 | 2016 | Plant Industry Trust Fund |
| Substance Abuse Marketing Services | A license fee of $1,500 is required for businesses to provide substance abuse marketing services in the state. | 2017 | | General Inspection Trust Fund |

| | | | | |
|---|---|---|---|---|
| Solicitation of Contributions Fees | The Department collects registration fees from charitable organizations, ranging from $10 to $400, depending on the amount of contributions received by the organization for the last fiscal year. | 1991 | 1994 | General Inspection Trust Fund |

In 2009, Chapter 2009-66, L.O.F. (SB 1744), transferred the regulation and licensing of the surveyors and mappers profession from the Department of Business and Professional Regulation to the Department of Agriculture and Consumer Services (DACS). In that same law, effective retroactively to January 1, 2009, a supplemental biennial registration fee for each registered brand of pesticide was added to defray the expenses of the department for testing pesticides for food safety. Each registration issued to a registrant in an odd numbered year is assessed a supplemental fee of $630 per brand and in an even numbered year is assessed a supplemental fee of $315 per brand. Also, ss. 531.60-531.66, F.S., were established to permit requirements and fees for weighing and measuring devices used for commercial purposes. The various fees for instruments and devices range from $60-$300 for weighing devices of up to and including 100- pound capacity, $200-$1,000 for devices weighing greater than 100-pound capacity including wheel load weighers, static railroad track scales, and in-motion railroad track scales, and $50-$500 for mass flow meters, volumetric flow meters, tanks used as measuring containers, taximeters, grain moisture meters, and multiple-dimension measuring devices. Additionally, the annual fee for specialty fertilizer was revised to $200 for each specialty fertilizer brand registration by an applicant. Also, the annual registration fee for seed dealers was doubled, now ranging from $100-$4,600 based on various levels of gross receipts from the sale of seeds per place of business.

In 2013, Chapter 2013-251, L.O.F. (HB 7023), transferred the collection of motor fuel inspection fees to the Department of Revenue and eliminated the fees on kerosene and #1 oil. The funds continue to be deposited into the General Inspection Trust Fund.

In 2014, Chapter 2014-150, L.O.F. (HB 7091) created two new tiers of annual registration fees for seed dealers with prior year seed sales of less than $2,500. For dealers with receipts of less than $2,500 but greater than or equal to $1,000, the fee remains at $100. For dealers with receipts less than $1,000 but greater than or equal to $500, the new fee is $25. If receipts are less than $500 the new fee is $10.

In 2016, Chapter 2016-61, L.O.F. (HB 7007) made numerous changes to the fees regulated by DACS, including the following:

- Created s. 500.90, F.S., to preempt to DACS the regulation of the use or sale of polystyrene products (i.e., Styrofoam) by entities regulated by ch. 500, F.S., the Florida Food Safety Act. Currently, there are no fees associated with this law change.
- Created s. 580.0365, F.S., to preempt to DACS the regulatory authority for commercial feed and feedstuff. Currently, there are no fees impacted by this law change.
- Created new penalties and administrative fines for anyone who releases a plant pest without a special permit. The fees are associated with reasonable costs and expenses for a plant pest control or eradication program.

In 2016, Chapter 2016-166, L.O.F. (SB 772) made modifications to several licensing and consumer service activities under the jurisdiction of DACS, including the following:

- Provided for the waiver of certain application, license, and registration fees for honorably discharged veterans and in some cases their spouses.

- Removed the permit fee for facilities operating as a charitable entity that have amusement rides that are not open to the general public and do not allow for day rates.
- Clarified several fees and standards related to weights and measures in chs. 527 & 531, F.S.
- Removed "personal trainers," "tour guides," and "tour guide services" from regulation.

In 2017, Chapter 2017-85, L.O.F. (HB 467) made modifications to several licensing and consumer service activities under the jurisdiction of DACS, including the following:

- Removed the requirement to obtain multiple licenses for private investigative agency managers that manage multiple locations.
- Removed the requirement to register a cattle mark or brand.
- Exempted dealers in agricultural products who pay by credit card from certain regulations.
- Excluded taximeters from permitting requirements.

In 2017, the Legislature also passed legislation to eliminate the supplemental fee for each registered brand of pesticide that contains an active ingredient for which the United States Environmental Protection Agency has established a food tolerance limit (Ch. 2017-158, L.O.F. (HB 5401)). In addition, the Legislature created the requirement for entities providing substance abuse marketing services to be licensed by DACS under the Florida Telemarketing Act (Ch. 2017-173, L.O.F. (HB 807)).

In 2018, Chapter 2018-84, L.O.F. (SB 740) extended the repeal date for the weights and measures program which is funded through permit fees from July 1, 2020, to July 1, 2025. Chapter 2018-7, L.O.F. (HB 29) eased professional licensing fees and requirements for certain military members, veterans, and their spouses by creating or expanding fee waivers for certain DACS licensees and applicants.

In 2020, Chapter 2020-141, L.O.F. (HB 1275) clarified DACS authority to establish by rule fees to cover the costs and expenditures associated with the fair rides inspection program, and the requirement that the industry pay the remaining cost of the program if there is not sufficient General Revenue appropriated by the Legislature. The bill also broadened DACS's rulemaking authority to establish certain exemptions. Further, the bill removed the exemption for museums and other exhibition related institutions, thereby requiring these institutions to comply with applicable licensing and permitting requirements, including being subject to fees and fines.

OTHER STATES:
All states engage in some form of regulation and inspection of agricultural commodities.

# INSURANCE LICENSE FEES

FLORIDA STATUTES: Sections 624.501 - 624.506, 624.521, and 624.523

ADMINISTERED BY: Department of Financial Services

SUMMARY:
Each insurance company and insurance agent must be licensed to sell insurance in Florida. Insurance companies pay an annual license fee of $1,000, while resident insurance agents pay a biennial state license fee of $12, an appointment fee of $42, and a county license fee of $6.

REVENUE:

| Fiscal Year | Collections | Annual Change % | Insurance Fees | Agents County Tax Trust Fund |
|---|---|---|---|---|
| 2026-27* | 127,587,507 | 0.00% | 108,645,444 | 9,406,257 |
| 2025-26* | 127,587,507 | 8.00% | 108,645,444 | 9,406,257 |

* Estimate

HISTORY:
As far back as 1887, most insurers were required to be licensed in Florida. In 1903, a $5 state license tax was imposed on agents and was increased in 1925 and 1982. In 1959, an additional county license tax of $3 for each agent or solicitor was created and increased to $6 in 1982. Additional state and county license fees for title insurance agents and limited surety agents were imposed in 1985. In 1989, an annual administrative surcharge of $200 was imposed on all licensed title insurance agents. The $7.50 service fee was increased to $15. In 1992, the fee for filing application for original or modified certificate of authority of insurer was increased from $25 to $1,500 and the annual license tax of each insurer was increased from $200 to $1,000. All appointment fees were increased by $20.

BASE AND RATE:
Each insurer company: $1,000 annually.

Each resident property, casualty, marine, surety, life, health, title, and limited lines insurance agent pays a $60 biennial license fee ($42 appointment fee, $12 state license fee, and $6 county license tax). Each non-resident insurance agent and all adjusters, whether resident or non-resident, pay a $60 biennial appointment fee. Non-resident agents pay a $6 biennial county license tax for each county in which he or she transacts insurance. Each title insurer and title insurance agency pays an annual $200 administrative surcharge to be deposited in the Insurance Regulatory Trust Fund.

DISPOSITION:
Insurance Regulatory Trust Fund: All “state tax” portions ($12) of the agents’ licenses are collected to fund the administrative costs of the Division of Insurance Fraud. The $42 appointment fee is also deposited in the Insurance Regulatory Trust Fund.
General Revenue Fund: Residual of all "state tax" portions of agents’ license fee collections remaining after the administrative distribution to the Insurance Regulatory Trust Fund. There has been no residual to the General Revenue Fund since 1992-93.

Agents County Tax Trust Fund: "County tax" portion of license fees.

OTHER STATES:
All states regulate insurance companies and agents. Fees or taxes imposed vary considerably from state to state. In some instances, they may be credited against premium taxes.

# INSURANCE PREMIUM TAX

FLORIDA STATUTES: Sections 624.509 - 624.519, 624.4625, and 252.372

ADMINISTERED BY: Department of Revenue and Department of Financial Services

SUMMARY:
Taxes are imposed on insurance premiums and paid by insurance companies at the following rates: 1.75 percent on gross premiums minus reinsurance and return premiums; 1 percent on annuity premiums; and 1.6 percent on self-insurers.

REVENUE:

| Receipts | | | Transfers** | Distributions** | | |

* Estimate
** Transfers and Distributions do not equal collections since some years are lagged into different fiscal years.

HISTORY:
Adoption of a revised insurance code in 1959 carried forward previous tax arrangements which fully exempted domestic companies and partially exempted foreign companies maintaining regional home offices in Florida. In 1982, a credit was authorized against the premium tax on the emergency excise tax paid to Florida. The 1986 Legislature created the "Tort Reform and Insurance Act," which provided significant reform to the insurance law. In 1988, legislation removed statutory distinctions between domestic, regional home office, and foreign insurance companies, subjecting all insurance companies to a 2 percent premium tax. A new salary tax credit equal to 15 percent of the amount paid by the insurer in salaries to non-licensed employees was authorized with a cap on the combined sum of the salary credit and the corporate income tax credit of 75 percent of total premium tax liability. In 1989, the premium tax rate was reduced from 2 percent to 1.75 percent and the cap on the combined salary and corporate income tax credit was lowered from 75 percent to 65 percent. The 100 percent exclusion from considering the salary credit when calculating retaliatory taxes was reduced to 80 percent exclusion. Also, the distribution of retaliatory taxes was changed with not more than 10 percent going to the Insurance Commissioner's Regulatory Trust Fund and the remainder into the General Revenue Fund. Annual tax credits for the Florida Insurance Guaranty Association (FIGA) and Florida Life and Health Insurance Guaranty Association (FLAHIGA) assessments were reduced from 5 percent to 0.1 percent and totally eliminated after three years. Insurance premium taxes levied on "multiple-employer welfare arrangement" benefit plans were repealed. In 1991, refund payments were authorized to be made in the year following over-payment of premium taxes, and such payments must be made out of the General Revenue Fund.

After Hurricane Andrew in 1992, the 1993 Legislature imposed an annual $2 surcharge on every homeowner's, mobile homeowner's, tenant homeowner's, and condominium unit owner's policy and an annual $4 surcharge on every commercial fire, commercial multiple peril, and business owner's property insurance policy. All proceeds from this surcharge are deposited into the Emergency Management, Preparedness, and Assistance Trust Fund. In 1994, the community contribution tax credit was extended from June 30, 1994, to June 30, 2005, but was restricted to projects within enterprise zones or benefiting low-income housing. The allowable annual contribution amount was reduced from a total of $3 million annually to $2 million annually. Beginning with the 1995 tax year, municipal pension assessments were transferred to the Department of Management Services (now the Department of Financial Services) for distribution to local governments. The 1996 Legislature once again allowed the FLAHIGA assessment credit against premium taxes paid.

Beginning with the 1997 tax year, companies are allowed to take a credit of 0.1 percent of their FLAHIGA assessments paid prior to the 1997 tax year plus a credit of 5.0 percent of assessments paid after the 1996 tax year. These percentage credits may be taken in each year following the payment of the assessment until the full assessment amount has been credited. In 1998, the community contribution tax credit cap was raised to $5 million and raised again to $10 million in 1999. The 2000 tax year introduced many changes in available tax credits. Insurance companies became exempt from the recurring intangibles tax, which meant intangibles tax credit was no longer available. An investment in Capital Companies (CAPCO'S) provided a tax credit limited to $15 million for all companies per year. Investments in approved projects under s. 220.19(2) F.S., the Capital Investment Tax Credit, became available against the insurance premium tax. The Child Care Credit under s. 624.5107, F.S., also became available to insurance companies to take against their premium taxes or corporate income taxes.

The 2004 Legislature passed four laws which impacted the insurance premium tax. Chapter 2004-27, L.O.F. (SB 2488), increased the potential one-year Florida Hurricane Catastrophe Fund (FHCF) assessment from 4 percent to 6 percent. The FHCF multiple years' aggregate assessment limit was also raised from 6 percent to 10 percent. This law also provided for an emergency assessment exemption from the insurance premium tax. Chapter 2004-370, L.O.F. (SB 2038), eliminated a $10 fee required under s. 627.849, F.S., to file forms with the Department of Financial Services regarding insurance premium finance companies. This law and Chapter 2004-390, L.O.F. (SB 2994), provided that any local government workers' compensation self-insurance fund created after October 1, 2004, is subject to the requirements placed on a commercial fund for five years and must pay the insurance premium tax. Chapter 2004-266, L.O.F. (HB 1251), exempted the Florida Workers' Compensation Joint Underwriting Association from the premium tax and from paying assessments under ss. 440.49 and 440.51, F.S.

The 2005 Legislature passed Chapter 2005-280, L.O.F. (HB 1813) allowing foreign insurers to exclude the fraction of their salary tax credit when calculating retaliatory tax. This law also allows for mutual insurance holding companies meeting certain criteria to allocate the salaries of employees of a service company subsidiary among the insurance companies within the group that the employee services, although funding was vetoed. This law also provided that community contributions tax credits will not increase retaliatory tax owed by an insurer. Chapter 2005-94, L.O.F. (HB 105), exempted insurers domiciled outside the U.S. from the requirement that the insurer obtain a certificate of authority to operate from offices within Florida for transactions involving life and annuity contracts sold to non-residents of the United States. Chapter 2005-205, L.O.F. (HB 1159), provided that any municipality that has entered into an inter-local agreement to provide fire protection services to any other incorporated municipality may be eligible to receive the 1.85 percent excise tax reported for such other municipality. In order to be eligible to receive the premium taxes, the municipality providing the fire services must notify the Division of Retirement that it has entered into an inter-local agreement with another municipality. The municipality receiving the fire services is authorized to enact an ordinance levying the tax.

Chapter 2006-55, L.O.F. (SB 2728), allowed certain salary credits to be transferred to a member of an affiliated group. Chapter 2009-97, L.O.F. (SB 538), adjusted the boundaries of a special fire district to include an area that has been annexed until the completion of the four-year period provided in s.171.093(4), F.S., or when a special fire district is providing services pursuant to an inter-local agreement. It also allowed any participating municipality that provides police protection services to other incorporated municipalities for 12 months or more, pursuant to an inter-local agreement, to receive 0.85 percent excise tax in the other incorporated municipality. Chapter 2009-108, L.O.F. (HB 453), permitted the scholarship tax credit to be taken against the insurance tax; this credit does not impact on the retaliatory tax under the insurance premium tax. Chapter 2009-50, L.O.F. (HB 485), created a credit for long-term debt security in low-income communities. The credit is capped at $20 million per year. No credits are provided for the initial investment or the first anniversary of the initial investment. On the second anniversary of the investment, there is a 7 percent credit, and an 8 percent credit for each of the third, fourth, fifth, and sixth anniversaries. If a taxpayer's state tax liability is below the available tax credit, then the unused tax credit may be carried forward for future taxable years; however, all tax credits expire December 31, 2022. The tax credits are allocated on a first-come, first-serve basis.

Chapter 2010-49, L.O.F. (HB 159), amended s. 631.57, F.S., such that neither emergency assessments nor regular assessments of the FIGA will be part of premiums subject to the insurance premium tax. Chapter 2012-32, L.O.F. (HB 7087), increased the lifetime cap of New Market Credits from $97.5 million to $163.8 million, and the annual cap from $20 million to $33.6 million. Chapter 2013-42, L.O.F. (SB 406) increased the lifetime cap of New Market Credits from $163.8 million to $178.8 million, and the annual cap from $33.6 million to $36.6 million. Chapter 2014-38, L.O.F. (HB 5601) increased the lifetime cap of New Market Credits from $178.8 million to $216.34 million.

Chapter 2021-193, L.O.F. (HB 3) establishes the New Worlds Reading Initiative Tax Credit which can be taken against the Insurance Premium Tax. Chapter 2021-31, L.O.F. (HB 7061) establishes the Strong Families Tax Credit which can also be taken against the Insurance Premium Tax. Chapter 2023-17, L.O.F. (SB 102) allows the Live Local Program tax credits to be taken against the Insurance Premium Tax. Finally, Chapter 2024-158, L.O.F. (HB 7073) provided a temporary residential coverage reduction of 1.75% off the premium. This deduction applies to policies that provide coverage for a 12-month period with an effective date between October 1, 2024 and September 30, 2025.

BASE AND RATE:
Premium Tax: Premium tax is applied to insurance premiums written in Florida at the following rates: gross property and casualty premiums less reinsurance and returned premiums, life premiums, accident and health premiums, and prepaid limited health premiums, 1.75 percent; commercial self-insurance, group self-insurance, medical malpractice self-insurance, and assessable mutual insurance, 1.6 percent; and annuities, 1 percent. Corporate income tax and the emergency excise tax paid to Florida are credited against premium tax liability. Exemptions are allowed on annuity premiums paid by annuity policy or contract holders in this state if the savings are passed on to the consumer. A credit is allowed against the premium tax equal to 15 percent of the amount paid by the insurer in salaries to employees located or based in Florida who are covered by unemployment compensation. This credit in combination with the corporate income tax credit may not exceed 65 percent of the tax due for the calendar year.

Credits are also allowed for the municipal pension fund taxes, certain community contributions, certain exempt finance corporate investments, and workers' compensation assessments.

Surcharge: $2 surcharge imposed on every homeowner's, mobile homeowner's, tenant homeowner's, and condominium unit owner's policy; $4 surcharge imposed on every commercial unit fire, commercial multiple perils, and business owner's property insurance policy, issued on or after May 1, 1993, pursuant to s. 252.372, F.S.

# INSURANCE PREMIUM TAX

DISPOSITION:
Premium Tax: Assessments for Police and Firefighter pension funds are sent to the Department of Financial Services for distribution to local governments. Fire Marshal assessments, filing fees and $125,000 annually, adjusted by the lesser of 20 percent or the growth in total retaliatory taxes, are deposited into the Insurance Regulatory Trust Fund. The remainder of the premium tax is deposited into General Revenue.

Surcharge: Emergency Management, Preparedness, and Assistance Trust Fund, which is administered by the Division of Emergency Management.

OTHER STATES:
Premium taxes are imposed in most states and in the District of Columbia on one or more types of insurance companies, usually in the form of excise or privilege taxes. In many states, premium taxes are in lieu of other taxes, except local property taxes. Rates for domestic companies range from 0.4 percent to 4.265 percent, with the average rate for all states being around 2 percent. All insurance taxes are complicated by retaliatory taxes which nearly every state levies under some circumstances.

# INSURANCE SURPLUS LINES AND INDEPENDENTLY PROCURED INSURANCE TAX

FLORIDA STATUTES: Sections 626.932 and 626.938

ADMINISTERED BY: Department of Financial Services

SUMMARY:
Taxes are imposed on surplus lines premiums and independently procured coverage at 4.94 percent and paid by surplus lines companies.

REVENUE:

| Receipts | | | Distributions | |
|---|---|---|---|---|
| Fiscal Year | Total Collections | Annual Change % | General Revenue | Insurance Regulatory Trust Fund |
| 2026-27* | 906,700,000 | 5.00% | 826,900,000 | 79,800,000 |
| 2025-26* | 863,500,000 | 5.39% | 787,500,000 | 76,000,000 |
| 2024-25 | 819,300,000 | 8.06% | 747,197,686 | 72,102,314 |

| 2020-21 | 376,952,992 | 16.14% | 344,833,221 | 32,119,771 |

* Estimate

HISTORY:
Before 1990, the tax on surplus lines and independently procured insurance was levied at 3 percent. In 1990, this tax was raised to 5 percent. In 2020, the surplus lines tax was reduced to 4.94 percent.

Chapter 2003-395, L.O.F. (HB 1059), changed the distribution of the tax on surplus lines and independently procured coverage from 55 percent to the Insurance Regulatory Trust Fund and 45 percent to the General Revenue Fund to 24.3 percent to the Insurance Regulatory Trust Fund and 75.7 percent to General Revenue. Chapter 2004-27, L.O.F. (SB 2488), made surplus lines insurance policies subject to Florida Hurricane Catastrophe Fund assessments. Chapter 2008-132, L.O.F. (HB 5043), changed the distribution of the Surplus Lines Tax between the General Revenue Fund and the Insurance Regulatory Trust Fund by increasing the percentage deposited into the General Revenue Fund, from 75.7 percent to 84.26 percent. The remainder is deposited into the Insurance Regulatory Trust Fund. Chapter 2009-70, L.O.F. (SB 1758), redirected 100 percent of the Surplus Lines Tax, Independent Procured Coverage Tax, and Risk Retention Group Tax to the General Revenue Fund. The redistribution of 100 percent of tax proceeds to General Revenue expired July 1, 2014, and in Fiscal Year 2014-15, the distribution of tax proceeds changed to the distribution mechanism specified in Chapter 2014-60, L.O.F. (HB 5403), (i.e., 8.8 percent to the Insurance Regulatory Trust Fund and 91.2 percent to the General Revenue Fund).

Chapter 2011-46, L.O.F. (SB 1816), authorized the Department of Financial Services and the Office of Insurance Regulation to enter into a cooperative reciprocal agreement with other states to collect and allocate non-admitted insurance taxes for multistate policies pursuant to the NRRA. It also changed the tax base from the portion of the premium that is properly allocable to risks located in Florida to the entire gross premium if Florida is the insured's "home state" as defined in the Nonadmitted and Reinsurance Reform Act (NRRA) of 2010 (passed by the 111th U.S. Congress).

Chapter 2020-10, L.O.F. (HB 7097), modified the existing 5.0 percent rate to 4.94 percent. Additionally, surplus line policies with partial exposure in this state and Florida as the home state are to be taxed in

accordance with F.S. 626.932(1) – eliminating the variable rate linked to the location of the risk exposure. The bill also required the agent to report the total premium for the risk that is located in this state and the total premium for the risk that is outside this state to the Florida Surplus Lines Service Office in the manner and form directed by the Office.

BASE AND RATE:
Surplus lines and independently procured insurance: 4.94 percent.

DISPOSITION:
From Fiscal Year 2009-10 through Fiscal Year 2013-14, the tax on surplus lines and independently procured coverage was distributed 100 percent to the General Revenue Fund. Starting July 1, 2014, the tax proceeds are distributed 8.8 percent to the Insurance Regulatory Trust Fund and 91.2 percent to the General Revenue Fund.

OTHER STATES:
Surplus lines premium and independently procured coverage taxes are imposed in most states. Taxes imposed vary considerably from state to state, with a range from 1 percent to 6 percent.

# INTANGIBLES TAX

FLORIDA STATUTES: Chapter 199, Section 196.199(2)

ADMINISTERED BY: Department of Revenue

SUMMARY:
The Florida Constitution prohibits the state from levying property tax on real estate or tangible personal property but allows a state tax on intangible personal property. The maximum rate allowed is 2 mills (1 mill = .1 cent or $.001; also expressed as $1 per $1,000 or .1 percent). All other taxes based on property value are reserved for local governments. Obligations secured by liens on Florida realty are taxed at 2 mills at the time they are recorded, and revenue from this source goes to the General Revenue Fund. Leasehold interests in property owned by certain governmental units but used by nongovernmental lessees are taxed as intangible personal property if the lessee does not serve or perform a governmental or municipal function or public purpose. Revenue from the tax on leasehold interests is distributed directly to local school boards.

REVENUE:

| Fiscal Year | Total Collections | Annual Change % | Obligations Secured by Liens on Florida Realty | General Revenue Distribution |
|---|---|---|---|---|
| 2026-27* | 529,500,000 | 2.68% | 529,500,000 | 529,500,000 |
| 2025-26* | 515,700,000 | 2.55% | 515,700,000 | 515,700,000 |
| 2024-25 | 502,870,591 | 13.15% | 502,870,591 | 502,870,591 |
| 2023-24 | 444,415,584 | -15.45% | 444,415,584 | 444,415,584 |
| 2022-23 | 525,637,706 | -38.02% | 525,637,706 | 525,637,706 |
| 2021-22 | 848,018,090 | 20.88% | 848,018,090 | 848,018,090 |
| 2020-21 | 701,556,369 | 42.32% | 701,556,369 | 701,556,369 |

* Estimate

HISTORY:
Prior to 1924, there was no constitutional distinction between intangible property and other property, and all property was subject to ad valorem taxation. The Florida Constitution was amended in 1924 to allow a special tax rate for intangible property, and in 1931 this provision was enacted into law. The 2 mill tax was assessed and collected at the county level, and was deposited in the state's General Revenue Fund. In 1941 intangibles tax revenue was used to fund county tax assessors and collectors, and revenue not needed for these purposes was divided between General Revenue (75 percent) and the county where collected (25 percent). Tax rates were changed to 1 mill on stocks and bonds, 3 mills on mortgages, and 1/20 mill on money.

In 1951, the tax rate on mortgages was reduced to 2 mills and in 1955 the disposition of intangibles tax revenue was changed to pay for retirement of state and county officers and employees, with the balance going to General Revenue. In 1957, the tax on stocks and bonds was raised to 2 mills. In 1961, the Legislature passed a two-year phased reduction to 1 mill.

In 1967, 55 percent of net collections was shared with counties where the revenues were collected. The Department of Revenue began assessing and collecting the tax in 1971 and the tax on money was repealed. The Revenue Sharing Act of 1972 (Chapter 72-360, L.O.F., (SB 2-F)) channeled the counties' 55 percent share through a revenue- sharing formula. In 1974, a $20,000 exemption against the annual tax was created for each taxpayer and spouse.

Several changes were made to the intangibles tax in 1990. The annual tax rate was increased from 1 mill to 1.5 mills. An additional exemption entitled natural persons to exempt the first $100,000 from the 0.5 mill increase. The tax base was broadened to include interests in limited partnerships registered with the SEC. Charitable trusts that distribute 95 percent of their income to organizations exempt from federal income tax under s. 501(c)(3) of the I.R.C. were made exempt from the additional 0.5 mill levy. The credit that banks can take against the corporate income tax for intangible taxes paid was raised from 40 percent to 65 percent of corporate taxes due and banks were guaranteed the higher of this credit or a credit equal to 33 percent of their intangible tax liability. The distribution was changed in 1990 from 55 percent to 41.3 percent to the Revenue Sharing Trust Fund for Counties and from 45 percent to 58.7 percent to the General Revenue Fund.

In 1992, the tax on intangible personal property was increased from 1.5 mills to 2 mills. Banks and savings associations were made exempt from 0.5 mill. The exemption of the first $100,000 for individuals and $200,000 per couple and the exemption for charitable trusts applied to the additional 0.5 mill increase. The intangibles tax distribution was changed from 41.3 percent to 33.5 percent to the Revenue Sharing Trust Fund for Counties and from 58.7 percent to 66.5 percent to the General Revenue Fund.

In 1998, the Legislature made several significant changes to the intangibles tax: the minimum amount of tax due before a return and payment is required was raised from $5 to $60 dollars; one-third of accounts receivable was exempted from the intangibles tax beginning January 1, 1999, and the act expressed the intent of the Legislature to increase the exempt amount to two-thirds on January 1, 2000, and to completely exempt accounts receivable on January 1, 2001. The penalties for late payment and late filing were limited to a total of 10 percent per month and 50 percent of the total tax due. The penalty for under reporting and undervaluation was reduced from 30 percent to 10 percent; and banks, savings associations, as defined in s. 220.62, F.S., and insurers, as defined in s. 624.03, F.S., were exempted from intangibles tax. The distribution rate was changed to 35.3 percent for the Revenue Sharing Trust Fund for Counties for Fiscal Year 1998-1999 and to 37.7 percent for Fiscal Year 1999-00. (Chapter 98-132, L.O.F. (HB 1450)).

In 1999, the Legislature reduced the annual tax on intangible assets to a 1.5 mill tax rate and increased the exemption for accounts receivable to two-thirds. The law also provided that limited liability companies may file consolidated intangibles tax returns. Certain charitable trusts were fully exempted from the annual tax, the calculation of tax on future advances was changed, and an exemption for unit investment trusts was provided (Chapter 99-242 (SB 318) and Chapter 99-274, L.O. F. (SB 2496)). The next year, Chapter 2000-173, L.O.F. (HB 67/187), reduced the annual tax rate to 1 mill and fully exempted accounts receivable from the tax. It revised the treatment of Florida trusts, relieving Florida trustees of paying intangibles tax on trust assets and provided that a Florida resident with a beneficial interest in a trust is responsible for reporting his or her share of trust assets and paying intangibles tax on it. The law also repealed the distribution of intangibles tax to counties and replaced the revenue with a sales tax distribution.

Chapter 2001-225, L.O.F. (HB 21), increased the exemption against the annual tax to $250,000 for each natural taxpayer or $500,000 for husband and wife filing jointly, and created a $250,000 exemption for all other taxpayers, mainly businesses. However, these changes were postponed until the 2004 tax year during Special Session C in December 2001. Chapter 2004-234, L.O.F. (SB 2644), provided that all proceeds of the intangibles tax are deposited in the General Revenue Fund, except for revenue collected pursuant to the tax on governmental leaseholds, which is returned to the local school boards in the counties where the leasehold property is located. In 2005, the Legislature reduced the annual tax on intangible assets from 1 mill to 0.5 mill. Chapter 2006-312, L.O.F. (HB 209), repealed the annual tax on intangible personal property, effective January 1, 2007. The non-recurring tax imposed upon obligations secured by liens on Florida property and the 0.5 mill annual tax imposed on government leaseholds were not affected by this repeal.

# INTANGIBLES TAX

Chapter 2012-32, L.O.F. (HB 7087), exempted governmental leaseholds from intangibles tax when the lessee serves or performs a governmental, municipal, or public purpose or function.

Chapter 2023-157, L.O.F. (HB 7063), specified that when the principal balance of a note or mortgage is increased, which note or mortgage is part of an interim loan for purposes of debenture guarantee funding upon which documentary stamp tax has previously been paid and the Small Business Administration is the obligee or mortgagee, additional tax is owed only on the increased amount above the current principal balance.

BASE AND RATE:
A 2 mill one-time tax is imposed on obligations for the payment of money secured by liens on Florida real property. An annual 0.5 mill tax is imposed on non-exempt governmental leaseholds.

DISPOSITION:
All intangibles tax revenue is deposited into the General Revenue Fund, except for revenue collected pursuant to the tax on governmental leaseholds, which is returned to the local school boards in the counties where the leasehold property is located.

OTHER STATES:
Alabama, Kentucky, Louisiana, Mississippi, Oregon, Pennsylvania, South Dakota, Tennessee, Texas, and Wyoming impose limited state or local taxes on certain intangible assets or dealers of intangible assets. Property subject to tax in these states may be different from property subject to tax in Florida.

| | 2026-27 (Millions) |
|---|---|
| VALUE OF RATE CHANGE: | |
| Value of .5 mill levy on stocks, bonds, notes, etc.* | $709.13 |
| Value of 1 mill levy on liens secured by Florida realty* | $264.75 |
| | |
| VALUE OF EXEMPTIONS and DIFFERENTIALS: | |
| Exemption for credit unions from state and local taxes (s. 213.12(2), F.S.) | Indeterminate |
| Exemption for property owned by the state or by religious, educational, or charitable institutions (s. 199.183, F.S.) | Indeterminate |
| Small Business Administration “504” Loans (s. 199.145, F.S.) | Insignificant |

| Government leasehold collections (s. 199.292(1), F.S.) | $0.8 |

* Article VII, section 2 of the Florida Constitution states that the tax rate for both the recurring and non-recurring tax on intangible personal property cannot exceed 2 mills.

# INTERGOVERNMENTAL AID

FLORIDA STATUTES: 215.32(2)(b)

ADMINISTERED BY: Various agencies

SUMMARY:
Approximately 31 percent of total direct revenue received by the state in Fiscal Year 2024-25 was federally funded. Health and Human Services grants make up the majority of this funding and are located in the following agencies/departments: Children and Families, Health, Agency for Health Care Administration, and the Agency for Persons with Disabilities.

REVENUE:

| Fiscal Year | Collections | Annual Change % | Federal Grants | County and City Grants | Other Assistance and Donations Grants |
|---|---|---|---|---|---|
| 2026-27* | 38,592,225,171 | 2.38% | 38,300,558,569 | 98,742,227 | 192,924,375 |
| 2025-26* | 37,694,134,763 | 2.59% | 37,406,275,959 | 97,453,117 | 190,405,688 |
| 2024-25 | 36,742,634,439 | -12.67% | 35,365,186,474 | 96,280,335 | 1,281,167,630 |
| 2023-24 | 42,071,305,146 | -3.52% | 41,568,004,350 | 90,861,297 | 412,439,498 |
| 2022-23 | 43,604,096,890 | 4.85% | 43,124,998,225 | 92,361,162 | 386,737,503 |
| 2021-22 | 41,588,698,043 | -25.41% | 39,840,830,452 | 121,945,108 | 1,625,922,482 |
| 2020-21 | 55,759,947,899 | 54.21% | 54,509,917,827 | 129,359,235 | 1,120,670,837 |

* Estimate

Note: Fiscal Year 2019-20 through Fiscal Year 2024-25 includes Federal Grants funding for various acts related to the Covid pandemic. Fiscal Year 2025-26 through Fiscal Year 2026-27 includes projected funds anticipated from the Congressional Infrastructure Investment and Jobs Act.

HISTORY:
Intergovernmental Aid is a combination of three types of grant funding: County and city grants, federal government grants, and other assistance and donations grants. In FY 2024-25, Intergovernmental Aid made up 28.6 percent of total direct revenue to the state. From FY 1970-71 through FY 2024-25 this funding category averaged 26.4 percent of total direct revenue to the state with a 8.9 percent average annual growth rate.

Federal government grant funds are received from many different federal agencies for the purpose of providing support services to a variety of clients, supporting regulatory activities of the state's various departments, and for other such purposes as may be appropriate. The state's various agencies receive the funds through the federal government grant award process, either directly from the awarding federal agency or through transfers from another state agency. The grants are used for specific purposes in accordance with the directives of the grant.

The state receives county and city grant funds from Boards of County Commissioners, County Health Care Taxing Districts, County School Boards, and various other levels of county or city governments. These funds are generally provided to fund activities appropriate to the services being provided. In addition, the local governments may request that the state provide specific services and enter into agreements related to these specific services.

Other assistance and donations grants are received from various foundations and non-profit organizations for the purpose of providing specific services as directed by the grant or donation, and as matching funds for various services.

BASE AND RATE:
Various matching formulas or maintenance of effort requirements are program-specific. Matching funds required for federal aid may vary from zero to 100 percent.

DISPOSITION:
Various Agency Trust Funds (earmarked accounts appropriate to the purpose of each type of aid received).

OTHER STATES:
All states receive similar types of grant funding at a variety of levels. Federal government grant funding levels are generally guided by population statistics, programmatic considerations, or based on defined need.

FLORIDA STATUTES: Chapter 24

ADMINISTERED BY: Department of Lottery

SUMMARY:
The Department of Lottery operates both instant ticket games and terminal games. In addition to ticket sales, a relatively small portion of Lottery proceeds is generated from interest earnings, terminal fees, retailer fees, and unclaimed prize money. After prizes and administrative expenses are paid from total collections, the remainder is deposited into the Educational Enhancement Trust Fund (EETF).

REVENUE:

| Fiscal Year | Ticket Sales/Other Income | Annual Change % | DOL Distributions to Educational Enhancement Trust Fund** |
|---|---|---|---|
| 2026-27* | 9,341,700,000 | 0.57% | 2,169,600,000 |
| 2025-26* | 9,288,600,000 | 1.33% | 2,126,300,000 |
| 2024-25 | 9,166,400,000 | -2.95% | 2,168,000,000 |
| 2023-24 | 9,444,600,000 | -3.79% | 2,403,000,000 |
| 2022-23 | 9,816,900,000 | 5.16% | 2,374,000,000 |
| 2021-22 | 9,335,200,000 | 2.69% | 2,382,000,000 |
| 2020-21 | 9,091,000,000 | 20.80% | 2,246,000,000 |

* Estimate
**Beginning in Fiscal Year 2012-13, estimates reflect actual cash transfers to the EETF, rather than weekly sales as previously estimated, because there is a delay in the transfer of weekly sales receipts to the EETF of up to two weeks.

HISTORY:
In November 1986, voters approved an amendment to the Florida Constitution (Article X, Section 1) providing for a state-operated lottery. The Department of Lottery was created during the 1987 Regular Legislative Session, and the state lottery officially began selling tickets on January 12, 1988. Beginning July 1989, the allocation for education was increased from the original 35 percent to 37.5 percent and increased again to 38 percent in July 1990. During the 2002 Regular Session, the Legislature authorized the Department of Lottery to determine a variable percentage of revenue from instant tickets to return to players as prizes, removing the requirement that 38 percent of instant game sales be transferred to the EETF. In the following year, the Legislature increased the allocation for education from 38 percent to 39 percent for terminal games. However, in 2005, the terminal game prize and education allocations were made variable as well. The Lottery determines prize percentages that maximize education funding.

In 2003, the Legislature eliminated the $180 million cap on money used from the EETF for bonding, and removed designated transfers going to the Classroom First program. During Special Session E, Chapter 2003-426, L.O.F. (HB 43-E), transferred $30,147,947 of unclaimed lottery prize money to the EETF.

During the 2005 Regular Session, Chapter 2005-84, L.O.F. (HB 840) required 80 percent of unclaimed lottery prize money to be deposited in the EETF and the remaining 20 percent to be added to the pool for future prizes or special prize promotions. The bill also authorized the department to establish variable percentages for terminal games prize payouts and transfers to the EETF, as noted above.

Two bills related to the Lottery were passed during the 2006 and 2007 sessions. Chapter 2006-278, L.O.F. (HB 755), narrowed the standard of review for administrative law judges when considering protests of the

Lottery's competitive procurement actions. The Lottery expected this legislation to reduce agency costs over the long term. Chapter 2007-128, L.O.F. (SB 1376), added the authority to obtain patents to the Lottery's existing ability to hold copyrights, trademarks, and service marks.

The Legislature appropriated funds for Instant Ticket Vending Machines (ITVMs) during the 2009 and 2010 Legislative Sessions. Funds appropriated for the first year were sufficient to lease and install 1,000 ITVMs, primarily in the largest grocery chains in the state. Locations with ITVMs showed net gains in sales exceeding forecasted impacts in Fiscal Year 2009-10. During the 2010 Legislative Session, the Lottery was given a specific appropriation allowing the department to lease and install an additional 500 machines. Installation of these machines in additional grocery chain stores and selected, high-volume convenience stores was completed by January 2011.

Initially, lottery vending machines in Florida could dispense only instant tickets. However, in 2012, Chapter 2012-130, L.O.F. (HB 843), authorized the use of Full Service Vending Machines (FSVMs) in Florida which allows tickets for both instant and terminal games to be purchased at these machines. In Fiscal Year 2012-13 the Lottery was able to activate and place 500 FSVMs and to redeploy the ITVMs to new locations. As of December 2025, all the machines in the department's inventory function as FSVMs. In total, 3,000 of those machines are actively selling throughout the Florida Lottery's retailer network.

BASE AND RATE:
Variable based on the game, but not established by statute. In Fiscal Year 2024-25, approximately 68.9 percent of Lottery ticket sales were spent on prizes, 6.06 percent on retailer compensation, 1.57 percent on vendor fees, and 1.2 percent on operational costs, leaving 22.3 percent for transfer to the EETF.

DISPOSITION:
Total collections are distributed as follows: variable percentages, as determined by the department, of the gross revenue from the sale of terminal and instant lottery tickets are returned to Lottery players as prizes. The next portion of the proceeds is used to compensate the more than 13,500 Lottery retailers around the state that sold the tickets. A third portion of the proceeds is used for operational costs including payments to vendors, advertising and promotional expenses, and administrative expenses of the department. The spending authority for operating costs is appropriated through the legislative budget process. Revenues from ticket sales remaining after payment of prizes, retailer fees and department operating expenses are transferred to the EETF. Following an annual financial audit, any unencumbered balance which remains in the Operating Trust Fund at the end of each fiscal year is also transferred to the EETF.

OTHER STATES:
Currently, 45 states and the District of Columbia are authorized to operate state lotteries. Forty-three of these states and the District of Columbia operate both instant ticket games and terminal games. North Dakota and Wyoming only operate terminal games. According to La Fleur's 2025 World Lottery Almanac, Florida ranked first in total traditional sales and seventh in per capita sales among U.S. lotteries. In regard to transfers to government, the Florida Lottery ranked second. For instant ticket sales, Florida was number two behind Texas.

VALUE OF RATE CHANGE:
The Lottery has had the authority to vary the prize payout and EETF transfer rates since 2002 for instant games and since 2005 for terminal games. According to the Department of Lottery, prize payout and EETF transfer rates have been at or near their optimal levels for maximizing EETF since then, and further gains solely from rate changes are likely to be limited.

VALUE OF REFUNDS AND ALLOWANCES:
The Lottery has a statewide network of 13,500 plus retailers selling lottery games and cashing winning tickets. These retailers are compensated for providing these services and for marketing lottery games through point-of-sale materials and special promotions. Up until Fiscal Year 2022-23, retailers received a 5 percent commission on ticket sales and a 1 percent cashing bonus on the value of prizes redeemed at

that retailer location; total commission was represented by a blended 5.6 percent rate of lottery sales, which intuitively meant that retailers only took advantage of the 1% cashing bonus 60% of the time. In Fiscal Year 2021-22, these commissions and cashing bonuses totaled $522 million, which is consistent with 5.6 percent of ticket sales. In FY 2022-23, these retailer commissions were increased to 5.75% which totaled approximately $570 million. In FY 2023-24, the commission rate increased to 6% and the end of year commissions totaled $571 million. In FY 2024-25, the retailer commission rate was 6% and the preliminary end of year commissions totaled $553 million. In FY 2025-26 the projected commission rate is 6%. The projected retailer commissions based on the projected ticket sales of $9.3 billion is anticipated to be $558 million.

In addition, the Lottery is authorized to spend money on retailer incentives aimed at encouraging greater sales. Typically, the launch of a new or especially important game or promotion is accompanied by a retailer incentive, for example, paying a higher sales commission for the new product for a limited time. The Lottery is appropriated a fixed amount of $2.325 million to spend on such incentive programs.

# MOTOR FUEL & DIESEL FUEL TAXES

FLORIDA STATUTES: Chapter 206, Section 212.0501, F.S.

ADMINISTERED BY: Department of Revenue

SUMMARY:
Motor fuel and diesel fuel are subject to state taxation pursuant to Chapter 206, and s. 212.0501, F.S. For 2021, the combined state tax rate was 26.5 cents per gallon.

State taxes include:
Fuel Sales Tax (17.5 cents per gallon, indexed annually by the Consumer Price Index)
State Comprehensive Enhanced Transportation System (SCETS) Tax (9.7 cents per gallon, indexed annually by the Consumer Price Index)
Constitutional Fuel Tax (2 cents per gallon)
County Fuel Tax (1 cent per gallon)
Municipal Fuel Tax (1 cent per gallon)
Non-Highway Fuels (6 percent of the retail price)
Aviation Fuel (4.27 cents per gallon, certain carriers are eligible for a credit or refund of the tax)
(Federal and local option taxes are also levied on motor fuel and diesel fuel. Local option fuel taxes are described in section III, Major Local Government Revenue Sources)

** These figures represent gross collections and include refunds, service charges, administrative costs, and collection allowances. The totals by fuel type will not equal Total Collections due to penalties, interest, and other adjustments.

*** Fiscal year 2022-23 is reduced for the motor fuel tax holiday per Ch. 2022-97 s.47.

HISTORY:

Florida began taxing gasoline in 1921. Starting with a rate of 1 cent per gallon, Florida had a series of rate increases until it was set at 7 cents in 1931. In 1939, similar taxation of special motor fuels was provided

(Chapter 206, Part II, F.S.). The rate was increased to 8 cents per gallon in 1971. With enactment of Revenue Sharing in 1972, all 8th cent proceeds were allocated to cities through the Revenue Sharing Trust Fund. In 1980, a five-year exemption was granted from the first gas tax for gasohol and beginning July 1, 1980, to July 1983, gasohol was granted an exemption from the 7th cent tax. The legislation provided that the exemption would be reduced to only 2 cents of the first gas tax in 1985 and then would be totally removed in 1987. The Special Fuel Use Tax was created in 1980.

In 1983, the Legislature repealed the sales tax exemption on motor and special fuels and repealed the "First Gas Tax" of 4 cents per gallon. The 4 cents per gallon tax was replaced with a 5 percent sales tax on all motor and special fuels and aviation fuel sold in Florida. In 1984, the term "alternative fuels" was created to include fuels previously defined as "special fuels." Instead of being subject to the special fuels tax, these "alternative fuels" were made subject to fees as outlined in s. 206.87(7), F.S. The fees collected pursuant to s. 206.87(7), F.S., were deposited into the newly created State Alternative Fuel User Fee Clearing Trust Fund and the Local Alternative Fuel User Fee Clearing Trust Fund.

Aviation fuel was exempt from the state sales tax in 1985. Part III of Chapter 206, F.S., was created, which imposed an excise tax of 5.7 cents per gallon on aviation fuel and which exempted aviation fuel from the County Voted l-cent Gas Tax, the County 1-6 cents Local Option Gas Tax, and the County 1-5 cents Local Option Motor Fuel Tax. All proceeds were deposited in the General Revenue Fund. In 1986, the proceeds from the aviation fuel tax, less service charges and refunds, were redirected for distribution to the State Transportation Trust Fund from the General Revenue Fund. Certain air carriers making an election pursuant to s. 212.0598, F.S., were authorized to use the apportionment formula in s. 212.0598, F.S., for their aviation fuel tax in 1988. The authorization was set to expire July 1, 1989, but was extended by the 1989 and 1990 Legislatures and was scheduled to expire July 1, 1991. In 1990, the sales tax on motor and special fuel was increased from 5 percent to 6 percent and annually adjusted by the change in the average of the Consumer Price Index. The excise tax on aviation fuel was increased from 5.7 cents per gallon to 6.9 cents per gallon. Effective January 1, 1991, the SCETS tax was enacted. The SCETS tax was levied on gasoline in each county levying a local option gas tax at a rate equal to two-thirds of the sum of the county's local option gas taxes, not to exceed 4 cents per gallon. The SCETS tax is annually adjusted by the average of the Consumer Price Index. The equalization of local option fuel taxes on diesel fuel was also adopted. Effective calendar year 1991, the local option tax rate on diesel cannot be lower than 4 cents per gallon; in 1992, 5 cents per gallon; and in 1993, 6 cents per gallon. Effective calendar year 1994, the local option tax rate on diesel fuel was 7 cents per gallon.

Chapter 94-146, L.O.F. (HB 1317), provided that beginning in Fiscal Year 1997-98, all fuel tax administrative costs incurred by the Department of Revenue would begin to be phased-in over a three-year period, so that by Fiscal Year 1999-00, administrative costs would be deducted proportionally from all fuel taxes, except the Constitutional gas tax.

In 1996, the motor and special fuel tax statutes were rewritten to conform to the federal diesel fuel dyed program. All of the motor and special fuel tax provisions found in Chapters 206, 212, and 336, F.S., were combined into Chapter 206, F.S. The major changes, which took effect July 1, 1996, were as follows: (1) changed the point of collection for state motor fuel and state and local diesel fuel tax from the wholesaler, special fuel dealer, importer, or retailer, to the terminal supplier; (2) changed the point of collection for local option motor fuel tax from the retailer to the wholesaler; (3) provided for the tax-free purchase of dyed diesel fuel by exempt users; and (4) imposed a 6 percent use tax on diesel fuel used for business purposes, upon which Chapter 206, F.S., fuel taxes have not been paid.

Chapter 96-323, L.O.F. (SB 330), provided for a five-year aviation fuel tax credit for air carriers offering transcontinental jet service who meet certain employment criteria. Also, kerosene was defined as aviation fuel and made subject to the 6.9 cents aviation fuel tax. Chapter 97-54, L.O.F. (HB 81), allowed owners of noncommercial vessels to purchase tax-exempt (dyed) diesel fuel provided that such fuel purchases were subject to the 6 percent general sales and use tax. Effective July 1, 1999, 0.65 percent of the fuel sales tax and the SCETS tax revenues on motor fuel are to be deposited into the Agricultural Emergency Eradication Trust Fund.

Effective July 1, 1998, the $1.5 million distribution of fuel tax revenues to the Board of Regents for the Center for Urban Transportation Research was repealed. Effective July 1, 1999, the distribution to the Invasive Plant Control Trust Fund was decreased from $7.55 million to $6.3 million; and the distribution to the Fish and Wildlife Conservation Commission was increased from $1.25 million to $2.5 million.

Effective July 1, 2000, the 7.3 percent General Revenue Service Charge was eliminated on the Fuel Tax Collection Trust Fund. The July 1, 2000, date affected motor fuel and special fuel taxes, fuel use taxes, and off-highway fuel taxes. Effective July 1, 2001, the 7.3 percent General Revenue Service Charge was eliminated on SCETS tax collections. Chapter 2000-266, L.O.F. (SB 772), provided that taxes paid on diesel fuel purchased in Florida and consumed by a qualified motor coach during idle time for the purpose of running climate control systems and maintaining electrical systems is subject to a refund. In 2002, the Legislature reinstated the aviation fuel tax exemption for certain air carriers, which expired July 1, 2001. The 2003 Legislature authorized that a portion of the moneys attributable to the sale of motor fuel and diesel fuel at marinas shall be transferred to the Marine Resources Conservation Trust Fund in the Fish and Wildlife Conservation Commission as follows: $2.5 million in 2003-04; $5.0 million in 2004-05; $8.5 million in 2005-06; $10.9 million in 2006-07; and $13.4 million in 2007-08 and each fiscal year thereafter. The 2004 Legislature enacted the "Florida Motor Fuel Tax Relief Act of 2004." For the month of August 2004, the "Fuel Sales Tax" on motor fuel was reduced by 8 cents a gallon. It was the intent of the Legislature that the 8 cent reduction be passed on to the consumer.

Effective July 1, 2007, a refund of the local option fuel tax, the SCETS tax, and the fuel sales tax was granted for any person who used motor fuel in the operation of aviation ground support vehicles or equipment that were not driven or operated on the public highways of Florida.

The 2022 Legislature enacted the "Motor Fuel Tax Relief Act of 2022" as a part of Ch. 2022-97 s. 47 L.O.F. which reduced the motor fuel sales tax, SCETS tax, municipal fuel tax, and county fuel tax rates to zero from October 1, 2022 through October 31, 2022.

The 2025 Legislature voted to repeal the 4.27-cent-per-gallon excise tax on aviation fuel effective January 1, 2026.

BASE, RATE and DISPOSITION

| Tax on Highway Fuels* | Statutory Authorization | Rate (2021) | Indexed | Disposition*** |
|---|---|---|---|---|
| Fuel Sales Tax | ss. 206.41(1)(g), 206.87(1)(e), 206.606, 206.9955(2)(e), and 212.0501, F.S. | 17.5 cents per gallon | yes | State Transportation Trust Fund |

| Constitutional Fuel Tax | Art. XII, Sec. 9(c), Florida Constitution, ss. 206.41(1)(a), 206.45, 206.47, 336.023, and 336.024, F.S. | 2 cents per gallon | no | Distributed by a formula to meet debt service requirements of local transportation bonds of each county; any surplus funds are distributed to the county. |
| County Fuel Tax | ss. 206.41(1) and 206.60, F.S. | 1 cent per gallon | no | Distributed by a formula to each county. |

| | | | | |
|---|---|---|---|---|
| Municipal Fuel Tax | ss. 206.605(1) and 206.997, F.S. | 1 cent per gallon | no | Municipal Revenue Sharing Trust Fund |

*Non-highway fuels are taxed at 6% of the retail fuel price
**State Comprehensive Enhanced Transportation System
***Detailed information on the disposition of state fuel taxes is available in *Florida's Transportation Tax Sources, A Primer*, published by the Florida Department of Transportation and located at: (https://www.fdot.gov/workprogram)

Large privately-owned vehicles that engage in interstate operations are taxed on fuel use pursuant to the International Fuel Tax Agreement. The tax is calculated by multiplying the number of gallons consumed in this state by the prevailing statewide fuel tax rate of 37.0¢/gallon. Each vehicle must also pay $4 for an identifying decal.

Aviation fuel was taxed at 6.9¢/gallon, pursuant to s. 206.9825, F.S. Certain carriers were eligible for a credit or refund of the tax. As of July 1, 2019, the tax rate dropped to 4.27¢/gallon which has since been eliminated. (Federal and local option taxes are also levied on motor fuel and diesel fuel. Local option fuel taxes are described in section III, Major Local Government Revenue Sources.)

ALLOCATION FORMULAS:
Constitutional and county gas tax: area 25 percent; population 25 percent; collections 50 percent (see Article XII, Sec. 9(c)(4), Florida Constitution). Foregoing subject to debt service requirements established under earlier formula. (see Article IX, Sec. 16(a), Florida Constitution of 1885.)

OTHER STATES:
All states tax motor fuel and diesel fuel. Both motor fuel and diesel fuel state tax rates vary from a low of 9.0 cents per motor fuel gallon (Alaska) to a high of 77.1 cents per diesel gallon (Pennsylvania).

| | 2026-27 (millions) |
|---|---|
| VALUE OF RATE CHANGE: | |

# MOTOR VEHICLE AND MOBILE HOME LICENSES

FLORIDA STATUTES: Chapter 320

ADMINISTERED BY: Department of Highway Safety and Motor Vehicles

SUMMARY:
Motor vehicles and mobile homes must register annually in Florida. License fees for private autos and light trucks range from $14.50 to $32.50 according to vehicle weight. License fees for truck tractors are based on gross vehicle weight and range from $60.75 to $1,322. Mobile home license fees range from $20 to $80 according to length and recreational vehicle license fees are $27 to $47.25 depending on vehicle type and weight.

REVENUE:

| Fiscal Year | Total Collections | Annual Change % | General Revenue | State Trust Fund | Other |
|---|---|---|---|---|---|
| 2026-27* | 1,608,331,223 | 1.30% | 5,400,000 | 1,397,400,000 | 205,531,223 |

* Estimate

HISTORY:
Motor vehicle licensing began in 1905, with one-time registration. In 1917, annual registrations began. By constitutional amendment adopted in 1930, motor vehicles as property were exempted from personal property assessments. Major revisions to the law occurred in 1927, 1931, 1947, and 1975. Re-classification of vehicles was made in 1953, 1959, 1961, 1972, and 1975. In 1963, rates were increased substantially and a transition to fiscal year licensing rather than calendar year was begun. Constitutional earmarking of the amount required to meet fixed capital outlay allocations under the Minimum Foundation Program ("school tag fees") was approved in November 1952, and amended in 1964 and 1972. In 1965, by constitutional amendment, the following were added to the constitutional categories of motor vehicles: mobile homes, house trailers, camper-type mobile homes, and similar equipment. However, if these are permanently attached to the land, they are taxable as real estate. All mobile home license fees above $2.00 went to the school district (50 percent) and county or city (50 percent) in which they were registered. Rates for truck-tractors and semi-trailers were revised in 1973 and 1983. The disposition of revenues was amended in 1977 to distribute, for the first time, 36.5 percent to the State Transportation Trust Fund. By 1985, all revenues remaining after school districts receive first proceeds were transferred into the State Transportation Trust Fund.

A three-tier tag schedule for passenger cars and light trucks was created in 1977, and license fees for those motor vehicles were increased by $2.00 per tag in 1983. In 1984, provisions were made for the issuance of apportioned motor vehicle licenses in accordance with the International Registration Plan. In 1989, a $30 "new-wheels-on-the-road" fee was imposed upon the initial registration of certain automobiles for private use, trucks weighing less than 5,000 pounds, and recreational vehicles, for deposit into the Law Enforcement Trust Fund. In 1990, the $30 “new-wheels-on-the-road” fee was increased to $100, with the additional $70 for deposit into the State Transportation Trust Fund. In 1991, two changes were made. First, the $30 portion of the fee was redirected to the General Revenue Fund in lieu of the Law Enforcement Trust Fund. Second, as an offset to a loan repayment, the entire proceeds of the $100

fee were deposited into the State Transportation Trust Fund for a two-year period between July 1, 1992, and June 30, 1994. In addition, a $295 motor vehicle impact fee on the initial application for registration of certain automobiles for private use, trucks weighing less than 5,000 pounds, and recreational vehicles, was enacted effective July 1, 1990. The revenues from the impact fee were for deposit into the General Revenue Fund. The imposition of the $295 motor vehicle impact fee was changed in 1991 to require payment at the time of original titling of a motor vehicle previously titled outside the state. In 1991, all motor vehicle license tag fees, except mobile homes, included a $2.00 surcharge for deposit into the State Transportation Trust Fund. Also in 1991, a $2.00 motor vehicle license replacement fee was levied on each annual motor vehicle registration, except mobile homes, for deposit into the Motor Vehicle License Replacement Trust Fund.

In 1992, a $0.50 surcharge was levied on all motor vehicle license taxes imposed under s. 320.08, F.S., except for mobile homes, to be deposited into the Florida Motor Vehicle Theft Prevention Trust Fund. During the 1994 legislative session, the $0.50 motor vehicle license fee for deposit into the Transportation Disadvantaged Trust Fund was increased to $1.50, and the temporary tag fee was increased from $1.00 to $2.00. The 1995 Legislature increased the $0.50 motor vehicle theft prevention surcharge to $1.00. Chapter 95-140, L.O.F. (SB 588), repealed s. 319.231, F.S., the $295 vehicle impact fee. Chapter 96-413, L.O.F. (HB 1329), made the following changes to Chapter 320: provided for a $50 semi trailer permanent license plate; provided an exemption from the $100 “new-wheels-on-the-road” tax for ancient or antique cars or trucks for private use and required that a transfer of title between households must be between family members living in the same house in order for such transactions to be exempt from the “new-wheels-on-the-road” tax; increased mobile home sticker fees based on length; and reduced the number of motor vehicles from 1,000 to 250 for a permanent fleet license plate.

Chapter 97-300, L.O.F. (SB 1002), provided the following exemptions from the $100 “new-wheels-on-the-road” tax: for any member of the U.S. Armed Forces, or his or her spouse or dependent child, who was a resident of Florida at the time of enlistment, who purchased a motor vehicle while stationed outside of Florida and who continues to be stationed outside Florida; and for a motor vehicle registration that is being transferred from a vehicle that is not operational, in storage, or will not be operated in Florida. The legislation also provided for a $10 sample license plate and provided for a wrecker license plate, with fees ranging from $87 to $979, according to gross vehicle weight. Chapter 98-324, L.O.F. (HB 3345), required that a wrecker used to tow a vessel must register and pay a license tax based on gross vehicle weight. Chapter 98-202, L.O.F. (SB 1498), allowed disabled persons to apply for a disabled license plate at no fee beyond the regular license tax. The disabled license plate would replace the $13.50 long-term disabled parking placard.

Chapter 99-248, L.O.F. (SB 1270), created an annual $12.50 manufacturer license plate, increased the Challenger license plate use fee from $15 to $25, and reduced the annual fleet license fee from $6.00 to $2.00. Effective July 1, 2001, Chapter 2000-257, L.O.F. (SB 862), eliminated the 7.3 percent General Revenue Service Charge on the $100 “new-wheels-on-the-road” fee. Also, effective July 1, 2005, the entire $100 “new-wheels-on-the-road” fee was deposited into the State Transportation Trust Fund. Chapter 2002-235, L.O.F. (SB 522), required all taxes and fees collected under Chapter 320, F.S., by county officials to be submitted by electronic funds transfer to the State Treasury no later than five working days, instead of seven working days as provided for in Chapter 116, F.S., after the close of the business day in which the funds were received. Chapter 2002-20, L.O.F. (HB 261), eliminated the $13.50 state portion paid for a long term disabled parking placard. Chapter 2003-179, L.O.F. (SB 954), changed the distribution of the $1.00 surcharge imposed per motor vehicle license registration pursuant to s. 320.08046, F.S., by eliminating the 18 percent distribution to the Florida Motor Vehicle Theft Prevention Trust Fund and increasing the General Revenue distribution from 40 percent to 58 percent. Chapter 2004-337, L.O.F. (SB 2020), amended the requirements for requests to establish specialty license plates by requiring a sample license plate that conforms to specifications and increasing from 15,000 to 30,000,

the results of a scientific sample survey of Florida motor vehicle owners that intend to purchase the proposed specialty license plate.

Chapter 2007-242, L.O.F. (HB 275), created the biennial vehicle registration option. Vehicle owners are permitted to pay the vehicle registration taxes in advance for two years and are then issued the appropriate decal for their license plate. The fees for a two-year registration are double that of an annual registration; however, the distribution of the revenue does not actually occur until the year in which it would have normally been collected.

Chapter 2009-71, L.O.F. (SB 1778), changed all fees related to the registration of all motor vehicles. The increased revenues were primarily directed to General Revenue; however, a small portion of the fees are deposited into the Highway Safety Operating Trust Fund.

Chapter 2014-06, L.O.F. (SB 156), lowered registration tax and some ancillary fees for private vehicles and trucks. The decreased revenues were largely limited to portion of the fees directed to General Revenue.

Chapter 2019-43, L.O.F. (SB 7068), redirected the remaining General Revenue portion of base tax fees to the State Transportation Trust Fund. For the 2019-20 fiscal year, $45 million was retained in the State Transportation Trust Fund, with the remaining funds transferred to the General Revenue Fund. For the 2020-21 fiscal year, $90 million was retained in the State Transportation Trust Fund, with the remaining funds transferred to the General Revenue Fund. For the 2021-22 fiscal year and each fiscal year thereafter, all of the funds shall be retained in the State Transportation Trust Fund.

BASE TAX AND RATE:
Passenger cars: $14.50 to $32.50 in three weight classes.
Trucks: $14.50 to $32.50 in three weight classes.
Truck Tractors: $60.25 to $1,322 per vehicle, according to gross vehicle weight: 5001-72,000 lbs.
Semi-Trailers: drawn by a GVW truck tractor by means of a 5$^{th}$ wheel: $13.50 annual or $68 permanent registration.
Trailers for private use: less than 501 lbs, $6.75; 501 lbs or more, $3.50 plus $1.00 per CWT; for hire: less than 2,000 lbs, $3.50 plus $1.50 per CWT; 2000 lbs or more, $13.50 plus $1.50 per CWT.
Wrecker License Plates: $41 flat or $118 to $1,322 according to gross vehicle weight: 10,000-72,000 lbs.
Antique Cars & Trucks: $7.50 flat.
Recreational Vehicles: $27 to $47.25 depending on vehicle type and weight.
Mobile Homes: $20 to $80 in eight groups according to length.
Motorcycles: $10.00 + $2.50 motorcycle safety education fee.
Mopeds: $5.00 + $2.50 motorcycle safety education fee.
Motor Vehicles "for hire": under nine passengers, $17.00 flat plus $1.50 per 100 lbs; nine passengers and over, $17.00 flat plus $2.00 per 100 lbs.
Dealer and Manufacturer License Plates: $17.00 flat.
School Buses: $41 flat.
Temporary Tags: $2.00.
Transporter Tags: $101.25 flat.
Permanent Fleet Tags: $1.50 manufacturing fee, in addition to applicable license tax pursuant to s. 320.08, F.S.
Sample License Plates: $28.00 flat.
Annual Fleet Management Fee: $2.00 flat.

In addition to the license taxes stated above, the following taxes are imposed:

- $1.20 registration surcharge on each annual motor vehicle registration except for mobile homes (see s. 320.0804, F.S.);
- $2.80 motor vehicle license plate replacement fee on each annual motor vehicle registration except for mobile homes (see s. 320.06, F.S.);
- $0.10 on each motor vehicle as defined in s. 320.01, F.S., and on each moped, as defined in s. 316.003(2), F.S. (see s. 320.0801, F.S.) for Emergency Medical Trust Fund;
- $1.00 surcharge on each annual motor vehicle registration except for mobile homes (see s. 320.08046, F.S.) for Grants and Donation Trust Fund in the Department of Juvenile Justice;
- $1.00 surcharge on each annual motor vehicle registration except mobile homes (see s. 320.0802, F.S.) for Law Enforcement Radio Systems Trust Fund;
- $.50 fee on every license registration (see s. 320.03, F.S.) for Florida Real Time Vehicle Information System;
- $1.00 air pollution surcharge (see s. 320.03, F.S.) for Air Pollution Control Trust Fund;
- $1.00 decal fee (see s. 320.04, F.S.);
- $2.50 service fee (see s. 320.04, F.S.);
- $0.50 retro-reflection materials fee (see s. 320.06, F.S.);
- $1.00 mobile home surcharge to be collected only on mobile home registrations (see s. 320.08015, F.S.);
- $1.50 surcharge for transportation disadvantaged;
- $225 on the initial registration of private automobiles and light trucks, except when the person registering the vehicle is replacing a vehicle already registered in Florida.

DISPOSITION:
The first proceeds of motor vehicle base tax are distributed into the District Capital Outlay and Debt Service Trust Fund (Article XII, Sec. 9(d), Florida Constitution) with the remaining distributed to the State Transportation Trust Fund and General Revenue (through the 2020-2021 fiscal year); mobile home licenses to local governments except for $1.50 per tag which goes into the General Revenue Fund; $0.50 to repay costs of the retro-reflective tag feature (deposited into the Highway Safety Operating Trust Fund (HSOTF)); $0.50 into the HSOTF to cover the costs of the Florida Real Time Vehicle Information System; $1.00 into the HSOTF to cover the cost of decals; $1.00 for the Air Pollution Control Trust Fund; $1.50 for the Transportation Disadvantaged Trust Fund; $2.50 motorcycle safety education fee for deposit into the HSOTF; $0.10 per motor vehicle and moped registration for deposit into the Emergency Medical Service Trust Fund; $1.00 surcharge on each annual motor vehicle registration (except mobile homes) for deposit into the State Agency Law Enforcement Radio System Trust Fund; $1.20 motor vehicle license surcharge on each annual motor vehicle registration except mobile homes($1 is deposited into the State Transportation Trust Fund and $0.20 is deposited in HSOTF); $2.80 motor vehicle license replacement fee on each annual motor vehicle registration except mobile homes for deposit into the HSOTF; $1.00 surcharge on each annual motor vehicle registration except mobile homes deposited into the Grants and Donations Trust Fund in the Department of Juvenile Justice to fund the community juvenile justice partnership grants program; and $1.00 to the Mobile Home Relocation Trust Fund and only charged on mobile home registrations.

Effective July 1, 2005, 100 percent of the “new-wheels-on-the-road” fee was deposited into the State Transportation Trust Fund. Prior to Fiscal Year 2005-06, $30 of the “new-wheels-on-the-road” fee was deposited into the General Revenue Fund and the remaining $70, less the General Revenue Service Charge, was deposited into the State Transportation Trust Fund. (Effective July 1, 2001, the 7.3 percent General Revenue Service Charge was eliminated on the $100 “new-wheels-on-the-road” fee.) Effective

September 1, 2009, the "new-wheels-on-the-road" fee was raised to $225 with 44.5 percent deposited into the State Transportation Trust Fund and 55.5 percent deposited into General Revenue. Effective September 1, 2014, 44.5 percent of the "new-wheels-on-the-road" fee is deposited into the State Transportation Trust Fund, 41.2 percent is deposited into General Revenue and 14.3 percent is deposited in the Highway Safety Operating Trust Fund.

OTHER STATES:
Motor vehicles are licensed in all states. In some states, motor vehicles are subject to personal property taxes in addition to licenses. Most states base fees for private vehicles on weight, some employ a combination of horsepower and weight, and a few relate the fee to the original value of the car. Fees for commercial vehicles are based on weight, capacity, or both. Farm vehicles are commonly exempted or subjected to lower fees.

| | 2026-27 (millions) |
|---|---|
| VALUE OF RATE CHANGE: | |
| Value of $1 levy on all licenses sold | |
| Passenger Cars | $ 12.1 |
| Light Trucks | $ 1.5 |
| Heavy Truck/Truck Tractors | $ 1.9 |
| All Other | $ 3.1 |
| For-Hire | $ 1.5 |
| Total | $ 20.1 |

ADMINISTERED BY: Formerly, the Department of Business and Professional Regulation; Division of Pari-Mutuel Wagering. As of July 1, 2022, the Florida Gaming Control Commission assumed oversight.

SUMMARY:
Taxes and fees are imposed on pari-mutuel facilities in Florida that conduct greyhound, harness, thoroughbred, and quarter horse races, and jai alai games. Taxes are imposed at each pari-mutuel facility that operates a cardroom at 8 percent of the total cardroom gross receipts. Also imposed is an annual cardroom license fee of $1,000 for each table operated at the cardroom facility. A series of occupational license fees for employees and associated businesses is also imposed.

REVENUE:

* Estimate

HISTORY:
Pari-mutuel betting was first authorized in 1931 with the handle taxed at 3 percent plus an admissions tax. Jai alai frontons were authorized in 1935 with the same tax provisions. In 1941, a tax on "breaks" was enacted. Daily license fees were authorized in 1963. Legislation in 1971 placed a ceiling of $446,500 on the amount of racing revenues distributed annually to each county. The pari-mutuel laws were substantially revised during the 1980 legislative session.

In 1984, all permitholders were authorized to withhold an additional 1 percent commission from exotic wagers to be used for capital improvements, with a 50 percent surtax on the additional commission. In 1987, the Legislature authorized the Florida Pari-mutuel Commission to make recommendations annually to the Legislature for additional operating days. Additional taxes on handle for additional racing days were provided. Jai alai and dog racing permitholders were authorized to withhold in Fiscal Year 1989-90, up to an additional 2 percent from exotic wagers. The additional 2 percent was subject to a 17.5 percent surtax per percentage point. In 1990, intertrack wagering was authorized, with a 3 percent tax rate on handle for horses and a 6 percent tax rate on handle for greyhound racing and jai alai. The additional 2 percent takeout on exotic wagering authorized for Fiscal Year 1989-90 to greyhound and jai alai permitholders was allowed to continue. The Legislature adopted a provision that any increase in future years over the amount of taxes paid from all types of pari-mutuel wagering in Fiscal Year 1989-90 will be redistributed as tax credits to greyhound and jai alai permitholders.

