# 82.08.956; 82.12.956 - Hog fuel used to produce energy

**Description**

The law provides sales and use taxes exemptions on purchases of hog fuel used to produce electricity, steam, heat, or biofuel.

Buyers must provide the seller with an exemption certificate as well as complete an annual tax performance report for each facility owned or operated in Washington.

The exemption and annual reporting requirement expire June 30, 2034.

**Purpose**

To promote diversified renewable energy use.

**Taxpayer savings**

***($ in millions):***

# 82.08.962(1)(c)(i)(A),(ii),(iii); 82.12.962(1)(c)(i)(A),(ii),(iii) - Renewable energy equipment capable of generating not less than 1,000 watts of electricity

**Description**

A sales and use taxes exemption is available for machinery and equipment used directly in generating electricity from wind, sun, fuel cells, biomass energy, tidal or wave energy, geothermal resources, anaerobic digestion, technology that converts otherwise lost energy from exhaust, or landfill gas as the principal source of power. To qualify for the exemption, the purchaser must use the machinery and equipment to develop a facility capable of generating at least 1,000 watts of electricity. The exemption also includes sales or charges made for installation labor and services of qualifying machinery and equipment.

From July 1, 2009, through June 30, 2011, qualifying purchases were eligible for a 100% exemption.

From July 1, 2011, through December 31, 2019, qualifying purchases were eligible for a 75% exemption in the form of a refund to the purchaser.

From October 1, 2017, through December 31, 2019, the exemption did not apply to sales of solar energy systems, unless the system was capable of generating more than 500 kW of electricity.

Beginning January 1, 2020, the exemption changed to the following:
- 50% of state and local sales and use taxes paid if the Department of Labor and Industries (LNI) certifies the project included procurement from and contracts with women, minority, or veteran-owned businesses. The project will still qualify for 50% exemption if the developer supports they made a good faith effort to meet the standards. This exemption includes solar energy systems capable of generating more than 100 kilowatts but less than 500 kilowatts of electricity.
- 75% of state and local sales and use taxes paid if the LNI certifies the project meets the standards stated at the 50% level as well as compensates workers at prevailing wage rates determined by local collective bargaining determined by the LNI.
- 100% of the state and local sales and use taxes paid if the LNI certifies the project is developed under a community workforce agreement or project labor agreement.

The installation of the qualifying machinery and equipment must commence after January 1, 2020, and be completed no later than December 31, 2029. The exemption expires January 1, 2030.

**Purpose**

To support production of renewable energy sources.

**Taxpayer savings**

# 82.08.962(1)(c)(i)(B); 82.12.962(1)(c)(i)(B) - Solar energy equipment capable of generating more than 100 kilowatts AC but no more than 500 kilowatts AC of electricity

**Description**

Beginning with projects installed after January 1, 2020, solar energy systems capable of generating more than 100 kilowatts (kW) but no more than 500 kW of electricity are eligible for an exemption in the form of a remittance of the state and local sales and use taxes paid on purchases of machinery and equipment used directly to generate electricity, and labor and services rendered to install such machinery and equipment.

The Department of Labor and Industries must certify the project has met certain wage and labor requirements. The purchaser must provide the following documentation to the department as part of the application to qualify for the remittance:

- A copy of the contractor's certificate of registration.
- The contractor's current state unified business identifier number.
- A copy of the contractor's required proof of industrial insurance coverage for the contractor's employees working in Washington; employment security department number; and a state excise tax registration number.
- Documentation of the contractor's history of compliance with federal and state wage and hour laws and regulations.

Installation of qualifying machinery and equipment must be completed before January 1, 2030, to qualify for the remittance.

**Purpose**

To support production of renewable energy sources.

# 82.08.962(1)(e); 82.12.962(1)(e) - Solar energy equipment capable of generating no more than 100 kilowatts AC of electricity

**Description**

Beginning July 1, 2019, purchases of machinery and equipment, and labor and services to install such machinery and equipment, used to generate less than 100 kw electricity, are exempt from sales and use taxes.

To qualify for the exemption, the seller must meet the following requirements at the time of sale:

- Has a contractor's certificate of registration.
- Has a current state unified business identified number.
- As required by law, possesses proof of industrial insurance coverage for the contractor's employees working in Washington; employment security department number; and a state excise tax registration number.
- Has had no findings of violation of federal or state wage and hour laws and regulations in a final and binding order by an administrative agency or court of competent jurisdiction in the past 24 months.

To qualify for this exemption, the purchaser must provide the seller with an exemption certificate, as required by the department.

Installation of qualifying machinery and equipment must be completed before January 1, 2030.

# 82.08.965; 82.12.965 - Semiconductor materials manufacturing after $1 billion investment - construction costs

**Description**

Sales and use taxes exemption is available to manufacturers of semiconductor materials who construct new buildings, including parts of new buildings used for qualified manufacturing activities, labor and services in conjunction with construction of facilities for manufacturing semiconductor materials.

To qualify for the sales and use tax exemption the firm must keep at least 75% of the employees they initially showed would constitute full employment for the plant for at least eight years. Failure to meet the 75% employment requirement for any year will result in the loss of one-eighth of the sales and use tax exemption.

This exemption is effective for 12 years following the effective date of the bill, and it is contingent upon commencement of commercial operations by a new semiconductor material fabrication facility with an investment in new buildings and equipment amounting to at least $1 billion.

**Purpose**

To retain and attract semiconductor businesses in Washington.

**Taxpayer savings**

# 82.08.9651; 82.12.9651 - Semiconductor materials manufacturing - gases and chemicals

**Description**

Sales and use taxes are exempt to manufacturers and processors for hire on purchases of gases and chemicals used to produce semiconductor materials. Manufacturers of silicon solar wafers, silicon solar cells, thin film solar devices, solar grade silicon, or compound semiconductor solar wafers also qualify for this exemption.

A person claiming the exemption under this section must file a complete annual tax performance report.

Any person who has claimed the exemption must reimburse the department for 50% of the amount of the tax exemption, if the number of persons employed by the person claiming the tax preference is less than 90% of the person's three-year employment average for the three years immediately preceding the year in which the exemption is claimed.

This exemption expires December 1, 2028.

**Purpose**

To encourages the retention of existing persons who manufacture semiconductor in Washington and attracts similar businesses to the state.

# 82.08.980; 82.12.980 - Commercial airplane facilities on port district property

**Description**

An exemption from sales and use taxes is available to manufacturers who construct new buildings and/or new parts of buildings that will be used primarily to:

- Manufacture commercial airplanes, airplane fuselages, and airplane wings.
- Store raw materials and finished products.

The exemption applies to charges for:

- Labor and services rendered in respect to the constructing of new buildings.
- Materials incorporated as an ingredient or component during construction.
- Labor and services rendered for installing building fixtures not otherwise eligible for the machinery and equipment exemption.

Port districts, political subdivisions, or municipal corporations may also use this exemption when constructing new facilities to lease to qualifying manufacturers. This exemption expires July 1, 2040.

**Purpose**

To encourage the building of commercial aircraft assembly facilities in Washington.

# 82.08.986; 82.12.986 - Data center equipment and infrastructure

**Description**

There is a sales and use taxes exemption for qualified purchases of eligible server equipment and eligible power infrastructure for data centers located in a rural county. The exemption also includes charges for labor and services associated with installation of the equipment and power infrastructure.

To qualify, a facility must meet employment and facility size requirements described in statute. In addition, for exemption certificates issued on or after June 9, 2022, qualifying businesses operating newly constructed data centers must attain certification for sustainable design or green building standards.

This exemption is limited to eight data centers for those that began construction between July 1, 2015, and July 1, 2019, and a total of 12 data centers through June 9, 2022. There is no limitation thereafter, and any number of data centers may be granted certificates if they qualify, unless they are qualifying via refurbishment.

In addition, each year, the department may issue up to six certificates for data centers that qualify through refurbishment.

No new exemption certificates may be issued on or after July 1, 2036. Exemptions expire July 1, 2048.

"Eligible computer data center" requirements:

- Located in a rural county at the time an application for an exemption is received.
- Have at least 20,000 square feet dedicated to housing working servers.
- Commencement of construction occurs:
  - After March 31, 2010, and before July 1, 2011.
  - After March 31, 2012, and before July 1, 2015.
  - After June 30, 2015, and before July 1, 2035.

**Purpose**

To promote economic development and maintain the state's leadership in technology. It also provides job growth to rural communities in Washington.

**Taxpayer savings**

# 82.08.9861; 82.12.9861 - Limited counties data center equipment and infrastructure

**Description**

There is a sales and use taxes exemption for qualified purchases of eligible server equipment and eligible power infrastructure for data centers located in a county with population over 800,000. The exemption also includes charges for labor, material, equipment, and services associated with installation of the equipment and power infrastructure.

The department may approve:

- Six applications to obtain the exemptions for qualifying businesses in the first calendar year of the exemption; and
- Six applications to obtain the exemptions for qualifying businesses in each year, calendar year three through calendar year six of the exemption. No applications may be approved in year two.

Program requirements:

- To qualify, a facility must meet employment and facility size requirements described in statute. In addition, qualifying businesses operating newly constructed data centers must attain certification for sustainable design or green building standards.
- The qualifying business must have a minimum of 1.5 megawatts of available power.
- A qualifying tenant must have a minimum electrical capacity of 150 kilowatts for server and computer equipment in a qualifying business. Tenants that previously qualified under the rural county data center program must reapply if they intend to expand into a qualifying business.
- An "eligible computer data center" must have at least 20,000 square feet dedicated to housing working servers.

No new exemption certificates may be issued on or after July 1, 2028. Exemptions expire July 1, 2038.

**Purpose**

To promote economic development and maintain the state's leadership in technology.

**Taxpayer savings**

***($ in millions):***

|---|---|---|---|---|
| State Taxes | $6.100 | $11.300 | $13.900 | $17.400 |
| Local Taxes | $3.000 | $5.500 | $6.700 | $8.400 |

**Repeal of exemption**

Repealing this exemption would increase revenues.

# 82.08.9861; 82.12.9861 - Limited counties data center equipment and infrastructure

**Potential revenue gains from full repeal**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| State Taxes | $0.000 | $10.360 | $13.900 | $17.400 |
| Local Taxes | $0.000 | $5.040 | $6.700 | $8.400 |

**Assumptions**

- This repeal takes effect July 1, 2024, and impacts 11 months of collections in fiscal year 2025.
- Data centers located in high populated areas tend to be smaller than those located in rural area. For data centers located in King, Pierce, and Snohomish Counties, assume two data centers at 210,000 square feet, the average size, and four at 100,000 square feet, the minimum size required, for each eligible year. Approximately 50% of the data center is dedicated to server space.
- It takes approximately 18 to 24 months to complete a data center. Until full capacity is reached, 25% of the dedicated server space will be filled each year.
- For a new data center, the average cost per square foot for eligible servers and power infrastructure is $800 per square foot.
- Servers are refreshed every three years. This is due to cost savings and upgrading equipment. The cost for replacement servers and power infrastructure maintenance is $200 per square foot.
- Qualifying businesses and tenants will meet the power requirements prior to applying to the Department.
- Local revenue estimates use the urban average local sales and use tax rate of 3.16%.

# 82.08.989; 82.12.989 - Internet and telecommunications infrastructure for tribes

**Description**

A state sales and use taxes exemption is provided for sales, labor, and services associated with the construction of a qualified infrastructure project (QIP).

The exemption applies to:
- Sales of building materials.
- Telecommunications equipment.
- Personal property used or incorporated into a qualified infrastructure project.
- Charges made for the labor and services related to the construction of a QIP.
- The installation of any equipment or other personal property incorporated into a QIP.

QIP owners must apply to the department for an exemption certificate. The exemption certificate expires on the date the QIP owner certifies the project as operationally complete or January 1, 2030, whichever is first. The total amount of state sales and use tax exempted may not exceed $8 million.

Qualified infrastructure project means the construction of buildings and utilities related to the deployment of modern global internet and telecommunications infrastructure that occurs in part in a distressed county located on the coast of Washington.

QIP owner means a wholly owned subsidiary of a federally recognized tribe located in a county that borders the Pacific Ocean and is developing a qualified infrastructure project.

This exemption expires January 1, 2030.

**Purpose**

To provide a sales and use taxes exemption for sales, labor, and services associated with the construction of a QIP.

**Taxpayer savings**

# 82.08.990 - Interstate commerce - import and export shipments

**Description**

The sale of tangible personal property in export commerce is exempt from sales tax.

Tangible personal property is in export commerce when the seller delivers the property to the:

- Buyer in a foreign country.
- Carrier consigned to transport the property to a foreign country.
- Buyer at shipside or aboard the buyer's vehicle of transportation and it is clear the export process has started.
- Buyer who is in Washington if the property can be transported to a foreign destination under its own power, the seller files an export declaration and the buyer immediately transports the product to a foreign country (excludes motor vehicles).

**Purpose**

Codifies the department's tax policies regarding imports and exports (WAC 458-20-193C). This statute provides clarity concerning the taxation of property in the process of international shipment.

**Taxpayer savings**

***($ in millions):***

# 82.08.993; 82.12.817 - Hydrogen fuel cell electric vehicles

**Description**

The law provides a sales and use tax exemption for sales and leases of new and used electric passenger cars, light duty trucks, and medium duty passenger vehicles powered by a fuel cell.

Fifty percent of the sales and use taxes are exempt for sales or leases of new vehicles. For the sales or leases of used vehicles, the exemption is limited to the lesser of $16,000 or the fair market value of the vehicle. A person may not claim this exemption if the person claims the exemption under the clean alternative fuel vehicle exemption.

The exemption expires when the cumulative number of qualified new vehicles titled in Washington reaches 650. The exemption expires effective after the last day of the calendar month immediately following the month the department determines the total vehicle count has been reached. The Department of Licensing must collect and provide, upon request, information in a form or manner required by the department to determine the number of exemptions that have been claimed.

The exemption expires the last day following the month the department determined the vehicle count has been met or June 30, 2029; whichever comes first.

**Purpose**

To encourage the purchase of hydrogen fuel cell electric vehicles.

**Taxpayer savings**

# 82.08.995; 82.12.995 - Public authority sales

**Description**

Tangible personal property and services provided by a public corporation, commission, or authority are exempt from sales and use taxes when sold to:

- A limited liability company in which the public corporation is the managing member.
- A limited partnership in which the public corporation is the general partner.
- A single-asset entity required by a federal, state, or local housing assistance program and directly or indirectly controlled by the public corporation.

**Purpose**

Minimizes the tax burden for companies receiving federal grants for low-income housing authorities.

# 82.08.996, 82.12.996 - Battery powered electric vessels

**Description**

Sales and use taxes do not apply to the sale or use of:

- New battery-powered electric marine propulsion systems ("EMPSs").
- New vessels equipped with battery powered EMPSs.
- Batteries and battery packs used to exclusively power EMPSs or hybrid EMPSs and labor and services rendered in respect to installing, repairing, altering, or improving such batteries or battery packs.

Only EMPSs, and the batteries or battery packs used exclusively to power them, with continuous power greater than 15 kilowatts qualify for the exemption. "Battery-powered electric marine propulsion systems" are fully electric outboard or inboard motors used by vessels whose sole source of propulsive power is the energy stored in the battery packs and include required accessories, such as throttles, displays, and battery packs. "Vessels" include every new watercraft, other than seaplanes, that are used or capable of being used as a means of transportation on the water.

Additionally, sales and use taxes do not apply to the sale or use of:

- New shoreside batteries purchased and installed for the purpose of reducing grid demand when charging electric and hybrid vessels.
- Labor and services rendered in respect to installing, repairing, altering, or improving shoreside batteries and installing, constructing, repairing, or improving shoreside batteries infrastructure.
- Tangible personal property that will become a component of shoreside batteries infrastructure.

"Shoreside batteries" means batteries installed at a dock or similar location to provide an electric charge to a vessel powered by an electric marine propulsion system. "Shoreside batteries infrastructure" means the shoreside battery bank, charging apparatus, and emergency services generator.

This exemption expires July 1, 2030.

**Purpose**

To encourage the sale and use of inboard or outboard battery-powered electric marine propulsion systems for vessels and the infrastructure they require.

**Taxpayer savings**

# 82.08.998; 82.12.998 - Weatherization assistance program

**Description**

Sales and use taxes do not apply to tangible personal property used in the weatherization of a residence under the low-income residential weatherization program, chapter 70.164 RCW. The exemption only applies to tangible personal property that becomes a component of the residence. Examples of qualifying weatherization materials include, but are not limited to, insulation and sealants, heating and cooling equipment, supplies used to seal and repair ducts. Charges for labor and services used to install these materials are subject to sales tax and use tax.

**Purpose**

To lower the cost of weatherization improvements so more low-income households receive assistance under the Department of Commerce's weatherization program.

**Taxpayer savings**

# 82.08.999; 82.12.999 - Joint municipal utility authority

**Description**

Sales or transfers made between joint municipal utility service authorities and any of its members are exempt from sales and use taxes. A joint municipal utility authority is a municipal corporation formed to better facilitate the joint provision of municipal utility services to the public.

**Purpose**

To clarify the law and to facilitate the ability of local government utilities to jointly plan, finance, construct, acquire, maintain, operate, and provide facilities and utility services to the public, and to reduce costs and improve the benefits, efficiency, and quality of utility services.

**Taxpayer savings**

***($ in millions):***

# 82.08.9995; 82.12.9995 - Restaurant employee meals

**Description**

Meals provided to employees of restaurants without specific charge are exempt from sales and use taxes.

**Purpose**

To resolve a long-standing issue regarding the application of sales and use taxes and to make administration of the sales tax easier for restaurants and the department.

**Taxpayer savings**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| State Taxes | $4.690 | $4.700 | $4.720 | $4.740 |
| Local Taxes | $2.110 | $2.110 | $2.120 | $2.130 |

**Repeal of exemption**

Repealing this exemption would increase revenues.

**Potential revenue gains from full repeal**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| State Taxes | $0.000 | $0.550 | $0.610 | $0.620 |
| Local Taxes | $0.000 | $0.250 | $0.280 | $0.280 |

**Assumptions**

- This repeal takes effect July 1, 2024, and impacts 11 months of collections in fiscal year 2025.
- Growth rate mirrors the employment growth rate for the service-providing labor force reflected in the Economic and Revenue Forecast Council's March 2023 forecast.
- A restaurant employee works an estimated 241 days a year.
- Of the estimated number of employee meals provided to restaurant employees, 29% are provided free of charge.
- An estimated 90% of restaurant employees will receive a free employer-provided meal.
- The average cost of a restaurant employer-provided meal is $4.50.
- A compliance rate of 13% revenue collections applies to each fiscal year of the estimate.

# 82.08.9996; 82.12.9996 - Vessel deconstruction

**Description**

Sales and use taxes do not apply to sales of vessel deconstruction performed at a qualified vessel deconstruction facility or at an area over water that has been permitted under section 402 of the clean water act of 1972 for vessel deconstruction.

This exemption expires January 1, 2025.

**Purpose**

To decrease the number of abandoned and derelict vessels in Washington by lowering the cost of deconstruction.

**Taxpayer savings**

# 82.08.9999; 82.12.9999 - Alternative fuel vehicles

**Description**

A sales and use taxes exemption is provided for sales of new and used passenger cars, light duty trucks, and medium duty passenger vehicles which meet one of the following:

- Are exclusively powered by a clean alternative fuel.
- Use at least one method of propulsion that is capable of being recharged from an external source of electricity and are capable of traveling at least 30 miles using only battery power.

"Clean alternative fuel" includes natural gas, propane, hydrogen, and electricity.

New vehicles with a selling price less than $45,000, which includes the trade-in value, qualify for this exemption. Through July 31, 2021, the exemption is a maximum of $25,000 of a vehicle's selling price or the total lease payments made plus the selling price of the leased vehicle if the original lessee purchases the leased vehicle. Beginning August 1, 2021, the exemption is a maximum of $20,000 and decreases to $15,000 on August 1, 2023. The qualification period end date is August 1, 2025.

Used vehicles with a selling price less than $30,000, which includes the trade-in value, qualify for this exemption. The first $16,000 of the selling price or total lease payments made plus the selling price of the leased vehicle, if purchased by the original lessee, is exempt from sales and use taxes.

All leased vehicles signed by the qualification period end date continue to be exempt from retail sales taxes until August 1, 2028, when these sections expire.

**Purpose**

To encourage the sale and lease of alternative fuel vehicles.

**Taxpayer savings**

***($ in millions):***

# 82.12.010(7)(c) - Use tax on rental value

**Description**

An out-of-state business that brings property into Washington for temporary business use (less than 180 days during a 365 consecutive day period) may compute use tax based on an amount representing the reasonable rental value of the item, rather than the total market value. The usual measure of use tax is the purchase price or the fair market value at the time of first use in Washington.

**Purpose**

To encourage out-of-state enterprises to do business in Washington by allowing them to use equipment here on a temporary basis without incurring use tax on the full market value.

**Taxpayer savings**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |

| **JLARC Review:** | Full review completed in 2013 with an upcoming review in 2026 |

# 82.12.0203 - Self-produced fuel (refinery fuel gas)

**Description**

Refinery fuel gas is subject to the following state use tax rate structure in lieu of the 6.5% state use tax rate:

- 0.963 % from January 1, 2018, through December 31, 2018.
- 1.926 % from January 1, 2019, through December 31, 2019.
- 2.889 % from January 1, 2020, through December 31, 2020.
- 3.852 % from January 1, 2021, and thereafter.

However, the use of refinery fuel gas by an extractor or manufacturer is not subject to local use tax when the fuel is used directly in the operation of the particular extractive operation or manufacturing plant that produced or manufactured the same refinery fuel gas.

**Purpose**

To provide a lower tax rate to improve industry competitiveness.

**Taxpayer savings**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| State Taxes | $5.440 | $5.450 | $5.090 | $5.190 |
| Local Taxes | $4.650 | $4.660 | $4.350 | $4.440 |

**Repeal of exemption**

Repealing this exemption would increase revenues.

# 82.12.0208(4)(a)(i) - Digital goods used noncommercially

**Description**

The use tax is not imposed upon the use of digital goods that are of a noncommercial nature, such as personal emails.

**Purpose**

To protect the sales and use taxes base, establish certainty in the tax code, maintain conformity with the streamlined sales and use taxes agreement, and encourage economic development.

**Taxpayer savings**

# 82.12.022(6); 82.14.230(6) - Natural and manufactured gas used for transportation

**Description**

The use of natural gas as a transportation fuel, when provided by a person other than a gas distribution business, is exempt from use taxes. The PU tax provides a similar exemption for sales by gas distribution businesses.

**Purpose**

To promote the use of natural gas as a transportation fuel and consistency in the tax code.

**Taxpayer savings**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |

# 82.12.0251 - Nonresidents' personal property

**Description**

Use tax does not apply to tangible personal property, digital goods, digital codes, and any services rendered in respect to such property, brought into Washington by a nonresident for temporary use or enjoyment, so long as the item is not used in conducting a non-transitory business activity. This exemption also applies to the use of a motor vehicle registered in another state if the vehicle is not required to be registered in Washington and the use of household goods, personal effects and private motor vehicles (excluding motor homes) by residents of Washington (and nonresident military personnel who are stationed in Washington), if the items were acquired and used while the owner was a resident of another state at least 90 days before entering Washington.

**Purpose**

To encourage tourism in Washington and to avoid penalizing new residents of Washington by subjecting previously owned items to use tax.

**Taxpayer savings**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| State Taxes | $3,205.900 | $3,315.800 | $3,308.700 | $3,308.200 |
| Local Taxes | $1,513.400 | $1,570.000 | $1,624.900 | $1,681.200 |

**Repeal of exemption**

Repealing this exemption would increase revenues.

**Potential revenue gains from full repeal**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| State Taxes | $0.000 | $395.140 | $860.260 | $1,290.200 |
| Local Taxes | $0.000 | $187.090 | $422.470 | $655.670 |

**Assumptions**

- This repeal takes effect July 1, 2024, and impacts 11 months of collections in fiscal year 2025.
- Growth rate mirrors the sales tax growth rate reflected in the Economic and Revenue Forecast Council's March 2023 forecast.
- Average depreciation rate on tangible personal property is 50%.
- 50% of visitors to Washington locations are already Washington residents and 39.4% are repeat visitors.
- 22% of visitors drive their own car for three-day trips into Washington with two visitors per car.
- Compliance:
  - 13% revenue collections in Fiscal Year 2021.
  - 26% revenue collections in Fiscal Year 2022.
  - 39% revenue collections in Fiscal Year 2023.
  - 52% revenue collections in Fiscal Year 2024 and thereafter.

# 82.12.02595 - Donations to nonprofits and government

**Description**

Tangible personal property donated to nonprofit charitable organizations and state or local governments are exempt from use tax. In addition, labor and services rendered in respect to installing, repairing, cleaning, altering, imprinting, or improving personal property that are donated to nonprofit charitable organizations and state or local governments are also exempt from use tax.

**Purpose**

To allow charitable donations to take place without incurring use tax.

**Taxpayer savings**

# 82.12.0263 - Extracted fuel

**Description**

Use tax does not apply to the use of biomass fuel by the extractor or manufacturer when the fuel is used directly in the operation of the particular extractive operation or manufacturing plant which produced or manufactured the same biomass fuel.

"Biomass fuel" means wood waste and other wood residuals, including forest derived biomass, but does not include firewood or wood pellets. "Biomass fuel" also includes partially organic by-products of pulp, paper, and wood manufacturing processes.

**Purpose**

Provide a lower tax rate to improve industry competitiveness.

**Taxpayer savings**

***($ in millions):***

# 82.12.0264 - Driver training vehicles

**Description**

Vehicles used in driver-training programs by public and private schools are exempt from use tax.

The vehicles must:
- Contain dual controls.
- Be used exclusively by public or private schools (not commercial driver-training programs).

**Purpose**

Reduces the costs of providing driver-education programs.

**Taxpayer savings**

***($ in millions):***

| Local Taxes | $0.000 | $0.010 | $0.011 | $0.011 |

**Assumptions**

- This repeal takes effect July 1, 2024, and impacts 11 months of collections in fiscal year 2025.
- Statewide, school districts have seven vehicles under contract. Same number of vehicles for private school driver's education.
- The cars have an average age of three years.
- The number of driver's education cars leased continues to be much lower than previous years, therefore no growth.
- Local revenue estimates use the statewide average local sales and use tax rate of 2.92%.

# 82.12.0265 - Bailed tangible personal property for research and development

**Description**

A bailee's research, development, experimental, and testing activities is not subject to use tax so long as the property was not subject to sales tax or use taxes when acquired by the bailor. "Bailment" consists of a bailor granting the temporary right of possession of tangible personal property to another person (bailee) for a stated purpose without consideration or transfer of ownership.

**Purpose**

Tangible personal property owned by the federal government used by federal contractors is subject to bailment. Such contractors are normally subject to use tax on the value of materials incorporated into federal projects. The purpose of the exemption is to improve the competitive position of instate businesses competing for the federal contracts by reducing the associated tax burden.

**Taxpayer savings**

# 82.12.0266 - Vehicles acquired while in military service

**Description**

Vehicles and trailers acquired and used by Washington residents serving in the armed forces and stationed outside of Washington are exempt from use tax. Exemption does not cover persons called to active duty for training of less than six months or for vehicles acquired less than 30 days prior to discharge from the military.

**Purpose**

To support resident armed forces members and to create equity. Nonresidents who bring their vehicles into Washington and establish residency here are exempt from use tax.

**Taxpayer savings**

***($ in millions):***

# 82.12.0284 - Computers donated to schools

**Description**

Donated computers to public or private nonprofit schools or colleges are exempt from use tax. This includes computers donated by individuals and businesses. The exemption includes computers, computer components, computer accessories, computer software, digital goods, or digital codes.

A similar exemption is provided for ALL tangible personal property that is donated to a government entity or a nonprofit charitable organization. However, that statute does not cover donations of computers to private, nonprofit educational institutions.

**Purpose**

To encourage individuals and businesses to donate computer equipment to schools.

**Taxpayer savings**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| State Taxes | $0.144 | $0.144 | $0.144 | $0.144 |
| Local Taxes | $0.065 | $0.065 | $0.065 | $0.065 |

**Repeal of exemption**

Repealing this exemption would increase revenues. Private nonprofit educational institutions would pay use tax on donated computers.

**Potential revenue gains from full repeal**

***($ in millions):***

# 82.12.035 - Tax paid to other states

**Description**

The amount of sales or use tax paid to another state, foreign county, or political subdivision of another state or foreign county may be credited towards use tax due for items used in Washington. The credit is limited to the amount of Washington use tax otherwise due.

**Purpose**

The primary function of use tax is to complement sales tax by asserting tax in situations where the Washington sales tax did not apply (purchases made in other states, items bought from private parties, etc.). This credit avoids overtaxing items when tax was paid to another jurisdiction.

**Taxpayer savings**

***($ in millions):***

# 82.12.225 - Nonprofit fund-raising activities - article valued at less than current value limit

**Description**

Consumers supporting the charitable activities of nonprofit organizations or libraries are provided a limited use tax exemption. The exemption applies to the use of any article of personal property purchased or won as a prize in a game of chance, from a nonprofit organization or library as part of a qualifying tax-exempt fundraising activity.

The item bought or received as a prize in a contest of chance must have a value less than $13,920. The department must adjust the value limit for the exemption by multiplying the current value limit by the greater of one or one plus the percentage change in the consumer price index for the most recent 12-month period available as of December 1st of the current year.

**Purpose**

To support nonprofit organizations.

**Taxpayer savings**

# 82.12.800; 82.12.801; 82.12.802 - Vessel use by manufacturers or dealers

**Description**

These statutes relate to the application of use tax for businesses that manufacture or sell vessels and vessel trailers. Use tax is exempt on the following uses of a vessel and trailer by the manufacturer or a vessel dealer:

- Testing, setting up, repairing, remodeling or otherwise making the vessel seaworthy.
- Training of employees who are involved in the manufacturing of the vessel.
- Promoting the sale of the vessel.
- Loaning or donating the vessel to nonprofit organizations or governmental entities for limited periods.
- Transporting, displaying, or demonstrating the vessel at boat shows.
- Delivering, showing, and operating the vessel for a prospective buyer.

Any personal intervening use of the vessel by the manufacturer or a dealer is subject to use tax. However, use tax in such instances is measured by the reasonable rental value of the vessel for particular use, rather than the fair market value, if the dealer can demonstrate the vessel is truly held for sale.

**Purpose**

To clearly identify the uses of vessels and related equipment which are not considered as taxable "intervening" uses and to provide a basis for the use tax in other taxable situations.

**Taxpayer savings**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|

# 82.14.410 - Local sales tax cap for lodging

**Description**

Charges for sales of lodging are exempt from local sales and use taxes imposed after December 1, 2000, if the local tax results in a combined state and local tax rate of more than 12% or the rate that was otherwise in effect on December 1, 2000. As of December 1, 2000, the combined state and local tax rate for lodging was 15.2% within the city of Seattle and 12% elsewhere. This exemption does not apply to the following local sales and use taxes:

- Regional Transit Authority.
- Housing and Related Services.

**Purpose**

To encourage tourist activities in areas with high tax rates.

**Taxpayer savings**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| State Taxes | $0.000 | $0.000 | $0.000 | $0.000 |
| Local Taxes | $19.311 | $19.588 | $19.539 | $19.526 |

**Repeal of exemption**

Repealing this exemption would increase revenues. Seattle, Pierce County, Wenatchee and East Wenatchee lodging facilities would collect and remit the additional lodging taxes on transient rentals.

**Potential revenue gains from full repeal**

***($ in millions):***

# 82.14.430(1) - Local regional transportation vehicles

**Description**

This statute authorizes a regional transportation investment district (RTID) to levy local sales and use taxes of up to 0.1% to finance regional transportation projects. Subsection (1) exempts motor vehicles from the local tax. However, subsection (2) imposes a special use tax at the same tax rate on motor vehicles purchased by residents of the district.

**Purpose**

This unique tax arrangement enables vehicle dealers located within a RTID to avoid collecting the 0.1% local sales tax for regional transportation projects from purchasers of new or used vehicles who reside outside of the district. Conversely, residents of the district who purchase vehicles from dealers located outside of the district will still be subject to the tax.

**Taxpayer savings**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| State Taxes | $0.000 | $0.000 | $0.000 | $0.000 |
| Local Taxes | $0.000 | $0.000 | $0.000 | $0.000 |

**Repeal of exemption**

Repealing this exemption would not increase revenues because currently no taxpayers use it.

**Potential revenue gains from full repeal**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |

|---|---|
| **Category:** | Government |
| **Year Enacted:** | 2002 |
| **Primary Beneficiaries:** | Regional transportation investment districts |
| **Taxpayer Count:** | 0 |
| **Program Inconsistency:** | None evident, except that all other state and local sales taxes other than the public safety tax, apply to motor vehicles |
| **JLARC Review:** | No review completed |

# 82.14.450(4) - Local public safety tax on vehicles

**Description**

Counties are authorized to levy local sales and use taxes of up to 0.3%. One-third of the receipts must be devoted to criminal justice expenditures. The county retains 60% of the receipts and the remainder is shared with cities on a per capita basis. Sales of motor vehicles are exempt from the local tax. Similarly, motor vehicles leases for the first 36 months of the lease period are also exempt.

**Purpose**

The exemption acknowledges that local vehicle dealers will have to compete with dealers located in adjacent areas where the local tax is not levied.

**Taxpayer savings**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| State Taxes | $0.000 | $0.000 | $0.000 | $0.000 |
| Local Taxes | $7.260 | $7.330 | $7.590 | $7.860 |

**Repeal of exemption**

Repealing this exemption would increase revenues.

**Potential revenue gains from full repeal**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| State Taxes | $0.000 | $0.000 | $0.000 | $0.000 |
| Local Taxes | $0.000 | $6.720 | $7.590 | $7.860 |

**Assumptions**

- This repeal takes effect July 1, 2024, and impacts 11 months of collections in fiscal year 2025.
- Growth rate mirrors the new motor vehicle growth rates reflected in the S&P Global Market Intelligence's March 2023 forecast.
- Car dealers are registered and correctly reporting excise taxes.
- Counties continue to levy public safety tax if vehicle exemption is repealed.
- No state impact since this is a local tax.

**Data Sources**

- Department of Revenue, Excise tax data
- S&P Global Market Intelligence, March 2023 forecast

**Additional Information**

| Additional Information | |
|---|---|
| **Category:** | Business |
| **Year Enacted:** | 2003 |
| **Primary Beneficiaries:** | Vehicle dealers in the counties that impose the local public safety sales and use tax |
| **Taxpayer Count:** | 600 |
| **Program Inconsistency:** | None evident |
| **JLARC Review:** | No review completed |

# 82.14.532 - Commercial office space development

**Description**

A governing authority of a city, located in a county with a population of less than 1.5 million may designate a commercial office space development area within the city's urban center. The city may adopt a local sales and use tax remittance program to incentivize the development of commercial office space within the development area. The city may also establish a local property tax reinvestment program to make public improvements that incentivize the development of commercial office space.

**Purpose**

Encourage the development of high-quality commercial office space in urban centers outside major metropolitan areas.

**Taxpayer savings**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| State Taxes | $0.000 | $0.000 | $0.000 | $0.000 |
| Local Taxes | $0.000 | $0.000 | $0.000 | $0.000 |

**Repeal of exemption**

Repealing this remittance would not increase revenue because currently no taxpayers use it. This exemption is only for local sales tax and therefore a repeal would have no effect on state revenue. The property tax portion of this legislation is not an exemption. It requires local taxing districts to earmark future property taxes collected on a qualifying project, so they are only used for public improvements that incentivize the development of commercial office space.