The 1991 Legislature passed CS/SB 1342, which repealed effective July 1, 1992, most of the pari-mutuel statutes, including tax credits and exemptions. Basic provisions relating to taxes and wagering were not repealed. The lower tax rate for intertrack wagering (ITW) was repealed, subjecting ITW to the higher tax rates.

The 1992 Legislature failed to reenact the pari-mutuel statutes. During Special Session A, the 1993 Legislature reenacted the regulatory authority of the Division of Pari-mutuel Wagering and the former permitting and licensing provisions, with some modifications. Tax credits and exemptions and the lower ITW tax rate were not reenacted. In 1993, new tax structures for jai alai games, live harness races, and thoroughbred races were established. Another statutory change adopted in 1993 provided that if a jai alai or horseracing permitholder does not pay state taxes for two consecutive years and incurs no tax liability for failure to operate a full schedule of live races, the permit escheats to the state. The state may reissue the permit to a qualified applicant. Also, the Breeders' Cup Meet was reestablished, but without tax credits. In 1994, the daily license fee for jai alai was reduced from $80 to $40 per game, and the tax on handle for live jai alai performances was reduced from 7.1 percent to 5 percent of handle. However, when the live handle during the preceding state fiscal year is less than $15 million, the tax shall be paid on handle in excess of $30,000 per performance per day. Chapter 94-328, L.O.F. (HB 2813), created s. 550.2704, F.S., and authorized the licensing of one special Jai Alai Tournament of Champions Meet. The meet consists of four performances at different locations each year. During the 1995 legislative session, no legislation was passed that impacted fees or taxes. The only major legislation that was enacted was in reference to various technical matters in Chapter 550, F.S.

The 1996 Legislature enacted major pari-mutuel tax law changes. The significant changes were as follows: capped daily license fees on simulcast racing at $500 per day; reduced tax rate on horse racing intertrack simulcast handle from 3.3 percent to 2.4 percent; reduced tax rate on greyhound intertrack handle from 7.6 percent to 6 percent; reduced the tax rate on jai alai intertrack handle from 7.1 percent to 6.1 percent; reduced the tax rate on live jai alai handle from 5 percent to 4.25 percent; eliminated the breaks on live greyhound handle, permitting such breaks to be retained by the permitholder instead of the state; greyhound permitholders were entitled to a tax exemption on their first $100,000 of live handle with a total tax credit of either $500,000 or $360,000 per fiscal year and an $80 per race tax credit multiplied

by the number of live races conducted in the previous fiscal year; and full-card simulcasting was permitted for all thoroughbred, harness, and jai alai permitholders.

In 1996, the Legislature passed Chapter 1996-364, L.O.F. (HB 337), as a general act covering the entire state. In September 2007, the Florida Supreme Court ruled s. 550.615(6), F.S., to be unconstitutional because of the way it was adopted. The justices found the act should have been a local bill because it only affects South Florida tracks. The high court upheld two lower court decisions that also found the law unconstitutionally restricted the tracks. Section 550.615(6), F.S., limited the ability of South Florida horse racing tracks to simulcast events from other pari-mutuel facilities. As a result of the ruling, effective September 21, 2007, all pari-mutuel facilities in Miami-Dade and Broward counties, were permitted to enter into contractual agreements that allow the host facility to send its live and import simulcast signals to other facilities in the two counties; the tax rate for simulcast handle for the two affected Broward County greyhound facilities increased from 3.9 percent to 5.5 percent.

In addition, the 1996 Legislature permitted the operation of card rooms at pari-mutuel facilities if such activity is approved by ordinance by the county commission where the pari-mutuel facility is located. The fee to operate a card room is $1,000 for the first card table and $500 for each additional card table. A card room can only be operated in conjunction with live pari-mutuel wagering. The gross receipts of a card room are taxed at a rate of 10 percent. One-quarter of the revenues deposited into the Pari-Mutuel Trust Fund from card room operations is to be distributed to the counties where the card rooms are located.

The 1997 Legislature transferred the daily operation of the PMW Laboratory to the University of Florida, College of Veterinary Medicine, for Fiscal Year 1997-98, during which time a feasibility study of the operations of the laboratory was conducted. Greyhound racing purse requirements became effective October 1, 1996, and during the 1996-97 fiscal year; the division completed its comprehensive review of greyhound purse payments and established the minimum purse percentages to be used for compliance purposes. The 1998 Legislature passed into law three bills. Two of the bills, CS/SB 440 and HB 1747, became effective on May 24 and contained continued tax breaks for the pari-mutuel industry by repealing the sunset language enacted in 1996. CS/SB 440 provided for the removal of the admission tax on free passes and complimentary cards issued by all permitholders. The bill allowed simulcasting beyond 10:00 P.M., reduced various tax rates on all wager types, and provided for a feasibility study of the Hialeah Race Track to be performed to address state or municipal ownership. The 1999 Legislature allotted an additional $700,000 to facilitate the relocation of the PMW Racing Laboratory from Tallahassee to Gainesville.

In 2000, the Legislature passed a 76-page amendment affecting pari-mutuel wagering, which included $20 million in tax reductions for permitholders and an assortment of other revisions to Chapter 550, F.S. The following is a brief synopsis of what is contained in the amendment, which became effective, July 1, 2000:

- Reduced taxes for greyhound permitholders to an estimated amount of $14.4 million annually
- Reduced taxes for thoroughbred permitholders to an estimated amount of $4.5 million annually
- Reduced taxes for jai alai permitholders to an estimated amount of $430,000 annually
- Reduced taxes for harness permitholders to an estimated amount of $600,000 annually
- Designated the $29.9 million paid annually to the counties be disbursed directly from the General Revenue Fund rather than the Pari-Mutuel Wagering Trust Fund
- Increased tax credits associated with the Breeders' Cup Championship Meet for certain eligible permitholders

- Reduced the frequency of tax and fee payments made by the permitholder to the division from twice a week to once a week
- Provided jai alai permitholders the option of conducting one additional Charity Day performance
- Provided the authority for the department to enter into an Interstate Compact that will reduce the administrative burden of issuing duplicative licenses to applicants from states that choose to participate
- Eliminated the licensing requirement for all restricted licensees

Section 10 of Chapter 2000-354, L.O.F. (SB 770/286), reenacted and amended paragraph (2) (a) of s. 550.09515, F.S., as amended by s. 4, Chapter 98-190, L.O.F. (SB 440). Effective July 1, 2001, the tax on live handle for thoroughbred horseracing was set at 0.5 percent. In 2003, s. 849.086, F.S., was amended to allow permitholders who operate a cardroom to raise the pot limits from a $10 pot to a bet limit of $2 for up to three raises per round of play. Additionally, horseracing permitholders would be permitted to conduct simulcast racing after 7:00 PM and simultaneously operate a cardroom. Sections 550.26165 and 550.2625, F.S., modified the criteria for breeders' awards and the payment of special racing awards to owners of winning Florida-bred thoroughbred horses.

Chapter 2005-288, L.O.F. (HB 181), reduced the number of live performances constituting a full schedule from 100 to 40 for certain jai alai permitholders. Permitholders taking advantage of this reduction are required to pay the same amount of tax as they paid during the last year in which they conducted at least 100 live performances. Additionally, any quarter horse permitholder wanting to substitute thoroughbred races or take intertrack wagering signals would have to have approval from other permitholders in its proximity. Finally, transfer of cardroom licenses was permitted, with no referendum required if the permitholder relocates its permit within the same county as its existing pari-mutuel facility.

Chapter 2007-163, L.O.F. (SB 134), increased the wagering limits from $2 to $5 and authorized new wagering options such as dominoes and games of Texas Hold-em without betting limits as long as the buy-in did not exceed $100; and poker tournaments as long as the entry fee does not exceed the maximum amount that could be wagered in 10-like kind non-tournament games. Additionally, the per table fee paid by each cardroom operator was increased from $1,000 for the first table and $500 for each additional table to $1,000 for all tables. Finally, the requirement to conduct live performances in conjunction with operating a cardroom was amended, authorizing cardroom operators to operate a cardroom year round without having to conduct a live performance. These amendments to s. 849.086, F.S., had a positive impact on tax revenue to the state.

Chapter 2010-29, L.O.F. (SB 622), gave an effective date for the pari-mutuel provision in Chapter 2009-170, which extended cardroom hours from 12 hours per day to 18 hours per day and 24 hours on the weekends and holidays. Additionally, all wagering limits for cardrooms were removed. Quarter horse permit application requirements were amended, subjecting them to the same mileage restrictions that are applicable to other permit applications. Live performances consisting of a full schedule for quarter horse permitholders were reduced from 40 to 20 in 2010-11, increased to 30 in 2011-12 and 2012-13, and then to 40 every fiscal year thereafter. A quarter horse permitholder may have an agreement with either the Florida Quarter Horse Racing Association or the horsemen's association representing the majority of the quarter horse owner and trainers at their facility authorizing them to run an alternative schedule of at least 20 live performances. Additionally, quarter horse permitholders may substitute 50 percent of their races with thoroughbred races, and were no longer required to have approval from other permitholders within their proximity. Finally, a jai alai permitholder that meets certain conditions may apply to have the permit converted to a greyhound permit.

In November 2018, the Constitution Revision Commission proposal #13 to end greyhound racing was approved by 69.1% of voters. This initiative phased out commercial dog racing in connection with wagering by 2020. Other gaming activities were not affected. Live greyhound racing ended effective December 31, 2020.

During the 2021 Legislative Special Session, Chapter 2021-271, L.O.F. (SB 8-A) passed both the House and Senate chambers and was approved by the Governor. The bill did not become effective until August 11, 2021 when the approved 2021 Gaming Compact between the State of Florida and the Seminole Tribe of Florida was published in the Federal Register. Chapter 2021-271, L.O.F., provided for the following changes: (1) The Division shall revoke permits of any permitholder, other than a permit issued pursuant to s. 550.3345, F.S., who did not hold an operating license for the conduct of pari-mutuel wagering for Fiscal Year 2020-2021. A permit revoked is void and may not be reissued; (2) Greyhound permitholders are no longer authorized to conduct live racing, and jai alai permitholders, harness permitholders, and quarter horse permitholders may elect to not conduct live races or games; (3) Those that elect not to conduct live races or games are eligible but not required to be a guest track for the purchase of intertrack and simulcast wagering; and if a harness permitholder, to be a host track for the purpose of intertrack wagering and simulcasting pursuant to ss. 550.3551, 550.615, 550.623, and 550.6305, F.S.; (4) Removes the requirement that a jai alai permitholder conducting fewer than 100 live performances in any calendar year shall pay to the state the same aggregate amount of live daily license, admission tax, and tax on live handle as such permitholder paid to the state during the most recent prior calendar year in which the jai alai permitholder conducted at least 100 performances; (5) Cardrooms are authorized to be open 24 hours a day throughout the year.

During the 2022 Legislative Session, Chapter 2022-179, L.O.F. (SB2510) passed both the House and Senate chambers and was approved by the Governor. This bill became effective July 1, 2022. Chapter 2022-179, L.O.F. (SB2510) amended Section 550.135, F.S., removing the requirement that all unappropriated funds in excess of $1.5 million in the Pari-Mutuel Wagering Trust Fund, be deposited into the General Revenue Fund.

During the 2023 Legislative Session, Chapter 2023-157, L.O.F. (HB7063) passed both the House and Senate chambers and was approved by the Governor. This bill became effective July 1, 2023. Chapter 2023-157, L.O.F. (HB7063) created Section 550.09516, F.S., authorizing thoroughbred permitholders that conduct pari-mutuel wagering meets to be eligible for a credit equal to the amount paid by such permitholders in the prior state fiscal year to the federal Horseracing Integrity and Safety Authority (HISA), inclusive of any applicable true-up calculations or credits made, granted, or applied to the assessment imposed on the permitholder or the state by HISA, for covered horse racing in the state, pursuant to the Horseracing Integrity and Safety Act of 2020. Each permitholder granted such credits beginning July 1, 2023, and each July 1, thereafter, may apply such credit against their taxes and fees due under ss. 550.0951, 550,095151, and 550.3551(3), F.S., less any credit received by the permitholder under s. 550.09515 (6) F.S., and less the amount of state taxes that would otherwise be due to the state for the conduct of charity day performances under s. 550.0351 (4), F.S.

During the 2024 Legislative Session, Chapter 2024-115, L.O.F. (SB804) passed both the House and Senate chambers and was approved by the Governor. This bill became effective July 1, 2024. Chapter 2024-115, L.O.F., (SB804), amended Section 550.3551, F.S., authorizing horse tracks to receive broadcast of horseraces conducted at other horse racetracks located outside the state at the racetrack enclosure of the licensee, if the horse track conducted a full schedule of live racing during the preceding state fiscal year, or if the horse track does not conduct live racing as authorized under s. 550.01215, F.S.

During the 2025 Legislative Session, Chapter 2025-208, L.O.F. (HB7031) passed both the House and Senate chambers and was approved by the Governor. This bill became effective July 1, 2025 and

amended Section 849.086(13)(a), F.S. changing the tax on cardroom 10 percent of the gross receipts to 8 percent. Additionally, provisions in Section 550.0951(3)(c), F.S., that require a 0.5% tax rate on handle were amended to remove the "currently conducting a live race meet" language and added "that conducted a full schedule of live racing the preceding fiscal year."

DISPOSITION:

Pari-Mutuel Taxes and Fees

Of the total collections, 8 percent is deducted as service charges to the General Revenue Fund, with the remainder deposited into the Pari-Mutuel Wagering Trust Fund.

Cardroom Taxes
One-half of total collections are distributed to the General Revenue Fund. The other half of the collections is deposited into the Pari-Mutuel Wagering Trust Fund. Of the one-half deposited into the Pari-Mutuel Wagering Trust Fund, 8 percent is deducted as service charges to the General Revenue Fund. One-fourth of the collections deposited into the Pari-Mutuel Wagering Trust Fund is distributed the following October to the counties or municipalities where the cardroom was approved.

Cardroom Table Fees
The General Revenue Fund deducts 8 percent as service charges with the remainder deposited into the Pari-Mutuel Wagering Trust Fund.

Pari-Mutuel, and Cardroom, Occupational Licenses
The General Revenue Fund deducts 8 percent as service charges with the remainder deposited into the Pari-Mutuel Wagering Trust Fund.

Prior to the 2022 Legislative Session, all unappropriated funds in excess of $1.5 million in the Pari-mutuel Wagering Trust Fund, collected pursuant to s. 550.135, F.S., were deposited with the Chief Financial Officer to the credit of the General Revenue Fund. This amounted to $2 million in FY 2021-22, $0 million in FY 2020-21, $1 million in FY 2019-20, $2 million in FY 2018-19 and $9 million in FY 2017-18.

OTHER STATES:
There are many other states that permit some type of pari-mutuel and/or cardroom operations. Those operations are sometimes regulated by the state, commissions, or boards. Historically, pari-mutuel and cardroom statutes relating to taxes and fees are very complex and vary greatly from state to state. Most states have some sort of pari-mutuel wagering, except Alaska, Georgia, Hawaii, Mississippi, Missouri, North Carolina, South Carolina, Tennessee, Utah, Vermont, and Washington, DC.

# POLLUTANT TAXES AND FEES

FLORIDA STATUTES: Chapter 206 Part IV, F.S. (Coastal Protection Tax, Water Quality Tax, and Inland Protection Tax), s. 376.75, F.S. (Perchloroethylene Tax), s. 403.718, F.S. (Waste Tire Fees) and s. 403.7185, F.S. (Lead-acid Battery Fees).

ADMINISTERED BY: Department of Revenue

SUMMARY:
Every barrel of pollutant produced in or imported into Florida is subject to the pollutant tax. Taxable pollutants include petroleum products including gasoline and diesel fuel, pesticides, ammonia, chlorine, solvents, and motor oil and other lubricants. In addition, each new tire sold at retail is subject to a $1 waste tire fee and each new or remanufactured lead-acid battery is subject to a $1.50 lead-acid battery fee.

REVENUE:

| Fiscal Year | Total Collections | Annual Change % | Coastal Protection | Water Quality** | Inland Protection |
|---|---|---|---|---|---|
| 2026-27* | 313,678,613 | 0.16% | 7,266,023 | 33,141,773 | 273,270,818 |

* Estimate

** The Water Quality numbers include the following revenues for the $1.50 lead-acid battery fee: 2020-21 - $11.8 million; 2021-22 - $13.4 million; 2022-23 - $10.6 million; 2023-24 - $13.6 million; 2024-25 - $13.2 million

HISTORY:
The Coastal Protection Tax, Water Quality Tax, and Inland Protection Tax are deposited into the Pollutant Tax Clearing Trust Fund, from which distributions to other trust funds and to the General Revenue Fund (service charges) are made. The Perchloroethylene Tax is deposited into the Water Quality Assurance Trust Fund. The Lead-acid Battery Fees and the Waste Tire Fees are deposited into the Solid Waste Management Clearing Trust Fund.

In 1974, under s. 376.11, F.S., a pollutant tax of 2 cents per barrel of pollutant was levied and revenues deposited into the Florida Coastal Protection Trust Fund. As part of the "State Underground Petroleum Environmental Response Act of 1986", the 1986 Legislature replaced the pollutant tax provisions of Chapter 376, F.S., with Part IV of Chapter 206, F.S., which provided for the taxation of each barrel of pollutant produced in or imported into the state. The definition of "pollutant" included specified petroleum products as well as pesticides, ammonia, and chlorine. In addition to the Coastal Protection Trust Fund and the Water Quality Assurance Trust Fund, the Inland Protection Trust Fund was created and a tax imposed.

In 1988, the Legislature expanded the list of products subject to the Water Quality Assurance Tax to include solvents, lead-acid batteries, and motor oil or other lubricants; provided a two-tiered tax rate; and adopted waste newsprint disposal fees. Solvent mixtures were added to the list of taxable pollutants under the Water Quality Assurance Tax in 1989 and tax rates were adjusted. The lead-acid battery tax was transferred to Chapter 403, F.S. In 1990, provisions were adopted to increase the cap on the Coastal Protection Trust Fund if the U.S. Department of the Interior approves offshore oil drilling, excluding

natural gas drilling activities, in waters off Florida's coast; and if a discharge of catastrophic proportions occurs, the Governor and Cabinet may, by rule, increase the levy of the pollutant tax to an amount not to exceed 10 cents per gallon for a period of time necessary to pay any proven claims against the fund and to restore the balance to $50 million.

In 1992, the tax for inland protection was increased from 10 cents to 30 cents per barrel of taxable pollutant if the unobligated balance of the trust fund falls between $100 million and $150 million, increased from 20 cents to 60 cents if the unobligated balance of the trust fund is above $50 million, but below $100 million; and increased from 30 cents to 80 cents if the unobligated balance of the trust fund is $50 million or less.

The 1-cent Advance Disposal Fee, which was originally enacted in 1988 to take effect in 1992, was substantially amended and took effect October 1, 1993. The fee was scheduled to increase to 2 cents per container on January 1, 1995. Pursuant to ss. 71 and 72 of Chapter 88-130, L.O.F., waste newsprint disposal fees and the advance disposal fee were repealed effective October 1, 1995.

In 1996, the Legislature eliminated solvent mixtures from the definition of taxable pollutants, thus exempting them from the Water Quality Tax. Chapter 2006-16, L.O.F. (SB 818), changed the fuel tax distribution by decreasing the transfer of funds to the Inland Protection Trust Fund and increasing the distribution to the Florida Coastal Protection Trust Funds. Chapter 2007-81, L.O.F. (HB 7063), prescribed a transfer of the greater of $5 million or 2.5 percent of the Inland Protection Trust Fund to the Coastal Protection Trust Fund.

BASE AND RATE:
Tax for Coastal Protection: 2 cents per barrel of pollutant produced in or imported into the state until the balance in the Coastal Protection Trust Fund equals or exceeds $50 million. For the fiscal year immediately following the year in which the balance equals or exceeds $50 million, the excise tax will be discontinued until it is necessary to reinstate the tax. If off-shore oil drilling is approved off Florida's coast the cap on the trust fund is raised to $100 million, and if a catastrophic discharge of pollutants occurs the tax can be increased up to 10 cents a barrel (see s. 206.9935(1), F.S., for details).

Tax for Water Quality: $1.50 per new or remanufactured lead-acid battery; 2.36 cents per gallon of solvents; 1 cent per gallon of motor oil or other lubricants; and 2 cents per barrel of petroleum products, ammonia, and chlorine produced in or imported into the state, until the unobligated balance of the Water Quality Assurance Trust Fund equals or exceeds a balance of $12 million, at which time the tax will be discontinued until it is necessary to reinstate the tax. If the unobligated balance of the fund is or falls below $3 million, the tax will be $1.50 per new or remanufactured lead-acid battery; 5.9 cents per gallon of solvent; 2.5 cents per gallon of motor oil or other lubricants; 2 cents per barrel of ammonia; and 5 cents per barrel of petroleum products, pesticides, and chlorine, until the unobligated fund balance exceeds $5 million, at which time the tax shall revert to the lower rate (see ss. 206.9935(2) (b) and 403.7185(1), F.S., for details).

Tax for Inland Protection: 30 cents per barrel of pollutant, produced in or imported into the state if the unobligated balance of the Inland Protection Trust Fund is between $100 million and $150 million; 60 cents if the unobligated balance of the fund is above $50 million, but below $100 million; and 80 cents if the unobligated balance of the fund is $50 million or less. If the unobligated balance in the fund exceeds $150 million, the tax shall be discontinued until such time as the unobligated balance reaches $100 million (see s. 206.9935(3)(b), F.S., for details).

Waste Tire Fee: There is a $1 per tire fee imposed on each new motor vehicle tire sold at retail. The fee is imposed on tires sold separately or as component parts of a new motor vehicle. The fee is not imposed

on recapped tires. The proceeds from the waste tire fee are deposited into the Solid Waste Management Trust Fund. Waste tire fee revenues are as follow: 2020-21 – $23.6 million; 2021-22 – $23.4 million; 2022-23 - $26.6 million and, 2023-24- $25.7 million; 2024-25-$26.4 million Estimated revenues for 2025-26 are $26.6 million and 2026-27 are $26.7 million for each fiscal year.

Hazardous Waste Taxes and Fees: Local governments within Florida may assess a 3 percent gross receipts tax on facilities within their jurisdictions that store or dispose hazardous waste, with the proceeds being used for facility inspection, security, and road construction costs related to the facility, and environmental protection purposes. The revenues are as follows: 2020-21 - $0.06 million; 2021-22 - $0.06 million; 2022-23 - $0.07; 2023-24 - $0.05; and 2024-25 - $0.05 million Estimated revenues for 2025-26 are $0.05 million and for 2026-27 are $0.05 million.

DISPOSITION:
Florida Coastal Protection Trust Fund: Tax for Coastal Protection

Water Quality Assurance Trust Fund: Tax for Water Quality

Inland Protection Trust Fund: Tax for Inland Protection

Solid Waste Management Trust Fund: Waste Tire Fee

OTHER STATES:
A number of states besides Florida impose some form of pollutants, environmental protection, or oil contingency tax. The Federation of Tax Administrators shows some pollutant-related taxes in its summary of Motor Fuel Excise Tax Rates at http://www.taxadmin.org/assets/docs/Research/Rates/mf.pdf.

| | 2026-27 (millions) |
|---|---|
| VALUE OF RATE CHANGE: | |
| Value of 1 cent levy per barrel of petroleum product: | |
| Coastal Protection | $3.55 |
| Water Quality | $3.26 |
| Inland Protection | $3.43 |
| Value of 10 cent levy per lead-acid battery: | $0.60 |
| Value of 1 cent levy per gallon of motor oil or other lubricant: | $0.89 |
| Value of 1 cent levy per gallon of solvent: | $0.16 |

VALUE OF EXEMPTIONS:
In 1996, the Legislature eliminated solvent mixtures from the definition of taxable pollutants [Chapter 1996-352, L.O.F. (SB 1148)]. "Solvent mixtures" were defined as "a blend or mixture in liquid form containing one or more organic compounds [listed in then subsection (6)], but the term excludes ethanol when used as a motor gas blending agent." Compounds in the "solvents" list that the "solvent mixtures" definitions referred to included acetamide, acetone, acetonitrile, acetophenone, amyl acetates (all), aniline, benzene, butyl acetates (all), butyl alcohols (all), butyl benzyl phthalate, carbon disulfide, carbon tetrachloride, chlorobenzene, chloroform, cumene, cyclohexane, cyclohexanone, dibutyl phthalate, dichlorobenzenes (all), dichlorodifluoromethane, diethyl phthalate, dimethyl phthalate, dioctyl phthalate (di2-ethyl hexyl phthalate), n-dioctyl phthalate, 1,4-dioxane, petroleum-derived ethanol, ethyl acetate, ethyl benzene, ethylene dichloride, 2-ethoxy ethanol (ethylene glycol ethyl ether), ethylene glycol, furfural, formaldehyde, n-hexane, isophorone, isopropyl alcohol, methanol, 2-methoxy ethanol (ethylene

glycol methyl ether), methyl tert-butyl ether, methylene chloride (dichloromethane), methyl ethyl ketone, methyl isobutyl ketone, mineral spirits, 140-F naphtha, naphthalene, nitrobenzene, 2-nitropropane, pentachlorobenzene, phenol, perchloroethylene (tetrachloroethylene), stoddard solvent, tetrahydrofuran, toluene, 1,1,1-trichloroethane, trichloroethylene, 1,1,2-trichloro-1,2,2-trifluoroethane, and xylenes (all).

Based on the revenue loss from the 1996 exemption, and the current levels of revenue from solvents, repeal of the 1996 solvent mixtures exemption in FY 2025-26 and FY 2026-27 would result in a revenue gain of $0.95 million.

# PROFESSIONAL AND OCCUPATIONAL LICENSING FEES

FLORIDA STATUTES: Chapters 112, 310, 383, 390, 394, 395, 400, 408, 429, 440, 450, 455, 469, 471, 472, 473, 474, 475, 476, 477, 481, 483, 489, 492, 499, 548 and sections 468.381 - 468.457, 468.520 - 468.633, and 468.83 - 468.8424, 627, 641, 765

ADMINISTERED BY: Department of Business and Professional Regulation; Agency for Health Care Administration

SUMMARY:
Many professions and occupations are regulated by the Department of Business and Professional Regulation and pay annual or biennial license fees designed to cover the cost of regulation, and in some cases pay fees for examination administration. The Agency for Health Care Administration charges fees to license, certify, and regulate (unless otherwise exempt) over 50,500 health care providers including hospitals, nursing homes, assisted living facilities, residential treatment facilities, home health agencies, clinical laboratories and health care clinics.

REVENUE:

| Fiscal Year | Collections | Annual Change % |
|---|---|---|
| 2026-27* | 99,500,000 | 14.76% |
| 2025-26* | 86,700,000 | -1.62% |
| 2024-25 | 88,124,200 | 6.48% |
| 2023-24 | 82,764,206 | -16.28% |
| 2022-23 | 98,855,371 | 4.46% |
| 2021-22 | 94,632,446 | 6.34% |
| 2020-21 | 88,988,716 | 22.37% |

* Estimate

HISTORY:
The Department of Business and Professional Regulation was formed in 1993 as a result of the merger between the Department of Business Regulation and the Department of Professional Regulation. The Department of Professional Regulation and the Department of Business Regulation were both created by the 1969 Government Reorganization Act. The professions included in the revenue category of professional and occupational licenses are: architects and interior designers, asbestos consultants and contractors, athlete agents, auctioneers, barbers, building code administrators and inspectors, community association managers, the construction industry, cosmetologists, electrical contractors, employee leasing companies, engineering, geologists, landscape architects, harbor pilots, home inspectors, talent agencies, mold-related services, veterinarians, farm labor contractors, the boxing and mixed martial arts industry, real estate, real estate appraisal, certified public accounting, and drugs, devices and cosmetics.

Numerous other occupations, professions, and businesses are regulated through various departments of state government, usually with assistance from boards composed of members of regulated activities. From 1976-1980, as a result of sunset legislation, major changes were made in the department's structure and the responsibilities of the many regulatory boards that serve it. In 1983, Chapter 83-329, L.O.F., made changes affecting the department, various regulatory boards, and nearly all of the professions currently regulated. License fees and caps have been increased over the years for a number of professions and new laws enacted to regulate professions for the first time. Chapter 92-149, L.O.F. (HB 2249), required that professional license fees be set at a level sufficient to cover the costs of regulation of the profession. In that same law, professional licensing boards were given the authority to impose a one-time fee in an amount necessary to eliminate a cash deficit, or if there was not a cash deficit, in an amount

sufficient to maintain the financial integrity of the profession. No more than one such assessment may be made in any four-year period without specific legislative authorization. If a licensing board fails to increase fees to cover costs, then the department was authorized to increase the fees. Chapter 92-33, L.O.F. (SB 2390), transferred the regulation and licensing of the medical profession from the Department of Business and Professional Regulation to the Agency for Health Care Administration. Chapter 97-312, L.O.F. (HB 433), provided for the privatization of the regulation of the engineering profession. In 2007, the Legislature passed SB 2234 (Chapter 2007-235, L.O.F.), which established professional licenses for Home Inspectors and for Mold Assessors or Mold Remediators, effective July 1, 2010.

In 2009, the Legislature passed SB 1744 (Chapter 2009-66, L.O.F.), which transferred the regulation and licensing of the surveyors and mappers profession from the Department of Business and Professional Regulation to the Department of Agriculture and Consumer Services. Chapter 2009-195, L.O.F. (HB 425), removed the allowance for a practical portion of a barber's examination and required only a written segment. Additionally, license fee caps were increased for cosmetologists from $25 to $50 and construction contractors from $200 to $250.

In 2010, the Legislature passed HB 303 (Chapter 2010-84, L.O.F.), requiring the Department of Business and Professional Regulation to regulate and license appraisal management companies effective July 1, 2010. Chapter 2010-176, L.O.F. (HB 663), revised the surcharge on building permit fees for the Building Code Administrators and Inspectors Fund by setting the surcharge rate at 1.5 percent of all permit fees associated with enforcement of the Florida Building Code. The minimum surcharge collected on any building permit issued is $2. Chapter 2010-161, L.O.F. (HB 5311), transferred the administration of the Florida Drug and Cosmetic Act in Chapter 499, F.S., from the Department of Health to the Department of Business and Professional Regulation, effective October 1, 2011.

In 2011, the Legislature passed SB 1040 (Chapter 2011-30, L.O.F.), creating the Florida Drug, Device, and Cosmetic Trust Fund within the Department of Business and Professional Regulation. The trust fund was established to provide for the deposit of revenues and the recording of expenditures related to the regulation and administration of the Florida Drug, Device, and Cosmetic Act authorized in Chapter 499, F.S.

In 2013, the Legislature passed CS/CS/CS/HB 973 (Chapter 2013-203, L.O.F.), exempting certain employees of security alarm companies and subcontractors of telecommunications companies from licensure.

In 2014, the Legislature passed CS/CS/HB 7015 (Chapter 2014-1, L.O.F.), extending to the spouse of a military veteran the general waiver of initial license, initial application, and initial unlicensed activity fees available to military veterans within 24 months after discharge. The bill also extended the 24 month period to 60 months. Also in 2014, the Legislature passed CS/CS/SB 404 (Chapter 2014-73, L.O.F.), which allows certain qualified persons to register as a "geologist-in-training," upon passage of the fundamentals portion of the licensure exam. A non-refundable application fee and a refundable examination fee are required.

In 2015, the Legislature passed CS/HB 401 (Chapter 2015-143, L.O.F.), lowering the fee for renewing certain delinquent licenses to a flat $50 late renewal fee. The Legislature also passed CS/CS/HB 373 (Chapter 2015-174, L.O.F.) amending the definition of licensed firm or public accounting firm and clarifying the practice requirements for partnerships, corporations, limited liability companies, and other business entities practicing public accounting.

In 2016, the Legislature passed HB 303 (Chapter 2016-79, L.O.F.), limiting required payment of an unlicensed activity fee if, at the beginning of the fiscal year, the profession's unlicensed activity account balance totals more than twice the cost of that profession's expenses for unlicensed activity investigations from the preceding two fiscal years combined.

In 2017, the Legislature passed CS/CS/HB 615 (Chapter 2017-135, L.O.F.), creating an initial licensing fee waiver for members of the Armed Forces who served on active duty, their spouse or surviving spouse and certain low income individuals. The bill also requires DBPR to issue a renewable professional license to certain active duty members of the Armed Forces, their spouses and surviving spouses and veterans without an initial licensing fee and without meeting other statutory licensing requirements and qualifications under specified circumstances. The bill also extends the period of time that active duty members remain in good standing after discharge from active duty from six months to two years and allows spouses and surviving spouses to remain in good standing when they are absent from the state due to their spouse's service.

In 2018, the Legislature passed CS/CS/SB 622 (Chapter 2018-24, L.O.F.), which repeals the licensure requirements for clinical laboratories that perform testing on specimens derived from within Florida, as well as the $300 biennial license fee. It also repeals health care risk manager licensure requirements and related licensure fees. In addition, the Legislature passed CS/HB 29 (Chapter 2018-7, L.O.F.), which eased professional licensing fees and requirements for certain military members, veterans, and their spouses by creating or expanding fee waivers for certain Department of Business and Professional Regulation and Department of Health licensees and applicants.

In 2019, the Legislature passed CS/CS/HB 827 (Chapter 2019-086, L.O.F.), which eliminated all fees associated with the qualification of an engineering business and the certificate of authorization for an engineering business.

In 2020, the Legislature passed CS/CS/HB 731 (Chapter 2020-156, L.O.F.), repealing licensure of multiphasic health testing centers and exempting from clinic licensure all federally certified providers, community mental health center-partial hospitalization programs, portable x-ray providers, and rural health clinics. The Legislature also passed CS/HB 1193 (Chapter 2020-160, L.O.F.). This bill, cited as the "Occupational Freedom and Opportunity Act," deregulated and removed licensure requirements for hair braiders, hair wrappers, body wrappers, nail polishers, makeup artists, and boxing announcers and timekeepers. The bill also repealed the licensing requirements and provisions related to licensure of labor organizations and eliminated the additional business license requirements for architects, interior designers, landscape architects, and geologists.

In 2021, the Legislature passed CS/CS/SB 1966 (Chapter 2021-135, L.O.F.), repealing the $4.00 fee that all construction contracting certificate holders and registrants must pay to the Department of Business and Professional Regulation at the time of application or renewal to fund projects relating to the building construction industry or continuing education programs offered to persons engaged in the building construction industry in Florida. The bill also exempted cosmetic manufacturers, with annual gross sales of $25,000 or less, from the requirement of obtaining a cosmetic manufacturing permit.

In 2023, the Legislature passed HB 1091 (Chapter 2023-68, L.O.F.), which directed the Department of Business and Professional Regulation to waive 50 percent of license fees (up to $200 per license) collected by the Department pursuant to Chapter 455, F.S. The waivers apply to applications for initial licenses and renewals in fiscal years 2023-24 and 2024-25. For the 2023-24 fiscal year, $50 million was appropriated to the Department of Business and Professional Regulation to be deposited in the Professional Regulation Trust Fund. Any unexpended balance of funds from this appropriation on June 30, 2024, reverts and is appropriated to the Department for the 2024-25 fiscal year for the same purposes.

In 2023, the Legislature also passed HB 1383 (Chapter 2023-271, L.O.F.), which created numerous types of specialty contractor licenses that are subject to the existing fees for specialty contractors.

In 2024, the Legislature passed CS/HB 813 (Chapter 2024-97, L.O.F.), allowing a Florida-licensed CPA that is at least 65 years of age to place his or her CPA license in a retired status and providing that a retired licensee may reactivate a license in a conditional manner, which requires the payment of fees. The Legislature also passed CS/CS/CS/HB 267 (Chapter 2024-191, L.O.F), reducing building permit application deadlines and revising when a permit fee is applied, which impacts DBPR's collection of surcharges on building permit fees.

BASE AND RATE:
There are 22 professions regulated by the Department of Business and Professional Regulation, based on the Department's 2023-24 Annual Report for the Division of Certified Public Accounting, Division of Professions, Division of Real Estate, and Division of Regulation. There are 38 types of health care providers regulated by the Agency for Health Care Administration. Licensure fees vary by profession or facility type.

DISPOSITION:
Most fees are deposited into the Professional Regulation Trust Fund and are subject to an 8 percent General Revenue Service Charge. When examinations are administered by an outside source, the examination fees, under some contracts, are paid by the applicant directly to the vendor that conducts the testing. Fees charged by the Agency for Health Care Administration are deposited into the Health Care Trust Fund and are subject to the General Revenue Service Charge.

OTHER STATES:
All states engage in some form of regulation and licensing of professions.

# REEMPLOYMENT ASSISTANCE TAX
## (Unemployment Compensation Tax)

FLORIDA STATUTES: Chapter 443

ADMINISTERED BY: Department of Commerce and the Department of Revenue

SUMMARY:
Florida's Reemployment Assistance Program imposes a tax on wages paid by Florida employers to pay for unemployment benefits received by unemployed individuals. The tax is imposed on the first $7,000 of compensation paid to each employee. The tax rate varies from 0.1 percent to 5.4 percent depending upon the benefit experience of the employer. The minimum tax rate is 0.10 percent in calendar year 2025.

REVENUE AS REPORTED IN STATE ACCOUNTS:

| Fiscal Year | Collections (Dollars) | Annual Change (Percent) |
|---|---|---|
| 2026-27* | 402,700,000 | 0.02% |
| 2025-26* | 402,600,000 | -26.52% |
| 2024-25 | 547,887,569 | -18.56% |
| 2023-24 | 672,791,073 | -1.23% |
| 2022-23 | 681,138,415 | 4.30% |
| 2021-22 | 653,059,921 | -38.42% |
| 2020-21** | 1,060,566,490 | 145.41% |

* Estimate

** Collections for FY 2020-21 included $446.2 million in tax overpayments by employers. These overpayments have been refunded from the General Revenue Fund to employers per Chapter 2021-2, L.O.F. (CS for CS for SB 50).

HISTORY:
The U. S. Social Security Act of 1935 provided for a Federal-state program under a Federal tax against which state taxes up to 2.7 percent of covered payrolls could be credited. Florida's legislation was enacted in 1937 to comply with this plan. Florida's maximum benefit was first set at 50 percent of lost wages up to $15 weekly. Maximum benefits were increased in 1974, 1975, 1979, 1980, 1981, 1983, 1985, 1987, 1990, and 1998. Rate schedules were changed in 1979 and 1984. In 1980, the Unemployment Compensation Act was extensively revised (Chapter 80-95, Laws of Florida L.O.F.). The maximum benefit was increased from $200 to $225 in 1990 and to $250 in 1992. Chapter 94-347, L.O.F. (HB 2447), made administrative changes to unemployment compensation, including changing the time frames for tax notification and reporting to make employers' compliance fairer and easier. Chapter 97-29, L.O.F. (HB 3), reduced unemployment taxes for all Florida employers, except those employers that had paid at a rate of 5.4 percent for more than 36 months, by five tenths percent for one year and decreased the initial rate charged new employers from 2.7 percent to 2.0 percent for one year. These tax reductions were effective for the 1998 calendar year. The law also increased the maximum weekly amount an unemployed individual may receive from $250 to $275, effective January 1, 1998. Finally, the law raised the exemption for sole-proprietors from paying unemployment taxes on wages paid to their children from 18 to 21 years of age. Chapter 99-131, L.O.F. (HB 1951), reduced unemployment taxes and benefits for calendar year 2000, in the same manner as calendar year 1998 (see above, Chapter 97-29, L.O.F. (HB 3). Chapter 2002-218, L.O.F. (SB 426), lowered the trigger for increasing the unemployment compensation tax rate from 4 percent of taxable payroll to 3.7 percent of taxable payroll. Chapter 2009-99, L.O.F. (SB 810), increased the cap on an individual's wages subject to the tax from $7,000 to $8,500 for years 2010 through 2014, increased the trigger for increasing the unemployment compensation tax rate from 3.7 percent of taxable payroll to 4.0 percent of taxable payroll, and temporarily (from 2010 through 2014) increased the adjustment to tax rates in the event that an increase is triggered. Additionally, the trigger for

decreasing the unemployment tax rate was increased from 4.7 percent to 5.0 percent of taxable payroll, with no negative adjustment allowed through 2014, or in any year in which the Unemployment Compensation Trust Fund is repaying any advances from the Federal program. Chapter 2010-1, L.O.F. (HB 7033), delayed the increase in wages from $7,000 to $8,500 until 2012, provided for the $8,500 to stay in place in any year where there are outstanding Federal advances, directed that the wage base used to calculate the tax also be used to calculate the tax rates, and provided that no fund size factor tax increase be triggered for 2010 and 2011. Additionally, assessments were imposed against employers to pay any interest due on Federal advances, and provisions were made to allow employers to pay their tax on an installment basis during 2010 and 2011, after paying a $5 annual fee. Chapter 2011-235, L.O.F. (HB 7005), made numerous changes regarding eligibility for benefits: revised the disqualification provision as it related to absenteeism, violation of company policy, disruptive behavior and deductible income, disallowed benefits to be paid when a claimant is receiving severance pay and other forms of payment from his/her former employer, and allowed hearsay evidence in benefits determination. Additionally, benefits used to determine an employer's benefit ratio were reduced by 10 percent between the third quarter 2007 and the first quarter 2011. The maximum number of weeks of state benefits to be paid was reduced from 26 to 23 effective for claims initiated after January 1, 2012, with the maximum number of weeks in any one year dependent on the statewide unemployment rate during the third quarter of the prior calendar year. The installment payment option was extended through calendar year 2014.

Chapter 2012-30, L.O.F. (HB 7027), reduced the wage base from $8,500 to $8,000 for tax years 2012 through 2014, reduced the fund size factor for tax years 2012 through 2017, and allowed for Professional Employer Organizations to make a one-time irrevocable election to calculate, report, and pay state UC taxes under the respective unemployment account of each client. The chapter also rebranded the state's unemployment compensation program and Unemployment Compensation Tax as the reemployment assistance program and the Reemployment Assistance Tax.

A number of changes were made during the 2021 session, which affected Reemployment Assistance Tax calculations. Chapter 2021-2, L.O.F. (CS for CS for SB 50), Section 13 amended subparagraph 6 of paragraph (d) of subsection (6) of section 212.20 and added sub-subparagraph h that directed the Department of Revenue (DOR) to distribute $324,533,334 from Sales Tax Collections on or before the 25th of July, August, and September, 2021 to the Unemployment Compensation Trust Fund, less an adjustment for refunds issued from the General Revenue Fund pursuant to s. 443.131(3)(e)3 before making the distribution. The law also stated that "…adjustments made by the department to the total distributions shall be equal to the total refunds made pursuant to s. 443.131(3)(e)3. If the amount of refunds to be subtracted from any single distribution exceeds the distribution, the department may not make that distribution and must subtract the remaining balance from the next distribution." The Department of Revenue was also directed to distribute $90 million monthly from sales tax collections to the Unemployment Compensation Trust Fund starting in July 2022 on or before the 25th day of each month until the ending balance of the Unemployment Compensation Trust Fund exceeded $4,071,519,600 on the last day of any month, as determined from the United States Department of the Treasury data and as certified by the Office of Economic and Demographic Research. Sub-subparagraph h was repealed and the department directed to end the monthly distributions on the date it received the aforementioned certification.

Chapter 2021-2, L.O.F. (CS for CS for SB 50), Section 16 inserted a new paragraph (f) to section 443.131, F.S. and changed the calculation of tax rates for employers eligible for a variation of contribution rates based on benefit experience until certain conditions were met. The law retroactively applied a benefit multiplication factor of 0 (zero) to benefits paid from April 1, 2020 to December 31, 2020, effectively excluding these benefits from the rate calculation for each eligible employer. The law also excluded from the contribution rate calculation "noncharge benefits" or "benefits paid as a result of a

governmental order related to COVID-19 to close or reduce capacity of a business." In addition, Chapter 2021-2 suspended the application of the positive trust fund adjustment factor in the calculation of the contribution rate for the 2021 and 2022 calendar years. The law provided for the suspension of the application of a trust fund positive adjustment factor for calendar years 2023 and 2024 if the balance of the unemployment compensation trust fund on June 30 of any year did not exceed $4,071,519,600.

The law directed DOR to recalculate CY 2021 rates for eligible employers based on the new stipulations. In addition, Chapter 2021-2 provided for a stepwise reduction in the benefit ratio multiplier of benefits paid from January 1, 2021 to June 30, 2021 if the estimated total contributions calculated were more than $475.5 million in CY 2022. However, the latter condition was not met and the application of this stipulation did not occur. Further, DOR was directed to calculate rates for eligible employers through December 31, 2025 excluding benefits paid from April 1, 2020 to December 31, 2020, excluding noncharges due to COVID, and excluding the application of a positive trust fund factor. The aforementioned calculation method would be repealed in all future years if the balance of the Unemployment Compensation Trust Fund on June 30 of any year exceeded $4,071,519,600.

Although there were no legislative changes to Chapter 443 or Chapter 212 relating to Reemployment Assistance, Fiscal Year 2023-24 marked several significant developments related to certain provisions of Chapter 2021-2, L.O.F. (CS for CS for SB 50) codified in Chapters 212 and 443. The ending balance of Florida's Unemployment Compensation Trust Fund at the United States Department of the Treasury exceeded $4,071,519,600 as of March 31, 2024 for the first time since the fund was nearly depleted during the COVID-19 pandemic period. On April 2, 2024, the Office of Economic and Demographic Research certified to the Department of Revenue that the fund balance exceeded this level, as required by Section 212.20(6)(d)6.e.(III). The satisfaction of this condition triggered the repeal of sub-subparagraph 212.20(6)(d)6.e. as of the date of the certification, as well as the end of the $90 million monthly sales tax distributions to the Unemployment Compensation Trust Fund.

As required by s. 443.131(3)(e)6., the Office of Economic and Demographic Research advised the Department of Revenue that the trust fund balance continued to exceed the same statutory level on June 30, 2024. The satisfaction of that condition repealed subparagraph 5 of s. 443.131(3)(e) for calculation of employer contribution rates effective for the following calendar years. This subparagraph had suspended the application of a positive fund size adjustment factor that otherwise would have automatically increased tax contribution rates until the balance exceeded 4 percent of taxable payroll for the prior fiscal year. With the trust fund deemed replenished, the application of a fund size adjustment factor now reverts to the regular statutory calculations. Subparagraph 5 had also excluded from the rate calculation any benefit charges directly related to COVID-19 as a result of a governmental order to close or reduce capacity of a business, for each employer who is eligible for a variation from the standard rate. This in effect suppressed contribution rates, which would have otherwise increased to ensure employers pay contribution rates according to the level of separations they initiated as provided elsewhere in statute. The tax collection service provider will no longer exclude these COVID-related charges from the calculation of tax rates.

In summary, all COVID-19 taxpayer relief provisions had effectively been repealed, with the Reemployment Assistance tax calculated for 2025 and each subsequent calendar year as otherwise provided in Chapter 443. Between May 2021 and March 2024, the trust fund was replenished to sustainable levels by a total infusion of $2,863.6 million of non- Reemployment Assistance tax funds, including distributions from sales tax and transfers from GR.

Subsequently, during the 2025 legislative session, Chapter 2025-5, L.O.F. (SB 40) deleted repealed, inoperative, or expired statutory text, which emanated from Chapter 2021-2, L.O.F. (CS for CS for SB 50); otherwise, no substantive changes to Chapter 443 were made.

BASE AND RATE:
The tax is applied to employees' annual wages up to $7,000. The employer pays a rate varying from 0.1 percent to 5.4 percent, depending on the benefit experience of the employer.

DISPOSITION:
Unemployment Compensation Clearing Trust Fund: Collections are received by the Department of Revenue and then deposited in the U. S. Treasury. From there, they are withdrawn as needed to pay benefits through the Unemployment Compensation Benefit Trust Fund.

OTHER STATES:
All states have unemployment benefit plans complying with Federal legislation. In 2025, employee taxable wage bases ranged from the federal minimum of $7,000 in Arkansas, California, Florida, and Tennessee, as well as Puerto Rico, to $72,800 for Washington. The average employer base contribution tax rates ranged between 0.35 (South Dakota) and 3.40 (Pennsylvania) percent of taxable wages in calendar year 2024 in the continental United States. Florida's actual average tax rate was 0.83 percent of taxable wages in calendar year 2024. Massachusetts had the highest maximum employer tax rate, set at 12.65 percent. Florida and 13 other states, as well as Puerto Rico and the Virgin Islands, fixed the maximum tax rate at 5.4 percent, which is the lowest maximum tax rate states can set under Federal law without affecting their employers' tax credits.

* Revenue includes net collections, interest, federal program advances, and transfers from the General Revenue fund.
** Benefits include regular, extended, and Federal Supplemental Benefits programs.
*** Fund balance is end of month at the US Treasury and it includes all other deposits or withdrawals for administrative, loan repayment, and other purposes, not directly related to benefit payments.

# RENTAL CAR SURCHARGE

FLORIDA STATUTES: Section 212.0606

ADMINISTERED BY: Department of Revenue

SUMMARY:
Rental car surcharge is imposed at the rate of $2.00 per day, for the first 30 days of the lease or rental of for-hire vehicles designed to carry fewer than nine passengers. Members of a car-sharing service pay $1.00 per usage under 24 hours and $2.00 per day after the first 24-hour period. Rentals which are facilitated through a peer-to-peer car sharing service pay $1.00 per day.

REVENUE:

* Estimate
** Excluding administrative fees and service charge

HISTORY:
The initial surcharge was set at $0.50 per day in 1989. It was applied to each of the first 30 days of either the lease or rental of a motor vehicle licensed for hire and designed to carry fewer than nine passengers. The proceeds of the $0.50 surcharge were distributed 20 percent to the Law Enforcement Trust Fund (managed by the Department of Highway Safety and Motor Vehicles) and 80 percent to the Children and Adolescents Substance Abuse Trust Fund (managed by the Department of Health and Rehabilitative Services).

In its 1990 session, the Legislature raised the surcharge to $2.00 per day, effective July 1, 1990, and revised the distribution requirements so that, after administrative costs and the 8 percent General Revenue Service Charge (increased from 7.3 percent to 8 percent by the 2009 Legislature) were deducted, the State Transportation Trust Fund (STTF) received 75 percent of the total proceeds (or $1.50 of the $2.00 fee) and the remaining 25 percent was divided between the former recipients in their same relative proportion. The 1991 Legislature revised the distributional breakout still further. The 5 percent of total receipts that had been deposited in the Law Enforcement Trust Fund was redirected to the General Revenue Fund. The share previously distributed to the Children and Adolescents Substance Abuse Trust Fund (20 percent of the total) was, instead, divided between the Tourism Promotional Trust Fund (15.75 percent) and the Florida International Trade and Promotion Trust Fund (4.25 percent). In the 2000 session, the Legislature redirected the General Revenue portion (5 percent of the total) to the STTF. The Department of Transportation now receives 80 percent of the surcharge (excluding administrative costs and the 8 percent General Revenue Service Charge). The tax distributed to the STTF is unique in that beginning in Fiscal Year 2007-08, its proceeds must be spent in the transportation district from which the surcharges were collected. In the 2014 session, the Legislature amended the statute to allow a member of a car-sharing service who used a motor vehicle pursuant to an agreement with the car-sharing service for less than 24 hours pay $1 per usage. A member of a car-sharing service who uses the same motor vehicle for at least

24 consecutive hours must pay a surcharge of $2 per day or any part of a day. During the 2021 session, the statute was amended to enhance the enforceability of the surcharge when rentals are facilitated through a peer-to-peer car sharing service and to reduce the surcharge to $1 per day when rentals are facilitated through a peer-to-peer car sharing service.

BASE AND RATE:
Rental car surcharge is imposed at the rate of $2.00 per day, for the first 30 days of the lease or rental of for-hire vehicles designed to carry fewer than nine passengers. Members of a car-sharing service pay $1.00 per usage under 24 hours and $2.00 per day after the first 24-hour period. Rentals which are facilitated through a peer-to-peer car sharing service pay $1.00 per day.

DISPOSITION:
The State Transportation Trust Fund (80 percent), the Tourism Promotional Trust Fund (15.75 percent), and the Florida International Trade and Promotion Trust Fund (4.25 percent).

OTHER STATES:
Rental car surcharge varies considerably from state to state.

# SALES AND USE TAX

FLORIDA STATUTES: Chapter 212

ADMINISTERED BY: Department of Revenue

SUMMARY:
The state sales and use tax is a 6 percent levy on retail sales of most tangible personal property, admissions, transient lodgings, and motor vehicles.

* Estimate
** These figures reflect estimated distributions based on the state's fiscal year of July 1 to June 30.
*** Local Government distributions include the half-cent, county and municipal revenue sharing, and the shift of $29,915,500 to counties that used to be funded from pari-mutual tax revenues.
@ These figures include state Communication Services Taxes imposed under Chapter 202, F.S.

HISTORY:
Since enactment in 1949, Florida's sales tax rate and/or base has been changed to some degree in nearly every legislative session. The most substantial increases were: in 1957, when inexpensive clothing, motor vehicles (1 percent rate), mixed drinks, cigarettes, and industrial machinery ($1,000 maximum) were added; in 1968, when rates were increased from 3 percent to 4 percent on most items (2 percent on motor vehicles); in 1971, when rates on motor vehicles were made equal to the state rate; in 1982, when rates were increased from 4 percent to 5 percent and for the first time a portion of the receipts were deposited into a trust fund (the trust monies, approximately 10 percent of total receipts, were distributed annually to eligible municipal and county governments); and in 1988 when the rates were again increased from 5 percent to 6 percent.

Chapter 83-310, L.O.F., created the "estimated sales tax liability" which was equal to 66 percent of the current month's sales tax liability or 66 percent of the tax liability for the same month in the prior year. The estimated sales tax liability rate of 66 percent was replaced in 1984 with a declining schedule from 50 percent for 1986 to 10 percent in 1990 and set for repeal by December 31, 1990. Chapter 90-132, L.O.F. (HB 3695), increased the estimated sales tax liability for businesses with annual sales tax liability in excess of $200,000 from 10 percent to 66 percent, and in 1991 the threshold for estimated sales tax payments was reduced to $100,000.

The 1986 Legislature passed Chapter 86-166, L.O.F., which repealed the sales tax exemption for all services and for 44 non-service exemptions effective July 1, 1987. During the 1987 Regular Session, the Legislature passed CS/SB 777 (Chapter 87-6, L.O.F.) and CS/HB 1506 (Chapter 87-101, L.O.F.), which integrated the tax on services with the current tax on tangible personal property, provided a number of exemptions from the tax on services and reinstated selected service and non-service exemptions repealed in 1986.

During Special Session D in December 1987, the Legislature passed CS/CS/SB 5D and 6D (Chapter 87-548, L.O.F.). Effective January 1, 1988, the sales tax on all services taxed in 1986 or 1987 was repealed and the general sales tax rate was increased from 5 percent to 6 percent. The formula for the distribution of the half-cent sales tax to local governments was also changed. The cap on the State Infrastructure Fund was changed in 1987 and 1988. The "Fairness in Retail Sales Taxation Act" was created in 1987. The act requires every retailer who transacts a mail order sale in Florida to levy, collect, and remit the state sales tax.

In 1988, an additional annual sales tax dealer registration fee of $25 to $50 was levied and the transfer of 0.2 percent of total sales tax collections to the Solid Waste Management Trust Fund was required. The dealer collection allowance was amended in 1988, 1990, 1991, and 1992. A surcharge of 50 cents per day was imposed upon the lease or rental of for-hire motor vehicles designed to carry fewer than nine passengers in 1989 and increased to $2.00 in 1990, with the $1.50 increase for deposit into the State Transportation Trust Fund. The distribution for the rental car surcharge was changed in 1991. In 1991, the admissions tax was applied for the first time to all recreational or physical fitness facility fees. Amusement game machine sales were made subject to the sales tax in 1991. The gross receipts from vending machine sales became taxable at a calculated rate. The 1991 Legislature authorized, effective July 1, 1992, $166,667 of sales tax revenue to be distributed monthly to each applicant who qualifies as a "facility for a new professional sports franchise" and $41,667 to be distributed monthly to each applicant who qualifies as a "new spring training franchise."

In 1992, the sales tax on nonresidential telecommunication and electric services was increased from 6 percent to 7 percent. Effective September 1, 1992, a 6 percent sales and use tax was imposed on burglar protection services, detective services, nonresidential cleaning and pest control services, and the sale of rare coins. The dealer collection allowance was capped at $30 per month and enterprise zone tax credits were revised. In addition, penalties for failure to pay sales and use taxes were doubled. Services that are subject to the state sales and use tax were made subject to local option sales and use taxes in 1993. The exemption from the local option tax for goods which cost more than $5,000 does not apply to service transactions. In addition, conditions under which a sale of tangible personal property or a service is deemed to occur in a certain county and when a local option tax applies to dealers outside a county were revised. The Legislature authorized $166,667 of sales tax revenue to be distributed monthly to an applicant certified by the Department of Commerce as the professional golf hall of fame, for up to 300 months. In 1994, the emergency distribution from the Local Government Half-Cent Sales Tax Clearing Trust Fund to qualified counties was changed from an annual General Revenue appropriation of not less than $5.5 million to 0.054 percent of the remaining sales tax collection after specific distributions. Effective January 1, 1995, the sales tax on amusement machines was reduced from 6 percent to 4 percent and effective July 1, 1995, an annual $20 sticker per amusement machine was required. In 1995, the per-machine decal for amusement machines was replaced by a location certificate for the number of machines at a location times $30. The sports facility rebate was expanded to include current sports franchises.

The 1996 Legislature adopted a sales tax exemption for charges of electricity used to run certain machinery and equipment. The exemption was phased in over a five-year period beginning July 1, 1996.

Also in 1996, the $100,000 threshold for qualification for the machinery and equipment sales tax exemption for expanding businesses was decreased to $50,000. In addition, the new and expanding industry sales tax exemption was expanded to include printing firms and those publishing firms that export at least 50 percent of their finished product out of the state. The 1997 Legislature adopted a sales tax exemption for Internet access service and similar on-line computer services by removing them from the definition of telecommunication services. In addition, Chapter 97-50, L.O.F. (SB 780/520/692), created the Rural Job Tax Credit Program and the Urban High Crime Area Job Tax Credit Program. Each program authorizes qualified corporations to take a tax credit per eligible employee of $500, $1,000, or $1,500. This credit can be taken against the sales and use tax or the corporate income tax, but not both. The 1998 Legislature enacted a sales tax free week in August 1998 for clothing sold for $50 or less. It also extended the reduced 3 percent tax rate for some agricultural equipment to the rental of such equipment and to a variety of other agricultural equipment. Also exempted from sales tax were machinery and equipment purchased for a printing facility that expands by at least 10 percent and pollution control and solid waste management equipment.

The 1999 Legislature re-enacted a sales tax free week; this time however, it lasted nine days and covered clothing sold for less than $100. The threshold for estimated payments was raised to $200,000 and the percentage lowered to 60 percent. Also, exemptions for the labor portion of repair of machinery and equipment, various advertising agency and printer purchases, and overhead expenses for government contractors were enacted. The 2000 Legislature enacted new exemptions for the space and semi-conductor industry, for the movie and entertainment industry, and for all 501(c)(3) organizations. It also repealed the additional registration fee for large dealers. Previously funded distributions to local government from the intangibles, tobacco, and pari-mutual tax revenues were redirected to the sales tax. Also, effective October 1, 2001, the taxation of communications services was moved to a new Chapter 202, F.S. The 2001 Legislature enacted a tax holiday on purchases of clothing and school supplies of $50 or less.

Chapter 2003-404, L.O.F. (SB 12-A), reduced the sales tax distribution to the Local Government Half-Cent Sales Tax Trust Fund by 0.1 percent effective July 1, 2003. The 0.1 percent of sales tax collections was then distributed to the Public Employees Relations Commission Trust Fund, less $5,000 each month. The $5,000 each month was distributed to qualified counties pursuant to s. 218.65, F.S. Chapter 2003-402, L.O.F. (HB 113-A), changed sales tax distributions to local governments in order to provide funding for the judicial system. Effective July 1, 2004, sales tax distributions were changed as follows: the Local Government Half-Cent Sales Tax Trust Fund was reduced from 9.653 percent to 8.814 percent; the Emergency Distribution was increased from 0.065 percent to 0.095 percent; the County Revenue Sharing Trust Fund was reduced from 2.25 percent to 2.044 percent; and the Municipal Revenue Sharing Trust Fund was increased from 1.0715 percent to 1.3409 percent. The 2005 Legislature enacted sales tax holidays for clothing, books, school supplies, and hurricane preparedness articles. The Legislature also re-enacted the community contribution credit and increased the cap to $12 million, as well as fully exempted agricultural equipment.

Chapter 2007-53, L.O.F. (HB 721), provided a sales tax exemption for payments to a postsecondary educational institution for the right to conduct bookstore operations. This exemption applied retroactively to payments made on or after January 1, 2006. Also in 2007, the Legislature enacted sales tax holidays for clothing, books, school supplies, energy efficient products, and hurricane preparedness articles. Section 23 of Chapter 2007-106, L.O.F. (SB 2482), provided an exemption for certain charges for delivery, inspection, and placement of furniture and appliances. The 2007 Legislature also provided an exemption on land owned by the Florida Turnpike Enterprise and exempted electricity used on a farm.

Chapter 2008-153, L.O.F. (HB 5003), provided tax credits equal to 50 percent of a community contribution to projects that provide homeownership opportunities for low-income or very low income households. Credits were capped at $200,000 per business annually and the program capped the credits at $13.0 million for Fiscal Year 2008-09 only. These credits could be used for sales tax, corporate income tax, or insurance premium tax. Chapter 2009-68, L.O.F. (SB 1750), removed the distribution of sales and use taxes to the Ecosystem Management and Restoration Trust Fund and redirected those monies to general revenue.

In 2010, the Legislature enacted a sales tax holiday lasting for three days, covering clothing and books under $50 and school supplies under $10. Chapter 2010-147, L.O.F. (SB 1752), provided a cap of $18,000 on the tax collected on the sale or use of a boat, limited the tax on fractional aircraft to $300, provided a tax credit for certain film and entertainment companies, and expanded the exemption for sales tax on admissions to championship games to include the MLB Home Run Derby, the NFL Pro Bowl, and any all-star games for either the NBA or NHL.

Chapter 2011-76, L.O.F. (HB 143), provided a three-day sales tax holiday on clothing and shoes under $75 and school supplies under $15.

Chapter 2012-32, L.O.F. (HB 7087), provided a three-day back-to-school sales tax holiday exempting sales tax for clothing and shoes under $75 and school supplies under $15; extended credit through Fiscal Year 2015-16 for the film entertainment industry; provided credit against sales tax for some enterprise zones; modified an existing urban high-crimes job credit; provided sales tax exemption for sales or leases on taxicabs with handicap accessible capabilities; exempted sales tax for turbine engine manufacturing; expanded the manufacturers' machinery and equipment exemption; exempted sales tax on electricity used in beef and pork packing houses; and exempted sales tax on repair costs for aircrafts with weight between 2,000 and 15,000 pounds. Chapter 2012-145, L.O.F. (HB 5701), eliminated the sales tax collection allowance for paper filers. Chapter 2012-104, L.O.F. (HB 59), expanded the definition of spaceport territory to include additional counties and areas in the state. Chapter 2012-22, L.O.F. (HB 859), revised the limitations on the amount of tax credits available for contributions to the Florida Tax Credit Scholarship Program, some of which may come from holders of a direct pay sales tax certificate.

Chapter 2013-42, L.O.F. (SB 406), provided a three-day sales tax holiday on clothing and shoes less than $75, school supplies less than $15, and personal computers and accessories less than $750; amended the brownfield building materials refund, exempted natural gas used in a fuel cell, exempted certain rotary wing aircraft, and provided distributions for spring training facilities. Chapter 2013-82, L.O.F. (HB 423), exempted off-highway dyed diesel used in commercial fishing. Chapter 2013-39, L.O.F. (HB 7007), provided a temporary exemption for machinery and equipment purchased by certain specified industrial classifications; the exemption was effective April 30, 2014 and expired April 30, 2017.

Chapter 2014-199, L.O.F. (HB 343), provided for a surcharge of $1 per usage of less than 24 hours for certain uses by car sharing services. Chapter 2014-38, L.O.F. (HB5601), clarified the definition of "Prepaid Mobile Communication Services" which are subject to sales and use tax; extended the Community Contribution tax credit until 2017; added cement mixers to the eligible items for the temporary manufacturing machinery and equipment exemption authorized in 2013; exempted certain college meal plans; exempted child car seats; exempted therapeutic pet food; exempted youth bicycle helmets; provided a method for private label credit cards to take a credit for bad debt; reduced the sales tax rate on commercial electricity from 7 percent to 4.35 percent and provides for revised distributions from sales tax to local governments through the Local Government Half Cent Revenue Sharing Program, the County Revenue Sharing Program, and the Municipal Revenue Sharing Program; provided a nine-day sales tax holiday on certain hurricane preparedness items; provided a three day sales tax holiday for the first $1,500 of sales price on certain energy efficient appliances, and provided a three day sales tax holiday on clothing and footwear less than $100, school supplies less than $15, and for the first $750 of the sales price for computers and accessories.

Chapter 2015-221, L.O.F. (HB33A), provided an exemption for certain agricultural products including irrigation equipment, replacement parts and accessories for power farm equipment and irrigation equipment, repairs of power farm equipment and irrigation equipment, stakes used by a farmer to support plants during agricultural production and the sale price below $20,000 of a trailer weighing 12,000 pounds or less when purchased by a farmer for exclusive use in agricultural production or to transport farm products; provided an exemption for admissions and membership fees for gun clubs; provided a one-year exemption for textbooks and printed and digital materials required for postsecondary education; exempted any motor vehicle purchased or used for six months or longer in a foreign country by an active member of the United States Armed Forces or that member's

spouse; provides a cap on the amount paid for repairs of boats at $60,000; provided a 10-day sales tax holiday on clothing and shoes priced at $100 or less and personal computers and accessories priced at $750 or less.

Chapter 2016-220, L.O.F. (HB7099), provided a permanent extension of the sales tax exemption for certain manufacturing machinery and equipment and expanded the exemption to include machinery and equipment used for certain agricultural postharvest activities and metals recycling; provided an exemption for sales of food and drink by military veterans service organizations to their members; provided a three-year phase out of the tax on asphalt used for government public works projects; provided a three-day sales tax holiday on clothing and shoes priced at $60 or less and school supplies priced at $15 or less.

Chapter 2017-36, L.O.F. (HB7109), reduced the tax rate on the rental of commercial real estate from 6 percent to 5.8 percent beginning January 1, 2018; provided a sales tax exemption for certain feminine hygiene products, certain animal and aquaculture health products, certain resales of admissions, certain products purchased for the operation and maintenance of municipally owned golf courses by third parties, purchases of certain construction materials, equipment and electricity for datacenters and purchases of certain materials, goods and services used for new construction in Rural Areas of Opportunity; provided a three-day sales tax holiday on clothing and shoes priced at $60 or less, school supplies priced at $15 or less, and personal computers and accessories priced at $750 or less; provided a three-day sales tax holiday on certain items related to disaster preparedness.

Chapter 2018-6, L.O.F. (HB 7055) created the Hope Scholarship Program and the Florida Sales Tax Credit Program.

Chapter 2018-118, L.O.F. (HB 7087) further reduced the tax rate on the rental of commercial real estate from 5.8 percent to 5.7 percent beginning January 1, 2019; provided a three-day sales tax holiday on clothing and shoes priced at $60 or less and school supplies priced at $15 or less; provided a seven-day sales tax holiday for certain items related to disaster preparedness; provided certain refunds for farm buildings and fencing materials damaged by Hurricane Irma; provided exemptions for roll off containers, and provided certain aquaculture exemptions.

Chapter 2019-42, L.O.F. (HB 7123) reduced the tax rate on the rental of commercial real estate from 5.7 percent to 5.5 percent beginning January 1, 2020; provided a five-day sales tax holiday on clothing and shoes priced at $60 or less, school supplies priced at $15 or less, and personal computers and accessories priced at $1000 or less; provided a seven-day sales tax holiday for certain items related to disaster preparedness; provided an exemption of items purchased for resale and subsequently donated to 501(c)(3) organizations; and provides refunds for sales tax paid on agricultural fencing and building materials for property damaged by Hurricane Michael.

Chapter 2021-2, L.O.F. (SB 50) (“Park Randall ‘Randy’ Miller Act”) required out-of-state retailers and marketplace providers with no physical presence in Florida to collect Florida’s sales tax on sales of taxable items delivered to purchasers in Florida if the out-of-state retailers or marketplace provider makes a substantial number of sales into Florida; required out-of-state retailers and marketplaces providers to collect a county’s local discretionary sales surtax when a taxable item is delivered into a county that imposes a surtax; and provided a reduction of the tax rate on the rental of commercial real estate from 5.5 percent to 2.0 percent effective on the first day of the second month following the repeal of s. 212.20(6)(d)6.h., F.S.

Chapter 2021-31, L.O.F. (HB 7061) provided a ten-day back-to-school sales tax holiday exempting sales tax for clothing and shoes under $60, school supplies under $15, and the first $1000 of the sales price of personal computers and accessories; provided a ten-day sales tax holiday for certain items related to disaster preparedness; provided a seven-day sales tax holiday for certain items related to recreational activities and specified admissions; provided a sales tax exemption for certain tangible personal property items that assist in independent living; and created the Strong Families Tax Credit Program.

Chapter 2021-193, L.O.F. (HB 3) provided a tax credit for donations to the New Worlds Reading Initiative. The New Worlds Reading Initiative is a program providing books to elementary school students in Florida who read below their current grade level. The tax credits are a dollar-for-dollar credit against the business's liability for several state taxes including the Sales and Use Taxes due from direct pay permits holders. The annual cap for the program is $60 million per state fiscal year.

Chapter 2022-97, L.O.F. (HB7071) provided an exemption for admission to FIFA World Cup matches, Formula One Grand Prix races, and Daytona 500 events; provided a 3% tax on the retail sale of new mobile homes; provided an exemption for agricultural fences; expands the exemption for agricultural trailers; provided an exemption for machinery and equipment for the production of electrical or steam energy from the burning of hydrogen; provides a three-month sales tax holiday on the retail sale of children's books; halts sales tax collection on "Energy Star appliances" including certain appliances selling for $1,500 or less, and refrigerator or combination refrigerator/freezers selling for $3,000 or less, from July 1, 2022, through June 30, 2023; halts sales tax collection on children's diapers and baby/toddler clothes, apparel, and shoes from July 1, 2022, through June 30, 2023; halts sales tax collection on the retail sale of impact-resistant windows, doors, and garage doors from July 1, 2022 through June 30, 2024; provides a 14-day sales tax holiday for clothing and shoes $100 or less, school supplies $50 or less, learning aids $30 or less, and computers or related accessories $1,500 or less; provided a 14-day sales tax holiday on certain disaster preparedness items; provided a week-long sales tax holiday for admission to certain events/activities and the retail sale of certain accessories related to these activities; provided a week-long sales tax holiday for certain tools commonly used by skilled trade workers.

Chapter 2023-157, L.O.F. (HB7063) reduced the tax rate on the rental of commercial real estate from 5.5 percent to 4.5 percent beginning December 1, 2023; provided a sales tax exemption for baby and toddler products including baby cribs, baby strollers, baby safety gates, baby monitors, child safety locks and latches, bicycle child carrier seats and trailers, baby exercisers, breast pumps, baby wipes, changing tables, children's diapers and baby and toddler clothing and shoes for children age 5 or younger; provided a sales tax exemption for diapers and incontinence products; provided an exemption for oral hygiene products; provided an exemption for firearm safety devices; provided an exemption for private investigators; provided an exemption for materials used to construct or repair fencing used to contain cattle on agricultural land; and provided a sales tax exemption for machinery and equipment that is primarily used in the production, storage, transportation, compression or blending of renewable natural gas. Also in 2023, the Legislature provided a one year sales tax holiday on natural gas ranges and cooktops; provided a one year sales tax holiday on energy star appliances; provided two 14-day back-to-school sales tax holidays exempting sales tax for clothing, wallets and bags under $100, school supplies under $50, learning aids and jigsaw puzzles under $30 and personal computers and accessories under $1,500 per item; provided two 14-day sales tax holidays for certain items related to disaster preparedness; provided a three-month sales tax holiday for certain items related to recreational activities and specified admissions; and provided a 7-day sales tax holiday for tools and equipment commonly used in skilled trades.

Chapter 2024-158, L.O.F. (HB7073) provided a 14-day back-to-school exemption for certain clothing and school supplies, two 14-day disaster preparedness exemptions for disaster preparedness supplies, a 31-day freedom month exemption for recreational items and activities, and a 7-day tool time exemption for tools. Additionally, the bill allowed leasing companies to pay sales tax up front on vehicles, allowed Duval County to levy an indigent care sales surtax if voters approve, and provided instructions for how an invalid discretionary sales surtax is to be suspended.

Chapter 2025-208, L.O.F. (HB 7031) provided a hunting, fishing, and camping exemption on ammunition, firearms, firearm accessories, bows, crossbows, bow and crossbow accessories, camping supplies, and fishing supplies from September 8 through December 31, 2025. The bill also provided a permanent back-to-school exemption on clothing, wallets, bags, apparel, footwear, school supplies, learning aids, jigsaw puzzles, personal computers of $1,500 sale price or less, and computer accessories occurring annually in the month of August. Additionally, the following items became permanently exempt: admissions to the NASCAR Cup Series Championship Race, sanctioned by NASCAR, when held at the Homestead-Miami Speedway, including any qualifying or support races held at the same track up to 72 hours before the race; admission to state parks;

batteries; bicycle helmets; bullion; carbon monoxide detectors; fire extinguishers; ground anchor systems; insect repellent; life jackets; portable gas cans; portable generators; smoke detectors; sunscreen; and tarpaulins. Finally, the bill repeals the tax on commercial rent. In addition, Chapter 2025-100, L.O.F. (HB 999) provided a tax exemption for any gold coin or silver coin recognized as legal tender in this state pursuant to s. 215.986, F.S.

BASE AND RATE:
Chapter 212, F.S.: 6 percent - retail sales of most tangible personal property items; admissions to amusements; transient lodgings; motor vehicles; and ships and commercial fishing equipment. 6 percent - burglar protection services; detective services; nonresidential cleaning and pest control services. 4.35 percent - nonresidential electric services, and 4 percent - coin-operated amusement machines. Use tax is imposed at corresponding rates. The 6.8 percent tax on cable and non-residential telephone services can be found in Chapter 202, F.S. – see the communications services tax chapter in this publication.

DISPOSITION:
General sales and use tax:

Ecosystem and Restoration Management Trust Fund: the 0.2 percent distribution from total sales tax collections was removed by Chapter 2009-68, L.O.F. (SB 1750), and the monies were redirected to the General Revenue Fund.

Local Government Half-Cent Sales Tax Clearing Trust Fund: 8.9744 percent of collections remaining after distribution to the General Revenue Fund in the amount previously distributed to the State Infrastructure Fund and the Ecosystem and Restoration Management Trust Fund. Beginning July 1, 2003, the amount to be transferred to the Local Government Half-Cent Sales Tax Clearing Trust Fund was reduced by 0.1 percent. The 0.1 percent, less $5,000 each month, is distributed to the Public Employees Relations Commission Trust Fund.

Fiscally Constrained Counties: Since July 1, 2006, a special distribution of 30 percent of the remaining portion of communications services tax proceeds remitted under Chapter 202, F.S., and transferred to the Local Government Half-Cent Sales Tax Clearing Trust Fund pursuant to s. 202.18(2)(c), F.S., is distributed to fiscally constrained counties in accordance with s. 218.67, F.S.

A fiscally constrained county is defined by s. 218.67(1), F.S., as any county that is entirely within a Rural Area of Critical Economic Concern as designated by the Governor pursuant to s. 288.0656, F.S., or each county for which the value of a mill will raise no more than $5 million in revenue, based on the taxable value certified pursuant to s. 1011.62(4)(a)1.a., F.S., from the previous July 1.

In all, 29 counties are receiving fiscally constrained county distributions from the Half-Cent Sales Tax Clearing Trust Fund. When these distributions began in Fiscal Year 2006-07, 30 counties were receiving the distribution; Sumter County has since fallen off. The following table depicts the estimated distributions from the Half-Cent Sales Tax Clearing Trust Fund to fiscally constrained counties in the 2025-26 fiscal year:

**Estimated Fiscally Constrained County Distributions for Fiscal Year 2025-26**

| No. | COUNTY | Fiscally Constrained Distribution | No. | COUNTY | Fiscally Constrained Distribution |
|---|---|---|---|---|---|
| 1 | Baker | $256,376 | 16 | Holmes | $510,258 |
| 2 | Bradford | $351,528 | 17 | Jackson | $278,355 |
| 3 | Calhoun | $332,840 | 18 | Jefferson | $289,066 |
| 4 | Columbia | $273,613 | 19 | Lafayette | $348,326 |
| 5 | De Soto | $281,262 | 20 | Levy | $305,505 |
| 6 | Dixie | $336,190 | 21 | Liberty | $331,710 |
| 7 | Franklin | $181,866 | 22 | Madison | $327,883 |
| 8 | Gadsden | $305,856 | 23 | Okeechobee | $280,974 |
| 9 | Gilchrist | $289,805 | 24 | Putnam | $293,841 |
| 10 | Glades | $309,468 | 25 | Suwannee | $314,971 |
| 11 | Gulf | $206,633 | 26 | Taylor | $271,090 |
| 12 | Hamilton | $363,517 | 27 | Union | $537,294 |
| 13 | Hardee | $296,098 | 28 | Wakulla | $271,991 |
| 14 | Hendry | $251,231 | 29 | Washington | $291,027 |
| 15 | Highlands | $273,177 | | | |
| | TOTAL | | | | $8,961,750 |

Emergency Distribution: After the above mentioned distributions, 0.0966 percent is transferred to the Local Government Half-Cent Sales Tax Clearing Trust Fund, along with $5,000 per month, and distributed to qualified counties pursuant to s. 218.65, F.S.

County Revenue Sharing: After the above distributions, 2.0810 percent is transferred to the County Revenue Sharing Trust Fund. (These distributions used to be funded from intangibles taxes.)

Municipal Revenue Sharing: After the first three distributions, 1.3653 percent is distributed to the Municipal Revenue Sharing Trust Fund. (These distributions used to be funded from tobacco taxes.)

County Distribution: $29,915,500 is distributed to counties in even shares. (These distributions used to be funded from the pari-mutuel tax.)

Professional Sports Franchise: $166,667 distributed monthly to each applicant who qualifies as a "facility for a new professional sports franchise" and $41,667 monthly to each applicant who qualifies as a "new spring training franchise."

Professional Golf Hall of Fame: $166,667 distributed monthly to an applicant certified by the Department of Economic Opportunity, for up to 300 months. The last scheduled distribution to the selected applicant (St. Johns County Industrial Development Authority) was June 2023.

General Revenue Fund: Remainder of taxes remitted.

OTHER STATES:
Alaska, Delaware, Montana, New Hampshire, and Oregon do not have a state sales tax. Rates in other levying states (other than special rates for specified types of transactions) vary from 2.9 percent to 7.25 percent. The median rate is 6 percent and many states allow local option sales taxes. Fifteen states have higher state rates than Florida. Twenty-seven states have higher state and local rates than Florida, where at least one local jurisdiction levies that rate. Individual state's rates can be found at www.taxadmin.org.

# SALES AND USE TAX

| | 2026-27 (millions) |
|---|---|
| VALUE OF RATE CHANGE: | |
| Value of 1 percent levy on tax base Chapters 212 and 202, F.S. | $7,231.7 |

Note: The above estimate does not take into account reduced or increased demand as a result of the price effect of a tax change.

| | |
|---|---|
| DISTRIBUTION TO LOCAL GOVERNMENT: | |
| Local Government Half-Cent Sales Tax (s. 218.61, F.S.) | $2,883.4 |
| County Revenue Sharing (s. 212.20(6)(d)5, F.S.) | $766.8 |
| Municipal Revenue Sharing (s. 212.20(6)(d)6, F.S.) | $503.1 |
| County Share (s. 212.20(6)(d)7, F.S.) | $29.9 |
| | |
| ALTERNATIVE BASES: | |
| Convert sales tax to an invoice-credit value added tax (tax all final consumption at 6 percent) | $79,271.2 |
| Broaden resale exemption under current sales tax to exempt any business purchase | ($11,830.6) |

| | | | **GRAND TOTAL** | **27,149.6** | |
| | | | Note: Some exemptions overlap, so repeal of all items would NOT yield the total shown | | |

| | |
|---|---|
| **H = Household Items** | **15,927.1** |
| **O = Organizations** | **1,771.1** |
| **B = Business Items** | **6,731.3** |
| **M = Miscellaneous** | **2,720.1** |
| **Grand Total (*).....** | **27,149.6** |

n/a - Estimate not available.

**(*) Items shown in italics are NOT included in the grand total for all exemptions.**

Repeal of items shown in italics would substantially alter the character of the tax. For example, repeal of the resale provision (item #8 and others) would effectively convert the sales tax to a transactional gross receipts tax.

1 Estimate reflects only sales by businesses.

2 Estimate excludes items exempt under other provisions as well.

3 Impact included in estimate for item #8

4 The estimate represents only sales of stocks and bonds traded in national markets. A variety of additional items would also be potentially taxed.

5 Impact included in estimate for #210 -Leases to or by fair associations for real or tangible personal property .

6 The 2005 Super Bowl was held in Jacksonville. This exemption is estimated to cost $2.4m. In 2007, it was held in Miami, in 2009 it was held in Tampa, and in 2010 it was held in Miami. The Superbowl is scheduled to be held in Miami in 2020 and in Tampa in 2021.

7 No evidence exists that any taxpayers currently avail themselves of this exemption.

8 Estimate reflects entire charge for funeral and crematory services. Net revenue from repeal may be reduced by value of caskets, depending on the billing procedures of each business.

9 Based on exemption permits issued, this amount could increase significantly if taxpayers receive development authorization.

10 Excludes tax on federal purchases. Taxation would require congressional authorization.

11 The statutory tax rate for electricity is 4.35%.

12 Estimate assumes other supporting statutory changes in addition to exemption repeal.

13 Item #182 is included in #183 due to a rewrite of the religious and 501(c)(3) exemptions in 2000.

**EXCLUSIONS, EXEMPTIONS, DEDUCTIONS AND CREDITS FROM THE SALES & USE TAX**

# SERVICE CHARGES

FLORIDA STATUTES: Sections 215.20, 215.211, 215.22, 215.23, and 215.24

ADMINISTERED BY: Department of Financial Services

SUMMARY:
All income of a revenue nature deposited in all trust funds is subject to an 8 percent service charge to be deposited into the General Revenue Fund except for funds and revenues enumerated in ss. 215.22 and 215.211, F.S., and except for certain revenues subject to a 4 percent service charge in the Department of Agriculture and Consumer Services and the Department of Citrus pursuant to s. 215.20(2), F.S. The Governor is also authorized under s. 215.24, F.S., to exempt certain revenues from the service charge under certain conditions.

REVENUE:

| Fiscal Year | Collections | Annual Change % |
|---|---|---|
| 2026-27* | 578,400,000 | 1.26% |
| 2025-26* | 571,200,000 | 50.14% |
| 2024-25 | 380,443,822 | 4.19% |
| 2023-24 | 365,144,373 | -34.76% |
| 2022-23 | 559,688,479 | -11.67% |
| 2021-22 | 633,649,898 | 17.93% |
| 2020-21 | 537,311,939 | 11.07% |

* Estimate

HISTORY:
General Revenue Service Charges are transfers from trust funds to the General Revenue Fund. In the past, rates ranged from 0.3 percent to 7.3 percent. Current rates are either 4 percent (specific trust funds and revenues in the Department of Agriculture and Consumer Services and the Department of Citrus) or 8 percent (trust funds in all other departments and agencies).

The policy of assessing certain specified trust funds a service charge was established in 1941, and rates were set at 3 percent. Rate changes occurred in 1961, 1979, 1983, and 1990. A large number of trust funds were added in 1983.

In 1990, all trust funds not specifically exempt under s. 215.22, F.S., were made subject to the 7 percent General Revenue Service Charge. An additional 0.3 percent General Revenue Service Charge was imposed on trust funds specifically enumerated in s. 215.20(4), F.S.

In order to fund Mobility 2000, service charges imposed on collections of motor fuel and diesel fuel taxes, local option fuel taxes, auto title fees, and the $100 “new-wheels-on-the-road” fee were eliminated pursuant to Chapter 2000-257, L.O.F. (SB 862). Effective July 1, 2000, the 7.3 percent General Revenue Service Charge was eliminated on the Fuel Tax Collection Trust Fund for motor fuel and diesel fuel tax collections and on the $24 original certificate of title fee and each duplicate copy fee. Effective July 1, 2001, the 7.3 percent General Revenue Service Charge was eliminated on State Comprehensive Enhanced Transportation System (SCETS) tax collections and on the $100 “new-wheels-on-the road” fee. The service charge on local option fuel tax collections was phased out over a two-year period. Effective July 1, 2005, the General Revenue Service Charge rate on the Fuel Tax Collection Trust Fund was reduced from 7.3 percent to 3.5 percent and effective July 1, 2006, and thereafter, the 3.5 percent General Revenue Service Charge was eliminated.

Chapter 2008-114, L.O.F. (SB 1882), redirected the 7.3 percent General Revenue Service Charge assessed on the second local option fuel tax imposed under s. 336.0251(1)(b), F.S., from the University Concurrency Trust Fund to the General Revenue Fund.

Chapter 2009-78, L.O.F. (SB 1806), abolished the 0.3 percent service charge on certain funds and imposed a service charge of 8 percent on all trust funds except those specified in the Departments of Citrus and Agriculture and Consumer Services, which were made subject to a service charge of 4 percent.

Chapter 2011-174, L.O.F. (SB 1087), changed the assessment calculation for the Special Disabilities Trust Fund from a fiscal-year basis to a calendar-year basis, which shifted the collection of $34.8 million of trust fund revenues into FY 2011-12 from FY 2012-13. The shift resulted in an increase to service charge revenues of $2.8 million in FY 2011-12 and a decrease of $3.0 million in FY 2012-13.

Chapter 2013-44, L.O.F. (SB 1512), exempted from the General Revenue Service Charge all moneys from service charges, fees, costs, and fines deposited into the Clerks of the Court Trust Fund within the Department of Revenue. The exemption was estimated to reduce General Revenue Service Charge revenues by $32.8 million in FY 2013-14.

Chapter 2015-229, L.O.F. (SB 2516-A), implemented the Water and Land Conservation Constitutional Amendment, which was approved by Florida voters in 2014. The bill changed the distribution formula for documentary stamp tax revenues under s. 201.15, F.S. The revised formula resulted in an estimated reduction of $59.3 million in General Revenue Service Charge revenues in FY 2015-16.

Chapter 2023-017, L.O.F. (SB 102), redirected the service charge on documentary stamp taxes for ten years—from FY 2023-24 through FY 2032-33—to provide up to $150 million annually for affordable housing initiatives.

Chapter 2025-200, L.O.F. (HB 7031), reinstated the service charge on documentary stamp taxes beginning FY 2025-26 and eliminated the $150 million additional annual distribution for affordable housing initiatives.

BASE AND RATE:
All trust funds that are not exempt from the service charge are assessed an 8 percent service charge except specified trust funds in the Department of Agriculture and Consumer Services and the Department of Citrus, which are assessed 4 percent. The service charge is normally transferred during the quarter following the quarter in which revenue is collected.

DISPOSITION:
Service charges are deposited into the General Revenue Fund by transfer from specified trust fund accounts.

OTHER STATES:
There is no data available for interstate comparison on such service charges. The practice developed from the extensive earmarking of revenues for particular agencies or programs. It may be viewed as an internal accounting device by which to apportion some of the costs of general government to specific functional activities that are supported entirely by earmarked funds.

# SEVERANCE TAXES - OIL AND GAS

FLORIDA STATUTES: Chapter 211, Part I

ADMINISTERED BY: Department of Revenue

SUMMARY:
Oil and gas production in Florida is subject to the severance tax. Ordinary oil production is taxed at 8 percent of the gross value at the point of production. A small well (less than 100 barrels per day) of oil is taxed at 5 percent of gross value. Tertiary oil and mature field recovery oil are taxed at a graduated rate depending upon the price per barrel. If the price is $60 per barrel or lower, the tax is 1 percent of gross value at the point of production. If the price is between $60 and $80 per barrel, the first $60 is taxed at 1 percent of gross value, and the remaining price is taxed at 7 percent of gross value. If the price is $80 per barrel or higher, the first $60 is taxed at 1 percent of gross value, the price between $60 and $80 per barrel is taxed at 7 percent of gross value, and the remaining price is taxed at 9 percent of gross value. Gas and sulfur are taxed at rates that are recalculated annually, using a base rate and adjustment factor based on the previous calendar year's producer price indices.

REVENUE:

| Fiscal Year | Collections | Annual Change % | General Revenue Distribution | Distribution to Counties | Minerals Trust Fund |
|---|---|---|---|---|---|
| 2026-27* | 1,100,000 | 10.00% | 650,000 | 250,000 | 200,000 |
| 2025-26* | 1,000,000 | -15.17% | 580,000 | 220,000 | 200,000 |
| 2024-25 | 1,178,884 | -44.54% | 809,404 | 305,862 | 63,619 |
| 2023-24 | 2,125,659 | -32.72% | 1,324,487 | 435,937 | 365,235 |
| 2022-23 | 3,159,281 | 16.94% | 2,014,410 | 620,785 | 524,086 |
| 2021-22 | 2,701,644 | 122.71% | 1,743,074 | 516,613 | 441,957 |
| 2020-21 | 1,213,063 | -31.48% | 628,106 | 201,320 | 383,637 |

* Estimate
Note: Collections and General Revenue Distribution provided above have been reduced by tax scholarship program credits.

HISTORY:
Currently, the severance tax on oil and gas is composed of four separate taxes with different bases and rates. Small well oil is taxed at the rate of 5 percent of gross value. Tertiary oil and mature field recovery oil are taxed at a graduated rate. All other oil is taxed at the rate of 8 percent of gross value. Gas is taxed by volume using a base rate adjusted each year for the gas fuels producer price index; this process is described in s. 211.025, F.S. Sulfur is taxed by long ton (2,240 pounds) using a base rate adjusted each year for the sulfur producer price index; this process is described in s. 211.026, F.S. Definitions for each tax are provided in s. 211.01, F.S.

Severance taxation of oil and gas began in 1945 at a 5 percent rate. The rate on oil was increased to 8 percent in 1977. In 1979, the disposition of funds was changed to reflect the creation of the Division of State Lands, with 50 percent of the tax going to the Conservation and Recreation Land (CARL) Trust Fund, 37.5 percent of the oil tax and 30 percent of the gas tax going to the General Revenue Fund, and 12.5 percent of the oil tax and 20 percent of the gas tax going to the producing county.

In 1986, Part I of Chapter 211, F.S., was substantially rewritten to make the basis for the tax on severing gas and oil an indexed rate per unit of production instead of a percentage of value. At that time, sulfur produced from hydrogen sulfide gas was made taxable.

In 1987, the disposition of the oil, gas, and sulfur tax was changed. The 50 percent disposition to the CARL Trust Fund was eliminated and placed into the General Revenue Fund, resulting in 87.5 percent of the 8 percent oil tax and 80 percent of the 5 percent oil, gas, and sulfur tax going to the General Revenue Fund. The disposition of the oil and gas tax was changed again by the 1994 Legislature. Effective July 1, 1995, 75 percent of the 8 percent oil tax and 67.5 percent of the 5 percent oil, gas, and sulfur tax were distributed to the General Revenue Fund, and 12.5 percent of all sources to the Minerals Trust Fund. The remaining 12.5 percent of the 8 percent oil and 20 percent of the 5 percent small well oil and tertiary oil, gas, and sulfur is returned to the board of county commissioners of the county where production occurred.

Chapter 96-323, L.O.F. (SB 330), provided for a five-year tax exemption for new oil wells completed after July 1, 1997; this exemption has expired.

Chapter 2009-139, L. O. F. (HB 515), changed the tax rate on tertiary oil from 5 percent of gross value to a graduated rate based on the per-barrel price. If the price is $60 per barrel or lower, the tax is 1 percent of gross value at the point of production. If the price is between $60 and $80 per barrel, the first $60 is taxed at 1 percent of gross value, and the remaining price is taxed at 7 percent of gross value. If the price is $80 per barrel or higher, the first $60 is taxed at 1 percent of gross value, the price between $60 and $80 per barrel is taxed at 7 percent of gross value, and the remaining price is taxed at 9 percent of gross value (codified at s. 211.02, F.S.).

Chapter 2010-24, L.O.F. (SB 2126), expanded the revenue sources against which the Florida Tax Credit Scholarship credits may be granted to taxes authorized under s. 211.0251, F.S., relating to taxes on the production of oil and gas.

Chapter 2012-32, L O.F. (HB 7087), defined mature field recovery oil and taxed the oil from a mature field at the same tax rate as tertiary oil. The distribution of the proceeds was also changed. For small well oil, tertiary oil, and mature field recovery oil: 63.5 percent is distributed to the General Revenue Fund; 20 percent to the county where it was produced; and 16.5 percent to the Minerals Trust Fund.

Chapter 2021-31, L.O.F. (HB 7061), created the New Worlds Reading Initiative. The program provides tax credits to businesses that make monetary donations to the administrator may receive a dollar-for-dollar credit. The tax credit can be taken against severance taxes on oil and gas production. Only amounts distributed to the General Revenue fund are reduced.

Chapter 2021-193, L.O.F. (HB 3), created the Strong Families Tax Credit Program. The program provides tax credits for businesses that make monetary donations to certain eligible charitable organizations that provide services focused on child welfare and well-being. The tax credit can be taken against severance taxes on oil and gas production. Only amounts distributed to the General Revenue fund are reduced.

Chapter 2024-158, L.O.F. (HB 7073), created the Child Care Tax Credit Program. The program provides tax credits for businesses via three possible pathways: Build a Child Care Facility, Operate a Child Care Facility, or Contract with a Child Care Facility. All three set up different individual caps based on the number of employees. The tax credit can be taken against severance taxes on oil and gas production. Only amounts distributed to the General Revenue fund are reduced.

BASE AND RATE:
Oil: Small wells are taxed at 5 percent of gross value at the point of production, while all other wells are taxed at 8 percent of the gross value. Oil produced by tertiary methods is taxed at a graduated rate based on the per-barrel price.

Gas: The tax is determined by the volume, in 1,000 cubic feet (MCF), of gas produced and sold or used. The tax rate incorporates a ratio of the annual average of the gas fuels Producer Price Index from the prior calendar

year, as of May, and 1109.0. The ratio is then applied to the base rate of $0.171 per MCF. The tax rate effective July 1, 2025, was $0.171 per MCF. (DOR TIP #25B07-02)

Sulfur: The tax is determined by the long tons of sulfur produced or recovered from the hydrogen sulfide gas contained in oil or gas production. The tax rate incorporates a ratio of the annual average of the sulfur Producer Price Index from the prior calendar year, as of May, and 100.0. The ratio is then applied to the base rate of $2.43 per long ton. The tax rate effective July 1, 2025, was $6.38 per long ton. (DOR TIP #25B07-02)

DISPOSITION:

| Distributions of: | To General Revenue | To County* | To Minerals Trust Fund |
|---|---|---|---|
| 8% Oil | 75.0% | 12.5% | 12.5% |
| 5% Oil (small wells), tertiary, mature fields | 63.5% | 20.0% | 16.5% |
| Gas | 67.5% | 20.0% | 12.5% |
| Sulfur | 67.5% | 20.0% | 12.5% |

* County where production took place.

OTHER STATES:[1]
Various types of severance taxes are levied in other states. Thirty-two other states specifically tax the production of oil and gas. Some states include petroleum production taxes in mineral severance regulations.

| | 2026-27 (Millions) |
|---|---|
| VALUE OF RATE CHANGE: | |
| Value of 1 percent increase in tax rate: | |
| Oil currently taxed at 8 percent of gross value | $0.1 |

# SEVERANCE TAXES - SOLID MINERALS

FLORIDA STATUTES: Chapter 211, Part II

ADMINISTERED BY: Department of Revenue

SUMMARY:
Phosphate, heavy minerals, and other solid minerals are subject to the severance tax. The tax rate on the severance of phosphate rock is $1.61 per ton. According to s. 211.3106 (3)(a), F. S., the tax rate for heavy minerals should be calculated annually by multiplying the base rate ($1.34 per ton) and the change in the 5-year moving average of the annual producer price index (PPI) for titanium dioxide relative to the base period. However, this PPI is no longer available and there is no comparable index, the adjustment is held constant to the 2019 adjustment, resulting in a stable tax of $3.80 per ton. Other solid minerals are taxed at 8 percent of the value at the point of severance.

REVENUE:

| Fiscal Year | Total Collections | Annual Change % | General Revenue Distribution | Distribution to Counties |
|---|---|---|---|---|
| 2026-27* | 16,730,000 | -1.12% | 5,950,000 | 3,670,000 |

* Estimate
** A payment of $4.2m that was due June 30th, 2022 was recorded in July 2022. The timing of the payment makes FY 2021-22 artificially low and FY 2022-23 artificially high.

HISTORY:
Currently, severance tax on solid minerals is composed of three separate taxes. Severance of phosphate rock is taxed at $1.61 per ton severed. As of 2019, severance of heavy minerals is taxed at a constant rate. Severance of other solid minerals are taxed at the rate of 8 percent of value at the point of severance.

Severance taxation of solid minerals was first enacted into law in 1971. Transition rates were provided during the first four years; 1971 through 1975. Tax rates were changed in 1977, 1981, 1987, and 1988. The 1988 tax rate became the new base and is adjusted annually by changes in the phosphate rock index. Disposition of revenues were changed in 1979, 1980, 1987, 1989, 1991, and 1994. The disposition of the solid minerals severance tax was changed by the 2000 Legislature. Effective July 1, 2000, 55.15 percent of the phosphate tax and 32 percent of the other solid minerals tax was distributed to the General Revenue Fund and 14.35 percent of the phosphate tax and 68 percent of the other solid minerals tax to the Minerals Trust Fund.

In 2003, during Special Session E, Chapter 2003-423, L.O.F. (SB 18-E), amended Part II of Chapter 211 to increase the severance tax on phosphate rock from $1.31 per ton severed to $1.62 per ton. In addition, a new distribution formula for the tax proceeds was adopted, eliminating the General Revenue distribution for Fiscal Year 2003-04. Beginning July 1, 2003, after the first $10 million goes to the Conservation and Recreation Lands (CARL) Trust Fund, the remaining revenues were distributed as follows: 18.75 percent to the county where mined; 11.25 percent to the Phosphate Research Trust Fund; 11.25 percent to the Minerals Trust Fund; 43.75 percent to Non-Mandatory Land Reclamation (NMLR) Trust Fund; and 15.0

percent to counties that have been designated a Rural Area of Critical Economic Concern. Beginning July 1, 2004, after the first $10 million goes to the CARL Trust Fund, the remaining revenues were distributed as follows: 40.1 percent to the General Revenue Fund; 16.5 percent to the county where mined; 9.3 percent to the Phosphate Research Trust Fund; 10.7 percent to the Minerals Trust Fund; 10.4 percent to NMLR Trust Fund; and 13.0 percent to any county designated a Rural Area of Critical Economic Concern.

Chapter 2008-150, L.O.F. (SB 1294), amended s. 211.3103, F.S., relating to the severance tax on phosphate rock. A surcharge of $1.38 per ton severed was imposed, and the excise tax rate was set at $1.945 per ton severed. This excise tax rate is to remain constant until July 1 of the fiscal year following the date when revenues collected from the surcharge equal or exceed $60 million. At that point, a base rate of $1.51 per ton severed is established. Each taxpayer is allowed a surcharge offset equal to the difference between the rate that would have been charged based on the base rate adjustment during the period and the rate of $1.51 times the tonnage severed. Distribution of the tax will also change when the surcharge equals $60 million. At that time, proceeds of the tax on phosphate rock will be exempt from the General Revenue Service Charge, with the proceeds divided as follows: 25.5 percent to the CARL Trust Fund; 37 percent to the General Revenue Fund; 13.6 percent to counties in proportion to the tons of phosphate rock produced within each county; 10.7 percent to counties designated as Rural Areas of Critical Economic Concern in proportion to the tons of phosphate rock produced within each county; 6.6 percent to the NMLR Trust Fund; and 6.6 percent to the Phosphate Research Trust Fund in the Division of Universities of the Department of Education.

Chapter 2010-166, L.O.F. (HB 5801), amended s. 211.3103, F.S., relating to the severance tax on phosphate rock. The tax rate for Fiscal Year 2010-11 was set at $1.71 per ton severed, and the tax rate for Fiscal Year 2011-12 was set at $1.61 per ton severed. The distribution of the tax for Fiscal Year 2010-11 is: 21.9 percent to the CARL Trust Fund; 37.1 percent to General Revenue; 12 percent to counties in proportion to the tons of phosphate rock produced within each county; 9.4 percent to counties designated as Rural Areas of Critical Economic Concern in proportion to the tons of phosphate rock produced within each county; 5.8 percent to the NMLR Trust Fund; 5.8 percent to the Phosphate Research Trust Fund; and 8.0 percent to the Minerals Trust Fund. Beginning in Fiscal Year 2010-11, severance tax proceeds are exempt from the General Revenue Service Charge. The legislation also set distribution percentages for Fiscal Year 2011-12 at: 25.5 percent to the CARL Trust Fund; 35.7 percent to General Revenue; 12.8 percent to counties in proportion to the tons of phosphate rock produced within each county; 10.0 percent to counties designated as Rural Areas of Critical Economic Concern in proportion to the tons of phosphate rock produced within each county; 6.2 percent to the NMLR Trust Fund; 6.2 percent to the Phosphate Research Trust Fund; and 3.6 percent to the Minerals Trust Fund.

Chapter 2012-32, L.O.F. (HB 7087), amended s. 211.3103, F.S., relating to the severance tax on phosphate. For the period between January 1, 2015, and December 31, 2022, the tax rate shall be $1.80 per ton severed. The distribution for this period is: 22.8 percent to the CARL Trust Fund; 31.9 percent to General Revenue; 11.5 percent to counties in proportion to the tons of phosphate rock produced within each county, 8.9 percent to counties designated as Rural Areas of Critical Economic Concern in proportion to the tons of phosphate rock produced within each county; 16.1 percent to the NMLR Trust Fund; 5.6 percent to the Phosphate Research Trust Fund, and 3.2 percent to the Minerals Trust Fund.

Chapter 2015-229 amended s.211.3103, F.S., relating to the severance tax on phosphate. The State Park Trust Fund replaced the Conservation and Recreation Lands Trust Fund, receiving 22.8 percent of the severance tax on phosphate. After January 1, 2024, the distribution for the tax is: 25.5 percent to the State Park Trust Fund; 35.7 percent to General Revenue; 12.8 percent to counties in proportion to the tons of phosphate rock produced within each county, 10.0 percent to counties designated as Rural Areas of Critical Economic Concern in proportion to the tons of phosphate rock produced within each county; 6.2

percent to the NMLR Trust Fund; 6.2 percent to the Phosphate Research Trust Fund, and 3.6 percent to the Minerals Trust Fund.

BASE AND RATE:
Phosphate: Beginning January 1, 2023, the tax rate is $1.61 per ton severed. From January 1, 2015 through December 31, 2022, the rate was $1.80.

| Calendar Year | Tax Rate Per Ton of Phosphate | Total Tons |
|---|---|---|
| 2024 | $1.61 | 11,119,926 |
| 2023 | $1.61 | 11,437,298 |
| 2022 | $1.80 | 12,112,097 |
| 2021 | $1.80 | 15,715,916 |
| 2020 | $1.80 | 14,087,012 |
| 2019 | $1.80 | 15,322,254 |

Heavy Minerals: Calculated annually by multiplying the base rate ($1.34 per ton) by the base rate adjustment for that year. The base rate adjustment factor is a five-year moving average of the annual Producer Price Index for heavy metals. The tax rate for calendar year 2025 is set at $3.80 per ton (DOR TIP #25B07-01).

Other Solid Minerals: Eight percent of value at the point of severance.

DISPOSITION:

| Phosphate Distribution: | Fiscal Year 2024-25 | Fiscal Year 2025-26 | Fiscal Year 2026-27 |
|---|---|---|---|
| State Park Trust Fund | 25.5% | 25.5% | 25.5% |
| General Revenue Fund | 35.7% | 35.7% | 35.7% |
| County where Mined | 12.8% | 12.8% | 12.8% |
| Phosphate Research Trust Fund | 6.2% | 6.2% | 6.2% |
| Minerals Trust Fund | 3.6% | 3.6% | 3.6% |
| Non-Mandatory Land Reclamation Trust Fund | 6.2% | 6.2% | 6.2% |
| Counties Designated as Rural Areas of Critical Economic Concern | 10.0% | 10.0% | 10.0% |
| | | | |
| Other Solid Minerals (Excluding Phosphate and Heavy Minerals) Distribution: | Fiscal Year 2024-25 | Fiscal Year 2025-26 | Fiscal Year 2026-27 |
| General Revenue Fund | 32.0% | 32.0% | 32.0% |
| Minerals Trust Fund | 68.0% | 68.0% | 68.0% |

OTHER STATES:[1]
Thirty-nine other states levy a severance tax on natural resources. Many states levy taxes on specific resources, but some have general resource severance taxes, which may include oil and gas, minerals, and forestry products. The tax is generally based on the market value of the resource severed, except for coal,

[1] The Book of the States | 2021 | Volume 53 by The Council of State Governments (Table 7.29), https://issuu.com/csg.publications/docs/bos_2021_issuu

where the rate is sometimes based on the amount of production. Some states assess a percentage of gross value while others levy a dollar amount. The rate varies from state to state and is often graduated according to type and quality. Credits or refunds are sometimes given for reclamation work.

VALUE OF RATE CHANGE:
Increasing the current tax rate on phosphate by 10 cents in Fiscal Year 2026-27 would produce about $1.0 million in total (about $0.3 million to General Revenue).

VALUE OF EXEMPTIONS:
Although s. 211.3108, F.S., provides four specific exemptions, no exemptions have been taken in the past five years. The four exemptions are for taxes due on: (1) solid minerals sold to governmental entities in Florida; (2) solid minerals, except phosphate rock and heavy minerals, on which the sales tax is ultimately paid; (3) solid minerals extracted by the owner of the site for improving the site, subject to a restoration or reclamation program; and (4) solid minerals, except for phosphate rock, which are severed solely for direct application in agricultural uses.

Although s. 212.085(5)(b)5., F.S., provides a credit against severance taxes due for machinery and equipment purchased for use in phosphate or other solid mineral severance, mining, or processing operations, no credit has been taken under this provision for the past five years. Additionally, the exemption is conditioned upon the machinery and equipment purchase being made for a new or expanding business.

DISTRIBUTION TO TRUST FUNDS (TF) (in $M):

| Distribution to: | State Parks TF | Nonmandatory Land Reclamation TF | Phosphate Research TF | Minerals TF |
|---|---|---|---|---|
| 2024-25 | $4.6 | $0.9 | $0.9 | $1.0 |
| 2023-24 | $4.7 | $0.9 | $0.9 | $1.1 |
| 2022-23 | $5.0 | $2.3 | $1.1 | $1.1 |
| 2021-22 | $5.7 | $2.5 | $1.3 | $1.1 |
| 2020-21 | $6.4 | $4.2 | $1.5 | $1.4 |
| 2019-20 | $6.3 | $4.1 | $1.4 | $1.5 |

DISTRIBUTION TO COUNTIES* (in $M):

| Distribution to: | Counties of Production | Counties within designated Rural Areas of Critical State Concern |
|---|---|---|
| 2024-25 | $2.292 | $1.790 |
| 2023-24 | $2.366 | $1.834 |
| 2022-23 | $2.551 | $1.978 |
| 2021-22 | $2.814 | $2.177 |
| 2020-21 | $3.146 | $2.435 |
| 2019-20 | $3.171 | $2.454 |

* Provided by the Department of Revenue

ALTERNATIVE BASES:
A number of other states impose a severance tax or fee on other severed products, including fisheries, coal, and timber or forestry products. Several states currently impose a severance tax on timber or forestry products.[2]

| *State* | *Tax or Fee* |
|---|---|
| **Alabama** | Forest Products Severance Tax |
| **Arkansas** | Timber Severance Tax |
| **California** | Lumber Products Assessment |
| **Illinois** | Timber Fee |
| **Louisiana** | Timber Severance Tax |
| **Mississippi** | Timber Severance Tax |
| **New Hampshire** | Timber Tax |
| **North Carolina** | Primary Forest Product Assessment Tax |
| **Oregon** | Forest Products Harvest Tax<br>STF Severance Tax - Eastern Oregon Forestland Option<br>STF Severance Tax - Western Oregon Forestland Option |
| **South Carolina** | Forest Renewal Tax |
| **Virginia** | Forest Products Tax |
| **Washington** | Timber Excise Tax |
| **West Virginia** | Timber Severance Tax |
| **Wisconsin** | Forest Crop Law Severance Tax<br>Managed Forest Law Tax |

Florida has an estimated 16,952,518 acres of forest land.[3] There are about 68 primary wood processing mills accounting for production in the State. The majority of roundwood production is from pulpwood (45.8%), with saw logs (26.3%) coming in second.

The timber industry was hard hit by Hurricane Michael in 2018.

| Year | 2018 | 2019 | 2020 | 2021 | 2022 | 2023 |
|---|---|---|---|---|---|---|
| Volume (MCF) of roundwood[4] | 645,107 | 514,241 | 533,792 | 498,174 | 454,040 | 409,237 |

A one-cent severance tax per cubic foot on all roundwood output would have yielded $4.09 million in 2023.

# SLOT MACHINE TAX & FEES

FLORIDA STATUTES: Chapter 551 & 550.135

ADMINISTERED BY: Formerly, the Department of Business and Professional Regulation, Division of Pari-Mutuel Wagering. As of July 1, 2022, the Florida Gaming Control Commission assumed oversight.

SUMMARY:
Taxes are imposed at a rate of 35 percent on slot machine revenues at each pari-mutuel facility that has slot machines. Each facility must also pay an annual license fee of $2.0 million and a fee of $250,000 to fund programs for the prevention of compulsive gambling. A series of occupational license fees for employees of the facilities and associated businesses is also imposed.

REVENUE:

| Fiscal Year | Total Collections | Annual Change % | Slot Machine Tax Collections | Facility License Fee Collections | Occupational Licenses Fees (Including Fingerprint Fees) | Addictive Gambling Program Fee Collections |
|---|---|---|---|---|---|---|
| 2026-27* | 261,900,000 | 0.96% | 245,700,000 | 14,000,000 | 200,000 | 2,000,000 |
| 2025-26* | 259,400,000 | 1.06% | 243,200,000 | 14,000,000 | 200,000 | 2,000,000 |

* Estimate

HISTORY:
Slot machines were first made legal in Florida for a limited time period running from 1935 to 1937. Slots activity after that was illegal. Florida voters rejected separate casino gambling proposals in 1979 and 1986. In November 1994, Florida voters defeated a proposed constitutional amendment which would have authorized up to 47 casinos, including five riverboat casinos and 30 casinos at existing pari-mutuel facilities. In November of 2004, voters approved an amendment to the Florida Constitution which resulted in the creation of Section 23, Article X, which allows the authorization of slot machines in pari-mutuel facilities in Miami-Dade and/or Broward Counties, subject to voter approval. In 2005, the voters of Broward County approved slot machines by referendum, while Miami-Dade voters did not. Chapter 2005-362, L.O.F. (HB 1-B), provided for the regulation of slot machines. A tax rate of 50 percent was assessed on slot machine revenues, and facility license fees, occupational license fees, and a fee to fund an addictive gambling prevention program were established. Slot machines began operating in Broward County in late 2006. Chapter 2007-252, L.O.F. (HB 1047), increased the maximum number of machines in a facility from 1,500 to 2,000 and provided for increased operating hours.

In 2008, Miami-Dade voters approved slot machines in the pari-mutuel facilities in their county. Chapter 2010-29, L.O.F. (SB 622), provided for the following changes: (1) reduced the facility license fee from $3.0 million to $2.5 million in Fiscal Year 2010-11 and to $2.0 million beginning in Fiscal Year 2011-12; (2) changed the payment frequency for taxes due from weekly to monthly beginning July 1, 2012; (3) authorized slot machines at Hialeah Park; (4) reduced the tax rate from 50 percent to 35 percent, with a floor on tax collections equal to 2008-09 collections; (5) allowed for progressive games; (6) changed the required prize payout percentage; and (7) reduced the minimum age for players from 21 to 18.

Chapter 2021-271, L.O.F. (SB 8-A) established a revised and updated Indian Gaming Compact, but did not become effective until August 11, 2021 when the approved 2021 Gaming Compact between the State of Florida and the Seminole Tribe of Florida was published in the Federal Register. Chapter 2021-271, L.O.F. (SB 8-A) provided that slot machine gaming areas may be open 24 hours per day throughout the year.

Chapter 2022-179, L.O.F. (SB 2510) provided that the Florida Gaming Control Commission shall evaluate the slot license fees and make specified recommendations to the Legislature before January 1, 2026. Additionally, it removed the requirement in s. 550.135, F.S., that unappropriated funds in excess of those necessary for incurred obligations and subsequent year cash flow for slot machine regulation operations be deposited into the General Revenue Fund.

Chapter 2025-208, L.O.F. (HB 7031) amended Section 551.106(1)(a), F.S. adding, "Beginning July 1, 2025, each thoroughbred permitholder in compliance with this chapter is not required to pay an annual license fee to the commission as a condition of renewal."

BASE AND RATE:
Slot Machine Tax: 35 percent of slot machine revenues.

Facility License Fee: $2.0 million annually.

Occupational Licenses: Determined by rule. Up to $50 annually for a general or professional occupational license for an employee of the slot machine licensee; up to $1,000 annually for a business occupational license for nonemployees of the licensee providing goods or services to the slot machine licensee.

Addictive Gambling Program Fee: $250,000 annually for each facility which has slot machines.

DISPOSITION:
Slot Machine Tax: All proceeds are distributed to the Educational Enhancement Trust Fund.

Facility License Fee: Of total collections, 8 percent are deducted as service charges to the General Revenue Fund, with the remainder going to the Pari-Mutuel Wagering Trust Fund.

Occupational Licenses: Of total collections, 8 percent are deducted as service charges to the General Revenue Fund, with the remainder going to the Pari-Mutuel Wagering Trust Fund.

Addictive Gambling Program Fee: Of total collections, 8 percent are deducted as service charges to the General Revenue Fund, with the remainder going to the Pari-Mutuel Wagering Trust Fund to contract for services related to the prevention of compulsive and addictive gambling.

Prior to the 2022 Legislative Session, funds deposited into the Pari-mutuel Wagering Trust Fund pursuant to ss. 551.106, 551.107(2)(a)1., and 551.118 were reserved in the trust fund for slot machine regulatory operations. On June 30, any unappropriated funds in excess of those necessary for incurred obligations and subsequent year cash flow for slot machine regulatory operations were deposited with the Chief Financial Officer to the credit of the General Revenue Fund. This amounted to $3 million in FY 2021-22, $10 million in FY 2020-21, $11.7 million in FY 2019-20, $11.6 million in FY 2018-19 and $11.5 million in FY 2017-18. This transfer is no longer required.

OTHER STATES:
Currently, many states offer slot machines or video lottery terminals in some venue. Tax rates and venue restrictions vary widely by state.

# TOBACCO SETTLEMENT PAYMENTS

FLORIDA STATUTES: Sections 17.41 and 215.56005

ADMINISTERED BY: Department of Financial Services

SUMMARY:
Tobacco settlement payments are funds received by the state that result from the settlement of State of Florida vs. American Tobacco Co., et al.

REVENUE:

| Fiscal Year | Collections | Annual Change % |
|---|---|---|
| 2026-27* | 319,000,000 | -0.96% |
| 2025-26* | 322,100,000 | -1.80% |
| 2024-25 | 327,991,528 | -6.88% |
| 2023-24 | 352,233,719 | -8.53% |
| 2022-23 | 385,095,678 | -6.55% |
| 2021-22 | 412,100,751 | 2.37% |
| 2020-21 | 402,568,422 | 20.06% |

* Estimate

HISTORY:
On August 25, 1997, the State of Florida as plaintiff entered into a settlement agreement as the result of a lawsuit (State of Florida, et al. v. American Tobacco Company, et al.). The settlement provided for payments to the state in perpetuity in the amount of $440 million annually beginning in 1999, with annual adjustments for inflation, profits and the level of sales of the settling defendants. In addition, the state received payments from 1998 through 2002 as a result of the Multi-State Settlement Agreement between the tobacco companies and 46 other states which were not party to the original agreement. Since FY 2010-11, the state of Florida has also received annual settlement funds from Liggett; those payments will expire in FY 2030-31.

In 1999, the Lawton Chiles Endowment Fund (Chapter 99-167, L.O.F.; HB 1855) was established to provide a perpetual funding source for the enhancement of state health programs and biomedical research. The fund was established with the initial settlement payments and payments accruing to the state from the Multi-State Settlement Agreement. Chapter 2000-128, L.O.F. (HB 1721), created the Tobacco Settlement Financing Corporation which was granted authority to issue bonds secured by tobacco settlement funds, but the Corporation has never used its bonding authority.

On January 18, 2017, the State of Florida filed a Motion to Join ITG Brands, LLC as a Defendant and to enforce the Settlement Agreement in the State of Florida, et. al., v. Am. Tobacco Co., R.J. Reynolds Tobacco Co., et. al., No. 95-1466 AH (Fla. 15th Cir. Ct.). On August 18, 2018, the Circuit Court entered a final judgment specifying the principal sum and interest due from R.J. Reynolds to the State of Florida for the period June 12, 2015, through April 30, 2018, as well as providing guidance on how any future unpaid liability to the State should be calculated. In addition, the final judgment reflected the court's rulings issued December 27, 2017, and May 24, 2018, collectively known as the "Liability Orders." R.J. Reynolds subsequently appealed the lower court's decision regarding its liability. On July 29, 2020, the District Court of Appeal unanimously affirmed the lower court's final judgment in all respects, and on September 18, 2020, denied the Appellant's motion for rehearing, rehearing en banc, and certification to the Florida Supreme Court. In response, R.J. Reynolds paid the State of Florida $192,869,589.86 million to cover the full amount of the outstanding judgment (inclusive of principal and interest). This amount

was deposited into the General Revenue Fund on October 6, 2020. Notwithstanding this payment, R.J. Reynolds filed Notice to Invoke Discretionary Jurisdiction of the Florida Supreme Court on October 15, 2020, seeking review of the District Court of Appeal's opinion. On December 18, 2020, the Florida Supreme Court declined to accept jurisdiction and denied the petition for review, indicating that no motion for rehearing would be entertained.

In 2021, Chapter 2021-43 L.O.F. (HB 5011) terminated the Lawton Chiles Endowment Fund and repealed section 215.5601, Florida Statutes, which established the fund. The legislation directed the State Board of Administration to redirect all existing funds from the Lawton Chiles Endowment Fund to the Budget Stabilization Trust Fund by June 30, 2022.

DISPOSITION:
Settlement payments are deposited in the Tobacco Settlement Trust Fund for use as appropriated by the Legislature.

OTHER STATES:
All states now receive payments through various settlements. Some states have transferred their rights to future payments to other entities in return for lump-sum payments.

# UNCLAIMED PROPERTY
# (STATE SCHOOL TRUST FUND)

FLORIDA STATUTES: Chapter 717

ADMINISTERED BY: Department of Financial Services

SUMMARY:
Real and intangible property of Florida citizens held by businesses is deemed abandoned after a statutorily defined period of inactivity or nonuse. Such property is required to be transferred to the state pending claims from rightful owners. Property held by the state is available to the rightful owners indefinitely, upon filing a claim and establishing rightful ownership. All funds received under Chapter 717, F.S., are deposited in the Unclaimed Property Trust Fund, from which the Department of Financial Services makes payment of claims and pays the costs of administering the unclaimed property program. All remaining funds in excess of $15 million are typically transferred to the State School Trust Fund administered by the Department of Education.

REVENUE:

| Fiscal Year | Total Collections | Annual Change % | State School Trust Fund |
|---|---|---|---|
| 2026-27* | 795,400,000 | -2.10% | 338,300,000 |
| 2025-26* | 812,500,000 | -57.60% | 367,400,000 |
| 2024-25** | 1,916,200,000 | 149.25% | 450,000,000 |
| 2023-24 | 768,800,000 | -8.22% | 395,000,000 |
| 2022-23 | 837,700,000 | 31.32% | 425,000,000 |
| 2021-22 | 637,900,000 | -7.21% | 263,300,000 |
| 2020-21 | 687,500,000 | 37.06% | 328,500,000 |

*Estimate
** The sharp spike in collections in FY 2024-25 includes $1.09 billion in atypical collections prompted by Chapter 2024-140, Laws of Florida, being enacted

HISTORY:
Abandoned property is a category of the common law of property which deals with personal property which has left the possession of its rightful owner without having directly entered the possession of another person. In 1981, the National Conference of Commissioners on Uniform State Laws sought to address the problems arising from these types of property through provisions of the Uniform Unclaimed Property Act. In 1987, Florida adopted the Florida Disposition of Unclaimed Property Act (Chapter 87-105, L.O.F.) to provide a statutory procedure for the escheat and disposition of presumably abandoned property to the state. In 2001, Chapter 717, F.S., was rewritten primarily to update the administration of the Act (Chapter 2001-36, L.O.F. (HB 107)).

Chapter 2003-281, L.O.F. (HB 513), provided that dormant proceeds from insurance demutualization were deemed abandoned after two years. Chapter 2007-256, L.O.F. (SB 1638), removed gift cards and similar items from property subject to the provisions of Chapter 717, F.S.

Chapter 2013-172, L.O.F. (SB 492), reduced the dormancy period from five years to two years for intangible property held in trust by a fiduciary. As implemented by the Department of Financial Services, this law change only affects testamentary and inheritance-type trusts. Chapter 2013-34, L.O.F. (SB 464), authorized the Department of Financial Services to allow electronic submission of claims, including an alternative method of identity verification for property under $1,000 in value.

## UNCLAIMED PROPERTY
## (STATE SCHOOL TRUST FUND)

Chapter 2016-90, L.O.F. (HB 783), increased the value of small estates that can be claimed without a probate court order from $5,000 to $10,000 and expanded the authorization of the Department of Financial Services with respect to estimating the value of unclaimed property when a property holder refuses to provide records requested by the department during an audit. Chapter 2016-219, L.O.F. (SB 966), required all life insurance companies to conduct an annual match of policies against the Death Master File to determine whether the death of an insured, annuitant, or retained asset account holder is indicated. The legislation also changed the start of the dormancy period from the date the "funds became due and payable as established from the records of the insurance company" to the "date of death of the insured, the annuitant, or the retained asset account holder."

Chapter 2018-71, L.O.F. (HB 1361), clarified that unclaimed property in the court registry will escheat to the state under the provisions of Chapter 717, F.S., and required Clerks of Court to report and remit any funds that remain unclaimed one year after an owner or entitlement has been determined. The legislation eliminated the surplus trustee process for judicial sales and, instead, required Clerks of Court to report and remit to the state under the provisions of Chapter 717, F.S., any funds that remain unclaimed one year after the judicial sale. The legislation specified that any surplus of less than $10 will escheat to the Clerk rather than to the state and also repealed the $25 surplus trustee annual application/renewal fee.

Chapter 2019-140, L.O.F. (HB 1393), authorized DFS to develop and implement an identification verification and disbursement process for accounts valued at $2,000 or less. The process would allow the department to disburse refunds automatically to apparent owners after the department verifies that the owner is living and the current address is correct. The new legislation also authorized DFS to develop and implement an identification verification and disbursement process for accounts for which the apparent owner is a public agency, including state agencies, county governments, public school districts, municipalities, and special taxing districts.

Chapter 2021-144, L.O.F. (HB 425), required the Division of Unclaimed Property to adopt forms for an Unclaimed Property Recovery Agreement and an Unclaimed Purchase Agreement. The legislation allows the Division of Unclaimed Property to accept electronic claims for unclaimed property valued at $2,000 or less. Prior to the legislation, electronic claims for unclaimed property could only be accepted at $1,000 or less.

Chapter 2024-140, L.O.F. (CS/CS/CS/HB 989), updated statutory definitions and procedures to account for modern business and consumer practices. The legislation revised section 717.1101, F.S., which now clearly states stock, or other equity interest in a business association, is presumed unclaimed after notice of the owner's death or 3 years after the most recent owner-generated activity recorded in the holder's database or records system. The legislation also defined virtual currency and set a dormancy period of five years before a banking organization, corporation, custodian, exchange, or other entity filing a report of unclaimed property with the Division of Unclaimed Property must liquidate the virtual currency and remit the proceeds to the state.

DISPOSITION:
Property transferred to the state is deposited into the Unclaimed Property Trust Fund for eventual transfer to the State School Trust Fund.

OTHER STATES:
Every state has unclaimed property laws which declare money, property, and other assets to be abandoned after a period of inactivity.

# VESSEL LICENSES

FLORIDA STATUTES: Chapter 328

ADMINISTERED BY: Department of Highway Safety and Motor Vehicles

SUMMARY:
All motorboats operated on Florida waters must be registered annually with the Department of Highway Safety and Motor Vehicles. License fees are based on the length of the boat and range from a low of $5.50 to a high of $189.75. All counties are authorized to impose an annual vessel registration fee which must be equal to 50 percent of the applicable state vessel registration fee. State License Fees may be discounted when the owner has proved ownership of an e-PIRB locator beacon.

REVENUE:

| Fiscal Year | Total Collections | Annual Change % | Marine Resources Conservation TF/ Invasive Plant Control TF | State Agency Law Enforcement Radio System Trust Fund | General Inspection Trust Fund |
|---|---|---|---|---|---|
| 2026-27* | 24,568,777 | -0.64% | 23,404,181 | 789,934 | 374,662 |
| 2025-26* | 24,726,752 | -1.22% | 23,552,308 | 797,410 | 377,034 |

* Estimate

HISTORY:
In lieu of property taxes, boats must be registered and numbered in Florida. A major portion of collections are appropriated annually for boating related programs operated by counties. The 1984 Legislature authorized the annual appropriation of $250,000 from the Motorboat Revolving Trust Fund to the Save the Manatee Trust Fund to be used to protect and recover manatee and other marine mammals. Applicants may pay an additional $2 - $5 voluntary contribution for manatee and marine protection and an additional $5 voluntary contribution to the Marine Turtle Protection Trust Fund to be used for turtle protection, research, and recovery. In 1988, a $1 surcharge was added to each annual vessel registration for deposit into the State Agency Law Enforcement Radio System Trust Fund for the acquisition and implementation of a statewide law enforcement radio communications system. In 1990, all counties, not just those counties with a population of 100,000 or more, were authorized to impose an annual vessel registration fee. The fee must be equal to 50 percent of the applicable state vessel registration fee. The annual appropriation to the Save the Manatee Trust Fund was changed from a flat "$250,000" to "equal to" $1 for each vessel registration in the state. An additional 50 cents per vessel registration was authorized for transfer to the Save the Manatee Trust Fund in 1991 and vessel registrations fees were increased by 50 cents.

Chapter 95-333, L.O.F. (HB 725), transferred vessel registrations from the Department of Environmental Protection to the Department of Highway Safety and Motor Vehicles. Effective July 1, 1996, the vessel registration period was changed from June 1 to the vessel owner's birth month. The legislation also required county tax collectors to remit vessel registration fees to the department within five working days after the close of the business day the fees are collected. The 1996 Legislature terminated the Motorboat Revolving Trust Fund effective July 1, 1996, and provided for the deposit of vessel registration fees into

the Marine Resources Conservation Trust Fund. Chapter 99-289, L.O.F. (HB 589), changed the Florida Statutes references from Chapter 327 to Chapter 328. Chapter 99-248, L.O.F. (SB 1270), added a 50 cent fee on every annual vessel registration for deposit into the Highway Safety Operating Trust Fund to cover the cost of the Florida Real Time Vehicle Information System. The 2000 Legislature authorized the tax collector to distribute the county portion of vessel registration fees directly to the board of county commissioners instead of to the Department of Highway Safety and Motor Vehicles for distribution back to the counties where collected. Chapter 2001-196, L.O.F. (SB 1956), capped administrative costs for vessel registration at $1.4 million for deposit into the Highway Safety Operating Trust Fund. Chapter 2005-157, L.O.F. (HB 955), distributed $1 of the county portion of the state vessel registration fee to the Marine Resources Conservation Trust Fund to fund grant programs for public launching facilities.

Chapter 2007-242, L.O.F. (HB 275), created the biennial vehicle registration option. Vehicle owners are permitted to pay the vehicle registration taxes in advance for two years and are then issued the appropriate decal for their license plate. The fees for a two-year registration are double that of an annual registration however the distribution of the revenue does not actually occur until the year in which it would have normally been collected.

Chapter 2008-106, L.O.F. (SB 1286), raised all vessel registration fees effective July 1, 2008, by 50 to 60 percent. The vessel dealer registration fee was also raised to $25.50. In addition, beginning in 2013 and every five years thereafter, the vessel registration fees are to be adjusted by the percentage change in the Consumer Price Index for All Urban Consumers.

Chapter 2013-194, L.O.F. (HB 333), deleted the requirement that vessel registration fees be adjusted by the percentage change in Consumer Price Index for All Urban Consumers. Chapter 2013-160, L.O.F. (HB 7125), changed the deposit ceiling to Highway Safety Operating Trust Fund from $1.4 million to equal the administrative costs incurred by the department.

Chapter 2016-126, L.O.F. (HB 427), provided a license fee reduction for vessels that have an authorized e-PIRB locator beacon. The discount varies by vessel size and ranges from a $1.26 to $22.64 reduction in the license fee.

Chapter 2016-126, L.O.F. (HB427), allowed a $400,000 transfer from the Department of Highway Safety and Motor Vehicles to the General Inspection Trust Fund to expire on July 1, 2017. These funds were used to fund activities relating to the protection, restoration, and research of the natural oyster reefs and beds of the state.

Chapter 2019-54, L.O.F. (SB1666), redirected a portion of the county retained vessel registration fee to the Marine Resources Trust Fund to fund derelict vessel removal grants. The amounts vary by vessel size and range from $0.25 to $25.46 for each 12 month period registered.

BASE AND RATE:
All motorboats: Boats and canoes with motors under 12 feet - $5.50; others - $16.25 to $189.75, depending on length. Dealer - $25.50 and $2.50 service fee to issuing agent. All counties may impose an annual vessel registration fee which must be equal to 50 percent of the applicable state vessel registration fee. In addition, a $1.00 surcharge annually on each vessel registration as provided for in s. 328.72(1), F.S., for deposit in the State Agency Law Enforcement Radio System Trust Fund. In addition, a 50 cents annual fee on each vessel registration to cover the cost of the Florida Real Time Vehicle Information System for deposit into the Highway Safety Operating Trust Fund.

DISPOSITION:
Marine Resources Conservation Trust Fund: Administration, recreational channel marking, public launching facilities, law enforcement, quality control programs, aquatic weed control, manatee protection, recovery, rescue, and rehabilitation, marine mammal protection and recovery, and marine research.

Invasive Plant Control Trust Fund: Aquatic plant research and control.

State Agency Law Enforcement Radio System Trust Fund: Acquiring and implementing a statewide radio communications system to serve state and local law enforcement agencies.

General Inspection Trust Fund: Shellfish and aquaculture development and quality control programs and research of the natural oyster reefs and beds of the state.

OTHER STATES:
Registration of recreational boats is required in all states. Forty-seven states conduct their own registration and licensing within terms of Federal statutes. Registration in the other three states is performed by the U. S. Coast Guard.

# WORKERS' COMPENSATION ASSESSMENTS

FLORIDA STATUTES: Chapter 440

ADMINISTERED BY: Department of Financial Services, Division of Workers' Compensation

SUMMARY:
The Special Disability Trust Fund was created to facilitate the reemployment of a worker with a disability or reemployment of a worker following an injury by reducing an employer's insurance premium for reemploying an injured worker. The Workers' Compensation Administration Trust Fund was established for the purpose of providing for the payment of all expenses with respect to the administration of Chapter 440, F.S. The Workers' Compensation Administration Trust Fund and the Special Disability Trust Fund are maintained by annual assessments on net premiums paid by insurance companies writing workers' compensation in Florida.

REVENUE:

| Fiscal Year | Workers' Compensation Administration Trust Fund | Annual Change % | Special Disability Trust Fund | Annual Change % |
|---|---|---|---|---|
| 2026-27* | 55,509,796 | 2.49% | 13,183,684 | 0.72% |
| 2025-26* | 54,161,548 | 2.70% | 13,089,803 | -11.25% |
| 2024-25 | 52,735,703 | -2.43% | 14,749,848 | -16.66% |
| 2023-24 | 54,051,832 | 0.55% | 17,698,944 | -1.29% |
| 2022-23 | 53,758,284 | 7.92% | 17,930,035 | 10.71% |
| 2021-22 | 49,811,043 | 1.54% | 16,196,011 | 3.16% |
| 2020-21 | 49,053,224 | -12.74% | 15,699,533 | -14.76% |

* Estimate

HISTORY:
Florida adopted workers' compensation laws in 1935. The purpose of the assessments is to fund the Workers' Compensation Administration Trust Fund and the Special Disability Trust Fund. These funds are for administrative expenses and the funding of the Special Disability Trust Fund. Assessments are made annually according to estimated expenses. In 1979, major revisions were made in the statutes for administrative purposes. The 1990 Legislature performed a comprehensive rewrite of the Workers' Compensation statute and in 1991, certain exemptions were reinstated. Substantial reform of the workers' compensation system was adopted by the 1993 Legislature in SB 12-C, during Special Session "C." Chapter 96-423, L.O.F. (HB 2723), postponed the Special Disability rate increase to 7.25 percent from July 1, 1996, to July 1, 1997. Chapter 97-262, L.O.F. (HB 1933), provided that the Special Disability Trust Fund assessment rate could not exceed 4.52 percent. In addition, the Special Disability Trust Fund is supplemented by a $250 notification fee on each notice of claim filed or re-filed after July 1, 1997, and a $500 fee on each proof of claim filed after July 1, 1997. Chapter 2000-150, L.O.F. (SB 2532), reduced the cap on the assessment for the Administration Trust Fund from 4 percent to 2.75 percent, effective January 1, 2001. Chapter 2014-109 L.O.F. (HB 271), reduced the cap on the assessment for the Special Disability Trust Fund from 4.52 percent to 2.5 percent effective January 1, 2015.

Effective January 1, 2004, the department imposed a $25 penalty for late payments or disallowances or denials of medical, hospital, pharmacy, or dental bills that are below the 95 percent timely performance standard, but meeting a 90 percent timely standard; and $50 for each bill below a 90 percent timely performance standard. These penalties are paid by the carrier to the Workers' Compensation Administration Trust Fund. In order to ensure carrier compliance, the department imposed a penalty of $50 per number of installments below the 95 percent timely payment performance standard and equal to or greater than 90 percent timely payment performance standard and $100 per number of installments of compensation below a 90 percent timely payment performance standard to the Workers' Compensation Administration Trust Fund.

# WORKERS' COMPENSATION ASSESSMENTS

BASE AND RATE:
Assessments are applied to calendar year premiums for the Workers' Compensation Administration Trust Fund and on a fiscal year basis for the Special Disability Trust Fund. The assessment rates for the Workers' Compensation Administration Trust Fund for calendar year 2025 is 0.79 percent. The rate for calendar year 2026 is one quarter at 0.79 percent and three quarters at 0.90 percent. The Fiscal Year 2025-26 and Fiscal Year 2026-27 assessment rates for the Special Disability Trust Fund are 0.30 percent.

Assessment Base: Both funds are supported by annual assessments against workers' compensation insurance premiums, actual and estimated. For insurance companies, assessable mutual insurers, and self-insurance funds, assessments are based on actual premiums; for individual self-insurers, assessments are based on the amount of premiums calculated by the Division of Workers' Compensation.

DISPOSITION:
Workers' Compensation Administration Trust Fund and Special Disability Trust Fund

OTHER STATES:
All states and the District of Columbia have workers' compensation laws. Some require compulsory insurance. Others allow self-insurers to operate, as Florida does. Most levy a tax or assessment on insurance premiums to finance administration of the laws.

# MAJOR LOCAL GOVERNMENT REVENUE SOURCES

# AD VALOREM TAXES

FLORIDA STATUTES: Chapters 192, 193, 194, 195, 196, 197, and 200

ADMINISTERED BY: Units of Local Government and Florida Department of Revenue

SUMMARY: Ad valorem taxes are annual taxes levied by local governments based on the value of real and tangible personal property as of January 1 of each year. Florida's constitution prohibits the state government from levying ad valorem tax on any property except for intangible personal property. The taxable value of real and tangible personal property is the just value (i.e., the fair market value) of the property adjusted for any exclusion, differential, or exemption allowed by the Florida Constitution or the statutes. The Florida Constitution strictly limits the Legislature's authority to provide exemptions or adjustments to fair market value. Also, with certain exceptions for voter-approved levies, the Florida Constitution limits county, municipal and school district levies to ten mills each. Tax bills are mailed to property owners in November of each year based on the previous January 1st valuation and payment is due by the following March 31. Discounts are granted for early payment and most taxpayers pay by late November.

REVENUE: (millions)*

| Fiscal Year | Total Taxes Levied | % Change | Counties | % Change | School Districts | % Change | Municipalities | % Change | Special Districts ** | % Change |

* Includes operating and debt service taxes.
** Includes independent special districts only; dependent special district and MSTU levies are included with supervisory unit levy.
*** Estimates based on proposed millage rates as of August 2025.

HISTORY:
Property taxation in Florida dates from 1839, when a territorial enactment provided a tax "on every acre of first-rate land, half a cent; on every acre of second-rate land, one quarter cent; on every acre of third-rate land, one-eighth of a cent," and various levies on other real and personal property. In the early days of statehood the most significant ad valorem tax was imposed not by local governments but by the state. The ad valorem tax was imposed primarily on agricultural land and slaves.[1]

The Florida Constitution of 1885 required the Legislature to provide for a uniform and equal rate of taxation, and to prescribe such regulations as shall secure a just valuation of all property, both real and personal, except such property as may be exempted by law for municipal, educational, literary, scientific, religious, or charitable purposes. It also provided an exemption to every widow with dependents and to every person who had lost a limb or become disabled by war or misfortune.