**Potential revenue gains from full repeal**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |

# 82.32.558 - Multipurpose sports and entertainment facility deferral

**Description**

A qualifying business may apply for a deferral of taxes on the following:

- Redevelopment of a multipurpose sports and entertainment facility for professional ice hockey and basketball league franchises.
- Development of an ice hockey practice facility.

The facilities must be owned by the largest city in a county with a population of at least 1.5 million. The recipient must repay, with interest, all deferred state sales and use taxes by June 30, 2023. For local sales and use taxes, the recipient must begin repaying taxes in the first calendar year after the facility becomes operationally complete.

**Purpose**

Increase the fiscal stability of multipurpose sports and entertainment arenas in Washington, thereby strengthen the economic vitality of the communities in which the arenas and practice facilities are located.

**Taxpayer savings**

# 82.32.865; 88.02.620; 88.02.570 - Nonresident entity vessel owners

**Description**

A vessel owned by a nonresident vessel that is not a natural person (entity-owned) that is brought into the state for no more than six months in any continuous 12-month period is exempt from vessel registration provided the vessel meets one of the following:

- Is currently registered or numbered under the laws of the state of principal use.
- Has been issued a valid number under federal law.

This exemption only applies for the first 60 days of use on Washington waters.

Subject to certain conditions, a nonresident vessel owner that is not a natural person (entity owned) or a nonresident vessel owner who intends to charter the vessel with a captain or crew, may qualify to receive a nonresident vessel permit on or before the 61st day of use in Washington waters.

These owners may only obtain a nonresident vessel permit if:

- The vessel is between 30 and 200 feet in length.
- No Washington resident owns the vessel or is a principal of the nonresident person which owns the vessel.
- The department has provided the nonresident vessel owner written approval authorizing the permit.

This exemption expires January 1, 2029.

**Purpose**

To expand the economy of the maritime industry in Washington.

| **Program Inconsistency:** | None evident |
| **JLARC Review:** | Upcoming review scheduled in 2025 |

# 82.34.050(2); 82.34.060(2) - Pollution control facilities

**Description**

Construction of required pollution control facilities associated with approved applications received between July 30, 1967, and November 30, 1981, was exempt from sales and use taxes. If sales and use taxes were previously paid, the amount paid may be taken as a credit against B&O, public utility, or use taxes.

**Purpose**

To encourage abatement of pollution and to compensate Washington businesses for the costs of upgrading pollution control facilities.

**Taxpayer savings**

Department of Revenue, Excise tax data

**Additional Information**

| Additional Information | |
|---|---|
| **Category:** | Business |
| **Year Enacted:** | 1967 |
| **Primary Beneficiaries:** | Businesses required to install pollution control facilities, primarily in the lumber and wood products, paper, aluminum, and food industries. |
| **Taxpayer Count:** | Fewer than three |
| **Program Inconsistency:** | None evident |
| **JLARC Review:** | Expedited review scheduled in 2026 |

# 82.85.050; 82.85.060 - Manufacturer's job creation (Invest in Washington) pilot program

**Description**

The Invest in Washington pilot program creates a sales and use taxes deferral for two investment projects per calendar year. The deferral applies to sales and use taxes on up to $10 million in charges for the construction, expansion, or renovation of facilities and purchases of eligible machinery and equipment. One project must be in eastern Washington and one project must be in western Washington. Projects approved for a rural deferral cannot receive this deferral; and projects cannot receive multiple pilot program deferrals. This program expires January 1, 2026.

**Purpose**

To evaluate the effectiveness of investing sales and use taxes from new investments into workforce training programs that support manufacturing businesses and create jobs and capital investments in Washington.

**Taxpayer savings**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| State Taxes | $0.811 | $0.844 | $0.433 | $0.000 |
| Local Taxes | $0.365 | $0.380 | $0.194 | $0.000 |

**Repeal of exemption**

Repealing this deferral would increase revenues by any taxes not yet deferred at the time of the repeal. This estimate assumes deferred taxes are due beginning the fifth year after the project has been certified as operationally complete and continues for the next nine years.

**Potential revenue gains from full repeal**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| State Taxes | $0.000 | $0.774 | $0.865 | $0.885 |
| Local Taxes | $0.000 | $0.348 | $0.389 | $0.398 |

**Assumptions**

- This repeal takes effect July 1, 2024, and impacts 11 months of collections in fiscal year 2025.
- Two projects of average value will be approved each year, one on the east side of the state and one on the west side of the state.
- Growth rate mirrors the construction of industrial buildings growth rate reflected in the S&P Global Market Intelligence's March 2023 forecast.
- Local revenue estimates use the statewide average local sales and use tax rate of 2.92%.

**Data Sources**

- Department of Revenue, Deferral data

# 82.89.030 - Clean technology manufacturing tax deferral

**Description**

A sales and use taxes deferral is provided for investment projects in clean technology manufacturing, clean alternative fuels production, and renewable energy storage.

Deferred taxes begin to be repaid in the second year after the project is operationally completed and continue for the next nine years.

The state sales tax owed may be reduced:

- By 50% if the Department of Labor and Industries (LNI) certifies that the project includes procurement from and contracts with women, minority, or veteran-owned businesses.
- By 75% if the project meets the 50% reduction criteria and compensates workers at prevailing wages determined by L&I.
- By 100% if LNI certifies that the project is developed under a community workforce agreement or project labor agreement.

**Purpose**

To build manufacturing capacity for carbon-free electricity and to financially incentivize the use of high labor standards.

**Taxpayer savings**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |

| **JLARC Review:** | No review scheduled, however JLARC is required to provide a report to the legislature by December 31, 2028 |

# 82.90.030 - Solar canopy deferral

**Description**

A sales and use taxes deferral is provided for installing solar canopies. A solar canopy is defined as an elevated structure(s) containing a solar energy system with capacity of one megawatt and an area of at least 50,000 square feet.

Deferred taxes begin to be repaid on December 31st in the second year after the project is operationally completed and continue for the next seven calendar years.

The sales and use taxes owed may be reduced:

- By 50% if the Department of Labor and Industries (LNI) certifies that the project includes procurement from and contracts with women, minority, or veteran-owned businesses.
- By 75% if the project meets the 50% reduction criteria and compensates workers at prevailing wages determined by L&I.
- By 100% if LNI certifies that the project is developed under a community workforce agreement or project labor agreement.

**Purpose**

To incentivize the construction of solar canopies in Washington to reduce greenhouse gas emissions and boost overall electricity supplies.

**Taxpayer savings**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |

| Local Taxes | $0.000 | $2.984 | $3.743 | $4.305 |

# 82.90.030 - Solar canopy deferral

**Assumptions**

- This repeal takes effect July 1, 2024, and impacts 11 months of collections in fiscal year 2025.
- Growth for solar canopies is 15% per year.
- The first installations will be in fiscal year 2025.
- Including Walmart, Washington has over 200 large retailer locations with parking lots comparable to Walmart Superstores. Washington also houses many large industrial and office headquarters. The average solar canopy installations will be 3.1 megawatts and include eight to 10 projects per year.
- The average cost for solar canopies is $4.6 million per MW.
- Taxpayers receiving a deferral will meet the labor standard requirement to have 100% of the sales and use taxes waived.
- Local revenue estimates use the statewide average local sales and use tax rate of 2.92%.

**Data Sources**

- Deshmukh, S. S., &; Pearce, J. M. (2021, January 15). "Electric vehicle charging potential from retail parking lot solar photovoltaic awnings." Renewable Energy.

# 82.92.090 - Underdeveloped urban land redevelopment deferral

**Description**

A city with a population of at least 135,000 and not more than 250,000 may create a sales and use taxes deferral program for multifamily housing developed on vacant surface parking lots. To qualify for the deferral, the owner of the vacant parking lot must primarily build multifamily units with at least 50% of those units rented or sold as affordable housing to very low, low, and moderate-income households.

If the property continues to qualify for this deferral for at least 10 years, the sales and use taxes do not need to be repaid. No new applications for deferral may be made after June 30, 2032.

**Purpose**

To encourage the redevelopment of underdeveloped land in targeted urban areas to provide additional affordable housing.

**Taxpayer savings**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| State Taxes | $1.020 | $1.670 | $1.720 | $1.780 |
| Local Taxes | $0.494 | $0.809 | $0.836 | $0.863 |

**Repeal of exemption**

Repealing this deferral would increase revenues.

**Potential revenue gains from full repeal**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| State Taxes | $0.000 | $1.531 | $1.720 | $1.780 |
| Local Taxes | $0.000 | $0.742 | $0.836 | $0.863 |

**Assumptions**

- This repeal takes effect July 1, 2024, and impacts 11 months of collections in fiscal year 2025.
- Three cities adopt a resolution to create the deferral and two affordable housing apartment buildings will be built per year on surface parking lots.
- There are 650 apartment buildings with five units or more built each year in Washington.
- The average construction cost of a five-story 50-unit apartment building is $10.5 million.
- Residential buildings with 20 or more units take over 19 months to complete.
- The annual adjustment to construction costs mirrors the annual growth for residential construction of multi-family buildings consumer price index, March 2023 forecast.
- Local revenue estimates use the urban average local sales and use tax rate of 3.16%.

# 82.94.020; 82.94.030 - Manufacturing deferral in designated counties

**Description**

A sales and use taxes deferral is provided for qualified investment projects located in counties with a population less than 650,000. The total deferral amount per person is limited to $400,000.

The deferred taxes need not be repaid if the recipient utilizes the qualified project as a manufacturing or research and development operation for the seven calendar years following the project completion date.

If the project is not completed within five years or not utilized for manufacturing or research and development for seven years, then a portion of the deferred taxes are due immediately.

**Purpose**

To create employment opportunities and generally spur economic development in counties located outside of the central Puget Sound region.

**Taxpayer savings**

***($ in millions):***

# Chapter 21
# Soft Drinks Syrup Tax

# 82.64.030(1) - Carbonated beverage syrup previously taxed

**Description**

Successive sales of syrup used to produce carbonated beverages are exempt from the syrup tax if the syrup was previously taxed.

**Purpose**

To avoid the pyramiding of the tax. This exemption assures the tax will apply only once to any particular gallon of syrup.

**Taxpayer savings**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |

# 82.64.030(3) - Trademarked carbonated beverage syrup

**Description**

Wholesale sales of carbonated beverage syrup are exempt from syrup tax if the syrup sales are to a bottler appointed by the owner of the syrup trademark to manufacture, distribute, and sell the syrup.

**Purpose**

Avoids double taxation since the carbonated beverage syrup is taxed when originally sold by the manufacturer to the bottler.

**Taxpayer savings**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |

# 82.64.030(4) - Carbonated beverage syrup purchased before 6/1/91

**Description**

Carbonated beverage syrup taxed at first possession prior to June 1, 1991, is exempt from syrup tax.

**Purpose**

The imposition of the carbonated beverage tax changed in 1991. Instead of taxation at first possession of the product, the tax applies to the wholesale transaction. This exemption avoids double taxation of the same product in 1991.

**Taxpayer savings**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |

# Chapter 22
# Solid Waste Collection

8102/8585

# 82.18.010(3) - Hazardous or toxic waste

**Description**

The disposal of hazardous and toxic waste is exempt from the solid waste collection tax.

**Purpose**

To recognize that hazardous and toxic waste is not “solid waste," which is defined as garbage, trash, rubbish, or other material discarded as worthless or not economically viable for further use. Toxic wastes require special services.

**Taxpayer savings**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| State Taxes | $0.161 | $0.171 | $0.181 | $0.192 |
| Local Taxes | $0.000 | $0.000 | $0.000 | $0.000 |

**Repeal of exemption**

Repealing this exemption would increase revenues.

# 82.18.010(3) - Recycling or salvage materials

**Description**

Materials collected primarily for recycling or salvage are exempt from the solid waste collection tax.

**Purpose**

To recognize that recycled and salvaged materials are not “solid waste," which is defined as garbage, trash, rubbish, or other material discarded as worthless or not economically viable for further use.

**Taxpayer savings**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| State Taxes | $4.608 | $4.884 | $5.177 | $5.488 |
| Local Taxes | $0.000 | $0.000 | $0.000 | $0.000 |

**Repeal of exemption**

Repealing this exemption would increase revenues.

**Potential revenue gains from full repeal**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| State Taxes | $0.000 | $4.477 | $5.177 | $5.488 |
| Local Taxes | $0.000 | $0.000 | $0.000 | $0.000 |

**Assumptions**

- This repeal takes effect July 1, 2024, and impacts 11 months of collections in fiscal year 2025.
- Growth rate is 6%, based on a historical average to reflect industry trends.
- Of the total solid waste generated in Washington, 48.5% are recyclables and salvage materials.
- Taxpayers properly exempt recyclables and salvage materials from the solid waste collection tax.

**Data Sources**

- Department of Revenue, Excise tax data
- Department of Ecology, Solid waste data

**Additional Information**

| Additional Information | |
|---|---|
| **Category:** | Business |
| **Year Enacted:** | 1986 |
| **Primary Beneficiaries:** | Solid waste collection businesses and the public |

| **Program Inconsistency:** | None evident |
| **JLARC Review:** | Expedited review completed in 2016 and 2023 |

# 82.18.050 - Refuse service for federal government

**Description**

Garbage collection service provided to the federal government is exempt from the solid waste collection tax.

**Purpose**

To reflect the prohibition against taxing the federal government.

**Taxpayer savings**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| State Taxes | CTI | CTI | CTI | CTI |
| Local Taxes | $0.000 | $0.000 | $0.000 | $0.000 |

**Repeal of exemption**

Repealing this exemption would not increase revenues because federal law prohibits taxing the federal government.

**Potential revenue gains from full repeal**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| State Taxes | $0.000 | $0.000 | $0.000 | $0.000 |
| Local Taxes | $0.000 | $0.000 | $0.000 | $0.000 |

**Assumptions**

- Collecting tax revenue would be unconstitutional, and there would be no revenue gain.

**Data Sources**

- Department of Revenue, Excise tax data
- Department of Ecology, Disposed waste data

**Additional Information**

| Additional Information | |
|---|---|
| **Category:** | Government |
| **Year Enacted:** | 1986 |
| **Primary Beneficiaries:** | The U.S. government and its agencies |
| **Taxpayer Count:** | Fewer than three |
| **Program Inconsistency:** | None evident |
| **JLARC Review:** | No review completed |

# 82.18.060 - Using services of another solid waste collection business

**Description**

Any solid waste collection business using the services of another solid waste collection business for the transfer, storage, processing, or disposal of the waste collected during the transaction is exempt from the solid waste collection tax.

**Purpose**

To prevent pyramiding and multiple taxation of a single transaction.

**Taxpayer savings**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| State Taxes | $16.569 | $18.057 | $19.679 | $21.446 |
| Local Taxes | $0.000 | $0.000 | $0.000 | $0.000 |

**Repeal of exemption**

Repealing this exemption would increase revenues; however, it could result in multiple taxation of a single transaction.

**Potential revenue gains from full repeal**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| State Taxes | $0.000 | $16.552 | $19.679 | $21.446 |
| Local Taxes | $0.000 | $0.000 | $0.000 | $0.000 |

**Assumptions**

- This repeal takes effect July 1, 2024, and impacts 11 months of collections in fiscal year 2025.
- Growth rate is 9%, which reflects the average historical growth rate of the solid waste collection industry.

**Data Sources**

- Department of Revenue, Excise tax data

**Additional Information**

| Additional Information | |
|---|---|
| **Category:** | Business |
| **Year Enacted:** | 1986 |
| **Primary Beneficiaries:** | Solid waste collection businesses |
| **Taxpayer Count:** | 50 |
| **Program Inconsistency:** | None evident |
| **JLARC Review:** | No review completed |

# Chapter 23
# Timber Excise Tax

# 84.33.075 - Nonprofit youth organizations

**Description**

Timber harvested on lands owned by a nonprofit social service organization is exempt from timber excise tax if the land is exempt from property tax and income from the timber sales promotes, operates, and maintains youth programs. The exemption is only available if the youth programs are available to all youth, regardless of race, color, national origin, ancestry, or religious belief.

**Purpose**

Reduces the cost of operating youth programs by nonprofit organizations.

**Taxpayer savings**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| State Taxes | CTI | CTI | CTI | CTI |
| Local Taxes | $0.000 | $0.000 | $0.000 | $0.000 |

**Repeal of exemption**

Repealing this exemption would increase revenues.

**Potential revenue gains from full repeal**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| State Taxes | $0.000 | CTI | CTI | CTI |
| Local Taxes | $0.000 | $0.000 | $0.000 | $0.000 |

**Assumptions**

This exemption impacts fewer than three taxpayers, any impacts are confidential.

**Data Sources**

Department of Revenue, Timber excise tax data

**Additional Information**

| Additional Information | |
|---|---|
| **Category:** | Nonprofit |
| **Year Enacted:** | 1980 |
| **Primary Beneficiaries:** | Youth organizations |
| **Taxpayer Count:** | Fewer than three |
| **Program Inconsistency:** | None evident |
| **JLARC Review:** | Expedited review completed in 2011 |

# 84.33.0775 - Salmon habitat

**Description**

Timber harvested on land subject to enhanced aquatic resource requirements as determined by the Department of Natural Resources, such as riparian zones (defined as the interface between land and a river or stream), wetlands, or steep or unstable slopes receives a tax credit against the state portion of the timber excise tax. The credit effectively lowers the total timber excise tax rate from 5% to 4.2%.

**Purpose**

Helps offset the costs to timber owners associated with setting aside larger timber buffers and other forest management practices intended to protect the environment, including salmon habitat.

**Taxpayer savings**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| State Taxes | $7.327 | $7.477 | $7.631 | $7.787 |
| Local Taxes | $0.000 | $0.000 | $0.000 | $0.000 |

**Repeal of exemption**

Repealing this credit would increase revenues.

**Potential revenue gains from full repeal**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| State Taxes | $0.000 | $6.854 | $7.631 | $7.787 |
| Local Taxes | $0.000 | $0.000 | $0.000 | $0.000 |

**Assumptions**

- This repeal takes effect July 1, 2024, and impacts 11 months of collections in fiscal year 2025.
- Growth rate mirrors the average growth of the credit from the last three fiscal years.

**Data Sources**

- Department of Revenue, Timber excise tax data

**Additional Information**

| Additional Information | |
|---|---|
| **Category:** | Business |
| **Year Enacted:** | 1999 |
| **Primary Beneficiaries:** | Timber owners |
| **Taxpayer Count:** | 1,200 |
| **Program Inconsistency:** | None evident |
| **JLARC Review:** | Expedited review completed in 2015 |

# 84.33.0776 - Quinault Nation timber harvest excise tax agreement

**Description**

The timber excise tax on timber harvested on fee lands within the boundaries of the Quinault reservation may be exempt from state and county timber tax. The Governor may enter into an agreement with the Quinault Nation. The agreement must provide that the tribal tax will be credited against the state and county taxes.

**Purpose**

To allow the Quinault Nation to benefit from the timber excise tax.

**Taxpayer savings**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| State Taxes | $0.000 | $0.000 | $0.000 | $0.000 |
| Local Taxes | $0.000 | $0.000 | $0.000 | $0.000 |

**Repeal of exemption**

Repealing this exemption would not increase revenues. The Governor and the Quinault Nation have not entered into a timber harvest excise tax agreement.

**Potential revenue gains from full repeal**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|

| **JLARC Review:** | Expedited review completed in 2023 |

# 84.33.170 - Christmas trees and cottonwoods

**Description**

Timber excise tax does not apply to Christmas trees and short-rotation hardwoods. However, short-rotation hardwoods that are cultivated by agricultural methods on land classified as timberland are subject to timber excise tax.

**Purpose**

Christmas trees and short-rotation hardwoods are agricultural products and are not subject to the timber excise tax on their harvest value.

**Taxpayer savings**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| State Taxes | $0.205 | $0.211 | $0.216 | $0.222 |
| Local Taxes | $0.823 | $0.844 | $0.866 | $0.889 |

**Repeal of exemption**

Repealing this exemption would increase revenues.

**Potential revenue gains from full repeal**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| State Taxes | $0.000 | $0.193 | $0.216 | $0.222 |
| Local Taxes | $0.000 | $0.774 | $0.866 | $0.889 |

**Assumptions**

- This repeal takes effect July 1, 2024, and impacts 11 months of collections in fiscal year 2025.
- Average national Christmas tree sales growth is 1.2% over the past 10 years.
- The growth for short-rotation hardwood remains constant.

**Data Sources**

- U.S. Department of Agriculture, Agriculture data
- Pacific Northwest Christmas Tree Association
- Statista.com, 'Christmas trees sold in the United States from 2004-2019'

**Additional Information**

| Additional Information | |
|---|---|
| **Category:** | Agriculture |
| **Year Enacted:** | 1971 |
| **Primary Beneficiaries:** | Growers of Christmas trees and hardwoods |
| **Taxpayer Count:** | 460 |
| **Program Inconsistency:** | None evident |
| **JLARC Review:** | Expedited review completed in 2018 |

# Chapter 24
# Vehicle Excise Taxes

# 82.44.015 - Ride-sharing vehicles

**Description**

The motor vehicle excise tax is exempt on passenger vehicles used primarily for ridesharing and transportation of persons with special needs. The vehicles must be used as ride-sharing vehicles for 36 consecutive months beginning from the date of purchase and meet vehicle and operation requirements in the case of vehicles used for ridesharing.

**Purpose**

To encourage trip reduction to alleviate congestion on the state's highways and assist those with special needs.

**Taxpayer savings**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| State Taxes | $0.000 | $0.000 | $0.000 | $0.000 |
| Local Taxes | Indeterminate | Indeterminate | Indeterminate | Indeterminate |

**Repeal of exemption**

Repealing this exemption would increase local revenues only. The state tax has been repealed.

**Potential revenue gains from full repeal**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| State Taxes | $0.000 | $0.000 | $0.000 | $0.000 |
| Local Taxes | $0.000 | Indeterminate | Indeterminate | Indeterminate |

**Assumptions**

There is no state tax impact, as the state tax was repealed. The local tax impact is indeterminate.

**Data Sources**

Department of Licensing, Vehicle excise tax data

**Additional Information**

| Additional Information | |
|---|---|
| **Category:** | Other |
| **Year Enacted:** | 1980 |
| **Primary Beneficiaries:** | Businesses operating vanpools for their employees |
| **Taxpayer Count:** | Unknown |
| **Program Inconsistency:** | None evident |
| **JLARC Review:** | Expedited review completed in 2020 |

# 82.44.125 - Excluded vehicles

**Description**

The motor vehicle excise tax does not apply to the following vehicles:

- Campers.
- Dock and warehouse tractors and their cars or trailers.
- Equipment not designed primarily for use on public highways.
- Exempt registered vehicles.
- Lumber carriers of the type known as spiders.
- Mobile homes.
- Passenger motor vehicles.
- Travel trailers.
- Vehicles not used on public highways.
- Vehicles owned by nonresident military personnel of the armed forces of the U.S. stationed in Washington if the nonresident military member was a nonresident of Washington when enlisted into military service.

**Purpose**

The state tax was repealed in 2000 for many vehicles. Some local motor vehicle excise taxes are earmarked for funding specific local projects and services.

**Taxpayer savings**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| State Taxes | $0.000 | $0.000 | $0.000 | $0.000 |
| Local Taxes | Indeterminate | Indeterminate | Indeterminate | Indeterminate |

**Repeal of exemption**

Repealing this exemption would not increase state revenues. However, repealing it could increase local revenues.

**Potential revenue gains from full repeal**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| State Taxes | $0.000 | $0.000 | $0.000 | $0.000 |
| Local Taxes | $0.000 | Indeterminate | Indeterminate | Indeterminate |

**Assumptions**

If the exemption were repealed, local revenues could be realized if local jurisdictions choose to assess the tax. However, the local impact is indeterminate without knowing which jurisdictions would assess the tax.

**Data Sources**

Department of Licensing, Vehicle excise tax data

# 82.44.125 - Excluded vehicles

# 82.48.100(1) - Government aircraft

**Description**

The aircraft excise tax does not apply to aircraft owned by and used exclusively in the service of governmental entities not carrying persons or property for commercial purposes.

**Purpose**

Reflects the legislative policy of not taxing state or local government property and the constitutional prohibition against taxing the federal government.

**Taxpayer savings**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |

# 82.48.100(7) - Nonresident keeping aircraft in-state at Pullman-Moscow Airport

**Description**

Nonresident owners of planes kept at an airport jointly owned by governmental entities of Washington and another state are exempt from the aircraft excise tax. The nonresident owner must pay all taxes, license fees, and registration fees required by the state where the owner resides.

**Purpose**

It provides an economic incentive for Idaho residents to base their privately owned airplanes at the Moscow-Pullman airport.

**Taxpayer savings**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |
|---|---|---|---|---|
| State Taxes | Minimal | Minimal | Minimal | Minimal |
| Local Taxes | $0.000 | $0.000 | $0.000 | $0.000 |

**Repeal of exemption**

Repealing this exemption would not increase revenues. Nonresident owners could relocate their planes to their home state.

**Potential revenue gains from full repeal**

***($ in millions):***

| | FY 2024 | FY 2025 | FY 2026 | FY 2027 |

# 82.48.100(8) - Emergency medical aircraft

**Description**

An aircraft excise tax exemption is provided for nonprofit, emergency medical air transport providers.

**Purpose**

To ease the tax burden on nonprofit organizations providing emergency air transport services.

**Taxpayer savings**

***($ in millions):***

# EXECUTIVE SUMMARY

This report updates the West Virginia Expenditure Study–Consumers Sales and Service Tax and Use Tax Expenditures released in 2022. All Consumers Sales and Service Tax and Use Tax (Sales Tax) provisions involving exclusions, exemptions, or deductions are analyzed in this report. While several of these provisions constitute government expenditure programs, some provisions are presumably part of a model sales tax structure, and certain others are integral components of a basic sales tax structure. In a tax expenditure study, it is important to differentiate expenditure programs from basic structural components through comparison with a model tax structure. A model sales tax should:

- Apply to all consumption expenditures at a uniform rate;
- Apply only to consumption expenditures and not to inputs of production;
- Conform to accepted equity standards of the society;
- Have minimal compliance and administration problems; and
- Provide a stable and growing tax base for the taxing authority.

These criteria suggest taxation of all consumer expenditures at the same rate of tax unless such taxation substantially hinders economic efficiency, equity standards, or tax compliance and administration.

The various Sales Tax exclusions, exemptions, and deductions can be separated into two core components—entity-based or commodity-based. Appendix A provides a detailed list of each entity-based and commodity-based expenditure. This report categorizes these expenditures into seven separate groups based on the function of the exemption. The study generally provides a description, expenditure value, and probable rationale for each sales tax provision. Where applicable, a revenue analysis is given. This analysis provides an idea of the complexity associated with revenue estimates based upon proposals to remove or modify existing Sales Tax provisions. The following group summaries provide some analysis of the scope of this study.

## GROUP EXEMPTIONS

While most Sales Tax exemptions are tied to specific goods and services, these exemptions are tied to purchases by specific groups of taxpayers. In West Virginia, governments, governmental subdivisions, schools, churches, and qualified charitable or nonprofit organizations are generally exempt from tax on all purchases.

Most states provide exemptions for purchases by governmental units, including schools. Although the scope of exemptions varies significantly, all states provide some exemptions for purchases by charitable, religious, or nonprofit organizations. In some cases, the activities of these organizations may complement government programs. West Virginia's exemptions for these groups are collectively among the broadest in the nation.

## COMMODITY EXPENDITURES

This category encompasses exemptions for specific goods, such as food for home consumption and computer hardware and software. West Virginia's commodity exemptions are generally narrower in scope than exemptions in other states. However, states with numerous

commodity exemptions (e.g., Minnesota and Rhode Island) generally have higher than average combined state and local sales tax rates to compensate for their narrow tax base.

## SERVICE EXEMPTIONS

This category encompasses exemptions or exclusions for services, such as advertising, electronic data processing, and professional services. This group also includes services subject to regulation by the Public Service Commission.

All of West Virginia's service exemptions and exclusions, except the exclusion for public utility services, exist in many states because most impose little or no sales tax upon service transactions. Several states have added additional services to their tax base in the past twenty years. Besides West Virginia, other states with a broad level of taxation on services include Arkansas, Connecticut, Florida, Hawaii, Iowa, Kentucky, Maryland, Mississippi, Nebraska, New Jersey, New Mexico, New York, Ohio, South Dakota, Texas, and Washington.

Public utility services are subject to either a sales tax or a gross receipts tax in most states. Some states even impose both types of tax upon the same service. West Virginia generally imposes gross receipts-type taxes on public utility services in lieu of the Sales Tax.

## COMMUNITY EXEMPTIONS

This group includes exemptions for both sales of selected items to community groups (e.g., sales of station house equipment to volunteer fire departments) and sales of selected items or services by community groups (e.g., food sold by religious organizations). All states have special exemptions for community groups. However, the scope of such exemptions varies significantly. These exemptions presumably exist because these community groups may provide services that benefit society and often complement government programs.

## EDUCATIONAL EXEMPTIONS

This category includes exemptions for sales of textbooks to students, sales of tickets to school-sponsored events, and tuition charges at educational summer camps. This category also includes sales of food to students during normal school hours or by colleges on a contract basis, room and board charges at fraternity and sorority houses, and fund-raising events held by schools. Most of these exemptions are generally found in nearly all states and typically apply to both public and private institutions. However, some states apply their exemptions only to public schools. These exemptions presumably exist as additional government subsidies for education.

## MISCELLANEOUS EXPENDITURES

Several miscellaneous deductions, credits, exclusions, and exemptions exist in West Virginia and other states. Some of these provisions include deductions for monetary allowances, voucher exemptions, local government agency exemptions, state sales tax credits, exclusions for sales of real property and intangible property, and exemptions for isolated transactions and lottery tickets.

## PROVISIONS THAT ARE NOT TRUE EXPENDITURES

The West Virginia Consumers Sales and Service Tax Law contains several citations that arguably are not true expenditures but have been implicitly codified to improve clarification of the Law. This category includes sub-groups of federally mandated exemptions, model sales tax components, provisions to avoid double taxation, and business input exemptions.

# INTRODUCTION

West Virginia Code §11-10-5s(c) requires a tax expenditure report to be submitted to the Legislature by January 15 of each year. In three-year cycles, these reports are intended to analyze tax expenditures for most major State taxes. The law defines the term "tax expenditure" as a provision in the tax laws designed to encourage certain kinds of activities or to aid taxpayers in special circumstances. Such provisions generally include exclusions, exemptions, deductions, credits, and deferrals from tax. This report covers the Sales Tax. Other reports cover all other taxes administered by the State Tax Department.

## OVERVIEW

The Sales Tax is the second largest source of revenue for the State of West Virginia. At a rate of 6.0 percent, this tax accounts for nearly 35 percent of the total General Revenue Fund estimate ($5,264,536,000 projected in Fiscal Year 2025). In FY2024, Sales Tax revenue of $1.817 billion accounted for roughly 31.8 percent of the total General Revenue Fund collections.

**West Virginia General Revenue Fund Percentage Yield for Sales Tax**

| FY 2021 | FY 2022 | FY 2023 | FY 2024 |
|---|---|---|---|
| 30.8% | 28.1% | 27.0% | 31.8% |

The Sales Tax generally represents a relatively stable portion of the General Revenue Fund receipts.

For purposes of this report, the Consumers Sales and Services Tax and Use Tax have been combined because the taxes are complementary, and exemptions are identical for both taxes. Some exclusions, exemptions, and deductions associated with the Sales Tax may be viewed as tax expenditures. Such tax expenditures tend to escape the usual legislative scrutiny afforded other expenditures in the annual budget approval process because provisions in the tax law often remain intact indefinitely. Programs funded through tax expenditures in effect receive priority funding over all other programs. The goal of this report is to facilitate an examination of Sales Tax expenditures using available resources.

This report supplies some information about exclusions and exemptions from the Sales Tax that goes beyond estimates of revenue losses due to tax expenditures. The additional information is intended to provide a resource to reach conclusions within differing conceptions of a normal tax base. Values represent estimates of state sales and use taxes only. A local option of up to 1.0 percent is available at the municipal level in West Virginia, which increases total sales and use taxes in a large portion of municipalities to 7.0 percent. There are many municipalities that impose a local sales tax, and the number continues to grow. However, this local option comprises only a small, but growing, portion of total sales tax collections in the State; in Fiscal Year 2024, local sales tax collections from eighty-six municipalities[1] comprised approximately 8.2 percent of total sales tax collections statewide. It is important to note the estimates provided in this report are considered on the state level only and do not include local level estimates.

[1] Effective July 1, 2024, a total of 88 municipalities levy a local sales tax in West Virginia, and effective January 1, 2025, a total of 90 municipalities levy a local sales tax in West Virginia.

## ESTIMATING COSTS OF TAX EXPENDITURES

This study provides estimates of the value of Sales Tax expenditures and certain exemptions considered necessary to define the normal tax base. Except where otherwise noted, each expenditure within the study is examined independently from all other expenditures. Following the establishment of a value in isolation, the influence of outside factors (i.e., other expenditures and taxpayer behavior) is discussed. Expenditure values less than $10,000 are reported as "minimal."

Several sources of information were used in the construction of exemption valuations. These include among others:

- Alternative tax data;
- ProPublica;
- Surveys;
- Tax return data;
- United States Department of Agriculture;
- United States Bureau of the Census;
- United States Energy Information Administration;
- United States Department of the Treasury;
- United States Bureau of Labor Statistics;
- West Virginia Department of Education;
- West Virginia Department of Health and Human Resources;
- West Virginia Department of Arts, Cultural and History;
- West Virginia Higher Education Policy Commission;
- West Virginia Division of Natural Resources;
- West Virginia Lottery Commission; and
- West Virginia Public Service Commission.

**CAUTION MUST BE EXERCISED WHEN USING VALUES FROM THIS REPORT AS ESTIMATES OF TAX REVENUE ATTRIBUTABLE TO POTENTIAL TAX LAW CHANGES, ESPECIALLY DUE TO THE IMPACT OF OVERLAPPING EXEMPTIONS**. In most cases, the revenue impact attributable to the repeal of a tax expenditure is less than the value of that expenditure. This occurs because tax expenditures tend to overlap one another, and taxpayers tend to alter their behavior whenever items are taxed for the first time. Also, the additional tax tends to increase the price and decrease the demand of the taxed item. Therefore, expenditure costs generally exceed the potential State tax revenue amounts to be gained through the repeal of the expenditure. For example, the exclusion for sales of services subject to Public Service Commission regulation overlaps significantly with the exemption for sales of electricity. Therefore, both exemptions would have to be repealed before the State would derive any significant revenue from a tax on electricity. However, even if both expenditures would be repealed, certain consumers (e.g., churches, natural resource producers, and manufacturers) would still be exempt from taxation due to other provisions within the West Virginia Code (e.g., direct use in manufacturing exemption). **The values given generally represent the value of the item in isolation of all other exemptions and are the estimated annual value for the expenditure**. Revenue impacts, representing the potential net revenue gain attributable to the repeal of certain provisions, are presented in the revenue analysis sections for a few items within this study.

## RATIONALE SUPPORTING TAX EXPENDITURES

This report also attempts to briefly articulate the rationale for the exclusions, exemptions, and deductions evaluated. The rationales set forth in this report are not intended to be all inclusive. The reader may identify other rationales for the various expenditures in the law. Given that statutory language does not often specify the rationale in much, if any, detail, the Department relied solely upon its experience to formulate the assumed rationales set forth in this report. The reader is left to judge the extent to which a particular rationale is appropriate and the extent to which a particular exemption furthers the preferred activity.

## ORGANIZATION AND ANALYSIS

The study divides sales and use tax expenditures into seven groups:

- Group Exemptions;
- Commodity Expenditures;
- Service Exemptions;
- Community Exemptions;
- Educational Exemptions;
- Miscellaneous Expenditures; and
- Statutory Provisions That Are Not True Expenditures.