Amendments to the Florida Constitution of 1885:

- Intangible personal property may be taxed at a different rate from real and personal property, at a maximum rate of five mills. (1924) Before this amendment, there was no distinction between intangible and other property for tax purposes. This provision was implemented in 1931 by Chapter 15789, Laws of Florida. The new legislation levied a rate of two mills on most types of intangible property.
- Motor vehicles are not subject to ad valorem tax as personal property, and are subject only to a license tax for the operation of such vehicles. (1929)
- $5,000 homestead exemption. (1934)
- No levy of ad valorem taxes on real or personal property for any state purpose. (1940)

In 1967, the Legislature passed a law providing for assessment of required pollution control facilities at salvage value. (Ch. 67-436, L.O.F.)

The current Florida Constitution, adopted in 1968, included these property tax provisions:

- No state ad valorem taxes on real or personal property;
- No ad valorem taxes on motor vehicles, boats, airplanes, trailers, trailer coaches, or mobile homes, as defined by law;
- All ad valorem taxation shall be at a uniform rate within each taxing district;
- property owned by a municipality and used exclusively by it for municipal or public purposes is exempt;
- Property used predominantly for educational, literary, scientific, religious or charitable purposes may be exempted by general law;
- $1,000 minimum exemption for household goods, to be fixed by general law;
- $500 exemption for widows, blind or totally and permanently disabled persons;

[1] In 1865, the Legislature imposed, as part of the general county tax, a levy of $2 on every dog over six months old. The tax collector was directed to kill any dog for which the tax was not paid. An exemption to the tax was provided for the City of Apalachicola. (Ch. 1502, L.O.F.)

- Regulations shall be prescribed by law which shall secure a just valuation of all property for ad valorem taxation;
- Agricultural land or land used for non-commercial recreational purposes may be classified by general law and assessed on the basis of character or use;
- Tangible personal property held as stock in trade or livestock may be valued at a specified percentage of its value, by general law;
- A $5,000 homestead exemption, and authorization for the legislation to enact general law providing a $10,000 homestead exemption to property owners who are 65 or older or permanently and totally disabled;
- Counties, school districts, and municipalities shall, and special districts may, be authorized by law to levy ad valorem taxes;
- Millage rates are limited to ten mills for all county purposes, ten mills for municipal purposes, and ten mills for all school purposes; and a county furnishing municipal services may, to the extent authorized by law, levy additional taxes within the municipal millage; and
- The 1968 Florida Constitution changed the treatment of municipal property. Prior to 1968, Article IX, section 1 of the Florida Constitution provided that "(t)he Legislature shall provide for a uniform and equal rate of taxation;… and shall prescribe such regulations as shall secure a just valuation of all property, both real and personal, excepting such property as may be exempted by general law for municipal, education, literary, scientific, religious or charitable purposes." Article VII, section 3 of the 1968 Florida Constitution, provides "(a)ll property owned by a municipality and used exclusively by it for municipal or public purposes shall be exempt from taxation." The 1968 Florida Constitution does not authorize the Legislature to exempt municipal property from taxation unless it is used exclusively by the municipality for municipal or public purposes. This provision has led to extensive litigation when the Legislature has attempted to provide ad valorem tax exemptions for property leased by municipalities to private users.

Significant Constitutional and Statutory Changes to Ad Valorem Property Taxation Since 1968

In 1975, Article VII, section 9 of the Florida Constitution, was amended to authorize ad valorem taxes for Water Management Districts. The Northwest Florida Water Management District is limited to 0.05 mill; the other districts are limited to one mill. Actual millage limits within these constitutional bounds are determined by the Legislature.

In 1976, the Legislature provided property tax exemptions for non-profit homes for the aged. (Ch. 76-234, L.O.F.) This legislation specified that residential units are used for a charitable purpose if they are occupied by permanent residents with incomes below certain limits. This legislation also provided the equivalent of a homestead exemption to residential units which did not qualify as being used charitable purpose, but were nonetheless occupied by permanent residents.

Several amendments to Article VII of the Florida Constitution were adopted in 1980:

- The homestead exemption was increased to $25,000, but the exemption increase was tied to improvement in the level of assessment of homestead property. (The increase for city and county purposes was phased in over a three year period.)
- Counties and cities were given authority to enact ad valorem exemptions for new and expanding businesses, if such exemptions were approved by a referendum. The exemptions were limited to local-option millage levied by the county or city enacting the exemption. Such exemptions would expire after 10 years unless renewed by a subsequent referendum. (Implemented by Ch. 80-347, L.O.F.)

- Tangible personal property held for sale as stock in trade or livestock may be classified for tax purposes or may be exempted from taxation. The legislature exempted all items of inventory. (Implemented by Ch. 81-308, L.O.F.)
- Ad valorem tax relief for permanent resident renters was authorized, but must be enacted by general law. (Prior to this amendment, the Legislature provided for such relief only for residents of non-profit homes for the aged and proprietary continuing care facilities.)
- State aid to local governments may be tied to relative ad valorem assessment levels. (The Florida Education Finance Program adjusts state funding by the level of assessment in each school district.)
- The Legislature was authorized to enact a tangible personal property exemption for renewable energy source devices and a real property exemption for parcels onto which such devices are installed. (An exemption was enacted by Ch. 80-163, L.O.F., but was limited to ten years for devices installed before December 31, 1990.) This constitutional provision was repealed in 2008 and replaced. (See discussion of 2008 constitutional changes.)

Prior to 1980, the exemption for property owned by governmental units did not apply to those portions of a leasehold estate which are used predominantly for a private, commercial purpose and serve no governmental, municipal, or public purpose. In 1980, the Legislature amended s. 196.199, F.S., to make such leaseholds subject to intangibles tax if rental payments are paid for the use of the property.

In 1980 the Legislature also enacted ad valorem tax reform legislation, popularly known as the "Truth in Millage" or "TRIM" law, which contained a number of major changes related to the administration of property assessments. This legislation improved the assessment review process, strengthened state supervision of assessment procedures and mandated full disclosure to taxpayers of property tax information.

In 1987, Article VII, section 6 of the Florida Constitution, was amended to permit the legislation to enact general law permitting lands which provide high recharge to Florida's aquifers to be assessed based on character of use. Prior to 1987, classification had been authorized only for agricultural land and land used exclusively for non-commercial recreational uses. Chapter 96-204, L.O.F. (SB 10), provided for classification of high-water recharge areas.

In 1992, Florida voters approved two changes to the Florida Constitution. One change authorized cities or counties to grant ad valorem tax exemptions to owners of historic properties engaging in rehabilitation or renovation of these properties, subject to general law. Chapter 92-152, L.O.F. (HB 2439), provided the general law implementation of this amendment. The second change was initiated by a petition, and limited increases in the assessment of homestead property to three percent per year or the percent change in the Consumer Price Index, whichever is lower. After a change in ownership or other termination of the homestead the property is reassessed at just value. This amendment was popularly known as "Save Our Homes."

The Florida Constitution was amended in 1998 to authorize, by general law, an additional homestead exemption for persons 65 or older whose household income is less than $20,000. The exemption is by local option, and applies to the millage of the county or municipality providing the exemption. The income limitation is adjusted annually based on changes to the Consumer Price Index. The Legislature enacted Chapter 99-341, L.O.F. (HB 291), to provide for this additional homestead exemption.

Another 1998 amendment authorized a historic preservation ad valorem tax exemption for owners of historic properties. This exemption may be offered by any county or municipality for its respective tax

levy, and the amount of this exemption and the requirements for eligible properties must be specified by general law, as well as the period of time for which this exemption may be granted.

In 2002, the Legislature increased the amount of the exemption available to certain disabled veterans from $500 to $5,000. In addition, the Florida Constitution was amended to allow local governments to grant a reduction in the assessed value of homestead property when there has been an increase in the assessed value of that property due to the construction or reconstruction of the property in order to provide living quarters for the natural or adoptive parents or grandparents of the owner, provided that at least one of the parents or grandparents is age 62 or older. This reduction in value is limited to the lesser of the increase in value resulting from the construction or reconstruction, or 20 percent of the value of the property as improved.

In 2005, legislation was passed to extend the $5,000 exemption granted to disabled ex-service members to a member's un-remarried widow or widower as long as they were married to the veteran for at least five years at the time of death. In addition, special provisions were made for persons who lost their homestead property during the 2004 hurricane season to allow them to rebuild their property without losing their Save Our Homes benefit, provided the rebuilt home was no larger than 1500 square feet (if the home originally measured 1350 square feet or less) or 110 percent of the previous square footage.

Two constitutional amendments affecting ad valorem taxation were adopted in 2006. First, the maximum value of the additional homestead exemption authorized for low income seniors was raised from $25,000 to $50,000. Second, a discount on ad valorem taxes owed on homestead property was authorized for veterans with combat related disabilities, provided that the veteran was a Florida resident at the time he or she entered service. The percentage of the discount is equal to the veteran's percentage of disability as determined by the United States Department of Veterans Affairs.

In 2007, the Legislature enacted statutory changes requiring most county, municipal, and special district governments to reduce their 2007-08 millage rates below their rolled back rates. Exceptions were made for certain fiscally limited governments and for certain types of activities. Local governments were allowed to override the prescribed rate reductions by extraordinary votes of their governing boards or by referenda of the electorate. For fiscal year 2008-09 and beyond, the same legislation limited growth of each county, city, and independent special district property tax levy to the growth in state per capita personal income growth plus growth attributable to the value of net new construction added to the tax roll each year. Again, overrides of the limitation are allowed by certain extraordinary votes or referenda.

In January 2008, a constitutional amendment proposed by the Legislature was approved that made four major changes. First, an additional homestead exemption of up to $25,000 for assessed value between $50,000 and $75,000 was granted. This exemption does not apply to school district tax bases. Second, owners of homesteads relocating within the state were given the ability to transfer up to $500,000 of value protected from taxation due to the Save Our Homes assessment limitation. Third, an exemption was granted for the first $25,000 of tangible personal property. Finally, a per parcel annual assessed value growth limitation of ten percent was created for non-homestead, non-agricultural property. The value protected from taxation as a result of this limitation does not apply to school district tax bases.

In November 2008, the voters approved three constitutional amendments proposed by the Taxation and Budget Reform Commission. One amendment required classified use assessments for certain defined working waterfront properties. Another amendment required an exemption for property dedicated in perpetuity for conservation purposes and provided for classified used assessments for land used for conservation purposes. The third amendment allowed an assessment limitation for renewable energy source devices and wind resistance improvements installed on real property used for residential purposes.

In 2009, the Legislature implemented a constitutional amendment providing tax exemptions for property dedicated in perpetuity to conservation purposes. (Ch. 2009-157, L.O.F. (HB 7157)) The Legislature also changed the burden of proof necessary to challenge a property tax assessment. (Ch. 2009-121, L.O.F. (HB 521)).

In November 2010, the voters approved a constitutional amendment that requires an additional homestead exemption for military personnel deployed on active duty outside of the United States in support of military operations designated by the Legislature. The exempt amount is based upon the number of days in the previous calendar year that the person was deployed outside of the U.S. The 2010 Legislature also clarified that offering land for sale is not a sufficient reason for denying agricultural use classification if the land continues to be used primarily for bona fide agricultural purposes. (Ch. 2010-277, L.O.F. (HB 981))

In 2011, the Legislature implemented a constitutional amendment providing an additional homestead exemption for deployed military personnel. (Ch. 2011-93, L.O.F. (HB 1141)) The Legislature also made changes to the value adjustment board process, including requiring petitioners challenging an assessment in certain circumstances to make a partial payment of ad valorem taxes before those taxes become delinquent and requiring interest to be paid on taxes owed in excess of the amount paid or on a refund determined to be due, if such a payment has been made. (Ch. 2011-181, L.O.F. (HB 281))

In November 2012, voters approved constitutional amendments that: 1) extended the current homestead property tax discount for certain disabled combat veterans to include veterans who were not Florida residents at the time they entered military service; 2) authorized the Legislature to provide a homestead property tax exemption for the surviving spouses of military veterans and first responders that die in the line of duty; and 3) authorized the Legislature to allow cities and counties to grant an additional homestead exemption for homestead property of certain low income seniors who have maintained their residence on such property for 25 years or more. The Legislature also passed a bill that clarified ambiguous language, deleted obsolete statutory provisions, and eliminated unneeded reporting requirements in the property tax statutes. The bill, among other things: amended statutory requirements for scheduling value adjustment board hearings; allowed a husband and wife who abandon jointly titled homestead property to designate the percentage of the differential between just (market) value and assessed value that is portable to a new homestead property and attributable to each spouse; allowed certain disabled veterans and other disabled persons to apply for property tax exemptions before they have received required documentation from certain agencies of the federal government; provided an exemption for certain property used exclusively for educational purposes; clarified that rental of all or substantially all of a dwelling previously claimed to be a homestead constitutes abandonment of such dwelling as a homestead. (Ch. 2012-193, L.O.F. (HB 7097))

Chapter 2013-72, Laws of Florida (SB 1830) made the following significant changes:

- Deleted the exemption for property owned by a Florida-based limited partnership whose sole general partner is a nonprofit charitable corporation. This provision applied retroactively to the 2013 tax role; (See also Ch. 2013-83, L.O.F. (HB 437));
- Made revisions relating to the meaning of aquaculture and property used exclusively for educational purposes;
- Deleted the express requirement that titleholders of homesteads must live on the homestead to qualify for the homestead tax exemption;
- Provided that a change in ownership for purposes of assessing property at just value does not apply to lessees entitled to the homestead; and

- Authorized the property appraiser to waive the application requirement after the initial application, and changed penalty provisions for improper filings for reduced assessments for living quarters of parents and grandparents.

In 2013, a number of procedural changes involving property tax assessments were also made, including changes that facilitate electronic communication in lieu of paper communication. (Chs. 2013-72, 2013-192 and 2013-109, L.O.F. (SB 1830, HB 247, and SB 556)) The requirements for a showing of adverse possession were revised. (Ch. 2013-246, L.O.F. (HB 903)) A provision was created allowing homestead property to be rented for up to 30 days per calendar year without being considered abandoned or affecting the homestead status of the property. (Ch. 2013-64., L.O.F. (SB 342)) Chapter 2013-77, L.O.F. (HB 277), implements a portion of Article VII, section 4(i) of the Florida Constitution, which allows the Legislature to prohibit the assessment of improvements to residential real property associated with installation of a renewable energy source or device.

In 2014, legislation was passed to amend the procedure for taxpayers to claim the Economic Development Ad Valorem Tax Exemption. Prior to 2014, Economic Development Ad Valorem Tax exemptions required improvements to be made or tangible personal property to be added after the adoption of an ordinance by the local government. In 2014, the Legislature amended s. 196.1995, F.S., to allow the improvements to be made after a local motion or resolution is passed but prior to adoption of an ordinance. (Ch. 2014-40, ss. 1 and 14, L.O.F. (HB 7081, and SB 730)).

The 2014 Legislature also amended the tax certificate process used for collecting unpaid tax revenue, including changes to the application to obtain a tax deed by the holder of a tax certificate, the redemption of tax certificates, sales at public auction, and the disbursement of proceeds from the sale. (Ch. 2014-211, L.O.F. (HB 797)).

In the 2015 regular session, legislation was passed to allow a taxpayer to include multiple items of substantially similar tangible personal property on a single value adjustment board petition and to pay a single filing fee (Ch. 2015-115, L.O.F. (HB 489)). In addition, the Legislature recognized in statute that leaseholds and improvements constructed and used to provide housing pursuant to the federal Military Housing Privatization Initiative on land owned by the federal government are exempt from ad valorem taxation (Ch. 2015-80, L.O.F. (HB 361)). Further, legislation was passed to require local boards of county commissioners to fund their respective property appraiser's office according to the amount determined by the DOR in its final budget determination, regardless of a pending appeal to the Administration Commission (Ch. 2015-87, L.O.F. (HB 213)).

In the first special session of 2015, the Legislature passed an omnibus tax-cut bill that, in section 1 of the bill, modified the statutory definition of "common elements" for ad valorem tax purposes to include property within the same county as a subdivision and used for at least 10 years exclusively for the benefit of lot owners within the subdivision (Ch. 2015-221, L.O.F. (HB 33-A)).

The 2016 legislature revised various procedures relating to the value adjustment board process and set a new interest rate applicable to delinquent taxes, replacing the old statutory rate of 12% with the bank prime loan rate. ((Ch. 2016-128, L.O.F. (HB 499)). Finally, the legislature clarified that for a period of up to 10 years, local option ad valorem tax exemptions may be granted in areas designated as enterprise zones as of December 30, 2015. This same legislation also specifies that replacement equipment purchased for data centers qualifies for enterprise zone exemptions and in the case of data centers, the exemption shall remain in place for a period of 20 years instead of the usual 10. (Ch. 2016-220, L.O.F. (HB 7099)).

In August and November of 2016, voters approved amendments authorizing the legislature to enact laws creating ad valorem exemptions for solar and other renewable energy source devices and certain totally and permanently disabled first responders. November 2016 also saw voter approval of an amendment limiting just value determinations for purposes of the homestead exemption for low-income seniors. The newly enacted amendment limits determinations of just valuation to the first tax year the owner applies for the exemption. The practical effect of this amendment is to allow low income seniors to maintain their exempt status even if their home value rises above the existing $250,000 cap. This amendment is retroactive to 2013, meaning property owners who originally qualified for the exemption, but subsequently lost it due to increased home value may once again qualify.

In 2017, the Legislature implemented two constitutional amendments. The first amendment provides ad valorem tax relief to certain totally and permanently disabled first responders by providing a 100 percent homestead tax exemption to first responders who are totally and permanently disabled as a result of injury sustained in the line of duty. The 100 percent exemption is also extended to the surviving spouse of the totally and permanently disabled first responder, provided certain conditions are met. (Ch. 2017-108, L.O.F. (HB 455)) The second amendment exempts 80 percent of the assessed value of renewable energy source devices from ad valorem taxes on nonresidential real property and tangible personal property. (Ch. 2017-118, L.O.F. (SB 90)).

In 2017, the Legislature also passed an omnibus tax bill that included several ad valorem tax provisions. For property tax purposes, the bill amends the definition of inventory to include certain construction and agricultural equipment. The bill further provides property tax relief for certain property used to provide affordable housing, clarifies the documentation required to obtain a property tax exemption for certain nonprofit homes for the aged, exempts charitable assisted living facilities from ad valorem taxation, clarifies the current exemption for property leased to a charter school and extends the deadline for charter schools to apply for an exemption for the 2016 tax year. (Ch. 2017-36, L.O.F. (HB 7109)).

During the 2018 session, the Legislature passed a bill that included property tax relief for certain property damaged by hurricanes or tropical storms, for certain citrus processing equipment idled due to citrus greening or Hurricane Irma, and for certain surviving spouses of disabled ex-servicemembers. The bill also updated the list of military operations for which deployed servicemembers may receive property tax relief, clarified the tax exempt status of entities created under the Florida Interlocal Cooperation Act of 1969, and clarified the property tax treatment of multiple parcel buildings. (Ch. 2018-118, L.O.F. (HB 7087)). In November 2018, voters approved a constitutional amendment to permanently retain the 10 percent cap on annual nonhomestead parcel assessment increases for property tax purposes, effective January 1, 2019.

In 2019, the Legislature passed a bill that provided property tax relief of certain agricultural equipment damaged by Hurricane Michael. The bill also provided additional flexibility to the Department of Revenue in conducting in-depth reviews of property assessment rolls in counties affected by natural disasters and adjusted the timing of payments to local governments in fiscally constrained counties and Monroe County to offset property tax refunds granted to homeowners due to hurricanes in 2016 and 2017. Further, the bill provided that school district voted discretionary operating levies are to apply proportionately to charter schools in the levying district and be used in a manner consistent with the purposes of the levy for any levy approved by a vote on or after July 1, 2019. Referenda after this date must include an explanation of how the funds will be distributed in accordance with the new requirements. (Ch. 2019-42, L.O.F. (HB 7123)).

In November 2020, voters approved an amendment to allow the same ad valorem tax discount on homestead property for combat-disabled veterans age 65 or older to carry over to the surviving spouse of a veteran receiving the discount if the surviving spouse holds legal or beneficial title to the homestead and

permanently resides thereon, provided certain requirements are met. The discount would apply to the property until the surviving spouse remarries, sells, or otherwise disposes of the property. If the surviving spouse sells the property, the discount may be transferred to the surviving spouse's new residence as long as the new residence is used as the surviving spouse's permanent residence and he or she does not remarry. (Ch. 2020-179, L.O.F. (HB 879)).

During the 2020 Legislative session, the Legislature passed a bill to allow a veteran who was honorably discharged with a service-connected total and permanent disability to receive a property tax refund of the ad valorem taxes paid for a newly acquired property prorated as of the date of the transfer if the veteran receives the homestead property tax exemption on a property in a given year, acquires legal or beneficial title to another property between January 1 and November 1 of the same year, and applies for and receives an exemption for the newly acquired property in the next year. (Ch. 2020-140, L.O.F. (HB 1249)).

In 2020, the Legislature also passed a tax bill that included several ad valorem tax provisions. The bill amended the requirements for hospitals to qualify for a charitable tax exemption. Non-profit hospitals will be required to document the value of charitable services they provide and their current charity tax exemption will be limited to the value of that charity care. The bill also updated the provisions that address conflict of interest for special magistrates, and restricted information that may be mailed with the yearly TRIM notice. Further, the bill exempts from property tax vacant affordable housing units and units occupied by persons or families that met the qualifying income thresholds at the time they began their tenancy, but whose income grew through the income thresholds. The bill also exempts from property tax an affordable housing project owned by a limited liability company, which is also owned by a limited liability company, as long as the owner of the second limited liability company is a qualifying 501(c)(3) entity. (Ch. 2020-10, L.O.F. (HB 7097)).

During the 2021 Legislative session, the Legislature passed a bill amending the process by which a low-income senior, who is 65 or older, verifies his or her income for purposes of receiving an additional homestead exemption. The bill requires the taxpayer to submit a sworn statement of household income when initially claiming the additional exemption only, rather than annually, and requires the property appraiser to annually notify each taxpayer receiving the exemption of the adjusted income limitation for that year. The taxpayer must notify the property appraiser by May 1 of each year in which his or her income exceeds the income limitation. (Ch. 2021-208, L.O.F. (HB 597)).

The Legislature also passed a comprehensive tax bill that included several ad valorem tax provisions. The bill increased a property tax discount from 50 percent to a full exemption for certain multifamily projects that provide affordable housing to low-income families; clarified the application of an exemption from ad valorem taxation for portions of property used for charitable, religious, scientific, or literary purposes; allowed certain transfers of property without loss of homestead protection; provided property tax exemptions for certain property used by certain educational institutions for educational purposes; and removed the requirement for certain hospitals to report to the Department of Revenue information regarding charitable services provided. (Ch. 2021-31, L.O.F. (HB 7061)).

During the 2022 Legislative session, the Legislature passed an omnibus tax bill that included several ad valorem tax provisions. The bill provided an abatement of ad valorem taxes for those parcels impacted by the 2021 Surfside building collapse; amended the events from which fifteen years is measured to qualify for the affordable housing property tax exemption; and specified the method for assessing agricultural land and infrastructure located on that land in the production of aquaculture. The bill further updated the list of military operations for which deployed servicemembers may receive property tax relief; expanded real property eligible for homestead exemption to that which also includes portions assessed pursuant to classified use; provided for the refund of ad valorem taxes for residential improvements rendered

uninhabitable as a result of a catastrophic event beginning in 2023; and increased the property tax exemption for widows, widowers, blind persons, and persons totally and permanently disabled from $500 to $5000. (Ch. 2022-97, L.O.F. (HB 7071)).

During the 2022A Special Legislative Session, the Legislature passed Senate Bill 4-A (Ch. 2022-272, L.O.F.), which created a refund of ad valorem taxes for residential improvements rendered uninhabitable due to 2022 Hurricanes Ian and Nicole.

In 2023, the Legislature passed two omnibus bills that contained significant ad valorem tax provisions. First, SB 102 (Ch. 2023-17, L.O.F.), created exemptions for (1) land owned by a non-profit entity that is leased for a minimum of 99 years for the purpose of providing affordable housing; (2) rent-restricted units within a newly constructed development that sets aside at least 70 units for affordable housing for households earning 120 percent of area median income or less; and (3) property owners who dedicate units for affordable housing for households earning 60 percent of area median income or less, subject to approval of an ordinance by the county or municipality.

Second, the Legislature passed HB 7063 (Ch. 2023-157, L.O.F.), which made small changes to exemptions related to educational properties and properties owned by veterans, first responders, and the surviving spouses of veterans or first responders; as well as amending the threshold for property appraisers to challenge value adjustment board decisions.

In 2024, the Legislature passed SB 328 (Ch. 2024-188, L.O.F.) which made changes to affordable housing provisions passed in Ch. 2023-17, L.O.F., (the “Live Local Act”) to address local issues in the Florida Keys, to clarify the role of the Florida Housing Finance Corporation and the property appraiser with regard to approving an exemption, to provide administrative improvements, and to clarify how property appraisers should determine the value of tax-exempt units. HB 7073 (Ch. 2024-158, L.O.F.) made additional changes to the Live Local Act by allowing local governments to opt out of the exemption for certain affordable housing units if the jurisdiction has sufficient affordable housing as determined by the Shimberg Center for Housing Studies.

That bill also allowed for an affordable housing tax exemption on the first 15 years of certain new low-income housing projects; expands the ad valorem tax benefits for renewable energy sources to include facilities used to capture and convert biogas to renewable natural gas; clarifies the timing of when certain construction works in progress constructed or installed by an electric utility become taxable; increases from three years to five years the period in which a homeowner must start repair of a damaged homestead in order to retain homestead, and makes several adjustments to notification procedures and taxpayers’ liability for unpaid taxes, penalties, and interest, if the liability is based on clerical mistakes or omissions of the property appraiser.

In 2025, the Legislature passed a comprehensive tax bill that included several ad valorem tax provisions. HB 7031 (Ch. 2025-208, L.O.F) updated provisions related to the value adjustment board process by requiring property appraisers to provide evidence to taxpayers at least 15 days before a VAB hearing, extending their deadline from 7 days; allowing petitioners to appear at VAB hearings remotely, unless a county with a population of less than 70,000 opts out; extending the period to file an appeal if the tax roll has been extended; and increasing the cap on filing fees that VABs are authorized to charge from $15 to $50.

The bill also amends three existing affordable housing provisions by expanding the exemption for land leased by a nonprofit for affordable housing for at least 99 years to include property leased from a local housing finance authority; expanding the exemption for new multifamily affordable housing subject to a land use restriction for 99 years to include property under a restriction with a local housing finance

authority and expanding the eligibility to allow successive owners of affordable housing projects to apply for the existing exemption for new multifamily affordable housing that is based on the income of the tenants. In addition, the bill also creates two new affordable housing exemptions, one for newly constructed multifamily affordable housing of at least 70 units which is on government owned property leased for at least 30 years for the purpose of affordable housing and another for multifamily affordable housing of at least 70 units which is on state-owned property leased for at least 60 years.

The bill also provides that flight simulators are treated as owned by a governmental unit rather than leased, if the simulator reverts to the government upon expiration of a lease; extends the educational property exemption to include Gold Seal certified childcare facilities if the facility is responsible for the payment of property taxes under the terms of the lease and modifies provisions related to citrus-related agricultural properties by allowing citrus packing housing and processor equipment to be assessed at salvage value for the 2025 tangible personal property tax roll if property is not able to be used due to citrus greening and extending the agricultural classification for agricultural properties affected by citrus greening or other state or federal quarantine programs to 10 years, instead of 5.

The Legislature also passed CS/CS/CS/SB 700 (Ch. 2025-22, L.O.F) which requires lands used for agricultural education or for Future Farmers of America or 4-H activities be considered agricultural lands pursuant to s. 193.461 F.S. and subject to s. 823.14, F.S. and CS/CS/SB 180 (CH. 2025-190, L.O.F.) which increases the maximum square footage a home damaged by a calamity or misfortune may rebuild or improve while still retaining the property's assessed value as of January 1 prior to the damage.

BASE AND RATE:

Base:

Taxable base is the fair market value of locally assessed real estate, tangible personal property and state assessed railroad property, less certain exclusions, differentials, exemptions, and credits.

Exclusions are specific types of property constitutionally or statutorily removed from ad valorem taxation. Major categories include: (1) transportation vehicles such as automobiles, boats, airplanes, and trailer coaches, which are constitutionally excluded from ad valorem taxes but "shall be subject to a license tax" (Fla. Const. Article VII, section 1(b)); and (2) personal property brought into the state for transshipment, which statutorily is not considered to have acquired taxable situs and therefore is not part of the tax base.

Differentials are reductions in assessments that result from a valuation standard other than fair market value. Such standards are either (1) value in current use only (e.g., agricultural value), (2) value at a specified percentage of fair market value (e.g., the Florida Constitution allows inventory and livestock to be assessed on a percentage basis, although the Legislature has exercised its option to totally exempt such property), or (3) value that results from a limitation on annual increases (e.g., increases in assessments of homestead property are limited to the lesser of 3 percent or the change in consumer price index and increases in nonhomestead property assessments are limited to a 10 percent cap).

Exemptions are deductions from assessed value, which are typically specified as a dollar amount (e.g., homestead exemption of $25,000). However, certain exemptions are equal to the total assessed value of the property (e.g., property used exclusively for charitable purposes), or are equal to a portion of the total assessment, based on the ratio of exempt use to total use provided that the exempt use must exceed 50 percent (e.g., property used predominantly for charitable purposes).

Credits, which may take the form of allowances, discounts, rebates, etc., are deductions from the tax liability of a particular taxpayer. Credits currently allowed in Florida are early payment and installment discounts of not more than 4 percent.

Deferrals do not reduce the overall tax liability of a taxpayer, but do allow for changes in the timing of payment. For example, under certain circumstances a taxpayer may defer a portion of the taxes due on homestead property for the remaining lifetime of the property owner and his or her spouse or until sale of the property.

Rate:

Millage rates vary among local governments, but are subject to both constitutional and statutory limitations. All counties, cities, and school districts are subject to a constitutional limitation of ten mills for operating purposes. Dependent special district millage rates are included in the limit applicable to the authority to which they are dependent. Independent special district millage rates are limited by the law establishing such districts. Mills above the ten mill limitation may be authorized by local voters, by referendum, to be levied for debt service without a time restriction and for other purposes for a period of not longer than two years. Counties providing municipal services may also levy up to an additional ten mills above the ten mill county limitation within those areas receiving municipal-type services. In addition, school districts are subject to certain statutory limits less than ten mills to be eligible to participate in the state K-12 funding program (FEFP). For fiscal years 1982-83 through 1984-85 county and municipal millage rates, including dependent districts, were subject to certain statutory limitations restricting the rate of growth in revenues. (See s. 200.085, F.S. (1985)) Beginning in fiscal year 2007-08 and thereafter, county, city and special district tax rates were made subject to certain statutory limitations restricting the rate of growth in revenues. (See ss. 200.065(5) and 200.185, F.S.)

Average Millage Rates* (1 mill = .1 cent or $.00l; also expressed as $1 per $1,000 or .1%)

| 2006-07 | 7.01 | 7.50 | 4.76 | 18.58 |

* Includes both operating and debt service levies. Rates shown are weighted averages based on the sum of ad valorem taxes for each type of local government relative to their respective statewide taxable base. The school taxable base is used for both counties and school districts to allow comparability of rates. The Total Millage column includes special district levies not shown separately and is calculated to equal the millage rate which would raise the total taxes levied by all taxing authorities if applied against the statewide tax roll.

DISPOSITION:
To the Local Government levying the tax.

\# Revenue impacts are based on an aggregate average millage rate of 16.47 unless otherwise indicated.

* Includes timber. Current administrative practice has resulted in the non-assessment of timber in virtually all counties, although timber is not an "annual agricultural crop," per the statutory requirement for exemption.

Notes

1. The revenue impact is calculated using total statewide millage minus the school millage.
2. Available to: quadriplegics and the following, if total household income does not exceed an annually adjusted income limit: (a) paraplegics; (b) hemiplegics; (c) other totally and permanently disabled persons confined to a wheelchair; and (d) other totally and permanently disabled persons who are blind. An inconsistency in the statutes has resulted in the administrative determination that blind persons who are not totally and permanently disabled may also receive the total exemption if they meet the income test.
3. The portions of labor union property used for educational purposes may be separately assessed, thus avoiding the predominant use requirement.
4. Applies to property used exclusively or predominantly (greater than 50 percent) for the following purposes: (a) charitable, (b) literary, (c) religious, (d) scientific, and (e) educational. Exemption is total if use for stated purposes is exclusive. For predominant use, exemption is proportional to use for stated purposes. Special statutory criteria exist for determining the eligibility of hospitals, nursing homes, homes for special services, homes for the aged, educational institutions, community centers, and labor union property.
5. U.S. government, state, county and school district property is immune from taxation. Other local government property is exempt if used exclusively by the government for municipal or public purposes. Government-owned property used by non-governmental lessees is exempt only when the lessee serves or performs a governmental or public purpose or function. The leasehold estate (i.e., the right or interest in the property created by virtue of the lease contract) is by law subject only to intangibles taxation.
6. Eligibility for exemption is determined separately for county taxes and municipal taxes. In no event does the exemption apply to school or independent district taxes. The revenue impact is calculated by assuming 50 percent of the taxable value reduction is also in cities, and applying county and city average millages to the respective amounts.
7. Computed using average county millage rate only.
8. Total value loss is for both counties and municipalities.

OTHER STATES:
All states and the District of Columbia impose local government property taxes.

# DISCRETIONARY SURTAX ON DOCUMENTS

FLORIDA STATUTES: Sections 125.0167, 201.031, F.S.

ADMINISTERED BY: Department of Revenue

SUMMARY:
Each county, as defined by s. 125.011(1), F.S., (currently only Miami-Dade County), may levy a discretionary surtax on documents for the purpose of establishing and financing a Housing Assistance Loan Trust Fund. The surtax is $0.45 per $100 or fractional part thereof, and applies only to documents taxable under s. 201.02, F.S., which are "deeds, instruments, or writings whereby any lands, tenements, or other real property, or any interest therein, shall be granted, assigned, transferred, or otherwise conveyed to, or vested in, the purchaser or any other person by his or her direction…" The surtax is not imposed on any deed conveying a single-family residence, identified as a detached dwelling, a condominium unit, or a unit held through stock ownership or membership representing a proprietary interest in a corporation owning a fee or a lease-hold initially in excess of 98 years.

REVENUE:

| Fiscal Year | Collections | Annual Change % |
|---|---|---|
| 2026-27* | 56,705,740 | 3.80% |
| 2025-26* | 54,629,807 | 1.50% |
| 2024-25 | 53,822,470 | 22.82% |
| 2023-24 | 43,822,166 | -33.37% |
| 2022-23 | 65,766,303 | -28.53% |
| 2021-22 | 92,021,573 | 137.49% |
| 2020-21 | 38,747,973 | 2.90% |

* Estimate

HISTORY:
In 1983, the Legislature enacted Chapter 83-220, L.O.F. (SB 56), creating s. 125.0167, F.S., authorizing the governing body of Miami-Dade County to levy a discretionary surtax on documents for the purpose of establishing and financing a Home Ownership Assistance Loan Trust Fund. Revenues in the fund assisted low and moderate income families in purchasing a home or an apartment. Not less than 1/2 of the funds were to be used to assist low-income families, defined as families whose income did not exceed 80 percent of the median income for the area. The remaining funds could be used to assist families whose income was in excess of 80 percent, but not more than 140 percent, of the median income for the area. The surtax could not exceed $0.45 per $100 or fractional part thereof, and could apply only to documents taxable under s. 201.02, F.S., except that no surtax could be imposed on a deed conveying a single-family residence, identified as a detached dwelling, a condominium unit, or a unit held through stock ownership or membership representing a proprietary interest in a corporation owning a fee or a leasehold initially in excess of 98 years.

The governing body was directed to adopt an ordinance to levy the discretionary surtax and create the trust fund. The ordinance was required to establish the policies and procedures of the assistance program. The county was directed to deposit revenues from the surtax into the trust fund to be used only for the purchase of a home or an apartment, or the rehabilitation of an existing home or apartment. The surtax could not be used for rent subsidies or grants.

Section 201.031, F.S., also enacted by Chapter 83-220, L.O.F. (SB 56), established the discretionary surtax and required the county levying the surtax to submit a financial report (under s. 218.32, F.S.)

showing the revenues and expenses of the trust fund. The Department of Revenue was directed to distribute all surtaxes collected to that county's governing authority. This authority granted to Miami-Dade county was set to expire on October 1, 1993, or ten years after the effective date of the act.

In 1984, Chapter 84-270, L.O.F. (SB 336), amended Chapter 83-220, L.O.F. (SB 56), changing the name of the Home Ownership Assistance Loan Trust Fund to the Housing Assistance Loan Trust Fund and increased the authorized uses of funds. With this amendment, the funds could be used for financing of construction, rehabilitation, or purchase of housing for low and moderate income families. Funds could also be used for first or second mortgages, and buying property to form housing cooperatives. Special consideration was to be given to neighborhood economic development programs of Community Development Corporations. Not more than 1/2 of the revenues collected each year could be used to finance new construction. This act also removed the statutory references to the program.

In 1989, the Legislature enacted Chapter 89-252, L. O. F. (SB 38), to extend the repeal date from October 1, 1993, to October 1, 2011.

In 1992, the Legislature enacted Chapter 92-317, L.O.F. (SB 94-H), to provide that a portion of the discretionary surtax revenues deposited into the Housing Assistance Loan Trust Fund could be deposited into the Home Investment Trust Fund of the county as defined by and created under the requirements of federal law. These set-aside funds are to be used to finance the construction, rehabilitation, or purchase of housing for low-income and moderate-income families and to fund any local matching contributions required under federal law. In 1993, ss. 125.0167 and 201.031, F.S., were restored to the Florida Statutes.

In 2009, the Legislature enacted Chapter 2009-131, L.O.F. (SBs 2430 and 1960), to extend the sunset of the program until October 1, 2031. It also amended s. 125.0167, F.S., limiting the amount of surtax revenue that may be used for administrative costs to 10 percent of revenues collected, and specifying a minimum amount of surtax revenues to be used for providing low income and moderate income housing. It authorized the creation of a housing assistance voucher program, under which vouchers may be used for down payment assistance for the purchase of single-family residences by low-income or moderate-income persons. Also, the law amended s. 201.031, F.S, requiring Miami-Dade County to adopt a housing plan every three years, to have adopted an affordable housing element of its comprehensive plan, and to have a report prepared for the county’s governing body that explains how the housing assistance program is being implemented.

In 2022, the Legislature enacted Chapter 2022-97, L.O.F., (HB 7071), prohibiting any county from imposing any requirement as a condition to receive financial assistance on a borrower other than requiring proof that the borrower's income does not exceed 140 percent of the area median income. In addition to the income eligibility requirement, borrowers may only be subject to loan qualifications of lenders licensed to provide mortgage financing as to the amount of the loan. A county may not create requirements that restrict participation by eligible borrowers.

BASE AND RATE:
Miami-Dade County levies a surtax on deeds and documents relating to realty at the rate of 45 cents for each $100 or fractional part thereof, except for documents relating to single family residences.

DISPOSITION:
The department returns proceeds, less costs of administration, to the county’s governing body. The funds must be deposited in the county's Housing Assistance Loan Trust Fund, and no less than 35 percent shall be used to provide home ownership assistance for low-income and moderate-income families, and no less

than 35 percent shall be used for construction, rehabilitation, and purchase of rental housing units. The remaining amount may be allocated to provide for home ownership assistance or rental housing units.

OTHER STATES:
California, Colorado, Connecticut, Delaware, Illinois, Maryland, Massachusetts, Michigan, Nevada, New York, North Carolina, Ohio, Oregon, Pennsylvania, Virginia, Washington, and West Virginia authorize some or all local governments to levy taxes on transfers of real estate or other assets.

# LOCAL COMMUNICATIONS SERVICES TAX

FLORIDA STATUTES: Chapter 202

ADMINISTERED BY: Department of Revenue

SUMMARY:
The governing authority of each county and municipality may, by ordinance, levy a local communications services tax on retail sales of communications services that originate or terminate in Florida and are billed to an address in the city or county imposing the tax. This tax replaces the public service tax on telecommunication services and franchise fees imposed on communications services providers for use of public rights-of-way plus the discretionary sales surtax previously imposed on telecommunications services. Communications services include all forms of telecommunication currently taxed by the gross receipts tax, except direct-to-home satellite services. The law also specifically applies the tax to communications services provided through any "other medium or method now in existence or hereafter devised."

REVENUE:

| Fiscal Year | Total Collections | Annual Change % |
|---|---|---|
| 2026-27* | 745,654,350 | 2.09% |
| 2025-26* | 730,421,410 | 2.71% |
| 2024-25 | 711,182,309 | 4.10% |
| 2023-24 | 683,191,858 | 1.63% |
| 2022-23 | 672,254,996 | 5.71% |
| 2021-22 | 635,920,459 | 1.42% |
| 2020-21 | 627,028,642 | -1.49% |

* Estimate

HISTORY:
Prior to October 1, 2001, local and in-state telecommunication services were subject to the municipal utility tax under s. 166.231, F.S. This law allowed municipalities and charter counties to impose a tax of up to 10 percent or 7 percent, depending upon whether the tax was imposed on local service only or on local service plus in-state long-distance service. Cities and charter counties were also authorized to charge telecommunication service providers franchise fees for the use of public rights of way and all local governments could impose franchise fees on cable providers. Chapter 2000-260, L.O.F. (SB 1338), created the Communications Services Tax Simplification Law which provides for local communications services taxes to be administered by the Department of Revenue. The communications services tax rates in cities and counties were to provide as much revenue as had been generated by the municipal utilities tax and franchise fees, which were replaced by the new tax. The local communications services tax applies to services that had not been subject to the municipal utility tax, including cable television and all telecommunication services. Satellite television service is not subject to local communications services tax. Chapter 2001-140, L.O.F. (SB 1878), established revenue-neutral conversion tax rates for the statewide and local communication services taxes, and maximum allowable tax rates for each local government. These maximum allowable rates included any capacity which had existed but was not exercised under the taxes and fees which were replaced by the local communications services tax.

Chapter 2005-187, L.O.F. (SB 2070), repealed the tax on substitute communications systems and provided that the Department of Revenue will not assess this tax back to October 1, 2001, when the communications services tax was implemented. The bill created a task force of experts in the areas of telecommunications policy, taxation, law, or technology to study the implications of emerging

technologies on Florida's communication service tax. This task force was dissolved by Chapter 2006-311, L.O.F. (HB 7109).

Prior to July 1, 2012, dealers of communications services were held harmless from any liability, including tax, interest, and penalties associated with the incorrect assignment of taxing jurisdictions if they were exercising due diligence in applying specific methods, provided under s. 202.22, F.S., for determining the local taxing jurisdiction in which a service address is located. Chapter 2012-70, L.O.F. (HB 809), provides that even if the dealer of communications services is not using one of the methods from s. 202.22, F.S., they are not liable for any tax, interest, or penalty unless the department is able to determine a net aggregate underpayment for any tax period or periods in question. In order to determine if there has been a net aggregate underpayment the department shall take into account all underpayments and overpayments for the appropriate period or periods. The change to this process that was made by Chapter 2012-70, L.O.F. (HB 809), is both remedial and retroactive without creating a right to a refund or credit of any tax paid before the general effective date.

Chapter 2023-157, L.O.F. (HB 7063) states that the local communications services tax may not be increased before January 1, 2026. This freeze extends to the discretionary sales conversion rate. Chapter 2025-208, L.O.F. (HB 7031) later extended the freeze through January 1, 2031.

BASE AND RATE:
The local communications services tax is imposed on retail sales of communications services, including cable services, which originate or terminate in Florida and are billed to an address in the city or county imposing the tax. Private communications services provided within the county or municipality are also subject to the tax. Direct-to-home satellite service is not subject to local communications services tax. Local tax rates vary for each county and city. The maximum rate for municipalities or charter counties is 5.1 percent or 4.98 percent, if the municipality or charter county levies permit fees. The maximum rate for non-charter counties is 1.6 percent. Add-ons of .12 percent or .24 percent are authorized under s. 337.401, F.S., and temporary emergency rates may exceed the statutory limits.

DISPOSITION:
The local communications services tax is remitted by dealers to the Department of Revenue, which distributes monthly the appropriate amount to each municipality, county or school board, after deducting the department's costs of administration not to exceed 1 percent of the total revenue generated for all municipalities, counties, and school boards.

OTHER STATES:
Taxes imposed vary considerably from state to state.

# LOCAL DISCRETIONARY SALES SURTAXES

# LOCAL DISCRETIONARY SALES SURTAXES

FLORIDA STATUTES: Sections 212.054 and 212.055

ADMINISTERED BY: Department of Revenue

SUMMARY:
Nine different types of local discretionary sales surtaxes (also referred to as local option sales taxes) are currently authorized in law and represent potential revenue sources for county and municipal governments and school districts. The local discretionary sales surtaxes apply to all transactions subject to the state tax imposed on sales, use, services, rentals, admissions, and other authorized transactions authorized pursuant to ch. 212, F.S., and communications services as defined for purposes of ch. 202, F.S.

| Surtax Name | Year Enacted | Statutory Authority |
|---|---|---|
| Charter County and Regional Transportation System Surtax | 1976 | s. 212.055(1), F.S. |
| Local Government Infrastructure Surtax | 1987 | s. 212.055(2), F.S. |

The local discretionary sales surtax rate varies from county to county, depending on the particular levies authorized in that jurisdiction. Discretionary sales surtax must be collected when the transaction occurs in, or delivery is into, a county that imposes the surtax, and the sale is subject to state's sales and use tax. The following table summarizes how the surtax is collected.

| **If a selling dealer located in any Florida county** | **with a discretionary surtax** | **sells and delivers** | **into the county where the selling vendor is located** | **surtax is collected at the county rate where the delivery is made** |
|---|---|---|---|---|
| If a selling dealer located in any Florida county | with or without a discretionary surtax | sells and delivers | into counties with different discretionary surtax rates | surtax is collected at the county rate where the delivery is made |
| **If a selling dealer located in any Florida county** | **with or without a discretionary surtax** | **sells and delivers** | **into counties without a discretionary surtax** | **surtax is not collected** |
| If an out-of-state selling dealer | | sells and delivers | into a Florida county with a discretionary surtax | surtax is collected at the county rate where delivery is made |
| **If an out-of-state selling dealer** | | **sells and delivers** | **into a Florida county without a discretionary surtax** | **surtax is not collected** |

Discretionary sales surtax applies to the first $5,000 of any single taxable item, when sold to the same purchaser at the same time. Single items include items normally sold in bulk and items assembled to

comprise a working unit. The $5,000 limitation does not apply to the rental of commercial real property, transient rentals, or services. With regard to the sale of motor vehicles, mobile homes, boats, or aircraft, the surtax applies only to the first $5,000 of the total sales price. On the sale of a motor vehicle or mobile home, the tax rate is determined by the county where the purchaser resides as shown on the title or registration. On the sale of a boat or aircraft, the tax rate is determined by the county where the boat or aircraft is delivered.

The local discretionary sales surtax applies to communications services as broadly defined in ch. 202, F.S. Because the new communications services tax base is much larger than the base under prior law, discretionary sales surtax conversion rates were specified in law. For any county or school board that levies the surtax, the tax rate on communications services as authorized by s. 202.19(5), F.S., is expressed in law.

REVENUE:

| Fiscal Year | Total Collections** | Annual Change % |
|---|---|---|
| 2025-26* | 5,887,359,373 | 2.04% |
| 2025-26* | 5,769,750,069 | -0.21% |
| 2024-25 | 5,782,173,686 | 2.37% |
| 2023-24 | 5,648,372,575 | 0.32% |
| 2022-23 | 5,630,574,457 | 7.25% |
| 2021-22 | 5,250,059,865 | 23.50% |
| 2020-21 | 4,251,229,433 | 8.77% |

* Estimate

** Includes collections where the taxing county cannot be identified when reported. These collections are not reflected in individual surtax collection totals.

Annual tax receipts by county can be found on the Office of Economic and Demographic Research's (EDR) Local Government Data webpage under the heading of Local Option Tax Receipts via the following link:
http://edr.state.fl.us/Content/local-government/data/data-a-to-z/g-l.cfm

HISTORY:
Chapter 76-284, L.O.F., created s. 212.055, F.S., to authorize counties, which adopted a charter before June 1, 1976, to levy an additional 1 percent tax on all transactions that are taxed at 4 percent. It limited the surtax to the first $1,000 of any one transaction. The county was required to have a majority vote of the county's electorate in order to levy the surtax. The Department of Revenue was required to administer and collect the tax and distribute the revenues on a regular and periodic basis.

Chapter 82-154, L.O.F., changed the transactions eligible for the surtax from all transactions taxed at 4 percent to all transactions taxed at 3 or 5 percent under s. 212.055, F.S. Chapter 83-3, L.O.F., disallowed the surtax on motor fuel and special fuel as defined in s. 212.02(21) and (22), F.S., to s. 212.055, F.S. Chapter 85-342, L.O.F., transferred s. 125.0165, F.S., into s. 212.055, F.S. It eliminated references to the 1 percent surtax on all transactions taxed at 3 or 5 percent as well as the references to the $1,000 limit, and the restrictions for motor fuels or special fuels. The references for the Department to administer and collect the tax and counties notifying the Department of Revenue after the approval of an ordinance were eliminated. The rate was 20 percent of any amount of tax imposed and paid to the state. In addition, Chapter 85-342, L.O.F., created s. 212.054, F.S., to specify the eligible counties and the tax rate, if levied, to that named in s. 212.055, F.S. The surtax was the rate times the amount of taxes imposed and rounded

to the nearest penny. Sales amount above $1,000 and long distance telephone service were excluded from the surtax. Utility, telecommunications, and wired television billings after the effective date included the full surtax; billings after the last day that the surtax was in effect were not subject to the surtax. Contracts signed prior to the effective date were subject to the surtax if the work was not completed by the effective date. Contractors were to pay the surtax, but could apply for a refund. It was a second degree misdemeanor to fraudulently attempt to obtain a refund. A transaction was considered as occurring in the county imposing the surtax if the dealer was located in the county and the sale included tangible property except in the case of utilities, telecommunications, and wired television, in which case, it was the county where it was used. A charged event occurring in the county was also subject to the surtax. Imported vehicles requiring licensing or titling were subject to the surtax unless used for more than 6 months outside the county. Real property rentals and transient rental properties inside the county were also subject to the surtax. The Department of Revenue was to administer, collect, and enforce the tax and was authorized to deduct up to 3 percent for administrative costs. Discretionary sales surtaxes were only to take effect on January 1. The county was required to notify the Department within 10 days after ordinance adoption, and the notice was required to include the time period the surtax would be in effect.

Chapter 86-152, L.O.F., made two changes. First, if a dealer owing use tax on purchases or leases was located in a county subject to the surtax, then the sale or lease was considered as occurring in the county and was subject to the surtax. Second, the dealer was not required to separately state the surtax on the receipt. Chapter 87-6, L.O.F., included services, except those otherwise exempted, as a transaction subject to the surtax and increased the penalty of fraudulently attempting to obtain a refund from a second degree misdemeanor to a third degree felony. Chapter 87-548, L.O.F., changed the base from taxes collected to taxable sales. This base change occurred in tandem with the rate change in s. 212.055, F.S., from 20 percent to 1 percent. Also, the surtax became applicable to sales up to $5,000; the prior limit was $1,000. For vehicle sales, the county of the registration of the purchaser must be of the county with the surtax in order for the transaction to be eligible for the surtax. Chapter 88-119, L.O.F., required that a delivery had to be made to a location in a surtax county in order for the transaction to be eligible for the surtax. It also required that if tangible personal property was brought back into a surtax county, the customer was responsible to pay the surtax. Additionally, it required a dealer outside of a surtax county to collect the surtax on deliveries of tangible personal property from a Florida manufacturer or wholesaler into a surtax county. Chapter 89-356, L.O.F., restated the provision requiring a dealer outside of a surtax county to collect the surtax on deliveries of tangible personal property from a Florida manufacturer or wholesaler into a surtax county. The new version required the following. If a dealer located outside a surtax county delivered tangible personal property to a customer in a surtax county in which the manufacturer or wholesaler was located, the dealer was required to collect and remit the surtax.

Chapter 90-132, L.O.F. (HB 1299), revised references of “wired television” to “television system program” and exempted certain mail-order transactions from these surtaxes. Chapter 90-203, L.O.F. (SB 862), changed the name of the Surtax Trust Fund to the Surtax Clearing Trust Fund and stipulated that the Department distribute monies in the trust fund each month. Section 91-81, L.O.F. (SB 186), reenacted s. 212.054(2)(a), F.S., and excluded services from surtax levy. Chapter 91-112, L.O.F. (HB 2523), specified that two or more items sold simultaneously as a unit or in bulk would count as a single unit with respect to the $5,000 limitation. Additionally, it subjected items imported into the county after six months that are provided for in s. 212.06(8)(b), F.S., and coin-operated amusement or vending machines located in the county to the surtax. It also required that any change in the distribution formula must take effect on the first day of any month beginning at least 60 days after written notification of the change had been sent to the Department. Chapter 92-319, L.O.F. (SB 26-H), revised the sales tax on boats and airplanes and expanded the sales tax base to include previously untaxed items. Chapter 92-320, L.O.F. (SB 68-H), required counties that locally administer local option taxes to distribute an annual report enumerating the tax proceeds and how the proceeds were expended. Chapter 93-222, L.O.F. (HB 729), provided for the application of surtaxes to services. It stated that the surtax was not levied if the property or service was

delivered within a non-surtax county. Unless there was reasonable documentation to the contrary, it was assumed that delivery was made to the location of the place of business. The $5,000 limitation was not applicable to services other than rentals. The counties with surtax authorizations were required to report revenues to the Department in a timely manner.

Chapter 96-325, L.O.F. (SB 1094), revised provisions specifying when a transaction regarding the sale of tangible personal property by a florist is deemed to occur in a surtax county. Chapter 96-397, L.O.F. (SB 584), removed language concerning the distribution of surtax collections through June 30, 1994. Chapter 97-99, L.O.F. (SB 432), replaced reference of "transactions by this part" with "transactions by this chapter" in s. 212.054(2)(a), F.S. Chapter 98-141, L.O.F. (SB 1690), added provisions for partial exemptions from the surtax to vessels, railroad, and motor vehicle common carriers. Chapter 98-342, L.O.F. (HB 4413), provided for a number of administrative changes including specifying that any discretionary sales surtax rate increase or decrease could only take effect on January 1st and any termination only on December 31st.

Chapter 2001-140, L.O.F. (SB 1878), implemented Chapter 2000-260, L.O.F. (SB 1338), establishing the Communications Services Tax Simplification Law, which repealed the levy of a discretionary sales surtax on various communications services and replaced it with a local option component of the new communications services tax.

Chapter 2010-102, L.O.F. (SB 1412), deleted the requirement that the Department submit a written report that details the costs of administering the discretionary sales surtaxes to the Senate President, House Speaker, and the governing authority of each county levying a surtax. Chapter 2018-118, L.O.F. (CS/HB 7087), amended s. 212.055. F.S., to require that for any referendum to adopt a local discretionary sales surtax held on or after the legislation's effective date, an independent certified public accountant, licensed pursuant to Chapter 473, F.S., must conduct a performance audit of the program associated with the surtax adoption proposed by the county or school district. This performance audit must be completed, and the findings made available to the public, at least 60 days before the referendum is held. Chapter 2019-64, L.O.F. (CS/CS/HB 5), amended s. 212.055, F.S., to require, effective January 1, 2020, that any referendum to adopt or amend a local discretionary sales surtax be held at a general election, which is defined in s. 97.021, F.S., to mean an election held on the first Tuesday after the first Monday in November in the even-numbered years. Upon adoption of an ordinance or a resolution by a county or school district to hold a local discretionary sales surtax referendum on or after January 1, 2020, the legislation required the county or school district to provide the Florida Legislature's Office of Program Policy Analysis and Government Accountability (OPPAGA) with a copy of the final ordinance or resolution calling for the referendum at least 180 days before the referendum is held. Additionally, the legislation maintained the requirement that OPPAGA select and pay for a certified public accountant to conduct a performance audit of the program associated with the proposed surtax and the requirement that the performance audit be completed and made available on the county or school district website at least 60 days prior to the referendum. OPPAGA is required to procure the certified public accountant to conduct the performance audit within 60 days of receiving the final resolution or ordinance. Furthermore, the legislation declared void any local discretionary sales surtax referendum if the county or school district failed to provide notice to OPPAGA or failed to publish the results of the performance audit on its website at least 60 days before the referendum was held.

Chapter 2021-2, L.O.F. (CS/CS/SB 50), required marketplace providers and persons located outside of this state to remit discretionary sales surtax when delivering tangible personal property to a county imposing a surtax. Chapter 2023-157, L.O.F (HB 7063), required a referendum to reenact a local discretionary sales surtax to be held at a general election as defined in s. 97.021, F.S. A referendum to reenact an expiring surtax must be held at a general election occurring within the 48-month period immediately preceding the effective date of the reenacted surtax. Such a referendum may appear on the

ballot only once within the 48-month period. Chapter 2024-158, L.O.F. (CS/HB 7073), amended s. 212.054(1)(b)1., F.S., to clarify that a boat and a corresponding boat trailer sold to the same purchaser at the same time and with both items located on the same invoice, are considered a single item for discretionary sales surtax purposes. Additionally, it amended s. 212.054(3)(a), F.S., to clarify that the sale of the boat and boat trailer is deemed to occur in the county where the purchaser resides as shown on the title or registration documents. Furthermore, it added s. 212.054(9), F.S., to specify how discretionary sales surtax moneys are disposed of when there is a final adjudication finding that the discretionary sales surtax was enacted, levied, collected, or is otherwise contrary to the U.S. Constitution or State Constitution, until such provisions expire on June 30, 2030. Chapter 2025-208, L.O.F. (HB 7031), removes a provision in s. 212.054(3), F.S., to reflect the repeal of the business rent tax. Additionally, the legislation provides express authority for a levying local government (the Board of County Commissioners or the School Board) of any discretionary sales surtax, which does not have an expiration date, to reduce or repeal that surtax with a two-thirds vote of the board, beginning four years after a surtax is levied. The reduced rate can be any lower rate otherwise allowable under the applicable statutory provision. A reduced or repealed rate is effective on the January 1st following the board's vote, or on any subsequent January 1st as provided by the board.

ADMINISTRATIVE PROCEDURES:
Legislation enacted in 2018 required the completion of a performance audit prior to any referendum to adopt a local discretionary sales surtax held on or after March 23, 2018. Legislation enacted in 2019 amended that requirement. For any surtax referendum held on or after January 1, 2020, an independent certified public accountant (CPA), licensed pursuant to Chapter 473, F.S., must conduct a performance audit of the program associated with the proposed surtax. At least 180 days prior to the referendum date, the county or school district must provide the Florida Legislature's Office of Program Policy Analysis and Government Accountability (OPPAGA) with a copy of the final resolution or ordinance. Within 60 days after receiving the final resolution or ordinance, OPPAGA must procure the CPA and may use carryforward funds to pay for the CPA's services. The performance audit must be completed at least 60 days before the referendum is held. The audit report, including any findings, recommendations, or other accompanying documents, must be made available on the county or school district's official website and kept on the website for two years from the date posted. A county or school district's failure to comply with the requirements of providing OPPAGA with a copy of the final resolution or ordinance at least 180 days prior to the referendum date, or publishing the performance audit results on its website at least 60 days before the referendum date, will render the referendum void.

The term *performance audit* means an examination of the program conducted according to applicable government auditing standards or auditing and evaluation standards of other appropriate authoritative bodies. At a minimum, a performance audit must address the following issues.

1. The economy, efficiency, or effectiveness of the program.
2. The program's structure or design to accomplish its goals and objectives.
3. Alternative methods of providing program services or products.
4. Goals, objectives, and performance measures used by the program to monitor and report program accomplishments.
5. The accuracy or adequacy of public documents, reports, and requests prepared by the county or school district that relate to the program.
6. The program's compliance with appropriate policies, rules, and laws.

A referendum to adopt, amend, or reenact a local discretionary sales surtax must be held at a general election as defined in s. 97.021, F.S. A referendum to reenact an expiring surtax must be held at a general election occurring within the 48-month period immediately preceding the effective date of the reenacted surtax. Such a referendum may appear on the ballot only once within the 48-month period.

The administrative procedures relevant to local discretionary sales surtaxes are outlined in s. 212.054, F.S. The Department of Revenue (DOR) administers, collects, and enforces the surtaxes. The governing body of any county levying a local discretionary sales surtax enacts an ordinance levying the surtax in accordance with the procedures described in s. 125.66(2), F.S. Current law requires that any initial levy or rate change can only take effect on January 1st, and any levy termination can only take effect on December 31st.

The proceeds of each county's discretionary sales surtax collections are transferred to the Discretionary Sales Surtax Clearing Trust Fund [hereinafter, the Trust Fund]. A separate account in the Trust Fund is established for each county imposing the surtax. The DOR is authorized to take an administrative cost deduction not to exceed 3 percent of the total surtax revenue generated by all levying counties. The administrative cost deduction is used only for those costs solely and directly attributable to the surtax, and the costs are prorated among those counties levying the surtax on the basis of the amount collected for a particular county to the total amount collected for all counties.

REPORTING REQUIREMENTS:
The governing body of any county or school board that levies the surtax shall notify the Department within 10 days after the final adoption by ordinance or referendum of an imposition, termination, or rate change. The Department must receive this notice no later than November 16th prior to the January 1st effective date. The notice must specify the rate as well as the time period during which the surtax will be in effect and must include a copy of the ordinance and such other information required by departmental rule. Failure to timely provide such notification to the Department shall result in the delay of the effective date for a period of one year.

Additionally, the governing body of any county or school board proposing to levy the surtax shall notify the Department by October 1st if the referendum or consideration of the ordinance that would result in the imposition, termination, or rate change of a surtax is scheduled to occur on or after October 1st of that year. Failure to timely provide such notification to the Department shall result in the delay of the effective date for a period of one year.

DISPOSITION:
The Department shall distribute funds using a distribution factor determined for each levying county that is multiplied by the amount available for distribution. The county's distribution factor shall equal the product of the county's latest official population, pursuant to s. 186.901, F.S.; the county's surtax rate; and the number of months the county has levied the surtax during the most recent distribution period divided by the sum of all such products of the counties levying the surtax during the most recent distribution period. The Department shall compute distribution factors for eligible counties once each quarter and make appropriate quarterly distributions. A county that fails to provide timely information waives its rights to challenge the Department's determination of the county's share of the revenues.

OTHER STATES:
According to the Tax Foundation, 38 states collect local sales taxes as of July 2025. A listing of those states can be found in the Tax Foundation's article entitled *State and Local Sales Tax Rates, Midyear 2025* via the following link:
https://taxfoundation.org/data/all/state/sales-tax-rates/

ADDITIONAL INFORMATION:
A table summarizing the counties eligible to levy the various surtaxes and the 2025 county tax rates immediately follows this section. Summaries of the nine individual surtax authorizations can be found in the sections immediately following the surtax rate table.

Annual tax distributions by county as well as a historical summary of surtax impositions, expirations, extensions, rate changes, and repeals can be found on the EDR's Local Government Data webpage under the heading of Local Option Sales Taxes via the following link:
http://edr.state.fl.us/Content/local-government/data/data-a-to-z/g-l.cfm

A more detailed description of each surtax in its present form as well as estimated revenue distributions to county and municipal governments can be found in the Office of Economic and Demographic Research's annual report *Local Government Financial Information Handbook* via the following link:
http://edr.state.fl.us/Content/local-government/reports/index.cfm

Notes:
1) Boxed areas indicate those counties eligible to impose particular surtaxes authorized for county governments or school districts eligible to impose the School Capital Outlay Surtax.

2) The Indigent Care and Trauma Center Surtax consists of two separate levies for different groups of eligible counties. Non-consolidated counties with a total population of 800,000 or more may impose, either by an extraordinary vote of the county's governing body or voter approval in a countywide referendum, a surtax not to exceed 0.5% for the purpose of funding health care services for qualified residents. Non-consolidated counties with a total population of less than 800,000 may impose, subject to voter approval in a countywide referendum, a surtax not to exceed 0.25% for the sole purpose of funding trauma services provided by a trauma center licensed pursuant to Chapter 395, Florida Statutes.

3) Pursuant to ss. 212.055(2)(h) and 212.055(3)(f), F.S., a county cannot levy the Local Government Infrastructure, Small County, Indigent Care and Trauma Center, and County Public Hospital surtaxes in excess of a combined rate of 1%.

4) Pursuant to s. 212.055(4)(b)5., F.S., a county cannot levy the Local Government Infrastructure, Small County, and Indigent Care and Trauma Center surtaxes in excess of a combined rate of 1%.

5) Pursuant to s. 212.055(5)(f), F.S., a county cannot levy the Local Government Infrastructure, Small County, and County Public Hospital surtaxes in excess of a combined rate of 1%.

6) Subject to referendum approval, the Voter-Approved Indigent Care Surtax may be levied by counties with less than 800,000 residents at a rate not to exceed 0.5%. However, if a publicly supported medical school is located within the qualifying county, the rate cannot exceed 1%, pursuant to s. 212.055(7)(a), F.S. Currently, Florida has publicly supported medical schools at the following universities: Florida International University in Miami-Dade County; Florida State University in Leon County; University of Central Florida in Orange County; University of Florida in Alachua County; and the University of South Florida in Hillsborough County. The Florida International University, University of Central Florida, and University of South Florida medical schools are each located in counties having a resident population greater than 800,000; therefore, Hillsborough, Miami-Dade, and Orange counties are not eligible to levy the surtax. Only Alachua and Leon counties could levy the surtax at the maximum 1% rate. Additionally, the governing body of any county that has a population of less than 50,000 residents may levy the surtax, at a rate not to exceed 1%, subject to voter approval in countywide referendum pursuant to Chapter 2005-242, Laws of Florida. Consequently, if a publicly supported medical school is located in the county, or the county has a population of less than 50,000 residents, the combined tax rate of this levy and any Local Government Infrastructure Surtax and Small County Surtax levies cannot exceed 1.5% pursuant to s. 212.055(7)(f), F.S. For all other counties eligible to levy this surtax, the combined tax rate cannot exceed 1%.

7) During the 2025 calendar year, DeSoto, Gadsden, Holmes, Madison, and Polk counties will be levying the Voter-Approved Indigent Care Surtax at 0.5 percent. Based on the April 1, 2024, official population estimates, 58 counties have a total population of less than 800,000 and are eligible to levy this surtax. Based on these same estimates, the total populations of nine counties (i.e., Broward, Duval, Hillsborough, Lee, Miami-Dade, Orange, Palm Beach, Pinellas, and Polk) exceed 800,000. Although the total population of Polk County now exceeds 800,000, the county originally authorized this surtax levy, effective January 1, 2005, when its total population was well below the 800,000-population limit. That initial levy was scheduled to expire on December 31, 2019; however, prior to that expiration date, the county extended the levy when its total population was still below the 800,000-population limit. Polk County's levy is now scheduled to expire on December 31, 2044.

8) Effective July 1, 2009, Chapter 2009-146, L.O.F., renamed the Charter County Transit System Surtax as the Charter County Transportation System Surtax and extended eligibility for surtax levy to 13 additional charter counties. Effective July 1, 2010, Chapter 2010-225, L.O.F., renamed the Charter County Transportation System Surtax as the Charter County and Regional Transportation System Surtax and extended eligibility for surtax levy to each county that is within or under an interlocal agreement with a regional transportation or transit authority created under Chapters 343 or 349, Florida Statutes (i.e., South Florida Regional Transportation Authority, Central Florida Regional Transportation Authority, Northwest Florida Transportation Corridor Authority, Tampa Bay Area Regional Transit Authority, and Jacksonville Transportation Authority). As a result of the legislation, seven counties within the Northwest Florida Transportation Corridor Authority (i.e., Bay, Escambia, Franklin, Gulf, Okaloosa, Santa Rosa, and Walton) and three counties of the Tampa Bay Area Regional Transit Authority (i.e., Hernando, Manatee, and Pasco) are eligible to levy this surtax. Effective March 15, 2021, the 1% Charter County and Regional Transportation System Surtax in Hillsborough County was terminated after the Florida Supreme Court ruled that the county's levy was unconstitutional. Effective July 1, 2021, Chapter 2021-188, L.O.F., dissolved the Northwest Florida Transportation Corridor Authority by repealing Part III of Chapter 343, F.S. Consequently, the non-charter counties of Bay, Escambia, Franklin, Gulf, Okaloosa, Santa Rosa, and Walton, which were served by the authority, are no longer eligible to levy this surtax. Although Wakulla County was also served by the Authority, it is still eligible to levy the surtax because it is also a charter county.

9) Effective July 1, 2009, Chapter 2009-182, L.O.F., created the Emergency Fire Rescue Services and Facilities Surtax. A county's governing body, other than a county that has imposed two separate discretionary surtaxes without expiration, may levy this surtax at a rate of up to 1%, subject to voter approval in a countywide referendum. Madison and Miami-Dade counties are not eligible to levy this surtax since each county has imposed two separate discretionary surtaxes without expiration. The remaining 65 counties are eligible to levy this surtax. However, if Orange or Osceola impose the surtax, neither county can levy the surtax within the boundaries of the Reedy Creek Improvement District pursuant to s. 212.055(8)(j), F.S.

10) Since both the Charter County and Regional Transportation System Surtax and Emergency Fire Rescue Services and Facilities Surtax are not subject to any tax rate limitations, the maximum potential tax rates for nearly all county governments have increased since July 1, 2009. For Madison and Miami-Dade counties, the maximum potential tax rate did not change. For 24 counties (i.e., Alachua, Bay, Brevard, Charlotte, Citrus, Clay, Columbia, Escambia, Franklin, Gulf, Hernando, Lee, Leon, Manatee, Okaloosa, Orange, Osceola, Palm Beach, Pasco, Polk, Santa Rosa, Seminole, Wakulla, and Walton), the maximum potential tax rate increased by 2%. For all other counties, the maximum potential tax rate increased by 1%. Currently, Alachua, Franklin, Gulf, Leon, and Wakulla counties have the highest maximum potential tax rate for county government levies at 3.5%.