Statutory provisions that are not true expenditures do not qualify as tax expenditures but are instead integral parts of the tax structure. For the purposes of this report, the remaining provisions have been determined to be tax expenditures. However, depending upon the reader's interpretation of tax expenditures, some of the included provisions may not be tax expenditures. It is left up to the reader to decide which of the remaining items are tax expenditures. Such a decision should be aided by both the analysis of a model sales tax and the analysis accompanying each individual exemption, exclusion, deduction, or credit. The analysis includes a rationale for each item and the item's cost to the State.

# GROUP I
# GROUP EXEMPTIONS

The West Virginia Code provides for several purchaser exemptions from sales taxes. While most exemptions relate to the sale of specific goods or services, these exemptions relate to purchases by specific groups of taxpayers. Unlike the average taxpayer, these groups are generally not subject to the Sales Tax on their purchases.

Although the rationale behind these group exemptions varies from one group exemption to the next, there are certain common characteristics. Taxpayers in these groups may be viewed as providing socially desirable services not otherwise available to the public. Many of those services are at least partially funded through direct expenditures. Failure to exempt purchases made by these groups in providing services would make such services more expensive and arguably less abundant for the public. In certain cases, a tax on purchases would result in a reallocation of public resources away from the service provided by the taxed entity.

The following exemptions involve an exclusion from Sales Tax for certain groups:

- Sales to Governmental Units;
- Sales to Various Nonprofit Organizations;
- Sales to Educational Institutions; and
- Sales and Services Directly Used or Consumed in the Construction of Certain Youth Organization Facilities.

An analysis of these exemptions follows.

## SALES TO GOVERNMENTAL UNITS

**STATUTE:** West Virginia Code §11-15-9(a)(3)

**EXEMPTION:** Sales of property or services to this state, its institutions, or subdivisions, governmental units, institutions, or subdivisions of other states provided that the law of the other state provides the same exemption to governmental units or subdivisions of this state and to the United States,[2] including agencies of federal, state, or local governments for distribution in public welfare or relief work.

**VALUE:**

| | |
|---|---|
| **Counties** | **$18.7 million** |
| **Municipalities** | **$24.2 million** |
| **State** | **$36.3 million** |
| **Total** | **$79.2 million** |

### Rationale

Unlike the exemption for purchases made by the federal government and its agencies, taxation of purchases by state and local governments is not prohibited by restrictions in the U.S. Constitution. However, if a state sales tax were imposed on state, county, and municipal governments, the cost of governmental services would rise along with the taxes required to fund them.

### Revenue Analysis

Expenditures for local government purchases have risen since the last Expenditure Study on Consumers Sales and Service Tax and Use Tax Expenditures in 2022 due to the additional revenue available for the State, counties and municipalities from the Coronavirus Aid, Relief and Economic Security Act (CARES) and the American Rescue Plan Act (ARPA).

[2] Information on the exemption for purchases by the United States government can be found in the section on “Group VII—Statutory Provisions That Are Not True Expenditures.”

## SALES TO VARIOUS NONPROFIT ORGANIZATIONS

**STATUTE:** West Virginia Code §§11-15-9(a)(5) and 11-15-9(a)(6)(A), (C), (D), (E)

**EXEMPTIONS:** Sales of property or services to churches which make no charge whatsoever for the services they render;

Sales of tangible property or services to a corporation or organization which has a current registration certificate issued under West Virginia Code §11-12-1 et seq and is exempt from federal income taxes under Section 501(c)(3) or (4) of the Internal Revenue Code of 1986, as amended. Such organizations may include the following:

- A church or a convention or association of churches as defined in Section 170 of the Internal Revenue Code of 1986, as amended;
- A corporation or organization which annually receives more than one-half of its support from any combination of gifts, grants, direct or indirect charitable contributions, or membership fees;
- An organization which has no paid employees and its gross income from fundraisers, less reasonable and necessary expenses incurred to raise the gross income (or the tangible personal property or services purchased with the net income), is donated to an organization which is exempt from income taxes under Section 501(c)(3) or (4) of the Internal Revenue Code of 1986, as amended;
- A youth organization, such as the Girl Scouts of the United States of America, the Boys Scouts of America, or the YMCA Adventure Guides/Princesses program, and local affiliates thereof, which is organized and operated exclusively for charitable purposes and has as its primary purpose the nonsectarian character development and citizenship training of its members.

**VALUE:** $**28.4 million**

### Rationale

The Sales Tax exemption for sales to churches was presumably enacted to avoid State interference with church activities. Also, the exemption for sales to churches and charitable organizations exists to promote the work of these organizations. Many of these organizations complement the efforts of government in the provision of social services. The social services provided by youth organizations complement various federal, state, and local government programs designed to benefit youth.

## SALES TO EDUCATIONAL INSTITUTIONS

**STATUTE:** West Virginia Code §§11-15-9(a)(6)(B) and 11-15-9(a)(15)

**EXEMPTION:** Sales of tangible personal property or services to an elementary or secondary school which maintains a regular faculty and curriculum and has a regularly enrolled body of pupils or students in attendance at the place in this state where its education activities are regularly carried on;

Sales of property or services to a school which has approval from the Higher Education Policy Commission or the Council for Community and Technical College Education to award degrees, which has its principal campus in this state, and which is exempt from federal and state income taxes under Section 501(c)(3) of the Internal Revenue Code of 1986, as amended.

**VALUE:** **$71.7 million**

### Rationale

This exemption presumably exists to promote education in West Virginia. Public schools would also be exempt under West Virginia Code §11-15-9(a)(3), which applies to governmental entities.

### Revenue Analysis

Expenditures for educational purchases have risen since the last Expenditure Study on Consumers Sales and Service Tax and Use Tax Expenditures in 2022 due to the additional revenue available from the Coronavirus Aid, Relief and Economic Security Act (CARES) and the American Rescue Plan Act (ARPA) and increased funds for boards of education in some counties from Property Tax on oil-producing property.

## SALES AND SERVICES DIRECTLY USED OR CONSUMED IN THE CONSTRUCTION OF CERTAIN YOUTH ORGANIZATION FACILITIES

**STATUTE:** West Virginia Code §11-15-8d(d)

**EXEMPTION:** Purchases of services, building materials and tangible personal property, except purchases of gasoline and special fuel, to be installed into a building or facility, or directly used or consumed in the construction, alteration, repair, or improvement of a new or existing building or structure by a person performing contracting if the purchaser of the contracting service is a nonprofit youth organization that would be entitled to claim the exemption under paragraph (E), subdivision (6), subsection (a) section nine (West Virginia Code §11-15-9) had it purchased the services, machinery, supplies, or materials.

**VALUE:** **Minimal**

### Rationale

For purposes of this exemption, the term “nonprofit youth organization” means a nonprofit organization that has been chartered by the United States Congress to help train young people to do things for themselves and others, and that has established an area of at least 6,000 contiguous acres within West Virginia in which to provide adventure and recreational activities for young people and others. This exemption was presumably enacted to encourage the development of a large youth-oriented adventure and recreational facility.

# GROUP II
# COMMODITY EXPENDITURES

Certain commodities are exempt from the Sales Tax for a variety of reasons. Expenditures may exist for some commodities to reduce the overall regressiveness (i.e., tax as a percentage of income increases as income decreases) of the sales tax structure. Other expenditures may exist because collection and compliance costs are high in proportion to the potential revenue yield. In some cases, the commodity exemption may contain certain restrictions to limit the scope and cost of the exemption.

The following commodity expenditures, not otherwise classified, exist within the West Virginia Consumers Sales and Service Tax and Use Tax laws:

- Food for Home Consumption;
- Reduced Basis for Sales of Mobile Homes;
- Sales of Newspapers Delivered by Route Carriers;
- Sales of Prescription Drugs, Appliances, and Insulin;
- Purchases of Drugs, Durable Medical Equipment, Mobility-Enhancing Equipment, and Prosthetic Devices by Health Care Providers;
- Sales of Farm Products in Original State by the Producer and Sales of Livestock Sold at Public Auction Sales;
- Sales of Subscriptions to Magazines Published by State Agencies;
- Sales of United States and West Virginia Flags;
- Sales of Aircraft;
- Sales of Computer Hardware and Software;
- Sales of Investment Bullion and Coins; and
- Sales of Small Arms and Ammunition.

An analysis of these tax expenditures follows.

## FOOD FOR HOME CONSUMPTION

**STATUTE:** West Virginia Code §11-15-3a(a)(3)

**EXEMPTION:** Sales, purchases, and uses of food and food ingredients intended for human consumption, not including sales, purchases, and uses by consumers of prepared food, food sold through vending machines and soft drinks.

**VALUE:** **$205.0 million**

### Rationale

The exemption for food and food ingredients intended for home consumption is designed to provide some tax relief to those individuals whose income is lower than average. However, all individuals receive the benefits of the exemption for purchasing food and ingredients.

## REDUCED BASIS FOR SALES OF MOBILE HOMES

**STATUTE:** West Virginia Code §11-15-3(f)

**EXEMPTION**: Sales of mobile homes to be utilized by purchasers as their principal year-round residence and dwelling provided that these mobile homes are subject to tax at the rate of 6.0 percent of 50.0 percent of the sales price.

**VALUE:** **$5.5 million**

### Rationale

The Sales Tax applies to roughly one-half of the value of conventional housing construction. Materials used in construction are taxable while contractor labor is exempt. This exemption and its predecessor presumably exist to provide similar treatment for mobile homes as provided for conventional housing.

### Revenue Analysis

The revenue impact for this partial exemption was calculated in isolation from other exemptions. Therefore, the actual revenue to be gained by the repeal of the partial exemption for mobile homes would be less than stated above. Other exemptions providing overlapping coverage include purchases made by governments for emergency housing following natural disasters and sales to schools for student or custodial housing.

As stated above, the partial exemption for the sale of mobile homes applies only to those homes used as the purchaser's year-round home and dwelling. These homes are considered personal property and are subject to sales tax. Self-propelled mobile homes purchased as recreation vehicles are subject to the 6.0% sales tax on motor vehicles.

## SALES OF NEWSPAPERS DELIVERED BY ROUTE CARRIERS

**STATUTE:** West Virginia Code §11-15-9(a)(10)

**EXEMPTION:** Sales of newspapers when delivered to consumers by route carriers.

**VALUE:** **$160,000**

### Rationale

When this exemption was originally created, imposing sales tax on carrier-delivered newspapers presents special problems with the collection and remittance of the tax generated. Therefore, this exemption presumably exists to reduce administrative and compliance costs.

### Revenue Analysis

The value of this exemption is lower than 2022 and is expected to decrease as more consumers move to alternative sources for daily media consumption.

## SALES OF PRESCRIPTION DRUGS, APPLIANCES, AND INSULIN

**STATUTE:** West Virginia Code §11-15-9(a)(11)

**EXEMPTION:** Sales of drugs, durable medical goods, mobility-enhancing equipment and prosthetic devices dispensed upon prescription and sales of insulin to consumers for medical purposes.

**VALUE:** **$21.1 million**

### Rationale

The cost of prescription drugs, durable medical goods, mobility-enhancing equipment, and prosthetic devices tends to fall disproportionately upon those with physical disabilities or acute illnesses. Therefore, this exemption may presumably exist out of concern over tax equity.

This expenditure is for sales to the consumer. An expenditure related to purchases by health care providers follows.

### Revenue Analysis

The total is the estimated value of this exemption after any third-party insurance payments are made, public or private. The expenditure includes the estimated tax loss for co-payments made at the consumer level. This differs from previous studies as those estimates included Medicare and Medicaid purchases and payments by other third-party insurance providers. Collecting sales tax from government-run insurance programs is unlikely if this exemption is removed. Illinois, the only state to have sales tax on prescription drugs, imposes tax only on out-of-pocket payments by consumers.

## PURCHASES OF DRUGS, DURABLE MEDICAL EQUIPMENT, MOBILITY-ENHANCING EQUIPMENT, AND PROSTHETIC DEVICES BY HEALTH CARE PROVIDERS

**STATUTE:** West Virginia Code §11-15-9i

**EXEMPTION:** Purchases of drugs, durable medical equipment, mobility enhancing equipment, and prosthetic devices to be dispensed upon prescription and intended for the use in the diagnosis, cure, mitigation, treatment, or prevention of injury or disease when purchased by hospitals, medical clinics, nursing homes, providers of inpatient hospital services, and providers of outpatient hospital services, physician services, nursing services, ambulance services, surgical services, or veterinary services.

**VALUE:** **$63.8 million**

### Rationale

This exemption exists in recognition that drugs, durable medical equipment, mobility-enhancing equipment, and prosthetic devices purchased by health care providers and dispensed upon a prescription are for the use of patients, not the health care provider. This exemption in combination with the previous exemption on the sales of prescription drugs and appliances lowers the cost of medically necessary items for the final consumer. Prescription drug purchases by a pharmacy are exempt as a purchase for resale.

## SALES OF FARM PRODUCTS IN ORIGINAL STATE BY THE PRODUCER AND SALES OF LIVESTOCK SOLD AT PUBLIC AUCTION SALES

**STATUTE:** West Virginia Code §11-15-9(a)(31)

**EXEMPTION:** Sales of livestock, poultry, or other farm products in their original state by the producer thereof, or a member of the producer's immediate family who is not otherwise engaged in making retail sales of tangible personal property, and sales of livestock sold at public sales sponsored by breeders, or registry associations, or livestock auction markets.

**VALUE:** **Minimal**

### Rationale

Most farm products are sold at wholesale with Sales Tax collected on the sales to the consumer by the retailer. However, some farm products are sold directly from the farm to consumers. This exemption relieves farmers who are not in the retail business of the burden of collecting and remitting Sales Tax. Livestock sold at public auctions may be covered by overlapping exemptions if the sales are made for resale or are made to farmers for use in agricultural production.

## SALES OF SUBSCRIPTIONS TO MAGAZINES PUBLISHED BY STATE AGENCIES

**STATUTE:** West Virginia Code §11-15-9(a)(43)

**EXEMPTION:** Direct or subscription sales by the Division of Natural Resources of the magazine currently entitled *Wonderful West Virginia,* and by the Division of Culture and History of the magazine currently entitled *Goldenseal,* and the journal currently entitled *West Virginia History*.

**VALUE:** **Minimal**

### Rationale

This exemption largely exists because these subscriptions are sold by a unit of State government. Collection and remittance of sales tax may increase the cost of providing this government service to citizens.

## SALES OF UNITED STATES AND WEST VIRGINIA FLAGS

**STATUTE:** West Virginia Code §11-15-9(a)(49)

**EXEMPTION**: Sales of the regulation size United States flag and the regulation size West Virginia flag for display.

**VALUE:** **Minimal**

### Rationale

This exemption presumably exists to promote patriotism.

## SALES OF AIRCRAFT

**STATUTE:** West Virginia Code §11-15-9(a)(50)

**EXEMPTION**: Sales of aircraft sold in this state on or after July 1, 2020 … and registered outside of this state … as long as the aircraft is removed from this state within 60 days of the date of purchase.

**VALUE:** **$500,000**

### Rationale

This exemption exists to promote an increase in activity in the aviation sales industry.

### Revenue Analysis

This value is variable each year due to inconsistent sales and a relatively small volume of aircraft on the market.

## SALES OF COMPUTER HARDWARE AND SOFTWARE

**STATUTE:** West Virginia Code §11-15-9h

**EXEMPTION:** Sales of the following services are exempt:

- Computer hardware and software to be directly incorporated by a manufacturer into a manufactured product;
- Sales of computer hardware and software directly used in communication;
- Sales of electronic data processing services;
- Sales of educational software required to be used in any of the public schools of this state or used in any institution in this state which qualifies as nonprofit or educational institution subject to administration, regulation, certification or approval of the Department of Education, the Department of Education and the Arts or the Higher Education Policy Commission;
- Sales of internet advertising of goods and services;
- Sales of high technology business services to high technology businesses which enter into contracts with this state, its institutions and subdivisions, governmental units, institutions or subdivisions of other states, or with the United States, including agencies of federal, state or local governments for direct use in fulfilling the government contract; and
- Sales of pre-written computer software, computers, computer hardware, servers and building materials and tangible personal property to be installed into a facility for direct use in a high technology business or an internet advertising business.

**VALUE:** **$10.0 million**

### Rationale

This exemption was enacted in response to technological advances in computers and the expanded role of computers, the internet, and global instant communications in business, and to encourage computer software developers, computer hardware designers, systems engineering firms, electronic data processing companies, and other high technology companies to locate and expand in West Virginia.

### Revenue Analysis

The above exemption value only includes sales of internet advertising of goods and services and sales of high technology business services to high technology businesses that enter into contracts with this State or with the United States, including agencies of federal, state, or local governments for direct use in fulfilling the government contract. The other items listed are generally exempt elsewhere in the Code.

## SALES OF INVESTMENT BULLION AND COINS

**STATUTE:** West Virginia Code §11-15-9r

**EXEMPTION:** Sales of investment metal bullion or investment coins.

**VALUE:** **$100,000**

**Rationale**

The vast majority of states do not collect sales tax on investment bullion and coins.

## SALES OF SMALL ARMS AND AMMUNITION

**STATUTE:** West Virginia Code §11-15-9u

**EXEMPTION:** Sale of small arms and small arms ammunition, as those terms are defined in subsections (c): "Small arms" means any portable firearm, including the receiver or frame of the firearm, designed to be carried and operated by a single person, including, but not limited to, rifles, shotguns, pistols, and revolvers, with no barrel greater than an internal diameter of .50 caliber or a shotgun of 10 gauge or smaller; and (d): "Small arms ammunition" means firearm ammunition designed for use in small arms.

**VALUE:** **$600,000**

**Rationale**

This exemption exists to encourage the manufacture of small arms and ammunition.

# GROUP III
# SERVICE EXEMPTIONS

Exclusions or exemptions from the Sales Tax exist for several broad categories of services rendered in West Virginia. These exemptions or exclusions may exist because of high compliance and collection costs, concern over equity (e.g., health care services), or concern over interstate tax competitiveness. Some tax exclusions may also be attributable to the evolution of sales tax policy in general.

The exclusion of services from taxation is the result of tradition as much as any other factor. Most modern-day retail sales tax structures, including West Virginia's, date back to the 1930's when services represented a significantly smaller portion of total consumer expenditures. Personal consumption expenditure data from the Federal Reserve Bank of St. Louis indicates a dramatic shift in personal spending habits between 1940 and the present. The percentage of total consumer spending attributable to services, excluding spending on housing, electricity, and natural gas, rose from 25.7 percent in 1940 to 66.2 percent by 2023.

States originally excluded most service transactions from sales tax because of simplicity since tangible property transactions were more easily identified for taxation. As retail sales taxation spread from state to state, lawmakers tended to copy each other. However, due to the gradual decline in consumer spending on taxable goods as a percentage of total consumer spending, more states have begun to target certain services for taxation.

West Virginia taxes services to a greater extent than most other states with the possible exceptions of Hawaii, Iowa, New Mexico, South Dakota, and Washington. Accordingly, West Virginia's tax base respecting services may be considered closer to the normal tax base (i.e., taxing more services) than most other states. However, the following services remain exempt from the Sales Tax in this State:

- Sales of Services Subject to Regulation by the Public Service Commission;
- Sales of Personal Services;
- Sales of Professional Services;
- Sales of Selected Advertising;
- Sales and Services Performed by Day Care Centers and Babysitters;
- Sales of Electronic Data Processing Services;
- Sales of Contracting Services Resulting in Capital Improvements;
- Sales of the Service of Opening and Closing a Burial Lot;
- Charges for Memberships or Services Provided by Health and Fitness Organizations;
- Artistic Performances by Entertainers;
- Charges by Membership Organizations to Their Members; and
- Dues, Fees and Assessments Paid to a Homeowners' Association.

An analysis of these tax expenditures follows.

## SALES OF SERVICES SUBJECT TO REGULATION BY THE PUBLIC SERVICE COMMISSION

**STATUTE:** West Virginia Code §11-15-8

**EXCLUSION**: Services furnished by corporations subject to control of the Public Service Commission.

**VALUE:** **$353.0 million**

### Rationale

Natural gas, water, telephone, and electric utility services provided by corporations subject to regulation by the West Virginia Public Service Commission were excluded from taxation at the time the Sales Tax was first implemented. Concerns over equity and double taxation were possible motivations behind this exclusion. Sales tax on items of necessity, such as public utility services, tends to fall most heavily upon those least able to pay. In any case, natural gas, water, and electric utility services are already subject to an alternative tax (i.e., Business and Occupation Tax). Therefore, a sales tax on the same gross receipts would have represented a form of double taxation.

Before July 1, 1987, transportation services provided by non-municipal providers were subject to the Carrier Income Tax. This alternative tax may have provided a reason to exempt transportation services from the Sales Tax. Since a significant portion of transportation services are provided for businesses, the exclusion may also exist to preclude tax pyramiding upon intermediate activities.

### Revenue Analysis

The value cited above was calculated in isolation from other possible applicable exemptions. Thus, the actual revenue impact resulting from the repeal of this exclusion by itself would not produce the total cited above. This exclusion encompasses the activities of natural gas, water, and electric utilities that are exempt under West Virginia Code §11-15-9(a)(1). That expenditure, listed later in this report, provides for the exemption of sales of natural gas, steam, or water delivered to consumers through mains or pipes and sales of electricity. Other exemptions—such as those for direct use, sales to governmental units, sales to schools, sales to churches, and sales to charitable organizations—would also reduce the stated revenue impact.

The provision of telecommunications services includes a substantial amount of interstate commerce upon which taxation by states is limited. In calculating the value, an attempt was made to separate interstate sales of telecommunications into taxable and nontaxable components. Also, network access charges were excluded from the calculation since these charges could be considered sales for resale. With these noted exceptions, no other exclusions or exemptions were considered in the computation; therefore, caution should be used in adding the above value to any others that appear in this report. Other specific exemptions that would possibly provide overlapping exemption coverage, and thus reduce the stated revenue impact, include sales to governmental units, sales to schools, and sales to churches and charitable organizations.

As stated above, a significant portion of transportation services are provided for businesses. Subjecting transportation services to the Sales Tax may cause some businesses to do their own transportation which, in turn, would be exempt from the sales tax under the direct use exemption.

## SALES OF PERSONAL SERVICES

**STATUTE:** West Virginia Code §11-15-8

**EXCLUSION:** Sales of personal services done to or performed on the person of an Individual.

| **VALUE:** | | |
|---|---|---|
| | **Caregivers** | **$19.0 million** |
| | **Other** | **$12.0 million** |
| | **Total** | **$31.0 million** |

### Rationale

The exclusion of personal services from sales taxation is part of a long tradition associated with the realities of the 1930's when the tax was first instituted. In those days, most personal services would have been difficult to tax because of the existence of numerous small-scale providers who worked for cash. This exemption exists to avoid the administrative and compliance costs associated with numerous small-scale personal service providers.

## SALES OF PROFESSIONAL SERVICES

**STATUTE:** West Virginia Code §11-15-8

**EXCLUSION:** Sales of professional services[3] performed by licensed professionals.

| **VALUE:** | | |
|---|---|---|
| | **Medical** | **$790.0 million** |
| | **Veterinary** | **$23.0 million** |
| | **Legal** | **$38.0 million** |
| | **Accounting** | **$24.0 million** |
| | **Other** | **$30.0 million** |
| | **Total** | **$905.0 million** |

### Rationale

Some professional service exclusions exist out of concern for tax equity while some others may exist out of concern over economic efficiency. The costs of medical services tend to fall disproportionately for those with physical disabilities or acute illnesses. Therefore, a tax on such services would fall more heavily upon those individuals than upon the general populace. Tax

[3] Professional services are generally provided by those with both a specialized level of educational attainment and a license to perform the professional service activity. In this estimate, medical services include those provided by doctors, and hospitals while other services include those provided by veterinarians, engineers, architects, and auctioneers.

equity is thus improved by a medical service exclusion. The medical service exclusion also complements direct government expenditure programs such as Medicaid and Medicare.

A significant number of certain professional services (e.g., legal services and engineering services) are provided for businesses. There is some concern that taxation of these services may lead some businesses to hire their own professional staff to avoid taxation. Some loss of economic efficiency may result. Taxation of business services also results in some tax pyramiding for final consumer goods.

### Revenue Analysis

Some states tax professional services by way of a business gross receipts tax. However, South Dakota is the only state taxing non-medical professional services by way of a traditional sales tax. Statistical data from South Dakota was utilized to help measure the potential sales tax gain for West Virginia from a sales tax on non-medical professional services.

The medical service tax expenditure estimate includes the gross value of tax on all services. However, most gross receipts may not be taxable due to the inability to impose tax on government payers.

## SALES OF SELECTED ADVERTISING

**STATUTE:** West Virginia Code §11-15-9(a)(12)

**EXEMPTION:** Sales of radio and television broadcasting time, preprinted advertising circulars, and newspaper and outdoor advertising space for the advertisement of goods and services.

**VALUE:** **$29.0 million**

### Rationale

The exemption for sales of radio and television broadcast time, preprinted advertising circulars, and newspaper and outdoor advertising space arguably allows local advertising to be treated the same as national advertising. It would be difficult to tax national advertising because the United States Constitution prohibits state interference with interstate commerce. It is also difficult to isolate intrastate transactions from interstate transactions.

## SALES AND SERVICES PERFORMED BY DAY CARE CENTERS AND BABYSITTERS

**STATUTE:** West Virginia Code §§11-15-9(a)(13) and 11-15-9(a)(35)

**EXEMPTIONS:** Sales and services performed by day-care centers; and

Sales of services by individuals who babysit for a profit; provided that the gross receipts of the individual from the performance of babysitting services do not exceed five thousand dollars in a taxable year.

**VALUE:** **$15.3 million**

### Rationale

The day care service exemption presumably promotes the provision of such services to consumers at the least possible cost. The exemption for sales of babysitting services was enacted because most babysitters were not collecting and remitting the tax. Also, most babysitters are not licensed by any State agency and therefore would be difficult to locate to enforce remittance of the Sales Tax.

### Revenue Analysis

The above exemption value does not include payments for sales and services by day care centers made by the West Virginia Department of Health and Human Resources. It also does not include the exemption value for sales of babysitting services. An accurate measure for babysitting services is not possible because such services often involve small cash transactions.

## SALES OF ELECTRONIC DATA PROCESSING SERVICES

**STATUTE:** West Virginia Code §11-15-9(a)(21)

**EXEMPTION:** Sales of electronic data processing services and related software.

**VALUE:** **$10.8 million**

### Rationale

The exemption for electronic data processing services is generally broad in nature and is loosely defined. The language of the exemption has not kept up with technological advances. The recent addition of internet service providers to the growing list of exempt data processing services illustrates the broad scope of this exemption. This makes it difficult to estimate the value of this exemption because there is no clear definition of the exact services exempted.

First passed in 1998, the Internet Tax Freedom Act prohibits multiple and discriminatory taxes on electronic commerce. The Act prevents federal, state, and local governments from taxing internet access and from imposing discriminatory internet-only taxes, such as bit taxes, bandwidth tax and email taxes. It also bars multiple taxes on electronic commerce. However, it does not prohibit the imposition of sales tax or use tax on goods and services provided over the internet;

nor does it relieve in-State vendors from their duty to collect and remit sales tax on internet sales to in-State residents and businesses. The original Act was in effect for ten years, but the Act was extended several times. The Act became permanent law in part of the Trade Facilitation and Trade Enforcement Act of 2015.

### Revenue Analysis

The exemption for electronic data processing services has increased by nearly 64% since the 2022 report. The Bureau of Labor Statistics Producer Price Index (PPI) reported a 3.7% annual increase in data processing and related services since January 2024, largely due to cloud computing. Cloud costs have been rapidly increasing since September 2022 largely due to increased demand in cloud computing during and after the COVID-19 pandemic.

## SALES OF CONTRACTING SERVICES RESULTING IN CAPITAL IMPROVEMENTS

**STATUTE:** West Virginia Code §§11-15-2(b)(3), 11-15-2(b)(18), 11-15-7a, and 11-15-8a

**EXCLUSION:** Contracting services which result in capital improvements are excluded from the definition of taxable services for purposes of the Consumers Sales and Service Tax.

**VALUE:** **$265.0 million**

### Rationale

An exclusion for all sales of contracting services was originally enacted at the time the Sales Tax was implemented. A modification in 1989 essentially retained the exclusion for contracting services resulting in capital improvements while other contracting services became subject to the tax. For purposes of the Sales Tax, a “capital improvement” is any addition or alteration to real property which meets all three of the following requirements:

1. It substantially adds to the value of real property or appreciably prolongs the useful life of the real property;
2. It becomes part of the real property or is permanently affixed to the real property so that removal would cause material damage to the property or article itself; and
3. It is intended to become a permanent installation or to remain there for an indefinite period.

Additional information on exempt and taxable contracting service may be found in the following publications at:
https://tax.wv.gov/TaxProfessionals/GuidanceAndPublications/Pages/TaxProfessionalsGuidanceAndPublications.aspx.

- TSD-310—Capital Improvement Rule: Sales and Use Tax for Construction Trades;
- TSD-315—Sales and Use Tax for Dealers of Factory-Built Homes;
- TSD-325—Sales and Use Tax for Incidental Installation;

Before July 1, 1987, contracting activity was subject to the Business and Occupation Tax. Thus, the exemption originally existed to preclude the double taxation of contracting, once under the Business and Occupation Tax and a second time under the Sales Tax. Also, real property is not historically taxed under the Sales Tax, and the provision of contracting services generally involves real property. The exclusion of capital improvements exists because contracting services resulting in capital improvements generally add to the value of real property. Real property transactions are excluded from sales and use taxes. Contractors are treated as final consumers and must pay tax on their purchases of materials, tools, and equipment for use in capital improvement projects. However, purchases by a contractor directly consumed in the construction, alteration, repair, or improvement of a new or existing building or structure to be used primarily for manufacturing (and certain other activities) are exempt if the purchaser of the contracting services would be entitled to claim the exemption under West Virginia Code §11-15-9(b)(2).

West Virginia Code §11-15-7a clarified the tax treatment on the manufacture, sale, and installation of modular dwellings. Similar to traditional construction of residential dwellings, persons engaged in the manufacture of modular dwellings must pay tax only on the value of the building supplies and materials used in the manufacture of the modular dwelling. Also, building supplies and materials used in the preparation of the site for permanent installation of the modular dwelling are subject to tax.

**Revenue Analysis**

The revenue impact cited above was calculated without consideration of any other applicable exemptions. Thus, the repeal of this exemption would not necessarily yield the amount shown. Other exemptions (e.g., sales to governmental agencies and manufacturers' direct use purchases) may overlap this type of activity.

## SALES OF THE SERVICE OF OPENING AND CLOSING A BURIAL LOT

**STATUTE:** West Virginia Code §11-15-9(a)(30)

**EXEMPTION**: Charges for the services of opening and closing a burial lot.

**VALUE:** **$1.6 million**

**Rationale**

The service of opening and closing a burial lot may be considered an extension of the personal services offered by funeral service providers.

## CHARGES FOR MEMBERSHIPS OR SERVICES PROVIDED BY HEALTH AND FITNESS ORGANIZATIONS

**STATUTE:** West Virginia Code §11-15-9(a)(34)

**EXEMPTION:** Charges for memberships or services provided by health and fitness organizations relating to personalized fitness programs.

**VALUE:** **$3.5 million**

**Rationale**

Originally, the exemption for charges for memberships to health and fitness organizations was presumably enacted to support the community-based activities of YMCAs, YWCAs, and other similar types of organizations. However, the statement of exemption is actually much broader in scope. As written, it includes other for-profit exercise facilities (e.g., Nautilus fitness centers) that do not necessarily support local community-based activities in the same manner as the YMCAs and YWCAs.

## ARTISTIC PERFORMANCES BY ENTERTAINERS

**STATUTE:** West Virginia Code §11-15-9(a)(40)

**EXEMPTION:** Sales of artistic services or artistic performances of an entertainer or performing artist pursuant to a contract if the contract amount does not exceed $3,000.

**VALUE:** **$700,000**

**Rationale**

This exemption exists to remove a tax burden on performances by entertainers and musicians if the contract for each individual performance does not exceed $3,000.

## CHARGES BY MEMBERSHIP ORGANIZATIONS TO THEIR MEMBERS

**STATUTE:** West Virginia Code §11-15-9(a)(41)

**EXEMPTION:** Charges to a member by a membership association or organization which is exempt from paying federal income taxes under Section 501(c)(3) or (c)(6) of the Internal Revenue Code of 1986, as amended, for membership in the association or organization.

**VALUE:** **Minimal**

**Rationale**

The exemption for charges by a membership organization for membership and other services to its members was presumably enacted because of the difficulty in valuing and enforcing a tax on such transactions. Also, this exemption only applies to those organizations or associations that are exempt from paying federal income taxes under Section 501(c)(3) or (c)(6) of the Internal Revenue Code.

## DUES, FEES, AND ASSESSMENTS PAID TO A HOMEOWNERS' ASSOCIATION

**STATUTE:** West Virginia Code §11-15-9o

**EXEMPTION:** Membership dues, fees, and assessments paid to a homeowners' association by a member thereof if the dues, fees, and assessments are for the purpose of permitting or funding the homeowners' association's payment of common expenses when acting in its representative capacity for its members.

**VALUE:** **$800,000**

### Rationale

The exemption for dues, fees, and assessments paid to a homeowners' association by a member was presumably enacted because of the difficulty in valuing and enforcing a tax on such transactions. Only 5.2 percent of West Virginia homeowners participate in an HOA.

# GROUP IV
# COMMUNITY EXEMPTIONS

Several exemptions exist for community and social service activities. These exemptions generally involve organizations providing socially desirable services, often for low-income individuals. The community-related tax expenditures generally exist to promote the activities of the organization. In some cases, collections and compliance costs may be high compared with the potential yield of these tax expenditures. The following exemptions involve a community-related activity:

- Casual and occasional sales of property or services not conducted in a repeated manner or in the ordinary course of repetitive and successive transactions of like character by churches, grant organizations, youth organizations, and organizations donating income to a nonprofit organization (West Virginia Code §11-15-9(a)(14));
- Food purchased or sold by a charitable or private nonprofit organization, a nonprofit organization, or a governmental agency under a program to provide meals to low-income persons at or below cost (West Virginia Code §11-15-9(a)(24)(C));
- Food sold by a charitable or private nonprofit organization, a nonprofit organization, or a governmental agency under a program operating in West Virginia for a minimum of five years to provide food at or below cost to individuals who perform a minimum of two hours community service for each unit of food purchased from the organization (West Virginia Code §11-15-9(a)(24)(D));
- Food sold in an occasional sale by a charitable or nonprofit organization, including volunteer fire departments and rescue squads, if the purpose of the sale is to obtain revenue for the functions and activities of the organization and the revenue obtained is expended for that purpose (West Virginia Code §11-15-9(a)(24)(E));
- Food sold by any religious organization at a social or other gathering conducted by it or under its auspices, if the purpose in selling the food is to obtain revenue for the functions and activities of the organization and the revenue obtained is actually used in carrying on those functions and activities (West Virginia Code §11-15-9(a)(24)(F));
- Food sold by volunteer fire departments and rescue squads that are exempt from federal income taxes under Section 501(c)(3) or (c)(4) of the Internal Revenue Code of 1986, as amended, when the purpose of the sale is to obtain revenue for the functions and activities of the organization and the revenue is exempt from federal income tax and expended for that purpose (West Virginia Code §11-15-9(a)(24)(G));
- Sales of food by little leagues, midget football leagues, youth football, or soccer leagues, band boosters, or other school or athletic booster organizations supporting activities for grades kindergarten through twelve and similar types of organizations, including scouting groups and church youth groups, if the purpose in selling the food is to obtain revenue for the functions and activities of the organization and the revenues obtained from selling the food is actually used in supporting or carrying on functions and activities of the groups (West Virginia Code §11-15-9(a)(25));
- Sales of services by public libraries or by libraries at academic institutions or by libraries at institutions of higher learning (West Virginia Code §11-15-9(a)(36));

- Sales of tangible personal property and services by volunteer fire departments and rescue squads that are exempt from federal income taxes under Section 501(c)(3) or (c)(4) of the Internal Revenue Code of 1986, as amended, if the sole purpose of the sale is to obtain revenue for the functions and activities of the organization and the revenue obtained is exempt from federal income tax and actually expended for that purpose (West Virginia Code §11-15-9(a)(47));
- Sales of property or services to bona fide charitable organizations who make no charge whatsoever for the services they render (West Virginia Code §11-15-9(b)(1));
- Sales of property or services to nationally chartered fraternal or social organizations for the sole purpose of free distribution in public welfare or relief work (West Virginia Code §11-15-9(b)(3));
- Sales and services, firefighting or station house equipment, including construction and automotive, made to any volunteer fire department organized and incorporated under the laws of the State (West Virginia Code §11-15-9(b)(4));
- Sales of building materials or building supplies or other property to an organization qualified under Section 501(c)(3) or (c)(4) of the Internal Revenue Code of 1986, as amended, which are to be installed in, affixed to or incorporated by the organization into real property or into a building or structure which is to be used as permanent low-income housing, transitional housing, an emergency homeless shelter, a domestic violence shelter, or an emergency children and youth shelter if the shelter is owned, managed, developed, or operated by an organization qualified under Section 501(c)(3) or (c)(4) of the Internal Revenue Code of 1986, as amended (West Virginia Code §11-15-9(b)(5));
- Sales of clothing and clothing accessories by organizations that are exempt from federal income taxes under Section 501(c)(3) or (c)(4) of the Internal Revenue Code of 1986, as amended, and that have annual revenue obtained from the sales of less than $40,000 (West Virginia Code §11-15-9l); and
- Sales of taxable services by a corporation or organization that are exempt from federal income tax under Section 501(c)(3) of the Internal Revenue Code (West Virginia Code §11-15-11).

**VALUE: $13.7 million**

# GROUP V
# EDUCATIONAL EXEMPTIONS

The West Virginia Code provides for several exemptions relating to education or educational organizations. These tax expenditures generally exist to promote education in West Virginia. Educational institutions in West Virginia and their students benefit from these exemptions. The following exemptions relate to education:

- Sales of textbooks required to be used in any of the schools of this State or in any institution in this State which qualifies as a nonprofit or educational institution subject to the West Virginia Department of Education and the Arts, the Higher Education Policy Commission or the Council for Community and Technical College Education for universities or colleges located in this State (West Virginia Code §11-15-9(a)(2));
- Casual and occasional sales of property or services by volunteer school support groups (West Virginia Code §11-15-9(a)(14));
- Sales of tickets for activities sponsored by elementary and secondary schools located within this State (West Virginia Code §11-15-9(a)(20));
- Tuition charged for attending educational summer camps (West Virginia Code §11-15-9(a)(22));
- Food purchased or sold by a public or private school, school-sponsored student organizations, or school-sponsored parent-teacher associations to students enrolled in such school or to employees of such school during normal school hours (West Virginia Code §11-15-9(a)(24)(A));
- Food purchased or sold by a public or private college or university or by a student organization officially recognized by the college or university to students enrolled at the college or university when the sales are made on a contract basis (West Virginia Code §11-15-9(a)(24)(B));
- Food sold by band boosters or other school or athletic booster organizations supporting activities for grades kindergarten through twelve (West Virginia Code §11-15-9(a)(25));
- Charges for room and meals by fraternities and sororities to their members (West Virginia Code §11-15-9(a)(26));
- Sales of music instructional services by a music teacher (West Virginia Code §11-15-9(a)(40)), and
- Casual and occasional sales or property or services by not-for-profit volunteer school support groups for elementary or secondary schools located in West Virginia, whether the group has or does not have a 501(c)(3) or (c)(4) determination provided that the organization is a bona fide, not-for-profit volunteer charitable or public organization eligible for exemption under 501(c)(3) or (c)(4) if it were to see an exemption determination letter and that these fundraising events are limited to eighteen events per year and each event lasts no more than fourteen consecutive days (West Virginia Code §11-15-9q).

**VALUE: $18.4 million**

## Revenue Analysis

Some items such as textbooks, room and board at colleges and universities and charges for events sponsored by schools (i.e., sporting events and concerts) have risen since the last Expenditure Study on Consumers Sales and Service Tax and Use Tax Expenditures in 2022. However, the total value for the expenditure for all the educational exemptions has declined significantly due to a drop in the amount collected for food sold by schools. Most schools offer free breakfast and lunch to all students so there is no amount due by parents or guardians.

# GROUP VI
# MISCELLANEOUS EXPENDITURES

The West Virginia Code concerning the Consumers Sales and Service Tax provides for several miscellaneous deductions, exclusions, and exemptions not classified under any of the previous five categories. Some of these provisions are unique to West Virginia. The following is a list of several miscellaneous expenditures not previously discussed:

- Clothing Voucher Purchases;
- Sales of Lottery Tickets by Licensed Lottery Agents;
- Sales by Local Governmental Units;
- Various Miscellaneous Exemptions;
- Qualified Purchases of Selected Property and Services for a New or Expanded Warehouse or Distribution Facility;
- West Virginia Tourism Development Credit;
- Exemption for BUILD WV Construction;
- Monetary Allowances from Streamlined Sales; and
- Sales Tax Holiday

An analysis of these tax expenditures follows.

## CLOTHING VOUCHER PURCHASES

**STATUTE:** West Virginia Code §§11-15-9(a)(3) and 9-9-5

**EXEMPTION:** Purchases made with the clothing vouchers issued by West Virginia Department of Health & Human Resources for low-income, school-aged children.

**VALUE:** **$900,000**

### Rationale

A School Clothing Allowance Program is available to assist parents and/or caretaker relatives to provide clothing for school-age children. West Virginia Code §9-9-5 allows for some expenditures from the WV WORKS program fund, a special account within the state treasury, to finance Temporary Assistance to Needy Families (TANF), including clothing vouchers. Families receiving TANF are automatically eligible to receive a clothing voucher for each eligible child. Families with income below 100.0 percent of the Federal Poverty Level are also eligible to receive a clothing voucher for each eligible school-aged child in the home. The family is not required to apply for or receive a WV WORKS check to be eligible for the clothing vouchers. This program is offered once per year and is not considered as WV WORKS cash assistance in West Virginia. Purchases made with these clothing vouchers are exempt from Sales Tax in West Virginia. Each eligible child will receive a $200 clothing voucher. As of Fiscal Year 2021, the State clothing vouchers are now issued as cash assistance payments via an EBT card.

## SALES OF LOTTERY TICKETS BY LICENSED LOTTERY AGENTS

**STATUTE:** West Virginia Code §11-15-9(a)(16)

**EXEMPTION:** Sales of lottery tickets and materials by licensed lottery sales agents and lottery retailers authorized by the State Lottery Commission.

**VALUE:** **$15.0 million**

### Rationale

The exemption for sales of lottery tickets and materials exists because the lottery is run by the State government. All lottery ticket money, net of costs and prizes, is deposited in the State treasury.

## SALES BY LOCAL GOVERNMENTAL UNITS

**STATUTE**: West Virginia Code §11-15-9(a)(42)

**EXEMPTION:** Sales of governmental services or governmental materials by county assessors, county sheriffs, county clerks, or circuit clerks in the normal course of local government operations.

**VALUE:** **$500,000**

### Rationale

The imposition of sales tax on sales of products sold by local governmental units during their normal operations would reduce the accessibility of those products to the public.

## VARIOUS MISCELLANEOUS EXEMPTIONS

**STATUTE:** West Virginia Code §11-15-9(a)(29)

**EXEMPTION:** Sales of tangible personal property or services to any person who claims exemption from the Consumers Sales and Service Tax pursuant to the provisions of any other chapter of the West Virginia Code.

**VALUE:** **Not available**

### Rationale

Although the rationale behind these miscellaneous expenditures may vary from one exemption to the next, alternative taxation (e.g., racetracks) or special service promotion (e.g., ambulance service) are presumably the predominant reasons for these exemptions. Several of these exemptions (i.e., sales to Housing Development Fund) overlap with the sales to governmental entities exemption (West Virginia Code §11-15-9(a)(3)). Listed below are the various miscellaneous exemptions:

- Sales to Ambulance Authorities (West Virginia Code §7-15-13);
- Sales to Urban Mass Transportation Authorities (West Virginia Code §8-27-20);
- Sales of Goods at a State Military Training Facility or a State Reservation Under Adjutant General's Jurisdiction (West Virginia Code §15-1H-5);
- Sales to Parkways Authority (West Virginia Code §17-16A-16);
- Sales to Horse and Dog Racing Associations Subject to License Tax (West Virginia Code §19-23-12);
- Purchases for Park Development Projects (West Virginia Code §20-5-6);
- Sales to Solid Waste Management Board (West Virginia Code §22C-3-19);
- Sales to Economic Development Authority (West Virginia Code §31-15-17);
- Sales to Housing Development Fund (West Virginia Code §31-18-18);
- Sales to Jail Authority (West Virginia Code §31-20-19);
- Sales to Credit Unions (West Virginia Code §31C-2-8);
- Sales to Hospital Service Corporations (West Virginia Code §33-24-4); and
- Sales to Homes and Asylums of Fraternal Orders (West Virginia Code §35-3-1).

## QUALIFIED PURCHASES OF SELECTED PROPERTY AND SERVICES FOR A NEW OR EXPANDED WAREHOUSE OR DISTRIBUTION FACILITY

**STATUTE:** West Virginia Code §11-15-9n

**EXEMPTION:** Qualified purchases of computers and computer software, primary material handling equipment, racking and racking systems, and components thereof, building materials and tangible personal property installed into or directly used or consumed in the construction, addition, alteration, or improvement of a qualified, new or expanded warehouse or distribution facility, as such terms are defined in this section (West Virginia Code §11-15-9n), purchased during the expansion period.

**VALUE:** **$0**

### Rationale

This exemption presumably exists to encourage the location of large warehouses or distribution facilities in West Virginia that create additional direct and indirect jobs. To qualify for the exemption, the new or expanded warehouse or distribution facility must employ 300 or more West Virginia domiciled West Virginia residents as full-time employees in the warehouse or distribution facility once the expansion (i.e., construction, addition, alteration, or improvement) period is complete. Additionally, to qualify for the exemption, the investment in real and personal property for the new or expanded warehouse or distribution facility must be $50 million or more. For purposes of the exemption, the qualified, new, or expanded warehouse or distribution facility does not include a building or facility where tangible personal property is manufactured, fabricated, or assembled, or a building or facility where annual calendar year retail sales of tangible personal property are made over the counter from the facility to the general public if such sales exceed 5.0 percent of total annual calendar year revenues of the facility during the same period.

## WEST VIRGINIA TOURISM DEVELOPMENT CREDIT

**STATUTE:** West Virginia Code §§5B-2E-7 and 11-15-34

**EXEMPTION:** Approved companies are allowed a credit against the Consumers Sales and Service Tax on sales generated by or derived from the operations of the tourism development project.

**VALUE:** **$3.2 million**

### Rationale

As stated in the enabling legislation, the credit was enacted “to induce the creation of new, or the expansion of existing, tourism development projects within the State in order to advance the public purposes of relieving unemployment by preserving and creating jobs and by preserving and creating new and greater sources of revenues for the support of public services provided by the state.”

### Revenue Analysis

The cost of the State Tourism Development Credit has doubled within the past three years. In 2023, $43 million was dedicated to new investments related to this credit. The Tourism Development Act Tax Credit Program received more applications within the past 6 years than within its first 14 years of existence. Since the credit's inception in 2004, a total of $357 million has been spent on investments related to this credit.

## EXEMPTION FOR BUILD WV CONSTRUCTION

**STATUTE:** West Virginia Code §5B-2L-7

**EXEMPTION:** Purchases of building materials, tangible personal property, and services by a construction contractor or construction subcontractor directly used in construction of a certified BUILD WV project property certified pursuant to the provisions of this article.

**VALUE:** **$2.0 million**

### Rationale

The BUILD WV ACT was passed during the 2022 Legislative Session to attract much-needed housing development projects. A project must generate approved costs of more than $3.0 million or include at least six residential houses. This Sales Tax exemption includes common areas, infrastructure and services directly used in construction, repair, maintenance and refurbishment of certified BUILD WV property. During Fiscal Year 2024, seven projects with a cost of $108.9 million were approved. The maximum allotment for BUILD WV approvals in $150 million per year.

## MONETARY ALLOWANCES FROM STREAMLINED SALES TAX

**STATUTE:** West Virginia Code §11-15B-30

**EXEMPTION:** Monetary allowances for sales tax collection to certified service providers and to sellers registered under the Streamlined Sales and Use Tax Agreement.

**VALUE:** **$980,000**

### Rationale

The monetary allowance cited in the Streamlined Sales and Use Tax Agreement presumably exists to provide reasonable compensation for the incremental expenses incurred in establishing or maintaining a uniform system for administering, collecting, and remitting sales and use taxes. A monetary allowance has been permitted following the 2006 completion of the "cost of collection study" required by the Streamlined Sales and Use Tax Agreement.

### Revenue Analysis

There has been a significant increase in the value of this expenditure due to an increased number of streaming service providers claiming this monetary allowance in recent years. Additionally, other online retailers have also increased monetary allowances from the Streamlined Sales and Use Tax Agreement within the past several years.

## SALES TAX HOLIDAY

**STATUTE:** West Virginia Code §11-15-9s

**EXEMPTION:** Sales of clothing, school instructional materials, laptop or tablet computers, and sports equipment purchased on the first Sunday of August or the previous Friday or Saturday or the following Monday.

**VALUE:** **$3.4 million**

### Rationale

The Sales Tax Holiday exemption exists to provide temporary tax relief to consumers purchasing back-to-school supplies.

# GROUP VII
# STATUTORY PROVISIONS THAT ARE NOT TRUE EXPENDITURES

The West Virginia Consumers Sales and Service Tax Law contains several citations which arguably are not true expenditures but have been implicitly codified to improve clarification of the Law. The expenditures in this section are classified in sub-groups as follows: federally mandated exemptions, model sales tax components, provisions to avoid double taxation, and a final sub-group that includes items that most, if not all, other states exempt and a special revenue transfer mechanism.

## FEDERALLY MANDATED EXEMPTIONS

The following exemptions are not tax expenditures because they are excluded from state taxation by a federal law or a federal constitutional amendment:

- Sales to the United States Government;
- Food Stamp and WIC Exemption;
- Transportation of Passengers in Interstate Commerce; and
- Sales to Persons Exempt Under Laws of the United States.

### SALES TO THE UNITED STATES GOVERNMENT

**STATUTE:** West Virginia Code §11-15-9(a)(3)

**EXEMPTION:** Sales of property or services to the United States government.

**VALUE:** **$60.7 million**

#### Rationale

The exemption for sales of tangible property and services to the United States government is required by the federal supremacy clause in the United States Constitution. Since state and local governmental units are prohibited from levying direct taxes upon the United States government, this exemption is not a tax expenditure.

The United States government may effectively pay some Sales Tax in West Virginia. In cases where a contractor or supplier is charged tax on their purchases of intermediate goods or services incorporated into final goods, the sales tax may be included in the final contract price. For example, building materials incorporated into a federal project are subject to Sales Tax whenever purchased by a contractor. However, the United States government may never be held legally liable for direct payment of a state sales tax.

## FOOD STAMP AND WIC EXEMPTION

**STATUTE:** West Virginia Code §11-15-9(a)(19)

**EXEMPTION:** Sales of tangible personal property or services purchased and lawfully paid for with food stamps pursuant to the federal food stamp program or with drafts issued through the West Virginia special supplement food program for women, infants and children.

**VALUE:** **$35.6 million**

### Rationale

Exemption for food purchased under the federal Supplemental Nutrition Assistance Program (SNAP; formerly the Food Stamp Program) or under the Special Supplemental Nutrition Program for Women, Infants, and Children (generally known as the WIC program) is required by federal law. Accordingly, it is not considered a tax expenditure. However, even without the federal prohibition, it could be justified as a tax expenditure enacted to reduce the absolute burden of the Sales Tax upon the poor. Food and food ingredients purchased through the SNAP and WIC programs represent roughly 17.4 percent of total West Virginia food purchases for home consumption.

## TRANSPORTATION OF PASSENGERS IN INTERSTATE COMMERCE

**STATUTE:** West Virginia Code §11-15-9(a)(27)

**EXEMPTION:** Sales of or charges for the transportation of passengers in interstate commerce.

**VALUE**: **Not available**

### Rationale

This exemption is an affirmation of federal law restricting the taxation of interstate commerce activities and therefore does not constitute a tax expenditure. A tax on interstate transportation services may place a burden on interstate commerce unless such tax would be apportioned to the amount of service occurring within West Virginia. Any tax placing a burden on interstate commerce could be in violation of the Commerce Clause of the United States Constitution if determined to be effectively discriminatory.

The exemption does not apply to intrastate transportation services. However, as noted elsewhere, transportation services subject to regulation by the West Virginia Public Service Commission are exempt from taxation regardless of origin or destination.

## SALES TO PERSONS EXEMPT UNDER LAWS OF THE UNITED STATES

**STATUTE:** West Virginia Code §11-15-9(a)(28)

**EXEMPTION:** Sales of tangible personal property or services to any person which this State is prohibited from taxing under the laws of the United States or under the Constitution of this State.

**VALUE:** **Minimal**

### Rationale

Examples of person exempt under laws of the United States include:

- Sales to federally chartered credit unions (12 U.S.C. 1768 and 122);
- Sales to foreign diplomatic and consular personnel (22 U.S.C. 288 et. seq. et. al.); and
- Sales placing burdens on interstate commerce or foreign commerce, and transactions beyond the borders of West Virginia (Commerce Clause of the United States Constitution and Federal Export and Import Clause).

The rationale behind these exemptions varies significantly from one exemption to the next. For example, the promotion of credit unions and international relations is a possible explanation of the exemptions for purchases by credit unions and diplomats, respectively. Exemptions attributable to federal laws, court decisions and international treaties are not tax expenditures because state lawmakers have no authority to tax such transactions.

## MODEL SALES TAX COMPONENTS

Three broad-based exclusions from sales and use tax exist in all states. Real property, intangible property, and services of an employee for the employer are universally exempt from retail sales taxation. In addition, the Consumers Sales and Service Tax Law (West Virginia Code §11-15-1 et seq and 11-15B-27) and the West Virginia Consumers Sales and Service Tax and Use Tax Regulations (110 C.S.R. 15) provide deductions for trade-ins, bad debts, returns and allowances, cash discounts, and finance and carrying charges to vendors remitting the tax to the State. These deductions represent adjustments to total taxable gross receipts. Without the benefit of such deductions (excluding finance and carrying charges), taxable gross receipts would tend to be overstated resulting in an effective tax greater than the statutory rate. The deduction for finance and carrying charges is in line with an overall exclusion for intangible items. Further discussion of the sales of real or intangible property, the services of an employee and the various deductions cited in this paragraph is not presented because they are an integral part of the Sales Tax.

Other specific expenditures included in this sub-group that are also considered to be integral parts of the Sales Tax include the following:

- Sales of Property in Isolated Transactions;
- Sale for Resale; and
- Credit for Sales Tax Paid to Other States.

## SALES OF PROPERTY IN ISOLATED TRANSACTIONS

**STATUTE:** West Virginia Code §11-15-9(a)(7)

**EXEMPTION:** An isolated transaction in which any taxable service or any tangible personal property is sold, transferred, offered for sale or delivered by the owner thereof or by his representative for the owner's account, such sale, transfer, offer for sale or delivery not being made in the ordinary course of repeated and successive transactions of like character by such owner or by the owner's representative on the owner's account is exempt.

### Rationale

The exemption for isolated transactions presumably exists because it would be extremely difficult to collect such tax. Most individuals selling items in isolated transactions are not registered to collect sales and use taxes on behalf of the State because they are not generally engaged in business activities. To qualify for exemption, no isolated sale may last for a period exceeding 48 hours in duration, and no individual may have more than four isolated transactions within any 12-month period.

## SALE FOR RESALE

**STATUTE:** West Virginia Code §11-15-9(a)(9)

**EXEMPTION:** Sales of tangible property to a person for the purpose of resale in the form of tangible personal property.

### Rationale

The desired intent of a sales and use tax is to levy the tax on the ultimate consumer, not on the intermediate purchaser. This exemption applies to wholesale goods purchased for resale without any product modification other than repackaging. This provision eliminates the potential pyramid effect of a tax imposed on wholesale goods and services before sale to the ultimate consumer. The exemption also removes the possibility of double taxation for the same goods and services sold more than once.

## CREDIT FOR SALES TAX PAID TO OTHER STATES

**STATUTE:** West Virginia Code §11-15A-10a

**EXEMPTION:** A credit is allowed against a taxpayer's Use Tax liability for sales tax lawfully paid to another state provided that the amount of the credit allowed shall not exceed the amount of tax imposed on the use of property in West Virginia.

### Rationale

Any tangible personal property purchased in another state for use within West Virginia is taxable under the Use Tax law. If the sales tax is lawfully paid to another state, then the purchaser is given credit against West Virginia Use Tax liability. This credit does not include any local taxes. Even before the enactment of the credit, the general policy was not to impose double taxation in cases where the taxpayer had paid sales tax to another state. Although double taxation is not specifically barred by the Constitution, the double imposition of a sales tax is not favored. This credit is an integral part of the tax structure designed to eliminate double taxation and is therefore not considered a tax expenditure.

## PROVISIONS TO AVOID DOUBLE TAXATION

Exemptions exist for several commodities and services subject to alternative taxation. The alternative tax is often very similar to the Sales Tax both in terms of rate and base. Therefore, these exemptions tend to eliminate the possibility of double taxation (i.e., a sales tax based on sales price plus an alternative tax based on sales price). To the extent double taxation is avoided, these exemptions may be considered as integral components of the model tax structure and not as tax expenditures. The following exemptions cover certain sales subject to alternative taxation:

- Sales of Natural Gas Delivered Through Mains or Pipes;
- Sales of Steam and Water Delivered Through Mains or Pipes;
- Sales of Electricity; and
- Sales and Services Subject to Special District Excise Tax.

An analysis of these exemptions follows, along with a brief description of the alternative tax.

## SALES OF NATURAL GAS DELIVERED THROUGH MAINS OR PIPES

**STATUTE:** West Virginia Code §11-15-9(a)(1)

**EXEMPTION:** Sales of natural gas delivered to consumers through mains or pipes.

**VALUE:** **$52.0 million**

### Rationale

Prior to the deregulation of the natural gas industry, sales of natural gas through mains or pipes were primarily made by companies classified as public utilities. Sales of natural gas by public utilities are subject to the Business and Occupation Tax. Thus, this exemption exists to preclude double taxation (i.e., once under the Business and Occupation Tax and a second time under the Sales Tax) of sales of natural gas. However, companies that are not classified as public utilities currently make substantial sales of natural gas, particularly to large consumers. These non-utility sales are not subject to either the Sales Tax or the Business and Occupation Tax.

### Revenue Analysis

The repeal of this exemption would not necessarily result in any increase in Sales Tax revenue. Some sales of natural gas delivered through mains or pipes are made by public utilities subject to the control of the Public Service Commission. West Virginia Code §11-15-8 excludes services provided by businesses regulated by the Public Service Commission from the Consumers Sales and Service Tax. Additionally, most sales by non-utilities would likely qualify for the exemption provided for the sales of services directly used in manufacturing, transportation, transmission, communications, or the production of natural resources. Some natural gas sales would be exempt from the Sales Tax due to other applicable exemptions. These exemptions include sales to governmental units, schools, churches, and charitable organizations under certain conditions. Due to overlapping exemptions for natural gas sales, caution is necessary in adding this exemption value and the stated exemption values elsewhere in this report.

## SALES OF STEAM AND WATER DELIVERED THROUGH MAINS OR PIPES

**STATUTE:** West Virginia Code §11-15-9(a)(1)

**EXEMPTION:** Sales of steam and water delivered to consumers through mains or pipes.

**VALUE:** **$30.0 million**

### Rationale

This exemption was enacted at the time the Consumers Sales and Service Tax was first implemented. Steam and water delivered through pipes or mains by businesses are subject to the Business and Occupation Tax. This exemption exists to prevent the taxation of the sale of this commodity under both the Business and Occupation Tax and the Consumers Sales and Service Tax.

### Revenue Analysis

The value of this exemption has been calculated in isolation from other applicable exemptions. As with other public utility sales tax exemptions, this exemption is a subset of other expenditures in this report. The providers of water delivered through mains or pipes are utilities subject to regulation by the Public Service Commission. West Virginia Code §11-15-8 provides for an exclusion from Consumers Sales and Service Tax for services provided by corporations that are subject to regulation by the Public Service Commission. Thus, this exemption could, in essence, be repealed and there would be no change in Sales Tax revenue. In addition, the exemption for the sales of services directly used in manufacturing, transportation, transmission, communication, or the production of natural resources would exclude large quantities from taxation. Also exempt are sales to government units, sales to schools, and sales to churches and charitable organizations under certain conditions.

## SALES OF ELECTRICITY

**STATUTE:** West Virginia Code §11-15-9(a)(1)

**EXEMPTION:** Sales of electricity.

**VALUE:** **$197.0 million**

### Rationale

Sales of electricity are exempt from the Sales Tax due to the Business and Occupation Tax on businesses providing electricity. This exemption exists to avoid double taxation of electricity sales under both the Sales Tax and the alternative Business and Occupation Tax.

### Revenue Analysis

The calculation of this exemption was made without computing the effect of other applicable exemptions. The Public Service Commission regulates companies that sell electricity in West Virginia. Companies subject to regulation by the Public Service Commission are granted an exclusion from the Sales Tax by West Virginia Code §11-15-8 on sales of electric power. Due to such overlapping exemptions, the removal of electricity sales from the exemption provided by West Virginia Code §11-15-9(a)(1) would not result in any increase in Sales Tax revenue. Additionally, other exemptions in this report applying to certain sales, or certain groups, would exclude significant amounts of potential revenue from the Sales Tax. Due to the extensive overlapping exemption coverage for the sales of electricity, caution should be used in adding the stated value of this exemption with the stated value of other expenditures in this report.

## SALES AND SERVICES SUBJECT TO SPECIAL DISTRICT EXCISE TAX

**STATUTE:** West Virginia Code §11-15-9f

**EXEMPTION:** Any sale or service upon which a special district excise tax is paid ... is exempt.

**VALUE:** **$30.3 million**

### Rationale

West Virginia Code §§7-22-12 and 8-38-12 permit counties and municipalities, respectively, to levy a special district excise tax upon sales and services within a defined economic opportunity development district. The special district excise tax must be authorized by the Legislature. Generally, the special district excise tax acts as a “sales tax increment financing” tool for the benefit of economic opportunity development districts. Since the base and rate of the special district excise tax are the same as the Sales Tax, this exemption exists to preclude double taxation of sales and services within the defined district. The special district excise tax generally serves to allocate tax to specific local areas.

### Revenue Analysis

Revenue from the Special District Excise Tax has increased significantly since the 2022 report. Much of the increase is due to increased retail development within the economic opportunity development districts of Charles Pointe (Harrison County), University Town Center (Monongalia County), and South Charleston (Kanawha County).

## BUSINESS INPUT EXEMPTIONS

Exemptions exist for several goods and services that are business inputs. The purpose of a Sales Tax is to place the burden of payment of the tax on the final consumer of a good or service, not on the intermediate processes of production. Therefore, these exemptions tend to eliminate the possibility of "cascading" or "pyramiding" that would increase business costs and thus increase the costs of goods and services for the consumer. The following exemptions cover specific business inputs:

- Sales to Agricultural Producers;
- Sales of Services and Leases of Equipment Between Members of the Same Controlled Group;
- Sales of Motion Picture Groups to Exhibitors;
- Sales of Coin-operated Video Arcade Machines to Businesses for Public Use;
- Sales of Services and Tangible Personal Property for the Repair, Remodeling, and Maintenance of Aircraft;
- Commissions Received by a Manufacturer's Representative;
- Sales of Primary Opinion Research Services;
- Sales for Use in the Production of Value-added Products;
- Sales of Soap Used at Car Wash Facilities;
- Commissions Received by a Travel Agency;
- Technical Evaluations Provided by Environmental and Industrial Consultants;
- Lodging Franchise Fees;
- Payments as Part of a Sales Incentive Program;
- Sales and Services Directly Used or Consumed in Certain Business Activities;
- Video Lottery Terminals and Games; and
- Certain Charges by Mortgage Brokers, Lenders, and Loan Originators.

For purposes of this report, these exemptions are considered a basic part of the Sales Tax structure because State lawmakers have no authority to tax such transactions. A brief description and analysis of these exemptions follows. Exemption values are presented although additional revenue would not be realized through legislative action.

### SALES TO AGRICULTURAL PRODUCERS

**STATUTE:** West Virginia Code §11-15-9(a)(8)

**EXEMPTION:** Sales of tangible personal property or of any taxable services rendered for use or consumption in connection with the commercial production of an agricultural product the ultimate sale of which will be subject to the Consumers Sales and Service Tax.

**VALUE:** **$27.2 million**

#### Rationale

As previously mentioned in this report, one of the components of a model sales tax is that the tax should only apply to consumption expenditures and not to units of production. This exemption allows commercial farmers to make tax-exempt purchases of equipment, seeds, feed,

fertilizer, pesticides, and other items used in the commercial production of an agricultural product. A tax on these intermediary goods used or consumed in producing agricultural products would lead to some pyramiding of tax on final consumer goods. The final goods are ultimately taxable to the final consumer unless exempt under another tax expenditure.

## SALES OF SERVICES AND LEASES OF EQUIPMENT BETWEEN MEMBERS OF THE SAME CONTROLLED GROUP

**STATUTE:** West Virginia Code §11-15-9(a)(23)

**EXEMPTION:** Dispensing of services by one corporation, partnership, or limited liability company to another when both entities are members of the same controlled group.

Leases of heavy equipment or machinery among corporations, partnerships, or limited liability companies when the entities are members of the same controlled group or are related taxpayers.

**VALUE:** **Not available**

### Rationale

The exemption for the dispensing of services and leasing of equipment or machinery between members of the same controlled group was presumably enacted because of the difficulty of valuing such transactions. Also, enforcing a tax on such transactions would be difficult.

## SALES OF MOTION PICTURE FILMS TO EXHIBITORS

**STATUTE:** West Virginia Code §11-15-9(a)(32)

**EXEMPTION:** Sales of motion picture films to motion picture exhibitors for exhibition if the sale of tickets or the charge for admission to the exhibition of the film is subject to tax.

**VALUE:** **$1.1 million**

### Rationale

Motion picture films are usually leased from distributors for a period and shown to the patrons of theaters for an admission charge. In West Virginia, the admission charge is subject to the Sales Tax. Although motion picture films are generally leased rather than purchased, West Virginia Code §11-15-2(b)(17) includes leasing or renting in the definition of sales.

In transactions where the sale or lease of motion picture films is followed by the exhibition of the film for an admission charge, the exhibitor is not the final consumer. Thus, this exemption presumably exists due to the possible consideration of leasing motion picture films subject to subsequent admission charges as a sale for resale. Therefore, whether the theater was the end user or not, the lease of the file to the theater would not be taxable.

### Revenue Analysis

Numerous events in recent years have impacted the demand for motion picture films shown in theaters. The pandemic kept would-be moviegoers away from public theaters for an extended period, and moviegoers grew accustomed to the convenience of at-home streaming. More platforms were developed to support at-home streaming of movies to provide better and more efficient access. Additionally, strikes in Hollywood in recent years halted or delayed multiple film productions.

## SALES OF COIN-OPERATED VIDEO ARCADE MACHINES TO BUSINESSES FOR PUBLIC USE

**STATUTE:** West Virginia Code §11-15-9(a)(32)

**EXEMPTION:** Sales of coin-operated video arcade machines or video arcade games to a person engaged in the business of providing such machines to the public for a charge upon which the tax is imposed.

**VALUE:** **Minimal**

### Rationale

A possible rationale for this exemption is that such sales are to some extent sales for resale. The machines are leased to businesses leasing the machines to players depositing coins for each use. However, the sale of coin-operated washers and dryers to self-service laundromats is taxable as is the use of the machines. Additionally, other retailers and service providers generally do not have a similar direct use exemption from taxation.

## SALES OF SERVICES AND TANGIBLE PERSONAL PROPERTY FOR THE REPAIR, REMODELING, AND MAINTENANCE OF AIRCRAFT

**STATUTE:** West Virginia Code §§§11-15-9(a)(33), 11-15-9(p), and 11-15-9(t)

**EXEMPTION:** The following sales of services and tangible personal property for the repair, remodeling, and maintenance of aircraft are exempt from tax:

- Sales of aircraft repair, remodeling, and maintenance services when the services are to an aircraft operated by a certified or licensed carrier of persons or property, or by a governmental entity, or to an engine or other component part of an aircraft operated by a certificated or licensed carrier of persons or property, or by a governmental entity, and sales of tangible personal property that is permanently affixed or permanently attached as a component part of an aircraft owned or operated by a certificated or licensed carrier of persons or property, or by a governmental entity, as part of the repair, remodeling or maintenance service and sales of machinery, tools or equipment, directly used or consumed exclusively in the repair, remodeling or maintenance of aircraft, aircraft engines or aircraft component parts, for a certificated or licensed carrier of persons or property, or for a governmental entity;
- Purchases of services and tangible personal property sold for the repair, remodeling, and maintenance of aircraft operated under a fractional ownership program. Fractional Ownership Program is defined as any system of aircraft ownership and exchange that consists of all the elements set forth in Federal Aviation Regulation Part 91, Subpart K, Section 91.1001; and
- Sales of aircraft repair, remodeling, and maintenance services, or to an engine or other component part of an aircraft; sales of tangible personal property that is permanently affixed or attached as a component part of an aircraft, as part of the repair, remodeling, or maintenance service; and sales of machinery, tools, or equipment directly used or consumed exclusively in the repair, remodeling, or maintenance of aircraft, aircraft engines, or aircraft component parts for an aircraft, or used exclusively in combination with the purposes specified under this subsection and the purposes specified in W.Va. Code §11-15-9(a)(33).

**VALUE**: **$4.7 million per year**

### Rationale

The exemption presumably exists to promote the aeronautics industry in West Virginia. The imposition of sales tax on purchases of services and tangible personal property sold for the repair, remodeling, and maintenance of aircraft would place West Virginia businesses at a competitive disadvantage with those states that do not impose sales tax on these services.

### Revenue Analysis

The addition of exemption §11-15-9(t) during the 2021 regular session extended the existing exemptions for the repair, remodeling, and maintenance of aircraft to include all aircraft regardless of ownership or use. This exemption supersedes the previous exemptions and technically renders them unnecessary.

## COMMISSIONS RECEIVED BY A MANUFACTURER'S REPRESENTATIVE

**STATUTE:** West Virginia Code §11-15-9(a)(37)

**EXEMPTION:** Commissions received by a manufacturer's representative.

**VALUE:** **$75,000**

### Rationale

The imposition of sales tax on commissions received by manufacturer's representatives would place West Virginia at a competitive disadvantage with those states that do not impose sales tax on these services.