11) Effective July 1, 2016, Chapter 2016-146, L.O.F., created the Pension Liability Surtax and specified that a county considering a Pension Liability Surtax levy must currently levy the Local Government Infrastructure Surtax, which is scheduled to terminate and is not subject to renewal. Additionally, the legislation created a number of preconditions that must be satisfied prior to a Pension Liability Surtax levy and specified that a county may not levy this surtax as well as the Local Government Infrastructure Surtax, Small County Surtax, Indigent Care and Trauma Center Surtax, and County Public Hospital Surtax, in excess of a combined rate of 1%.

12) Effective May 7, 2024, Chapter 2024-158, L.O.F., removed statutory language that excluded counties consolidated with one or more municipalities (i.e., Duval County only) from the authority to levy the Indigent Care and Trauma Center Surtax. Additionally, it removed a county's ability to authorize the surtax levy by an extraordinary vote of the governing body and now requires voters to approve the levy.

13) New or extended surtax levies effective January 1, 2025: Hamilton County's 1% Emergency Fire Rescue Services and Facilities Surtax levy; Marion County's 1% Local Government Infrastructure Surtax levy; Marion County's 0.5% School Capital Outlay Surtax levy; Martin County's 0.5% Local Government Infrastructure Surtax levy; and Seminole County's 1% Local Government Infrastructure Surtax levy.

14) Effective January 1, 2025, the 0.5% Local Government Infrastructure Surtax and 0.5% Indigent Care and Trauma Center Surtax levies in Hillsborough County will be temporarily suspended. In March 2021, the Florida Supreme Court ruled that Hillsborough County's levy of the 1% Charter County and Regional Transportation System Surtax, which was adopted in November 2018, was unconstitutional. The Florida Legislature enacted Chapter 2024-231, Laws of Florida, which provides that the invalidated transportation surtax proceeds will be used to temporarily offset all Hillsborough County surtax levies, except the School Capital Outlay Surtax, beginning January 1, 2025. The length of the surtax suspension is based on several factors and will be determined by the Department of Revenue. Because the suspension of the two Hillsborough County surtaxes is temporary, the rates remain listed in this table.

15) During 2024, the following surtax levies, which were set to expire in future years, were extended: Bay County's 0.5% Local Government Infrastructure Surtax levy; Excambia County's 0.5% School Capital Outlay Surtax levy; Hernando County's 0.5% School Capital Outlay Surtax levy; Hillsborough County's 0.5% Local Government Infrastructure Surtax levy; Holmes County's 0.5% Voter-Approved Indigent Care Surtax levy; Jackson County's 0.5% School Capital Outlay Surtax; Monroe County's 0.5% School Capital Outlay Surtax; Orange County's 0.5% School Capital Outlay Surtax; St. Johns County's 0.5% School Capital Outlay Surtax; and St. Lucie County's 0.5% School Capital Outlay Surtax.

16) The following levies are scheduled to expire on December 30, 2025: Jackson County's 1% Small County Surtax levy and Martin County's 0.5% School Capital Outlay Surtax levy.

17) The following levies are scheduled to expire on December 30, 2026: Brevard County's 0.5% Local Government Infrastructure Surtax and 0.5% School Capital Outlay Surtax levies; Charlotte County's 1% Local Government Infrastructure Surtax levy; Liberty County's 0.5% Emergency Fire Rescue Services and Facilities Surtax levy; Palm Beach County's 1% Local Government Infrastructure Surtax levy; and Santa Rosa County's 0.5% Local Government Infrastructure Surtax levy.

# CHARTER COUNTY AND REGIONAL TRANSPORTATION SYSTEM SURTAX

FLORIDA STATUTES: Section 212.055(1)

ADMINISTERED BY: Department of Revenue

SUMMARY:
Each charter county that has adopted a charter, each county the government of which is consolidated with that of one or more municipalities, and each county that is within or under an interlocal agreement with a regional transportation or transit authority created under ch. 343 or 349, F.S., may levy the Charter County and Regional Transportation System Surtax at a rate of up to 1 percent. The levy is subject to approval by a majority vote of the county's electorate or by a charter amendment approved by a majority vote of the county's electorate. Generally, the use of the proceeds is for the development, construction, operation, and maintenance of fixed guideway rapid transit systems, bus systems, on-demand transportation services, and roads and bridges. Broward, Duval, and Miami-Dade counties will be levying this surtax during the 2025 calendar year.

REVENUE:

| Fiscal Year | Total Collections | Annual Change % |
|---|---|---|
| 2026-27* | 895,891,143 | 2.04% |
| 2025-26* | 877,994,302 | -0.21% |
| 2024-25 | 879,884,829 | 1.86% |
| 2023-24 | 863,837,026 | -0.31% |
| 2022-23 | 866,523,994 | 5.27% |
| 2021-22 | 823,166,134 | 0.51% |
| 2020-21 | 818,997,666 | -2.79% |

* Estimate

HISTORY:
Chapter 76-284, L.O.F., authorized charter counties, which adopted a charter prior to June 1, 1976, to levy a 1 percent surtax subject to voter approval in a countywide referendum. The surtax proceeds were restricted to costs associated with the development and construction of fixed guideway rapid transit systems.

Chapter 85-180, L.O.F., authorized the expenditure of surtax proceeds for countywide bus systems that function as supportive services for a fixed guideway rapid transit system. Chapters 87-99 and 87-100, L.O.F., authorized counties to remit surtax proceeds to an expressway or transportation authority for the development, construction, operation, and maintenance of roads or bridges, or for the operation and maintenance of a bus system. Chapter 87-548, L.O.F., authorized any county, which was consolidated with one or more municipalities, to levy the surtax at the rate of 1 percent.

Chapter 99-385, L.O.F. (HB 591), authorized the surtax proceeds to be applied to as many or as few of the authorized uses in whatever combination the county's governing body deems appropriate.

Chapter 2002-20, L.O.F. (HB 261), expanded levy eligibility by authorizing any county that adopted a charter prior to January 1, 1984, to levy this surtax. Chapter 2003-254, L.O.F. (SB 1176), authorized a number of expanded uses for the surtax proceeds. Chapter 2004-66, L.O.F. (SB 2264), authorized all charter counties eligible to levy this surtax to use up to 25 percent of the proceeds for non-transit purposes. Chapter 2009-146, L.O.F. (HB 1205), renamed the surtax as the Charter County Transportation System Surtax and extended eligibility for surtax levy to 13 additional charter counties and allowed for

the surtax proceeds to be remitted to transit authorities. Additionally, it required interlocal agreements specifying the distribution of surtax proceeds with one or more municipalities to be revised no less than every five years to reflect recent municipal incorporations.

Chapter 2010-225, L.O.F. (HB 1271), renamed the surtax as the Charter County and Regional Transportation System Surtax and extended eligibility for surtax levy to counties within or under an interlocal agreement with a regional transportation or transit authority. The surtax proceeds could be expended for the planning, development, construction, expansion, operation, and maintenance of statutorily-defined, on-demand transportation services. Chapter 2019-64, L.O.F. (CS/CS/HB 5), amended s. 212.055, F.S., to require, effective January 1, 2020, that any referendum to adopt or amend a local discretionary sales surtax be held at a general election, which is defined in s. 97.021, F.S., to mean an election held on the first Tuesday after the first Monday in November in the even-numbered years. Upon adoption of an ordinance or a resolution by a county or school district to hold a local discretionary sales surtax referendum on or after January 1, 2020, the legislation required the county or school district to provide the Florida Legislature's Office of Program Policy Analysis and Government Accountability (OPPAGA) with a copy of the final ordinance or resolution calling for the referendum at least 180 days before the referendum is held. Additionally, the legislation maintained the requirement that OPPAGA select and pay for a certified public accountant to conduct a performance audit of the program associated with the proposed surtax and the requirement that the performance audit be completed and made available on the county or school district website at least 60 days prior to the referendum. OPPAGA is required to procure the certified public accountant to conduct the performance audit within 60 days of receiving the final resolution or ordinance. Furthermore, the legislation declared void any local discretionary sales surtax referendum if the county or school district failed to provide notice to OPPAGA or failed to publish the results of the performance audit on its website at least 60 days before the referendum was held. Chapter 2019-169, L.O.F. (CS/CS/CS/HB 385), changed the authorized uses of the surtax proceeds, effective October 1, 2022.

Chapter 2020-10, L.O.F. (CS/HB 7097), required that any levy of this surtax, pursuant to a referendum held on or after July 1, 2020, shall not be levied for more than 30 years. Chapter 2023-157, L.O.F (HB 7063), required a referendum to reenact a local discretionary sales surtax to be held at a general election as defined in s. 97.021, F.S. A referendum to reenact an expiring surtax must be held at a general election occurring within the 48-month period immediately preceding the effective date of the reenacted surtax. Such a referendum may appear on the ballot only once within the 48-month period.

IMPOSITION AND RATE:
Any county that has adopted a home rule charter, any county government that has consolidated with one or more municipalities, and any county that is within or under an interlocal agreement with a regional transportation or transit authority created under ch. 343 or 349, F.S., may levy this surtax at a rate of up to 1 percent, subject to approval by a majority vote of the county's electorate or a charter amendment approved by a majority vote of the county's electorate.

Based on these criteria, 23 counties (i.e., Alachua, Brevard, Broward, Charlotte, Clay, Columbia, Duval, Hernando, Hillsborough, Lee, Leon, Manatee, Miami-Dade, Orange, Osceola, Palm Beach, Pasco, Pinellas, Polk, Sarasota, Seminole, Volusia, and Wakulla) are eligible to levy the surtax. During the 2025 calendar year, Broward County will be levying at 1 percent, and Duval and Miami-Dade counties will be levying at 0.5 percent. Effective March 15, 2021, the surtax levy in Hillsborough County was terminated after the Florida Supreme Court ruled that the county's levy was unconstitutional. This surtax, in addition to the Emergency Fire Rescue Services and Facilities Surtax and the School Capital Outlay Surtax, is not subject to a combined rate limitation that impacts the other discretionary sales surtax levies.

## CHARTER COUNTY AND REGIONAL TRANSPORTATION SYSTEM SURTAX

DISPOSITION AND USES:
The Department of Revenue shall distribute the surtax proceeds to the county government for deposit into the county trust fund or remittance by the county's governing body to an expressway, transit, or transportation authority created by law. Generally, the surtax proceeds may be expended by the county government or an expressway, transit or transportation authority created by law for the planning, development, construction, operation, and maintenance of roads and bridges in the county; for the planning, development, expansion, operation, and maintenance of bus and fixed guideway systems; for the planning, development, construction, operation, and maintenance of on-demand transportation services; and for the payment of principal and interest on bonds issued for the construction of fixed guideway rapid transit systems, bus systems, roads, or bridges. Effective October 1, 2022, additional uses of the surtax proceeds in Miami-Dade County were authorized.

ADDITIONAL INFORMATION:
A more detailed description of this surtax in its present form as well as estimated revenue distributions to county and municipal governments can be found in the Office of Economic and Demographic Research's annual report *Local Government Financial Information Handbook* via the following link: http://edr.state.fl.us/Content/local-government/reports/index.cfm

# EMERGENCY FIRE RESCUE SERVICES AND FACILITIES SURTAX

FLORIDA STATUTES: Section 212.055(8)

ADMINISTERED BY: Florida Department of Revenue

SUMMARY:
The Emergency Fire Rescue Services and Facilities Surtax may be levied at the rate of up to 1 percent pursuant to an ordinance enacted by a majority vote of the county's governing body and approved by voters in a countywide referendum. However, any county that has imposed two separate discretionary surtaxes without expiration cannot levy this surtax. The proceeds must be expended for specified emergency fire rescue services and facilities. Hamilton and Liberty counties will be levying this surtax during the 2025 calendar year.

REVENUE:

| Fiscal Year | Total Collections | Annual Change % |
|---|---|---|
| 2026-27* | 195,634 | 2.04% |
| 2025-26* | 191,726 | -0.21% |
| 2024-25 | 192,139 | 30.53% |
| 2023-24 | 147,194 | -26.30% |
| 2022-23 | 199,734 | 20.66% |
| 2021-22 | 165,532 | 20.60% |
| 2020-21 | 137,256 | 16.71% |

HISTORY:
Chapter 2009-182, L.O.F. (SB 1000), created the Emergency Fire Rescue Services and Facilities Surtax. It authorized a county's governing body, other than a county that has imposed two separate discretionary surtaxes without expiration, to levy a discretionary sales surtax of up to 1 percent, subject to voter approval in a countywide referendum, for emergency fire rescue services and facilities.

Chapter 2015-169, L.O.F. (CS/CS/HB 209), removed the requirement for the county government to enter into an interlocal agreement as a prerequisite for holding a referendum on the surtax. If the surtax is approved by referendum, the proceeds will be distributed to all local government entities providing emergency fire rescue services in the county. Surtax proceeds will be distributed to all participating entities providing emergency fire rescue services in the county based on each entity's pro rata share of spending on such services in the county over the five preceding fiscal years. Local government entities receiving any share of the surtax proceeds are required to reduce ad valorem taxes by the amount of revenue projected from surtax collections. If the surtax raises more revenue than the amount that would reduce the millage rate to zero, the funds are applied to non-ad valorem assessments by the entity, with any excess surtax proceeds transferred to the county to reduce the county's millage rate. If any entity declines its share of surtax proceeds, those proceeds are redistributed proportionally to participating entities on a pro rata basis. Chapter 2019-64, L.O.F. (CS/CS/HB 5), amended s. 212.055, F.S., to require, effective January 1, 2020, that any referendum to adopt or amend a local discretionary sales surtax be held at a general election, which is defined in s. 97.021, F.S., to mean an election held on the first Tuesday after the first Monday in November in the even-numbered years. Upon adoption of an ordinance or a resolution by a county or school district to hold a local discretionary sales surtax referendum on or after January 1, 2020, the legislation required the county or school district to provide the Florida Legislature's Office of Program Policy Analysis and Government Accountability (OPPAGA) with a copy of the final ordinance or resolution calling for the referendum at least 180 days before the referendum is held. Additionally, the legislation maintained the requirement that OPPAGA select and pay for a certified

public accountant to conduct a performance audit of the program associated with the proposed surtax and the requirement that the performance audit be completed and made available on the county or school district website at least 60 days prior to the referendum. OPPAGA is required to procure the certified public accountant to conduct the performance audit within 60 days of receiving the final resolution or ordinance. Furthermore, the legislation declared void any local discretionary sales surtax referendum if the county or school district failed to provide notice to OPPAGA or failed to publish the results of the performance audit on its website at least 60 days before the referendum was held.

Chapter 2023-157, L.O.F. (HB 7063), required a referendum to reenact a local discretionary sales surtax to be held at a general election as defined in s. 97.021, F.S. A referendum to reenact an expiring surtax must be held at a general election occurring within the 48-month period immediately preceding the effective date of the reenacted surtax. Such a referendum may appear on the ballot only once within the 48-month period.

IMPOSITION AND RATE:
The rate is up to 1 percent. Any county, except Madison, Miami-Dade, and certain portions of Orange and Osceola, is eligible to levy the surtax, subject to voter approval in a countywide referendum. The rate is up to 1 percent. Madison and Miami-Dade counties are not eligible to levy this surtax because both counties currently levy two separate discretionary surtaxes without expiration. Madison County levies both the Small County Surtax and Voter-Approved Indigent Care Surtax without expiration dates, and Miami-Dade County levies both the Charter County and Regional Transportation System Surtax and County Public Hospital Surtax without expiration dates. During the 2025 calendar year, Hamilton County will be levying at the 1 percent rate, and Liberty County will be levying at the 0.5 percent rate.

Additionally, the legislation provides that, notwithstanding s. 212.054, F.S., if a multicounty independent special district created pursuant to Chapter 67-764, L.O.F., levies ad valorem taxes on district property to fund emergency fire rescue service within the district and is required by s.2, Art. VII of the State Constitution to maintain a uniform ad valorem tax rate throughout the district, the county may not levy the surtax within the district's boundaries. This provision relates specifically to the Central Florida Tourism Oversight District (formerly the Reedy Creek Improvement District), which is located within portions of Orange and Osceola counties. The cities of Bay Lake and Lake Buena Vista as well as the Walt Disney World Resort Complex are located within the district. This provision prevents either county from levying the surtax within the district's boundaries if an ad valorem tax is levied to fund emergency fire rescue services. Currently, the district levies such an ad valorem tax and maintains a uniform ad valorem tax rate. Consequently, Orange and Osceola counties are prohibited from levying the surtax within the district's boundaries.

In addition to the Charter County and Regional Transportation System Surtax and the School Capital Outlay Surtax, this surtax is not subject to a combined rate limitation that impacts the other discretionary sales surtaxes.

DISPOSITION AND USES:
The surtax proceeds, less an administrative fee that may be retained by the Department of Revenue, are distributed by the Department to the county. The county distributes the surtax proceeds it receives from the Department to each local government entity providing emergency fire rescue services in the county. The surtax proceeds, less an administrative fee not to exceed 2 percent of the surtax collected, must be distributed by the county based on each entity's average annual expenditures for fire control and emergency fire rescue services in the five fiscal years preceding the fiscal year in which the surtax takes effect in proportion to the average annual total of the expenditures for such entities in the five fiscal years preceding the fiscal year in which the surtax takes effect. The county must revise the distribution

proportions to reflect a change in the service area of an entity receiving a distribution of the surtax proceeds. If an entity declines its share of surtax revenue, such revenue must be redistributed proportionally to the entities that are participating in the sharing of such revenue based on each participating entity's average annual expenditures for fire control and emergency fire rescue services in the preceding five fiscal years in proportion to the average annual total of the expenditures for the participating entities in the preceding five fiscal years.

The surtax shall be expended for emergency fire rescue services and facilities, which includes but is not limited to the following: 1) preventing and extinguishing fires; 2) protecting and saving life and property from fires, natural or intentional acts, or disasters; 3) enforcing municipal, county, or state fire protection codes and laws pertaining to the prevention and control of fires; and 4) providing pre-hospital emergency medical treatment.

ADDITIONAL INFORMATION:
A more detailed description of this surtax in its present form as well as estimated revenue distributions to county and municipal governments can be found in the Office of Economic and Demographic Research's annual report *Local Government Financial Information Handbook* via the following link:
http://edr.state.fl.us/Content/local-government/reports/index.cfm

# LOCAL GOVERNMENT INFRASTRUCTURE SURTAX

FLORIDA STATUTES: Section 212.055(2)

ADMINISTERED BY: Department of Revenue

SUMMARY:
The Local Government Infrastructure Surtax may be levied at the rate of 0.5 or 1 percent pursuant to an ordinance enacted by a majority vote of the county's governing body and approved by voters in a countywide referendum. Generally, the proceeds must be expended to finance, plan, and construct infrastructure; to acquire land for public recreation, conservation, or protection of natural resources; or to finance the closure of local government-owned solid waste landfills that have been closed or are required to be closed by order of the Department of Environmental Protection (DEP). Additional expenditure authority exists for select counties. All counties are eligible to levy this surtax, and 27 counties will be levying this surtax during the 2025 calendar year.

REVENUE:

| Fiscal Year | Total Collections | Annual Change % |
|---|---|---|
| 2026-27* | 1,825,867,704 | 2.04% |
| 2025-26* | 1,789,393,112 | -0.21% |
| 2024-25 | 1,793,246,092 | -1.30% |
| 2023-24 | 1,816,780,780 | -2.81% |
| 2022-23 | 1,869,244,096 | 6.20% |
| 2021-22 | 1,760,176,531 | 19.11% |
| 2020-21 | 1,477,819,583 | 10.02% |

* Estimate

HISTORY:
Chapter 87-239, L.O.F., created the Local Government Infrastructure Surtax, which authorized county governments, pursuant to voter approval in a countywide referendum, to levy a surtax of up to 1 percent in increments of ¼ cent for a period of up to 15 years. The distribution of proceeds was to be governed by interlocal agreement or default formula methodology, and the proceeds could be expended only for the financing, planning, and construction of infrastructure. Local government could not use the proceeds to supplant user fees or reduce existing ad valorem taxes. Chapter 87-548, L.O.F., authorized the surtax levy at a rate of 0.5 or 1 percent. Additionally, one or more municipalities representing a majority of the county's municipal population were authorized to place a surtax levy referendum on the ballot by adopting uniform resolutions to that effect.

Chapter 90-132, L.O.F. (HB 1299), authorized the surtax proceeds to also be used to acquire land for public recreation or conservation, or for the protection of natural resources. Chapter 90-203, L.O.F. (SB 862), required that municipalities adopting uniform resolutions called for a surtax levy referendum represent a majority of the county's population. Chapter 90-282, L.O.F. (HB 475), authorized school districts to share in the surtax proceeds pursuant to an interlocal agreement, subject to the consent of the county's governing body and the governing bodies of municipalities representing a majority of the county's municipal population. Chapter 92-309, L.O.F. (HB 193-H), limited the combined rate, in varying combinations of this and several other surtaxes to 1 percent. In addition, counties having a total population of 50,000 or less on April 1, 1992, were authorized to use the surtax proceeds for any public purpose if several conditions were met. Chapter 93-207, L.O.F. (HB 461), authorized local governments to use the surtax proceeds to finance the closure of county or municipal-owned solid waste landfills that

were already closed or required to be closed. In addition, counties having a total population of less than 50,000 were authorized to use the surtax proceeds for long-term maintenance costs associated with landfill closures. Chapter 93-222, L.O.F. (HB 729), limited the length of surtax levy and specified that any levy could only be extended by referendum approval. Also, the definition of infrastructure was expanded to include emergency vehicles and equipment. Chapter 94-459, L.O.F. (HB 475), authorized the Clay County BOCC to use the surtax proceeds to retire or service bond indebtedness incurred prior to July 1, 1987, and subsequently refunded, for the purpose of financing infrastructure. Chapter 94-487, L.O.F. (HB 2091), authorized the Alachua County BOCC and the county's municipalities to use surtax proceeds for the operation and maintenance of parks and recreation programs. Chapter 96-240, L.O.F. (SB 2334), authorized any county designated as an area of critical state concern to use the surtax proceeds for any public purpose if several conditions were met. In addition, any county in which 40 percent or more of the just value of real property is exempt or immune from ad valorem taxation (and the municipalities within such a county) was authorized to use the surtax proceeds for operation and maintenance of parks and recreation programs. Chapter 96-410, L.O.F. (HB 751), specified that once a county having a total population of 50,000 or less was qualified to use the surtax proceeds for long-term maintenance costs associated with the closure of solid waste landfills, the county would retain that qualification until its population exceeds 75,000. Chapter 98-342, L.O.F. (HB 4413), provided for an additional authorized use of the surtax that is imposed or extended after July 1, 1998, by authorizing that no more than 15 percent of surtax proceeds may be allocated for the purpose of funding economic development projects of a general public purpose targeted to improve local economies. Such funding could include the operational costs and incentives related to such economic development. Chapter 98-258, L.O.F. (HB 1589), increased the maximum population limit from 50,000 to 75,000 for a small county to qualify to use the surtax proceeds for long-term maintenance costs associated with landfill closure. Chapter 99-340, L.O.F. (HB 289), authorized charter counties to use the surtax proceeds to retire or service indebtedness for bonds issued prior to July 1, 1987, for infrastructure purposes as well as for bonds subsequently issued to refund such bonds. Additionally, the use of such proceeds for retiring or servicing indebtedness incurred for such refunding bonds issued prior to July 1, 1999, was ratified.

Chapter 2003-254, L.O.F. (SB 1176), eliminated the restrictions on the use of surtax proceeds to supplant or replace user fees or to reduce ad valorem taxes. Chapter 2003-402, L.O.F. (HB 113-A), expanded the allowable uses of the surtax proceeds to include the construction, lease, or maintenance of, provision of utilities or security for, those court facilities as defined in s. 29.008, F.S. Chapter 2006-66, L.O.F. (HB 737), modified the definition of infrastructure to include any fixed capital expenditure or fixed capital outlay associated with the improvement of private facilities that have a life expectancy of five or more years and that the owner agrees to make available for use on a temporary basis as needed by a local government as a public emergency shelter or staging area for emergency response equipment during an emergency officially declared by the state or local government. Chapter 2006-223, L.O.F. (HB 1299), authorized a county, which was designated as an area of critical state concern for at least 20 consecutive years prior to removal of the designation and qualified to use the surtax proceeds for any public purpose at the time of the designation's removal, to continue to use up to 10 percent of the surtax proceeds for any public purpose other than for infrastructure purposes for 20 years. After the 20 year period expires, a county could adopt an ordinance providing for such continued use of surtax proceeds. Chapter 2007-196, L.O.F. (SB 1974), deleted a provision prohibiting a school district, county, or municipality from issuing bonds more than once each year pledging the surtax proceeds. Chapter 2009-96, L.O.F. (SB 360), expanded the definition of infrastructure to include any land-acquisition expenditure for a residential housing project in which at least 30 percent of the units are affordable to individual or families whose total annual household income does not exceed 120 percent of the area median income adjusted for household size, if the land is owned by a local government or special district that enters into a written agreement with the local government to provide such housing.

Chapter 2012-117, L.O.F. (HB 7117), authorized the surtax proceeds to be used for the additional purpose of providing loans, grants, or rebates to residential or commercial property owners who make energy efficiency improvements to their residential or commercial property, if a local government ordinance authorized such use is approved by referendum. Chapter 2013-198, L.O.F. (HB 579), expanded the definition of energy efficiency improvement to include the installation of systems for natural gas fuels as defined in s. 206.9951, F.S. This change allows a local government to provide loans, grants, or rebates to residential or commercial property owners who install a defined natural gas fueling system, if a local ordinance authorizing such use is approved by referendum. Chapter 2016-225, L.O.F. (CS/CS/HB 447), expanded the purposes for which the surtax proceeds and accrued interest can be used to include the prevention or satisfaction of private property rights claims resulting from limitations imposed by the designation of an area of critical state concern. Additionally, the legislation expanded the definition of infrastructure in s. 212.055(2)(d)1.a., F.S. Prior to this law change, the statute limited the definition, in part, to mean any fixed capital expenditure or fixed capital outlay associated with the construction, reconstruction, or improvement of public facilities that have life expectancies of 5 or more years, related land acquisition, land improvement, design, and engineering costs. The legislation expanded this definition to include all other professional and related costs required to bring public facilities into service. As used here, the term public facilities means facilities as defined in ss. 163.3164(38), 163.3221(13), or 189.012(5), F.S. Chapter 2018-118, L.O.F. (CS/HB 7087), amended the definition of infrastructure to clarify that public facilities also includes facilities that are necessary to carry out governmental purposes, including, but not limited to, fire stations, general governmental office buildings, and animal shelters. Additionally, the legislation amended the definition of infrastructure to include instructional technology used solely in a school district's classrooms. Instructional technology is defined as an interactive device that assists a teacher in instructing a class or group of students. The hardware and software necessary to operate the interactive device and support systems in which an interactive device may mount are also included as authorized expenditures. Chapter 2019-64, L.O.F. (CS/CS/HB 5), amended s. 212.055, F.S., to require, effective January 1, 2020, that any referendum to adopt or amend a local discretionary sales surtax be held at a general election, which is defined in s. 97.021, F.S., to mean an election held on the first Tuesday after the first Monday in November in the even-numbered years. Upon adoption of an ordinance or a resolution by a county or school district to hold a local discretionary sales surtax referendum on or after January 1, 2020, the legislation required the county or school district to provide the Florida Legislature's Office of Program Policy Analysis and Government Accountability (OPPAGA) with a copy of the final ordinance or resolution calling for the referendum at least 180 days before the referendum is held. Additionally, the legislation maintained the requirement that OPPAGA select and pay for a certified public accountant to conduct a performance audit of the program associated with the proposed surtax and the requirement that the performance audit be completed and made available on the county or school district website at least 60 days prior to the referendum. OPPAGA is required to procure the certified public accountant to conduct the performance audit within 60 days of receiving the final resolution or ordinance. Furthermore, the legislation declared void any local discretionary sales surtax referendum if the county or school district failed to provide notice to OPPAGA or failed to publish the results of the performance audit on its website at least 60 days before the referendum was held.

Chapter 2023-157, L.O.F. (HB 7063), required a referendum to reenact a local discretionary sales surtax to be held at a general election as defined in s. 97.021, F.S. A referendum to reenact an expiring surtax must be held at a general election occurring within the 48-month period immediately preceding the effective date of the reenacted surtax. Such a referendum may appear on the ballot only once within the 48-month period. Chapter 2025-109, L.O.F. (CS/CS/CS/HB 1105), specifies that any interlocal agreement for the distribution of Local Government Infrastructure Surtax revenues, which includes a school district, must require the surtax revenues allocated to the school district be shared with eligible charter schools based on the charter school's proportionate share of the total school district enrollment. The surtax revenues must be expended by a charter school consistent with the allowable uses for charter school capital outlay funds. If a school's charter is not renewed or is terminated and the school is dissolved, any

unencumbered funds received from such a surtax must be returned to the charter school's sponsor. The requirement that revenues from such a surtax are shared with eligible charter schools applies to levies authorized on or after July 1, 2025.

IMPOSITION AND RATE:
Local governments may levy this surtax at a rate of 0.5 or 1 percent. This levy shall be pursuant to an ordinance enacted by a majority of the members of the county's governing body and approved by the voters in a countywide referendum. In lieu of action by the county's governing body, municipalities representing a majority of the county's population may initiate the surtax through the adoption of uniform resolutions calling for a countywide referendum on the issue. If the proposal to levy the surtax is approved by a majority of the electors, the levy shall take effect.

Additionally, the surtax may not be levied beyond the time established in the ordinance if the surtax was levied pursuant to a referendum held before July 1, 1993. If the pre-July 1, 1993 ordinance did not limit the period of the levy, the surtax may not be levied for more than 15 years. There is no state-mandated limit on the length of levy for those surtax ordinances enacted after July 1, 1993. The levy may only be extended by voter approval in a countywide referendum.

During the 2025 calendar year, 9 counties will be levying at the 0.5 percent rate, and 18 counties will be levying at the 1 percent rate. This surtax is one of several surtaxes subject to a combined rate limitation. A county shall not levy this surtax and the Small County Surtax, Indigent Care and Trauma Center Surtax, and County Public Hospital Surtax in excess of a combined rate of 1 percent.

DISPOSITION AND USES:
The Department of Revenue shall distribute the surtax proceeds to the county and its respective municipalities pursuant to distribution percentages specified in a locally determined interlocal agreement, which may include a school district, or the default formula methodology based on the Local Government Half-cent Sales Tax formulas provided in s. 218.62, F.S.

The surtax proceeds and any accrued interest shall be expended by the school district, within the county and municipalities within the county, or, in the case of a negotiated joint county agreement, within another county, to: 1) finance, plan, and construct infrastructure; 2) acquire any interest in land for public recreation, conservation, or protection of natural resources or to prevent or satisfy private property rights claims resulting from limitations imposed by the designation of an area of critical state concern; 3) provide loans, grants, or rebates to residential or commercial property owners who make energy efficiency improvements to their residential or commercial property, if a local government ordinance authorizing such use is approved by referendum; or 4) finance the closure of county or municipal-owned solid waste landfills that have been closed or are required to be closed by order of the DEP.

A county with a total population of 50,000 or less on April 1, 1992, or any county designated as an area of critical state concern that imposed the surtax before July 1, 1992, may use the proceeds and accrued interest of the surtax for any public purpose if the county satisfies all of the following criteria: 1) the debt service obligations for any year are met; 2) the county's comprehensive plan has been determined to be in compliance with part II of ch. 163, F.S; and 3) the county has adopted an amendment to the surtax ordinance pursuant to the procedure provided in s. 125.66, F.S., authorizing additional uses of the proceeds and accrued interest. Additional expenditure authority exists for select counties.

ADDITIONAL INFORMATION:
A more detailed description of this surtax in its present form as well as estimated revenue distributions to county and municipal governments can be found in the Office of Economic and Demographic Research's annual report *Local Government Financial Information Handbook* via the following link:
http://edr.state.fl.us/Content/local-government/reports/index.cfm

# SMALL COUNTY SURTAX

FLORIDA STATUTES: Section 212.055(3)

ADMINISTERED BY: Department of Revenue

SUMMARY:
Any county with a total population of 50,000 or less on April 1, 1992, is authorized to levy the Small County Surtax at the rate of 0.5 or 1 percent. County governments may impose the levy by either an extraordinary vote of the governing body if the proceeds are to be expended for operating purposes or by voter approval in a countywide referendum if the proceeds are to be used to service bonded indebtedness. If the surtax is enacted by an extraordinary vote of the county's governing body, the proceeds may be used for the operational expenses of any infrastructure or for any public purpose authorized in the ordinance. If the surtax is enacted by countywide referendum, the proceeds may be used to service bonded indebtedness to finance, plan, and construct infrastructure, and to acquire land for public recreation, conservation, or natural resource preservation. Thirty counties will be levying this surtax during the 2025 calendar year.

REVENUE:

| Fiscal Year | Total Collections | Annual Change % |
|---|---|---|
| 2026-27* | 162,810,144 | 2.04% |
| 2025-26* | 159,557,754 | -0.21% |
| 2024-25 | 159,901,319 | 1.79% |
| 2023-24 | 157,095,817 | -1.93% |
| 2022-23 | 160,182,821 | 6.30% |
| 2021-22 | 150,688,041 | 17.20% |
| 2020-21 | 128,571,184 | 19.81% |

* Estimate

HISTORY:
Chapter 92-309, L.O.F. (HB 193-H), created the Small County Surtax. It authorized counties with a total population of 50,000 or less on April 1, 1992, to levy a surtax of 0.5 or 1 percent, pursuant to an extraordinary vote of the county's governing body if the proceeds were to be used for operating purposes or voter approval in a countywide referendum if the proceeds were to be used for bonded indebtedness. The proceeds were to be shared with municipalities located within the county, and if levied pursuant to referendum, sharing with the county school district or shared with another county for joint county project as conditioned by the referendum. In addition, it limited the combined rate, in varying combinations, of this surtax and the Local Government Infrastructure Surtax, Indigent Care Surtax, County Public Hospital Surtax, and the then Small County Indigent Care Surtax.

Chapter 2019-64, L.O.F. (CS/CS/HB 5), amended s. 212.055, F.S., to require, effective January 1, 2020, that any referendum to adopt or amend a local discretionary sales surtax be held at a general election, which is defined in s. 97.021, F.S., to mean an election held on the first Tuesday after the first Monday in November in the even-numbered years. Upon adoption of an ordinance or a resolution by a county or school district to hold a local discretionary sales surtax referendum on or after January 1, 2020, the legislation required the county or school district to provide the Florida Legislature's Office of Program Policy Analysis and Government Accountability (OPPAGA) with a copy of the final ordinance or resolution calling for the referendum at least 180 days before the referendum is held. Additionally, the legislation maintained the requirement that OPPAGA select and pay for a certified public accountant to conduct a performance audit of the program associated with the proposed surtax and the requirement that

the performance audit be completed and made available on the county or school district website at least 60 days prior to the referendum. OPPAGA is required to procure the certified public accountant to conduct the performance audit within 60 days of receiving the final resolution or ordinance. Furthermore, the legislation declared void any local discretionary sales surtax referendum if the county or school district failed to provide notice to OPPAGA or failed to publish the results of the performance audit on its website at least 60 days before the referendum was held.

Chapter 2023-157, L.O.F (HB 7063), required a referendum to reenact a local discretionary sales surtax to be held at a general election as defined in s. 97.021, F.S. A referendum to reenact an expiring surtax must be held at a general election occurring within the 48-month period immediately preceding the effective date of the reenacted surtax. Such a referendum may appear on the ballot only once within the 48-month period.

IMPOSITION AND RATE:
Only those counties, defined as having a total population of 50,000 or less on April 1, 1992, are eligible to levy this surtax at a rate of 0.5 or 1 percent. Based on the population criterion, 31 counties (i.e., Baker, Bradford, Calhoun, Columbia, DeSoto, Dixie, Flagler, Franklin, Gadsden, Gilchrist, Glades, Gulf, Hamilton, Hardee, Hendry, Holmes, Jackson, Jefferson, Lafayette, Levy, Liberty, Madison, Nassau, Okeechobee, Sumter, Suwannee, Taylor, Union, Wakulla, Walton and Washington) are eligible to levy the surtax.

During the 2025 calendar year, 30 of 31 eligible counties will be levying this surtax. Flagler County will be levying at the 0.5 percent rate and 29 counties will be levying at the 1 percent rate. This surtax is one of several surtaxes subject to a combined rate limitation. A county shall not levy this surtax and the Local Government Infrastructure Surtax, Indigent Care and Trauma Center Surtax, and County Public Hospital Surtax in excess of a combined rate of 1 percent.

DISPOSITION AND USES:
The Department of Revenue shall distribute the surtax proceeds to the county and its respective municipalities pursuant to distribution percentages specified in a locally determined interlocal agreement, which may include a school district, or the default formula methodology based on the Local Government Half-cent Sales Tax formulas provided in s. 218.62, F.S.

If the surtax is levied as a result of voter approval in a countywide referendum, the proceeds and any accrued interest may be used by the school district, county, or municipalities within the county, or municipalities within another county in the case of a negotiated joint county agreement, for the purpose of servicing bonded indebtedness to finance, plan, and construct infrastructure and to acquire land for public recreation, conservation, or protection of natural resources. In this case, infrastructure means any fixed capital expenditure or cost associated with the construction, reconstruction, or improvement of public facilities having a life expectancy of five or more years and any related land acquisition, land improvement, design, and engineering costs. If the surtax is levied pursuant to an ordinance approved by an extraordinary vote of the county's governing body, the proceeds and accrued interest may be used for operational expenses of any infrastructure or for any public purpose authorized in the ordinance. School districts, counties, and municipalities may pledge the surtax proceeds for the purpose of servicing new bonded indebtedness.

ADDITIONAL INFORMATION:
A more detailed description of this surtax in its present form as well as estimated revenue distributions to county and municipal governments can be found in the Office of Economic and Demographic Research's annual report *Local Government Financial Information Handbook* via the following link: http://edr.state.fl.us/Content/local-government/reports/index.cfm

# INDIGENT CARE AND TRAUMA CENTER SURTAX

FLORIDA STATUTES: Section 212.055(4)

ADMINISTERED BY: Department of Revenue

SUMMARY:
This surtax consists of two separate levies for different groups of eligible counties. Any county with a total population of 800,000 or more may impose, subject to voter approval in a countywide referendum, a surtax not to exceed 0.5 percent for the purpose of funding health care services for qualified residents. However, Miami-Dade County is not eligible to levy this surtax because it is authorized to levy the separate County Public Hospital Surtax. Non-consolidated counties with a total population of less than 800,000 may impose, subject to voter approval in a countywide referendum, a surtax not to exceed 0.25 percent for the sole purpose of funding trauma services provided by a trauma center licensed pursuant to ch. 395, F.S. Hillsborough County will be levying this surtax during the 2025 calendar year.

REVENUE:

| Fiscal Year | Total Collections | Annual Change % |
|---|---|---|
| 2026-27* | 162,754,143 | 2.04% |
| 2025-26* | 159,502,872 | -0.21% |
| 2024-25 | 159,846,319 | 3.40% |
| 2023-24 | 154,594,532 | -0.39% |
| 2022-23 | 155,207,396 | 6.21% |
| 2021-22 | 146,134,846 | 21.66% |
| 2020-21 | 120,115,543 | 12.40% |

* Estimate

HISTORY:
Chapter 91-81, L.O.F. (SB 156), created the Indigent Care Surtax. It authorized any non-consolidated county having a total population of 800,000 or more to levy a 0.5 percent surtax, pursuant to an ordinance adopted by an extraordinary vote of the county's governing body or voter approval in a countywide referendum. The surtax proceeds were to be used to fund health care services for indigent and medically poor persons and to supplement funding of the county public general hospital. Chapter 92-309, L.O.F. (HB 193-H), set an October 1, 1998 repeal date for the surtax. In addition, it limited the combined rate, in varying combinations, of this surtax in addition to the Local Government Infrastructure Surtax, Small County Surtax, County Public Hospital Surtax, and the then Small County Indigent Care Surtax to 1 percent. Chapter 97-83, L.O.F. (SB 392), extended the surtax's repeal date to October 1, 2005.

Chapters 2000-312 and 318, L.O.F. (HB 509 and HB 591), renamed the Indigent Care Surtax as the Indigent Care and Trauma Center Surtax and required that the county's plan setting forth the use of the surtax proceeds should also address the services to be provided by the Level I trauma center. In addition, requirements for the disbursement of funds to health care service providers were modified. Chapter 2003-77, L.O.F. (HB 457), repealed the October 1, 2005 sunset provision and imposed the requirement of a biennial audit of the county's indigent care trust fund. Chapter 2004-259, L.O.F. (SB 1762), authorized non-consolidated counties having a total population of less than 800,000 to impose, subject to voter approval in a countywide referendum, a surtax not to exceed 0.25 percent for the sole purpose of funding trauma services provided by a trauma center.

Chapter 2019-64, L.O.F. (CS/CS/HB 5), amended s. 212.055, F.S., to require, effective January 1, 2020, that any referendum to adopt or amend a local discretionary sales surtax be held at a general election, which is defined in s. 97.021, F.S., to mean an election held on the first Tuesday after the first Monday in

November in the even-numbered years. Upon adoption of an ordinance or a resolution by a county or school district to hold a local discretionary sales surtax referendum on or after January 1, 2020, the legislation required the county or school district to provide the Florida Legislature's Office of Program Policy Analysis and Government Accountability (OPPAGA) with a copy of the final ordinance or resolution calling for the referendum at least 180 days before the referendum is held. Additionally, the legislation maintained the requirement that OPPAGA select and pay for a certified public accountant to conduct a performance audit of the program associated with the proposed surtax and the requirement that the performance audit be completed and made available on the county or school district website at least 60 days prior to the referendum. OPPAGA is required to procure the certified public accountant to conduct the performance audit within 60 days of receiving the final resolution or ordinance. Furthermore, the legislation declared void any local discretionary sales surtax referendum if the county or school district failed to provide notice to OPPAGA or failed to publish the results of the performance audit on its website at least 60 days before the referendum was held.

Chapter 2023-157, L.O.F (HB 7063), required a referendum to reenact a local discretionary sales surtax to be held at a general election as defined in s. 97.021, F.S. A referendum to reenact an expiring surtax must be held at a general election occurring within the 48-month period immediately preceding the effective date of the reenacted surtax. Such a referendum may appear on the ballot only once within the 48-month period. Chapter 2024-158, L.O.F., (CS/HB 7073) removed statutory language that excluded counties consolidated with one or more municipalities (i.e., Duval County only) from the authority to levy the surtax. Additionally, it removed a county's ability to authorize the surtax levy by an extraordinary vote of the governing body and now requires voters to approve the levy.

IMPOSITION AND RATE:
As previously mentioned, this surtax consists of two separate levies for different groups of eligible counties. First, any county having a total population of 800,000 or more is eligible to levy a surtax at a rate not to exceed 0.5 percent subject to voter approval in a countywide referendum. Based on 2024 official population estimates, the eight counties of Broward, Duval, Hillsborough, Lee, Orange, Palm Beach, Pinellas, and Polk are eligible to levy the 0.5 percent surtax. Although Miami-Dade County has a total population greater than 800,000, the county is prohibited from levying the 0.5 percent surtax because it already has authority to levy the County Public Hospital Surtax.

Second, non-consolidated counties having a total population of less than 800,000 are eligible to levy a surtax at a rate not to exceed 0.25 percent. This surtax can only be imposed subject to voter approval in a countywide referendum. Based on the population criterion, 58 counties are eligible to levy the 0.25 percent surtax.

In total, 66 counties are eligible to levy this surtax. During the 2025 calendar year, only Hillsborough County will be levying at the 0.5 percent rate. Both of these surtaxes are subject to a combined rate limitation. A county eligible to levy either the 0.5 or 0.25 percent surtax shall not levy it along with the Local Government Infrastructure Surtax and Small County Surtax in excess of a combined rate of 1 percent.

DISPOSITION AND USES:
The Department of Revenue distributes the surtax proceeds on a regular and periodic basis to the Clerk of Circuit Court as the designated custodian of the proceeds. The clerk shall maintain the monies in an indigent health care or trauma services trust fund, invest any funds held on deposit in the trust fund, disburse the funds to the appropriate provider upon directive from the authorizing county, and prepare on a biennial basis an audit of the trust fund.

# INDIGENT CARE AND TRAUMA CENTER SURTAX

The 0.5 percent surtax proceeds shall be used to fund a broad range of health care services for both indigent persons and the medically poor, including, but not limited to, primary care and preventive care as well as hospital care. The 0.25 percent surtax proceeds shall be used for the sole purpose of funding trauma services provided by a trauma center licensed pursuant to Chapter 395, F.S.

ADDITIONAL INFORMATION:
A more detailed description of this surtax in its present form as well as estimated revenue distributions to county and municipal governments can be found in the Office of Economic and Demographic Research's annual report *Local Government Financial Information Handbook* via the following link:
http://edr.state.fl.us/Content/local-government/reports/index.cfm

# COUNTY PUBLIC HOSPITAL SURTAX

FLORIDA STATUTES: Section 212.055(5)

ADMINISTERED BY: Department of Revenue

SUMMARY:
Any county, as defined in s. 125.011(1), F.S., [i.e., Miami-Dade County] is authorized to levy the County Public Hospital Surtax at a rate of 0.5 percent. The levy may be authorized either by an extraordinary vote of the county's governing body or voter approval in a countywide referendum. Proceeds shall be used to supplement the operation, maintenance, and administration of the county public general hospital. Miami-Dade County will be levying this surtax during the 2025 calendar year.

REVENUE:

| Fiscal Year | Total Collections | Annual Change % |
|---|---|---|
| 2026-27* | 345,438,068 | 2.04% |
| 2025-26* | 338,537,397 | -0.21% |
| 2024-25 | 339,266,347 | 3.38% |
| 2023-24 | 328,185,113 | -0.51% |
| 2022-23 | 329,862,948 | 5.53% |
| 2021-22 | 312,591,846 | 32.66% |
| 2020-21 | 235,639,898 | 3.50% |

* Estimate

HISTORY:
Chapter 91-81, L.O.F. (SB 186), created the County Public Hospital Surtax. It authorized any county, as defined in s. 125.011(1), F.S., [i.e., Miami-Dade County] to levy the surtax at the rate of 0.5 percent pursuant to an extraordinary vote of the county's governing body or voter approval in a countywide referendum. The surtax proceeds were designated for the operation, maintenance, and administration of the county public general hospital. Chapter 92-309, L.O.F. (HB 193-H), limited the combined tax rate, in varying combinations, of this surtax and the Local Government Infrastructure Surtax, Small County Surtax, Indigent Care Surtax, and the then Small County Indigent Care Surtax to 1 percent.

Chapter 2000-312, L.O.F. (HB 509), reduced the county's proportional contribution for the county public general hospital's operation, administration, and maintenance. The monies were redirected for the development and implementation of a county plan for indigent health care services. Additionally, the surtax was scheduled for repeal on October 1, 2005. Chapter 2005-96, L.O.F. (SB 300), reenacted the surtax, which had been set to repeal on October 1, 2005.

Chapter 2019-64, L.O.F. (CS/CS/HB 5), amended s. 212.055, F.S., to require, effective January 1, 2020, that any referendum to adopt or amend a local discretionary sales surtax be held at a general election, which is defined in s. 97.021, F.S., to mean an election held on the first Tuesday after the first Monday in November in the even-numbered years. Upon adoption of an ordinance or a resolution by a county or school district to hold a local discretionary sales surtax referendum on or after January 1, 2020, the legislation required the county or school district to provide the Florida Legislature's Office of Program Policy Analysis and Government Accountability (OPPAGA) with a copy of the final ordinance or resolution calling for the referendum at least 180 days before the referendum is held. Additionally, the legislation maintained the requirement that OPPAGA select and pay for a certified public accountant to conduct a performance audit of the program associated with the proposed surtax and the requirement that the performance audit be completed and made available on the county or school district website at least

60 days prior to the referendum. OPPAGA is required to procure the certified public accountant to conduct the performance audit within 60 days of receiving the final resolution or ordinance. Furthermore, the legislation declared void any local discretionary sales surtax referendum if the county or school district failed to provide notice to OPPAGA or failed to publish the results of the performance audit on its website at least 60 days before the referendum was held.

Chapter 2023-157, L.O.F. (HB 7063), required a referendum to reenact a local discretionary sales surtax to be held at a general election as defined in s. 97.021, F.S. A referendum to reenact an expiring surtax must be held at a general election occurring within the 48-month period immediately preceding the effective date of the reenacted surtax. Such a referendum may appear on the ballot only once within the 48-month period.

IMPOSITION AND RATE:
Any county, as defined in s. 125.011(1), F.S., [i.e., Miami-Dade County] is authorized to levy the County Public Hospital Surtax at a rate of 0.5 percent. The levy may be authorized either by an extraordinary vote of the county's governing body or voter approval in a countywide referendum.

Only Miami-Dade County is eligible to levy this surtax, and the county will be levying at the 0.5 percent rate during the 2025 calendar year. This surtax is one of several surtaxes subject to a combined rate limitation. An eligible county shall not levy this surtax along with the Local Government Infrastructure Surtax and Small County Surtax in excess of a combined rate of 1 percent.

DISPOSITION AND USES:
The surtax proceeds shall be distributed by the Department of Revenue to the county for deposit into a special fund set aside from other county funds. The proceeds are designated to supplement the operation, maintenance, and administration of the county public general hospital.

ADDITIONAL INFORMATION:
A more detailed description of this surtax in its present form as well as estimated revenue distributions to county and municipal governments can be found in the Office of Economic and Demographic Research's annual report *Local Government Financial Information Handbook* via the following link: http://edr.state.fl.us/Content/local-government/reports/index.cfm

# VOTER–APPROVED INDIGENT CARE SURTAX

FLORIDA STATUTES: Section 212.055(7)

ADMINISTERED BY: Department of Revenue

SUMMARY:
Counties with a total population of less than 800,000 are eligible to levy the Voter-Approved Indigent Care Surtax subject to voter approval in a countywide referendum. If a publicly supported medical school is located within the county, the tax rate shall not exceed 1 percent. If no such medical school is located within the county, the tax rate is capped at 0.5 percent. However, any county with a total population of less than 50,000 may levy the surtax at a rate not to exceed 1 percent. The proceeds are to be used to fund health care services for the medically poor. Five counties will be levying this surtax during the 2025 calendar year.

REVENUE:

| Fiscal Year | Total Collections | Annual Change % |
|---|---|---|
| 2026-27* | 66,805,423 | 2.04% |
| 2025-26* | 65,470,880 | -0.21% |
| 2024-25 | 65,611,854 | 1.54% |
| 2023-24 | 64,614,343 | 0.04% |
| 2022-23 | 64,590,418 | 8.79% |
| 2021-22 | 59,368,932 | 15.25% |
| 2020-21 | 51,513,733 | 13.31% |

* Estimate

HISTORY:
Chapter 92-309, L.O.F. (HB 193-H), created the Small County Indigent Care Surtax within s. 212.055(6), F.S., which authorized counties with a total population of 50,000 or less on April 1, 1992, to levy a 0.5 percent pursuant to an extraordinary vote of the governing body to fund health services for indigent or medically poor county residents. The surtax was scheduled to repeal on October 1, 1998. Chapter 99-4, L.O.F. (HB 1045), repealed s. 212.055(6), F.S., since the surtax had expired on October 1, 1998.

Chapter 2000-312, L.O.F. (HB 509), created the Voter-Approved Indigent Care Surtax within s. 212.055(7), F.S., which authorized counties with a total population of less than 800,000 to the surtax subject to voter approval in a countywide referendum. If a publicly supported medical school was located within the county, the surtax rate could not exceed 1 percent. If no such medical school was located within the county, the tax rate was capped at 0.5 percent. The surtax proceeds were to be used to fund health care services for the medically poor. The surtax was scheduled to repeal on October 1, 2005. Chapter 2005-96, L.O.F. (SB 300), reenacted s. 212.055(7), F.S., which was set to repeal on October 1, 2005. Chapter 2005-242, L.O.F. (SB 470), authorized any county with a total population of less than 50,000 to levy this surtax, subject to referendum approval, at a rate not to exceed 1 percent. The surtax proceeds could be pledged to service new or existing bond indebtedness incurred to finance, plan, construct, or reconstruct a public or not-for-profit hospital in the county and any land acquisition, land improvement, design, or engineering costs related to the hospital if the county's governing body determined that a public or not-for-profit hospital existing at the time of the bond issuance would, more likely than not, cease to operate.

Chapter 2019-64, L.O.F. (CS/CS/HB 5), amended s. 212.055, F.S., to require, effective January 1, 2020, that any referendum to adopt or amend a local discretionary sales surtax be held at a general election,

which is defined in s. 97.021, F.S., to mean an election held on the first Tuesday after the first Monday in November in the even-numbered years. Upon adoption of an ordinance or a resolution by a county or school district to hold a local discretionary sales surtax referendum on or after January 1, 2020, the legislation required the county or school district to provide the Florida Legislature's Office of Program Policy Analysis and Government Accountability (OPPAGA) with a copy of the final ordinance or resolution calling for the referendum at least 180 days before the referendum is held. Additionally, the legislation maintained the requirement that OPPAGA select and pay for a certified public accountant to conduct a performance audit of the program associated with the proposed surtax and the requirement that the performance audit be completed and made available on the county or school district website at least 60 days prior to the referendum. OPPAGA is required to procure the certified public accountant to conduct the performance audit within 60 days of receiving the final resolution or ordinance. Furthermore, the legislation declared void any local discretionary sales surtax referendum if the county or school district failed to provide notice to OPPAGA or failed to publish the results of the performance audit on its website at least 60 days before the referendum was held.

Chapter 2023-157, L.O.F. (HB 7063), required a referendum to reenact a local discretionary sales surtax to be held at a general election as defined in s. 97.021, F.S. A referendum to reenact an expiring surtax must be held at a general election occurring within the 48-month period immediately preceding the effective date of the reenacted surtax. Such a referendum may appear on the ballot only once within the 48-month period.

IMPOSITION AND RATE:
Counties with a total population of less than 800,000 are eligible to levy this surtax subject to voter approval in a countywide referendum. If a publicly supported medical school is located within the county, the tax rate shall not exceed 1 percent. If no such medical school is located within the county, the tax rate is capped at 0.5 percent. However, any county with a total population of less than 50,000 may levy the surtax at a rate not to exceed 1 percent. The rate is capped at 0.5 percent or 1 percent if a publicly supported medical school is located in the county.

During the 2025 calendar year, DeSoto, Gadsden, Holmes, Madison, and Polk counties will be levying the surtax at 0.5 percent. Based on the April 1, 2024, official population estimates, 58 counties have a total population of less than 800,000 and are eligible to levy this surtax. Based on these same estimates, the total populations of nine counties (i.e., Broward, Duval, Hillsborough, Lee, Miami-Dade, Orange, Palm Beach, Pinellas, and Polk) exceed 800,000.

Although the total population of Polk County now exceeds 800,000, the county originally authorized this surtax levy, effective January 1, 2005, when its total population was well below the 800,000-population limit. That initial levy was scheduled to expire on December 31, 2019; however, prior to that expiration date, the county extended the levy when its total population was still below the 800,000-population limit. Polk County's levy is now scheduled to expire on December 31, 2044.

This surtax is one of several surtaxes subject to a combined rate limitation. A county eligible to levy this surtax shall not levy it along with the Local Government Infrastructure Surtax and Small County Surtax in excess of a combined rate of 1 percent with the following exceptions. If a publicly supported medical school is located within the county or the county has a total population of less than 50,000, the combined rate cannot exceed 1.5 percent.

DISPOSITION AND USES:
The Department of Revenue distributes the surtax proceeds on a regular and periodic basis to the Clerk of Circuit Court as the designated custodian of the proceeds. The clerk shall maintain the monies in an indigent health care trust fund, invest any funds held on deposit in the trust fund, and disburse the funds to

any provider of health care services or to service the authorized bonded indebtedness, subject to statutory provisions and upon directive from the authorizing county. The clerk must maintain the moneys in an Indigent Health Care Trust Fund, to be used to fund a broad range of health care services for both indigent and medically poor people.

ADDITIONAL INFORMATION:
A more detailed description of this surtax in its present form as well as estimated revenue distributions to county and municipal governments can be found in the Office of Economic and Demographic Research's annual report *Local Government Financial Information Handbook* via the following link:
http://edr.state.fl.us/Content/local-government/reports/index.cfm

# PENSION LIABILITY SURTAX

FLORIDA STATUTES: Section 212.055(9)

ADMINISTERED BY: Florida Department of Revenue

SUMMARY:
The county's governing body may levy the Pension Liability Surtax, at a rate not to exceed 0.5 percent, pursuant to an ordinance conditioned to take effect upon approval by a majority vote of county electors voting in a referendum. The surtax proceeds must be used to fund an underfunded defined benefit retirement plan or system. However, in order to impose this surtax, a county must satisfy five prerequisites. Twenty-seven counties are potentially eligible to levy this surtax; however, no county will be levying this surtax during the 2025 calendar year.

REVENUE:
This surtax was enacted in 2016, and no eligible county has yet levied.

HISTORY:
Chapter 2016-146, L.O.F. (CS/HB 1297), created the Pension Liability Surtax. Chapter 2019-64, L.O.F. (CS/CS/HB 5), amended s. 212.055, F.S., to require, effective January 1, 2020, that any referendum to adopt or amend a local discretionary sales surtax be held at a general election, which is defined in s. 97.021, F.S., to mean an election held on the first Tuesday after the first Monday in November in the even-numbered years. Upon adoption of an ordinance or a resolution by a county or school district to hold a local discretionary sales surtax referendum on or after January 1, 2020, the legislation required the county or school district to provide the Florida Legislature's Office of Program Policy Analysis and Government Accountability (OPPAGA) with a copy of the final ordinance or resolution calling for the referendum at least 180 days before the referendum is held. Additionally, the legislation maintained the requirement that OPPAGA select and pay for a certified public accountant to conduct a performance audit of the program associated with the proposed surtax and the requirement that the performance audit be completed and made available on the county or school district website at least 60 days prior to the referendum. OPPAGA is required to procure the certified public accountant to conduct the performance audit within 60 days of receiving the final resolution or ordinance. Furthermore, the legislation declared void any local discretionary sales surtax referendum if the county or school district failed to provide notice to OPPAGA or failed to publish the results of the performance audit on its website at least 60 days before the referendum was held.

Chapter 2023-157, L.O.F. (HB 7063), required a referendum to reenact a local discretionary sales surtax to be held at a general election as defined in s. 97.021, F.S. A referendum to reenact an expiring surtax must be held at a general election occurring within the 48-month period immediately preceding the effective date of the reenacted surtax. Such a referendum may appear on the ballot only once within the 48-month period.

IMPOSITION AND RATE:
Eligible county governments may levy this surtax at a rate not to exceed 0.5 percent pursuant to an ordinance conditioned to take effect upon approval by a majority vote of electors in a countywide referendum. A county may not impose the surtax unless the underfunded defined benefit retirement plan or system is below 80 percent of actuarial funding at the time the ordinance or referendum is passed. The most recent actuarial report submitted to the Department of Management Services (DMS) pursuant to s. 112.63, F.S., must be used to establish the level of actuarial funding for purposes of determining eligibility to impose the surtax.

The county's governing body may only impose the surtax if the following five prerequisites are satisfied. First, an employee, including a police officer or firefighter, who enters employment on or after the date when the local government certifies that the defined benefit retirement plan or system formerly available to such an employee has been closed may not enroll in a defined benefit retirement plan or system that will receive surtax proceeds. Second, the local government and the collective bargaining representative for the members of the underfunded defined benefit retirement plan or system or, if there is no representative, a majority of the members of the plan or system, mutually consent to requiring each member to make an employee retirement contribution of at least 10 percent of each member's salary for each pay period beginning with the first pay period after the plan or system is closed. Third, the pension board of trustees for the underfunded defined benefit retirement plan or system, if such board exists, is prohibited from participating in the collective bargaining process and engaging in the determination of pension benefits. Fourth, the county currently levies a Local Government Infrastructure Surtax pursuant to s. 212.055(2), F.S., which is scheduled to terminate and is not subject to renewal. Fifth, the Pension Liability Surtax does not take effect until the Local Government Infrastructure Surtax is terminated.

The surtax can only be imposed by a county that currently levies a Local Government Infrastructure Surtax, which is scheduled to terminate and not subject to renewal. The county must then terminate the Local Government Infrastructure Surtax as a prerequisite to imposition of the Pension Liability Surtax. There are 27 counties levying a Local Government Infrastructure Surtax that are potentially eligible to levy the Pension Liability Surtax, assuming the other prerequisites are satisfied. During the 2025 calendar year, no county will be levying this surtax.

This surtax is one of several surtaxes subject to a combined rate limitation. A county eligible to levy this surtax cannot levy it along with the Local Government Infrastructure Surtax, Small County Surtax, Indigent Care and Trauma Center Surtax, and County Public Hospital Surtax in excess of a combined rate of 1 percent.

DISPOSITION AND USES:
The surtax proceeds, less an administrative fee that may be retained by the Department of Revenue (DOR), are distributed back to the local government that generated the proceeds.

The surtax proceeds are to be used in the following manner. If the surtax proceeds have been actuarially recognized as provided in s. 112.64(6), F.S., the local government must distribute the proceeds to an eligible defined benefit retirement plan or system, not including the Florida Retirement System. However, if the surtax proceeds have not been actuarially recognized, the local government is authorized to distribute the proceeds to an eligible defined benefit retirement plan or system, not including the Florida Retirement System, to pledge the surtax proceeds to repay debts incurred for the purpose of making advanced payments toward the unfunded liability of an underfunded defined benefit retirement plan or system and to reimburse itself from the surtax proceeds for any borrowing costs associated with such debts.

ADDITIONAL INFORMATION:
A more detailed description of this surtax in its present form as well as estimated revenue distributions to county and municipal governments can be found in the Office of Economic and Demographic Research's annual report *Local Government Financial Information Handbook* via the following link:

# SCHOOL CAPITAL OUTLAY SURTAX

FLORIDA STATUTES: Section 212.055(6)

ADMINISTERED BY: Department of Revenue

SUMMARY:
Florida's school districts may authorize the levy of the School Capital Outlay Surtax at a rate of up to 0.5 percent pursuant to a resolution conditioned to take effect only upon voter approval in a countywide referendum. The proceeds must be expended for school-related capital projects, technology implementation, and bond financing of such projects. Thirty-one of 67 counties will be levying this surtax during the 2025 calendar year.

REVENUE:

| Fiscal Year | Total Collections | Annual Change % |
|---|---|---|
| 2026-27* | 1,240,076,227 | 2.04% |
| 2025-26* | 1,215,303,745 | -0.21% |
| 2024-25 | 1,217,920,578 | 0.14% |
| 2023-24 | 1,216,209,487 | -1.52% |
| 2022-23 | 1,235,041,746 | 7.53% |
| 2021-22 | 1,148,513,820 | 34.32% |
| 2020-21 | 855,082,583 | 11.98% |

* Estimate

HISTORY:
Chapter 95-258, L.O.F. (SB 562), created the School Capital Outlay Surtax. It authorized district school boards to levy the surtax, pursuant to resolution conditioned to take effect only upon approval by a majority vote in a countywide referendum, at a rate of up to 0.5 percent. The surtax proceeds were to be expended for school-related capital projects, technology implementation, and bond financing of such projects; however, the proceeds and any accrued interest could not be used for operational expenses. Any school board imposing the surtax was required to implement a freeze on non-capital local school property taxes, at the millage rate imposed in the year prior to surtax implementation, for a period of at least three years from the imposition date.

Chapter 2005-56, L.O.F. (SB 388), provided that a required freeze on certain taxes does not apply to taxes authorized in the General Appropriations Act.

Chapter 2010-154, L.O.F. (HB 5101), deleted the requirement that a district school board imposing the school capital outlay surtax implement a freeze on non-capital local school property taxes. Chapter 2019-64, L.O.F. (CS/CS/HB 5), amended s. 212.055, F.S., to require, effective January 1, 2020, that any referendum to adopt or amend a local discretionary sales surtax be held at a general election, which is defined in s. 97.021, F.S., to mean an election held on the first Tuesday after the first Monday in November in the even-numbered years. Upon adoption of an ordinance or a resolution by a county or school district to hold a local discretionary sales surtax referendum on or after January 1, 2020, the legislation required the county or school district to provide the Florida Legislature's Office of Program Policy Analysis and Government Accountability (OPPAGA) with a copy of the final ordinance or resolution calling for the referendum at least 180 days before the referendum is held. Additionally, the legislation maintained the requirement that OPPAGA select and pay for a certified public accountant to conduct a performance audit of the program associated with the proposed surtax and the requirement that the performance audit be completed and made available on the county or school district website at least

60 days prior to the referendum. OPPAGA is required to procure the certified public accountant to conduct the performance audit within 60 days of receiving the final resolution or ordinance. Furthermore, the legislation declared void any local discretionary sales surtax referendum if the county or school district failed to provide notice to OPPAGA or failed to publish the results of the performance audit on its website at least 60 days before the referendum was held.

Chapter 2020-10, L.O.F. (CS/HB 7097), required that surtax levies authorized on or after July 1, 2020, must be shared with eligible charter schools based on their proportionate share of the total school district enrollment. Chapter 2022-97, L.O.F. (CS/HB 7071), expanded the authorized uses to include any purchase, lease-purchase, lease, or maintenance of school buses, as defined in s. 1006.25, F.S., which have a life expectancy of 5 years or more. These additional uses may apply to a surtax in effect on the date this act became law only to the extent such use was authorized in the original referendum adopting the surtax or is authorized pursuant to a subsequent resolution conditioned to take effect only upon approval of a majority vote of the county's electors voting in a referendum. Chapter 2023-69, L.O.F. (CS/CS/HB 1259), required that surtax revenues shared with charter schools shall be shared based on their proportionate share of total school district capital outlay full-time equivalent enrollment as adopted by the education estimating conference established in s. 216.136, F.S., and expended by the charter school in a manner consistent with the allowable uses set forth in s. 1013.62(4), F.S. Chapter 2023-157, L.O.F (HB 7063), required a referendum to reenact a local discretionary sales surtax to be held at a general election as defined in s. 97.021, F.S. A referendum to reenact an expiring surtax must be held at a general election occurring within the 48-month period immediately preceding the effective date of the reenacted surtax. Such a referendum may appear on the ballot only once within the 48-month period.

IMPOSITION AND RATE:
District school boards may levy, pursuant to a resolution conditioned to take effect only upon voter approval in a countywide referendum, this surtax at a rate of up to 0.5 percent. The resolution shall set forth a plan for use of the surtax proceeds in accordance with authorized uses.

All 67 counties are eligible to levy this surtax, and thirty-one counties will be levying at the 0.5 percent rate. In addition to the Charter County and Regional Transportation System Surtax and Emergency Fire Rescue Services and Facilities Surtax, this surtax is not subject to a combined rate limitation that impacts the other discretionary sales surtaxes.

DISPOSITION AND USES:
The surtax revenues collected by the Department of Revenue shall be distributed to the school board imposing the surtax. The surtax proceeds shall be used to fund fixed capital expenditures or fixed capital costs associated with the construction, reconstruction, or improvement of school facilities and campuses which have a useful life expectancy of five or more years, as well as any related land acquisition, land improvement, design and engineering costs. Additionally, the proceeds shall be used to fund the costs of retrofitting and providing for technology implementation, including hardware and software, for the various sites within the school district. The proceeds may be used for the purpose of servicing bonded indebtedness used to finance authorized projects, and any accrued interest may be held in trust to finance such projects. However, the surtax proceeds and any accrued interest shall not be used for operational expenses.

Surtax revenues shared with charter schools shall be shared based on their proportionate share of total school district capital outlay full-time equivalent enrollment as adopted by the education estimating conference established in s. 216.136, F.S., and expended by the charter school in a manner consistent with the allowable uses set forth in s. 1013.62(4), F.S. All revenues and expenditures must be accounted for in a charter school's monthly or quarterly financial statement pursuant to s. 1002.33(9), F.S. The charter school's eligibility to receive surtax funds shall be determined in accordance with s. 1013.62(1), F.S. If a

school's charter is not renewed or is terminated and the school is dissolved under the provisions of law under which it was organized, any unencumbered surtax funds revert to the sponsor.

ADDITIONAL INFORMATION:
A more detailed description of this surtax in its present form as well as estimated revenue distributions to county and municipal governments can be found in the Office of Economic and Demographic Research's annual report *Local Government Financial Information Handbook* via the following link:

# 2025 Federal, State, and County Tax Rates on Motor Fuel and Diesel Fuel in Florida's Counties

| | Motor Fuel Tax Rates (# of Cents Per Gallon) | | | | | | | | | | Unutilized County-Imposed Motor Fuel Taxes | | | | Diesel Fuel Tax Rates (# of Cents Per Gallon) | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | Federal | State | | | | | County (Local Option) | | | | | | | | Federal | State | | | County (Local Option) | | | |
| County | Fuel Excise Tax | Fuel Sales Tax | SCETS Tax | Constit. Fuel Tax | County Fuel Tax | Municipal Fuel Tax | Ninth-cent Fuel Tax | 1-6 Cents Fuel Tax | 1-5 Cents Fuel Tax | **Total Tax** | Ninth-cent Fuel Tax | 1-6 Cents Fuel Tax | 1-5 Cents Fuel Tax | **Total Unutilized Tax** | Fuel Excise Tax | Fuel Sales Tax | SCETS Tax | Fuel Excise Tax | Ninth-cent Fuel Tax | 1-6 Cents Fuel Tax | 1-5 Cents Fuel Tax | **Total Tax** |

Notes:

1) Federal taxes on motor and diesel fuels are authorized pursuant to Title 26, United States Code.

2) State taxes on motor fuel consist of the Fuel Sales Tax, pursuant to s. 206.41(1)(g), F.S.; the State Comprehensive Enhanced Transportation System (SCETS) Tax, pursuant to s. 206.41(1)(f), F.S.; the Constitutional Fuel Tax, pursuant to s. 206.41(1)(a), F.S.; the County Fuel Tax, pursuant to s. 206.41(1)(b), F.S.; and the Municipal Fuel Tax, pursuant to s. 206.41(1)(c), F.S. The Municipal Fuel Tax is one of the revenue sources that fund the Municipal Revenue Sharing Program. This table excludes the state inspection fee of $0.00125 per gallon imposed on motor fuel.

3) County local option taxes on motor fuel consist of the 1 cent Ninth-cent Fuel Tax, pursuant to s. 206.41(1)(d), F.S.; the 1 to 6 cents of Local Option Fuel Tax and the 1 to 5 cents of Local Option Fuel Tax, pursuant to s. 206.41(1)(e), F.S.

4) State taxes on diesel fuel consist of the Fuel Sales Tax, pursuant to s. 206.87(1)(e), F.S.; the State Comprehensive Enhanced Transportation System (SCETS) Tax, pursuant to s. 206.87(1)(d), F.S.; and the Fuel Excise Tax, pursuant to s. 206.41(1)(a), F.S.

5) County taxes on diesel fuel for local use consist of the 1 cent Ninth-cent Fuel Tax, pursuant to s. 206.87(1)(b), F.S.; and 1 to 6 cents of Local Option Fuel Tax, pursuant to s. 206.87(1)(c), F.S. The 1 to 5 cents Local Option Fuel Tax is not authorized for levy on diesel fuel.

6) County local option tax rate changes for 2025: Jackson County will levy the 1-5 Cents Fuel Tax at the maximum rate of 5 cents.

7) For a list of transportation funding sources, please refer to the Florida Department of Transportation's "Florida's Transportation Tax Sources: A Primer".

# NINTH-CENT FUEL TAX

FLORIDA STATUTES: Sections 206.41(1)(d), 206.87(1)(b), and 336.021

ADMINISTERED BY: Department of Revenue

SUMMARY:
The Ninth-Cent Fuel Tax is a local option tax of 1 cent on every net gallon of motor and diesel fuel sold within a county. The tax may be authorized by an ordinance adopted by an extraordinary vote of the governing body or voter approval in a countywide referendum. Generally, the tax proceeds may be used to fund transportation expenditures. Since January 1, 1994, the tax has been imposed on diesel fuel in every county as the result of statewide equalization. All counties are eligible to levy this tax on motor fuel, and 55 counties will be levying the tax during the 2025 calendar year.

REVENUE:

| Fiscal Year | Total Collections | Annual Change % |
|---|---|---|
| 2026-27* | 104,986,742 | 0.45% |
| 2025-26* | 104,516,418 | 0.73% |
| 2024-25 | 103,758,977 | 0.73% |
| 2023-24 | 103,007,026 | -0.19% |
| 2022-23 | 103,199,531 | 4.54% |
| 2021-22 | 98,713,547 | 9.14% |
| 2020-21 | 90,445,219 | -0.24% |

* Estimate

Annual tax receipts by county can be found on the Office of Economic and Demographic Research's (EDR) Local Government Data webpage under the heading of Local Option Tax Receipts via the following link:
http://edr.state.fl.us/Content/local-government/data/data-a-to-z/g-l.cfm

HISTORY:
Chapter 72-384, L.O.F., authorized county governments to levy a 1 cent per gallon tax on motor and special fuels subject to referendum approval. Chapter 77-390, L.O.F., allowed the county's governing body to limit the number of years that tax would be in effect and expanded the authorized uses of the tax proceeds.

Chapter 80-397, L.O.F., authorized the county and municipalities within the county's boundaries to negotiate a joint agreement for the purpose of allowing the tax proceeds to be used in both the incorporated and unincorporated areas of the county. Chapter 83-3, L.O.F., designated the name of this tax as the voted gas tax. Chapter 83-137, L.O.F., required official notification of the ordinance proposing the tax levy to be sent to the Department within 10 days after approval by the county's governing body and also 10 days after voter approval by referendum. Chapter 85-342, L.O.F., established a dealer collection allowance of three percent of the first $1,000 of tax due and one percent of any remaining tax due. Chapter 87-99, L.O.F., specified the tax's effective date as 60 days after passage of the referendum.

Chapter 90-351, L.O.F. (SB 2984), required all counties to impose this tax on special fuel by January 1, 1994 (i.e., statewide equalization). Chapter 92-184, L.O.F. (HB 833), changed the system of motor fuel tax collections by requiring motor fuel taxpayers to report fuel purchases based on the net amount of fuel pumped from the loading rack rather than on the gross amount of fuel. Chapter 92-309, L.O.F. (HB 193-H), changed the name of this tax from voted gas tax to ninth-cent gas tax and authorized counties having a

total population of 50,000 or less on April 1, 1992, to levy the tax by an extraordinary vote of the governing body. If enacted by this method, the tax proceeds could not be used to service bonded indebtedness. Chapter 93-206, L.O.F. (HB 2315), authorized any county to impose the tax by an extraordinary vote of the governing body, in addition to the existing method of voter approval in a countywide referendum. In addition, counties with a total population of 50,000 or less were no longer precluded from using these funds for bonding purposes. Chapter 94-146, L.O.F. (HB 1317), authorized the Department to deduct administrative costs from the tax proceeds and limited the deduction to 2 percent of total collections. The deduction would be phased-in over several fiscal years. Administrative costs would be prorated among the levying counties according to a formula based on each county's proportional share of active taxpayer accounts (weighted by two-thirds) and collections (weighted by one-third), and the formula would be revised on July 1st of each year. Chapter 95-417, L.O.F. (HB 1639), constituted a major rewrite of the state statutes dealing with state and local fuel tax implementation and administration in order to adopt fuel taxing procedures used by the federal government with the goals of reducing tax evasion and fraud and increasing administrative efficiency. References to gas tax and special fuel were changed to fuel tax and diesel fuel, respectively. The point of tax collection on diesel fuel was moved to the terminal rack. The point of tax collection of all local option and SCETS taxes on motor fuel was moved from collection by retailers to collection by wholesalers or terminal suppliers on deliveries to retail service stations and end users. The effective date for all local option fuel tax levies was changed from September 1st to January 1st of the following year. Chapter 95-428, L.O.F. ( HB 2553), authorized any county having a total population of 10,000 or less on April 1, 1993, to transfer and use legally restricted fuel tax (including all local option fuel taxes) for unrestricted purposes for all fiscal years prior to and through 1994-95. Chapter 96-323, L.O.F. (SB 330), changed the procedure for the distribution of local option taxes collected on sales and use of diesel fuel. Chapter 97-54, L.O.F. (HB 81), provided a technical change to allow counties to correct expiration problems with local option fuel tax levies. Additionally, it authorized county and municipal governments to use the Ninth-Cent Fuel Tax proceeds to transportation expenditures as defined in s. 336.025(7), F.S., in order to allow the authorized uses for this tax and the 1-6 Cents Local Option Fuel Tax to be identical.

Chapter 2002-218, L.O.F. (SB 426), revised time limitations on impositions and rate changes for all local option fuel taxes. All impositions and rate changes were to be levied before July 1st of each year to be effective January 1st of the following year. All tax impositions and rescissions were required to end on December 31st of a year, and any rescission required a minimum 60 days' notice to the Department. Chapter 2003-254, L.O.F. (SB 1176), revised certain dates for purposes of qualifying new retail stations with respect to diesel fuel and required local option fuel taxes on motor fuel reported by wholesalers to be included in the distribution process. Additionally, it expanded the definition of transportation expenditures to include expenditures for sidewalks.

Chapter 2010-138, L.O.F. (HB 7157), authorized the Department to make distributions of the Ninth-Cent Fuel Tax collected on diesel fuel that more accurately reflect the current fuel market. Chapter 2012-174, L.O.F. (HB 599), revised time limitations on impositions and rate changes for all local option fuel taxes. All impositions and rate changes were to be levied before October 1st of each year to be effective January 1st of the following year. Additionally, the legislation incorporated the installation, operation, maintenance, and repair of street lighting, traffic signs, traffic engineering, signalization, and pavement markings as permitted uses of the tax proceeds.

Chapter 2022-214, L.O.F., (CS/CS/HB 777) required a referendum authorizing the levy of the tax to be held at a general election, as defined in s. 97.021, F.S. Chapter 2023-157, L.O.F (HB 7063), required a referendum to adopt, amend, or reenact the tax to be held at a general election as defined in s. 97.021, F.S. A referendum to reenact an expiring tax must be held at a general election occurring within the 48-month period immediately preceding the effective date of the reenacted tax. Such a referendum may appear on the ballot only once within the 48-month period.

# NINTH-CENT FUEL TAX

IMPOSITION AND RATE:
Any county government may levy a 1 cent per gallon tax on motor and diesel fuels sold in the county by extraordinary vote of the county's governing body or voter approval in a countywide referendum. Since January 1, 1994, this tax has been imposed on diesel fuel in every county as the result of statewide equalization. During the 2025 calendar year, 55 counties will be levying the tax on motor fuel.

All impositions of the tax shall be levied before October 1st to be effective January 1st of the following year. However, levies of the tax which were in effect on July 1, 2002, and which expire on August 31st of any year may be reimposed at the current authorized rate to be effective September 1st of the year of expiration. A decision to rescind the tax shall not take effect on any other date than December 31st and shall require a minimum of 60 days' notice to the Department of Revenue of such decision.

A referendum to adopt, amend, or reenact the tax must be held at a general election as defined in s. 97.021, F.S. A referendum to reenact an expiring tax must be held at a general election occurring within the 48-month period immediately preceding the effective date of the reenacted tax. Such a referendum may appear on the ballot only once within the 48-month period.

DISPOSITION AND USES:
The Department of Revenue returns the proceeds to the county where the tax is levied. The county's governing body may provide by joint agreement with one or more of its respective municipalities for the authorized transportation purposes and the distribution of tax proceeds within both the incorporated and unincorporated areas of the county. However, the county is not required to share the tax proceeds with municipalities. Even if the county does not levy the tax on motor fuel, it still receives proceeds from the levy on diesel fuel. County and municipal governments may use the tax proceeds for transportation expenditures as defined in s. 336.025(7), F.S.

OTHER STATES:
According to the American Petroleum Institute (API), a number of states have local option fuel taxes. A listing of those states can be found in the API's report entitled *State Gasoline Tax Reports* via the following link:
http://www.api.org/oil-and-natural-gas/consumer-information/motor-fuel-taxes

ADDITIONAL INFORMATION:
Annual tax distributions by county can be found on the EDR's Local Government Data webpage under the heading of Local Option Fuel Taxes via the following link:
http://edr.state.fl.us/Content/local-government/data/data-a-to-z/g-l.cfm

A more detailed description of this tax in its present form as well as estimated revenue distributions to county and municipal governments can be found in the Office of Economic and Demographic Research's annual report *Local Government Financial Information Handbook* via the following link:
http://edr.state.fl.us/Content/local-government/reports/index.cfm

# 1 TO 6 CENTS LOCAL OPTION FUEL TAX

FLORIDA STATUTES: Sections 206.41(1)(e), 206.87(1)(c), and 336.025(1)(a)

ADMINISTERED BY: Department of Revenue

SUMMARY:
Local governments are authorized to levy a tax of 1 to 6 cents on every net gallon of motor fuel sold in a county. The tax is imposed on diesel fuel in each county at the maximum rate of 6 cents per gallon. The tax on motor fuel may be authorized by an ordinance adopted by a majority vote of the governing body or voter approval in a countywide referendum. Generally, the proceeds may be used to fund transportation expenditures. Since 1993, the tax has been imposed on diesel fuel in every county at the maximum rate of 6 cents per gallon as the result of statewide equalization. All counties are eligible to levy this tax on motor fuel and will be levying the tax during the 2025 calendar year.

REVENUE:

| Fiscal Year | Total Collections | Annual Change % |
|---|---|---|
| 2026-27* | 661,479,701 | 0.45% |
| 2025-26* | 658,516,377 | 0.73% |
| 2024-25 | 653,744,046 | 4.05% |
| 2023-24 | 628,309,099 | -3.04% |
| 2022-23 | 648,034,546 | 1.52% |
| 2021-22 | 638,331,177 | 7.56% |
| 2020-21 | 593,457,875 | -0.51% |

* Estimate

Annual tax receipts by county can be found on the Office of Economic and Demographic Research's Local Government Data webpage under the heading of Local Option Tax Receipts via the following link: http://edr.state.fl.us/Content/local-government/data/data-a-to-z/g-l.cfm

HISTORY:
Chapter 83-3, L.O.F., authorized county governments to levy a local option gas tax of up to 4 cents per gallon on motor and special fuels. Chapter 83-339, L.O.F., increased the General Revenue Service Change on the Local Option Gas Tax Trust Fund from 4 to 6 percent. Chapter 84-369, L.O.F., required a certified copy of the interlocal agreement establishing the distribution of the tax proceeds be sent to the Department. Chapter 85-180, L.O.F., increased the rate at which the tax could be levied by 2 cents. Chapter 85-342, L.O.F., established a dealer collection allowance of three percent of the first $1,000 of tax due and one percent of any remaining tax due. Chapter 86-152, L.O.F., changed the requirements for authorizing the levy of optional gas tax and those regarding interlocal agreements and distribution of tax proceeds. Chapter 86-243, L.O.F., allowed for the entire proceeds to be pledged toward bonds.

Chapters 90-110 and 90-132, L.O.F. (HB 149 and HB 3695), had the combined effect of increasing the General Revenue Service Charge on the Local Option Gas Tax Trust Fund from 6 to 7.3 percent. Chapter 90-351, L.O.F. (SB 2984), equalized the tax rate on special fuel in all counties at 4 cents in 1991, 5 cents in 1992, and 6 cents in 1993. Chapter 92-184, L.O.F. (HB 833), changed the system of motor fuel tax collections by requiring motor fuel taxpayers to report fuel purchases based on the net amount of fuel pumped from the loading rack rather than on the gross amount of fuel. Chapter 92-309, L.O.F. (HB 193-H), authorized counties having a total population of 50,000 or less on April 1, 1992, to use the tax proceeds to fund infrastructure projects if designated projects were consistent with the local government's approved comprehensive plan and all transportation needs as identified in the comprehensive plan had

been met. Chapter 93-164, L.O.F. (SB 1328), authorized local governments to use the tax proceeds to fund the costs of structures used for the storage and maintenance of road equipment. Chapter 93-222, L.O.F. (HB 729), modified the definition of infrastructure to include official emergency responder vehicles, which expanded the uses to which small counties could use the tax proceeds. Chapter 94-146, L.O.F. (HB 1317), authorized the Department to deduct administrative costs from the tax proceeds and limited the deduction to 2 percent of total collections. The deduction would be phased-in over several fiscal years. Administrative costs would be prorated among the levying counties according to a formula based on each county's proportional share of active taxpayer accounts (weighted by two-thirds) and collections (weighted by one-third), and the formula would be revised on July 1st of each year. Chapter 94-237, L.O.F. (SB 2156), provided for biennial review and public hearing requirements by local governments of the distribution method for local option gas tax proceeds specified in interlocal agreements. Chapter 95-257, L.O.F. (SB 510), provided that interlocal agreements that included provision for automatic adjustment of the revenue distribution were not subject to biennial review and public hearing requirements. Chapter 95-343, L.O.F. (HB 1919), authorized any county having a total population of 50,000 or less on April 1, 1992, and subject to a court-ordered refund of special assessments to use the proceeds of up to 4 cents of gas tax to finance the refund. (Note: Legislation provided Madison County with a source of funds to finance a court-ordered refund of $2.2 million in special assessments.)

Chapter 95-417, L.O.F. (HB 1639), constituted a major rewrite of the state statutes dealing with state and local fuel tax implementation and administration in order to adopt fuel taxing procedures used by the federal government with the goals of reducing tax evasion and fraud and increasing administrative efficiency. References to gas tax and special fuel were changed to fuel tax and diesel fuel, respectively. The point of tax collection on diesel fuel was moved to the terminal rack. The point of tax collection of all local option and SCETS taxes on motor fuel was moved from collection by retailers to collection by wholesalers or terminal suppliers on deliveries to retail service stations and end users. The effective date for all local option fuel tax levies was changed from September 1st to January 1st of the following year. Chapter 95-428, L.O.F. (HB 2553), authorized any county having a total population of 10,000 or less on April 1, 1993, to transfer and use legally restricted fuel tax (including all local option fuel taxes) for unrestricted purposes for all fiscal years prior to and through 1994-95. Chapter 96-323, L.O.F. (SB 330), authorized any inland county with a population greater than 500,000 as of July 1, 1996, and an interlocal agreement with one or more municipalities within the county, to utilize the most recent official population estimates for dividing the fuel tax proceeds. (Note: At the time of enactment, Orange County was the only county eligible to use this new authority.) Additionally, it changed the procedure for the distribution of local option taxes collected on sales and use of diesel fuel. Chapter 97-54, L.O.F. (HB 81), provided a technical change to allow counties to correct expiration problems with local option fuel tax levies.

Chapter 2002-20, L.O.F. (HB 261), amended s. 339.12, F.S., to provide that any county with a population greater than 50,000 that levies the full 6 cents of fuel tax for improvements to the state transportation system or local projects directly upgrading the state transportation system within the county's boundaries shall receive preference for receipt of any transportation grant for which the county applies. Chapter 2002-218, L.O.F. (SB 426), revised time limitations on impositions and rate changes for all local option fuel taxes. All impositions and rate changes were to be levied before July 1st of each year to be effective January 1st of the following year. All tax impositions and rescissions were required to end on December 31st of a year, and any rescission required a minimum 60 days notice to the Department. Chapter 2003-86, L.O.F. (HB 1813), expanded the definition of transportation expenditures to include expenditures for sidewalks and authorized municipalities in certain less-populated counties to expend the proceeds for additional uses. Chapter 2003-254, L.O.F. (SB 1176), revised certain dates for purposes of qualifying new retail stations with respect to diesel fuel and required local option fuel taxes on motor fuel reported by wholesalers to be included in the distribution process. Additionally, it expanded the definition of transportation expenditures to include expenditures for sidewalks. Chapter 2007-196, L.O.F. (HB 985),

deleted a provision prohibiting counties and municipalities from issuing bonds more than once each year pledging the tax proceeds.

Chapter 2012-174, L.O.F. (HB 599), revised time limitations on impositions and rate changes for all local option fuel taxes. All impositions and rate changes were to be levied before October 1st of each year to be effective January 1st of the following year. Additionally, the legislation incorporated the installation, operation, maintenance, and repair of street lighting, traffic signs, traffic engineering, signalization, and pavement markings as permitted uses of the tax proceeds.

Chapter 2022-214, L.O.F., (CS/CS/HB 777) required a referendum authorizing the levy of the tax to be held at a general election, as defined in s. 97.021, F.S. Chapter 2023-157, L.O.F (HB 7063), required a referendum to adopt, amend, or reenact the tax to be held at a general election as defined in s. 97.021, F.S. A referendum to reenact an expiring tax must be held at a general election occurring within the 48-month period immediately preceding the effective date of the reenacted tax. Such a referendum may appear on the ballot only once within the 48-month period.

IMPOSITION AND RATE:
Any county government may levy 1 to 6 cents per gallon tax on motor fuel sold in the county by majority vote of the county's governing body or voter approval in a countywide referendum. In lieu of action by the county, municipal governments within the county can adopt uniform resolutions to initiate a countywide referendum. Since 1993, this tax has been imposed on diesel fuel at the rate of 6 cents per gallon in every county as the result of statewide equalization. During the 2025 calendar year, all counties will be levying the tax on motor fuel at the maximum rate of 6 cents per gallon.

All impositions and rate changes shall be levied before October 1st to be effective January 1st of the following year for a period not to exceed 30 years. However, levies of the tax which were in effect on July 1, 2002, and which expire on August 31st of any year may be reimposed at the current authorized rate to be effective September 1st of the year of expiration. A decision to rescind the tax shall not take effect on any other date than December 31st and shall require a minimum of 60 days' notice to the Department of Revenue of such decision.

A referendum to adopt, amend, or reenact the tax must be held at a general election as defined in s. 97.021, F.S. A referendum to reenact an expiring tax must be held at a general election occurring within the 48-month period immediately preceding the effective date of the reenacted tax. Such a referendum may appear on the ballot only once within the 48-month period.

DISPOSITION AND USES:
The Department shall distribute the tax proceeds according to the distribution factors determined at the local level by interlocal agreement between the county and municipalities within the county's boundaries. If no interlocal agreement has been established, then the distribution shall be based on the transportation expenditures of each local government for the immediately preceding 5 fiscal years, as a proportion of the total of such expenditures for the county and all municipalities within the county. These proportions shall be recalculated every 10 years based on the transportation expenditures of the immediately preceding 5 years.

County and municipal governments may use the tax proceeds for transportation expenditures as defined in s. 336.025(7), F.S. Small counties, which are defined as having a total population of 50,000 or less on April 1, 1992, and municipalities within such counties are authorized to use the proceeds to fund infrastructure projects, if such projects are consistent with the local government's approved comprehensive plan. Except as provided for in s. 336.025(7), F.S., such funds shall not be used for the operational expenses of any infrastructure.

OTHER STATES:
According to the American Petroleum Institute (API), a number of states have local option fuel taxes. A listing of those states can be found in the API's report entitled *State Gasoline Tax Reports* via the following link:
http://www.api.org/oil-and-natural-gas/consumer-information/motor-fuel-taxes

ADDITIONAL INFORMATION:
Annual tax distributions by county can be found on the EDR's Local Government Data webpage under the heading of Local Option Fuel Taxes via the following link:
http://edr.state.fl.us/Content/local-government/data/data-a-to-z/g-l.cfm

A more detailed description of this tax in its present form as well as estimated revenue distributions to county and municipal governments can be found in the Office of Economic and Demographic Research's annual report *Local Government Financial Information Handbook* via the following link:

# 1 TO 5 CENTS LOCAL OPTION FUEL TAX

FLORIDA STATUTES: Sections 206.41(1)(e) and 336.025(1(b)

ADMINISTERED BY: Department of Revenue

SUMMARY:
County governments are authorized to levy a tax of 1 to 5 cents upon every net gallon of motor fuel sold within a county. Diesel fuel is not subject to this tax. This tax shall be levied by an ordinance adopted by a majority plus one vote of the county's governing body or voter approval in a countywide referendum. Generally, the tax proceeds may be used for transportation expenditures needed to meet the requirements of the capital improvements element of an adopted local government comprehensive plan. All counties are eligible to levy this tax on motor fuel, and 38 counties will be levying the tax during the 2025 calendar year.

REVENUE:

| Fiscal Year | Total Collections | Annual Change % |
|---|---|---|
| 2026-27* | 306,557,373 | 0.45% |
| 2025-26* | 305,184,045 | 0.73% |
| 2024-25 | 302,972,347 | 0.48% |
| 2023-24 | 301,510,277 | -0.05% |
| 2022-23 | 301,657,086 | 6.57% |
| 2021-22 | 283,049,736 | 21.74% |
| 2020-21 | 232,506,412 | -8.14% |

* Estimate

Annual tax receipts by county can be found on the Office of Economic and Demographic Research's Local Government Data webpage under the heading of Local Option Tax Receipts via the following link: http://edr.state.fl.us/Content/local-government/data/data-a-to-z/g-l.cfm

HISTORY:
Chapter 93-206, L.O.F. (HB 2315), authorized county governments to impose a tax of 1 to 5 cents per gallon of motor fuel sold at the retail level within the county. Chapter 94-146, L.O.F. (HB 1317), authorized the Department to deduct administrative costs from the tax proceeds and limited the deduction to 2 percent of total collections. The deduction would be phased-in over several fiscal years. Administrative costs would be prorated among the levying counties according to a formula based on each county's proportional share of active taxpayer accounts (weighted by two-thirds) and collections (weighted by one-third), and the formula would be revised on July 1st of each year. Chapter 94-237, L.O.F. (SB 2156), provided for biennial review and public hearing requirements by local governments of the distribution method for local option gas tax proceeds specified in interlocal agreements. Chapter 95-257, L.O.F. (SB 510), provided that interlocal agreements that included provision for automatic adjustment of the revenue distribution were not subject to biennial review and public hearing requirements. Chapter 95-417, L.O.F. (HB 1639), constituted a major rewrite of the state statutes dealing with state and local fuel tax implementation and administration in order to adopt fuel taxing procedures used by the federal government with the goals of reducing tax evasion and fraud and increasing administrative efficiency. References to gas tax and special fuel were changed to fuel tax and diesel fuel, respectively. The point of tax collection on diesel fuel was moved to the terminal rack. The point of tax collection of all local option and SCETS taxes on motor fuel was moved from collection by retailers to collection by wholesalers or terminal suppliers on deliveries to retail service stations and end users. The effective date for all local option fuel tax levies was changed from September 1st to January 1st of the

following year. Chapter 95-428, L.O.F. (HB 2553), authorized any county having a total population of 10,000 or less on April 1, 1993, to transfer and use legally restricted fuel tax (including all local option fuel taxes) for unrestricted purposes for all fiscal years prior to and through 1994-95. Chapter 96-323, L.O.F. (SB 330), changed the procedure for the distribution of local option taxes collected on sales and use of diesel fuel. Chapter 97-54, L.O.F. (HB 81), provided a technical change to allow counties to correct expiration problems with local option fuel tax levies. Additionally, it authorized county and municipal governments to include additional projects, such as the construction of new roads and reconstruction or resurfacing of existing paved roads, in the capital improvements element of an adopted comprehensive plan thereby expanding the authorized uses on the tax proceeds.

Chapter 2000-266, L.O.F. (SB 772), authorized the tax proceeds to be used for the paving of existing graded roads when undertaken in part to relieve or mitigate existing or potential adverse environmental impacts. Chapter 2001-201, L.O.F. (HB 1225), provided that the relief or mitigation of existing or potential adverse environmental impacts was no longer a condition for using tax proceeds to pave existing graded roads. Chapter 2002-218, L.O.F. (SB 426), revised time limitations on impositions and rate changes for all local option fuel taxes. All impositions and rate changes were to be levied before July 1st of each year to be effective January 1st of the following year. All tax impositions and rescissions were required to end on December 31st of a year, and any rescission required a minimum 60 days notice to the Department. Chapters 2003-86 and 2003-254, L.O.F. (HB 1813 and SB 1176), expanded the authorized uses to include expenditures needed to meet immediate local transportation problems and for other transportation-related expenditures critical for building comprehensive roadway networks. Chapter 2007-196, L.O.F. (HB 985), deleted a provision prohibiting counties and municipalities from issuing bonds more than once each year pledging the tax proceeds.

Chapter 2012-174, L.O.F. (HB 599), revised time limitations on impositions and rate changes for all local option fuel taxes. All impositions and rate changes were to be levied before October 1st of each year to be effective January 1st of the following year. Additionally, the legislation incorporated the installation, operation, maintenance, and repair of street lighting, traffic signs, traffic engineering, signalization, and pavement markings as permitted uses of the tax proceeds.

Chapter 2022-214, L.O.F., (CS/CS/HB 777) required a referendum authorizing the levy of the tax to be held at a general election, as defined in s. 97.021, F.S. Chapter 2023-157, L.O.F (HB 7063), required a referendum to adopt, amend, or reenact the tax to be held at a general election as defined in s. 97.021, F.S. A referendum to reenact an expiring tax must be held at a general election occurring within the 48-month period immediately preceding the effective date of the reenacted tax. Such a referendum may appear on the ballot only once within the 48-month period.

IMPOSITION AND RATE:
Any county government may levy 1 to 5 cents per gallon tax on motor fuel sold in the county by majority plus one vote of the county's governing body or voter approval in a countywide referendum. Diesel fuel is not subject to this tax. During the 2025 calendar year, 34 counties will be levying the tax on motor fuel at the maximum rate of 5 cents per gallon, 1 county will be levying at 4 cents, 2 counties will be levying at 3 cents, and 1 county will be levying at 2 cents.

All impositions and rate changes shall be levied before October 1st to be effective January 1st of the following year for a period not to exceed 30 years. However, levies of the tax which were in effect on July 1, 2002, and which expire on August 31st of any year may be reimposed at the current authorized rate to be effective September 1st of the year of expiration. A decision to rescind the tax shall not take effect on any other date than December 31st and shall require a minimum of 60 days' notice to the Department of Revenue of such decision.

A referendum to adopt, amend, or reenact the tax must be held at a general election as defined in s. 97.021, F.S. A referendum to reenact an expiring tax must be held at a general election occurring within the 48-month period immediately preceding the effective date of the reenacted tax. Such a referendum may appear on the ballot only once within the 48-month period.

DISPOSITION AND USES:
The tax proceeds shall be distributed by the Department according to the distribution factors determined at the local level by interlocal agreement between the county and municipalities within the county's boundaries. If no interlocal agreement is established, then the distribution shall be based on the transportation expenditures of each local government for the immediately preceding five fiscal years as a proportion of the total of such expenditures for the county and all municipalities within the county.

The tax proceeds shall be used for transportation expenditures needed to meet the requirements of the capital improvements element of an adopted comprehensive plan or for expenditures needed to meet immediate local transportation problems and for other transportation-related expenditures that are critical for building comprehensive roadway networks by local governments. Expenditures for the construction of new roads, the reconstruction or resurfacing of existing paved roads, or the paving of existing graded roads shall be deemed to increase capacity and such projects shall be included in the capital improvements element of an adopted comprehensive plan. Routine maintenance of roads is not considered an authorized expenditure.

OTHER STATES:
According to the American Petroleum Institute (API), a number of states have local option fuel taxes. A listing of those states can be found in the API's report entitled *State Gasoline Tax Reports* via the following link:

# LOCAL OPTION FOOD AND BEVERAGE TAXES

# LOCAL OPTION FOOD AND BEVERAGE TAX

FLORIDA STATUTES: Section 212.0306(1)(b)

ADMINISTERED BY: Self-administered by Miami-Dade County

SUMMARY:
Any county, as defined in s. 125.011(1), F.S., [i.e., Miami-Dade County] may impose a 1 percent tax on the sale of food, beverages, and alcoholic beverages in establishments that are licensed by the state to sell alcoholic beverages for consumption on the premises, except for hotels and motels. Not less than 15 percent of the tax proceeds shall be used for construction and operation of domestic violence centers. The remainder shall be used for programs to assist the homeless or those about to become homeless. Miami-Dade County levies this tax.

REVENUE:
Because the tax is self-administered, the following revenue figures were obtained from current and prior years' county budget documents.

| Fiscal Year | Total Collections | Annual Change % |
|---|---|---|
| 2025-26* | 47,400,000 | -2.6% |
| 2024-25* | 48,677,000 | 10.4% |
| 2023-24 | 44,091,000 | 3.4% |
| 2022-23 | 42,636,472 | 6.4% |
| 2021-22 | 40,089,598 | 35.7% |
| 2020-21 | 29,536,394 | 35.7% |
| 2019-20 | 21,761,086 | -25.9% |

* Estimate

HISTORY:
Chapter 93-233, L.O.F. (HB 557), authorized any county, as defined in s. 125.011(1), F.S., to impose a 1 percent tax on food, beverages, and alcoholic beverages sold in county establishments, except hotels and motels, having a state-issued alcoholic beverage license for on-premises consumption. For the first 12 months of levy, the proceeds were to be used for programs to assist the homeless. Thereafter, a portion of the proceeds were to be made available for construction and operation of domestic violence centers with the remainder used for programs to assist the homeless or those about to become homeless. The county was required to self-administer the tax, and the tax was scheduled for repeal on October 1, 2008. Chapters 94-351 and 94-353, L.O.F. (HB 2509 and HB 2557), clarified that the tax was not to be applied to alcoholic beverages sold by the package for off-premises consumption. It revised an exemption related to establishments with gross annual revenues of $400,000 or less and eliminated an exemption for sales in fraternal clubs licensed under s. 565.02(4), F.S. Additionally, it removed the October 1, 2008 repeal date.

Chapter 2023-157, L.O.F. (HB 7063), authorized the imposition of this 1 percent tax in a city or town that levies the Municipal Resort Tax (i.e., Bal Harbour, Surfside, and Miami Beach) if the levy is approved by referendum in the city or town at a general election as defined in s. 97.021, F.S. Any tax levied by such city or town takes effect on the first day of January following the general election in which the ordinance was approved. A referendum to reenact an expiring tax must be held at a general election occurring within the 48-month period immediately preceding the effective date of the reenacted tax, and the referendum may appear on the ballot only once within the 48-month period. Chapter 2024-158, L.O.F. (CS/HB 7073) clarified that in a referendum to adopt this 1 percent tax in a municipality that levies the Municipal Resort

Tax, the ordinance must pass by a majority vote of the voters voting in the election, rather than by a majority of the registered voters.

IMPOSITION AND RATE:
Any county, as defined in s. 125.011(1), F.S., [i.e., Miami-Dade County] may impose a 1 percent tax on the sale of food, beverages, and alcoholic beverages in establishments that are licensed by the state to sell alcoholic beverages for consumption on the premises, except for hotels and motels, pursuant to an ordinance adopted by a majority vote of the county's governing body. However, the tax does not apply to any alcoholic beverage sold by the package for off-premise consumption. Miami-Dade County is the only county that satisfies the statutory definition of s. 125.011(1), F.S., and therefore eligible to levy the tax.

This 1 percent tax may be imposed in a city or town that levies the Municipal Resort Tax (i.e., Bal Harbour, Surfside, and Miami Beach) if the levy is approved by referendum in the city or town at a general election as defined in s. 97.021, F.S. Any tax levied by such city or town takes effect on the first day of January following the general election in which the ordinance was approved. A referendum to reenact an expiring tax must be held at a general election occurring within the 48-month period immediately preceding the effective date of the reenacted tax, and the referendum may appear on the ballot only once within the 48-month period.

DISPOSITION AND USES:
The county must locally administer the tax using the powers and duties enumerated for local administration of the tourist development tax. The tax proceeds shall be distributed by the county by the county pursuant to the guidelines provided in the approved plans for addressing homeless needs as well as the construction and operation of domestic violence centers. The county and its respective municipalities shall continue to contribute each year at least 85 percent of aggregate expenditures from the respective county or municipal general fund budget for county-operated or municipally-operated homeless shelter services at or above the average level of such expenditures in the two fiscal years preceding the levy date of this tax.

For the first 12 months of the levy, the proceeds shall be used by the county to assist persons who have become or are about to become homeless. These funds shall be made available for emergency homeless shelters, food, clothing, medical care, counseling, alcohol and drug abuse treatment, mental health treatment, employment and training, education, and housing. Thereafter, not less than 15 percent of the proceeds shall be made available for construction and operation of domestic violence centers. The remainder shall be used for programs to assist the homeless or those about to become homeless. In addition, the proceeds and accrued interest may be used as collateral, pledged, or hypothecated for authorized projects, including bonds issued in connection with such authorized projects.

OTHER STATES:
Counties and/or municipalities in other states have established food and beverage taxes that are consumed on the premises including hotels and motels.

ADDITIONAL INFORMATION:
A more detailed description of this tax in its present form can be found in the Office of Economic and Demographic Research's annual report *Local Government Financial Information Handbook* via the following link: http://edr.state.fl.us/Content/local-government/reports/index.cfm

FLORIDA STATUTES: Section 212.0306(1)(a)

ADMINISTERED BY: Self-administered by Miami-Dade County

SUMMARY:
Any county, as defined in s. 125.011(1), F.S., [i.e., Miami-Dade County] may impose a 2 percent tax on the sale of food, beverages, and alcoholic beverages in hotels and motels, pursuant to an ordinance adopted by a majority of the county's governing body. The proceeds shall be used for promoting the county and its constituent municipalities as a destination site for conventions, trade shows, and pleasure travel. Miami-Dade County levies this tax.

REVENUE:
Because the tax is self-administered, the following revenue figures were obtained from current and prior years' county budget documents.

| Fiscal Year | Total Collections | Annual Change % |
|---|---|---|
| 2025-26* | 10,938,000 | -4.1% |
| 2024-25* | 11,400,000 | 2.8% |
| 2023-24 | 11,088,000 | 0.9% |
| 2022-23 | 10,993,916 | 17.1% |
| 2021-22 | 9,387,008 | 83.2% |
| 2020-21 | 5,124,141 | -7.3% |
| 2019-20 | 5,529,196 | -34.5% |

* Estimate

HISTORY:
Chapter 89-362, L.O.F., authorized any county, as defined in s. 125.011(1), F.S., to impose a 2 percent tax on the sale of food, beverages, or alcoholic beverages in hotels and motels for use in promoting the county and its constituent municipalities as destinations for conventions, trade shows, and pleasure travel. Chapter 93-233, L.O.F. (HB 557), amended and renumbered s. 125.0104(3)(n), F.S., as s. 212.0306, F.S., authorizing the continued levy of this tax and requiring the county to self-administer the tax. The tax was scheduled for repeal on October 1, 2008. Chapters 94-351 and 94-353, L.O.F. (HB 2509 and HB 2557), clarified that the tax was not to be applied to alcoholic beverages sold by the package for off-premises consumption. It revised an exemption related to establishments with gross annual revenues of $400,000 or less and eliminated an exemption for sales in fraternal clubs licensed under s. 565.02(4), F.S. Additionally, it removed the October 1, 2008 repeal date.

IMPOSITION AND RATE:
Any county, as defined in s. 125.011(1), F.S., [i.e., Miami-Dade County] may impose a 2 percent tax on the sale of food, beverages, and alcoholic beverages in hotels and motels, pursuant to an ordinance adopted by a majority vote of the county's governing body. Miami-Dade County is the only county that satisfies the statutory definition of s. 125.011(1), F.S., and therefore eligible to levy the tax.

DISPOSITION AND USES:
The county must locally administer the tax using the powers and duties enumerated for local administration of the tourist development tax. The tax proceeds shall be distributed to a countywide convention and visitors' bureau, which by interlocal agreement and contract with the county has been given primary responsibility for tourist and convention promotion. If the county is not a party to such an

interlocal agreement or contract with a countywide convention and visitors' bureau, the county must spend the proceeds as specified in statute.

The tax proceeds shall be used to promote and advertise tourism in the state, nationally, and internationally; and fund convention bureaus, tourist bureaus, tourist information centers, and new bureaus as county agencies or by contract with the chambers of commerce or similar associations in the county.

OTHER STATES:
Counties and/or municipalities in other states have established food and beverage taxes that are consumed on the premises including hotels and motels.

ADDITIONAL INFORMATION:
A more detailed description of this tax in its present form can be found in the Office of Economic and Demographic Research's annual report *Local Government Financial Information Handbook* via the following link: http://edr.state.fl.us/Content/local-government/reports/index.cfm

# PUBLIC SERVICE TAX

FLORIDA STATUTES: Sections 166.231, 166.232, 166.233, 161.234, and 166.235, F.S.

ADMINISTERED BY: Municipalities and Charter Counties

SUMMARY:
Municipalities and charter counties may levy by ordinance a public service tax on the purchase of electricity, metered natural gas, liquefied petroleum gas either metered or bottled, manufactured gas either metered or bottled, and water service. The tax is levied only upon purchases within the municipality or charter county's unincorporated area and cannot exceed 10 percent of the payments received by the seller of the taxable item. Services competitive with those listed above, as defined by ordinance, can be taxed on a comparable base at the same rates; however, the tax rate on fuel oil cannot exceed 4 cents per gallon. The tax proceeds are considered general revenue for the municipality or charter county.

** Includes natural gas, propane gas, fuel oil, and kerosene.

HISTORY:
On June 11, 1945, Chapter 22829, L.O.F., provided municipalities with the authority to tax public services. This tax, originally levied on electricity, metered or bottled gas, water service, and telephone and telegraph service, was called the municipal utility tax. In 1972, the Florida Supreme Court ruled that the Florida Constitution granted charter counties the authority to levy the municipal service tax. Specifically, the Court determined that charter counties have the "authority to levy any tax not inconsistent with

general or special law as is permitted municipalities." Volusia County v. Dickinson, 269 So.2d 9 (Fla. 1972) and McLeod v. Orange County, 19 Fla L. Weekly 5536 (Oct, 1994). Charter counties may levy the tax only within the respective county's unincorporated area.

In 1985, telecommunications services, rather than telephone services, were made taxable by municipalities. A municipality could tax local telecommunications services alone at up to 10 percent or up to 7 percent on local service plus intrastate long-distance service, which originated or terminated within the municipality and was billed to a person, telephone number or device, or telecommunications number or device within the municipality (s. 166.231(9), F.S.). Authority to levy a tax upon cable TV service was removed effective October 1, 1977, unless the tax was necessary to pay off bonds (s. 166.231(1), F.S.).

In 1978, municipalities were authorized to levy the tax on a physical unit basis, provided that upon conversion the effective tax rate for each type of service was preserved in the first year. Subsequently, rates may be amended by ordinance (s. 166.232, F.S.). In 1993, the municipalities were authorized to exempt metered or bottled gas or fuel oil used for agricultural purposes. In 1996, municipalities were authorized to exempt electricity and gas used directly in manufacturing. In 1997, the Legislature provided an exemption for Internet and similar computer on-line services by removing them from the definition of telecommunications services.

Chapter 2000-260, L.O.F. (SB 1338), rewrote Florida's communications tax laws by replacing the existing taxes imposed on telecommunications and cable television services with a statewide tax and local taxes to be administered by the Department of Revenue. Effective October 1, 2001, s. 166.231(9), F.S., was repealed to be replaced by the local communications services tax under s. 202.19, F.S. The law provided that rates would be set to replace revenue that would have been generated by the public service tax plus other sources of local revenue replaced by the new tax. Chapter 2001-140, L.O.F. (SB 1878), established the revenue-neutral local communications services tax and maximum allowable rates. Local governments adopted their communications services tax rates on July 15, 2001. Chapter 2005-287, L.O.F. (HB 1725), repealed the tax on substitute communications systems and provided that the Department would not assess this tax back to October 1, 2001, when the communications services tax was implemented. The law created a task force of experts in the areas of telecommunications policy, taxation, law, or technology to study implications of emerging technologies on Florida's communications services tax.

BASE AND RATE:
Municipalities and charter counties may levy up to a 10 percent tax on purchases of electricity, metered natural gas, liquefied petroleum gas either metered or bottled, manufactured gas either metered or bottled, and water service. (s. 166.231(1), F.S.)

DISPOSITION:
The tax is collected by the seller of the service from the purchaser at the time of payment for such service and remitted to the municipality or charter county imposing the tax as prescribed by local ordinance.

OTHER STATES:
Information relating to other states that may have authorized local governments to impose a public service tax is not available.

ADDITIONAL INFORMATION:
Taxing authorities are required to furnish information to the Department, including the services taxed, the tax rate applied to each service, and the effective date of the levy or repeal as well as other additional information. The Department maintains an online database, which is available via the following link: http://floridarevenue.com/taxes/governments/Pages/mpst.aspx

# PUBLIC SERVICE TAX

Summaries of prior years' revenues, as reported by municipalities and charter counties in their respective Annual Financial Reports submitted to the Department of Financial Services, have been compiled by the Office of Economic and Demographic Research (EDR) and are available on the EDR's website via the following link: http://edr.state.fl.us/Content/local-government/data/data-a-to-z/m-r.cfm.

| | 2026-27 (millions) |
|---|---|
| VALUE OF RATE CHANGE:<br>Many municipalities and charter counties levy utility taxes of 10 percent. Some jurisdictions that tax less than 10 percent do so on a sliding scale (e.g., 10 percent on the first $25; 5 percent on the next $50; and 2 percent thereafter. Many jurisdictions tax different services at different rates. Each municipality must be examined individually to arrive at an estimate of the value of a tax rate change. However, an overall change of 10 percent in current rates would have the following estimated impact on municipalities and charter counties. | $171.9 |
| Fuel Adjustment Charges (s. 166.231(1)(b), F.S.)<br>All increases in the cost of utility services to the ultimate consumer resulting from an increase in the cost of fuel to the utility, subsequent to October 1, 1973, are exempt from taxation. | $179.0 |
| Fuel Oil (s. 166.231(2), F.S.)<br>Fuel oil shall be taxed at a rate not to exceed 4 cents per gallon. For municipalities levying less than 10 percent on other services, the tax on fuel oil must be reduced proportionately. | $0.4 |
| Government Purchases (s. 166.231(5), F.S.)<br>Purchases by the U.S. Government, the State of Florida, all counties, school districts, and municipalities in the state, and public bodies exempted by law or court order, are exempt from taxation. | Indeterminate |
| Church Purchases (s. 166.231(5), F.S.)<br>Purchases of service by any recognized church in this state, for use exclusively for church purchases, are exempt from taxation. | Indeterminate |
| Enterprise Zones (s. 166.231(8), F.S.)<br>From July 1, 1995 to December 31, 2015, municipalities may exempt not less than 50 percent of the tax imposed on purchasers of electricity located within enterprise zones. However, any qualified business that satisfied the requirements of s. 166.231(8), F.S., prior to December 31, 2015, shall be allowed the full benefit of the exemption as if the expiration had not occurred. | Indeterminate |

| # Eligible to Levy: | 67 | 59 | 67 | 15 | 65 | 1 | 1 | 1 | 1 | | 67 | | 1 | 1 |
| # Levying: | 62 | 56 | 46 | 11 | 37 | 1 | 1 | 1 | 1 | | 62 | | 1 | 1 |

Notes:

1) County names followed by an asterick indicate those counties that self-administer these taxes, and boxed areas indicate those counties eligible to impose a particular tax.

2) Pursuant to s. 125.0104(3)(d), F.S., no county can levy the Additional Tax unless the county has imposed the Original Tax [i.e., s. 125.0104(3)(c), F.S.] for a minimum of three years prior to the effective date of the levy and imposition of the Additional Tax.

3) Pursuant to s. 125.0104(3)(b), F.S., no county authorized to levy a convention development tax pursuant to s. 212.0305, F.S., (i.e., Duval, Miami-Dade, and Volusia) is allowed to levy more than 2% of tourist development taxes. However, pursuant to s. 125.0104(3)(l), F.S., this prohibition does not apply to the levy of the Professional Sports Franchise Facility Tax. In addition, this prohibition does not apply in a county authorized to levy the Consolidated County Convention Development Tax if such county also levies the Additional Professional Sports Franchise Facility Tax, pursuant to s. 125.0104(3)(n), F.S. This exemption is applicable only to Duval County.

4) Pursuant to s. 125.0104(3)(n), F.S., only a county that has levied the Professional Sports Franchise Facility Tax [i.e., s. 125.0104(3)(l), F.S.] is eligible to levy the Additional Professional Sports Franchise Facility Tax. Consequently, the levy of the Professional Sports Franchise Facility Tax must occur prior to the levy of the Additional Professional Sports Franchise Facility Tax.

5) The county-wide tourist development tax rate for Miami-Dade County is 3% except within the municipal jurisdictions of Bal Harbour, Miami Beach, and Surfside, which are eligible to impose the Municipal Resort Tax.

6) The tourist development tax levies in Bay, Nassau, and Walton counties are less than countywide. In Okaloosa County, the rate is 6% within the Tourist Development Tax district, but 5% within the Expansion district.

7) In Santa Rosa County, the countywide tourist development tax rate is 2%. The rate in the special taxing district of Navarre Beach is 3%; however, the funds generated from this levy go to Escambia County pursuant to an agreement adopted when this area was transferred to Santa Rosa County by Escambia County.

8) Pursuant to s. 125.0104(3)(m), F.S., a county is considered to be a high tourism impact county after the Department of Revenue has certified to such county that the sales subject to the tax levied pursuant to this section exceeded $600 million during the previous calendar year or were at least 18% of the county's total taxable sales under Ch. 212, F.S., where the sales subject to the tax levied pursuant to this section were a minimum of $200 million. No county authorized to levy a Convention Development Tax shall be considered a high tourism impact county. Once a county qualifies as a high tourism impact county, it shall retain this designation for the period of the tax levy.

# 1 OR 2 PERCENT
# TOURIST DEVELOPMENT TAX

FLORIDA STATUTES: Section 125.0104(3)(c)

ADMINISTERED BY: Department of Revenue or self-administered by levying counties

SUMMARY:
Section 125.0104, F.S., authorizes the levy of five separate local option taxes on rental charges subject to the transient rentals tax under s. 212.03, F.S., to be used in various ways to promote tourism within the county. Generally, the revenues from these levies may be used for capital construction of tourist-related facilities, tourist promotion, and beach and shoreline maintenance; however, the authorized uses vary according to the particular levy. No tourist development tax may be levied in any municipality imposing the Municipal Resort Tax authorized under Chapter 67-930, L.O.F., (i.e., Miami Beach, Bal Harbour and Surfside). There is a prohibition against any county levying a convention development tax from levying tourist development taxes at a rate of more than 2 percent; however, this prohibition does not apply to a county's levy of the Professional Sports Franchise Facility Tax and Duval County's levy of the Additional Professional Sports Franchise Facility Tax.

The 1 or 2 Percent Tourist Development Tax was the original of the five tourist development taxes authorized under s. 125.0104, F.S. If adopted, the rate must be either 1 or 2 percent. Under certain conditions, the tax may be levied in a sub-county area. The county ordinance levying the tax must be approved by a vote of the electors. Authorized uses are contained in s. 125.0104(5), F.S. Generally, such uses include the capital construction of tourist-related facilities, tourist promotion, and beach and shoreline maintenance, including the funding and refunding of revenue bonds.

REVENUE:

| Fiscal Year | Total Collections | Annual Change % |
|---|---|---|
| 2026-27* | 585,509,725 | 2.20% |
| 2025-26* | 572,905,798 | -0.30% |
| 2024-25 | 574,629,687 | 4.25% |
| 2023-24 | 551,228,601 | 4.82% |
| 2022-23 | 525,896,477 | -9.73% |
| 2021-22 | 582,581,235 | 72.53% |
| 2020-21 | 337,666,440 | 1.87% |

* Estimate

Annual tourist development tax receipts by county can be found on the Office of Economic and Demographic Research's Local Government Data webpage under the heading of Local Option Tax Receipts via the following link.
http://edr.state.fl.us/Content/local-government/data/data-a-to-z/g-l.cfm

HISTORY:
Chapter 77-209, L.O.F., authorized any county subject to voter approval to levy a tourist development tax at the rate of 1 or 2 percent (i.e., the 1 or 2 Percent Tax). The proceeds were to be used to promote tourism, finance tourist-related facilities, or fund tourist promotion bureaus.

Chapter 87-175, L.O.F., gave levying counties the option of collecting and administering the tax at the local level and restricted self-administering counties from retaining more than 3 percent of total collections for administrative costs. Chapter 87-280, L.O.F., authorized counties with a total population of less than 500,000 to use the tax proceeds for museums, zoological parks, fishing piers, or nature centers.

Chapters 92-175 and 92-204, L.O.F. (SB 2178 and HBs 147, 1551, and 1967), authorized any county to use the tax proceeds to fund museums, which was a use previously limited to those counties having a total population of less than 500,000. Additionally, it authorized a county to create a tourism promotion agency to undertake advertising and marketing research studies and provide booking and reservations services and created a joint legislative interim study committee to review current tourist-related tax issues and laws. Chapter 94-353, L.O.F. (HB 2557), clarified legislative intent regarding those transient rental transactions subject to tax. Chapter 95-133, L.O.F. (SB 1082), revised an exemption from public records requirements for county tourism promotion agencies. Chapter 95-360, L.O.F. (HB 485), authorized counties to use the tax proceeds for promotion of zoological parks.

Chapter 2000-312, L.O.F. (HB 509), authorized counties that self-administer the tax to use certified public accountants to perform those functions associated with self-administration. Chapter 2001-252, L.O.F. (SB 1132), authorized certain counties to continue using a tourist development tax after retirement of applicable bonds under certain circumstances. Chapter 2003-34, L.O.F. (SB 1162), increased the population threshold from 500,000 to 750,000 for eligible counties to expend the tax proceeds for optional uses. Chapter 2003-37, L.O.F. (SB 1566), limited the use of tax proceeds, which were specifically designated for beach improvement, maintenance, renourishment, restoration, and erosion control. Chapter 2003-78, L.O.F. (HB 533), made administrative changes pertaining to county tourism promotion agencies. Chapter 2005-96, L.O.F. (SB 300), reenacted provisions related to referenda and local administration that had been scheduled for repeal. Chapter 2009-133, L.O.F. (HB 61), provided for the application of tourist development taxes to short-term stays at timeshare resorts.

Chapter 2012-180, L.O.F. (HB 1015), authorized additional uses by allowing county governments to spend tax proceeds for purposes related to publicly owned and operated aquariums, including acquisition, construction, maintenance, or promotion. Chapter 2013-168, L.O.F. (SB 336), authorized additional uses by allowing county governments to spent tax proceeds for purposes related to aquariums owned and operated by not-for-profit organizations and clarified the automatic expiration of the tax upon the retirement of all bonds issued to finance certain facilities. Chapter 2016-6, L.O.F., (CS/CS/SB 182) reenacted a public records exemption of trade secret information held by a county tourism promotion agency to conform to the definition of trade secret, which expressly includes financial information within the definition. This exemption protected financial information deemed to be a trade secret from public disclosure. Chapter 2016-220, L.O.F., (HB 7099) specified additional uses for tourist development tax revenues for certain coastal counties. The legislation provided that, under specified conditions, a county located adjacent to the Gulf of Mexico or the Atlantic Ocean, except a county that receives revenue from taxes levied pursuant to s. 125.0108, F.S., (i.e., the Tourist Impact Tax levied only by Monroe County) may use up to 10 percent of tourist development tax revenues to reimburse expenses incurred in providing public safety services, including emergency medical services as defined in s. 401.107(3), F.S., and law enforcement services, which are needed to address impacts related to increased tourism and visitors to an area, as long as such funds are not used to supplant pre-existing expenditures on such services. To receive reimbursement, a county must: 1) generate a minimum of $10 million in annual proceeds from any tax, or any combination of taxes, authorized to be levied pursuant to s. 125.0104, F.S.; 2) have at least three municipalities; and 3) have an estimated population of less than 225,000, according to the most recent population estimate prepared pursuant to s. 186.901, F.S., excluding the inmate population. The board of county commissioners must, by majority vote, approve reimbursement upon receipt of a recommendation from the tourist development council. Chapter 2017-36, L.O.F., (HB 7109) expanded the authorized uses of tourist development tax revenues to include the acquisition, construction, extension, enlargement, remodel, repair, improvement, maintenance, operation, or promotion of auditoriums that are publicly owned and open to the public, but operated by an organization that is exempt from federal taxation under 26 U.S.C. s. 501(c)(3) and within the boundaries of the county or subcounty special taxing district in which the tax is levied. Chapter 2018-118, L.O.F., (CS/HB 7087) extended the current authorization to use tourist development tax revenues on such things as restoration and maintenance of beaches, inland

lakes and rivers, to expressly include the same types of expenditures for channels, estuaries, and lagoons as well as the construction of beach groins. Additionally, the legislation allowed counties to use tax revenues in connection with developing or operating public facilities within the boundaries of the county or subcounty special taxing district in which the tax was levied if the public facilities were needed to increase tourist-related business activities in the county or subcounty special district and were recommended by the county tourist development council. Tax revenues may also be used for any related land acquisition, land improvement, design, and engineering costs and all other professional and related costs required to bring the public facilities into service. Finally, tax revenues can only be used for these authorized public facilities if several preconditions were satisfied.

Chapter 2020-10, L.O.F., (CS/HB 7097) increased a population limit from 750,000 to 950,000 for counties that may use certain tourist development tax revenues (i.e., 1 or 2 Percent Tax, Additional 1% Tax, and High Tourism Impact Tax) for certain uses. Chapter 2022-5, L.O.F., (SB 850) deleted statutory language relating to a public records exemption for a trade secret, as defined in s. 812.081, F.S., held by a county tourism promotion agency. The exemption was not reenacted by the Legislature and repealed on October 2, 2021. Chapter 2022-214, L.O.F., (CS/CS/HB 777) required a referendum authorizing the levy of this tax to be held at a general election, as defined in s. 97.021, F.S. Chapter 2023-157, L.O.F. (HB 7063) required a referendum to reenact this tax must be held at a general election occurring within the 48-month period immediately preceding the effective date of the reenacted tax. Such a referendum may appear on the ballot only once within the 48-month period. Additionally, the legislation allowed the continued use of these tax revenues for public safety purposes by certain counties located adjacent to the Gulf of Mexico or the Atlantic Ocean (i.e., Bay, Okaloosa, and Walton) by increasing the population threshold from 225,000 to 275,000. Furthermore, it allowed the use of funds for public safety purposes by fiscally constrained counties that border the Gulf of Mexico or Atlantic Ocean, which expands current eligibility to Dixie, Franklin, Gulf, Levy, Taylor, and Wakulla counties. Chapter 2025-8, L.O.F., (HB 575) updates provisions to reflect the name change from the Gulf of Mexico to the Gulf of America. Chapter 2025-208, L.O.F., (HB 7031) allows coastal fiscally constrained counties to use funds for certain capital improvements. Additionally, it allows all coastal counties to use funds for the provision of beach lifeguards certified by an approved entity.

IMPOSITION AND RATE:
If levied, the rate must be either 1 or 2 percent. The tax is levied on all rental charges subject to the transient rental tax pursuant to s. 212.03, F.S. All counties are eligible to levy this tax, and 62 counties levy at the maximum rate of 2 percent.

DISPOSITION AND USES:
In counties for which the tax is administered by the Department of Revenue, collections are returned monthly to the county levying the tax, less costs of administration, for use by the county in accordance with the provisions of s. 125.0104, F.S. In counties self-administering the tax pursuant to s. 125.0104(10), F.S., collections are retained by the county, less cost of administration not to exceed 3 percent, for use in accordance with the provisions of s. 125.0104, F.S.

OTHER STATES:
The National Conference of State Legislatures has published a listing of state lodging tax rates, which is available via the link below. These statewide taxes on lodging are often levied in addition to state sales taxes and/or local lodging taxes.
https://www.ncsl.org/state-legislatures-news/details/travel-can-be-taxing-in-more-ways-than-one

ADDITIONAL INFORMATION:
A table summarizing the history of tourist tax impositions, expirations, extensions, and repeals can be found on the Office of Economic and Demographic Research's Local Government Data webpage under the heading of Local Option Tourist Taxes via the following link.

# ADDITIONAL 1 PERCENT TOURIST DEVELOPMENT TAX

FLORIDA STATUTES: Section 125.0104(3)(d)

ADMINISTERED BY: Department of Revenue or self-administered by levying counties

SUMMARY:
Section 125.0104, F.S., authorizes the levy of five separate local option taxes on rental charges subject to the transient rentals tax under s. 212.03, F.S., to be used in various ways to promote tourism within the county. Generally, the revenues from these levies may be used for capital construction of tourist-related facilities, tourist promotion, and beach and shoreline maintenance; however, the authorized uses vary according to the particular levy. No tourist development tax may be levied in any municipality imposing the Municipal Resort Tax authorized under Chapter 67-930, L.O.F., (i.e., Miami Beach, Bal Harbour and Surfside). There is a prohibition against any county levying a convention development tax from levying tourist development taxes at a rate of more than 2 percent; however, this prohibition does not apply to a county's levy of the Professional Sports Franchise Facility Tax and Duval County's levy of the Additional Professional Sports Franchise Facility Tax.

The Additional 1 Percent Tourist Development Tax is one of the five tourist development taxes authorized under s. 125.0104, F.S. It may be levied by referendum; however, it may only be levied after the 1 or 2 percent tourist development tax has been levied for a minimum of 3 years. If levied, the tax must be levied at the rate of 1 percent. Uses of the revenue are the same as for the 1 or 2 percent tax, except that revenues cannot be used for certain debt service or refinancing unless approved by referendum.

REVENUE:

| Fiscal Year | Total Collections | Annual Change % |
|---|---|---|
| 2026-27* | 275,814,223 | 2.20% |
| 2025-26* | 269,876,931 | -0.30% |
| 2024-25 | 270,688,998 | 0.10% |
| 2023-24 | 270,418,677 | 9.73% |
| 2022-23 | 246,432,794 | -0.86% |
| 2021-22 | 248,581,710 | 67.21% |
| 2020-21 | 148,660,826 | 6.33% |

Annual tourist development tax receipts by county can be found on the Office of Economic and Demographic Research's Local Government Data webpage under the heading of Local Option Tax Receipts via the following link.
http://edr.state.fl.us/Content/local-government/data/data-a-to-z/g-l.cfm

HISTORY:
Chapter 86-4, L.O.F., authorized an additional 1 percent tax levy for those counties that had imposed the 1 or 2 Percent Tax for the previous three years and prohibited the tax proceeds from being used for the refinancing of debt service on existing facilities unless approved by an extraordinary vote of the county's governing body. In addition, it prohibited counties that levy a convention development tax from levying more than 2 percent of tourist development tax. Chapter 87-175, L.O.F., gave levying counties the option of collecting and administering the tax at the local level and restricted self-administering counties from retaining more than 3 percent of total collections for administrative costs. Chapter 87-280, L.O.F., authorized counties with a total population of less than 500,000 to use the tax proceeds for museums,

zoological parks, fishing piers, or nature centers. Chapter 88-243, L.O.F., authorized any county, which had imposed the tax for a period of one year to impose an additional 2 percent tax (later repealed) for economic development projects.

Chapters 92-175 and 92-204, L.O.F. (SB 2178 and HBs 147, 1551, and 1967), authorized any county to use the tax proceeds to fund museums, which was a use previously limited to those counties having a total population of less than 500,000. Additionally, it authorized a county to create a tourism promotion agency to undertake advertising and marketing research studies and provide booking and reservations services and created a joint legislative interim study committee to review current tourist-related tax issues and laws. Chapter 94-353, L.O.F. (HB 2557), clarified legislative intent regarding those transient rental transactions subject to tax. Chapter 95-133, L.O.F. (SB 1082), revised an exemption from public records requirements for county tourism promotion agencies. Chapter 95-360, L.O.F. (HB 485), authorized counties levying the tax to use the proceeds for promotion of zoological parks. Chapter 96-397, L.O.F. (SB 584), repealed the 2 percent tax for economic development projects authorized by Chapter 88-243, L.O.F.

Chapter 2000-312, L.O.F. (HB 509), clarified that the tax could not be repealed by referendum until outstanding bonds supported by such taxes were satisfied. It authorized counties that self-administer the tax to use certified public accountants to perform those functions associated with self-administration. Chapter 2001-252, L.O.F. (SB 1132), authorized certain counties to continue using a tourist development tax after retirement of applicable bonds under certain circumstances. Chapter 2003-34, L.O.F. (SB 1162), increased the population threshold from 500,000 to 750,000 for eligible counties to expend tax proceeds for optional uses. Chapter 2003-37, L.O.F. (SB 1566), limited the use of tax proceeds, which were specifically designated for beach improvement, maintenance, renourishment, restoration, and erosion control. Chapter 2003-78, L.O.F. (HB 533), made administrative changes pertaining to county tourism promotion agencies. Chapter 2005-96, L.O.F. (SB 300), reenacted provisions related to referenda and local administration that had been scheduled for repeal. Chapter 2009-133, L.O.F. (HB 61), provided for the application of tourist development taxes to short-term stays at timeshare resorts.

Chapter 2012-180, L.O.F. (HB 1015), authorized additional uses by allowing county governments to spend tax proceeds for purposes related to publicly owned and operated aquariums, including acquisition, construction, maintenance, or promotion. Chapter 2013-168, L.O.F. (SB 336), authorized additional uses by allowing county governments to spent tax proceeds for purposes related to aquariums owned and operated by not-for-profit organizations and clarified the automatic expiration of the tax upon the retirement of all bonds issued to finance certain facilities. Chapter 2016-6, L.O.F., (CS/CS/SB 182) reenacted a public records exemption of trade secret information held by a county tourism promotion agency to conform to the definition of trade secret, which expressly includes financial information within the definition. This exemption protected financial information deemed to be a trade secret from public disclosure. Chapter 2016-220, L.O.F., (HB 7099) specified additional uses for tourist development tax revenues for certain coastal counties. The legislation provided that, under specified conditions, a county located adjacent to the Gulf of Mexico or the Atlantic Ocean, except a county that receives revenue from taxes levied pursuant to s. 125.0108, F.S., (i.e., the Tourist Impact Tax levied only by Monroe County) may use up to 10 percent of tourist development tax revenues to reimburse expenses incurred in providing public safety services, including emergency medical services as defined in s. 401.107(3), F.S., and law enforcement services, which are needed to address impacts related to increased tourism and visitors to an area, as long as such funds are not used to supplant pre-existing expenditures on such services. To receive reimbursement, a county must: 1) generate a minimum of $10 million in annual proceeds from any tax, or any combination of taxes, authorized to be levied pursuant to s. 125.0104, F.S.; 2) have at least three municipalities; and 3) have an estimated population of less than 225,000, according to the most recent population estimate prepared pursuant to s. 186.901, F.S., excluding the inmate population. The board of county commissioners must, by majority vote, approve reimbursement upon receipt of a recommendation

from the tourist development council. Chapter 2017-36, L.O.F., (HB 7109) expanded the authorized uses of tourist development tax revenues to include the acquisition, construction, extension, enlargement, remodel, repair, improvement, maintenance, operation, or promotion of auditoriums that are publicly owned and open to the public, but operated by an organization that is exempt from federal taxation under 26 U.S.C. s. 501(c)(3) and within the boundaries of the county or subcounty special taxing district in which the tax is levied. Chapter 2018-118, L.O.F., (CS/HB 7087) extended the current authorization to use tourist development tax revenues on such things as restoration and maintenance of beaches, inland lakes and rivers, to expressly include the same types of expenditures for channels, estuaries, and lagoons as well as the construction of beach groins. Additionally, the legislation allowed counties to use tax revenues in connection with developing or operating public facilities within the boundaries of the county or subcounty special taxing district in which the tax was levied if the public facilities were needed to increase tourist-related business activities in the county or subcounty special district and were recommended by the county tourist development council. Tax revenues may also be used for any related land acquisition, land improvement, design, and engineering costs and all other professional and related costs required to bring the public facilities into service. Finally, tax revenues can only be used for these authorized public facilities if several preconditions were satisfied.

Chapter 2020-10, L.O.F., (CS/HB 7097) increased a population limit from 750,000 to 950,000 for counties that may use certain tourist development tax revenues (i.e., 1 or 2 Percent Tax, Additional 1% Tax, and High Tourism Impact Tax) for certain uses. Chapter 2022-5, L.O.F. (SB 850) deleted statutory language relating to a public records exemption for a trade secret, as defined in s. 812.081, F.S., held by a county tourism promotion agency. The exemption was not reenacted by the Legislature and repealed on October 2, 2021. Chapter 2023-157, L.O.F. (HB 7063), required a referendum to levy this tax. It also required a referendum to reenact this tax, which must be held at a general election occurring within the 48-month period immediately preceding the effective date of the reenacted tax. Such a referendum may appear on the ballot only once within the 48-month period. Additionally, the legislation allowed the continued use of these tax revenues for public safety purposes by certain counties located adjacent to the Gulf of Mexico or the Atlantic Ocean (i.e., Bay, Okaloosa, and Walton) by increasing the population threshold from 225,000 to 275,000. Furthermore, it allowed the use of funds for public safety purposes by fiscally constrained counties that border the Gulf of Mexico or Atlantic Ocean, which expands current eligibility to Dixie, Franklin, Gulf, Levy, Taylor, and Wakulla counties. Chapter 2025-8, L.O.F., (HB 575) updates provisions to reflect the name change from the Gulf of Mexico to the Gulf of America. Chapter 2025-208, L.O.F., (HB 7031) allows coastal fiscally constrained counties to use funds for certain capital improvements. Additionally, it allows all coastal counties to use funds for the provision of beach lifeguards certified by an approved entity.

IMPOSITION AND RATE:
If levied, the rate must be 1 percent. The tax is levied on all rental charges subject to the transient rental tax pursuant to s. 212.03, F.S. Fifty-nine counties are eligible to levy this tax, and 56 counties levy this tax.

DISPOSITION AND USES:
In counties for which the tax is administered by the Department of Revenue, collections are returned monthly to the county levying the tax, less costs of administration, for use by the county in accordance with the provisions of s. 125.0104, F.S. In counties self-administering the tax pursuant to s. 125.0104(10), F.S., collections are retained by the county, less cost of administration not to exceed 3 percent, for use in accordance with the provisions of s. 125.0104, F.S.

OTHER STATES:
The National Conference of State Legislatures has published a listing of state lodging tax rates, which is available via the link below. These statewide taxes on lodging are often levied in addition to state sales taxes and/or local lodging taxes.

# PROFESSIONAL SPORTS FRANCHISE FACILITY TOURIST DEVELOPMENT TAX

FLORIDA STATUTES: Section 125.0104(3)(l)

ADMINISTERED BY: Department of Revenue or self-administered by levying counties

SUMMARY:
Section 125.0104, F.S., authorizes the levy of five separate local option taxes on rental charges subject to the transient rentals tax under s. 212.03, F.S., to be used in various ways to promote tourism within the county. Generally, the revenues from these levies may be used for capital construction of tourist-related facilities, tourist promotion, and beach and shoreline maintenance; however, the authorized uses vary according to the particular levy. No tourist development tax may be levied in any municipality imposing the Municipal Resort Tax authorized under Chapter 67-930, L.O.F., (i.e., Miami Beach, Bal Harbour and Surfside). There is a prohibition against any county levying a convention development tax from levying tourist development taxes at a rate of more than 2 percent; however, this prohibition does not apply to a county's levy of the Professional Sports Franchise Facility Tax and Duval County's levy of the Additional Professional Sports Franchise Facility Tax.