## SALES OF PRIMARY OPINION RESEARCH SERVICES

**STATUTE:** West Virginia Code §11-15-9(a)(38)

**EXEMPTION:** Sales of primary opinion research services when:

- The services are provided to an out-of-state client;
- The results of the service activities, including, but not limited to, reports, lists of focus group recruits and compilation of data are transferred to the client across state lines by mail, wire, or other means of interstate commerce, for use by the client outside the State of West Virginia; and
- The transfer of the results of the service activities is an indispensable part of the overall service.

**VALUE:** **$400,000**

### Rationale

The imposition of sales tax on sales of primary opinion research services provided to out-of- state clients would place those West Virginia businesses that provide these services at a competitive disadvantage with businesses in those states that do not impose sales tax on these services.

## SALES FOR USE IN THE PRODUCTION OF VALUE-ADDED PRODUCTS

**STATUTE:** West Virginia Code §11-15-9(a)(39)

**EXEMPTION:** Sales of property or services to persons within the State when those sales are for the purposes of the production of value-added products. Value-added products means the following products derived from processing a raw agricultural product:

- Lumber into furniture, toys, collectibles, and home furnishings;
- Fruits into wine;
- Honey into wine;
- Wool into fabric;
- Raw hides into semi-finished or finished leather products;
- Milk into cheese;
- Fruits or vegetables into a dried, canned, or frozen product;
- Feeder cattle into commonly accepted slaughter weights;
- Aquatic animals into a dried, canned, cooked, or frozen product; and
- Poultry into a dried, canned, cooked, or frozen product.

**VALUE:** **Minimal**

### Rationale

The items included in this expenditure are inputs for the production of products that will be sold to final consumers. Thus, this expenditure is considered to be part of a model sales tax. This expenditure presumably exists to encourage the production of these products and ensure that a greater proportion of the value attributable to these activities remains in the State.
Revenue Analysis

Virtually all of the expenditure value created by this provision would already be exempt from sales tax collection because of one or more other provisions of the sales tax law.

## SALES OF SOAP USED AT CAR WASH FACILITIES

**STATUTE:** West Virginia Code §11-15-9(a)(44)

**EXEMPTION**: Sales of soap to be used at car wash facilities.

**VALUE:** **$25,000**

### Rationale

The exemption for sales of soap used at car wash facilities was presumably enacted to minimize the effects of pyramiding, since the cost of the soap is included in the total price of the car wash.

## COMMISSIONS RECEIVED BY A TRAVEL AGENCY

**STATUTE:** West Virginia Code §11-15-9(a)(45)

**EXEMPTION:** Commissions received by a travel agency from an out-of-state vendor.

**VALUE:** **$460,000**

### Rationale

The imposition of sales tax on commissions received by travel agencies would place West Virginia at a competitive disadvantage with those states that do not impose sales tax on these services.

## TECHNICAL EVALUATIONS PROVIDED BY ENVIRONMENTAL AND INDUSTRIAL CONSULTANTS

**STATUTE:** West Virginia Code §§11-15-9(a)(46) and 11-15-9c

**EXEMPTION:** Service of providing technical evaluations for compliance with federal and state environmental standards provided by environmental and industrial consultants who have formal certification through the West Virginia Department of Environmental Protection or the West Virginia Bureau for Public Health or both.

**VALUE:** **$2.0 million**

### Rationale

The imposition of sales tax on environmental testing laboratories would place West Virginia at a competitive disadvantage with those states that do not impose sales tax on these services.

### Revenue Analysis

Increasing requirements for evaluations by environmental and industrial consultants are being driven by stricter environmental regulations, growing public concern about sustainability, and a push towards corporate social responsibility. This has led to increased demand for more comprehensive assessments that consider a wider range of environmental impacts, including emerging contaminants, supply chain sustainability, and detailed data reporting to demonstrate compliance and responsible practices.

## LODGING FRANCHISE FEES

**STATUTE:** West Virginia Code §11-15-9(a)(48)

**EXEMPTION:** Lodging franchise fees, including royalties, marketing fees, reservation system fees, or other fees that have been or may be imposed by a lodging franchiser as a condition of the franchise agreement.

**VALUE:** **$3.8 million**

### Rationale

The imposition of sales tax on lodging franchise fees would place West Virginia at a competitive disadvantage with those states that do not impose sales tax on these services.

### Revenue Analysis

This exemption is broad in nature, including royalties, marketing fees, reservation system fees, and other fees assessed.

## PAYMENTS AS PART OF A SALES INCENTIVE PROGRAM

**STATUTE:** West Virginia Code §11-15-2(b)(18)

**EXEMPTION:** Payments received by a vendor of tangible personal property as part of a sales incentive program, cooperative advertising agreement, or similar type of program.

**VALUE:** **$2.1 million**

### Rationale

The imposition of sales tax on payments received as part of a sales incentive program would place West Virginia at a competitive disadvantage with those states that do not impose sales tax on these services.

## SALES AND SERVICES DIRECTLY USED OR CONSUMED IN CERTAIN BUSINESS ACTIVITIES

**STATUTE:** West Virginia Code §§11-15-8d(b), 11-15-8d(c), 11-15-9(b)(2), and 11-15-9b

**EXEMPTION:** The following sales of tangible personal property and services are exempt from tax:[4]

- Sales of services, machinery, supplies, and materials directly used or consumed in the activities of manufacturing, transportation, transmission, communication, production of natural resources, gas storage, generation, production, or selling electric power, provision of a public utility service or the operation of a utility service or the operation of a utility business;
- Sales of tangible personal property and services directly used or consumed in the activity of research and development (West Virginia Code §11-15-9b). Purchases of services, machinery, supplies, or materials to be directly used or consumed in the construction, alteration, repair, or improvement of a new or existing building or structure by a person performing "contracting" if the purchaser of the "contracting" services would be entitled to claim the exemption provided by West Virginia Code §11-15-9(b)(2);
- Purchases of services, computers, servers, building materials, and tangible personal property to be installed into a building or facility or directly used or consumed in the construction, alteration, repair, or improvement of a new or existing building or structure by a person performing "contracting" if the purchaser of the "contracting" services would be entitled to claim the exemption provided by West Virginia Code §11-15-9h(a)(7)[5]; and
- Qualified purchases of computers and computer software, primary material handling equipment, racking and racking systems, and their components, or to qualified purchases of building materials and certain tangible personal property as such terms are defined in this section nine-n of this article (West Virginia Code §11-15-9n), by a person performing "contracting" if the purchaser of the "contracting" services would be entitled to claim the exemption provided by West Virginia Code §11-15-

[4] Purchases of gasoline and special fuel are excluded from the exemption.

[5] West Virginia Code §11-15-9h(a)(7) provides an exemption for the "Sales of prewritten computer software, computers, computer hardware, servers, and building materials and tangible personal property to be installed into a building or facility for direct use in a high-technology business or an internet advertising business." This exemption is included in the Commodity Expenditures section of this report under the Sales of Computer Hardware and Software expenditure.

9n[6]. Purchases of services, machinery, supplies or materials to be directly used or consumed in the construction, alteration, repair, or improvement of a new or existing natural gas compressor station or gas transmission line having a diameter of twenty inches or more by a person performing “contracting”.

**VALUE:** **$583.0 million**

**Rationale**

This exemption, commonly referred to as the direct use exemption, has a two-prong effect. First, the exemption encourages investment in equipment and facilities by qualified industries without a tax penalty on such investment. Second, the exemption eliminates the pyramid effect of a tax imposed first on intermediate goods and services and again on the final goods and services. Additionally, most states have direct use exemptions.

In general, direct use means those commodities consumed or services used which are integral and essential components in the activities cited in the exemption. Commodities or services which are merely incidental or convenient to the listed activities are not exempt.

For manufacturers, the exemption covers three separate categories of goods: raw materials, such as steel and heavy metals; capital equipment and machinery used in the manufacturing process; and consumable supplies and processing materials incorporated into the final manufactured product. The manufacturing industry generally consumes raw materials and intermediary goods in the production of other intermediary goods or final goods for the wholesale market or for transfer to other industrial users. The final goods are ultimately taxable to the final consumer unless subject to another exemption.

In order for the direct use provision to be applied to a transportation business, the commercial business activity must include the conveyance of passengers or goods from one geographical location to another. It does not include the conveyance of goods by the owner of the goods. The transportation activity begins with the gathering of the passengers or goods to be transported and ends with the delivery of the same. The transportation activity does not include storage of the tangible personal property unless it is for temporary storage while in transit.

The transmission industry includes commercial pipelines, wires, or other mediums used to convey liquid, natural gas, or electricity from one geographical location to another. It does not encompass tank trucks, rail cars, or barges. The commercial activity begins with the receipt or intake of the liquid, natural gas, or electricity into the system and ends with the delivery of the product to the customer.

For purposes of the Sales Tax, communication activities include voice communication, computer data transmission, or other encoded symbolic information transfers by telephone, radio, light, light wave, radio telephone, telegraph, or other means of communication. Commercial broadcast radio, commercial broadcast television, and cable television are also included.

[6] The exemption provided via West Virginia Code §11-15-9n pertains to qualified purchases for a new or expanded warehouse or distribution facility and is included in the Commodity Expenditures section of this Report.

Items included in the direct use exemption for producers of natural resources include purchases used for exploring, developing, severing, extracting, and loading for shipment any natural resource product for sale, profit, or commercial use. Reclamation, waste disposal, or environmental activities are also included in the exemption. Additionally, for coal mines or coal production facilities, construction, installation, or fabrication of ventilation structures, mine shafts, slopes, boreholes, and dewatering structures are included in the definition of production of natural resources and the purchases related to these items qualify for the exemption.

Equipment, machinery, fuel, power, pipes, wires, and mains used for gas storage, generation of electric power, or provision of a public utility service are included in the direct use exemption for these activities. The exemption includes tangible personal property or services used in pollution control, environmental quality, or community safety.

In order to qualify for the research and development direct use exemption, the tangible personal property or services used or consumed must be an integral and essential part of the research and development activities or operations. Qualified sales of tangible personal property or services directly used or consumed in research and development are eligible for the exemption.

Generally, “contractors” may not assert any exemption to which the purchaser of such contracting services would be entitled. However, contractors may assert the exemption for purchases of services, machinery, supplies, or materials, except gasoline and special fuel, that are to be directly used or consumed in the construction, alteration, repair, or improvement of a new or existing building or structure that will primarily be used for manufacturing, including the generation of electric power, for certain high-technology businesses, and certain distribution facilities. The contractor may assert the exemption if the purchaser of the contracting services (e.g., manufacturers, certain high-technology businesses, certain distribution facilities) would be entitled to claim an exemption on the direct purchase of the services, machinery, supplies, or materials.

## VIDEO LOTTERY TERMINALS AND GAMES

**STATUTE:** West Virginia Code §§29-22B-1901(a) and 29-22B-1901(b)

**EXEMPTION:** Purchases of video lottery terminals and video lottery games by persons holding a current operator’s license or a current limited video lottery operator’s license issued under West Virginia Code §29-22-1 et. seq. and consideration paid by a patron of a restricted access adult-only facility to play video lottery games

**VALUE:** **$260,000**

### Rationale

The exemption for sales of video lottery terminals and games exists because the lottery is run by State government. A certain percentage of video lottery money is retained and deposited in the State treasury.

## CERTAIN CHARGES BY MORTGAGE BROKERS, LENDERS, AND LOAN ORIGINATORS

**STATUTE:** West Virginia Code §31-17-2(c)

**EXEMPTION:** Brokerage fees, additional charges, and finance charges imposed by brokers, lenders, or loan originators licensed by the West Virginia Division of Banking under article 17, chapter 31 of the Code.

**VALUE**: **$2.3 million**

### Rationale

Brokerage fees collected by a bank are exempt as sales of professional services. Licensed mortgage brokers and loan originators are not considered to be professionals. This exemption presumably exists to provide similar treatment for brokerage fees collected by mortgage brokers, lenders, and loan originators as provided for those collected by banks.

### Revenue Analysis

Finance charges and most additional charges as defined in West Virginia Code §31-17-1 are exempt from sales tax elsewhere in the Code and are not considered in the revenue impact for this exemption.

# APPENDIX A — ENTITY-BASED AND USE-BASED EXEMPTIONS

| Group I—Group Exemptions | Entity | Commodity | Notes |
|---|---|---|---|
| Sales to Governmental Units | X | | |
| Sales to Various Nonprofit Organizations | X | | |
| Sales to Educational Institutions | X | | |
| Sales and Services Directly Used or Consumed in the Construction of Certain Youth Organization Facilities | X | | |

| Group II—Commodity Expenditures | Entity | Commodity | Notes |
|---|---|---|---|
| Food for Home Consumption | | X | |
| Reduced Basis for Sales of Mobile Homes | | X | |
| Sales of Newspapers Delivered by Route Carriers | | X | |
| Sales of Prescription Drugs, Appliances, and Insulin | | X | |
| Purchases of Drugs, Durable Medical Equipment, Mobility-Enhancing Equipment, and Prosthetic Devices by Health Care Providers | | X | |
| Sales of Farm Products in Original State by the Producer and Sales of Livestock Sold at Public Auction Sales | | X | |
| Sales of Subscriptions to Magazines Published by State Agencies | | X | |
| Sales of Aircraft | | X | |
| Sales of United States and West Virginia Flags | | X | |
| Sales of Computer Hardware and Software | | X | |
| Sales of Investment Bullion and Coins | | X | |
| Sales of Small Arms and Ammunition | | X | |

| Group III—Service Exemptions | Entity | Commodity | Notes |
|---|---|---|---|
| Sales of Services Subject to Regulation by the Public Service Commission | | X | |
| Sales of Personal Services | | X | |
| Sales of Professional Services | | X | |
| Sales of Selected Advertising | | X | |
| Sales and Services Performed by Day Care Centers and Babysitters | | X | |
| Sales of Electronic Data Processing Services | | X | |
| Sales of Contracting Services Resulting in Capital Improvements | | X | |
| Sales of the Services of Opening and Closing a Burial Lot | | X | |
| Charges for Memberships or Services Provided by Health and Fitness Organizations | | X | |
| Artistic Performances by Entertainers | | X | |
| Charges by Membership Organizations to Their Members | | X | |
| Dues, Fees and Assessments Paid to a Homeowners' Association | | X | |

| Group IV—Community Exemptions | Entity | Commodity | Notes |
|---|---|---|---|
| Casual and Occasional Sales by Churches and Nonprofit Organizations | | X | |
| Food Purchased by Nonprofit Organizations or Government Entities for Meals to Low-Income Persons | X | | |
| Meals Sold by Nonprofit Organizations or Government Entities to Low-Income Persons | | X | |
| Food Sold in Occasional Sales by Nonprofit Organizations, Including Volunteer Fire Departments | | X | |
| Sales of Food by Churches | | X | |
| Sales of Food by Youth Organizations and Booster Organizations | | X | |
| Sales of Services by Libraries | | X | |
| Sales of Property by Volunteer Fire Departments | | X | |
| Sales to Charitable Organizations Who Make No Charges for Their Services | X | | |
| Sales of Property or Services to Fraternal or Social Organizations for Free Distribution in Public Welfare or Relief Work | X | | |
| Sales to Volunteer Fire Departments | X | | |
| Sales of Building Materials and Supplies to Organizations for Installation in Low-Income Housing or Shelters | X | | |
| Sales of Clothing by Nonprofit Organizations | | X | |
| Sales of Services by Nonprofit Organizations | | X | |

| Group V—Educational Exemptions | Entity | Commodity | Notes |
|---|---|---|---|
| Sales of Textbooks | | X | |
| Casual and Occasional Sales by Elementary and Secondary Schools | | X | |
| Sales of Tickets for Activities Sponsored by Elementary and Secondary Schools | | X | |
| Tuition for Educational Summer Camps | | X | |
| Food Purchased by Public or Private Schools | X | | |
| Food Sold by Public or Private Schools or School-Sponsored Organizations to Students and Employees During Normal School Hours | | X | |
| Food Sold to Public or Private Universities or Student Organizations for Sales to Students on a Contract Basis | X | | |
| Food Sold by Public or Private Universities or Student Organizations to Students on a Contract Basis | | X | |
| Food Sold by School Booster Organizations | | X | |
| Charges for Room Rental and Meals by Fraternities and Sororities | | X | |
| Sales of Music Instructional Services | | X | |
| Casual and Occasional Sales by Not-for-Profit Volunteer School Support Groups | X | | |

| Group VI—Miscellaneous Expenditures | Entity | Commodity | Notes |
|---|---|---|---|
| Clothing Voucher Purchases | | X | |
| Sales of Lottery Tickets by Licensed Lottery Agents | | X | |
| Sales by Local Governmental Units | | X | |
| Various Miscellaneous Exemptions | X | | |
| Qualified Purchases of Selected Property and Services for a New or Expanded Warehouse or Distribution Facility | | X | |
| West Virginia Tourism Development Credit | | | Credit |
| Exemption for BUILD WV Construction | | X | |
| Monetary Allowances from Streamlined Sales Tax | | | Collection Allowance |
| Sales Tax Holiday | | X | |

# EXECUTIVE SUMMARY

This report covers West Virginia's Personal Income Tax and Fiduciary Income Tax and Corporation Net Income Tax, the major broad-based business tax in the State. The report analyzes all provisions involving exclusions, exemptions, deductions, or credits for those taxes. Some of these provisions constitute government expenditure programs while others are an integral part of the basic tax structure.

## CORPORATION NET INCOME TAX

The section on Corporation Net Income Tax provides analysis of explicit and implicit provisions in the laws of West Virginia and the United States that may be considered tax expenditures for this tax. Domestic and foreign corporations doing business in West Virginia are subject to the Corporation Net Income Tax. Some businesses, such as insurance companies and Subchapter S corporations, are exempt from this tax. The Corporation Net Income Tax is levied on federal taxable income adjusted and apportioned according to State law. Beginning January 1, 2022, West Virginia adopted a market-based single sales apportionment factor and repealed the sales factor throw-out rule. Some of these adjustments, along with the various exemptions for businesses specifically excluded from taxation, represent tax expenditures for the Corporation Net Income Tax. In addition, West Virginia law provides a variety of tax credits that can be used against Corporation Net Income Tax liability. These credits are also considered tax expenditures.

## PERSONAL INCOME TAX

This section of the report provides analysis of the exemptions, exclusions, deductions and credits that can be used to reduce Personal Income Tax liability. The computation of West Virginia Personal Income Tax begins with federal adjusted gross income. The Internal Revenue Code provides for certain exclusions and adjustments in determining federally adjusted gross income. West Virginia allows some decreasing modifications to federally adjusted gross income. A deduction is also allowed based on the number of personal exemptions claimed on the federal return under federal rules in place prior to 2018. In addition, various credits may be applied to Personal Income Tax liability.

## FIDUCIARY INCOME TAX

Estates and trusts are taxed under the Personal Income Tax statute, but the tax liability is calculated on the Fiduciary Income Tax return. This section of the report provides analysis of the expenditures relating to the taxation of estates and trusts on the Fiduciary Income Tax return. Computation of West Virginia Fiduciary Income Tax begins with federal taxable income. West Virginia taxable income of estates and trusts is derived after specific increasing or decreasing modifications are made to federal taxable income.

# INTRODUCTION

Section 11-10-5s(c) of the West Virginia Code requires a tax expenditure report to be submitted to the Legislature by January 15 of each year. In three-year cycles, these reports are intended to analyze tax expenditures for most major State taxes. The law defines the term "tax expenditure" as a provision in the tax laws designed to encourage certain kinds of activities or to aid Taxpayers in special circumstances. Such provisions generally include exclusions, exemptions, deductions, credits, and deferrals from tax. This report covers the Corporation Net Income Tax, Personal Income Tax and Fiduciary Income Tax.

# OVERVIEW

The Corporation Net Income Tax and Personal Income Tax accounted for $2.5 billion, or 45.3 percent, of the total General Revenue Fund collections in Fiscal Year 2025.

**West Virginia General Revenue Fund Percentage Yield**

| Revenue Source | FY 2020 | FY 2021 | FY 2022 | FY 2023 | FY 2024 | FY 2025 |
|---|---|---|---|---|---|---|
| Personal Income[1] | 43.3% | 45.2% | 42.5% | 41.1% | 39.2% | 38.5% |
| Corporation Net Income | 3.4% | 6.4% | 6.2% | 6.5% | 8.2% | 6.8% |
| **Total** | **46.7%** | **51.6%** | **48.7%** | **47.6%** | **47.4%** | **45.3%** |

Personal Income Tax collections represent a stable portion of the General Revenue Fund receipts. Corporation Net Income Tax collections tend to be more volatile over time.

Most exclusions, exemptions, deductions, and credits associated with these taxes may be viewed as tax expenditures. Such tax expenditures tend to escape the usual legislative scrutiny afforded other expenditures in the annual budget approval process because provisions in the tax law often remain intact indefinitely. Programs funded through tax expenditures in effect receive priority funding over all other programs. The goal of this report is to facilitate an examination of Corporation Net Income Tax, Personal Income Tax and Fiduciary Income Tax expenditures using available resources.

# ESTIMATING COSTS OF TAX EXPENDITURES

This study provides estimates of the value of Corporation Net Income Tax, Personal Income Tax and Fiduciary Income Tax expenditures and certain provisions considered necessary to define a model tax structure. Except where otherwise noted, expenditures within the study are examined independently from all other expenditures. Following the establishment of a value in isolation, the influence of outside factors (i.e., other expenditures and Taxpayer behavior) is discussed, where applicable.

Several sources of information were used in the construction of expenditure valuations. These include, among others:

1. Tax return data;
2. Alternative tax data, and
3. Federal and State publications.

[1] Includes revenue from Fiduciary Income Tax.

In most cases, the revenue impact attributable to the repeal of a tax expenditure is less than the value of that expenditure. This occurs because tax expenditures tend to overlap one another, and Taxpayers tend to alter behavior whenever income becomes taxable for the first time. Values are listed as “cannot be disclosed due to Taxpayer confidentiality” if the number of taxpayers is less than five.

Caution must be exercised when using values from this report as estimates of tax revenue attributable to potential tax law changes, especially due to the impact of overlapping expenditures. For example, the partial exclusion of a teacher’s pension income may overlap the $8,000 exclusion for senior citizens. Therefore, both exclusions would have to be repealed before the State would receive the full value of the senior citizen exclusion.

## RATIONALE SUPPORTING TAX EXPENDITURES

This report also attempts to briefly articulate the rationale for the exclusions, exemptions, and deductions evaluated. The rationales set forth in this report are not intended to be all inclusive. The reader may identify other rationales for the various expenditures in the law. Given that statutory language does not often specify the rationale in much, if any, detail, the Division relied solely upon its experience to formulate the assumed rationales set forth in this report. The reader is left to judge the extent to which a particular rationale is appropriate and the extent to which a particular exemption furthers the preferred activity.

# CORPORATION NET INCOME TAX

## OVERVIEW

The West Virginia Corporation Net Income Tax is a direct income tax imposed on domestic and foreign corporations engaged in business in West Virginia or deriving income from property, activity or other sources in the State. Corporations engaged in a unitary business with one or more other corporations must file a combined report which includes the income of all corporations that are members of the unitary business.

Computation of the Corporation Net Income Tax begins with federal taxable income modified by specific additions and subtractions. A corporation's income is subject to tax without allocation or apportionment if the entire business is transacted within West Virginia. For multistate corporations, certain income items are allocated or apportioned to West Virginia according to State law. The allocated items are rents and royalties from real or tangible personal property, capital gains, interest and dividends, patent or copyright royalties, and gains from sales of natural resources, if the proceeds are nonbusiness income. This type of income is generally allocated to West Virginia if the site of the income-producing property is in the State. West Virginia allocated income plus non-allocated income apportioned to the State becomes taxable income. An adjustment to taxable income is also made for West Virginia net operating losses. Adjusted taxable income after net operating loss deductions is taxed at 6.5 percent. Beginning January 1, 2022, the apportionment of West Virginia income is based on a single sales factor. Additionally, beginning January 1, 2022, West Virginia adopted market-based sourcing for sales of service and intangible property and repealed the sales factor throw-out rule.

A large percentage of the Corporation Net Income Tax collections is remitted by relatively few businesses. Since this tax is imposed on net income, collections of the Corporation Net Income Tax can vary significantly from one year to the next based upon the economic status of a few companies.

## ORGANIZATION AND ANALYSIS

The Corporation Net Income Tax expenditures discussed in this report are divided into five groups:

- Businesses Exempt from Taxation;
- Federal Taxable Income Expenditures;
- Modifications Decreasing Federal Taxable Income for State Tax Purposes;
- Modifications Decreasing West Virginia Taxable Income; and
- Credits.

The analysis provided for each tax expenditure includes the item's cost to the State, a rationale, and an analysis of the possible revenue scenarios if an expenditure was repealed, where applicable.

# BUSINESSES EXEMPT FROM TAXATION

Selected businesses are exempt from Corporation Net Income Tax due to the structure of the business or the nature of the business activity. The following businesses are exempt:

- Sole Proprietorships, Partnerships, and Subchapter S Corporations, and
- Various Miscellaneous Businesses.

An analysis of these exemptions follows.

## SOLE PROPRIETORSHIPS, PARTNERSHIPS, AND SUBCHAPTER S CORPORATIONS

**STATUTES:** W.Va. Code §§11-24-3a(7) and 11-24-5(d)

**EXEMPTION:** The term "corporation" includes a joint-stock company and any association or other organization which is taxable as a corporation under the federal income tax law (which excludes sole proprietorships and partnerships) (W.Va. Code §11-24-3a(7)).

Corporations electing to be taxed under Subchapter S of the Internal Revenue Code 1986, as amended (W.Va. Code §11-24-5(d)).

### Rationale

Since the Corporation Net Income Tax is only levied on businesses organized as corporations, an implied exemption exists for businesses organized as sole proprietorships or partnerships. This exemption presumably exists for ease of administration and to avoid double taxation of the business income of the sole proprietor or partnership. Income of businesses organized as sole proprietorships or partnerships is generally included on the Personal Income Tax return of the proprietor or partner. If the partner is itself a corporation, the income is reported on the Corporation Net Income Tax return. Therefore, subjecting these businesses to the Corporation Net Income Tax without removing the income from taxation under the Personal Income Tax statute would subject some business income to double taxation. This is **not** an expenditure. West Virginia follows the federal practice of classifying limited liability companies as partnerships unless such entities are organized as corporations.

The income of Subchapter S corporations is passed through to the stockholders of the corporation. Stockholders include income from the corporation on their individual income tax returns. The exemption for Subchapter S corporations exists to avoid double taxation of the income of these businesses (once under the Corporation Net Income Tax and once under the Personal Income Tax) due to the difference in tax rates.

## VARIOUS MISCELLANEOUS BUSINESSES

**STATUTES:** United States Code 15 U.S.C. §381 et seq. (United States Public Law 86- 272)

W.Va. Code §§11-24-5(a), 11-24-5(b), 11-24-5(c), 11-24-5(e), 19-23-12, 31C-2-8, 33-22-16, 33-23-29(b), and 33-24-4

**EXEMPTION:** This exemption includes:

- Corporations Whose Only Activity Is Solicitation of Sales (15 U.S.C. §381 et seq. (United States Public Law 86-272))
- Corporations Exempt from Federal Income Tax (W.Va. Code §11- 24-5(a))
- Insurance companies which pay this State a tax upon premiums (W.Va. Code §11-24-5(b))
- Production Credit Associations (Farm Credit Act of 1933) (W.Va. Code §11-24-5(c))
- Section 186 Trusts (W.Va. Code §11-24-5(e))
- Horse or Dog Tracks (W.Va. Code §19-23-12)
- Credit Unions (W.Va. Code §31C-2-8)
- Farmer's Mutual Fire Insurance Companies (W.Va. Code §33-22-16)
- Fraternal Benefit Societies (W.Va. Code §33-23-29(b))
- Nonprofit Hospital, Medical, Dental and Health Service Corporations (W.Va. Code §33-24-4)

**VALUE:** Annual values for expenditures include:

| | |
|---|---|
| Public Law 86-272: | **$39.1 million** |
| Federally Exempt Corporations: | **$18.0 million** |
| Insurance Companies: | **$28.2 million** |
| Production Credit Associations | **Minimal** |
| Section 186 Trusts: | **Minimal** |
| Horse or Dog Tracks: | **Cannot be disclosed due to Taxpayer confidentiality** |
| Credit Unions: | **$30,000** |
| Farmer's Mutual Fire Insurance Company: | **Not available** |
| Fraternal Benefit Societies: | **$1.0 million** |
| Nonprofit Healthcare Corporations: | **Not available** |

### Rationale

These businesses are exempt from the West Virginia Corporation Net Income Tax for a variety of reasons. In some cases (e.g., corporations whose only activity is solicitation of sales), federal law precludes the State from levying a tax on the specified business. Ease of administration (i.e., corporations exempt from federal income tax), double taxation concerns (i.e., Insurance companies which pay this State a tax upon premiums), and the encouragement of certain business activities are some of the other reasons for these exemptions.

# FEDERAL TAXABLE INCOME EXPENDITURES

The use of federal taxable income as a starting point for the calculation of West Virginia Corporation Net Income Tax includes various allowances for federal tax expenditures. Federal tax expenditures incorporated within the State tax structure are considered tax expenditures for the purposes of this study. An analysis of these expenditures follows.

## FEDERAL TAX EXPENDITURES INCORPORATED WITHIN THE STATE TAX STRUCTURE

**STATUTE:** W.Va. Code §11-24-3a(44)

**EXCLUSION:** The term "West Virginia taxable income" means the taxable income of a corporation as defined by the laws of the United States for federal income tax purposes, adjusted, as provided in W.Va. Code §11-24-6.

**VALUE:** Annual values for expenditures include:

| | |
|---|---|
| Cost of goods sold: | **$4,086.9 million** |
| Compensation of officers: | **$107.7 million** |
| Salaries and wages less employment credits: | **$804.2 million** |
| Repairs and Maintenance: | **$49.5 million** |
| Bad debts: | **$24.4 million** |
| Rents: | **$115.5 million** |
| Taxes and licenses: | **$143.4 million** |
| Interest: | **$21.1 million** |
| Charitable contributions: | **$6.7 million** |
| Depreciation: | **$220.7 million** |
| Depletion: | **$4.1 million** |
| Advertising: | **$80.3 million** |
| Pension, profit-sharing, etc. plans: | **$32.3 million** |
| Employee benefit programs: | **$87.0 million** |
| Other deductions: | **$1,031.4 million** |
| Special deductions: | **$67.5 million** |

### Rationale

West Virginia uses federal taxable income as the starting point for the calculation of the Corporation Net Income Tax. Deductions granted in the calculation of federal taxable income become implied exclusions from West Virginia taxable income and exist to administer the tax. These implied exclusions exist to ease the administration of the Corporation Net Income Tax. As stated in West Virginia Code §11-24-1, "the adoption by this State for its Corporation Net Income Tax purposes of certain provisions of the laws of the United States relating to the determination of income for federal income tax purposes will: (1) simplify preparation of State Corporation Net Income Tax returns by Taxpayers; (2) improve enforcement of the State Corporation Net Income Tax through better use of information obtained from federal income tax audits, and (3) aid interpretation of the State Corporation Net Income Tax law through increased use of federal judicial and administrative determinations and precedents." The Corporation Net Income Tax is often equated to a tax on profits. Some of the items mentioned above, such as cost of goods sold, are an integral part of the definition of net income or profit. Those items necessary for the definition of net income may **not** be tax

expenditures. Inclusions of other items, such as employee benefit programs, may not necessarily be required to define net income and therefore may constitute tax expenditures.

## Revenue Analysis

The expenditure values presented in this section were calculated in isolation from any other listed expenditure. Also, calculation of the expenditure value was made without consideration of any portion of the exclusion returned to the original value pursuant to West Virginia Code §11-24-6(b). Thus, caution should be used in adding the values presented above.

# MODIFICATIONS DECREASING FEDERAL TAXABLE INCOME FOR STATE TAX PURPOSES

Several deductions are available to corporations in West Virginia as decreasing modifications to federal taxable income in determining taxable income for State purposes. These modifications exist for one of the following reasons:

1. To account for deviations between federal statutes and the West Virginia Code;
2. To account for income for which states are prohibited from taxing; or
3. To remove from taxable income amounts that were added to current federal taxable income and related to prior year deductions not permitted by West Virginia.

West Virginia has codified the following decreasing modifications:

- Refund or Credit for Overpayment of Income-Based Taxes;
- Disallowed Interest Expense;
- Section 78 Dividends Received from Foreign Corporations;
- Salary Expense Not Allowed as a Federal Deduction;
- Subpart F Income;
- Employer Contributions to Medical Savings Accounts;
- Foreign Source Income;
- West Virginia Water or Air Pollution Control Facilities;
- Federal Obligations;
- West Virginia Obligations;
- Investments Secured by Mortgages and Loans on Residential Property, and
- Qualified Opportunity Zone Business Income

An analysis of these modifications follows.

## REFUND OR CREDIT FOR OVERPAYMENT OF INCOME-BASED TAXES

**STATUTE:** W.Va. Code §11-24-6(c)(2)

**EXCLUSION:** The amount of any refund or credit for overpayment of income taxes and other taxes, including franchise and excise taxes, which are based on, measured by, or computed with reference to net income, imposed by this State or any other taxing jurisdiction, to the extent properly included in gross income for federal income tax purposes.

**VALUE:** **$150,000 per year**

### Rationale

For State purposes, West Virginia requires Taxpayers to add back to federal taxable income the income tax deduction. State and local income taxes are deducted on the federal return for the tax year in which the payments are made. Any refund is included in federal taxable income for the tax year in which it is received. Since West Virginia does not allow the federal deduction for income taxes paid, a refund included in federal taxable income may be deducted for State purposes. This exclusion eliminates double taxation of this refund amount and therefore is **not** a tax expenditure.

## DISALLOWED INTEREST EXPENSE

**STATUTE:** W.Va. Code §11-24-6(c)(4)

**EXCLUSION:** The full amount of interest expense disallowed in determining federal taxable income which was incurred or continued to purchase or carry obligations or securities of any State or of any political subdivision thereof.

**VALUE:** **$90,000 per year**

### Rationale

This expenditure exists in recognition that the identified interest expense is a normal business expense at the State and local government level. Interest income from State and municipal government securities is excluded from income for federal income tax purposes due to the intergovernmental immunity principle. Since it is not included in income for federal income tax purposes, the interest expense related to exempt obligations is disallowed as a deduction at the federal level.

West Virginia requires Taxpayers to make an increasing modification to federal taxable income for State income tax purposes for interest or dividends received from any State or local bonds or securities. While recognizing the interest received on State and local securities as income, this expenditure identifies the expenses incurred in holding or carrying these securities as legitimate business expenses for State tax purposes.

West Virginia provides a modification to taxable income for its own obligations and those of its political subdivisions. This expenditure is analyzed later in this section.

## SECTION 78 DIVIDENDS RECEIVED FROM FOREIGN CORPORATIONS

**STATUTE:** W.Va. Code §11-24-6(c)(5)

**EXCLUSION:** The amount required to be added to federal taxable income as a dividend received from a foreign (non-United States) corporation under Section 78 of the Internal Revenue Code of 1986, as amended, by a corporation electing to take the foreign tax credit for federal income tax purposes.

**VALUE:** **$8.8 million per year**

### Rationale

This expenditure exists to preclude double taxation, once by the State and once by a foreign country. Section 78 dividends are dividends received from a foreign corporation by a corporation that elects to take the foreign tax credit.

## SALARY EXPENSE NOT ALLOWED AS A FEDERAL DEDUCTION

**STATUTE:** W.Va. Code §11-24-6(c)(6)

**EXCLUSION:** The amount of salary expenses disallowed as a deduction for federal income tax purposes due to claiming the federal jobs credit under Section 51 of the Internal Revenue Code of 1986, as amended, to the extent included in federal taxable income.

**VALUE:** **$470,000 per year**

**Rationale**

Taxpayers claiming a Federal Work Opportunity Tax Credit (formerly the Federal Jobs Credit) on the federal Corporation Net Income Tax return must reduce their salary expense deduction for federal tax purposes by the total of salaries upon which the credit is calculated. West Virginia, however, does not offer a similar credit. Therefore, such salary expenses are a legitimate business deduction for State tax purposes.

## SUBPART F INCOME

**STATUTE:** W.Va. Code §11-24-6(c)(7)

**EXCLUSION:** The amount included in federal adjusted gross income by the operation of Section 951 of the Internal Revenue Code of 1986, as amended.

**VALUE:** **$9.7 million per year**

**Rationale**

This expenditure exists to preclude double taxation, once by the State and once by a foreign country. Subpart F income is composed of earnings and profits of controlled foreign corporations exclusive of any income from sources within the United States.

## EMPLOYER CONTRIBUTIONS TO MEDICAL SAVINGS ACCOUNTS

**STATUTE:** W.Va. Code §11-24-6(c)(8)

**EXCLUSION:** Employer contributions to medical savings accounts established pursuant to section fifteen, article sixteen, chapter thirty-three of the West Virginia Code to the extent included in federal adjusted gross income for federal income tax purposes less any portion of employer contributions withdrawn for purposes other than payment of medical expenses.

**VALUE:** **$0 per year**

**Rationale**

This modification exists to encourage the formation and use of State medical savings accounts. However, contributions to medical savings accounts that qualify for federal exclusion are also automatically excluded from State taxes because of the State tie-in to federal adjusted gross income. There are no known State medical savings accounts that do not qualify for federal tax exclusions.

## FOREIGN SOURCE INCOME

**STATUTE:** W.Va. Code §11-24-6(c)(9)

**EXCLUSION:** Any amount included in federal adjusted gross income which is foreign source income.

**VALUE:** **$25.7 million per year**

### Rationale

This exclusion exists to preclude double taxation, once by the State and once by a foreign country. A decreasing modification is allowed for foreign source income, as defined, if it was included in federal taxable income, less attributable expenses.

## WEST VIRGINIA WATER OR AIR POLLUTION CONTROL FACILITIES

**STATUTE:** W.Va. Code §11-24-6(e)

**EXCLUSION:** If the Taxpayer so elects under W.Va. Code §11-24-6(e)(2), there shall be: (A) Subtracted from federal taxable income the total of the amounts paid or incurred during the taxable year for the acquisition, construction or development within this State of water pollution control facilities or air pollution control facilities as defined in Section 169 of the Internal Revenue Code, and (B) Added to federal taxable income the total of the amounts of any allowances for depreciation and amortization of the water pollution control facilities or air pollution control facilities, as so defined, to the extent deductible in determining federal taxable income.

**VALUE:** **Cannot be disclosed due to Taxpayer confidentiality.**

### Rationale

This expenditure exists to encourage investment in water and air pollution control devices in West Virginia. Deducting the full cost of pollution control devices in a single year provides a greater benefit to the Taxpayer than a normal depreciation allowance. Facility modifications are often necessary to comply with various federal pollution control regulations.

## FEDERAL OBLIGATIONS

**STATUTE:** W.Va. Code §11-24-6(f)(1)(A)

**ADJUSTMENT:** An amount equal to share of total assets attributable to securities or obligations of the United States Government or its instrumentalities.

**VALUE:** **$80,000 per year**

### Rationale

This modification exists for compliance with the immunity of the federal government and its instrumentalities from State taxation. Codified in federal statutes, the prohibition reads in part as follows:

> "Except as otherwise provided by law, all stocks, bonds, Treasury notes and other obligations of the United States, shall be exempt from taxation by . . . other State or municipal or local authority."

The statute was revised in 1959 to provide an exception for nondiscriminatory franchise taxes imposed on corporations. The West Virginia Corporation Net Income Tax is a direct tax on net income. Thus, the State cannot subject federal obligations to the tax. If legislative action repealing the above cited adjustment would be enacted, the prohibition against taxation would still exist. Therefore, this modification is **not** a tax expenditure.

## WEST VIRGINIA OBLIGATIONS

**STATUTE:** W.Va. Code §11-24-6(f)(1)(B)

**ADJUSTMENT:** An amount equal to share of total assets attributable to West Virginia State government securities or obligations.

**VALUE:** **$120,000 per year**

### Rationale

The purpose of this expenditure is presumably to reduce the cost of borrowed money for West Virginia and local governments. An adjustment to taxable income for government securities reduces the cost of holding government obligations. The reduced cost makes the securities more attractive to investors and thus makes the marketing of State and local bonds easier. If the security instruments are easier to sell, the governmental unit selling the securities can obtain financing at lower interest rates.

## INVESTMENTS SECURED BY MORTGAGES AND LOANS ON RESIDENTIAL PROPERTY

**STATUTES:** W.Va. Code §§11-24-6(f)(1)(C) and 11-24-6(f)(1)(D)

**ADJUSTMENT:** An amount equal to share of total assets attributable to residential mortgage securities related to West Virginia residential property (W.Va. Code §11-24-6(f)(1)(C).

An amount equal to share of total assets attributable to loans primarily secured by a lien or security agreement on residential property in the form of a mobile home, modular home or double-wide located in this State and occupied by non-transients. (W.Va. Code §11-24-6(f)(1)(D)).

**VALUE:** **$530,000 per year**

### Rationale

This expenditure exists to encourage investments or loans on West Virginia residential property occupied by non-transients. Preferential treatment for these obligations presumably lowers the cost of the investment instruments by reducing the tax imposed on the income from the loans. The intention is for part of the reduced cost in holding the identified securities to be passed on to the loan recipients. Thus, housing may be more affordable.

## QUALIFIED OPPORTUNITY ZONE BUSINESS INCOME

**STATUTE:** W.Va. Code §11-24-6b

**ADJUSTMENT:** An amount equal to net income included in federal taxable income by a corporate taxpayer in a taxable year that is ordinary income derived from a qualified opportunity zone business located in a qualified opportunity zone located in West Virginia.

**VALUE:** **Cannot be disclosed due to Taxpayer confidentiality.**

### Rationale

The purpose of this expenditure is to encourage individuals and businesses to invest in certain rural and low-income urban communities through qualified opportunity zone projects. West Virginia has designated 55 census tracts in 30 counties as qualified opportunity zones, which included both larger cities and small towns. Qualified opportunity zones were part of the Tax Cuts and Jobs Act of 2017 and were included in this specific federal tax reform legislation passed by Congress to encourage economic growth in neglected areas of the United States that had a high demand for capital investments.

# MODIFICATION DECREASING WEST VIRGINIA TAXABLE INCOME

One modification to West Virginia taxable income is available to corporations. The decreasing modification to West Virginia taxable income is a Net Operating Loss Deduction. An analysis of this expenditure follows.

## WEST VIRGINIA NET OPERATING LOSS DEDUCTION

**STATUTE:** W.Va. Code §11-24-6(d)

**DEDUCTION:** There is allowed as a deduction for the taxable year an amount equal to the aggregate of: (1) The West Virginia net operating loss carryovers to that year; plus (2) the net operating loss carrybacks to that year: Provided, that no more than three hundred thousand dollars of net operating loss from any taxable year beginning after the thirty-first day of December, one thousand nine-hundred ninety-two may be carried back to any previous taxable year.

**VALUE:** **$227.0 million per year**

### Rationale

This expenditure exists to extend the concept of "net income" across multiple years and thus reduce the tax liability of corporations that experience "net losses." In some years, the normal business expenses of a corporation may be greater than income, thus resulting in a "net loss." The carryback and/or carryforward provisions of the net operating loss statute permit the corporation to apply the loss (deductions in excess of income) to other tax years where income exceeded deductions. Thus, instead of the activities of a single year determining taxable income, calculation of taxable income may be based, in part, on activities from other years. The West Virginia net operating loss deduction is only available to corporations with business operations located in the State and that filed Corporation Net Income Tax returns in previous tax years. A net operating loss deduction of a multi-state corporation is subject to West Virginia allocation and apportionment rules. Except for the provision limiting the amount of carryback, West Virginia generally follows Section 172 of the Internal Revenue Code of 1986, as amended.[2]

The Tax Cuts and Jobs Act made changes to the Net Operating Loss Deduction. For tax years beginning on or before December 31, 2017, net operating losses could be carried back two years and carried forward twenty years with no taxable income limitation. For tax years ending after December 31, 2017, there is no carryback for net operating losses. The Net Operating Loss Deduction is limited to 80 percent of taxable income and can be carried forward indefinitely.

[2] W.Va. Code §11-24-3 provides that terms used in W.Va. Code §11-24 "shall have the same meaning as when used in a comparable context in the laws of the United States relating to federal income taxes, unless a different meaning is clearly required by context or definition ..." The statute defines the term "Internal Revenue Code of 1986" as the Internal Revenue Code of the United States enacted by the Federal Tax Reform Act of 1986. The 1986 act provided that net operating losses could be carried back for three years and carried forward for fifteen. However, the Taxpayer Relief Act of 1997 provides for carry back of two years and carry forward of twenty years. Additionally, the American Recovery and Reinvestment Act of 2009 provides that small businesses may carry back losses for five years.

# CREDITS

The West Virginia Code provides for the application of various tax credits against the Corporation Net Income Tax. Some credits provide qualifying businesses with an investment or employment incentive. Others provide relief from double taxation or compensation to utilities providing aid to low-income households. These tax credits are listed below.

## ECONOMIC DEVELOPMENT TAX CREDITS

- Economic Opportunity Tax Credits
- Manufacturing Investment Tax Credit
- Downstream Natural Gas Manufacturing Investment Tax Credit
- High-Wage Growth Business Tax Credit
- Small Arms and Ammunition Manufacturers Credit
- Industrial Advancement Act Tax Credit
- Post-Coal Mine Site Business Credit
- BUILD WV Property Value Adjustment Tax Credit

## EMPLOYMENT TAX CREDITS

- Apprenticeship Training Tax Credit
- West Virginia Jumpstart Savings Program Credit for Employers
- Military Incentive Tax Credit

## CREDITS THAT AID LOW-INCOME FAMILIES

- Credit for Reducing Utility Charges to Low-Income Families
- Credit for Reducing Telephone Charges to Low-Income Families

## MISCELLANEOUS TAX CREDITS

- Neighborhood Investment Program Credit
- Environmental Agricultural Equipment Tax Credit
- Film Industry Investment Tax Credit
- Manufacturing Property Tax Adjustment Credit
- Innovative Mine Safety Technology Tax Credit
- Farm to Food Bank Tax Credit
- Tax Credit for Donation or Sale of Vehicle
- Natural Gas Liquids Property Tax Adjustment Act
- Motor Vehicle Property Tax Adjustment Credit
- Small Business Property Tax Adjustment Credit
- Credit for Utility Taxpayers with Net Operating Loss Carryovers
- Historic Rehabilitated Buildings Investment Credits
- Capital Investment in Child-Care Property Tax Credit
- Operating Costs of Child-Care Tax Credit

Many of the credits listed above may also be applied against other business and personal taxes. Expenditure values presented in this section represent the amounts applied against **only** Corporation Net Income Tax. Often, the credit claimed against the Corporation Net Income Tax has been reduced by the application of the credit against other taxes according to the priority order specified by statute or regulations. Thus, the credit amounts claimed against Corporation Net Income

Tax may be negligible compared to the total cost of the credit taken against all taxes. An analysis of these expenditures follows.

# ECONOMIC DEVELOPMENT TAX CREDITS

Economic Development Tax Credits exist to promote business expansion in the State. Such credits require either the creation of employment or capital outlays for certain qualified investments to qualify.

## ECONOMIC OPPORTUNITY TAX CREDITS

**STATUTE:** W.Va. Code §11-13Q

**CREDIT:** Credits for qualified businesses that make a qualified investment in a new or expanded business facility in West Virginia and, as a result of this investment, create at least 10 new jobs.

**VALUE:** **$2.5 million per year**

### Rationale

Economic Opportunity Tax Credits are incentives designed to promote job creation through capital investment. These credits generally represent a capital investment tax credit pro-rated over a 10-year period for businesses engaged in the activities of manufacturing, information processing, warehousing, goods distribution exclusive of retail, destination-oriented recreation and tourism, research and development, and the relocation of a corporate headquarters. The share of qualified capital investment subject to tax credit is based on the number of new jobs created as the result of the additional capital investment. The share of total payroll represented by the new employees determines the share of total tax liability offset by tax credit. A minimum number of new jobs must be created and maintained to gain entitlement to tax credit benefits.

## MANUFACTURING INVESTMENT TAX CREDIT

**STATUTE:** W.Va. Code §11-13S

**CREDIT:** Credit for manufacturers that make qualified investments for industrial expansion or industrial revitalization in West Virginia.

**VALUE:** **$1.4 million per year**

### Rationale

The Manufacturing Investment Tax Credit is an incentive designed to promote manufacturing expansion and revitalization through capital investment. The tax credit equals 5 percent of qualified capital investment pro-rated over a 10-year period for businesses engaged in the activity of manufacturing. The tax credit may offset up to 60 percent of the West Virginia Corporation Net Income Tax liability of the qualified manufacturing entity.

### Revenue Analysis

Legislation enacted during the 2021 Session changed the four-factor apportionment formula for most multi-state businesses to a single sales factor formula effective for tax years beginning on and after January 1, 2022. In addition, market-based sourcing for sales other than sales of tangible personal property was adopted for sales made on or after January 1, 2022. The combined effect of these

legislative changes has been to reduce the tax liability of many West Virginia manufacturers and their ability to utilize the Manufacturing Investment Tax Credit.

## DOWNSTREAM NATURAL GAS MANUFACTURING INVESTMENT TAX CREDIT

**STATUTE:** W.Va. Code §11-13GG

**CREDIT:** Credit for eligible taxpayers to make a qualified investment in a new or expanded downstream natural gas manufacturing facility in West Virginia that results in the creation of at least five new jobs.

**VALUE:** **$0 per year**

### Rationale

The Downstream Natural Gas Manufacturing Investment Tax Credit is available to eligible Taxpayers that make a qualified investment in a new or expanded downstream natural gas manufacturing facility in West Virginia that results in the creation of at least five new jobs. To qualify for the tax credit, the qualified investment must have been made on or after July 1, 2020.

### Revenue Analysis

The Downstream Natural Gas Manufacturing Investment Tax Credit is a relatively new credit that was passed during the 2020 Legislative Session. As of November 2025, there are no known applicants for this credit.

## HIGH-WAGE GROWTH BUSINESS TAX CREDIT

**STATUTE:** W.Va. Code §11-13II

**CREDIT:** Credit for eligible employers creating high-wage jobs in West Virginia on or after July 1, 2020.

**VALUE:** **$0 per year**

### Rationale

The High-Wage Growth Business Tax Credit is for high-wage jobs created in West Virginia by an eligible employer on or after July 1, 2020. To be an eligible employer, the employer must be registered to do business in West Virginia and offer health benefits to all full-time eligible employees. The employer must certify that it pays at least 50 percent of the health care premiums.

### Revenue Analysis

The High-Wage Growth Tax Credit is a relatively new credit that was passed during the 2020 Legislative Session. As of November 2025, there are no known applicants for this credit**.**

## SMALL ARMS AND AMMUNITION MANUFACTURERS CREDIT

**STATUTE:** W.Va. Code §11-13KK

**CREDIT:** Credit for 100 percent of federal excise tax paid in a tax year under section 4181, Title 26 of the Internal Revenue Code, which are attributable to taxpayer's qualified investment.

**VALUE:** **$0 per year**

### Rationale

The Small Arms and Ammunition Manufacturers Credit encourages investment in the manufacturing of small arms and ammunition in West Virginia.

### Revenue Analysis

The Small Arms and Ammunition Manufacturers Credit is a relatively new credit that was passed during the 2021 Legislative Session. As of November 2025, there are no known applicants for this credit.

## INDUSTRIAL ADVANCEMENT ACT TAX CREDIT

**STATUTE:** W.Va. Code §11-13LL

**CREDIT:** A credit equal to 50 percent of the qualified manufacturing investment.

**VALUE:** **Cannot be disclosed due to Taxpayer confidentiality**

### Rationale

The Industrial Advancement Tax Credit provides a tax credit of 50 percent of qualified manufacturing investment in a "qualified labor intensive heavy industrial manufacturing project." Qualified projects must entail at least $2 billion in investment in property purchased for manufacturing investment and placed in service at an industrial facility in West Virginia with at least 500 full-time West Virginia employees.

### Revenue Analysis

The Industrial Advancement Act Tax Credit is a relatively new credit that was passed during the 2022 Legislative Session. As of November 2025, there has been one application received for this credit.

## POST-COAL MINE SITE BUSINESS CREDIT

**STATUTE:** W.Va. Code §11-28

**CREDIT:** A credit is allowed for 50 percent of a taxpayer's capital expenditures at post-coal mine sites for the first five taxable years during which the taxpayer's principal place of business is located on the post-coal mine site.

**VALUE:** **$0 per year**

### Rationale

An eligible business will be allowed a tax credit in the amount of 50 percent of its capital expenditures at the post-coal mine site for the first five taxable years its principal place of business is located on the post-coal mine site.

## BUILD WV PROPERTY VALUE ADJUSTMENT TAX CREDIT

**STATUTE:** W.Va. Code §5B-2L

**CREDIT:** The BUILD WV Property Value Adjustment Tax Credit provides a ten-year, refundable property value adjustment tax credit to offset construction costs for eligible projects in designated areas.

**VALUE:** **$0 in Tax Year 2023**

### Rationale

The BUILD WV Property Value Adjustment Credit is intended to provide an incentive for property developers to build residential housing in areas of West Virginia with deficiencies, or projected deficiencies, in middle market housing.

### Revenue Analysis

The BUILD WV Property Value Adjustment Tax Credit is a relatively new credit that was passed during the 2022 Legislative Session. As of November 2025, there have been no claims against Corporation Net Income Tax.

# EMPLOYMENT TAX CREDITS

Employment Tax Credits generally exist to encourage employee training and the hiring of certain individuals, such as qualified unemployed veterans or other military personnel.

## APPRENTICESHIP TRAINING TAX CREDIT

**STATUTE:** W.Va. Code §11-13W

**CREDIT:** A credit of $2 per hour for the training of apprentices for qualified construction trade employers.

**VALUE:** **$70,000 per year**

### Rationale

The Apprenticeship Training Tax Credit provides qualified construction trade employers with a $2 per hour tax credit for the training of an apprentice up to a maximum of $2,000 per year or 50 percent of wages paid to such a person, whichever is less. The tax credit may provide some incentive for additional training of apprentices.

## WEST VIRGINIA JUMPSTART SAVINGS PROGRAM CREDIT FOR EMPLOYERS

**STATUTE:** W.Va. Code §11-24-10a

**CREDIT:** A credit for employer contributions to employees' Jumpstart Savings Accounts.

**VALUE:** **Minimal**

### Rationale

The West Virginia Jumpstart Savings Program Credit for Employers provides employers with a non-refundable tax credit of up to $5,000 per taxable year for direct contributions into their employee's Jumpstart Savings Account.

### Revenue Analysis

The West Virginia Jumpstart Savings Program Credit for Employers is a relatively new credit that was passed during the 2021 Legislative Session.

## MILITARY INCENTIVE TAX CREDIT

**STATUTE:** W.Va. Code §11-24-12

**CREDIT:** Military Incentive Credit promotes the hiring of veterans and National Guard members.

**VALUE:** **Minimal**

### Rationale

The Military Incentive Tax Credit provides employers who hire a qualified unemployed member of the West Virginia National Guard and reserve forces or unemployed disabled veteran with a one-time employment tax credit generally equal to either 25 percent of up to the first $5,000 in wages paid during the year or the disability percentage multiplied by the first $5,000 of wages paid to a qualified disabled veteran. The program is administered by Workforce West Virginia.

# CREDITS THAT AID LOW-INCOME FAMILIES

These credits are a form of government assistance for aiding low-income households. Public utilities and local telephone companies are compensated for the value of rate reductions to low- income customers through these tax credit programs.

## CREDIT FOR REDUCING UTILITY CHARGES TO LOW-INCOME FAMILIES

**STATUTES:** W.Va. Code §§11-13F and 11-24-11

**CREDIT:** A credit for reducing electric and natural gas utility rates equal to the cost of providing electric or natural gas service, or both, at special reduced rates as certified by the Public Service Commission under the provisions of §24-2A-2 of this code to qualified residential customers.

**VALUE:** **$0 per year**

### Rationale

This is a credit against the tax on the cost of providing electric, natural gas, or water utility services at reduced rates to qualified low-income residential customers that have not been reimbursed by any other means. This credit is a form of government assistance for aiding low-income households.

### Revenue Analysis

The cost is $0 against Corporation Net Income Tax because roughly $9.5 million in program costs are fully absorbed by Taxpayers taking the credit against Business and Occupation Tax.

## CREDIT FOR REDUCING TELEPHONE CHARGES TO LOW-INCOME FAMILIES

**STATUTE:** W.Va. Code §§11-13G and 11-24-11a

**CREDIT:** A credit for providing telephone service at special reduced rates to qualified low-income residential customers equal to its cost of providing telephone service at special reduced rates to qualified low-income residential customers.

**VALUE:** **$0 per year**

### Rationale

This credit is allowed against the primary tax liability of an eligible Taxpayer for the cost of providing wireline telephone services at special reduced rates to qualified low-income residential customers who have not been reimbursed by any other means. This credit is a form of government assistance for aiding low-income households.

### Revenue Analysis

The last year for a claim for this credit was 2008. The program was enacted in 1986 to provide certain low-income customers with some relief on their rate-regulated wireline telephone bills. No claims are likely in future years since telephone rates are no longer regulated by the PSC.

# MISCELLANEOUS TAX CREDITS

Miscellaneous Tax Credits exist to incentivize investments in a variety of activities, such as increasing charitable contributions, promoting purchases of environmentally friendly agricultural equipment, and encouraging rehabilitation of certain properties.

## NEIGHBORHOOD INVESTMENT PROGRAM CREDIT

**STATUTE:** W.Va. Code §11-13J

**CREDIT:** A credit for 50 percent of charitable contributions to community-based nonprofit organizations that establish projects to assist neighborhoods and local communities.

**VALUE:** **$60,000 per year**

### Rationale

The Neighborhood Investment Program Credit provides qualified contributing Taxpayers with a tax credit of up to 50 percent of charitable contributions made to an approved organization that received project approval along with an allotment of tax credits from the West Virginia Development Office based on recommendations from a neighborhood investment advisory board. The Taxpayer may use credits received from a qualifying organization to offset up to 50 percent of income tax liability. The minimum contribution for the purposes of the tax credit is $500 per year, and the maximum contribution is $200,000 per year. Excess tax credits may be carried forward for a period of up to four additional years. The total maximum amount of tax credit allocated by the State in any given year is limited to $3 million. The Program may stimulate additional giving for tax credit eligible charitable projects.

## ENVIRONMENTAL AGRICULTURAL EQUIPMENT TAX CREDIT

**STATUTE:** W.Va. Code §11-13K

**CREDIT:** A credit for 25 percent of certified expenditures for purchasing and installing qualified agricultural equipment for use in agricultural operations, not to exceed $2,500.

**VALUE:** **Minimal**

### Rationale

The Environmental Agricultural Equipment Tax Credit provides eligible Taxpayers with an incentive to purchase certain types of “environmentally friendly” agricultural equipment. The tax credit equals 25 percent of the purchase price of the qualified machinery. Taxpayers may claim up to $2,500 of credit per Tax Year, and the credit may be carried forward for up to five additional Tax Years.

## FILM INDUSTRY INVESTMENT TAX CREDT

**STATUTE:** W.Va. Code §11-13X

**CREDIT:** A nonrefundable tax credit for direct production and postproduction expenditures made in West Virginia on a qualified film project.

**VALUE:** **Cannot be disclosed due to Taxpayer confidentiality**

### Rationale

The Film Industry Investment Tax Credit is an incentive designed to promote the film industry in West Virginia through partial reimbursement of qualified film expenditures through marketable tax credits.

### Revenue Analysis

The Film Industry Investment Tax Credit was reinstated for taxable years beginning on and after July 1, 2022, with a sunset date of December 31, 2027. The reinstated credit has no statutory cap, and the credit can be sold or transferred. Therefore, the impact of the credit could become significant in future years. Film credits are valid for two taxable years after the taxable year in which the expenditures were made.

## MANUFACTURING PROPERTY TAX ADJUSTMENT CREDIT

**STATUTE:** W.Va. Code §11-13Y

**CREDIT:** A credit equal to the amount of local West Virginia property taxes paid on manufacturing inventory.

**VALUE:** **$2.6 million per year**

### Rationale

The Manufacturing Property Tax Adjustment Credit provides West Virginia manufacturers with a State tax credit equal to the amount of local West Virginia property taxes paid on manufacturing inventory. The State effectively pays a portion of the local property tax bill out of State funds. The current State Constitution requires assessment and collection of local property taxes on business inventory, including certain manufacturing inventories. Voters approved a narrow Constitutional Amendment in 1984 that removed the inventory tax from unaltered inventory destined for export outside of this State. However, other business inventories remain subject to the local property tax. Seven states currently impose property taxes on manufacturing inventory, including Arkansas, Kentucky, Louisiana, Mississippi, Oklahoma, Texas, and West Virginia.

### Revenue Analysis

Legislation enacted during the 2021 Session changed the four-factor apportionment formula for most multi-state businesses to a single sales factor formula effective for tax years beginning on and after January 1, 2022. In addition, market-based sourcing for sales other than sales of tangible personal property was adopted for sales made on or after January 1, 2022. The combined effect of these legislative changes has been to reduce the tax liability of many West Virginia manufacturers and their ability to utilize the Manufacturing Property Tax Adjustment Credit.

## INNOVATIVE MINE SAFETY TECHNOLOGY TAX CREDIT

**STATUTE:** W.Va. Code §11-13BB

**CREDIT:** A credit equal to 50 percent of the purchase cost of qualified safety equipment.

**VALUE:** **Cannot be disclosed due to Taxpayer confidentiality**

### Rationale

The Innovative Mine Safety Technology Tax Credit provides West Virginia coal mining companies with a State tax credit equal to 50 percent of the purchase cost of qualified safety equipment. The Office of Miners' Health Safety and Training, pursuant to applications for the tax credit, may allocate no more than $2 million of Innovative Mine Safety Technology Tax Credit per fiscal year. No one taxpayer may be allocated more than $100,000 in credit in any given year. The tax credit is intended to promote new investment in innovative coal mine safety technology.

## FARM TO FOOD BANK TAX CREDIT

**STATUTE:** W.Va. Code §11-13DD

**CREDIT:** A credit equal to 30 percent of the value of donated edible agricultural products.

**VALUE:** **Minimal**

### Rationale

A tax credit is available to farmers who make donations of edible agricultural products to one or more nonprofit food programs in West Virginia. The credit is equal to 30 percent of the value of the donated edible agricultural products, not to exceed $5,000 during a taxable year. Any credit remaining after application against the taxpayer's tax liabilities for the current year may be carried forward to the next four taxable years. No more than $200,000 of tax credits may be allocated in any fiscal year. Tax credits are allocated in the order in which the donation forms are received.

The purpose of the credit is to promote fresh, healthy, and local agricultural products for food banks and to provide an incentive for farmers to donate to food banks in the State.

## TAX CREDIT FOR DONATION OR SALE OF VEHICLE

**STATUTE:** W.Va. Code §11-13FF

**CREDIT:** A credit equal to either 50 percent of the program value of a vehicle donated to a qualified charitable organization or, for vehicles sold by dealers, 50 percent of the difference between the program value of the vehicle and the reduced sales price.

**VALUE:** **$0 in Tax Year 2023**

### Rationale

A tax credit is available to Taxpayers who donate a vehicle to a qualified charitable organization in this state of 50 percent of the determined program value up to $2,000. The credit is also available to licensed motor vehicle dealers that sell a vehicle at a reduced sales price to low-income workers through a program administered by a qualified charitable organization. The credit for licensed motor vehicle dealers is 50 percent of the difference between the program value of the vehicle and the reduced sales price up to $2,000. The purpose of the credit is to assist low-income workers in obtaining reliable transportation.

### Revenue Analysis

The Donation or Sale of Vehicle Tax Credit is effective for donations occurring after December 31, 2020. There were no claims made against the Corporation Net Income Tax in Tax Year 2023. The impact of the credit to General Revenue Fund collections was originally estimated to be up to $1.0 million per year for both Corporation Net Income Tax and Personal Income Tax combined.

## NATURAL GAS LIQUIDS PROPERTY TAX ADJUSTMENT CREDIT

**STATUTE:** W.Va. Code §11-13HH

**CREDIT:** A credit for natural gas liquid storers or transporters equal to the amount of the West Virginia ad valorem property tax paid on the value of natural gas liquids inventory and equipment.

**VALUE**: **Cannot be disclosed due to Taxpayer confidentiality**

### Rationale

The Natural Gas Liquids Property Tax Adjustment Credit was created as part of the Natural Gas Liquids Economic Development Act to encourage the development of these businesses in West Virginia. The credit provides eligible West Virginia natural gas liquid storers and transporters with a state tax credit equal to the amount of local West Virginia property taxes paid on the value of natural gas liquids inventory and equipment.

### Revenue Analysis

The Natural Gas Liquids Property Tax Adjustment Credit is effective for tax years beginning on or after July 1, 2020. The impact of the credit to General Revenue Fund collections was estimated to be $500,000 per year for both Corporation Net Income Tax and Personal Income Tax combined.

## MOTOR VEHICLE PROPERTY TAX ADJUSTMENT TAX CREDIT

**STATUTE:** W.Va. Code §11-13MM-3

**CREDIT:** A credit in the amount of property tax timely paid on owned or leased motor vehicles subject to West Virginia ad valorem property taxation during the corporation net income tax taxable year.

**VALUE:** **$0 in Tax Year 2023**

### Rationale

The credit was designed to give West Virginia taxpayers who own qualified vehicles and pay their personal property taxes on time a break. This is achieved by offering the amount of property tax paid on eligible vehicles as a credit against the taxpayer's state income tax liability or as a rebate.

### Revenue Analysis

The Motor Vehicle Property Tax Adjustment Credit is effective for tax years beginning on or after January 1, 2024. Therefore, there were no claims during the review period of this report, Tax Year 2023. The impact of the credit to General Revenue Fund collections was estimated to be $157.9 million for both Corporation Net Income Tax and Personal Income Tax combined.

## SMALL BUSINESS PROPERTY TAX ADJUSTMENT TAX CREDIT

**STATUTE:** W.Va. Code §11-13MM-5

**CREDIT:** A credit of 50 percent of the amount of property tax timely paid by eligible small business taxpayers on personal property subject to West Virginia ad valorem property taxation during the corporation net income taxable year.

**VALUE:** **$0 in Tax Year 2023**

### Rationale

The credit was designed to provide tax relief to eligible West Virginia small business taxpayers who own personal property and pay their personal property taxes on time. This is achieved by offering the amount of 50 percent property tax paid on eligible personal property as a credit against the taxpayer's state income tax liability or as a rebate.

### Revenue Analysis

The Small Business Property Tax Adjustment Credit is effective for tax years beginning on or after January 1, 2024. Therefore, there were no claims during the review period of this report, Tax Year 2023. The impact of the credit to General Revenue Fund collections was estimated to be less than $35.0 million for both Corporation Net Income Tax and Personal Income Tax combined.

## CREDIT FOR UTILITY TAXPAYERS WITH NET OPERATING LOSS CARRYOVERS

**STATUTE:** W.Va. Code §11-24-11b

**CREDIT:** A credit equal to one-quarter percent of the eligible taxpayer's West Virginia net operating loss carryovers.

**VALUE:** **$0 per year**

### Rationale

This credit was designed to preserve a portion of the value of net operating loss assets of regulated utility companies to offset valuation losses due to reduction of the State Corporation Net Income Tax rate. Even though this tax credit has been in effect since 2007, there have been no claims to date.

## HISTORIC REHABILITATED BUILDINGS INVESTMENT CREDIT

**STATUTE:** W.Va. Code §11-24-23a

**CREDIT:** A credit equal to 25 percent of qualified expenditures for qualified rehabilitated building projects located in West Virginia that also qualify for the 20 percent federal historic rehabilitation tax credit.

**VALUE:**

| | |
|---|---|
| **Tax Year 2021** | **$6.0 million** |
| **Tax Year 2022** | **$3.3 million** |
| **Tax Year 2023** | **$0.5 million** |
| **Tax Year 2024**[3] | **$9.1 million** |

### Rationale

The Historic Rehabilitated Buildings Investment Credit is available to qualified rehabilitated building projects located in West Virginia that also qualify for the 20 percent federal historic rehabilitation tax credit. Prior to January 1, 2018, the State tax credit equaled 10 percent of qualified expenditures for historic rehabilitation as approved by the West Virginia Division of Culture and History and designated by the National Park Service as a “certified historic structure.” Effective January 1, 2018, the State tax credit was increased to 25 percent of the qualified expenditures. The West Virginia tax credit can be transferred or sold to other Taxpayers. The tax credit was intended to promote historic building rehabilitation.

### Revenue Analysis

The value of the credit to Taxpayers was significantly enhanced through the increase of the credit percentage from 10 percent to 25 percent and the allowance of multi-phase projects. This change has encouraged larger multi-phase projects which will likely expand the use and resulting cost of the tax credit in future years.

[3] Tax Year 2024 data is incomplete.

## CAPITAL INVESTMENT IN CHILD-CARE PROPERTY TAX CREDIT

**STATUTE:** W.Va. Code §11-24-44

**CREDIT:** A credit is allowed for 50 percent of the cost of all qualified child-care property purchased or acquired by the taxpayer and first placed in service during a taxable year, and such credit may be claimed at a rate of 20 percent per year over a period of five taxable years.

**VALUE:** **Cannot be disclosed due to Taxpayer confidentiality**

### Rationale

The West Virginia Capital Investment in Child-Care Property Tax Credit provides a tax credit for employers who provide child-care facilities to their employees. Providing childcare is a benefit to both the employer and employees.

### Revenue Analysis

The Capital Investment in Child-Care Property Tax Credit is a relatively new credit that was passed during the 2022 Legislative Session. As of November 2025, there have been two applications received for this credit, and one has been approved. We anticipate utilization of this credit program will grow significantly in future years.

## OPERATING COSTS OF CHILD-CARE TAX CREDIT

**STATUTE:** W.Va. Code §11-24-44

**CREDIT:** A credit of up to 50 percent of costs is allowed for employers who provide or sponsor childcare for employees.

**VALUE:** **$0 in Tax Year 2023**

### Rationale

The West Virginia Operating Costs of Child-Care Tax Credit provides a tax credit for employers who provide child-care facilities for their employees, covering up to 50 percent of the costs. Providing childcare is a benefit to both the employer and employees.

### Revenue Analysis

The Operating Costs for Child-Care Tax Credit is a relatively new credit that was passed during the 2022 Legislative Session. As of November 2025, there have been two applications received for this credit, and one has been approved. However, no claims against the Corporation Net Income Tax were processed during the review period of this report. We anticipate utilization of this credit program will grow significantly in future years.

# PERSONAL INCOME TAX

## OVERVIEW

The Personal Income Tax is the largest source of revenue for West Virginia. This tax is imposed on the West Virginia taxable income of resident individuals (except non-grantor trusts) regardless of where income is earned. Nonresident individuals are also subject to the tax on income received from West Virginia sources. Corporations, partnerships (but not partners), other entities treated like partnerships for federal income tax purposes, and certain trusts and associations are exempt from West Virginia Personal Income Tax.