The Professional Sports Franchise Facility Tax may be levied by referendum at a rate up to 1 percent. Uses of the tax revenues are contained in s. 125.0104(3)(l), F.S. Generally, proceeds can be used to pay debt service on bonds for the construction or renovation of professional sports franchise facilities, spring training facilities of professional sports franchises and convention centers, and to promote and advertise tourism.

REVENUE:

| Fiscal Year | Total Collections | Annual Change % |
|---|---|---|
| 2026-27* | 261,225,285 | 2.20% |
| 2025-26* | 255,602,040 | -0.30% |
| 2024-25 | 256,371,153 | -0.54% |
| 2023-24 | 257,760,205 | 6.21% |
| 2022-23 | 242,698,043 | -10.49% |
| 2021-22 | 271,147,436 | 80.68% |
| 2020-21 | 150,068,345 | -1.30% |

* Estimate

Annual tourist development tax receipts by county can be found on the Office of Economic and Demographic Research's Local Government Data webpage under the heading of Local Option Tax Receipts via the following link.
http://edr.state.fl.us/Content/local-government/data/data-a-to-z/g-l.cfm

HISTORY:
Chapter 88-226, L.O.F., authorized certain counties to impose an additional 1 percent tax (i.e., Professional Sports Franchise Facility Tax) to pay debt service on bonds issued to finance the construction, reconstruction, or renovation of a professional sports franchise facility. Chapter 89-217, L.O.F., clarified that any county could impose the tax.

Chapter 90-349, L.O.F. (SB 1624), authorized those counties levying more than 2 percent of convention development tax to levy the Professional Sports Franchise Facility Tax to pay debt service on a professional sports franchise facility. Chapter 94-353, L.O.F. (HB 2557) , clarified legislative intent regarding those transient rental transactions subject to tax. Chapter 95-133, L.O.F. (SB 1082), revised an

exemption from public records requirements for county tourism promotion agencies. Chapter 95-304, L.O.F. (HB 1757), expanded the authorized uses to include paying debt service on bonds issued to finance the construction, reconstruction, or renovation of a convention center. Chapter 95-416, L.O.F. (HB 1523), expanded the authorized uses to include planning and design costs incurred for the facility prior to the issuance of bonds and for facilities that are publicly owned and operated, or publicly owned and operated by the professional sports franchise facility owner or another qualified lessee. Chapter 96-397, L.O.F. (SB 584), authorized a county levying the tax to use the proceeds for convention center planning and design costs. Chapter 98-106, L.O.F. (SB 884), authorized any county levying the tax to use the proceeds for operation and maintenance of a convention center for a period of up to ten years, conditioned on the county's levy of the tax to pay debt service on a convention center. Chapter 99-287, L.O.F. (HB 519), authorized the use of the tax proceeds to pay the debt service on bonds issued to finance a retained spring training franchise facility.

Chapter 2000-312, L.O.F. (HB 509), clarified that the tax could not be repealed by referendum until outstanding bonds supported by such taxes were satisfied. It authorized counties that self-administer the tax to use certified public accountants to perform those functions associated with self-administration. Chapter 2000-351, L.O.F. (SB 1604), authorized any county that levies the tax after July 1, 2000, for the purpose of paying debt service on bonds related to convention centers to use the tax proceeds to pay the operation and maintenance costs of a convention center for the life of the bonds. Chapter 2001-252, L.O.F. (SB 1132), authorized certain counties to continue using a tourist development tax after retirement of applicable bonds under certain circumstances. Chapter 2002-265, L.O.F. (SB 1844), authorized the tax proceeds to be used to promote and advertise tourism. Chapter 2003-78, L.O.F. (HB 533), made administrative changes pertaining to county tourism promotion agencies. Chapter 2005-96, L.O.F. (SB 300), reenacted provisions related to referenda and local administration that had been scheduled for repeal. Chapter 2009-133, L.O.F. (HB 61), provided for the application of tourist development taxes to short-term stays at timeshare resorts.

Chapter 2012-180, L.O.F. (HB 1015), authorized additional uses by allowing county governments to spend tax proceeds for purposes related to publicly owned and operated aquariums, including acquisition, construction, maintenance, or promotion. Chapter 2013-168, L.O.F. (SB 336), clarified the automatic expiration of the tax upon the retirement of all bonds issued to finance certain facilities. Chapter 2016-6, L.O.F., (CS/CS/SB 182) reenacted a public records exemption of trade secret information held by a county tourism promotion agency to conform to the definition of trade secret, which expressly includes financial information within the definition. This exemption protected financial information deemed to be a trade secret from public disclosure.

Chapter 2022-5, L.O.F. (SB 850) deletes statutory language relating to a public records exemption for a trade secret, as defined in s. 812.081, F.S., held by a county tourism promotion agency. The exemption was not reenacted by the Legislature and repealed on October 2, 2021. Chapter 2023-157, L.O.F. (HB 7063), required a referendum to levy this tax. It also required a referendum to reenact this tax, which must be held at a general election occurring within the 48-month period immediately preceding the effective date of the reenacted tax. Such a referendum may appear on the ballot only once within the 48-month period.

IMPOSITION AND RATE:
The tax may be levied at a rate up to 1 percent. It is levied on all rental charges subject to the transient rental tax pursuant to s. 212.03, F.S. All counties are eligible to levy this tax, and 46 counties levy the tax.

DISPOSITION AND USES:
In counties for which the tax is administered by the Department of Revenue, collections are returned monthly to the county levying the tax, less costs of administration, for use by the county in accordance

with the provisions of s. 125.0104, F.S. In counties self-administering the tax pursuant to s. 125.0104(10), F.S., collections are retained by the county, less cost of administration not to exceed 3 percent, for use in accordance with the provisions of s. 125.0104, F.S.

OTHER STATES:
The National Conference of State Legislatures has published a listing of state lodging tax rates, which is available via the link below. These statewide taxes on lodging are often levied in addition to state sales taxes and/or local lodging taxes.
https://www.ncsl.org/state-legislatures-news/details/travel-can-be-taxing-in-more-ways-than-one

# HIGH TOURISM IMPACT
# TOURIST DEVELOPMENT TAX

FLORIDA STATUTES: Section 125.0104(3)(m)

ADMINISTERED BY: Department of Revenue or self-administered by levying counties

SUMMARY:
Section 125.0104, F.S., authorizes the levy of five separate local option taxes on rental charges subject to the transient rentals tax under s. 212.03, F.S., to be used in various ways to promote tourism within the county. Generally, the revenues from these levies may be used for capital construction of tourist-related facilities, tourist promotion, and beach and shoreline maintenance; however, the authorized uses vary according to the particular levy. No tourist development tax may be levied in any municipality imposing the Municipal Resort Tax authorized under Chapter 67-930, L.O.F., (i.e., Miami Beach, Bal Harbour and Surfside). There is a prohibition against any county levying a convention development tax from levying tourist development taxes at a rate of more than 2 percent; however, this prohibition does not apply to a county's levy of the Professional Sports Franchise Facility Tax and Duval County's levy of the Additional Professional Sports Franchise Facility Tax.

The High Tourism Impact Tax is one of the five tourist development taxes authorized under s. 125.0104, F.S. This 1 percent tax may be levied, subject to referendum approval, by any county in which sales subject to the tourist development tax exceeded $600 million in the previous calendar year or were at least 18 percent of the county's total taxable sales under Chapter 212, F.S., where sales subject to the tourist development tax were a minimum of $200 million. However, no county levying a convention development tax can be considered a high tourism impact county. The tax revenues can only be used for one or more of the authorized uses pursuant to s. 125.0104(5), F.S.

REVENUE:

| Fiscal Year | Total Collections | Annual Change % |
|---|---|---|
| 2026-27* | 169,341,655 | 2.20% |
| 2025-26* | 165,696,335 | -0.30% |
| 2024-25 | 166,194,920 | 0.96% |
| 2023-24 | 164,611,999 | 9.09% |
| 2022-23 | 150,901,731 | -1.68% |
| 2021-22 | 153,486,185 | 90.14% |
| 2020-21 | 80,722,686 | -8.76% |

* Estimate

Annual tourist development tax receipts by county can be found on the Office of Economic and Demographic Research's Local Government Data webpage under the heading of Local Option Tax Receipts via the following link.
http://edr.state.fl.us/Content/local-government/data/data-a-to-z/g-l.cfm

HISTORY:
Chapter 89-356, L.O.F., authorized a 1 percent levy for counties certified as high tourism impact counties (i.e., High Tourism Impact Tax) and imposed new auditing and accounting requirements on counties that locally administer tourist development taxes.

Chapter 90-107, L.O.F. (SB 1882), added an optional condition for qualification as a high tourism impact county, which had the effect of making Osceola County eligible to levy the High Tourist Impact Tax.
Chapter 94-353, L.O.F. (HB 2557), clarified legislative intent regarding those transient rental transactions

subject to tax. Chapter 95-133, L.O.F. (SB 1082), revised an exemption from public records requirements for county tourism promotion agencies.

Chapter 2000-312, L.O.F. (HB 509), authorized counties that self-administer the tax to use certified public accountants to perform those functions associated with self-administration. Chapter 2001-252, L.O.F. (SB 1132), authorized certain counties to continue using a tourist development tax after retirement of applicable bonds under certain circumstances. Chapter 2003-34, L.O.F. (SB 1162), increased the population threshold from 500,000 to 750,000 for eligible counties to expend the tax proceeds for optional uses. Chapter 2003-37, L.O.F. (SB 1566), limited the use of tax proceeds, which were specifically designated for beach improvement, maintenance, renourishment, restoration, and erosion control. Chapter 2003-78, L.O.F. (HB 533), made administrative changes pertaining to county tourism promotion agencies. Chapter 2005-96, L.O.F. (SB 300), reenacted provisions related to referenda and local administration that had been scheduled for repeal. Chapter 2009-133, L.O.F. (HB 61), provided for the application of tourist development taxes to short-term stays at timeshare resorts.

Chapter 2012-180, L.O.F. (HB 1015), authorized additional uses by allowing county governments to spend tax proceeds for purposes related to publicly owned and operated aquariums, including acquisition, construction, maintenance, or promotion. Chapter 2013-168, L.O.F. (SB 336), authorized additional uses by allowing county governments to spend tax proceeds for purposes related to aquariums owned and operated by not-for-profit organizations and clarified the automatic expiration of the tax upon the retirement of all bonds issued to finance certain facilities. Chapter 2016-6, L.O.F., (CS/CS/SB 182) reenacted a public records exemption of trade secret information held by a county tourism promotion agency to conform to the definition of trade secret, which expressly includes financial information within the definition. This exemption protected financial information deemed to be a trade secret from public disclosure. Chapter 2016-220, L.O.F., (HB 7099) specified additional uses for tourist development tax revenues for certain coastal counties. The legislation provided that, under specified conditions, a county located adjacent to the Gulf of Mexico or the Atlantic Ocean, except a county that receives revenue from taxes levied pursuant to s. 125.0108, F.S., (i.e., the Tourist Impact Tax levied only by Monroe County) may use up to 10 percent of tourist development tax revenues to reimburse expenses incurred in providing public safety services, including emergency medical services as defined in s. 401.107(3), F.S., and law enforcement services, which are needed to address impacts related to increased tourism and visitors to an area, as long as such funds are not used to supplant pre-existing expenditures on such services. To receive reimbursement, a county must: 1) generate a minimum of $10 million in annual proceeds from any tax, or any combination of taxes, authorized to be levied pursuant to s. 125.0104, F.S.; 2) have at least three municipalities; and 3) have an estimated population of less than 225,000, according to the most recent population estimate prepared pursuant to s. 186.901, F.S., excluding the inmate population. The board of county commissioners must, by majority vote, approve reimbursement upon receipt of a recommendation from the tourist development council. Chapter 2017-36, L.O.F., (HB 7109) expanded the authorized uses of tourist development tax revenues to include the acquisition, construction, extension, enlargement, remodel, repair, improvement, maintenance, operation, or promotion of auditoriums that are publicly owned and open to the public, but operated by an organization that is exempt from federal taxation under 26 U.S.C. s. 501(c)(3) and within the boundaries of the county or subcounty special taxing district in which the tax is levied. Chapter 2018-118, L.O.F., (CS/HB 7087) extended the current authorization to use tourist development tax revenues on such things as restoration and maintenance of beaches, inland lakes and rivers, to expressly include the same types of expenditures for channels, estuaries, and lagoons as well as the construction of beach groins. Additionally, the legislation allowed counties to use tax revenues in connection with developing or operating public facilities within the boundaries of the county or subcounty special taxing district in which the tax was levied if the public facilities were needed to increase tourist-related business activities in the county or subcounty special district and were recommended by the county tourist development council. Tax revenues may also be used for any related land acquisition, land improvement, design, and engineering costs and all other professional and related

costs required to bring the public facilities into service. Finally, tax revenues can only be used for these authorized public facilities if several preconditions were satisfied.

Chapter 2020-10, L.O.F., (CS/HB 7097) increased a population limit from 750,000 to 950,000 for counties that may use certain tourist development tax revenues (i.e., 1 or 2 Percent Tax, Additional 1% Tax, and High Tourism Impact Tax) for certain uses. Chapter 2022-5, L.O.F. (SB 850) deleted statutory language relating to a public records exemption for a trade secret, as defined in s. 812.081, F.S., held by a county tourism promotion agency. The exemption was not reenacted by the Legislature and repealed on October 2, 2021. Chapter 2023-157, L.O.F. (HB 7063), required a referendum to levy this tax. It also required a referendum to reenact this tax, which must be held at a general election occurring within the 48-month period immediately preceding the effective date of the reenacted tax. Such a referendum may appear on the ballot only once within the 48-month period. Additionally, the legislation allowed the continued use of these tax revenues for public safety purposes by certain counties located adjacent to the Gulf of Mexico or the Atlantic Ocean (i.e., Bay, Okaloosa, and Walton) by increasing the population threshold from 225,000 to 275,000. Furthermore, it allowed the use of funds for public safety purposes by fiscally constrained counties that border the Gulf of Mexico or Atlantic Ocean, which expands current eligibility to Dixie, Franklin, Gulf, Levy, Taylor, and Wakulla counties. Chapter 2025-8, L.O.F., (HB 575) updates provisions to reflect the name change from the Gulf of Mexico to the Gulf of America. Chapter 2025-208, L.O.F., (HB 7031) allows coastal fiscally constrained counties to use funds for certain capital improvements. Additionally, it allows all coastal counties to use funds for the provision of beach lifeguards certified by an approved entity.

IMPOSITION AND RATE:
If levied, the rate must be 1 percent. The tax is levied on all rental charges subject to the transient rental tax pursuant to s. 212.03, F.S. Once a county qualifies as a high tourism impact county and levies the tax, the county shall retain the designation for the period of the tax levy. Fifteen counties are eligible to levy this tax. The following 11 counties levy the tax: Broward, Hillsborough, Manatee, Monroe, Okaloosa, Orange, Osceola, Palm Beach, Pinellas, Sarasota, and Walton counties levy this tax, and each county retains this designation until its tax levy ends.

DISPOSITION AND USES:
In counties for which the tax is administered by the Department of Revenue, collections are returned monthly to the county levying the tax, less costs of administration, for use by the county in accordance with the provisions of s. 125.0104, F.S. In counties self-administering the tax pursuant to s. 125.0104(10), F.S., collections are retained by the county, less cost of administration not to exceed 3 percent, for use in accordance with the provisions of s. 125.0104, F.S.

OTHER STATES:
The National Conference of State Legislatures has published a listing of state lodging tax rates, which is available via the link below. These statewide taxes on lodging are often levied in addition to state sales taxes and/or local lodging taxes.

# ADDITIONAL PROFESSIONAL SPORTS FRANCHISE FACILITY TOURIST DEVELOPMENT TAX

FLORIDA STATUTES: Section 125.0104(3)(n)

ADMINISTERED BY: Department of Revenue or self-administered by levying counties

SUMMARY:
Section 125.0104, F.S., authorizes the levy of five separate local option taxes on rental charges subject to the transient rentals tax under s. 212.03, F.S., to be used in various ways to promote tourism within the county. Generally, the revenues from these levies may be used for capital construction of tourist-related facilities, tourist promotion, and beach and shoreline maintenance; however, the authorized uses vary according to the particular levy. No tourist development tax may be levied in any municipality imposing the Municipal Resort Tax authorized under Chapter 67-930, L.O.F., (i.e., Miami Beach, Bal Harbour and Surfside). There is a prohibition against any county levying a convention development tax from levying tourist development taxes at a rate of more than 2 percent; however, this prohibition does not apply to a county's levy of the Professional Sports Franchise Facility Tax and Duval County's levy of the Additional Professional Sports Franchise Facility Tax.

The Additional Professional Sports Franchise Facility Tax may be levied at a rate up to 1 percent by referendum. Uses of the tax revenues are contained in s. 125.0104(3)(n), F.S. Generally, the proceeds can be used to pay debt service on bonds for the construction or renovation of professional sports franchise facilities, spring training facilities of professional sports franchises, and to promote and advertise tourism.

REVENUE:

| Fiscal Year | Total Collections | Annual Change % |
|---|---|---|
| 2026-27* | 244,670,546 | 2.20% |
| 2025-26* | 239,403,666 | -0.30% |
| 2024-25 | 240,124,038 | -0.88% |
| 2023-24 | 242,245,166 | 6.41% |
| 2022-23 | 227,659,125 | 6.77% |
| 2021-22 | 213,220,879 | 63.28% |
| 2020-21 | 130,585,860 | 2.82% |

* Estimate

Annual tourist development tax receipts by county can be found on the Office of Economic and Demographic Research's Local Government Data webpage under the heading of Local Option Tax Receipts via the following link.
http://edr.state.fl.us/Content/local-government/data/data-a-to-z/g-l.cfm

HISTORY:
Chapters 94-275, L.O.F. (SB 1502) and 94-338, L.O.F. (HB 1875), authorized any county, which had imposed the Professional Sports Franchise Facility Tax, to impose an additional 1 percent tax (i.e., Additional Professional Sports Franchise Facility Tax) to pay debt service on bonds issued to finance the construction, reconstruction, or renovation of a new professional sports franchise facility as defined in s. 288.1162, F.S. Chapter 94-353, L.O.F. (HB 2557), clarified legislative intent regarding those transient rental transactions subject to tax. Chapter 95-133, L.O.F. (SB 1082), revised an exemption from public records requirements for county tourism promotion agencies. Chapter 95-416, L.O.F. (HB 1523), expanded the authorized uses to include planning and design costs incurred for the facility prior to the issuance of bonds and for facilities that are publicly owned and operated, or publicly owned and operated

by the professional sports franchise facility owner or another qualified lessee. Chapter 99-287, L.O.F. (HB 519), authorized the use of the tax proceeds to pay the debt service on bonds issued to finance a retained spring training franchise facility.

Chapter 2000-312, L.O.F. (HB 509), authorized counties that self-administer the tax to use certified public accountants to perform those functions associated with self-administration. Chapter 2001-252, L.O.F. (SB 1132), authorized certain counties to continue using a tourist development tax after retirement of applicable bonds under certain circumstances. Chapter 2002-265, L.O.F. (SB 1844), authorized the tax proceeds to be used to promote and advertise tourism. Chapter 2003-78, L.O.F. (HB 533), made administrative changes pertaining to county tourism promotion agencies. Chapter 2005-96, L.O.F. (SB 300), reenacted provisions related to referenda and local administration that had been scheduled for repeal. Chapter 2009-133, L.O.F. (HB 61), provided for the application of tourist development taxes to short-term stays at timeshare resorts.

Chapter 2012-180, L.O.F. (HB 1015), authorized additional uses by allowing county governments to spend tax proceeds for purposes related to publicly owned and operated aquariums, including acquisition, construction, maintenance, or promotion. Chapter 2013-168, L.O.F. (SB 336), clarified the automatic expiration of the tax upon the retirement of all bonds issued to finance certain facilities. Chapter 2016-6, L.O.F., (CS/CS/SB 182) reenacted a public records exemption of trade secret information held by a county tourism promotion agency to conform to the definition of trade secret, which expressly includes financial information within the definition. This exemption protected financial information deemed to be a trade secret from public disclosure.

Chapter 2022-5, L.O.F. (SB 850) deletes statutory language relating to a public records exemption for a trade secret, as defined in s. 812.081, F.S., held by a county tourism promotion agency. The exemption was not reenacted by the Legislature and repealed on October 2, 2021. Chapter 2023-157, L.O.F. (HB 7063), required a referendum to levy this tax. It also required a referendum to reenact this tax, which must be held at a general election occurring within the 48-month period immediately preceding the effective date of the reenacted tax. Such a referendum may appear on the ballot only once within the 48-month period.

IMPOSITION AND RATE:
The tax may be levied at a rate up to 1 percent. It is levied on all rental charges subject to the transient rental tax pursuant to s. 212.03, F.S. Sixty-five counties are eligible to levy this tax; however, the county must already levy the Professional Sports Franchise Facility Tax to impose this tax as well. Thirty-seven counties levy the tax.

DISPOSITION AND USES:
In counties for which the tax is administered by the Department of Revenue, collections are returned monthly to the county levying the tax, less costs of administration, for use by the county in accordance with the provisions of s. 125.0104, F.S. In counties self-administering the tax pursuant to s. 125.0104(10), F.S., collections are retained by the county, less cost of administration not to exceed 3 percent, for use in accordance with the provisions of s. 125.0104, F.S.

OTHER STATES:
The National Conference of State Legislatures has published a listing of state lodging tax rates, which is available via the link below. These statewide taxes on lodging are often levied in addition to state sales taxes and/or local lodging taxes.

# TOURIST IMPACT TAX

FLORIDA STATUTES: Section 125.0108

ADMINISTERED BY: Department of Revenue or self-administered by levying counties

SUMMARY:
Section 125.0108, F.S., authorizes any county creating a land authority pursuant to s. 380.0663(1), F.S., to levy a 1 percent tax on transient rental facilities within the county area designated as an area of critical state concern pursuant to ch. 380, F.S. If the area(s) of critical state concern are greater than 50 percent of the county's total land area, the tax may be levied countywide. The tax proceeds are used to purchase property in the area of critical state concern and to offset the loss of ad valorem taxes due to those land acquisitions. Only Monroe County is currently eligible to levy the tax, and the county levies the tax.

REVENUE:

| Fiscal Year | Total Collections | Annual Change % |
|---|---|---|
| 2026-27* | 18,491,382 | 2.20% |
| 2025-26* | 18,093,328 | -0.30% |
| 2024-25 | 18,147,772 | 11.86% |
| 2023-24 | 16,223,997 | 29.87% |
| 2022-23 | 12,492,156 | -31.32% |
| 2021-22 | 18,189,270 | 62.24% |
| 2020-21 | 11,211,150 | 32.03% |

* Estimate

Annual tax receipts by county can be found on the Office of Economic and Demographic Research's Local Government Data webpage under the heading of Local Option Tax Receipts via the following link. http://edr.state.fl.us/Content/local-government/data/data-a-to-z/g-l.cfm

HISTORY:
Chapter 86-170, L.O.F., authorized counties containing an area of critical state concern to levy a 1 percent tax on the lease of transient rentals, the sale of food and beverages at public food service establishments, or the purchase of admissions if the county had created a land development authority. The tax levy is subject to referendum approval. One half of the tax proceeds shall be used to purchase property in areas of critical state concern, and the other half shall be distributed to the county's governing body for the purpose of offsetting the loss of property taxes from land purchases. Chapter 87-280, L.O.F. deleted the tax's applicability to the sale of food and beverages at public food service establishments and the purchase of admissions.

Chapter 2001-252, L.O.F. (SB 1132), provided that the tax could be levied throughout the entire county if the area or areas of critical state concern are greater than 50 percent of the land area of the county. Chapter 2006-223, L.O.F. (HB 1299), provided that a county that has levied the tax for at least 20 consecutive years prior to removal of the critical state concern designation may continue to levy the tax for 20 years following removal of the designation. After expiration of the 20-year period, a county may continue to levy the tax if the county adopts an ordinance reauthorizing the tax levy and approves the tax by referendum approval. Chapter 2009-133, L.O.F. (HB 61), provided for the application of the tax to consideration paid for occupancy of certain timeshare resort products. Monroe County, the only county to levy the tax, has levied the tax countywide since 1988.

Chapter 2016-6, L.O.F., (CS/CS/SB 182) reenacted a public records exemption of trade secret information held by a county tourism promotion agency to conform to the definition of trade secret, which expressly includes financial information within the definition. This exemption protected financial information deemed to be a trade secret from public disclosure. Chapter 2018-159, L.O.F., (CS/CS/HB 1173) amended s. 380.0666(3), F.S., to authorize each land authority to contribute tourist impact tax revenues to the county or the county's housing authority to purchase any land in the county, not just land within the most populous municipality, for the construction, redevelopment, or preservation of affordable housing in an area of critical state concern. Additionally, the legislation authorized each land authority to use the tax revenues to pay specified costs related to affordable housing projects.

Chapter 2022-214, L.O.F., (CS/CS/HB 777) requires a referendum authorizing the levy of this tax to be held at a general election, as defined in s. 97.021, F.S. Chapter 2023-157, L.O.F. (HB 7063), required a referendum to reenact an expiring tourist impact tax must be held at a general election occurring within the 48-month period immediately preceding the effective date of the reenacted tax. Such a referendum may appear on the ballot only once within the 48-month period.

BASE AND RATE:
This 1 percent tax must be approved by qualified electors voting in referendum held during a general election, as defined in s. 97.021, F.S. The tax base is the same as for the Tourist Development Tax. The tax may be repealed by passage of a resolution by four-fifths vote of the county's governing body.

DISPOSITION:
Unless self-administered, the Department of Revenue returns proceeds, less costs of administration, to the county that imposed the tax. Monroe County, the only county levying the tax, self-administers it. Proceeds of the tax must be used equally for acquisition of property in the area of critical state concern and to offset the loss of ad valorem taxes caused by such acquisitions. Areas that have been statutorily designated as areas of critical state concern include the Big Cypress area, primarily in Collier County; the Green Swamp area, in central Florida; the Florida Keys area, in south Florida; and the Apalachicola Bay area in Franklin County.

OTHER STATES:
The National Conference of State Legislatures has published a listing of state lodging tax rates, which is available via the link below. These statewide taxes on lodging are often levied in addition to state sales taxes and/or local lodging taxes.
https://www.ncsl.org/state-legislatures-news/details/travel-can-be-taxing-in-more-ways-than-one

# MUNICIPAL RESORT TAX
# ON TRANSIENT RENTALS AND FOOD/BEVERAGES

LAWS OF FLORIDA: Chapters 67-930, 82-142, 83-363, 93-286, and 94-344

ADMINISTERED BY: Self-administered by those municipalities levying the tax.

SUMMARY:
The Municipal Resort Tax may be levied at a rate up to 4 percent on transient rental transactions and up to 2 percent on the sale of food and beverages consumed in restaurants and bars in certain municipalities whose respective county population fell within specified limits based on the 1960 Census and whose municipal charter specifically provided for the levy of this tax prior to January 1, 1968. The tax levy must be adopted by an ordinance approved by the governing body. The tax proceeds can be used for tourism promotion activities, capital construction and maintenance of convention and cultural facilities, and relief of ad valorem taxes used for those purposes. Three municipalities in Miami-Dade County (i.e., Bal Harbour, Miami Beach, and Surfside) are eligible to impose the tax, and each municipality currently imposes the tax at the rate of 4 percent on transient rental transactions and 2 percent on the sale of food and beverages.

REVENUE:
Because the tax is self-administered, the following historical revenue figures were obtained from the municipalities' Comprehensive Annual Financial Reports.

| Fiscal Year | Bal Harbour | Miami Beach | Surfside | Total Collections | Annual Change % |
|---|---|---|---|---|---|
| 2023-24 | 5,659,962 | 109,139,198 | 5,254,000 | 120,053,160 | -3.8% |
| 2022-23 | 5,775,431 | 113,784,990 | 5,219,482 | 124,779,903 | -3.1% |
| 2021-22 | 5,931,450 | 117,307,417 | 5,491,734 | 128,730,601 | 40.9% |
| 2020-21 | 4,813,175 | 82,207,342 | 4,372,990 | 91,393,507 | 51.5% |
| 2019-20 | 2,777,408 | 54,972,321 | 2,583,931 | 60,333,660 | -37.6% |
| 2018-19 | 4,526,248 | 88,246,170 | 3,901,559 | 96,673,977 | 3.4% |
| 2017-18 | 3,825,266 | 87,595,052 | 2,054,141 | 93,474,459 | 7.9% |
| 2016-17 | 3,331,088 | 81,910,032 | 1,374,357 | 86,615,477 | -0.8% |

HISTORY:
Chapter 67-930, L.O.F., authorized municipalities in counties having a total population between 330,000 and 340,000 (i.e., Broward County) or more than 900,000 (i.e., Miami-Dade County), according to the 1960 Census, to levy a tax not to exceed 2 percent on transient rentals and food, beverages, and alcoholic beverages other than beer or malt beverages sold at an establishment licensed by the state hotel and restaurant commission or by the state beverage department. Municipalities were eligible to impose the tax by ordinance if the municipal charter specifically provided or was amended prior to January 1, 1968, to provide for the tax levy.

In 1970, the state challenged the law as unconstitutional and contended that the "…classification of the act as to the cities and towns which can qualify to collect a resort tax in the counties of the prescribed population brackets is so restrictive that the act on its face is a local act…" STATE v. CITY OF MIAMI BEACH [234 So.2d 103, 1970 Fla.SCt 1197]. The Florida Supreme Court upheld the law as valid.

Chapter 82-142, L.O.F., authorized a tax increase on transient rentals to a rate not to exceed 3 percent and provided that the increase must be approved by referendum prior to January 1, 1983. Chapter 83-363, L.O.F., authorized a tax increase on transient rentals to a rate not to exceed 4 percent and provided that the increase must be approved by referendum.

Chapter 93-286, L.O.F. (HB 1969), removed an exemption of the tax to sales of beer and malt beverages. Chapter 94-344, L.O.F. (HB 2079), expanded the tax levy to the sale of food or beverages sold at retail and alcoholic beverages sold at retail for consumption on the premises at any place of business required by law to be licensed by the state hotel and restaurant commission or the state beverage department.

IMPOSITION AND RATE:
Municipalities in counties having a population of not less than 330,000 and not more than 340,000 (i.e., Broward County) and in counties having a population of more than 900,000 (i.e., Miami-Dade County), according to the 1960 decennial census, whose charter specifically provided or whose charter was so amended prior to January 1, 1968, for the levy of this exact tax, are eligible to impose it by ordinance adopted by the governing body. The tax shall be levied upon the rent of every occupancy of a room or rooms in any hotel, motel, apartment house, rooming house, tourist or trailer camp, as the same are defined in part I of ch. 212, F.S., and upon the retail sale price of all items of food or beverages sold at retail, and of alcoholic beverages sold at retail for consumption on the premises at any place of business required by law to be licensed by the state hotel and restaurant commission or by the state beverage department. Only three municipalities in Miami-Dade County (i.e., Bal Harbour, Miami Beach, and Surfside) are currently eligible to impose the tax. All three municipalities impose the tax at 4 percent on transient rental transactions and 2 percent on the sale of food and beverages.

DISPOSITION AND USES:
Each municipality levying the tax is responsible for the collection and administration of funds. The tax proceeds shall only be used for the creation and maintenance of convention and publicity bureaus; development and maintenance of art and cultural centers; enhancement of tourism; publicity and advertising; construction, operation, and maintenance of auditoriums, community centers, and convention structures; or relief from ad valorem taxes being used for any of these other purposes.

OTHER STATES:
The National Conference of State Legislatures has published a listing of state lodging tax rates, which is available via the link below. These statewide taxes on lodging are often levied in addition to state sales taxes and/or local lodging taxes.
https://www.ncsl.org/state-legislatures-news/details/travel-can-be-taxing-in-more-ways-than-one

ADDITIONAL INFORMATION:
A more detailed description of this tax in its present form can be found in the Office of Economic and Demographic Research's annual report *Local Government Financial Information Handbook* via the following link.

# CONSOLIDATED COUNTY CONVENTION DEVELOPMENT TAX

FLORIDA STATUTES: Section 212.0305(4)(a)

ADMINISTERED BY: Self-administered by the consolidated City of Jacksonville/Duval County government pursuant to the authority granted by s. 212.0305(5), F.S.

SUMMARY:
Each county operating under a government consolidated with one or more municipalities in the county may impose a 2 percent tax on the total consideration charged for transient rental transactions. The tax shall be levied pursuant to an ordinance enacted by the county's governing body. Only the City of Jacksonville/Duval County consolidated government is currently eligible to levy the tax, and the consolidated government levies the tax.

REVENUE:

| Fiscal Year | Total Collections | Annual Change % |
|---|---|---|
| 2026-27* | 11,187,932 | 2.20% |
| 2025-26* | 10,947,096 | -0.30% |
| 2024-25 | 10,980,036 | 4.41% |
| 2023-24 | 10,516,655 | -2.55% |
| 2022-23 | 10,791,363 | 17.67% |
| 2021-22 | 9,171,126 | 32.68% |
| 2020-21 | 6,912,214 | 0.51% |

* Estimate

Annual tax receipts by county can be found on the Office of Economic and Demographic Research's Local Government Data webpage under the heading of Local Option Tax Receipts via the following link. http://edr.state.fl.us/Content/local-government/data/data-a-to-z/g-l.cfm

HISTORY:
Chapter 83-356, L.O.F., authorized any county operating under a government consolidated with one or more municipalities in the county to impose a 2 percent tax on the total consideration charged for transient rental transactions. Chapter 87-99, L.O.F., authorized counties to locally collect and administer convention development taxes.

Chapter 90-349, L.O.F. (SB 1624), authorized municipalities within the county to use tax proceeds to acquire and develop municipal parks, lifeguard stations, or athletic fields. Chapter 93-286, L.O.F. (HB 1969), authorized any county or municipality wherein the tax was levied to adopt and implement a convention center booking policy applying to those centers owned or operated by the local government. Chapter 96-397, L.O.F. (SB 584), authorized municipalities having a population of 10,000 or more in a county authorized to levy the tax to use the tax proceeds to promote and advertise tourism.

Chapter 2000-312, L.O.F. (HB 509), authorized counties that self-administer convention development taxes to use certified public accountants to perform the functions associated with self-administration. Chapter 2005-96, L.O.F. (SB 300), reenacted provisions related to self-administration of the tax, which had been set to repeal. Chapter 2009-133, L.O.F. (HB 61), provided for the application of convention development taxes to short-term stays at timeshare resorts.

# CONSOLIDATED COUNTY CONVENTION DEVELOPMENT TAX

IMPOSITION AND RATE:
Only a county operating under a government consolidated with one or more municipalities in the county is eligible to levy the 2 percent tax on the total consideration charged for transient rental transactions. The tax shall be levied pursuant to an ordinance enacted by the consolidated government's governing body. The consolidated City of Jacksonville/Duval County is the only government currently eligible to levy the tax, and the consolidated government began levying the tax in 1984.

DISPOSITION AND USES:
The consolidated government began self-administration of the tax in 1990 and retains all tax proceeds. The proceeds shall be used for any of the following purposes: 1) to extend, enlarge, and improve existing publicly owned convention centers; 2) to construct a multipurpose convention/coliseum/exhibition center; or 3) to acquire, construct, extend, enlarge, remodel, repair, improve, or maintain one or more convention centers, stadiums, exhibition halls, arenas, coliseums, or auditoriums. Additionally, municipalities with a population of 10,000 or more may use the proceeds to promote and advertise tourism.

OTHER STATES:
The National Conference of State Legislatures has published a listing of state lodging tax rates, which is available via the link below. These statewide taxes on lodging are often levied in addition to state sales taxes and/or local lodging taxes.

# CHARTER COUNTY
# CONVENTION DEVELOPMENT TAX

FLORIDA STATUTES: Section 212.0305(4)(b)

ADMINISTERED BY: Self-administered by Miami-Dade County pursuant to the authority granted by s. 212.0305(5), F.S.

SUMMARY:
Each county, as defined by s. 125.011(1), F.S., (i.e., Miami-Dade County) may impose a 3 percent tax on the total consideration charged for transient rental transactions. The tax shall be levied pursuant to an ordinance enacted by the county's governing body. The governing body of a municipality levying the Municipal Resort Tax may adopt a resolution prohibiting the imposition of the tax within its jurisdiction. If the levy is prohibited, no tax revenue shall be expended within that municipality. Only Miami-Dade County is currently eligible to levy the tax, and the county levies the tax.

REVENUE:

| Fiscal Year | Total Collections | Annual Change % |
|---|---|---|
| 2026-27* | 129,762,292 | 2.20% |
| 2025-26* | 126,968,974 | -0.30% |
| 2024-25 | 127,351,027 | 4.41% |
| 2023-24 | 121,976,535 | -6.07% |
| 2022-23 | 129,854,428 | 2.60% |
| 2021-22 | 126,567,370 | -8.09% |
| 2020-21 | 137,710,963 | 82.33% |

* Estimate

Annual tax receipts by county can be found on the Office of Economic and Demographic Research's Local Government Data webpage under the heading of Local Option Tax Receipts via the following link. http://edr.state.fl.us/Content/local-government/data/data-a-to-z/g-l.cfm

HISTORY:
Chapter 83-354, L.O.F., authorized any county, as defined in s. 125.011(1), F.S., to impose a 3 percent tax on the total consideration charged for transient rental transactions. Chapter 87-99, L.O.F., authorized counties to locally collect and administer convention development taxes.

Chapter 93-286, L.O.F. (HB 1969), authorized any county or municipality wherein the tax was levied to adopt and implement a convention center booking policy applying to those centers owned or operated by the local government. Chapter 94-351, L.O.F. (HB 2509), authorized a county levying the tax to use the proceeds and accrued interest to operate an authority upon completion of authorized projects. Additionally, the authorized uses were expanded to include golf courses or related buildings and parking facilities.

Chapter 2000-312, L.O.F. (HB 509), authorized counties that self-administer convention development taxes to use certified public accountants to perform the functions associated with self-administration. Chapter 2005-96, L.O.F. (SB 300), reenacted provisions related to self-administration of the tax, which had been set to repeal. Chapter 2009-133, L.O.F. (HB 61), provided for the application of convention development taxes to short-term stays at timeshare resorts.

## CHARTER COUNTY
## CONVENTION DEVELOPMENT TAX

IMPOSITION AND RATE:
Each county, as defined in s. 125.011(1), F.S., is eligible to levy the 3 percent tax on the total consideration charged for transient rental transactions. The tax shall be levied pursuant to an ordinance enacted by the county's governing body. Miami-Dade County is the only government currently eligible to levy the tax, and the county began levying the tax in 1984. No municipalities within the county have opted out of the levy.

DISPOSITION AND USES:
The county government began self-administration of the tax in 1988 and retains all tax proceeds. The proceeds shall be used in the following manner. Two-thirds of tax proceeds shall be used to extend, enlarge, and improve the largest existing publicly owned convention center in the county. After completion of this project, the tax proceeds may be used to acquire, construct, extend, enlarge, remodel, repair, improve, plan for, operate, manage, or maintain one or more convention centers, stadiums, exhibition halls, arenas, coliseums, auditoriums, or golf courses, and may be used to acquire and construct an intercity light rail transportation system. One-third of tax proceeds shall be used to construct a new multipurpose convention/coliseum/exhibition center/stadium or the maximum components thereof as funds permit in the most populous municipality in the county. After completion of these projects, the tax proceeds may be used, as determined by the county to operate an authority created pursuant to s. 212.0305(4)(b)4., F.S., or to acquire, construct, extend, enlarge, remodel, repair, improve, operate, or maintain one or more convention centers, stadiums, exhibition halls, arenas, coliseums, auditoriums, golf courses, or related buildings and parking facilities in the most populous municipality in the county.

## SPECIAL DISTRICT, SPECIAL, AND SUBCOUNTY CONVENTION DEVELOPMENT TAX

FLORIDA STATUTES: Sections 212.0305(4)(c)–(e) and 212.03055

ADMINISTERED BY: Self-administered by Volusia County pursuant to the authority granted by s. 212.0305(5), F.S.

SUMMARY:
Each county chartered under Article VII of the Florida Constitution, and which levied a tourist advertising ad valorem tax within a special taxing district on January 1, 1984 (i.e., Volusia County) may impose a tax of up to 3 percent of the total consideration charged for transient rental transactions. Three separate taxes are authorized for levy in three separate taxing districts with the combined effect of authorizing the levy countywide. The taxes can be levied by ordinance enacted by the county's governing body. Any rate increase in excess of 2 percent must be approved by a majority plus one vote of the county's governing body.

The three taxes authorized by s. 212.0305(4)(c)-(e), F.S., are the:

- Special District Convention Development Tax, which is levied within the boundaries of the special district formerly levying a tourist advertising ad valorem tax within a special taxing district (i.e., Halifax Area Advertising Authority).
- Special Convention Development Tax, which is levied outside the boundaries of the special district and to the southeast of State Road 415 (i.e., Southeast Volusia Advertising Authority).
- Subcounty Convention Development Tax, which is levied outside the boundaries of the special district and to the northwest of State Road 415 (i.e., West Volusia Advertising Authority).

Only Volusia County is currently eligible to levy the tax, and the county levies the tax.

REVENUE (of three taxes combined):

| Fiscal Year | Total Collections | Annual Change % |
|---|---|---|
| 2026-27* | 18,430,416 | 2.20% |
| 2025-26* | 18,033,675 | -0.30% |
| 2024-25 | 18,087,939 | 40.19% |
| 2023-24 | 12,902,678 | -2.55% |
| 2022-23 | 13,239,713 | -22.67% |
| 2021-22 | 17,121,510 | -6.64% |
| 2020-21 | 18,338,695 | 43.35% |

* Estimate

Annual tax receipts by county can be found on the Office of Economic and Demographic Research's Local Government Data webpage under the heading of Local Option Tax Receipts via the following link. http://edr.state.fl.us/Content/local-government/data/data-a-to-z/g-l.cfm

HISTORY:
Chapters 84-67, 84-324, and 84-373, L.O.F., authorized any county levying a tourist advertising ad valorem tax within a special taxing district, pursuant to s. 212.057, F.S., to levy a 1 percent Special District Convention Development Tax within the district's boundaries located in northeast Volusia County. With this tax's authorization, a county was prohibited from levying the tourist advertising ad valorem tax previously authorized. Chapter 87-99, L.O.F., authorized counties to locally collect and administer convention development taxes. Chapter 87-258, L.O.F., authorized Volusia County to levy a 1 percent in two separate, non-overlapping, geographically designated areas (i.e., Special Convention

Development Tax and Subcounty Convention Development Tax) outside of the Special District Convention Development Tax district. This legislation had the effect of authorizing a 1 percent tax countywide to be levied in three separate taxing districts.

Chapter 91-155, L.O.F. (SB 1986), increased the authorized tax rates of convention development taxes levied in Volusia County from 1 to 2 percent. Chapter 93-286, L.O.F. (HB 1969), authorized any county or municipality wherein the tax was levied to adopt and implement a convention center booking policy applying to those centers owned or operated by the local government. Chapter 95-290, L.O.F. (HB 355), authorized a tax rate increase from 2 percent to up to 3 percent. Any rate increase in excess of 2 percent must be approved by a supermajority (majority plus one) vote of the county's governing body.

Chapter 2000-312, L.O.F. (HB 509), authorized counties that self-administer convention development taxes to use certified public accountants to perform the functions associated with self-administration. Chapter 2005-96, L.O.F. (SB 300), reenacted provisions related to self-administration of the tax, which had been set to repeal. Chapter 2009-133, L.O.F. (HB 61), provided for the application of convention development taxes to short-term stays at timeshare resorts.

IMPOSITION AND RATE:
Only a county, chartered under Article VIII of the Florida Constitution and levying a tourist advertising ad valorem tax within a special taxing district on January 1, 1984, (i.e., Volusia County) is eligible to levy a tax of up to 3 percent tax on the total consideration charged for transient rental transactions. The tax shall be levied pursuant to an ordinance enacted by the county's governing body; however, any rate increase in excess of 2 percent must be approved by a supermajority (i.e., majority plus one) vote of the county's governing body. Volusia County is the only government currently eligible to levy the tax. The county began levying the tax at 1 percent in 1984, and the tax is currently levied countywide at 3 percent.

DISPOSITION AND USES:
The county government began self-administration of the tax in 1990 and retains all tax proceeds. The proceeds shall be used to promote and advertise tourism and to fund convention bureaus, tourist bureaus, tourist information centers, and news bureaus.

OTHER STATES:
The National Conference of State Legislatures has published a listing of state lodging tax rates, which is available via the link below. These statewide taxes on lodging are often levied in addition to state sales taxes and/or local lodging taxes.

# ALTERNATIVE SOURCES

# PERSONAL INCOME TAX

FLORIDA CONSTITUTION: Article VII, Section 5(a) of the Florida Constitution reads:
NATURAL PERSONS. No tax upon estates or inheritances or upon the income of natural persons who are residents or citizens of the state shall be levied by the state, or under its authority, in excess of the aggregate of amounts which may be allowed to be credited upon or deducted from any similar tax levied by the United States or any state.

SUMMARY:
Florida currently does not levy a personal income tax.

ESTIMATED REVENUE:
Not applicable.

| | FY 2026-27 (millions) |
|---|---|
| Data based on Federal Personal Income Tax of Florida Residents: | |
| 1 Percent of Estimated: | |
| Federal Taxable Income (FT) | $9,339.4 |
| Federal Taxable Income $20K Exempt* | $6,679.6 |
| Federal Taxable Income $40K Exempt* | $4,613.6 |
| Federal Taxable Income $60K Exempt* | $4,099.6 |
| 1 Percent of Estimated: | |
| Federal Tax Liability | $1,989.5 |
| Federal Tax Liability Double Per Exempt# | $1,895.1 |
| Federal Tax Liability Double Std Ded# | $1,912.7 |

* Allows each taxpayer to exempt stated amount of federal taxable income from state tax.

\# Allows double current standard deductions or personal exemptions in computing federal tax liability.

BASE AND RATE:
Currently 42 states and the District of Columbia levy a personal income tax. Forty-one levy a broad-based tax while the remaining one has selected a more limited income base. Alaska, Florida, Nevada, South Dakota, Tennessee, Texas, Washington, and Wyoming are the eight states that currently do not levy a personal income tax.

Limited Income Bases

New Hampshire taxes only interest and dividend income after exemptions, at a rate of 5 percent.

Broad Income Bases

All but five of the states (Alabama, Arkansas, Mississippi, New Jersey, and Pennsylvania) impose broad-based personal income taxes using the Federal Internal Revenue Code as the starting point in determining taxable income.

Tax rate schedules are of two basic types: flat rate and incremental rate. Twelve states levy a flat rate tax: Arizona, 2.5 percent on taxable income; Colorado, 4.40 percent on federal taxable income; Georgia, 5.5 percent on federal adjusted gross income; Idaho, 5.8 percent on taxable income; Illinois, 4.95 percent on federal adjusted gross income; Indiana, 3.05 percent on federal adjusted gross income; Kentucky, 4.0 percent on taxable income; Massachusetts, 5.0 percent on federal adjusted gross income; Michigan, 4.25

percent on federal adjusted gross income; North Carolina, 4. 5 percent on federal adjusted gross income; Pennsylvania, 3.07 percent on taxable income; and Utah, 4.8 percent on federal adjusted gross income.

Incremental tax rate schedules vary considerably among states. Minimum rates range from 0.25 percent (for the first $1,000 in Oklahoma) to 5.8 percent (for the first $24,500 in Maine). Maximum marginal rates range from 2.9 percent (for income above $491,350 in North Carolina) to 12.3 percent (for income above $677,275 in California). Currently, 16 states provide some type of indexing. Arizona, Arkansas, California, Idaho, Iowa, Maine, Massachusetts, Michigan, Minnesota, Missouri, Montana, Nebraska, New York, North Dakota, Ohio, Oregon, Rhode Island, Vermont, and Wisconsin have statutory provision for automatic adjustment of tax brackets, personal exemption, or standard deductions to the rate of inflation.

Five states give some type of tax credit against federal income taxes paid: Alabama, Iowa, Missouri, Montana, and Oregon.

Tax rates can be found at https://taxadmin.memberclicks.net/tax-rates

ECONOMIC INCIDENCE:
The person whose income is subject to an income tax is considered to bear the full burden of the tax after allowing for federal income tax deductibility.

Unless a state has a large commuter work force, nearly 100 percent of the initial impact of a personal income tax will fall upon residents of the levying state.

Most state income taxes are considered progressive with respect to a person's income, but because of the multiple tax bases and rate schedules possible, the incidence of the tax is conditioned by each state’s specific tax structure, including its exemptions and exclusions.

# STATE PROPERTY TAX

FLORIDA CONSTITUTION: Prohibited by Article VII, Section I

SUMMARY: Florida does not impose a state property (ad valorem) tax on real or tangible personal property.

TAXABLE VALUE AND ESTIMATED TAX:

| Fiscal Year | Taxable Value** (Billions) | Value of a 1 Mill Levy (Millions) | Annual Change % |
|---|---|---|---|
| 2025-26* | 3,802.3 | 3,802 | 4.42% |
| 2024-25# | 3,641.3 | 3,641 | 5.51% |
| 2023-24 | 3,451.2 | 3,451 | 18.38% |
| 2022-23 | 2,915.4 | 2,915 | 19.89% |
| 2021-22 | 2,431.7 | 2,432 | 6.14% |
| 2020-21 | 2,291.0 | 2,291 | 6.19% |
| 2019-20 | 2,157.4 | 2,157 | 6.76% |
| 2018-19 | 2,020.8 | 2,021 | 6.82% |
| 2017-18 | 1,891.8 | 1,892 | 7.36% |
| 2016-17 | 1,762.1 | 1,762 | 7.65% |
| 2015-16 | 1,636.9 | 1,637 | 8.33% |
| 2014-15 | 1,511.0 | 1,511 | 7.19% |
| 2013-14 | 1,409.7 | 1,410 | 3.46% |
| 2012-13 | 1,362.6 | 1,363 | -0.74% |
| 2011-12 | 1,372.7 | 1,373 | -3.96% |
| 2010-11 | 1,429.3 | 1,429 | -11.94% |
| 2009-10 | 1,623.1 | 1,623 | -10.39% |
| 2008-09 | 1,811.2 | 1,811 | -0.11% |

* Estimate
\# Preliminary
** Assumes the same tax base (including real estate, personal property, and centrally assessed property) and exemption structure as currently allowed for school districts.

HISTORY:
The 1868 Constitution of the State of Florida authorized a state ad valorem school tax of not less than one mill. In 1885, the Constitution of the State of Florida was modified to establish a statewide one mill ad valorem tax. [See Article VIII, Section 5 of The Constitution of the State of Florida, adopted on February 25, 1868, and Article XII, Section 6 of The Constitution of the State of Florida, adopted by the Convention of 1885.] According to a historical review of the mid-1880's written by Arthur O. White, "The bulk of the state's school tax dollar came from real estate levies. A one-mill tax on the assessed value of property sustained the state school fund." The first modern state school funding program that excluded the use of this state-imposed ad valorem tax on real and personal property was adopted in 1941, and it was further formalized in 1947 with the introduction of the Minimum Foundation Program. In the 1968 Florida Constitution, adopted by referendum on November 5, 1968, the state replaced the 1885

Constitution and inserted language in Article VII, Section 1(a) expressly barring the state government from levying ad valorem taxes on real estate or tangible personal property.
Also see discussion of Ad Valorem Taxes in the Major Local Government Revenue Sources section of this handbook.

OTHER STATES:
In the 19th century, property taxes generally were imposed at the state level. During the 20th century the property tax became the major source of local government revenue and the use of the tax as a state revenue source declined substantially. However, as of 2021, 36 states imposed state property taxes on selected types of property.

# VALUE-ADDED TAX

SUMMARY:
Florida currently does not levy a value-added tax (VAT).

ESTIMATED REVENUE:
Estimated revenue for 2026-27 from a 1 percent VAT in Florida:

| | | |
|---|---|---|
| Michigan-type SBT (additive method) | - | $ 9.4 billion |
| Invoice-credit VAT | - | $ 13.2 billion |
| New Hampshire-type BET | - | $ 10.0 billion |

HISTORY:
The value-added tax (VAT) is paid by producers on the value-added by their firms. Value-added is simply a firm's total revenue minus the value of purchased non-labor inputs (from outside suppliers) that the firm uses to produce goods and services. For example, if a firm uses labor, equipment (which it owns), and raw materials (which it purchases) to make a product, then value-added by the firm will be revenue minus the cost of raw materials. A VAT would be a percentage levy on that amount.

Measuring Value-Added - Invoice-Credit Method

In practice, measuring value-added is not as simple as portrayed above. In those countries with national VATs, the tax is commonly computed using the invoice-credit method. Under this method a firm applies the VAT rate to its gross receipts (revenue) and subtracts any VAT that was paid on purchased inputs, such as intermediate goods and capital goods. This is alleged to enhance compliance under a VAT in several ways. First, invoices provide a way of cross-checking the credits claimed by a taxpayer. Second, since taxpayers have the incentive to maximize the credit they can claim, it is in their interest that their suppliers pay the proper amount of VAT. It also concentrates the remittance burden on larger upstream businesses that can be audited more cost effectively, and it reduces the amount of tax at risk due to skimming and under-reporting by smaller retailers.

Measuring Value-Added - Income- Additive Method

A second method for calculating a VAT is the income or additive approach. Instead of subtracting the value of inputs from receipts, this approach directly adds up those categories of expenditure and net income of a given business that represent value-added (i.e., wages + interest + rent + profit). Strict utilization of federal income tax accounting (e.g., measurement of income and expenditures, timing or recognition of these items, reporting time frames, etc.) in calculating the VAT would result in value-added being measured directly from items already reported on federal income tax returns. For multi-state entities, national value-added could be apportioned in the same manner as corporate profits.

Experience in Other Jurisdictions

Most European countries rely on a VAT for a substantial portion of their revenue and have done so for at least four decades. The measurement method of choice has been the invoice-credit method. The VATs imposed in these jurisdictions are far from the pure VAT of theory. Equity considerations have led to substantial exemptions from the tax. Common among these are food, medical care and housing. Concern for record-keeping has led to exemptions for small businesses. In conformity with the concept that VATs are fundamentally taxes on consumption, businesses have been allowed to deduct the total expense of plant and equipment in the year of purchase. Nonetheless, the European experience with VATs seems to have been largely favorable.

In the United States, the state of Michigan used a form of VAT known as the "Single Business Tax" (SBT) as its form of general business taxation. It is the only state in the U.S. to have used a VAT. When it was adopted in 1975, it replaced seven business taxes, including a corporate income tax. On August 9, 2006, the Michigan legislature approved voter-initiated legislation to repeal the Single Business Tax. The repeal became effective January 1, 2008.

Business Enterprise Tax

The Business Enterprise Tax (BET) was enacted in the mid-1990's by the State of New Hampshire. It is a broad-based business tax with the major component of the BET is compensation paid to employees. The BET also taxes interest paid. However, the only other addition to the BET base is dividends paid to shareholders. Thus, it does not attempt to tax corporate profits. New Hampshire has a separate corporate profits tax. The tax is paid by businesses of all types (i.e., corporations, partnerships, proprietorships) but businesses with less than $150,000 in gross receipts or less than $75,000 in taxable base are exempt. The tax rate is currently .55 percent.

Incidence of the VAT

Firms subject to the VAT will try to pass it along to their consumers. The extent to which they are able to do so will depend on competitive conditions in markets for inputs to the production process and output markets. For practical purposes, it is generally assumed that the tax is fully-shifted forward in the production chain. In this case, the effect of a VAT is equivalent to taxing the total value of all taxable goods and services sold to final consumers. In the case where firms operate in multiple jurisdictions subject to a VAT the matter is more complicated and the outcome is dependent, in large part, upon the form of VAT being employed.

OTHER STATES:
New Hampshire

# MAJOR PENDING LITIGATION

## CURRENTLY PENDING LITIGATION

### A. Ad Valorem Tax

***City of Gulf Breeze v. Brown***
1st Judicial Circuit (Santa Rosa County), Case No.: 2017-CA-000012; 1st DCA, Case No.: 1D19-4245; Florida Supreme Court, Case No.: SC22-741
Issue: Whether city-owned property is being used for a municipal/governmental purpose.

In 2012, the City of Gulf Breeze acquired property that it used for both sewage and wastewater treatment and the operation of a golf course, driving range, and clubhouse. The city operated the property through 2015 and received an ad valorem tax exemption on the property through 2015. In October 2015, the city leased the golf course and related facilities to a private entity. The property appraiser then denied the exemption beginning in 2016 believing the property was no longer used for a governmental purpose after it was leased.

The trial court found that the property appraiser wrongly removed the exemption. The 1st DCA reversed and remanded and certified the question to the Florida Supreme Court. Oral Argument before the Florida Supreme Court was held April 5, 2023.

The Florida Supreme Court issued an opinion on November 27, 2024, holding that a municipally owned golf course property over which the municipality exercises extensive control is not disqualified from exemption under article VII, section 3(a) by having a management company used by the municipality in the operation of the property compensated not by a fixed fee but based on a formula tied to the difference between revenue and expenses.

***Gulf Marine Repair Corp. v. Henriquez***
13th Judicial Circuit (Hillsborough County), Consolidated Case Nos.: 2015-CA-004485A001; 2015-CA-011042A001; 2016-CA-011070A001; 2017-CA-010850A001; 2018-CA-011746A001; 2019-CA-012333A001; 2nd DCA, Case No. 2D20-2613, 375 So. 3d 306 (2023); Florida Supreme Court, Case No.: SC2024-0083.
Issue: "Governmental-governmental" use test; Sufficiency of property appraiser's written notice of exemption denial.

The 2nd DCA held that use of property as a for-profit shipyard does not serve a "governmental-governmental" function and that therefore the property is not tax exempt under the "governmental-governmental" use test established by *Williams v. Jones*, 326 So. 2d 425 (Fla. 1975).

The court noted that the legislature amended the definition in s. 196.012(6), F.S., to include maritime functions in 1997 and 2014 but did not "expressly grant an exemption for proprietary activities undertaken for profit" by lessees at deepwater ports. By contrast, the legislature expressly exempted the aviation uses at issue in this case with Hillsborough County Aviation Authority. Therefore, any activity by a lessee that is deemed to perform a port purpose or operation still must satisfy the initial sentence of s. 196.012(6), F.S., and the constitutional governmental-governmental use test arising from it, i.e., it must relate to the administration of government as opposed to the commercial endeavor of a private lessee.

Cases with an "*" are new cases that have not been reported in a prior version of the Handbook.

The court also addressed the notice provisions under s. 196.193(5)(b), F.S., for written exemption denials, rejecting the claim that the property appraiser failed to meet the notice requirements for the tax years. The court held that s. 196.193(5), F.S., is a procedural due process provision that enables an applicant to evaluate the reasons before seeking relief in the VAB or circuit court. The court stated that if the property appraiser fails to provide notice, the remedy is to toll or extend commencement of the VAB or circuit court filing period. Since Gulf Marine had actual knowledge of the property appraiser's denial of its exemption since 2014, the court said it suffered no prejudice even if the notices were deficient.

On the notice issue, the 2nd DCA disapproved of the 1st DCA's award of the religious tax exemption in *Genesis Ministries, Inc. v. Brown* (*Genesis II*), 250 So. 3d 865, 869 (Fla. 1st DCA 2018) under s. 196.193(5)(b), F.S., solely because the property appraiser failed in the denial notice to inform the applicant of its right to file a VAB action. The court stated that such a remedy is "not authorized" by the statute: "It is not for this Court or the Legislature to grant ad valorem taxation exemptions not provided for in the present constitutional provisions."

The Florida Supreme Court denied review on October 2, 2024.

***Hillsborough County Aviation Authority v. Henriquez***
13th Judicial Circuit (Hillsborough County), Case No.: 2020-CA-4927; 2nd DCA, Case No.: 2D20-3602.
Issue: Use of government property by a private, for-profit lessee.

In 2020, the Hillsborough County Aviation Authority (HCAA) applied for an ad valorem tax exemption for fifteen different properties that it owns and leases to private entities. The 2nd DCA ruled that the properties serve a governmental purpose as defined in s. 196.012(6), F.S., which reversed the trial court judgment. For that reason, the 2nd DCA remanded the case and instructed the trial court to enter judgment for the HCAA.

The court mentioned two other 2nd DCA decisions issued the same day in *Gulf Marine Repair Corporation v. Bob Henriquez*, (Case No. 2D20-2613), and *Tampa Port Authority v. Bob Henriquez*, (Case No. 2D20-2605), noting that while all three cases share the basic characteristic of being appeals from orders granting summary judgment in favor of the property appraiser on the issue of a lessee's entitlement to exemption from taxation under ss. 196.012(6) and 196.199(2)(a), F.S., the similarities end there.

As the court recognized in *Gulf Marine*, the legislature did not include language in the exemption statute, s. 196.012(6), F.S., to specifically exempt proprietary, for-profit activities undertaken by lessees at deepwater ports. By contrast, the legislature expressly exempted the aviation uses at issue in this case with HCAA.

The court noted that while the property appraiser raised valid points concerning the governmental-governmental test to determine if a tax exemption is constitutionally permitted, the court declined to apply the test to the statute involved, s. 196.012(6), F.S. Under the governmental-governmental test, said the court, an "exemption is constitutionally permitted only if the use by the private entity 'could properly be performed or served by an appropriate governmental unit, or which is demonstrated to perform a function or serve a purpose which would otherwise be a valid subject for the allocation of public funds.'" In contrast, when a nongovernmental lessee utilizes governmental property for-proprietary and for-profit aims, a governmental-proprietary function occurs.

Cases with an "*" are new cases that have not been reported in a prior version of the Handbook.

Recognizing the importance of the governmental-governmental test, the court certified a question to the Florida Supreme Court as one of great public importance: "WHERE PROPERTY IS EXPRESSLY EXEMPT FROM AD VALOREM TAXATION UNDER A SPECIFIC STATUTE AND THE STATUTE'S CONSTITUTIONALITY IS NOT CHALLENGED, DOES THE GOVERNMENTAL-GOVERNMENTAL TEST OVERRIDE AN EXPRESS STATUTORY EXEMPTION AND ULTIMATELY DETERMINE WHETHER THE PROPERTY IS EXEMPT FROM TAXATION?"

The 2nd DCA reversed the case, in part, and remanded the case, in part. In its July 7, 2023 decision, the court remanded the case back to the circuit court decision and directed that judgment be entered in favor of Defendant (exempting the subject properties). The Florida Supreme Court's August 21, 2024, order declined to exercise discretionary jurisdiction. The circuit court entered final judgment that the property is exempt.

***Marriott Resorts Hospitality Corporation, Grand Vista of Orlando Condominium Association, Inc. v. Mercado***
9th Judicial Circuit (Orange County), Case No.: 2018-CA-013570-O; 6th DCA, Case No. 6D2023-3618.
Issue: Assessment methodology of timeshare property

In the event of inadequate resales, s. 192.037(11), F.S., requires property appraisers to use "the original purchase price" of the timeshare interest. This case involves the issues of adequate resales under s. 192.037(10), F.S. and original developer sales under s. 192.037(11), F.S. Also involved are ss. 194.301, 194.3015, and 193.011, F.S. relating to required professionally accepted appraisal practices and appropriate appraisal methodology, and rule 12D-1.002, F.A.C. relating to just valuation under a prevailing market.

The trial court agreed with the property appraiser and determined there were inadequate resales of timeshares; i.e., that there were not enough arms-length deeded week resales in Orange County. The case has been appealed to the 6th DCA and the DCA held oral argument on June 19, 2025.

***Mercado v. Florida Department of Revenue***
Department of Revenue Case No. 23-12100; 1st DCA, Case No. 1D2024-0680.
Issue: Methodology for VAB determinations

Each year, the property appraisers make deductions under 193.011(8), F.S., to recorded selling prices of properties used to develop assessments and report these amounts to the Department of Revenue. VABs make deductions to recorded selling prices, presented as evidence, in the same standard amounts. The use of adjusted recorded selling prices to calculate fair market values results in adjusted fair market values. In cases where comparable sales are not used in calculating assessments, the adjustments are made in calculating fair market values.

Under s. 194.036(1)(c), F.S., the property appraiser filed an assertion seeking probable cause from the Department for the property appraiser to proceed to circuit court to appeal 154 of the VAB's 2022 decisions, in which the property appraiser said the VAB made the deduction to recorded selling prices or fair market values. The property appraiser argues that any sales used after deduction in developing assessments, and any other sales presented as evidence at a VAB, cannot be adjusted the same way by the VAB in reviewing the assessment. The contention is that only the sales used in the

Cases with an "*" are new cases that have not been reported in a prior version of the Handbook.

assessment can be adjusted. The property appraiser's written assertion alleged that any cost of sale deductions is unconstitutional.

The Department investigated the assertion and filed an investigative finding, determining that the VAB's deduction amounts made to comparable sales presented as evidence by petition parties was a professionally accepted appraisal practice that is referenced and required under s. 194.301, F.S., and that there was not probable cause that the VAB committed a consistent and continuous violation of the intent of the law and administrative rules in making deductions under s. 193.011(8), F.S.

The property appraiser appealed the denial of the assertion to the 1st DCA. The case is awaiting a briefing schedule.

***Rogers v. Gregor***
1st Judicial Circuit (Walton County), Case No.: 2017-CA-615; 1st DCA, Case No. 1D2022-3549.
Issue: Sufficiency of property appraiser written notice of exemption denial and whether s. 196.193, F.S. applies to denials of homestead exemption.

In both the notice of exemption disapproval and correspondence, the property appraiser informed Rogers of their appeal rights afforded by ss. 196.011 and 196.193, F.S., and not s. 196.151, F.S. But in the trial court and in this appeal the property appraiser argued that s. 196.151, F.S. controls.

The trial court found that the property appraiser provided Rogers with adequate notice of the homestead exemption denial, and that the notice requirement set forth in s. 196.193(5)(b), F.S., does not apply to homestead property. The trial court found that the notice sent to Rogers satisfied the requirements of s. 196.151, F.S., and that the notice satisfied the requirements of s. 196.193(5)(b), F.S., which were the applicable standard. Oral argument before the 1st DCA was held April 9, 2024.

The 1st DCA issued its opinion holding that the homestead exemption denial is invalid because it did not comply with the notice requirements of s. 196.193(5)(b), F.S . The court reversed the circuit court order granting summary judgment for the property appraiser and remanded to the lower court with instructions to grant summary final judgment in the Rogers' favor. The property appraiser sought review in the Florida Supreme Court.

The Florida Supreme Court accepted the case for review on June 17, 2025. The case is in the briefing schedule.

### B. Alcohol, Beverage and Tobacco Taxes

***C&S Wholesale Grocers, Inc. v. Florida Department of Business & Professional Regulation***
2nd Judicial Circuit (Leon County), Case No.: 2020-CA-000565; 1st DCA, Case No. 1D22-3040
Issue: Constitutionality of imposing excise taxes and surcharges on cigarettes without imposing excise taxes and surcharges on cigars.

A wholesale dealer of cigarette and tobacco products is challenging the Department's denial of its refund request for excise taxes and surcharges paid for the period November 2016–November 2019. The plaintiff alleges that the taxes and surcharge on cigarettes under ss. 210.02(1) and 210.011(1), F.S., violate the Commerce and Equal Protection Clauses of the U.S. Constitution because they apply to cigarettes but not to cigars. The trial court granted judgment on the pleadings in the Department's

Cases with an "*" are new cases that have not been reported in a prior version of the Handbook.

favor. The wholesaler appealed to the 1st DCA. The 1st DCA has affirmed the judgment of the trial court, but this is not final until any timely and authorized motions have been disposed of.

***C&S Wholesale Grocers, Inc. v. Florida Department of Business & Professional Regulation***
DBPR Case No. 2016-020992; 1st DCA, Case No.: 1D22-2940
Issue: Entitlement to an administrative hearing on a timely filed petition and subsequently amended petition protesting Department's denial of tax refund request.

The Department denied C&S Wholesale's request for a refund of tobacco taxes paid from the period of August 2013 through June 2015. C&S Wholesale timely filed a petition for hearing challenging the constitutionality of the taxes and surcharges levied pursuant to ss. 72.011(5) and 120.569, F.S., but requested that the Department not refer the petition to the Division of Administrative Hearings until a "substantially similar case" pending before Fla. 9th Circuit was decided. Four years after filing their initial petition, C&S Wholesale filed an amended petition requesting that the Department refer the petition to the Division of Administrative Hearings and removing contingency on the 9th Circuit case. The Department entered a Final Order dismissing C&S Wholesale's initial petition and amended petition on the basis that the petition did not comport with the 60-day jurisdictional requirements of s. 120.569, F.S. C&S Wholesale appealed the Department's Final Order to the 1st DCA. The 1st DCA affirmed the Department's dismissal of the amended petition and reversed the dismissal of the initial petition, with instructions to the Department to conduct a hearing under s. 120.57, F.S., in response to the initial petition.

***Basik Trading, Inc. v. Florida Department of Business & Professional Regulation***
2nd Judicial Circuit (Leon County), Case No.: 2022-CA-000702
Issue: Validity of Final Tax Assessment issued by Department; validity of/entitlement to tax deductions taken on prior returns; facial and as-applied constitutional challenges to s. 210.40 OTP surety bonds.