For individuals, computation of West Virginia taxable income begins with federal adjusted gross income. West Virginia adjusted gross income is determined by application of various State modifications increasing or decreasing federal adjusted gross income. To determine West Virginia taxable income, the Taxpayer then takes a deduction based on the number of personal exemptions that could have been claimed on the federal return under federal rules prior to 2018.

Personal Income Tax rates differ with each taxable income category. Although the rates increase as taxable income increases, each marginal rate is independent of every other rate. The following tables provide these tax rates for Tax Year 2023 (the year used for estimation of expenditures in this study). Rates were lowered for Tax Year 2025 and future years due to legislative action. Beginning on August 15, 2024, and every August 15th thereafter, the Secretary of Revenue determines whether the total fiscal year General Revenue Fund collections less the amount of Severance Tax collected from the immediately preceding fiscal year are more than inflation-adjusted base year revenues minus base year Severance Tax collected. If the total fiscal year adjusted General Revenue Fund collections are more than the inflation adjusted base year revenues, then there will be a reduction in the Personal Income Tax rates beginning in the next taxable year. The reduction in Personal Income Tax rates for a given tax year may not be greater than 10.0 percent.

On August 15, 2024, a determination was made that the formula triggered a 4 percent tax cut effective January 1, 2025. During a 2024 special session of the West Virginia Legislature, an additional 2 percent tax cut was enacted along with an additional twelve-month delay in implementation of future triggered tax cuts.

### West Virginia Tax Rate Schedule for Tax Years 2023 and 2024

All Taxpayers **Excluding** Married Filing Separately

| TAXABLE INCOME | | TAX LIABILITY | | |
|---|---|---|---|---|
| **Over** | **Not Over** | **Base Tax** | **Plus** | **Over** |
| $0 | $10,000 | $0.00 | 2.36% | $0 |
| $10,000 | $25,000 | $236.00 | 3.15% | $10,000 |
| $25,000 | $40,000 | $708.50 | 3.54% | $25,000 |
| $40,000 | $60,000 | $1,239.50 | 4.72% | $40,000 |
| $60,000 | | $2,183.50 | 5.12% | $60,000 |

## West Virginia Tax Rate Schedule for Tax Years 2023 and 2024

Married Filing Separately Only

| TAXABLE INCOME | | TAX LIABILITY | | |
|---|---|---|---|---|
| Over | Not Over | Base Tax | Plus | Over |
| $0 | $5,000 | $0.00 | 2.36% | $0 |
| $5,000 | $12,500 | $118.00 | 3.15% | $5,000 |
| $12,500 | $20,000 | $354.25 | 3.54% | $12,500 |
| $20,000 | $30,000 | $619.75 | 4.72% | $20,000 |
| $30,000 | | $1,091.75 | 5.12% | $30,000 |

## ORGANIZATION AND ANALYSIS

The Personal Income Tax expenditures discussed in this report are divided into six groups:

- Exclusions;
- Exemptions;
- Decreasing Modifications;
- Federally Mandated Exemptions;
- Other Decreasing Modifications, and
- Credits.

The analysis provided for each tax expenditure includes a cost to the State. A rationale is provided for most expenditures.

## ESTIMATING COSTS OF TAX EXPENDITURES

The costs for the Personal Income Tax expenditures are derived from information on Tax Year 2023 returns. It should be noted that tax rates have decreased since Tax Year 2023. As a result, the expenditure values would be lower in future years.

# EXCLUSIONS

The existence of Personal Income Tax exclusions reduces West Virginia taxable income by reductions to federal adjusted gross income. Such exclusions include a variety of federal above the line exclusions and those benefitting low-income Taxpayers.

## FEDERAL ABOVE THE LINE EXCLUSIONS

Computation of West Virginia taxable income begins with federal adjusted gross income. For that reason, items excluded from the definition of federal adjusted gross income are also excluded for West Virginia Personal Income Tax purposes, unless specific additions are included in the West Virginia Code. Some of these exclusions include:

- Nontaxable Social Security Benefits;
- Nontaxable Tier I Railroad Retirement Benefits;
- Workers' Compensation Benefits;
- Veterans' Benefits and Services;
- Life Insurance Death Benefits;
- Contributions to 401K Plans;
- Interest on West Virginia or Municipal Tax-Exempt Bonds;
- Income Earned Abroad by U.S. Citizens;
- Capital Gains on Home Sales;
- Deferral for Reinvesting Scholarship and Fellowship Income;
- Employee Meals and Lodging;
- Employer Contributions for Medical Insurance and Care and Pensions;
- Employer-Provided Child Care;
- Benefits and Allowances to Armed Forces Personnel;
- Combat Pay Received for Desert Shield Service;
- Employer-Paid Premiums on Life, Disability, and Accident Insurance;
- Capital Gains at Death;
- Expensing of Capital Outlays for Farm Income Stabilization, and
- Research and Development Costs.

This list is not all-inclusive. The estimated revenue loss from the above-mentioned list is $360.0 million per year.

## FEDERAL ABOVE THE LINE ADJUSTMENTS

Computation of West Virginia taxable income begins with federal adjusted gross income. For that reason, income adjustments prior to the calculation of federal adjusted gross income are also excluded for West Virginia Personal Income Tax purposes, unless specific additions are included in the West Virginia Code. Some of these adjustments include:

- Deductible Contributions to Individual Retirement Accounts (IRAs) and Keogh Accounts;
- The 50 Percent Self-Employment Tax Exclusion;
- The Self-Employed Health Insurance Deduction;
- The Self-Employed SEP Deduction;
- Health Savings Account Deduction;
- Penalty On Early Withdrawal of Savings;
- Alimony Paid;
- Student Loan Interest Deduction;
- Educator Expense Deduction, and
- Tuition and Fees Deduction.

This list is not all-inclusive. The estimated revenue loss from the above-mentioned adjustments to federal income is $19.0 million per year.

In addition to the exclusions listed above, West Virginia law allows the following exclusion to aid low-income families.

## LOW INCOME EXCLUSION

**STATUTE:** W.Va. Code §11-21-10

**EXCLUSION:** A deduction from federal adjusted gross income of the amount of earned income included, not to exceed $10,000, except for a husband and wife filing separate returns whose exclusion cannot exceed $5,000 each.

**VALUE:** **$7.5 million per year**

### Rationale

The low-income exclusion exists to provide some tax relief to low-income Taxpayers. However, the deduction is only available to Taxpayers with total earned income below the statutory threshold.

### Revenue Analysis

The value noted above for this expenditure is the “gross value” which is the value calculated independently of other variables. The revenue impact of this expenditure is strongly affected by other expenditures discussed in this study such as personal exemptions, the Family Tax Credit, and the Senior Citizen income modification. Including these variables in the calculation would significantly reduce the estimated “net value” of this expenditure.

# EXEMPTIONS

Any individual Taxpayer, whether resident or nonresident, is allowed a $2,000 exemption for each personal exemption claimed on the federal return under federal rules prior to 2018. A surviving spouse is allowed one additional $2,000 exemption for the two taxable years beginning after the death of his or her spouse. Individuals claimed as dependents on another's return can only take one $500 exemption. These exemptions include:

- Personal Exemption;
- Surviving Spouse Exemption, and
- Exemption for Dependents Claimed on Another's Return.

An analysis of these exemptions follows.

## PERSONAL EXEMPTION

**STATUTE:** W.Va. Code §11-21-16(a)

**EXEMPTION:** $2,000 per personal exemption allowed.

**VALUE:** **$116.0 million per year**

### Rationale

The personal exemption provides a tax deduction based on the number of people supported by the reported income. Additional exemptions are allowed for special circumstances (e.g., surviving spouse exemption). The personal exemption could possibly be seen as an allowance to reduce gross income. Such allowances increase the income threshold for income tax filing and provide some level of tax relief to low-income households and to families. In terms of tax reduction, the value is greater per return at higher income levels.

## SURVIVING SPOUSE EXEMPTION

**STATUTE:** W.Va. Code §11-21-16(c)

**EXEMPTION**: One additional $2,000 exemption allowed for a surviving spouse for two taxable years beginning after the death of a spouse.

**VALUE:** **$280,000 per year**

### Rationale

This modification exists to help in the transition for the surviving spouse.

## EXEMPTION FOR DEPENDENTS CLAIMED ON ANOTHER'S RETURN

**STATUTE:** W.Va. Code §11-21-16(d)

**EXEMPTION:** $500 for individuals claimed as dependents on another's return.

**VALUE:** **$210,000 per year**

### Rationale

Dependents claimed on another's return are not allowed a personal exemption for federal income tax purposes under federal rules in place prior to 2018. West Virginia allows a lower exemption for these individuals. The amount for this exemption is equal to the basic federal standard deduction for dependents claimed on another's return in 1987. This partial exemption benefits those dependents claimed on another's return, many of whom are students working part time.

# DECREASING MODIFICATIONS

In determining West Virginia taxable income, specific increases or decreases are made to federal adjusted gross income. Most income reduction modifications are tax expenditures. These modifications are available to some, but not all Taxpayers. Decreasing modifications discussed in this section include:

- Decreasing Modification for Resident Full-Time Military Personnel Stationed Outside West Virginia;
- Interest and Dividend Income from State or Local Obligations;
- State Income Tax Refunds;
- Decreasing Modification for Social Security Benefits;
- Decreasing Modification for Senior Citizens;
- Decreasing Modification for Disabled Persons;
- Decreasing Modification for Surviving Spouses;
- Decreasing Modification for Contributions to Medical Savings Accounts;
- Decreasing Modification for Contributions to West Virginia SMART529 Trust Fund;
- Decreasing Modification for Premiums for Long-Term Care Insurance Policies;
- Decreasing Modification for IRC 1341 Repayments;
- Pension Benefit Guarantee Modification;
- Decreasing Modification for National Guard and Reserve Forces Called to Active Duty;
- Decreasing Modification for Active Duty Military Separation;
- Decreasing Modification for Contributions to Private Autism Trust Funds;
- Decreasing Modification for Contributions to Achieving a Better Life Experience (ABLE) Accounts;
- Decreasing Modification for Qualified Opportunity Zone Business Income;
- Decreasing Modification for West Virginia Jumpstart Savings Program Deposits;
- Decreasing Modification for Gambling Losses;
- Decreasing Modification for Assets Held by Subchapter S Corporations;
- Pension Exclusions:
    - Federal Retirement System Benefits;
    - West Virginia Public Employees' Retirement System Benefits;
    - West Virginia Teachers' Retirement System Benefits;
    - State or Local Police or Firefighters' or Deputy Sheriffs' Retirement Systems Benefits;
    - Federal Retirement Benefits Received by Retired Federal Law Enforcement Officers;
    - Military Retirement Benefits, and
    - Railroad Retirement Benefits;
- Federally Mandated Exclusion:
    - Interest Income from United States Obligations for Personal Income Tax Purposes.

An analysis of these decreasing modifications follows.

## DECREASING MODIFICATION FOR RESIDENT FULL-TIME MILITARY PERSONNEL STATIONED OUTSIDE WEST VIRGINIA

**STATUTE:** W.Va. Code §11-21-7

**EXCLUSION:** **M**ilitary income earned by military personnel who claim West Virginia as the individuals' State of residence but are stationed outside the State.

**VALUE:** **Cannot be determined**

### Rationale

If a Taxpayer is a member of the United States military forces and the Taxpayer's domicile was in West Virginia at the time the person entered military service, then assignment to duty outside the State does not change the Taxpayer's West Virginia domicile. The members of the armed forces will be liable for West Virginia Personal Income Tax unless the following conditions are met:

1. The Taxpayer had no permanent place of abode in West Virginia during the tax year, and
2. The Taxpayer did not spend more than 30 not necessarily consecutive days in West Virginia during the tax year.

These Taxpayers, despite claiming West Virginia as the individuals' State of residence, were stationed elsewhere and did not live in West Virginia during the tax year. This is an implied modification based on an administrative interpretation of the definition of residency for Personal Income Tax purposes.

### Revenue Analysis

The revenue loss associated with this decreasing modification could not be determined. Most full-time military personnel are not required to file West Virginia Personal Income Tax returns because such income is exempt from State taxation.

## INTEREST AND DIVIDEND INCOME FROM STATE OR LOCAL OBLIGATIONS

**STATUTE:** W.Va. Code §11-21-12(c)(2)

**EXCLUSION:** Interest income on West Virginia obligations subject to federal tax but not State tax.

**VALUE:** **Minimal**

### Rationale

Interest income from West Virginia obligations is excluded because these obligations represent funding for State and local projects. A tax on interest income increases the cost of borrowing.

Interest from most State and local obligations is excluded for federal income tax purposes. This income is usually not included in federal adjusted gross income, which is the starting point in calculating West Virginia Personal Income Tax liability. The amount of interest from West Virginia obligations not already excluded in calculating federal adjusted gross income is small. Therefore, the revenue loss from excluding any other interest from State or local obligations is minimal.

## STATE INCOME TAX REFUNDS

**STATUTE:** W.Va. Code §11-21-12(c)(4)

**DEDUCTION:** Any refund or credit for overpayment of West Virginia income taxes or income taxes of any other taxing jurisdiction to the extent included in gross income for federal income tax purposes.

**VALUE:** **$220,000 per year**

### Rationale

This decrease is only for Taxpayers who itemized on prior year federal returns. For Taxpayers who itemize on their federal return, state and local income taxes withheld can be deducted on the federal return for the tax year in which the payments are made. The modification is based on the amount of income tax paid, not the tax liability. Therefore, any refund must be included in federal adjusted gross income for the tax year in which it is received. Since West Virginia does not allow a deduction for State and local income taxes paid, a refund included in federal adjusted gross income may be deducted for State purposes. This modification eliminates double taxation of the same income and therefore is **not** a tax expenditure.

### Revenue Analysis

The value for this decreasing modification has declined due to the changes in the federal income tax standard deduction. Fewer taxpayers itemize their deductions for federal income tax purposes due to the significant increase in the federal standard deduction. The share of West Virginia federal income tax returns with itemized deductions fell from 17.4 percent in 2017 to 3.4 percent in 2022.

## DECREASING MODIFICATION FOR SOCIAL SECURITY BENEFITS

**STATUTE:** W.Va. Code §11-21-12(c)(8)

**EXCLUSION:** For tax years beginning on or after January 1, 2022, 100 percent of the social security benefits paid by the Social Security Administration as Old Age, Survivors and Disability Insurance Benefits as provided in §42 U.S.C. 401 et. seq. or as Supplemental Security Income for the Aged, Blind, and Disabled as provided in 42 U.S.C. § 1381 et. seq., included in federal adjusted gross income for the tax year shall be allowed as a decreasing modification provided that federal adjusted gross income cannot exceed $50,000 for a single filer or $100,000 for a married joint filer.

In case of single filers with federal adjusted gross income above $50,000 or joint filers with federal adjusted gross income above $100,000:

For tax years beginning on and after January 1, 2024, 35 percent of the social security benefits received pursuant to Chapter 7 of Title 42 of the United States Code, including, but not limited to, social security benefits paid by the Social Security Administration as Old Age, Survivors and Disability Insurance Benefits as provided in 42 U.S.C. § 401 et. seq. or as Supplemental Security Income for the Aged, Blind, and Disabled as provided in 42 U.S.C. § 1381 et. seq., included in federal adjusted gross income for the tax year shall be allowed as a decreasing modification.
For tax years beginning on or after January 1, 2025, 65 percent of the social security benefits received pursuant to Chapter 7 of Title 42 of the United States Code, including, but not limited to, social security benefits paid by the Social Security Administration as Old Age, Survivors and Disability Insurance Benefits as provided in 42 U.S.C. § 401 *et. seq*. or as Supplemental Security Income for the Aged, Blind, and Disabled as provided in 42 U.S.C. § 1381 et. seq., included in federal adjusted gross income for the tax year shall be allowed as a decreasing modification.

For tax years beginning on or after January 1, 2026, 100 percent of the social security benefits received pursuant to Chapter 7 of Title 42 of the United States Code, including, but not limited to, social security benefits paid by the Social Security Administration as Old Age, Survivors and Disability Insurance Benefits as provided in 42 U.S.C. § 401 et. seq. or as Supplemental Security Income for the Aged, Blind, and Disabled as provided in 42 U.S.C. § 1381 et. seq., included in federal adjusted gross income for the tax year shall be allowed as a decreasing modification.

**VALUE:**

| | |
|---|---|
| **FY2023** | **$25.2 million** |
| **FY2024** | **$20.5 million** |
| **FY2025** | **$24.5 million** |
| **FY2026** | **$38.8 million** |
| **FY2027** | **$55.5 million** |

### Rationale

The purpose of the modification is to provide tax relief on taxable Social Security benefits paid to taxpayers.

### Revenue Analysis

Beginning with Tax Year 2026, the modification will increase to 100 percent of federally taxed Social Security benefits for all taxpayers. The full impact of the modification is expected to cause a reduction in General Revenue Fund collections of more than $55 million beginning in Fiscal Year 2027.

There was a decrease in the expenditure value in FY2024 due to the reduction in income tax rates.

## DECREASING MODIFICATION FOR SENIOR CITIZENS

**STATUTE:** W.Va. Code §11-21-12(c)(9)

**EXCLUSION:** Senior citizen exclusion of up to $8,000 per individual or $16,000 per two-income married couple filing jointly.

**VALUE:** **$71.4 million per year**

### Rationale

This modification provides a significant tax reduction for those aged 65 or older. It was designed as a minimum income exclusion for low-income senior citizens although all Taxpayers over 65 years old, whether the individuals are low-income or high-income earners, are allowed this modification.

### Revenue Analysis

The repeal of this modification would not necessarily yield the amount shown. The revenue impact for this exemption was calculated in isolation from other exemptions. Therefore, the actual revenue to be gained by the repeal of the decreasing modification for senior citizens would be less than stated above. Other exclusions, such as the decreasing modification for taxable social security benefits, may overlap this modification. Due to these overlapping modifications, legislation to repeal the senior citizen modification would result in a revenue gain of approximately $45.5 million. The loss could be lower in future years due to the phase-in of the taxable Social Security exemption.

## DECREASING MODIFICATION FOR DISABLED PERSONS

**STATUTE:** W.Va. Code §11-21-12(c)(9)

**EXCLUSION:** Permanent disability exclusion of up to $8,000 per individual or $16,000 per married couple filing jointly.

**VALUE:** **$3.6 million per year**

### Rationale

This decreasing modification provides a measure of income tax relief to disabled individuals.

### Revenue Analysis

The repeal of this modification would not necessarily yield the amount shown. The revenue impact for this exemption was calculated in isolation from other exemptions. Therefore, the actual revenue to be gained by the repeal of the decreasing modification for permanently and totally disabled taxpayers would be less than stated above. Other exclusions, such as the decreasing modification for taxable social security benefits, may overlap this modification. Due to these overlapping modifications, legislation to repeal the modification for permanently and totally disabled taxpayers would result in a revenue gain of approximately $1.7 million per year.

## DECREASING MODIFICATION FOR SURVIVING SPOUSES

**STATUTE:** W.Va. Code §11-21-12(c)(10)

**EXCLUSION:** Surviving spouse exclusion of up to $8,000 for the spouse of a person who had attained age 65 or who was certified as totally and permanently disabled prior to death.

**VALUE:** **$30,000 per year**

### Rationale

This modification exists to help in the transition for surviving spouses. The surviving spouse may claim a one-time subtraction from his/her income of up to $8,000 for the tax year following the year of the spouse's death if the decedent was 65 years of age or older or was certified as permanently and totally disabled prior to his or her death.

## DECREASING MODIFICATION FOR CONTRIBUTIONS TO MEDICAL SAVINGS ACCOUNTS

**STATUTE:** W.Va. Code §11-21-12(c)(11)

**EXCLUSION:** Contributions to medical savings accounts established pursuant to W.Va. Code §33-16-15 to the extent included in federal adjusted gross income for federal income tax purposes less any portion of employer contributions withdrawn for purposes other than payment of medical expenses.

**VALUE:** **$0 per year**

### Rationale

This modification exists to encourage the formation and use of State medical savings accounts. However, contributions to medical savings accounts that qualify for federal exclusion are also automatically excluded from State taxes because of the State tie-in to federal adjusted gross income. There are no known State medical savings accounts that do not qualify for federal tax exclusions.

## DECREASING MODIFICATION FOR CONTRIBUTIONS TO WEST VIRGINIA SMART529 TRUST FUND

**STATUTE:** W.Va. Code §11-21-12a

**EXCLUSION:** Payments made to either the West Virginia Prepaid Trust Fund or the West Virginia SMART529 Trust Fund.

**VALUE:** **$2.1 million per year**

### Rationale

This modification exists to encourage Taxpayers to save for their children's or other family members' college education. This modification is available for contributions to either the West Virginia Prepaid Trust Fund or the West Virginia SMART529 Trust Fund. The West Virginia Prepaid Trust Fund closed to new enrollments on March 8, 2003, but contributions can still be made to the plans of those who were already enrolled before this date. Nearly all Taxpayers using this modification are making contributions to SMART529 plans.

### Revenue Analysis

The value of this expenditure has decreased in recent years due to a decrease in the number of taxpayers taking advantage of this modification and a decrease in the amount of contributions to Smart529 plans. A 21.25 percent reduction in rates between 2022 and 2023 also led to a reduction in the value of this modification.

## DECREASING MODIFICATION FOR PREMIUMS FOR LONG-TERM CARE INSURANCE POLICIES

**STATUTE:** W.Va. Code §11-21-12c

**EXCLUSION:** Payments for premiums for a long-term care policy that offers coverage to either the Taxpayer or the Taxpayer's spouse, parent, or dependent.

**VALUE:** **$760,000 per year**

### Rationale

This expenditure exists to encourage the purchase of long-term care insurance policies.

## DECREASING MODIFICATION FOR IRC 1341 REPAYMENTS

**STATUTE:** W.Va. Code §11-21-12(c)(4)

**EXCLUSION:** Amount paid back under IRC 1341 provided that the amount of income must be more than $3,000 to qualify

**VALUE:** **$20,000 per year**

**Rationale**

If a taxpayer must repay more than $3,000 of wages received in error and reported and taxed in a prior tax year, the taxpayer can take a credit against federal income tax for the year when repayment occurred, instead of having to file an amended return for the year when the error occurred. A calculation is done to show the amount that would have resulted on a previous year's tax return as if the wages were never paid. Then the difference between the tax that was paid and what would have been paid is claimed as a credit on the current year's federal return. A taxpayer can take a decreasing modification for State income tax purposes on the current year's return for the amount repaid if that amount is more than $3,000.

.

## PENSION BENEFIT GUARANTEE MODIFICATION

**STATUTE:** W.Va. Code §11-21-12d

**EXCLUSION:** A decreasing modification for the difference between the amount the taxpayer would have received had his pension plan not been terminated and the amount actually received from the guarantor for taxpayers who retire under an employer-provided defined benefits pension plan that terminates prior to or after the retirement and that pension plan is covered by a guarantor whose maximum benefit guarantee is less than the maximum benefit to which the taxpayer is entitled.

**VALUE:** **$320,000 per year**

**Rationale**

This modification exists as a benefit for retirees who are receiving less benefits than they were entitled to under a defined benefits plan because the pension plan was terminated due to inadequate funding and payments are being made by a federally backed guarantor. The value of the modification is decreasing over time as fewer retirees receive such benefits, and there are fewer defined employer benefit plans.

## DECREASING MODIFICATION FOR NATIONAL GUARD AND RESERVE FORCES CALLED TO ACTIVE DUTY

**STATUTE:** W.Va. Code §11-21-12e(a)

**EXCLUSION:** Income of members of the West Virginia National Guard or reserve forces who are called to active duty for Operation Enduring Freedom or domestic security duty.

**VALUE:** **Cannot be determined**

**Rationale**

This modification exists to recognize the services of reserve military or National Guard personnel who are called to active duty for as defined in Executive Order 13223 as part of Operation Noble Eagle, Operation Enduring Freedom, Operation Iraqi Freedom, Operation New Dawn, and Operation Inherent Resolve as well as any other current or future military operations deemed to be part of the Overseas Contingency Operation (OCO). The President's memorandum applies to any West Virginia

National Guard and Reserve service member called to active duty in support of the OCO, regardless of whether they are deployed overseas or stateside.

**Revenue Analysis**

The revenue loss associated with this decreasing modification cannot be determined. The loss of revenue in any given year depends on the number of military personnel called to active duty and the length of time spent on active duty.

## DECREASING MODIFICATION FOR ACTIVE-DUTY MILITARY SEPARATION

**STATUTE:** W.Va. Code §11-21-12e(b)

**EXCLUSION:** Active-duty military income earned by military personnel who claim West Virginia as the individual's State of residence if individual was on active duty for at least 30 continuous days and has separated from active military service.

**VALUE:** **$270,000 per year**

**Rationale**

This modification exists presumably to encourage military personnel to live in West Virginia following separation from the military.

## DECREASING MODIFICATION FOR CONTRIBUTIONS TO PRIVATE AUTISM TRUST FUNDS

**STATUTE:** W.Va. Code §11-21-12i

**EXCLUSION:** Contributions to a qualified trust maintained for the benefit of a child with autism by the parent or guardian of a child with autism to the extent the amount is not allowable as a deduction when arriving at federal adjusted gross income.

**VALUE:** **Minimal**

**Rationale**

This expenditure exists to encourage savings for future expenses for an autistic child.

## DECREASING MODIFICATION FOR CONTRIBUTIONS TO ACHIEVING A BETTER LIFE EXPERIENCE (ABLE) ACCOUNTS

**STATUTE:** W.Va. Code §11-21-12j

**EXCLUSION:** Contributions to an account created pursuant to the West Virginia ABLE Act in §16-48-1 et seq. of this code but only to the extent the amount is not allowable as a deduction when arriving at the taxpayer's federal adjusted gross income for the taxable year in which the payment is made.

**VALUE:** **$20,000 per year**

**Rationale**

This modification exists to encourage contributions to ABLE accounts by individuals with disabilities and their families. ABLE accounts can be used for future disability expenses.

## DECREASING MODIFICATION FOR QUALIFIED OPPORTUNITY ZONE BUSINESS INCOME

**STATUTE:** W.Va. Code §11-21-12l

**EXCLUSION:** Qualified Opportunity Zone business income.

**VALUE:** **Minimal**

**Rationale**

The purpose of this modification is to encourage individuals and businesses to invest in certain rural and low-income urban communities through qualified opportunity zone projects. West Virginia has designated 55 census tracts in 30 counties as qualified opportunity zones, which included both larger cities and small towns. Qualified opportunity zones were part of the Tax Cuts and Jobs Act of 2017 and were included in this specific federal tax reform legislation passed by Congress to encourage economic growth in neglected areas of the United States that had a high demand for capital investments.

## DECREASING MODIFICATION FOR WEST VIRGINIA JUMPSTART SAVINGS PROGRAM DEPOSITS

**STATUTE:** W.Va. Code §11-21-12m

**EXCLUSION:** Payments to a taxpayer's Jumpstart Savings Account, up to $25,000 a year.

**VALUE:** **Minimal**

**Rationale**

The West Virginia Jumpstart Savings Program aids West Virginians pursuing careers in skilled trades, vocational fields, and entrepreneurship. It provides a state-tax-advantaged savings account to help individuals save, for expenses related to their chosen profession, such as tools, equipment, licensing, and business costs. The decreasing modification reduces the taxable income and potentially the tax liability of a taxpayer who contributes to a Jumpstart account.

## DECREASING MODIFICATION FOR GAMBLING LOSSES

**STATUTE:** W.Va. Code §11-21-12n

**EXCLUSION:** Certain gambling and gaming losses, up to the amount of gambling and gaming winnings.

**VALUE:** **$2.2 million per year**

**Rationale**

A decreasing modification is allowed for West Virginia gambling and gaming losses to the extent reflected as a federal itemized deduction, not to exceed the amount of West Virginia gaming and gambling winnings for the year. Providing tax relief to residents who gamble could potentially encourage them to gamble within West Virginia's regulated and licensed facilities, such as casinos, racetracks, and online platforms. Prior to the addition of this decreasing modification, West Virginia was one of the few states that taxed residents on their gross gambling winnings without allowing deductions for losses.

## DECREASING MODIFICATION FOR ASSETS HELD BY SUBCHAPTER S CORPORATIONS

**STATUTE:** W.Va. Code §11-21-17a

**EXCLUSION:** A decreasing modification related to certain assets held by the S corporation bank that are exempt or specially treated for State tax purposes.

**VALUE:** **Minimal**

**Rationale**

This modification for shareholders of S corporations in the banking business for tax years beginning on or after January 1, 2015 parallels a similar modification for Corporation Net Income Tax related to United States obligations, state obligations and mortgage obligations.

# PENSION EXCLUSIONS

Due to the similarities in West Virginia's tax treatment of retirement benefits for government retirees, these exclusions have been grouped together for purposes of this study. Currently, most pension plan contributions are tax-deferred under both federal and West Virginia tax laws. A pension income exclusion changes tax-deferred income into tax-exempt income.

## FEDERAL RETIREMENT SYSTEM BENEFITS

**STATUTE:** W.Va. Code §11-21-12(c)(5)

**EXCLUSION:** The first $2,000 of benefits received from any federal retirement system.

**VALUE:** **$1.6 million per year**

### Rationale

Due to the United States Supreme Court ruling in Davis v. Michigan, 489 U.S. 803 (1989), this partial exclusion is necessary because a similar exclusion is allowed for State government retirement benefits.

### Revenue Analysis

Taxpayers who are eligible for the $8,000 exclusion for those who are at least 65 years old or totally and permanently disabled may currently take a $6,000 exclusion for senior citizens or disabled persons and $2,000 decreasing modification for any federal retirement benefits. Without the decreasing modification for federal retirement benefits, these Taxpayers would be eligible for the full $8,000 senior citizen exclusion.

## WEST VIRGINIA PUBLIC EMPLOYEES' RETIREMENT SYSTEM BENEFITS

**STATUTE:** W.Va. Code §11-21-12(c)(5)

**EXCLUSION:** The first $2,000 of benefits received from the West Virginia Public Employees' Retirement System.

**VALUE:** **$2.1 million per year**

### Rationale

This modification is a benefit for West Virginia Public Employees' Retirement System participants.

### Revenue Analysis

Taxpayers who are eligible for the $8,000 exclusion for those who are at least 65 years old or totally and permanently disabled may currently take a $6,000 exclusion for senior citizens or disabled persons and $2,000 decreasing modification for any benefits from the West Virginia Public Employees' Retirement System. Without the decreasing modification for benefits from the West Virginia Public Employees' Retirement System, these Taxpayers would be eligible for the full $8,000 senior citizen exclusion.

## WEST VIRGINIA TEACHERS' RETIREMENT SYSTEM BENEFITS

**STATUTE:** W.Va. Code §11-21-12(c)(5)

**EXCLUSION:** The first $2,000 of benefits received from the West Virginia Teachers' Retirement System.

**VALUE:** **$3.0 million per year**

### Rationale

This modification exists as a benefit for West Virginia Teachers' Retirement System participants.

### Revenue Analysis

Taxpayers who are eligible for the $8,000 exclusion for those who at least 65 years old or totally and permanently disabled may currently take a $6,000 exclusion for senior citizens or disabled persons and $2,000 decreasing modification for any benefits from the West Virginia Teachers' Retirement System. Without the decreasing modification for benefits from the West Virginia Teachers' Retirement System, these Taxpayers would be eligible for the full $8,000 senior citizen exclusion.

## STATE OR LOCAL POLICE OR FIREFIGHTERS' OR DEPUTY SHERIFFS' RETIREMENT SYSTEM BENEFITS

**STATUTE:** W.Va. Code §11-21-12(c)(6)

**EXCLUSION:** All benefits received under the West Virginia Department of Public Safety Death, Disability and Retirement Fund or retirement income received in the form of pensions or annuities from any West Virginia police or firemen's retirement system after December 31, 1979.

**VALUE:** **$4.3 million per year**

### Rationale

All benefits received from any West Virginia State or local police, or firefighters' retirement system are excluded from Personal Income Tax.

### Revenue Analysis

As a portion of total value, 70 percent of this exclusion is attributable to retirees from police departments. The remaining 30 percent is attributable to retirees from fire departments.

Some of these Taxpayers are senior citizens. If no decreasing modification existed for benefits from State or local police or firefighters' retirement plans, these Taxpayers would be eligible for the $8,000 decreasing modification for Taxpayers over age 65 or totally and permanently disabled.

## FEDERAL RETIREMENT BENEFITS RECEIVED BY RETIRED FEDERAL LAW ENFORCEMENT OFFICERS

**STATUTE:** W.Va. Code §11-21-12(c)(6)

**EXCLUSION:** All federal retirement benefits received by federal law enforcement and firefighter retirees.

**VALUE:** **$2.9 million per year**

### Rationale

All federal retirement benefits received by federal law enforcement and firefighter retirees are excluded from Personal Income Tax. The decision in *Dawson v. Steager* extended the benefit given to State police officers and firefighters to federal retirees with similar job responsibilities.

### Revenue Analysis

Some of these Taxpayers are senior citizens. If no decreasing modification existed for benefits from State or local police or firefighters' retirement plans, these Taxpayers would be eligible for the $8,000 decreasing modification for Taxpayers over age 65 or totally and permanently disabled.

## MILITARY RETIREMENT BENEFITS

**STATUTE:** W.Va. Code §11-21-12(c)(7)

**EXCLUSION:** Military Retirement Benefits.

**VALUE:** **$11.1 million per year**

### Rationale

This modification exists as a benefit for military retirees.

### Revenue Analysis

Effective with the 2019 Tax Year, this modification excludes all military retirement benefits. Military retirement benefits include those benefits received based on service in the Army, Navy, Marines, Air Force, Coast Guard, Public Health Service, National Oceanic Atmospheric Administration, Reserves, and National Guard, which are paid by the United States or by this State after December 31, 2018, including any survivorship annuities, to the extent included in federal adjusted gross income for the tax year.

Some of these Taxpayers are senior citizens. If no decreasing modification existed for military retirement benefits, these Taxpayers would be eligible for the $8,000 decreasing modification for Taxpayers over age 65 or totally and permanently disabled.

## RAILROAD RETIREMENT BENEFITS

**STATUTE:** W.Va. Code §11-21-12(c)(12)

**EXCLUSION:** Railroad Retirement benefits paid by the United States Railroad Retirement Board.

**VALUE:** **$3.8 million per year**

### Rationale

Tier I and Tier II Railroad Retirement benefits included in federal adjusted gross income are excluded from State Personal Income Tax.[4] Taxation of Tier I benefits by states is prohibited under federal law. All or part of Tier I Railroad Retirement benefits may be excluded in computing federally adjusted gross income, the starting point for West Virginia Personal Income Tax computation. The exclusion on the federal income tax return is based on the Taxpayer's combined income over a specified base amount. The value of the State exclusion includes only those benefits that are taxed under federal income tax statutes.

### Revenue Analysis

The full exclusion for Railroad Retirement benefits is not subject to the same restrictions as benefits from federal, State, and local government retirement systems. Benefits claimed for government retirement systems (e.g., $2,000 exclusion for federal retirement) reduce the maximum amount allowed for the senior citizens exclusion. For example, if a Taxpayer claims a $2,000 exclusion for federal retirement benefits, the maximum amount of other income which can be excluded is $6,000. The same is not true for Railroad Retirement benefits. These retirees may take a full exclusion for earned Railroad Retirement benefits and then take an exclusion of up to $8,000 of other income, if the Taxpayer is at least 65 years old or is totally and permanently disabled.

[4] A portion of a Taxpayer's Tier I Railroad Retirement benefits may be taxable for federal income tax purposes and therefore included in federal adjusted gross income. The amount of benefits that are taxable is based on the Taxpayer's combined income over a specified base amount. The base amount is one of the following:

1. $32,000 for married Taxpayers filing jointly;
2. $0 for married Taxpayers filing separately; or
3. $25,000 for all other Taxpayers.