The Department determined after a series of routine audits that the plaintiff, a distributor of other tobacco products ("OTP"), owed additional taxes and surcharges after the Department disallowed certain deductions claimed for OTP purchases reported or previously reported on prior monthly reports. The distributor alleges that many of the taxed transactions were for products that were previously reported and taxed as a purchase, but were later subsequently shipped or transported outside of Florida and therefore are not subject to taxation in accordance with s. 210.276(1), F.S. The distributor claims that it is entitled to refunds or credits for taxes paid on those transactions, and the parties dispute whether the products entered and/or left Florida. The distributor also challenges the Department's authority to increase the amount of its surety bond and claims that the governing statute (s. 210.40, F.S.) is unconstitutionally vague because it confers discretion on the Department to increase the amount of the statutorily required bond in an amount that the Department deems necessary to fully protect the State. Bench trial is scheduled for January 6, 2025, in the 2nd Judicial Circuit, Leon County.

***Basik Trading, Inc. v. Florida Department of Business & Professional Regulation***
2nd Judicial Circuit (Leon County), Case No.: 2024 CA 0523
Issue: Refunds of taxes on other tobacco products

Plaintiff, a distributor of other tobacco products, contests the legality of the Department's denial of a Refund Application for the destruction of tobacco products previously reported and assessed as taxable purchases in a total amount of $129,795.

Cases with an "*" are new cases that have not been reported in a prior version of the Handbook.

Section 210.67, F.S., provides OTP distributors a right to a refund of taxes and surcharges on OTP purchases previously paid and reported, which is later returned to the manufacturer, sold out of state, or destroyed. The Department's Rule 61A-10.055 provides that in order for a distributor to receive a refund, Department personnel must witness the OTP destruction and provide the Department with "a copy of the signed destruction form." Plaintiff provided the destruction form signed & witnessed by the Department with its application for refund.

***Basik Trading, Inc. v. Florida Department of Business & Professional Regulation***
2nd Judicial Circuit (Leon County), Case No.: 2024 CA 001023
Issue: Refunds of taxes on other tobacco products

Plaintiff, a distributor of other tobacco products, contests the legality of the Department's denial of a Refund Application for the out of state sale of tobacco products previously reported and assessed as taxable purchases in a total amount of $676,483.87.

Section 210.67, F.S., provides OTP distributors a right to a refund of taxes and surcharges on OTP purchases previously paid and reported, which is later returned to the manufacturer, sold out of state, or destroyed.

***Global Hookah Distributors, Inc. v. Florida Department of Business & Professional Regulation***
DOAH Case No.: 23-0636; DOAH Case No.: 23-1638RU
Issue: Taxability of tobacco products; rule challenge.

A hookah tobacco products distributor filed an application for refund for excise taxes and surcharges paid on their products sold in Florida from April 2016 through January 2019 totaling $1,412,75.16, on the basis that hookah tobacco does not meet the definition of "tobacco products" under s. 210.25(12), F.S. The Department denied the distributor's refund application and the distributor, pursuant to s. 72.011, F.S., elected to contest the Department's denial before the DOAH. The distributor subsequently filed an unadopted rule challenge, alleging that the Department's classification and resulting taxation of hookah tobacco as a "tobacco product" under s. 210.25(12), F.S., constitutes an unadopted rule. The unadopted rule challenge, DOAH Case No. 23-1638RU, was consolidated with the refund denial in DOAH Case No.: 23-0636. A recommended order was entered in DOAH Case No. 23-0636 affirming the Department's denial which was subsequently adopted by Final Order in full by the Department. A final order was entered in DOAH Case No. 23-1638RU determining that the Department's determination and taxation of hookah tobacco as a taxable tobacco product within s. 210.25, F.S., did not constitute an unadopted rule violate of s. 120.54(1)(a), F.S.

Petitioner timely appealed the final order to the 1st DCA, and it is assigned DCA Case No. 1D23-2608.

### C. Communications Services Tax

* ***T-Mobile South LLC v. State of Florida, Department of Revenue***
2nd Judicial Circuit (Leon County); Case No.: 2024 CA 002137
Amount in Controversy: $1,312,729.17
Issue: This involves a Communications Services Tax audit. The issue is whether subscription on-demand (SVOD) services that are provided to T-Mobile Florida customers are subject to Communications Services Tax.

Cases with an "*" are new cases that have not been reported in a prior version of the Handbook.

The Department filed its Answer on February 14, 2025. A non-jury trial is set for February 9, 2026. Discovery is ongoing.

### D. Corporate Income Tax

***9395 CH, LLC v. Florida Department of Revenue***
2nd Judicial Circuit (Leon County), Case No.: 2023 CA 001324
1st District Court of Appeal, Case No.: 1D25-0594
Amount in Controversy: $308,188.55
Issue: Bonus depreciation

The Taxpayer is a real estate rental company and prior to 2019 was taxed as a partnership for federal and state purposes, and so did not file Florida corporate income tax returns. In subsequent years, Taxpayer elected to be taxed as a corporation. On its Florida returns, Taxpayer claimed a depreciation for assets purchased before it was taxed as a corporation in Florida, on which it took a bonus depreciation on its federal returns, but which depreciation was never "added back" to Florida returns as required by s. 220.13(1)(e), F.S. The Taxpayer contests the Department's denial of depreciation subtractions during the years at issue.

The Taxpayer filed a Notice of Constitutional Question and a Notice of Constitutional Challenge on January 29, 2024, essentially asking if the Department's application of s. 220.13(1)(e), F.S., violates the Equal Protection Clause. On February 10, 2025, Final Summary Judgment was granted in favor of the Department. The Taxpayer timely appealed.

***Apple, Inc. v. Florida Department of Revenue***
2nd Judicial Circuit (Leon County), Case No.: 2024 CA 001111
Amount in Controversy: $15,816,631.35
Issues: Whether certain intercompany sales should be included in the denominator of the sales factor and whether certain revenue should be sourced to Florida and therefore included in the sales factor numerator.

The Department was served on July 18, 2024, and Taxpayer filed a second complaint (Case No. 2025 CA 000407) which was consolidated with this case. Discovery is ongoing.

* ***Apple, Inc. v. Florida Department of Revenue***
2nd Judicial Circuit (Leon County), Case No.: 2025 CA 000407
Amount in Controversy: $26,290,023.89
Issue: Whether certain revenue should be sourced to Florida and therefore included in the sales factor numerator. Otherwise known as "cost of performance" or "market sourcing."

The Department was served on March 18, 2025. This complaint was consolidated with the first complaint (Case No. 2024 CA 001111). Discovery is ongoing.

***Capital One Bank (USA) N.A. v. Florida Department of Revenue***
2nd Judicial Circuit (Leon County), Case No.: 2022 CA 2070
Amount in Controversy: $14,316,099

Cases with an "*" are new cases that have not been reported in a prior version of the Handbook.

***Capital One, N.A. v. Florida Department of Revenue***
2nd Judicial Circuit (Leon County), Case No.: 2022 CA 2073
Amount in Controversy: $3,569,463
Issue: Location of income-generating activity.

Both of these cases are centered on the same issue: Whether Florida Corporate Income Tax/Bank Franchise Tax is due: 1. On interest income that is earned by the taxpayer from unsecured loans made to Florida customers; 2. On interchange fees that are earned by the taxpayer when a customer makes a purchase using a credit card that is issued by the taxpayer; and 3. On other interest that is earned by the taxpayer.

The taxpayer asserts that the vast majority of credit card payments it receives, and all of its interchange income, are electronic and received outside Florida and, thus, not subject to Florida corporate income tax, pursuant to s. 220.15(5)(c)3., F.S. The taxpayer also asserts it has no employees or property within Florida. The taxpayer asserts that the interchange income that it received is not attributable to Florida because it does not represent "fees" earned by the taxpayer from financial services performed in Florida, pursuant to s. 220.15(5)(c)1., F.S. The taxpayer also asserts that there is no factual or legal basis for asserting that other interest that was earned by the taxpayer is attributable to Florida.

The Department takes the position that certain receipts were attributable for Florida bank franchise tax purposes and that the location of receipt of payments is not relevant.

Both parties have filed motions for Summary Judgment and the Department has filed a Motion to Dismiss. A hearing on the motions was held on March 6, 2025. Both parties have submitted proposed orders.

***Checkfree Services Corporation v. Florida Department of Revenue***
2nd Judicial Circuit (Leon County), Case No.: 2024 CA 001026
Amount in Controversy: $3,396,471.61
Issue: Location of income-generating activity.

Taxpayer primarily derives revenue from the facilitation of online bill payment services through payment processing networks. The Taxpayer asserts that the vast majority of the costs to perform its income producing activities were incurred outside of Florida.

The Department was served on July 3, 2024. Discovery is ongoing.

***Cosmo International Corp v. Florida Department of Revenue***
17th Judicial Circuit (Broward County); Case No.: CACE-23-013288 and CACE-23-013304
Amount in Controversy: the total for both cases: $84,616.63 (refunds)
Issue: Inclusion of wages paid by an Employee Leasing Company in the payroll factor

These two cases involve a Corporate Income Tax refund dispute involving the question of whether wages paid to an individual by an Employee Leasing Company ("ELC") should be included in the Taxpayer's payroll factor. The Taxpayer argues that it pays the ELC a fee for services rendered and does not handle any employment-related matters or taxes, nor does it pay any wages directly to employees. The Taxpayer argues that because the employees are employed directly by the ELC, pursuant to Rule 12C-1.054(3), F.A.C., the wages paid to these employees by the ELC should be

Cases with an "*" are new cases that have not been reported in a prior version of the Handbook.

excluded from Taxpayer's payroll factor. The Department believes that the rule and s. 220.15(4), F.S., do not intend to exclude from the payroll factor wages paid by the common law employer and that the common law employer in this case is the Taxpayer and not the ELC. Although the amount in controversy is below $100,000, if applied to similarly situated taxpayers, a judicial outcome endorsing the Taxpayer's position would impact state revenues by that amount or more.
Both parties have filed respective motions for Summary Judgment. Parties are awaiting a hearing date.

***Humana, Inc. v. Florida Department of Revenue***
2nd Judicial Circuit (Leon County); Case No: 2024 CA 1232 (audit), 2024 CA 1233 (refund)
Amount in Controversy: $1,844,104.99 (audit 2024 CA 1232); $13,418,986.00 (refund 2024 CA 1233)
Issue(s):
(1) Whether audit adjustments increasing the federal tax-exempt interest income addition per §220.13(1)(a)2., F.S. are correct?
(2) Whether Taxpayer should source receipts from its pharmacy benefit management services and other services to Florida?
(3) Whether Humana's reverse break-up fee from Aetna should be treated as apportionable business income?

In addition to the above issues, the refund case involves the Department's refusal to make adjustments to its scholarship contribution tax credit for tax years 2016 and 2017.

The Department was served with both complaints on August 1, 2024. Pretrial motions have been ordered to be filed by December 31, 2025. Discovery is ongoing.

***Jetblue Airways Corporation v. Florida Department of Revenue***
2nd Judicial Circuit (Leon County), Case No.: 2024 CA 001177
Amount in Controversy: $631,632.11
Issue: Constitutionality of method for apportioning revenue for air and sea transportation.

The Taxpayer is a commercial airline that operates flights originating from and/or terminating at Florida commercial airports. The Taxpayer's flights traverse what is referred to as "The Box" which is the statutory boundary created pursuant to s. 220.151(2)(c), F.S., for apportioning the revenue miles for air and sea transportation. The Taxpayer asserts that "The Box" violates the Florida Constitution, the Federal Supremacy Clause, the Federal Commerce Clause (substantial nexus and fair apportionment, fairly related, the Foreign Commerce Clause) and the Due Process Clause.

The Department was served on July 26, 2024. On September 1, 2025, the Court granted Final Summary Judgment in favor of the Department as a matter of law on all counts of the operative complaint and granted the Taxpayer's motion to dismiss the Department's counterclaims. As of this writing, the parties are considering their respective next steps.

* ***OptumRx, Inc. v. State of Florida, Department of Revenue***
2nd Judicial Circuit (Leon County); Case No.: 2025 CA 000188
Amount in Controversy: $12,265,275.10
Issue: Apportionment ("cost of performance" v. "market sourcing") of income from management receipts.

Cases with an "*" are new cases that have not been reported in a prior version of the Handbook.

This case involves a Corporate Income Tax audit wherein Petitioner disputes the Department's apportionment of Petitioner's pharmacy benefits management receipts to Florida, claiming that Rule 12C-1.0155(2)(l), F.A.C., mandates that these sales be attributed to Florida if the greater portion of the income producing activity engaged by Petitioner directly occurs in Florida based on the costs of performance. Petitioner also contends that the Department erred in its application of Florida net operation loss provisions to deny Petitioner the utilization of net operating losses during the audit period. Discovery is ongoing.

* ***Verizon Communications, Inc. & Affiliates v. Florida Department of Revenue***
2nd Judicial Circuit (Leon County); Case No.: 2025 CA 000430
Amount in Controversy: $24,719,438.56 (refund)
Issue: Should Taxpayer have included inter-company sales in its sales factor and numerator, excluded sales of services to Florida residents and apportioned its income to Florida using a single sales factor per s. 220.153, F.S.?

This involves a Corporate Income Tax refund claim. Verizon filed a complaint in circuit court contesting the Department's Notice of Proposed Refund Denial based on amended returns using a single sales factor instead of the original three factor formula utilized when filing its original corporate income tax return. The Department was served in March 2025. Discovery is ongoing.

* ***Verizon Communications, Inc. & Affiliates v. Florida Department of Revenue***
2nd Judicial Circuit (Leon County); Case No.: 2025 CA 001008
Amount in Controversy: $2,457,014.00 (refund)
Issue: What is the correct amount of interest that should be refunded?

This involves a Corporate Income Tax refund claim that was considered during an on-going CIT compliance audit. The compliance audit resulted in a refund to the Taxpayer. At issue is the Taxpayer's demand for accrued interest for the 2019 Tax Period. A second issue involves interest paid by the Taxpayer with its 2018 and 2020 amended returns. The Taxpayer asserts that it is owed interest as being overpaid. The Department was served on June 5, 2025. Discovery is ongoing.

### E. Documentary Stamp Tax

***Bank of America N.A. v. Florida Department of Revenue***
2nd Judicial Circuit (Leon County), Case No.: 2021 CA 1288
1st District Court of Appeal, Case No.: 1D24-0153
Amount in Controversy: $5,187,684
Issue: Tax calculation on loan renewals.

The case arises out of refund requests by the taxpayer. The taxpayer executed renewal loans with its customers. In some instances, the renewal was for the face amount of the original loan or less, but in some instances, the renewal was for an amount greater than the original loan. The taxpayer originally paid documentary stamp tax and intangibles tax on the full amount of all loans. The taxpayer filed refund claims arguing that the only portion of the renewal that is taxable is the amount of the renewal loan that exceeds the original loan amount. Parties completed mediation; however, no resolution was obtained.

Cases with an "*" are new cases that have not been reported in a prior version of the Handbook.

On December 19, 2023, the Circuit Court issued its Final Judgment for Plaintiff Bank of America, N.A. The Department timely appealed. Oral Argument was held on July 22, 2025. Parties are awaiting a decision.

### F. Insurance Premium Tax

***Genworth Life Insurance Company v. Florida Department of Revenue***
2nd Judicial Circuit (Leon County); Case No.: 2024 CA 001063
Amount in Controversy: $487,240.62, plus interest
Issue: Audit methodologies.

The Taxpayer is domiciled in Delaware and is authorized to write life, accident, and health insurance in Florida and throughout the United States. The Taxpayer disagrees with audit adjustments to the calculation of net premiums tax due on the Delaware side of the retaliatory tax calculation that disallowed the inclusion of guaranty fund association (GFA) credits based on the Florida GFA assessments that were paid by the Taxpayer. The Department believes that the proper GFA credits to be included on the Delaware side of the retaliatory tax calculation should be based on the Delaware GFA assessments that were paid by the Taxpayer. The Department's adjustments during informal protest resulted in the calculation of a refund amount of $246,268.38 that has not yet been refunded to the Taxpayer. The Taxpayer is claiming that it should instead receive a refund of $733,509.00 plus interest.

The Department was served on July 9, 2024. The Taxpayer filed a Motion for Summary Judgment on July 23, 2025.

### G. Motor Fuel Tax

***SEI Fuel Services, Inc. v. Florida Department of Revenue***
Division of Administrative Hearings, Case No.: 21-1403
1st District Court of Appeal. Case No.:1D22-3284;
2nd Judicial Circuit (Leon County), Case No.: 2024 CA 000797
1st District Court of Appeal, Case No.:1D24-2098
Amount in Controversy: $555,585 (refund) ($1,220,821.00 in interest)
Issue: Whether the taxpayer is due a refund of motor fuel taxes paid to specific vendors as the result of erroneous reporting on its return.

The taxpayer is a licensed terminal supplier of motor fuels who paid tax on certain purchases of motor fuels, both to its wholesale vendors and to the Department. The taxpayer sought a refund of the taxes paid to its wholesale vendors, which was denied due to Florida Statutes expressly prohibiting the refund of those taxes paid to wholesale vendors.

The case was referred to DOAH and the Final Order upheld the denial of the application for a refund of fuel tax. The taxpayer timely appealed and on February 14, 2024, the 1st DCA reversed and remanded holding for the taxpayer.

On May 21, 2024, the taxpayer filed a Writ of Mandamus with the 2nd Judicial Circuit Court seeking that the Department be ordered to pay statutory interest. On August 1, 2024, the Circuit Court issued a Final Order Granting the Department's Motion to Dismiss and Denying Plaintiff's Complaint for

Cases with an "*" are new cases that have not been reported in a prior version of the Handbook.

Writ of Mandamus. The Taxpayer appealed to the 1st DCA. Oral Arguments are scheduled for October 9, 2025.

### H. Sales and Use Tax

***27 Entrepreneurs Brickell LLC v. Florida Department of Revenue***
1st District Court of Appeal. Case No.: 1D24-1717
Amount in Controversy: $487,560.43
Issue: Timeliness of filings.

On June 11, 2024, the Department issued an Order Dismissing Petition with Prejudice because the Taxpayer's First Amended Petition and its Initial Petition were filed beyond the statutory jurisdictional deadline The taxpayer timely appealed the decision to the 1st DCA on July 8, 2024.

**** A+ Auto, Inc. v. Florida Department of Revenue***
1st District Court of Appeal. Case No.:1D24-2197
Amount in Controversy: $2,331,652.32
Issue: The Taxpayer appealed the Department's Order Dismissing Petition with Prejudice that was based on the decision that the Taxpayer's petition for administrative hearing was time-barred.

The Taxpayer is challenging a Sales and Use Tax audit. It asserts that the audit was not carried out according to law in that the only communication it claims to have received during the audit was a Demand to Appear letter and that it did not receive a Notice of Intent to Audit or the Notice of Proposed Assessment. On July 31, 2024, the Department issued an Order Dismissing Petition with Prejudice because the Petition was filed untimely. The Taxpayer timely appealed the decision to the 1st DCA.

***ADN Global, LLC v. Florida Department of Revenue***
1st District Court of Appeal. Case No.: 1D24-0471
Amount in Controversy: $228,419.10
Issue: Timeliness of filings.

On January 31, 2024, the Department issued an Order Dismissing Petition with Prejudice because the Taxpayer's petition was beyond the statutory jurisdictional deadline for filing.

On February 22, 2024, the Taxpayer filed a Notice of Appeal. Its Initial Brief asserts that DOR's Order dismissing the case was improper because their petition raised disputed issues of material fact as to the issuance and/or receipt of the NOD by the Taxpayer, however the brief fails to address the inconsistent allegations, and the bases stated in the Department's Order.

In a *per curiam* decision issued on July 9, 2025, the 1st DCA reversed the Department's Order and remanded the matter for an evidentiary hearing. The Department filed a Motion for Rehearing, Rehearing En Banc, Certification of a Question of Great Public Importance and Clarification on August 8, 2025. As of this writing, the parties are awaiting a ruling on the motion.

**** L and D Beauty Nail Supply, Inc. v. Department of Revenue***
Division of Administrative Hearings, Case No.: 25-2479
Amount in Controversy: $706,231.66
Issue: Unreported sales, export sales and exempt sales.

Cases with an "*" are new cases that have not been reported in a prior version of the Handbook.

Taxpayer contests this Sales and Use Tax audit assessment on their nail salon product and equipment wholesale sales business. Main issues concern unreported sales, export sales and exempt sales.

Discovery is ongoing.

***Miami British Corp v. Florida Department of Revenue***
11th Judicial Circuit (Miami-Dade County), Case No.: 23-021674-CA
Amount in Controversy: $510,247.53
Issue: Taxation of e-commerce.

The Taxpayer's Complaint asserts that it sells automotive parts through "e-marketplace platforms such as Amazon, Pay Pal and E-Bay." The Taxpayer asserts that proper credit was not given to Sales and Use Tax collected and remitted by the platforms and that the Department applied incorrect tax rates to out-of-state sales. Further, it objects to the Department's position that there are inconsistencies between the Taxpayer's Federal Income Tax returns, its financial statements, and its state sales tax returns.

A non-jury trial has been scheduled for November 10, 2025.

**** Miami Prime Catering and Food Services, Inc. v. Department of Revenue***
Division of Administrative Hearings, Case No.: 24-4601
Amount in Controversy: $317,553.89
Issue: The Taxpayer asserts business records were lost or damaged due to flooding and the assessment should be adjusted. It also asserts various sales were made to exempt organizations.

A final hearing is scheduled for September 10 and 11, 2025.

**** Orlando SMSA Limited Partnership v. Department of Revenue***
Division of Administrative Hearings, Case No.; 24-4234
Amount in Controversy: $2,665,514.13
Issue: Taxpayer, a wholly owned subsidiary of AT&T, is protesting a refund denial for various items, including county surtaxes, sales taxes on purchases of software, use taxes on services, use taxes on real property improvements, and use taxes on purchases.

The Final Hearing has been scheduled for January 20 to January 23, 2026.

***Seventy7, LLC v. Florida Department of Revenue***
Division of Administrative Hearings, Case No.: 23-3744 (audit); Case No.: 23-3951RU (rule challenge)
1st District Court of Appeal. Case No:1D25-0532 (rule challenge)
Amount in Controversy: $535,875.28
Issue: Assessment methodologies.

The Taxpayer operates a dance club and contests the assessment of additional sales and use tax related to the entrance fees it imposes to enter into a private room. It further contests the Department's assessment of sales and use tax under s. 212.031, F.S., as it relates to "Scrip Redemption" and involves the use of space by entertainers. The Taxpayer has filed an Unadopted Rule Challenge. The Taxpayer asserts that the Department has a policy that interprets s. 212.031,

Cases with an "*" are new cases that have not been reported in a prior version of the Handbook.

F.S., in a way that would require rulemaking. The Department increased the assessment from $181,714.71 to $535,875.28 during litigation due to additional documentation the Taxpayer was ordered to provide during discovery.

The audit challenge and the Rule Challenge were consolidated. A hearing was held, and a Recommended Order was issued on February 13, 2025. The same day, DOAH entered a final order denying the petition related to the unadopted rule challenge. The Taxpayer appealed the final order, an Initial Brief was filed on August 22, 2025. The court's final order in the assessment case is pending.

***West Boca Medical Center, Inc. v. Florida Department of Revenue***
2nd Judicial Circuit (Leon County), Case No.: 2023 CA 000232
1st District Court of Appeal. Case No.:1D2024-2887
Amount in Controversy: $506,859 (refund)
Issue: Sales and use tax refunds.

The taxpayer operates a hospital. It paid a vendor to provide specialized environmental cleaning services. The vendor's services meet the guidelines issued by federal, state, and local health departments for the purpose of reducing the spread of healthcare associated infections and protecting health. The taxpayer obtained an assignment of rights from its vendor in order to apply for this refund.

The Department denied the refund because it classifies the Taxpayer as a nonresidential cleaning service which is not exempt from taxation.

The parties have both filed motions for Summary Judgment. On October 11, 2024, the Court Granted the Department's Motion for Summary Judgment and denied the Taxpayer's Motion for Summary Judgment.

The Taxpayer timely appealed. The parties have filed their respective briefs and oral Argument has been set for September 9, 2025.

**** Wild Cargo Pets, Inc. v. Florida Department of Revenue and Jim Zingale, Executive Director, Florida Department of Revenue***
15th Judicial Circuit (Palm Beach County), Case No.; 50-2024-CA-004590
Amount in Controversy: $133,920.21
Issue: In contesting a Bank Levy, the Taxpayer challenges the underlying assessment that assessed Sales and Use Tax on various sales that the Taxpayer claims were exempt.

During the pendency of this action, a Suggestion of Bankruptcy has been raised. In re: Wild Cargo Pets, Inc., is being heard in the United States Bankruptcy Court for the Southern District of Florida (West Palm Beach Division), Case No. 24-18380-EPK. An evidentiary hearing has been scheduled in the Bankruptcy Court on October 16, 2025. Based on the bankruptcy court's ruling, the circuit court case may be reopened. The circuit court case is currently administratively closed.

Cases with an "*" are new cases that have not been reported in a prior version of the Handbook.

## RECENTLY CONCLUDED LITIGATION

### A. Ad Valorem Tax

***Pinellas County v. Joiner***
6th Judicial Circuit (Pasco County), Case No.: 2015-CA-1376; 2nd DCA, Case No.: 2D17-1040; Florida Supreme Court, Case No.: SC19-1819
Issue: County owned property; immunity from taxation.

Pinellas County owns 12,400 acres of property within Pasco County which consist of forests, grazing lands, environmental wetlands, lakes, wildlife habitats, and educational facilities. In the 1990s, the then-Pasco County Property Appraiser determined the land was immune from taxation; however, Pinellas County paid to Pasco County contributions in lieu of ad valorem taxes.

In 2014, Pasco County began assessing ad valorem tax on the property. In May 2015, Pinellas County filed suit against the Pasco County Property Appraiser seeking declaratory and injunctive relief and claiming that Pinellas County was immune from taxation on its property located within Pasco County. The trial court found that the property was immune from taxation. The 2nd DCA reversed, holding that a county's immunity from taxation does not extend to property located in another county. The Florida Supreme Court issued an opinion on June 27, 2024, holding that sovereign immunity did not shield the county from the obligation of paying ad valorem taxes for property owned by that county but located outside its territorial boundaries.

***Tampa Port Authority v. Henriquez***
13th Judicial Circuit (Hillsborough County), Consolidated Case Nos.: 2015-CA-004485; 2015-CA-011042; 2016-CA-011070; 2017-CA-010850; 2018-CA-011746; 2019-CA-012333; 2nd DCA, Case No.: 2D20-2605, 377 So. 3d 187, corrected opinion December 29, 2023.
Issue: Standing; Timeliness of property appraiser's amended complaint.

The property appraiser challenged exemptions granted by the VAB for the 2014 tax year and several separate lawsuits filed by Gulf Marine to set aside assessments on the property in subsequent tax years. The property appraiser challenged the 2014 VAB decision, naming Gulf Marine as a defendant but not the Port Authority. The circuit court later permitted the property appraiser to amend his complaint to add the Port Authority as a defendant.

On appeal, the Port Authority argued that the property appraiser lacked standing for the suit in circuit court and that the property appraiser did not timely add the Port Authority as a defendant, and for that reason the suit should have been dismissed with prejudice. Regarding the standing argument, the DCA determined that the issue was waived because it was not raised when the case was being handled by the circuit court. As for the timing of the property appraiser's amending of the complaint, the DCA reasoned that the time limit in s. 193.122(4), F.S., which governed the property appraiser's suit in the lower court, contains no language establishing it as a statute of nonclaim or imposing a jurisdictional bar to application of the relation-back rule. Further, the DCA stated that the relation-back rule could apply to the amended complaint because the new and former parties (i.e., Gulf Marine and the Port Authority) shared an identity of interests in the exemption issues. Therefore, the amendment related back to the timely initial complaint, and the property appraiser properly added the Port Authority as a party.

Cases with an "*" are new cases that have not been reported in a prior version of the Handbook.

## B. Corporate Income Tax

***Billmatrix Corp, et al vs. Florida Department of Revenue***
2nd Judicial Circuit (Leon County), Case No.: 2020-CA-0435
1st District Court of Appeal, Case No.: 1D23-1920
Amount in Controversy: $4,360,433 (assessment); $271,503 (refund claim)
Issue: Location of income-generating activity.

This consolidated case involves six audits for the various named plaintiffs/taxpayers. The taxpayers generally provide payment processing, software, and related services. The Department conducted routine audits of the taxpayers and assessed them corporate income tax for the period 2015 through 2017.

Taxpayers argue that the Department improperly found that the taxpayers' income producing activity was performed within Florida. The taxpayers contend that their income producing activities which gave rise to the sales subject to the proposed assessments are not performed wholly in Florida and therefore are not subject to Florida corporate income tax.

On March 1, 2023, the Circuit Court granted Taxpayers' Motion for Summary Judgment. On July 11, 2023, the Circuit Court granted the Department's Motion for Compulsory Judicial Notice, granted in part and denied in part the Department's Motion to Dismiss for Lack of Subject Matter Jurisdiction, and denied Taxpayers' Motion for Alternative Security Arrangement. The Taxpayers appealed. The 1st DCA denied a motion for oral argument.

On November 15, 2024, in a *per curiam* decision, the 1st DCA affirmed the Circuit Court's mixed decision. The 1st DCA denied the Taxpayer's Motion for En Banc Hearing on January 29, 2025. The 1st DCA issued its mandate on February 17, 2025.

***Fiserv Par, Inc. v. Florida Department of Revenue***
2nd Judicial Circuit (Leon County), Case No.: 2022 CA 605
1st District Court of Appeal. Case No.: 1D23-1968
Amount in Controversy: $113,006
Issue: Location of income-generating activity.

This case centers on whether the Department used the proper methodology to assess corporate income tax on the income the taxpayer derived from its transaction processing services. The taxpayer contends that the Department erred because its income producing activities are not performed wholly within Florida.The trial court granted the Department's Motion for Compulsory Judicial Notice and Motion to Dismiss for Lack of Subject Matter Jurisdiction.

The case was appealed to the 1st DCA. On November 25, 2024, in a *per curiam* decision, the 1st DCA affirmed the Circuit Court's decision. The 1st DCA denied the Taxpayer's motion for En Banc Rehearing and Certification.

Cases with an "*" are new cases that have not been reported in a prior version of the Handbook.

***HCA Healthcare Inc v. Florida Department of Revenue***
2nd Judicial Circuit (Leon County); Case No.: 2024 CA 278
Amount in Controversy: $13,813,508.63 (audit), $30,246,475.00 (refunds)
Issues:
(1) Whether investment income was correctly reclassified as business income?
(2) Whether an adjustment made for tax exempt interest is correct?
(3) Whether the disallowance of certain federal wage credits and limiting the amount of other wage credits claimed is correct?
(4) Whether the exclusion of management fees and payments received from partnerships (income from staffing) from the sales factor is correct?
(5) Whether one of Taxpayer's subsidiaries should be classified as a financial organization, and its loans included in the denominator property factor?
(6) Whether refunds for 2018 and 2020 were improperly offset for the automatic refund provided in s. 220.1105, F.S.

The Department was served on June 18, 2024. In November 2024, the parties reached an amicable resolution, and the Taxpayer voluntarily dismissed its complaint.

***Microsoft Corporation v. Florida Department of Revenue***
2nd Judicial Circuit (Leon County); Case No.: 2024 CA 000213
Amount in Controversy: $9,078,639.44

Issues:
(1) Whether the income Taxpayer derives from its numerous products and services qualify to be sourced using a cost of performance methodology?
(2) Taxpayer argues that the Department made "other adjustments," including adjustments to its net operating loss carryover (NOLCO) and Florida payroll factor.

On July 8, 2024, the Circuit Court issued an Agreed Order staying the case so that the parties can continue to work towards achieving a global resolution of all the issues. In May 2025, the parties reached an amicable resolution, and the Taxpayer voluntarily dismissed its complaint.

***Verizon Communications, Inc. v. Florida Department of Revenue***
2nd Judicial Circuit (Leon County), Case No.: 2018-CA-001543
1st District Court of Appeal. Case No.:1D22-2094 and 1D22-2096
Florida Supreme Court, Case No.: SC2024-0737
Amount in Controversy: $1,304,901
Issue: Whether statutory laches (s. 95.011(6), F.S.) and the statute of nonclaim (s. 215.26, F.S.) prevent Verizon from seeking income tax refunds based upon NOLs incurred before 2000?

The circuit court determined that Florida did not adopt the Federal mitigation provisions and that the Florida statute of nonclaim (s. 215.26, F.S.) is a jurisdictional bar to Verizon's refund requests because it is undisputed that Verizon did not file timely refund applications in accordance with that statute.

The 1st DCA upheld the Circuit Court decision. The 1st DCA denied Verizon's Motion for Rehearing or certifying question to send to the Florida Supreme Court. On May 17, 2024, Verizon filed a Notice to Invoke Discretionary Jurisdiction with the Florida Supreme Court. On August 28, 2024, the

Cases with an "*" are new cases that have not been reported in a prior version of the Handbook.

Florida Supreme Court denied Verizon's jurisdictional briefs and advised that no motion for rehearing would be entertained.

### C. Sales and Use Tax

***Children's World Inc. v. Florida Department of Revenue***
***Genius Kids, LLC v. Florida Department of Revenue***
Division of Administrative Hearings; Case No.: 24-001403 (the two cases are consolidated and are using the lower case's number)
Issue: Exemption of sales or leases to state tax-supported schools.

The Taxpayers' petitions provide that they are for-profit corporations engaged in the business of providing educational services to children in Florida. They assert that they applied for Certificate(s) of Exemption under s. 212.08(7)(o), F.S., as they contend that they are state tax-supported schools because they receive funding from the State of Florida pursuant to the School Readiness Program via the Early Learning Coalition.

The Department issued a Final Order on February 11, 2025, adopting the Recommended Order of the Administrative Law Judge that the Department deny each of the Taxpayers' applications for an exemption.

***International Bonded Couriers v. Florida Department of Revenue***
DOAH, Case No.: 20-4221RU
1st District Court of Appeal. Case No.:1D23-0780
Issue: Freight forwarding.

Florida businesses have begun acting as "freight forwarders" for international purchasers, whereby the purchaser will make a remote purchase and have the property delivered to the freight forwarder in Florida. The freight forwarder will receive the tangible personal property from the seller, prepare the property for shipment, and export the property from Florida to the purchaser, primarily located in the Caribbean and South America.

Many of these freight forwarders were able to obtain individual zip codes from the United States Postal Service, which allowed them to be easily identified. For several years, the Florida Department of Revenue maintained a database with these individualized zip codes to alert the seller that a sale delivered to that zip code should not include tax, as that was a sale for export from Florida.

The Legislature has passed legislation outlining a statutory procedure for documenting these types of sales, and the Department of Revenue has stopped providing the database due to administrative issues.

International Bonded Couriers (IBC) initiated litigation claiming that the Department's action in ceasing to provide the database was an unpromulgated rule. The final hearing was held on December 12, 2022, and DOAH entered a final order on March 7, 2023, finding the case to be moot.

IBC appealed to the 1st District Court of Appeal. In a *per curiam* decision issued on June 6, 2024, the 1st DCA affirmed the Final Order.

Cases with an "*" are new cases that have not been reported in a prior version of the Handbook.

## SIGNIFICANT LITIGATION AFFECTING REVENUES

***Mist Technologies of Southwest Florida, LLC v. Florida Department of Revenue***
Division of Administrative Hearings; Case No.: 24-2722
Amount in Controversy: $176,781.58
Issue: Taxation of certain services.

The Taxpayer sells and installs misting systems. The Taxpayer provides pest control products and services for the control of mosquitoes to commercial and residential customers. The Taxpayer asserts the installation of its systems would most accurately be classified as real property improvements instead of installation of Tangible Personal Property as it says the Department determined. It objects to the Department disallowing certain exempt sales. The Taxpayer's petition describes a situation where a former employee made various accounting and recordkeeping mistakes and that the Department ignored the Taxpayer's corrected data.

The case was referred to DOAH on July 22, 2024. In September 2024, the parties amicably settled and the Taxpayer voluntarily dismissed its Petition.

***New Cingular Wireless PCS, LLC v. Florida Department of Revenue***
Division of Administrative Hearings; Case No.: 24-2560
Amount in Controversy: $3,219,838.97 (refund)
Issue: Sales and use tax refunds.

The Taxpayer is a provider of wireless communication equipment and sells wireless devices and contracts for wireless service. It contests the denial of its refund application for sales and use tax. The refund deals with sales and use tax paid on handheld devices that were returned under the Taxpayer's "turn-in" program. Taxpayer asserts that the "turn-in" transactions should be subject to a refund of sales and use tax because the devices were sold as part of a credit sale.

The case was referred to DOAH on July 11, 2024. On January 14, 2025, DOAH relinquished jurisdiction to the Department. After the DOAH case closed, Taxpayer voluntarily withdrew its Petition.

***Nike Retail Services, Inc. v. Florida Department of Revenue***
Division of Administrative Hearings; Case No.: 24-2563
Amount in Controversy: $1,938,621.81
Issue: Assessment methodologies.

The Taxpayer operates retail stores in Florida. The Taxpayer was assessed sales and use tax in various exhibits. It is contesting the assessment of taxable store sales returns, taxable store sales and exempt store sales, as well as the Department's methodology for the calculation of the assessment. The Taxpayer believes that its self-audit review for the audit period is accurate.

The case was referred to DOAH on July 11, 2024. In November 2024, the parties amicably settled this matter.

***Noveed Food Mart, Inc. v. Florida Department of Revenue***
11th Judicial Circuit (Miami Dade County); Case No.: 2023-024864-CA
Amount in Controversy: $131,738.54
Issue: Sales and use tax collection.

Cases with an "*" are new cases that have not been reported in a prior version of the Handbook.

The Taxpayer challenges a Notice of Intent to Levy issued by the Department against the Taxpayer on October 9, 2023. The Complaint challenges the amount that the Department contends is due. On December 7, 2023, the Department filed a Motion to Dismiss arguing among other things, that an attempt to contest the basis of the Notice of Intent to Levy (an audit assessment) is now time barred and that the Taxpayer failed to tender the contested sum into the court registry.

On September 23, 2024, the Court granted the Department's Motion to Dismiss.

***Oracle America, Inc. v. Florida Department of Revenue***
Division of Administrative Hearings. Case No.: 22-1053
1st District Court of Appeal. Case No.: 1D23-0987 (consolidated with 1D23-1075 and 1D23-1077)
Amount in Controversy: $739,145 (refund)
Issue: Sales and use tax refunds.

For all three consolidated cases, the same facts are present. Oracle sells electronically-delivered software, hardware (tangible personal property), and maintenance agreements to its customers in furtherance of its various services. Oracle charged SUT on the total sales price and remitted same to the State. Asserting that electronically-delivered software was not taxable, customers requested refunds from Oracle of SUT paid for those portions of their purchases. Oracle subsequently applied to DOR for refunds. The Department denied the refunds based on Oracle failing to first refund the SUT to its customer.

DOAH's Recommended Order (adopted in full by the Department's Final Order) held that the totality of the evidence established that the software sold by Oracle was sold independently of any hardware, was completely optional on the customer's behalf, and was delivered exclusively by electronic means. However, the refund denial was sustained because Oracle failed to first refund the SUT to its customer.

Oracle appealed to the First District Court of Appeal. The three Oracle matters were consolidated at the DCA. In a written decision issued on December 4, 2024, the 1st DCA affirmed the Department's Final Orders.

Cases with an "*" are new cases that have not been reported in a prior version of the Handbook.

DOAA
Georgia Department
of Audits & Accounts

**Greg S. Griffin**
State Auditor

January 12, 2026

The Honorable Brian P. Kemp, Governor
The Honorable Burt Jones, Lieutenant Governor
The Honorable Jon Burns, Speaker of the House of Representatives
Members of the General Assembly

Ladies and Gentlemen:

I am pleased to submit to you the Georgia Tax Expenditure Report for FY 2027 prepared by Georgia State University on behalf of the Department of Audits and Accounts. This report was prepared for inclusion in the Governor's Budget Report as required by Georgia Code §45-12-75. A copy of this report will be made available to the public on the Governor's Office of Planning and Budget's website and is also filed as a permanent record with the State Auditor.

This report provides a comprehensive listing of the State's statutory tax provisions ("tax expenditures") that allow preferential tax treatment of certain types of taxpayers or activities. Although not direct government expenditures, tax expenditures represent an allocation of government resources in the form of taxes that could have been collected (and appropriated) if not for their preferential tax treatment. To the extent possible, the dollar value of each tax expenditure has been included in this report. It is important to note, however, that data for numerous tax expenditures is not captured by the Department of Revenue. In these instances, the lack of available information is either noted or an estimate, if possible, is provided. The data included in this report has not been verified or validated by the Department of Audits and Accounts and no opinion or other form of assurance is expressed in this data.

We appreciate the staff of the Georgia State University Fiscal Research Center for preparing this report.

Respectfully Submitted,

Greg S. Griffin
State Auditor

# Georgia Tax Expenditure Report for FY 2027

Prepared by the Fiscal Research Center of the Andrew Young School of Policy Studies at Georgia State University

**January 2026**

Funding for this project was provided by the Georgia Department of Audits and Accounts. We would like to thank the Georgia Department of Revenue and the Georgia Office of Insurance and Safety Fire Commissioner for their contributions to the preparation of this report. Lastly, we would like to thank the Georgia Department of Audits and Accounts for their comments and recommendations. All estimates presented in this report are the work of the Fiscal Research Center. We are solely responsible for its contents.

## Introduction

Tax expenditures are provisions in the tax code that allow for special treatment of a source of income or a certain type of expense. Such treatment usually results in a reduction in tax liability for the taxpayer. In principle, these tax benefits could be provided by direct appropriation, thus these provisions are referred to as "expenditures". They represent tax revenues that would have been otherwise generated if not for this preferential treatment in the tax code.

Like direct government expenditures, tax expenditures are an allocation of government revenue that are intended to achieve a particular policy outcome or encourage some activity. The value of a tax expenditure can be thought of as representing the amount of money that would be necessary to provide the same level of financial support in the form of a government grant instead of through the tax code. Tax expenditures are received by businesses and individual taxpayers and are present in all of Georgia's major taxes, including the individual income tax, corporate income tax, and sales tax.

Tax expenditures, also referred to as tax preference items, can take several forms. Many are structured as tax credits and deductions, such as the corporate credit for hiring a new worker or the individual deduction for the mortgage interest paid on a primary residence. Other expenditures are in the form of exclusions of income. For example, at the state level, individuals in Georgia can exclude the value of Social Security benefits from the calculation of Georgia taxable income. Lastly, some tax expenditures may be provided in the form of reduced rates for selected taxable transactions, such as the reduced title ad valorem tax for rental vehicles and certain vehicle title transfers.

### Tax Expenditure Report

Preparation of a tax expenditure report is required by the Official Code of Georgia Annotated §45-12-75. The purpose of the report is to list all tax expenditures and their value. In this way, these items can be tracked over time in a fashion analogous to a budget of direct governmental expenditures.

While direct expenditures for such items as education or transportation are reviewed annually with every budget, tax expenditures are often not subject to such periodic review. It is important to monitor the value associated with these provisions as they are a reduction in tax revenue and their presence results in special treatment for some taxpayers relative to others. For example, the state government supports education through direct expenditure programs and through HOPE scholarships but also allows a tax deduction for certain educational expenses borne by the taxpayer or paid by an employer. Both the direct expenditure and the tax expenditure represent an allocation of government resources toward education, but only the direct expenditures are listed in an annual budget.

Leaving tax expenditures out of the annual budgetary review process creates two types of distortions. First, it under-represents the amount of government resources allocated for a given

purpose. Second, it incorrectly represents the distribution of the benefits of government expenditures. The benefits of tax expenditure provisions are usually targeted to higher income taxpayers compared to direct expenditure programs, so that the absence of tax expenditures in the overall analysis may lead to the conclusion that government resources are targeted toward less affluent taxpayers. In addition, not all tax expenditure programs have a direct budgetary counterpart, thus without a tax expenditure report, these provisions and their distributional effects escape notice.

The presence of tax expenditures is not necessarily bad tax policy. However, not recognizing or monitoring the resources allocated through the tax system is not good fiscal policy. Through this report, we hope to provide a consolidated listing of government resources provided through this means. This report does not, however, provide any information on how effective the provision may be in terms of fulfilling its purpose. For instance, while the value of the Research and Development (R&D) credit may be reported annually in the tax expenditure report, there is no accompanying analysis to determine the extent to which more research activities have been undertaken due to the presence of the special provision.

**Identifying Tax Expenditures**

In most cases, identifying a tax expenditure is straightforward. Tax expenditures are deviations or special exceptions from the generally defined tax base, sometimes referred to as the normal tax base or the reference tax base. However, there may be disagreement as to what constitutes the normal or reference tax base. Even at the federal level, the list of tax expenditure items included by the Administration differs from the list estimated by Congress because each works from a different definition of the standard tax base. The appropriate norm against which tax expenditures are defined is somewhat subjective and may, in some cases, be driven by the intent of the policy underlying the legislation. For example, one would not consider the difference between the current top income tax rate of 5.75 percent and the tax rate of 1 percent a tax expenditure.

Tax credits and deductions for certain types of activities, such as the jobs tax credit or the low-income housing credit, are always classified as tax expenditures. This is also the case for items that are taxed at a reduced rate. In addition, specific exclusions from the tax base are, in most cases, considered tax expenditures. Because the Georgia individual and corporate tax systems are both tied to the federal individual and corporate bases, exclusions or deductions at the federal level apply to the state tax base as well. In some cases, Georgia chooses not to conform to federal provisions, such as the Section 199 deduction for domestic production activities. In these cases, we do not include the provision as a tax expenditure. It is also important to note that tax expenditures are not computed for revenue that is due but not collected.

There are instances when it is unclear whether a given tax provision should be listed as a tax expenditure. This is because it is unclear what constitutes the general rule, and therefore, it is

sometimes difficult to determine which provisions are exceptions to that rule. Consider the individual income tax exemption. Individuals are allowed to exclude an amount of income for each taxpayer included on the return, but this exemption of income is not considered a tax expenditure by all states. Another example is the provision allowing for the use of a single-factor apportionment formula in allocating income earned by corporations operating in more than one state. Because the general rule of the single-factor apportionment formula has been established at the state level, only deviations from that rule would be listed as a tax expenditure. Alternatively, if one considers the status-quo method of apportionment to be the equally weighted three-factor apportionment formula, any deviation from that rule, such as the double-weighted three-factor or single-factor apportionment formula, would be reported as a tax expenditure. This sort of problematic classification of tax expenditures also applies to the taxation of services under the state sales tax. Because state legislation refers to the purchase of tangible goods, the exclusion of services from the base may not be seen as a deviation from the general rule. On the other hand, if it is really the intent of the general rule to tax all consumption, then the exclusions provided to the consumption of services should be listed as a tax expenditure. In this report we attempt to incorporate as comprehensive a definition as possible.

Defining a tax expenditure in the case of the sales tax requires particular discussion. Because there is no federal sales tax, there is no list of federal sales tax expenditures to use as a starting point. For this report, we use the state tax statute as the basis for identifying sales tax expenditures. Therefore, if an exemption specifically exists in the state statute, it is listed as a sales tax expenditure. This has the advantage of being a very straightforward and non-subjective rule to apply. As a second advantage, this method provides a comprehensive list of all statutory exemptions allowing for comparison between provisions affecting taxpayers and industries.

This rule has the disadvantage of identifying many sales tax provisions as tax expenditures that would not be identified as tax expenditures under the rule of good tax policy. This is particularly true in the case of business inputs. There are several business inputs, such as the exemption for inputs used in manufacturing, which are listed in this report as tax expenditures but are not activities that would be included in the tax base if the base were defined using the best economic principles. When business inputs are included in the sales tax base, those inputs are taxed and the tax is included in the price when the input is sold to the next stage of production. The more these inputs are taxed at the intermediate stages of production, the more tax is embedded in the price of the final good. This embedded tax distorts prices and influences economic decisions. Therefore, it is important to understand that while some business exemptions are listed as tax expenditures in this report, policymakers may find it helpful to distinguish the business inputs from tax expenditures that are provided for more societal reasons, such as the tax exemption for public school lunches or for the sale of food for off-premises consumption. To aid policy makers, this report identifies in the appendix the sales tax expenditure provisions that are considered business inputs.

**Tax Expenditures vs. Revenue Estimates**

The estimate associated with a tax expenditure provision does not necessarily represent the revenue that would be gained from the repeal of the enabling legislation. Instead, the cost of the tax expenditure represents the value of the deduction or credit taken via the particular provision by itself, without consideration of potential interactions with other provisions. Although the presence of one provision may interact with the use of another provision, tax expenditures are estimated as independent provisions. For instance, if the federal research and development tax credit were repealed, federal revenues would not increase by the amount of the federal tax expenditure estimate but by a smaller amount. This is because some of the research expenditures claimed through the federal tax credit would be shifted over to another tax deduction or credit so that the savings to the government would be less than the value of the tax expenditure estimate. In addition, tax expenditure estimates do not incorporate behavioral effects that may occur due to the elimination of a provision. For instance, the tax expenditure estimate associated with the deduction for charitable giving is based on a current level of charitable contributions. If the deduction for charitable contributions were proposed to be eliminated, the revenue effect presented in the fiscal note would incorporate both the initial value of charitable contributions from the tax expenditure estimate and a timing effect that would result from people speeding up their level of contributions in response to the future loss of the deduction. Thus, tax expenditure estimates can only act as a preliminary indication of the revenue effect that would occur if the provision were eliminated or modified.

**Data Sources and Reliability of Estimates**

To the extent possible, data from the Georgia Department of Revenue (DOR) is used to estimate the expenditures included in this report. Unfortunately, the required information is not always collected or available. When it is not, other data sources, such as information from the U.S. Census Bureau, the U.S. Bureau of Economic Analysis, or the U.S. Bureau of Labor Statistics, are used. Every effort is made to provide reliable, well supported estimates of the provisions. Because of the time lag in processing income tax returns, the most recent data available from the Georgia DOR was calendar year (CY) 2023. Therefore, even in cases in which the Georgia DOR data is used as the primary data source, the tax expenditure costs presented in this report are estimates.

Two subjective measures of reliability are provided in this report: the estimate reliability and the data reliability. The reliability of both the estimate and data are categorized into three classes: A, B, and C. Class A estimates and data sources are considered the most reliable. Data sources with a Class A status consist of data from the federal statistical agencies or from the Georgia DOR. Estimates with a Class A status are typically those estimates that are based on Class A data that is particularly applicable to the expenditure provision. For instance, most of the state business tax credit expenditures are listed as Class A estimates. They are based on tax credit data provided by the Georgia DOR that specifically addresses or measures the tax expenditure provision. On the

other hand, most sales tax estimates are given a Class B status. While these provisions may be based on Class A data sources, such as the Economic Census or the Consumer Expenditure Survey from the Bureau of Labor Statistics, the data may only be available at a national level, or the data may refer to more activities than is covered by the tax expenditure provision. In these cases, the data must be adjusted to represent the specific activity associated with the expenditure provision and scaled down to represent the value of the activity within Georgia. Class C estimates are believed to provide reasonable estimates and are based on the best data available. For some items, no reliable information is available. In these cases, no estimate for the expenditure is provided.

| Class of Estimate/Class of Data | Description of Estimate Reliability | Examples of Data Sources by Reliability Status |
|---|---|---|
| Class A | Based on data specifically related to the tax expenditure provision and to Georgia taxpayers | Data from Department of Revenue, Bureau of Labor Statistics Consumer Expenditure Survey, Bureau of Economic Analysis, U.S. Census Bureau datasets |
| Class B | Based on national data which has been modified to represent Georgia and the specific tax activity covered by the expenditure | Industry surveys and trade magazines, most proprietary information |
| Class C | Represents best available estimate at this time | Newspaper articles, secondary sources |

**Local Government Effects**

In addition to the state estimates, this report attempts, where possible, to estimate the effects on local government revenues. There are many state exemptions that have local ramifications, such as numerous exemptions from the sales tax base. The local estimates that are provided represent the aggregate value of the exemptions that would accrue to the counties, municipalities, school districts, and special service districts, including tax allocation and community improvement districts.

**Consistency with prior estimates**

The current report, prepared for FY 2027, presents estimates for FY 2025-FY 2027. The report for FY 2026 provided estimates for FY 2024-FY 2026. In most cases, the estimates between the current and past reports are consistent, with the latest report continuing the same trend in the value of the estimates that was established in earlier reports. On the other hand, there are some cases in which estimates presented in the FY 2027 report differ significantly from those presented in the past reports. This usually occurs because new information has become available

or because a new forecast of economic activity is relied upon to predict future values. The updated estimates are included in the current report and any major inconsistency with prior reports is noted in the discussion relating to the expenditure.

**Outline of the Report**

The report continues with a summary table containing a title of each tax expenditure provision, the tax base it is associated with, the type of expenditure, and the estimated values for FY 2025-27 for all tax expenditures identified in the report. Provisions that are assigned a positive value denote an expenditure that is estimated to reduce state or local revenues. Provisions assigned a value of "(m)" denote a tax expenditure that is estimated to reduce state revenues by less than $1 million. Provisions assigned a negative value denote a positive tax expenditure that is estimated to increase state revenues. Provisions assigned a value of "(-m)" denote a tax expenditure that is estimated to increase state revenues by less than $1 million.

In addition to an identifying title, each expenditure provision is assigned an expenditure number, the first digit of which corresponds to the different sections of this report, such as 1 for the individual income tax and 5 for the insurance premium tax. The remaining portion of the numeric identifier is used to divide the expenditures into different subcategories such as federal and state expenditures, and deductions and credits. Only in the case of the sales tax exemptions does the expenditure number have any relationship to the state tax code section to which the expenditure item is associated. The numeric identifiers for each provision are consistent across tax expenditure reports and can be used to compare expenditure estimates from one report to the next.

Following the summary tables are detailed sections for each of the specific taxes covered in this report. These detailed sections begin with a brief description of the tax, latest figures on revenue collection and any information on recent modifications to the base. These detailed sections also include additional information for each of the expenditure items such as the statute number, the year in which the expenditure provision was enacted and the year in which it became effective, information on the data and estimate reliability and data source, a more detailed description of the tax expenditure provision, and the value of the expenditure provision. The report concludes with an appendix that includes tables listing recently expired provisions, sales and use tax expenditures by type, and distributional analysis for a selected number of income tax provisions.

## Summary of State Tax Expenditures

| Expenditure | Summary | Tax | Type of Expenditure | State FY 2025 | State FY 2026 | State FY 2027 |
|---|---|---|---|---|---|---|
| | | | | *(in Millions)* | | |
| **Federal Income Tax Provisions**[1] | | | | | | |
| 1.1.001 | Exclusion of employee meals and lodging | Federal Individual Income Tax | Exclusion | 78 | 79 | 80 |
| 1.1.002 | Exclusion of housing allowances for ministers | Federal Individual Income Tax | Exclusion | 8 | 9 | 9 |
| 1.1.003 | Exclusion of employer-provided child care | Federal Individual Income Tax | Exclusion | 21 | 22 | 23 |
| 1.1.004 | Exclusion of employee awards | Federal Individual Income Tax | Exclusion | 4 | 4 | 4 |
| 1.1.005 | Exclusion of employer contributions and earnings to pension plans including Keoghs, defined benefit and defined contribution plans | Federal Individual Income Tax | Exclusion | 2,828 | 3,131 | 3,607 |
| 1.1.006 | Exclusion of employer contributions for health care, health insurance premiums and long-term care insurance premiums | Federal Individual Income Tax | Exclusion | 1,656 | 1,720 | 1,772 |
| 1.1.007 | Exclusion of employer-paid accident and disability premiums | Federal Individual Income Tax | Exclusion | 48 | 52 | 56 |

[1] These are Internal Revenue Code (IRC) provisions adopted by Georgia as part of its personal and corporate income tax.

# 1. Individual Income Tax

The individual income tax was first levied in Georgia in 1929 at a rate equal to one-third the federal rate of income taxation. The rate structure effective January 1, 2019, and until January 1, 2024, included six brackets, ranging from 1 percent to 5.75 percent, with bracket thresholds depending on filing status. Prior to 2019, the rate structure had a top rate of 6 percent and had remained unchanged since 1955 when the 7 percent rate on taxable incomes over $20,000 was eliminated. Effective January 1, 2024, the bracket structure was replaced by a single rate of 5.49 percent, though legislation enacted in 2024 reduced that rate to 5.39 percent, retroactive to the beginning of the year. Subsequent legislation in 2025 reduced the flat rate further, to 5.19 percent, effective January 1, 2025.

The law also provides for triggered reductions in the flat rate by 10 basis points each year that certain conditions are met, until the rate reaches 4.99 percent. The conditions that must be met for such automatic rate reductions are 1) the Governor's budget projects revenues grow by at least 3 percent from the then-current fiscal year—i.e., the amended fiscal year estimate—to the subsequent fiscal year, 2) the prior fiscal year's reported net revenues were no less than any of the preceding three years, and 3) the revenue shortfall reserve contains an amount at least equivalent to the potential reduction in income taxes resulting from the rate decrease.

The initial base of the Georgia individual income tax is the taxpayer's federal adjusted gross income (AGI). Several adjustments are made to this starting point to arrive at the version of AGI adopted by Georgia. After computing the Georgia version of AGI, taxpayers deduct an amount representing either the value of their Georgia itemized deductions or the Georgia standard deduction. Effective January 1, 2024, taxpayers that opt to itemize nonbusiness deductions will be allowed a $300 per taxpayer credit. For nonitemizers the following tables summarize the current and previous deductions authorized under the Georgia code:

**Allowable Standard Deductions**

| | Prior to January 1, 2024 | Effective January 1, 2024 |
|---|---|---|
| Married Filing Jointly | $7,100 | $24,000 |
| Single/Head of Household | $5,400 | $12,000 |

**Dependent Exemption**

| | Prior to January 1, 2024 | Effective January 1, 2024 |
|---|---|---|
| Married Filing Jointly | $3,000 | $4,000 |
| Single/Head of Household | $3,000 | $4,000 |

**Personal Exemption**

| | Prior to January 1, 2024 | Effective January 1, 2024 |
|---|---|---|
| Married Filing Jointly | $7,400 | $0 |
| Married Filing Separately | $3,700 | $0 |
| Single Head of Household | $2,700 | $0 |

The tax is administered by the Georgia DOR. Individual income tax collections equaled $16.02 billion in FY 2024 and accounted for 48.4 percent of Georgia's revenues from taxation. In CY 2023, 5.3 million individual state returns were processed. While predominately paid by individuals, a significant number of business entities are organized so that income associated with these enterprises is reported through the individual income tax. All revenue collected from the individual income tax is deposited in the State General Fund.

It is important to keep in mind that tax expenditure estimates may differ from revenue estimates presented in fiscal notes. Estimates included in fiscal notes incorporate behavioral effects that are not considered when estimating tax expenditure provisions. The purpose of a tax expenditure estimate is to convey the cost that would be necessary if the item were offered as a direct budgetary expenditure instead of a reduction in the tax liability. A second caveat concerns the estimates associated with the state individual income tax credit provisions. Forecasting the value of the revenue loss stemming from the use of these credits is problematic because of the presence of extensive carryforwards in the case of some credits. Because of past credit carryforwards, taxpayers may claim credits on current or future year tax returns that were created in prior years. In some cases, the credit may have expired such that taxpayers are no longer able to create new credits, but the revenue loss to the state continues for several years until all carryforward liabilities have been exhausted. Therefore, the estimates provided in this report should be interpreted as the expected revenue loss stemming from the use of currently created or previously created credits and not an estimate of the value of credits created in a given year.

The Tax Expenditure Report includes the expenditures associated with both state and federal tax provisions. Because the Georgia individual income tax is based on the federal system, expenditures that are present at the federal level have revenue implications at the state level. For example, changes to itemized deductions by the federal government have repercussions on state tax revenues. The value of the expenditure as it relates to state taxes paid by those filing a Georgia return is presented in section 1.1 on federal exclusions. In some cases, Georgia might not adopt a federal provision. In that case, the expenditure is not listed because there is no loss of revenue to the state. In general, the value of the federal tax expenditure to the state of Georgia is determined by allocating a portion of the federal tax base associated with the expenditure estimate as estimated by the Joint Committee on Taxation for the U.S. Congress. The data and estimate reliability for the conformity provisions are considered class A. In some cases, however, the values of the Georgia estimates are highly sensitive to the assumptions made concerning the appropriate tax rate for a given expenditure provision and the allocation factor that is used to determine the amount of federal activity associated with Georgia. The estimates associated with the federal conformity provisions are based on current law as it existed on January 1, 2024; any changes to provisions that may occur because of federal legislative action after that date are not reflected in the estimates.

The explanations of the federal conformity provisions are taken from *Tax Expenditures: Compendium of Background Material on Individual Provisions*, prepared by the Congressional

Research Service for the U.S. Senate Committee on the Budget, December 2024. Estimates of the federal provisions generally rely on the U.S. Congress Joint Committee on Taxation's *Estimates of Federal Tax Expenditures for Fiscal Years 2024-2028*, published December 7, 2024.

## 1.1 Federal Exclusions

**1.1.001** Exclusion of employee meals and lodging

Federal Statute IRC section 119 and 132(e)(2)

**Description:** Employees are allowed to exclude the fair market value of meals and lodging furnished by employers if provided on the employer's premises for the convenience of the employer.

| | State Fiscal Years ($ in Millions) | | |

| | 2025 | 2026 | 2027 |
| State Tax Expenditure | 1 | 1 | 1 |

(m) Denotes a value of less than $1 million

**1.3.004** Special rules for mining reclamation reserves

Federal Statute IRC Sections 468 and 1274

**Description:** Electing taxpayers may deduct the current value equivalent of certain estimated future reclamation and closing costs for mining and solid waste disposal sites.

| | State Fiscal Years ($ in Millions) | | |
|---|---|---|---|
| | 2025 | 2026 | 2027 |
| State Tax Expenditure | (m) | (m) | (m) |

(m) Denotes a value of less than $1 million

**1.3.005** Cash accounting, for certain businesses

Federal Statute IRC Sections 446 and 448

**Description:** The cash method of accounting may be used by any business taxpayer that is not a tax shelter and falls into at least one of three specified categories. These are farming businesses, qualified personal service corporations, and entities that meet a gross receipts test.

| | State Fiscal Years ($ in Millions) | | |
|---|---|---|---|
| | 2025 | 2026 | 2027 |
| State Tax Expenditure | 19 | 21 | 23 |

(m) Denotes a value of less than $1 million

**1.3.006** Deferral of gain on non-dealer installment sales

Federal Statute IRC Sections 453 and 453A(b)

**Description:** Some taxpayers are allowed to report some sales using the installment method of accounting in which the gross profit from the sale is prorated over the years during which the payments are received.

| | State Fiscal Years ($ in Millions) | | |
|---|---|---|---|
| | 2025 | 2026 | 2027 |
| State Tax Expenditure | 8 | 8 | 8 |

(m) Denotes a value of less than $1 million

**1.3.007** Completed contract rules

Federal Statute IRC Section 460

**Description:** Some taxpayers with construction or manufacturing contracts extending for more than one tax year are allowed to report some or all of the profit on the contracts under special accounting rules rather than the normal rules of tax accounting.

| | State Fiscal Years ($ in Millions) | | |
|---|---|---|---|
| | 2025 | 2026 | 2027 |
| State Tax Expenditure | 1 | 1 | 1 |

(m) Denotes a value of less than $1 million

**1.3.008** Special treatment of employee stock ownership plans (ESOPs) (includes deferral of tax on certain employee stock plans)

Federal Statute IRC Sections 401(a)(28), 404(a)(9), 404(k), 415(c)(6), 512(e), 1042, 4975(d)(3), 4978, 4979A

**Description:** Employer contributions may be deducted as a business expense. In addition, some contributions are subject to less restrictive limits than contributions to other employee benefit plans. Tax on qualified employee stock purchase plans are not taxed when granted or excised. Tax is deferred until stock is sold.

| | State Fiscal Years ($ in Millions) | | |
|---|---|---|---|
| | 2025 | 2026 | 2027 |
| State Tax Expenditure | 27 | 30 | 32 |

(m) Denotes a value of less than $1 million

**1.3.009** Various agricultural expensing provisions

Federal Statute IRC Section 1301

**Description:** Beginning with tax years after 1997, taxpayers engaged in farming or fishing business, have the option to calculate their current year income tax by averaging over a prior three-year period, all or a portion of their income from farming and/or fishing.

| | State Fiscal Years ($ in Millions) | | |
|---|---|---|---|
| | 2025 | 2026 | 2027 |
| State Tax Expenditure | 2 | 2 | 2 |

(m) Denotes a value of less than $1 million

**1.3.010** Qualified Opportunity Zones

Federal Statute PL 115-97; IRS 1400Z-1

**Description:** The inclusion in gross income of capital gains reinvested in a qualified opportunity fund may be temporarily deferred and 15 percent of capital gains reinvested may be excluded if the investment is held for seven years. Capital gains from the sale or exchange of an investment in the qualified opportunity fund held for at least 10 years are excluded from gross income. A qualified opportunity fund is an investment vehicle organized as a corporation or a partnership for the purpose of investing in qualified opportunity zone property that holds at least 90 percent of its assets in qualified opportunity zone property. Qualified opportunity zone property includes any qualified opportunity zone stock, any qualified opportunity zone partnership interest, and any qualified opportunity zone business property. Certain low-income community population census tracts may be designated as qualified opportunity zones by the chief executive officer of the State (which includes the District of Columbia).

|---|---|---|---|
| | 2025 | 2026 | 2027 |
| State Tax Expenditure | 18 | -2 | -49 |

(m) Denotes a value of less than $1 million

## 1.4 Georgia Exemptions

**1.4.001** Personal Exemption

| | |
|---|---|
| Statute | §48-7-26 |
| Year Enacted | 1987 |
| Year Effective | 1987 |
| Data Source | DOR data as of TY 2023 |
| Estimate Reliability | Class A |
| Data Reliability | Class A |
| Note | For distributional analysis, see Table 3 in Appendix. |

**Description:** For tax years 2024 and after, the personal exemption is eliminated. In addition, $4,000 is excluded from income for each dependent claimed on the tax return.

| | State Fiscal Years ($ in Millions) | | |
|---|---|---|---|
| | 2025 | 2026 | 2027 |
| State Tax Expenditure | 556 | 545 | 540 |

(m) Denotes a value of less than $1 million

**1.4.002** Retirement Income

| | |
|---|---|
| Statute | §48-7-27(a)(5) |
| Year Enacted | 1971 |
| Year Effective | 1971 |
| Data Source | DOR data as of TY 2023 |
| Estimate Reliability | Class A |
| Data Reliability | Class A |
| Note | The definition of retirement income was modified, effective tax year 2018, to include Dept. of Defense survivor benefit payments regardless of age of beneficiary. For distributional analysis of this provision, see Table 4 in Appendix. |

**Description:** For tax years beginning in 2012, individuals age 62 and above may exclude a maximum of $35,000 and age 65 and above may exclude a maximum of $65,000 of retirement income. This income exclusion may include a maximum of $5,000 of earned income.

| | State Fiscal Years ($ in Millions) | | |
|---|---|---|---|
| | 2025 | 2026 | 2027 |
| State Tax Expenditure | 1,423 | 1,428 | 1,460 |

**1.4.003** Exclusion of federally taxable Social Security benefits

| | |
|---|---|
| Statute | §48-7-27(a)(7) |
| Year Enacted | 1971 |
| Year Effective | 1971 |
| Data Source | DOR data as of TY 2023 |
| Estimate Reliability | Class A |
| Data Reliability | Class A |
| Note | |

**Description:** Social Security and tier 1 railroad retirement benefits are excluded from state taxable income.

| | State Fiscal Years ($ in Millions) | | |
|---|---|---|---|
| | 2025 | 2026 | 2027 |
| State Tax Expenditure | 509 | 512 | 521 |

(m) Denotes a value of less than $1 million

**1.4.004** Georgia Higher Education Savings Plan Contributions

| | |
|---|---|
| Statute | §48-7-27(a)(11) and (11.1) |
| Year Enacted | NA |
| Year Effective | Taxable years beginning on or after January 1, 2002 |
| Data Source | DOR data as of TY 2023 |
| Estimate Reliability | Class A |
| Data Reliability | Class A |
| Note | The contribution limits were increased from $2,000 to $4,000 effective January 1, 2016 and again in 2019 from $4,000 to $8,000, effective January 1, 2020. For distributional analysis, see Table 5 in Appendix. |

**Description:** An exemption from income is allowed for contributions to a qualified higher education savings plan. The exemption is limited to $8,000 per qualified plan beneficiary starting in 2020.

| | State Fiscal Years ($ in Millions) | | |
|---|---|---|---|
| | 2025 | 2026 | 2027 |
| State Tax Expenditure | 23 | 22 | 22 |

(m) Denotes a value of less than $1 million

**1.4.005** Interest on U.S. obligations

| | |
|---|---|
| Statute | §48-7-27(b)(2) |
| Year Enacted | 1971 |
| Year Effective | 1971 |
| Data Source | DOR data as of TY 2023 |
| Estimate Reliability | Class A |
| Data Reliability | Class A |
| Note | For distributional analysis see Table 6 in Appendix |

**Description:** Interest earned on U.S. government bonds and other obligations are not included as taxable income.

| | State Fiscal Years ($ in Millions) | | |
|---|---|---|---|
| | 2025 | 2026 | 2027 |
| State Tax Expenditure | 29 | 27 | 26 |

(m) Denotes a value of less than $1 million

**1.4.007** Organ donation expenses

| | |
|---|---|
| Statute | §48-7-27(a)(13) |
| Year Enacted | 1981 |
| Year Effective | Taxable years beginning on or after January 1, 2005 |
| Data Source | U.S. Dept. of Health and Human Services, Organ Procurement and Transplantation Network |
| Estimate Reliability | Class B |
| Data Reliability | Class A |
| Note | |

**Description:** Certain unreimbursed expenses associated with the donation of organs in accordance with the National Organ Procurement Act are deductible from

federal adjusted gross income up to a maximum value of $25,000.

| | State Fiscal Years ($ in Millions) | | |