# FEDERALLY MANDATED EXCLUSION

The federal exclusion for interest income from United States obligations for Personal Income Tax purposes is **not** a tax expenditure because it is excluded from State taxation by federal law.

For this report, this exclusion is considered a basic part of the Personal Income Tax structure because State lawmakers have no authority to tax such income. Values for this exclusion are given although additional revenue would not be realized through Legislative action due to federal prohibitions for taxing these obligations.

## INTEREST INCOME FROM UNITED STATES OBLIGATIONS FOR PERSONAL INCOME TAX PURPOSES

**STATUTE:** W.Va. Code §11-21-12(c)(1)

**EXCLUSION:** Interest Income on obligations of the United States.

**VALUE:** **$3.1 million per year**

# CREDITS

The West Virginia Code provides for the application of various tax credits against the Personal Income Tax. Some credits provide qualifying businesses or business shareholders with an investment incentive while others provide relief from double taxation. These tax credits are listed below.

## ECONOMIC DEVELOPMENT TAX CREDITS

- Economic Opportunity Tax Credits
- Downstream Natural Gas Manufacturing Investment Tax Credit
- High-Wage Growth Business Tax Credit
- Small Arms and Ammunition Investment Tax Credit
- Industrial Advancement Act Tax Credit
- Post-Coal Mine Site Business Credit
- BUILD WV Property Value Adjustment Tax Credit

## CREDIT TO PREVENT DOUBLE TAXATION

- Credit for Personal Income Taxes Paid to Other States

### EMPLOYMENT TAX CREDITS

- Apprenticeship Training Tax Credit
- West Virginia Jumpstart Savings Program Credit for Employers
- Military Incentive Tax Credit

### CREDITS THAT AID LOW-INCOME FAMILIES

- Senior Citizens Credit for Property Taxes Paid
- Family Tax Credit
- Excess Property Tax Credit
- Child and Dependent Care Credit

### MISCELLANEOUS TAX CREDITS

- Neighborhood Investment Program Credit
- Environmental Agricultural Equipment Tax Credit
- Film Industry Investment Tax Credit
- Farm to Food Bank Tax Credit
- Tax Credit for Donation or Sale of Vehicle
- Natural Gas Liquids Property Tax Adjustment Credit
- Volunteer Firefighter Tax Credit
- Motor Vehicle Property Tax Adjustment Credit
- Disabled Veteran Real Property Tax Credit
- Small Business Property Tax Adjustment Credit
- Historic Rehabilitated Buildings Investment Credit
- Qualified Rehabilitated Residential Building Investment Credit
- Nonfamily Adoption Credit
- Elective Income Credit for Tax Paid by Pass-Through Entity
- Capital Investment in Child-Care Property Tax Credit

- Operating Costs of Child-Care Tax Credit
- Conceal Carry Gun Permit Credit

Many of the credits listed above may also be applied against business taxes. Expenditure values presented in this section represent the amounts applied only against Personal Income Tax. Often, the credit claimed against the Personal Income Tax has been reduced by the application of the credit against other taxes according to the priority order specified by statute or regulations. Thus, the credit amounts claimed against Personal Income Tax may be negligible compared to the total cost of the credit taken against all taxes. An analysis of these expenditures follows.

# ECONOMIC DEVELOPMENT TAX CREDITS

Economic Development Tax Credits exist to promote business expansion in the State. Such credits require either the creation of employment or capital outlays for certain qualified investments to qualify.

## ECONOMIC OPPORTUNITY TAX CREDITS

**STATUTE:** W.Va. Code §11-13Q

**CREDIT:** Credits for qualified businesses that make a qualified investment in a new or expanded business facility in West Virginia and, as a result of this investment, create at least 10 new jobs.

**VALUE:** **Cannot be disclosed due to Taxpayer confidentiality**

### Rationale

Economic Opportunity Tax Credits are incentives designed to promote job creation through capital investment. These credits generally represent a capital investment tax credit pro-rated over a 10-year period for businesses engaged in the activities of manufacturing, information processing, warehousing, goods distribution, exclusive of retail, destination-oriented recreation and tourism, research and development, and the relocation of a corporate headquarters. The share of qualified capital investment subject to tax credit is based on the number of new jobs created as the result of the additional capital investment. The share of total payroll represented by the new employees determines the share of total tax liability offset by tax credit. A minimum number of new jobs must be created and maintained to gain entitlement to tax credit benefits.

## DOWNSTREAM NATURAL GAS MANUFACTURING INVESTMENT TAX CREDIT

**STATUTE:** W.Va. Code §11-13GG

**CREDIT:** Credit for eligible taxpayers to make a qualified investment in a new or expanded downstream natural gas manufacturing facility in West Virginia that results in the creation of at least five new jobs.

**VALUE:** **$0 per year**

### Rationale

The Downstream Natural Gas Manufacturing Investment Tax Credit is available to eligible Taxpayers that make a qualified investment in a new or expanded downstream natural gas manufacturing facility in West Virginia that results in the creation of at least 5 new jobs. To qualify for the tax credit, the qualified investment must have been made on or after July 1, 2020.

### Revenue Analysis

The Downstream Natural Gas Manufacturing Investment Tax Credit is a relatively new credit that was passed during the 2020 Legislative Session. As of November 2025, there are no known applicants for this credit.

## HIGH-WAGE GROWTH BUSINESS TAX CREDIT

**STATUTE:** W.Va. Code §11-13II

**CREDIT:** Credit for eligible employers creating high-wage jobs in West Virginia on or after July 1, 2020.

**VALUE:** **$0 per year**

### Rationale

The High-Wage Growth Business Tax Credit is for high-wage jobs created in West Virginia by an eligible employer on or after July 1, 2020. To be an eligible employer, the employer must be registered to do business in West Virginia and offer health benefits to all full-time eligible employees. The employer must certify that it pays at least 50 percent of the health care premiums.

### Revenue Analysis

The High-Wage Growth Tax Credit is a relatively new credit that was passed during the 2020 Legislative Session. As of November 2025, there are no known applicants for this credit**.**

## SMALL ARMS AND AMMUNITION MANUFACTURERS CREDIT

**STATUTE:** W.Va. Code §11-13KK

**CREDIT:** Credit for 100 percent of federal excise tax paid in a tax year under section 4181, Title 26 of the Internal Revenue Code, which are attributable to taxpayer's qualified investment.

**VALUE:** **$0 per year**

### Rationale

The Small Arms and Ammunition Manufacturers Credit encourages investment in the manufacturing of small arms and ammunition in West Virginia.

### Revenue Analysis

The Small Arms and Ammunition Manufacturers Credit is a relatively new credit that was passed during the 2021 Legislative Session. As of November 2025, there are no known applicants for this credit.

## INDUSTRIAL ADVANCEMENT ACT TAX CREDIT

**STATUTE:** W.Va. Code §11-13LL

**CREDIT:** A credit equal to 50 percent of the qualified manufacturing investment.

**VALUE:** **$0 in Tax Year 2023**

### Rationale

The Industrial Advancement Tax Credit provides a tax credit of 50 percent of qualified manufacturing investment in a "qualified labor intensive heavy industrial manufacturing project." Qualified projects must entail at least $2 billion in investment in property purchased for manufacturing investment and placed in service at an industrial facility in West Virginia, with at least 500 full-time West Virginia employees.

### Revenue Analysis

The Industrial Advancement Act Tax Credit is a relatively new credit that was passed during the 2022 Legislative Session. As of November 2025, there has been one application received and approved for this credit, but there have been no claims against Personal Income Tax.

## POST-COAL MINE SITE BUSINESS CREDIT

**STATUTE:** W.Va. Code §11-28

**CREDIT:** A credit is allowed for 50 percent of a taxpayer's capital expenditures at post-coal mine sites for the first five taxable years during which the taxpayer's principal place of business is located on the post-coal mine site.

**VALUE:** **$0 per year**

### Rationale

An eligible business will be allowed a tax credit in the amount of 50 percent of its capital expenditures at the post-coal mine site for the first five taxable years its principal place of business is located on the post-coal mine site.

## BUILD WV PROPERTY VALUE ADJUSTMENT TAX CREDIT

**STATUTE:** W.Va. Code §5B-2L

**CREDIT:** The BUILD WV Property Value Adjustment Tax Credit provides a ten-year, refundable property value adjustment tax credit to offset construction costs for eligible projects in designated areas.

**VALUE:** **$0 in Tax Year 2023**

### Rationale

The BUILD WV Property Value Adjustment Credit is intended to provide an incentive for property developers to build residential housing in areas of West Virginia with deficiencies, or projected deficiencies, in middle market housing.

### Revenue Analysis

The BUILD WV Property Value Adjustment Tax Credit is a relatively new credit that was passed during the 2022 Legislative Session. As of November 2025, two claims for credit have been received, but no claim has been fully processed. It is anticipated that utilization in this credit will grow in future years.

# CREDIT TO PREVENT DOUBLE TAXATION

The following credit exists to eliminate the possibility of double taxation for income taxes paid to other states.

## CREDIT FOR PERSONAL INCOME TAXES PAID TO OTHER STATES

**STATUTES:** W.Va. Code §11-21-20

**CREDIT:** A credit for any income tax paid to another state of the United States or by the District of Columbia.

**VALUE:** **$32.0 million per year**

### Rationale

The intent of this credit is simply to provide a mechanism for the return of funds never due to the State. Therefore, these credits are **not** tax expenditures. These credits generally exist to eliminate the possibility of double taxation of same income by two or more states.

# EMPLOYMENT TAX CREDITS

Employment Tax Credits generally exist to encourage employee training and the hiring of certain individuals, such as qualified unemployed veterans or other military personnel.

## APPRENTICESHIP TRAINING TAX CREDIT

**STATUTE:** W.Va. Code §11-13W

**CREDIT:** A credit of $2 per hour for the training of apprentices for qualified construction trade employers.

**VALUE:** **$260,000 per year**

### Rationale

The Apprenticeship Training Tax Credit provides qualified construction trade employers with a $2 per hour tax credit for the training of an apprentice up to a maximum of $2,000 per year or 50 percent of wages paid to such person, whichever is less. The tax credit may provide some incentive for additional training of apprentices.

## WEST VIRGINIA JUMPSTART SAVINGS PROGRAM CREDIT FOR EMPLOYERS

**STATUTE:** W.Va. Code §11-21-25

**CREDIT:** A nonrefundable credit against the tax imposed by the provisions of this article is allowed against the tax liability imposed under this article of a qualified employer, for a matching contribution made to a Jumpstart Savings Account in the taxable year, if the account owner is an employee of the taxpayer and a West Virginia resident.

**VALUE:** **$0 per year**

### Rationale

The West Virginia Jumpstart Savings Program Credit for Employers provides employers with a non-refundable tax credit of up to $5,000 per taxable year for direct contributions into their employee's Jumpstart Savings Account.

### Revenue Analysis

The West Virginia Jumpstart Savings Program Credit for Employers is a relatively new credit that was passed during the 2021 Legislative Session. As of November 2025, there have been no claims against Personal Income Tax.

## MILITARY INCENTIVE TAX CREDIT

**STATUTE:** W.Va. Code §11-21-42

**CREDIT:** Military Incentive Tax Credit promotes the hiring of veterans and National Guard members.

**VALUE:** **$0 per year**

### Rationale

The Military Incentive Tax Credit provides employers who hire a qualified unemployed member of the West Virginia National Guard and reserve forces or unemployed disabled veteran with a one-time employment tax credit generally equal to either 25 percent of up to the first $5,000 in wages paid during the year or the disability percentage multiplied by the first $5,000 of wages paid a qualified disabled veteran. The program is administered by Work Force West Virginia.

# CREDITS THAT AID LOW-INCOME FAMILIES

Three tax credits exist to aid low-income families, senior citizens, and those who are permanently and totally disabled.

## SENIOR CITIZENS CREDIT FOR PROPERTY TAX PAID

**STATUTE:** W.Va. Code §11-21-21

**CREDIT:** A refundable State tax credit related to local property tax paid for eligible lower income recipients of Homestead Property Tax Exemption.

**VALUE:** **$10.0 million per year**

### Rationale

The refundable Personal Income Tax credit for residential real estate property taxes paid on the first $20,000 of taxable valuation exists to provide moderate to lower income homestead exemption beneficiaries with additional relief from local real property taxes paid on their owner-occupied homes. This provision benefits qualified senior citizens and qualified permanently and totally disabled residents with an average net property tax savings of an additional $200 above local tax savings associated with both the $20,000 homestead tax exemption and Class II property tax rate preference.

## FAMILY TAX CREDIT

**STATUTE:** W.Va. Code §11-21-22

**CREDIT:** A credit for taxpayers who meet certain income limitations and family size requirements.

. **VALUE:** **$19.6 million per year**

### Rationale

The Family Tax Credit exists to provide total state income tax relief to families with income at or below the federal poverty guideline based on family size. Program cost is minimized via a tax credit phase-out mechanism for those with incomes slightly above the federal poverty guideline.

### Revenue Analysis

The value of the Family Tax Credit may be falling as the Personal Income Tax rate decreases over time.

## EXCESS PROPERTY TAX CREDIT

**STATUTE:** W.Va. Code §11-21-23

**CREDIT:** Refundable credit for real property taxes paid in excess of 4 percent of gross household income.

**VALUE:** **$2.2 million per year**

### Rationale

The refundable Personal Income Tax credit for residential real estate property taxes paid in excess of an amount equal to 4 percent of federal adjusted gross income exists to provide qualified moderate to lower income homeowners with additional property tax relief in cases where annual taxes paid on the owner-occupied residence exceeds an amount equal to 4 percent of the homeowner's annual federal adjusted gross income as reported on the State Personal Income Tax return.

## CHILD AND DEPENDENT CARE CREDIT

**STATUTE:** W.Va. Code §11-21-26

**CREDIT:** A non-refundable credit equal to 50 percent of the federal child and dependent care tax credit.

**VALUE:** **$0 million in Tax Year 2023**

### Rationale

The child and dependent care credit to help working families offset the costs of childcare and other dependent care expenses, allowing the taxpayers to work or look for work.

### Revenue Analysis

The Child and Dependent Care Credit is effective for Tax years beginning on or after January 1, 2024. Therefore, there were no claims during the review period of this report. The impact of the credit to General Revenue Fund collections was estimated to be $4.2 million per year.

# MISCELLANEOUS TAX CREDITS

Miscellaneous Tax Credits exist to incentivize investments in a variety of activities, such as increasing charitable contributions, promoting purchases of environmentally friendly agricultural equipment, and encouraging rehabilitation of certain properties.

## NEIGHBORHOOD INVESTMENT PROGRAM CREDIT

**STATUTE:** W.Va. Code §11-13J

**CREDIT:** A credit for 50 percent of charitable contributions to community-based nonprofit organizations that establish projects to assist neighborhoods and local communities.

**VALUE:** **$2.3 million per year**

### Rationale

The Neighborhood Investment Program Credit provides qualified contributing Taxpayers with a tax credit of up to 50 percent of charitable contributions made to an approved organization that received project approval along with an allotment of tax credits from the West Virginia Development Office based on recommendations from a neighborhood investment advisory board. The Taxpayer may use credits received from a qualifying organization to offset up to 50 percent of Personal Income Tax liability. The minimum contribution for the purposes of the tax credit is $500 per year, and the maximum contribution is $200,000 per year. Excess tax credits may be carried forward for a period of up to four additional years. The total maximum amount of tax credit allocated by the State in any given year is limited to $3 million. The Program may stimulate additional giving for tax credit eligible charitable projects.

## ENVIRONMENTAL AGRICULTURAL EQUIPMENT TAX CREDIT

**STATUTE:** W.Va. Code §11-13K

**CREDIT:** A credit for 25 percent of certified expenditures for purchasing and installing qualified agricultural equipment for use in agricultural operations, not to exceed $2,500.

**VALUE:** **Minimal**

### Rationale

The Environmental Agricultural Equipment Tax Credit provides eligible Taxpayers with an incentive to purchase certain types of “environmentally friendly” agricultural equipment. The tax credit equals 25 percent of the purchase price of the qualified machinery. Taxpayers may claim up to $2,500 of credit per Tax Year and the credit may be carried forward for up to five additional Tax Years.

## FILM INDUSTRY INVESTMENT TAX CREDIT

**STATUTE:** W.Va. Code §11-13X

**CREDIT:** A nonrefundable tax credit for direct production and postproduction expenditures made in West Virginia on a qualified film project.

**VALUE:** **Cannot be disclosed due to Taxpayer confidentiality**

### Rationale

The Film Industry Investment Tax Credit is an incentive designed to promote the film industry in West Virginia through partial reimbursement of qualified film expenditures through marketable tax credits.

### Revenue Analysis

The Film Industry Investment Tax Credit was reinstated for taxable years beginning on and after July 1, 2022 with a sunset date of December 31, 2027. The reinstated credit has no statutory cap, and the credit can be sold or transferred. Therefore, the impact of the credit could become significant in future years. Film credits are valid for two taxable years after the taxable year in which the expenditure was made.

## FARM TO FOOD BANK TAX CREDIT

**STATUTE:** W.Va. Code §11-13DD

**CREDIT:** A credit equal to 30 percent of the value of donated edible agricultural products.

**VALUE:** **Minimal**

### Rationale

A tax credit is available to farmers who make donations of edible agricultural products to one or more nonprofit food programs in West Virginia. The credit is equal to 30 percent of the value of the donated edible agricultural products, not to exceed $5,000 during a taxable year. Any credit remaining after application against the taxpayer's tax liabilities for the current year may be carried forward to the next four taxable years. No more than $200,000 tax credits may be allocated in any fiscal year. Tax credits are allocated in the order in which the donation forms are received.

The purpose of the credit is to promote fresh, healthy and local agricultural products for food banks and to provide an incentive for farmers to donate to food banks in the State.

## TAX CREDIT FOR DONATION OR SALE OF VEHICLE

**STATUTE:** W.Va. Code §11-13FF

**CREDIT:** A credit equal to either 50 percent of the program value of a vehicle donated to a qualified charitable organization or, for vehicles sold by dealers, 50 percent of the difference between the program value of the vehicle and the reduced sales price.

**VALUE:** **$30,000 per year**

### Rationale

A tax credit is available to taxpayers who donate a vehicle to a qualified charitable organization in this state of 50 percent of the determined program value up to $2,000. The credit is also available to licensed motor vehicle dealers that sell a vehicle at a reduced sales price to low-income workers through a program administered by a qualified charitable organization. The credit for licensed motor vehicle dealers is 50 percent of the difference between the program value of the vehicle and the reduced sales price up to $2,000. The purpose of the credit is to assist low-income workers in obtaining reliable transportation.

### Revenue Analysis

The Donation or Sale of Vehicle Tax Credit was effective for donations occurring after December 31, 2020. The impact of the credit to General Revenue Fund collections was originally estimated to be up to $1.0 million per year for both Corporation Net Income Tax and Personal Income Tax combined.

## NATURAL GAS LIQUIDS PROPERTY TAX ADJUSTMENT CREDIT

**STATUTE:** W.Va. Code §11-13HH

**CREDIT:** A credit for natural gas liquid storers or transporters equal to the amount of the West Virginia ad valorem property tax paid on the value of natural gas liquids inventory and equipment.

**VALUE:** **$0 in Tax Year 2023**

### Rationale

The Natural Gas Liquids Property Tax Adjustment Credit was created as part of the Natural Gas Liquids Economic Development Act to encourage the development of these businesses in West Virginia. The credit provides eligible West Virginia natural gas liquid storers and transporters with a State tax credit equal to the amount of local West Virginia property taxes paid on the value of natural gas liquids inventory and equipment.

### Revenue Analysis

The Natural Gas Liquids Property Tax Adjustment Credit was effective for tax years beginning on or after July 1, 2020. However, no claims were made against the Personal Income Tax in Tax Year 2023. The impact of the credit to General Revenue Fund collections was estimated to be $500,000 per year for both Corporation Net Income Tax and Personal Income Tax combined.

## VOLUNTEER FIREFIGHTER TAX CREDIT

**STATUTE:** W.Va. Code §11-13JJ

**CREDIT:** A nonrefundable credit of $1,000 for volunteer firefighters who meet certain criteria.

**VALUE:** **$1.4 million per year**

### Rationale

The purpose of the credit is to encourage participation in volunteer fire departments in West Virginia. The credit is allowed for volunteer firefighters in West Virginia who meet certain criteria, including being an active member in good standing of a certified volunteer fire department for the entire year and participating in at least 30 percent of the department's activities. This credit is nonrefundable.

## MOTOR VEHICLE PROPERTY TAX ADJUSTMENT TAX CREDIT

**STATUTE:** W.Va. Code §11-13MM-3

**CREDIT:** A credit in the amount of property tax timely paid on owned or leased motor vehicles subject to West Virginia ad valorem property taxation during the corporation net income tax or personal income tax taxable year.

**VALUE:** **$0 in Tax Year 2023**

### Rationale

The credit was designed to give West Virginia taxpayers who own qualified vehicles and pay their personal property taxes on time a break. This is achieved by offering the amount of property tax paid on eligible vehicles as a credit against the taxpayer's state income tax liability or as a rebate.

### Revenue Analysis

The Motor Vehicle Property Tax Adjustment Credit is effective for tax years beginning on or after January 1, 2024. Therefore, there were no claims during the review period of this report, Tax Year 2023. The impact of the credit to General Revenue Fund collections was estimated to be $157.9 million for both Corporation Net Income Tax and Personal Income Tax combined.

## DISABLED VETERAN REAL PROPERTY TAX CREDIT

**STATUTE:** W.Va. Code §11-13MM-4

**CREDIT:** A refundable credit for disabled veterans in the amount of West Virginia ad valorem real property taxes timely paid on a homestead which is used or occupied exclusively for residential purposes and for surviving spouses of veterans who had received the credit in 2024 or later.

**VALUE:** **$0 in Tax Year 2023**

### Rationale

The rationale for the West Virginia Disabled Veteran Real Property Tax Credit is to provide financial relief and recognize the sacrifices of veterans who have been severely disabled due to their service. This tax credit, specifically for those with a 90 percent or greater service-connected disability rating, aims to offset the burden of property taxes on their homestead. It acknowledges their contributions and aims to make homeownership more affordable for disabled veterans.

### Revenue Analysis

The Disabled Veteran Real Property Tax Credit is effective for tax years beginning on or after January 1, 2024. Therefore, there were no claims during the review period of this report, Tax Year 2023. The impact of the credit to General Revenue Fund collections was estimated to be up to $8.4 million per year.

## SMALL BUSINESS PROPERTY TAX ADJUSTMENT TAX CREDIT

**STATUTE:** W.Va. Code §11-13MM-5

**CREDIT:** A credit of 50 percent of the amount of property tax timely paid by eligible small business taxpayers on personal property subject to West Virginia ad valorem property taxation during the corporation net income tax or personal income taxable year.

**VALUE:** **$0 in Tax Year 2023**

### Rationale

The credit was designed to provide tax relief for eligible West Virginia small business taxpayers who own personal property and pay their personal property taxes on time. This is achieved by offering the amount of 50 percent property tax paid on eligible personal property as a credit against the taxpayer's state income tax liability or as a rebate.

### Revenue Analysis

The Small Business Property Tax Adjustment Credit is effective for tax years beginning on or after January 1, 2024. Therefore, there were no claims during the review period of this report, Tax Year 2023. The impact of the credit to General Revenue Fund collections was estimated to be less than $35.0 million for both Corporation Net Income Tax and Personal Income Tax combined.

## HISTORIC REHABILITATED BUILDINGS INVESTMENT CREDIT

**STATUTE:** W.Va. Code §11-21-8a

**CREDIT:** The Historic Rehabilitated Buildings Investment Credit is available to qualified rehabilitated building projects located in West Virginia that also qualify for the 20 percent federal historic rehabilitation tax credit.

**VALUE:** **$700,000 per year**[5]

### Rationale

The Historic Rehabilitated Buildings Investment Credit is available to qualified rehabilitated building projects located in West Virginia that also qualify for the 20 percent federal historic rehabilitation tax credit. Prior to January 1, 2018, the State tax credit equaled 10 percent of qualified expenditures for historic rehabilitation as approved by the West Virginia Division of Culture and History and designated by the National Park Service as a "certified historic structure." Effective January 1, 2018, the State tax credit is equal to 25 percent of the qualified expenditures. The West Virginia tax credit is transferable to other Taxpayers. The tax credit was intended to promote historic building rehabilitation of qualified owner-occupied buildings.

### Revenue Analysis

The value of the credit to Taxpayers was significantly enhanced through the increase of the credit percentage from 10 percent to 25 percent and the allowance of multi-phase projects. This change has encouraged larger multi-phase projects which will likely expand the use and resulting cost of the tax credit in future years.

## QUALIFIED REHABILITATED RESIDENTIAL BUILDING INVESTMENT CREDIT

**STATUTE:** W.Va. Code §11-21-8g

**CREDIT:** The Qualified Rehabilitated Residential Building Investment Credit is available to qualified owner-occupied rehabilitated residential building projects located in West Virginia.

**VALUE:** **$130,000 per year**[6]

### Rationale

The Qualified Rehabilitated Residential Building Investment Credit is available to owner-occupied qualified rehabilitated building projects located in West Virginia. The State tax credit equals 20 percent of qualified expenditures for historic rehabilitation as approved by the West Virginia Division of Culture and History and designated by the National Park Service as a "certified historic structure." The West Virginia tax credit is transferable to other Taxpayers. The tax credit was intended to promote the rehabilitation of owner-occupied historic residential housing.

[5] This is an average value due to variation in claims year-to-year.
[6] *Ibid*

## NONFAMILY ADOPTION CREDIT

**STATUTE:** W.Va. Code §11-21-10a

**CREDIT:** A one-time credit against the tax imposed by the provisions of this article for adoption of a child.

**VALUE:** **$3.1 million per year**

### Rationale

The credit is equal to $5,000 for each nonfamily child who is under the age of 18 years at the time of adoption. For this credit, nonfamily adoption means adoption of a child or children by a taxpayer or taxpayers who are not the father, mother, or stepparent of the child. The credit is refundable; however, the Taxpayer may elect to claim the credit in the year of adoption or over a period of up to three years. It is designed to encourage the adoption of children.

## ELECTIVE INCOME CREDIT FOR TAX PAID BY A PASS-THROUGH ENTITY

**STATUTE:** W.Va. Code §11-21-20

**CREDIT:** A credit against the tax otherwise due under this article for any income tax paid to another state of the United States or by the District of Columbia for the taxable year, either directly paid by the individual or paid by a pass-through entity in accordance with §11-21-3a of this code and passed through by the entity to the individual taxpayer, upon income both derived therefrom and subject to tax under this article.

**VALUE:** **$100.0 million for Tax Year 2023**

### Rationale

Partners, members or shareholders of a pass-through entity which has elected to pay tax at the entity level may receive a Personal Income Tax credit for tax paid. This credit avoids double taxation.

### Revenue Analysis

This credit allows Personal Income Taxpayers the ability to reduce their tax liability by the amount of tax paid on their behalf by pass-through entities which have elected to pay tax at the entity level. These credits are not true tax expenditures. Participation in this elective program fluctuates from year to year.

## CAPITAL INVESTMENT IN CHILD-CARE PROPERTY TAX CREDIT

**STATUTE:** W.Va. Code §11-21-97

**CREDIT:** A credit is allowed for 50 percent of the cost of all qualified child-care property purchased or acquired by the taxpayer and first placed in service during a taxable year, and such credit may be claimed at a rate of 20 percent per year over a period of five taxable years.

**VALUE:** **$0 in Tax Year 2023**

### Rationale

The West Virginia Capital Investment in Child-Care Property Tax Credit provides credit for employers who provide child-care facilities to their employees. Providing childcare is a benefit to both the employer and the employees.

### Revenue Analysis

The Capital Investment in Child-Care Property Tax Credit is a relatively new credit that was passed during the 2022 Legislative Session. As of November 2025, there have been two applications received for this credit, and one has been approved. However, no claims against the Personal Income Tax were made during the review period of this report. We anticipate utilization of this credit program will grow significantly in future years.

## OPERATING COSTS OF CHILD-CARE TAX CREDIT

**STATUTE:** W.Va. Code §11-21-97

**CREDIT:** A credit of up to 50 percent of costs is allowed for employers who provide or sponsor childcare for employees.

**VALUE:** **$0 in Tax Year 2023**

### Rationale

The Operating Costs for Child-Care Tax Credit provides credit for employers who provide child-care facilities for their employees, covering up to 50 percent of the costs. Providing childcare is a benefit to both the employer and the employees.

### Revenue Analysis

The Operating Costs for Child-Care Tax Credit is a relatively new credit that was passed during the 2022 Legislative Session. As of November 2025, there have been two applications received for this credit, and one has been approved. However, no claims against the Personal Income Tax were made during the review period of this report. We anticipate utilization of this credit program will grow significantly in future years.

## CONCEAL CARRY GUN PERMIT CREDIT

**STATUTE:** W.Va. Code §61-7-4(r)

**CREDIT:** A one-time credit of up to $50 for the successful completion of a safety course or the fees associated with the initial application of a license to carry a concealed weapon.

**VALUE:** **Minimal**

### Rationale

A credit is allowed against West Virginia Personal Income Tax for the costs incurred during the taxable year for training courses or classes taken by the primary taxpayer and/or spouse for the purposes of applying for and qualifying for a permit to carry a concealed weapon in this state. This is a one-time credit limit to the lesser of actual costs or the maximum amount of credit allowable with respect to any taxpayer and/or spouse, not to exceed $50 per taxpayer. The credits are not allowed with respect to any person who fails to qualify or is denied a permit after applying for the permit.

# FIDUCIARY INCOME TAX

## OVERVIEW

Estates and trusts are taxed under the Personal Income Tax statute, but the related tax liability is calculated on the Fiduciary Income Tax return. Federal taxable income is the starting point for the calculation of the West Virginia Fiduciary Income Tax for estates and trusts. West Virginia taxable income is derived after specific increasing or decreasing modifications are made to federal taxable income. The rate schedule for both resident and nonresident estates and trusts is the same as Personal Income Tax rates for all Taxpayers, except for married Taxpayers filing separate returns.

### ORGANIZATION AND ANALYSIS

The Fiduciary Income Tax expenditures discussed in this report are divided into three groups:

- Exemption;
- Decreasing Modifications, and
- Credits.

### ESTIMATING COSTS OF TAX EXPENDITURES

The costs for the Fiduciary Income Tax expenditures are derived from information on Tax Year 2023 returns. It should be noted that tax rates have decreased since Tax Year 2023. As a result, the expenditure values could be lower in future years.

# EXEMPTION

Estates and trusts are allowed only one $600 exemption. An analysis of this exemption follows.

## FIDUCIARY INCOME TAX EXEMPTION

**STATUTE:** W.Va. Code §11-21-18(1)

**EXEMPTION:** Exemption of $600 for estates and trusts.

**VALUE:** **$60,000 per year**

### Rationale

For simplicity, estates have the same exemption allowance as on the federal return. Since West Virginia's treatment of estates and trusts is similar, the same $600 exemption is allowed for trusts. The exemption is in lieu of the federal deduction for estates and trusts.

# DECREASING MODIFICATIONS

In determining West Virginia taxable income, specific decreases are made to federal taxable income. Decreasing modifications discussed in this section include:

- Itemized Deductions for Fiduciaries, and
- Interest Income from United States Obligations for Fiduciary Income Tax.

## ITEMIZED DEDUCTIONS FOR FIDUCIARIES

**STATUTE:** W.Va. Code §11-21-18

**DEDUCTION:** Itemized deductions claimed prior to attainment of taxable income for the fiduciary.

**VALUE:** **$140,000 per year**

### Rationale

West Virginia allows the federal itemized deductions for the Fiduciary Income Tax. Current calculations of State tax liability for fiduciaries begin with federal taxable income, not federal adjusted gross income. Therefore, fiduciaries are essentially allowed to claim itemized deductions. This simplifies the filing requirements for these Taxpayers.

## INTEREST INCOME FROM UNITED STATES OBLIGATIONS FOR FIDUCIARY INCOME TAX PURPOSES

**STATUTE:** W.Va. Code §11-21-19

**EXCLUSION**: Interest Income on obligations of the United States.

**VALUE:** **$260,000 per year**

### Rationale

The federal exclusion for interest income from United States obligations for Fiduciary Income Tax purposes is **not** a tax expenditure because it is excluded from State taxation by federal law. For this report, this exclusion is considered a basic part of the Fiduciary Income Tax structure because State lawmakers have no authority to tax such income. Values for this exclusion are given although additional revenue would not be realized through Legislative action due to federal prohibitions for taxing these obligations.

# CREDITS

Estates and Trusts are allowed most of the credits available to Personal Income Taxpayers. However, generally they utilize only a few of the tax credit programs which are available to them. For purposes of this section, only credit programs with an impact will be addressed in this section. Those credits are: Income Taxes Paid to Other States, Historic Rehabilitated Buildings Investment Credit, and Elective income Credit for Tax Paid By a Pass-Through Entity.

## CREDIT TO PREVENT DOUBLE TAXATION

The following credit exists to eliminate the possibility of double taxation for income taxes paid to other states.

### CREDIT FOR FIDUCIARY INCOME TAXES PAID TO OTHER STATES

**STATUTES:** W.Va. Code §§11-21-20 and 11-21-40

**CREDIT:** A credit for any income tax paid to another state of the United States or by the District of Columbia.

**VALUE:** **$500,000 per year**

**Rationale**

The intent of this credit is simply to provide a mechanism for the return of funds never due to the State. Therefore, this credit is **not** a tax expenditure.

# MISCELLANEOUS TAX CREDITS

Miscellaneous Tax Credits exist to incentivize investments in a variety of activities, such as increasing charitable contributions, promoting purchases of environmentally friendly agricultural equipment, and encouraging rehabilitation of certain properties.

## HISTORIC REHABILITATED BUILDINGS INVESTMENT CREDIT

**STATUTE:** W.Va. Code §11-21-8a

**CREDIT:** The Historic Rehabilitated Buildings Investment Credit is available to qualified rehabilitated building projects located in West Virginia that also qualify for the 20 percent federal historic rehabilitation tax credit.

**VALUE:** **$50,000 per year**[7]

### Rationale

The Historic Rehabilitated Buildings Investment Credit is available to qualified rehabilitated building projects located in West Virginia that also qualify for the 20 percent federal historic rehabilitation tax credit. Prior to January 1, 2018, the State tax credit equaled 10 percent of qualified expenditures for historic rehabilitation as approved by the West Virginia Division of Culture and History and designated by the National Park Service as a "certified historic structure." Effective January 1, 2018, the State tax credit is equal to 25 percent of the qualified expenditures. The West Virginia tax credit is transferable to other Taxpayers. The tax credit was intended to promote historic building rehabilitation of qualified owner-occupied buildings.

### Revenue Analysis

The value of the credit to Taxpayers was significantly enhanced through the increase of the credit percentage from 10 percent to 25 percent and the allowance of multi-phase projects. This change has encouraged larger multi-phase projects which will likely expand the use and resulting cost of the tax credit in future years.

## ELECTIVE INCOME CREDIT FOR TAX PAID BY A PASS-THROUGH ENTITY

**STATUTE:** W.Va. Code §11-21-20

**CREDIT:** A credit against the tax otherwise due under this article for any income tax paid to another state of the United States or by the District of Columbia for the taxable year, either directly paid by the individual or paid by a pass-through entity in accordance with §11-21-3a of this code and passed through by the entity to the individual taxpayer, upon income both derived therefrom and subject to tax under this article.

**VALUE:** **$5.7 million for Tax Year 2023**

[7] This is an average value due to variation in claims year-to-year.

## Rationale

Partners, members or shareholders of a pass-through entity which has elected to pay tax at the entity level may receive a Fiduciary Income Tax credit for tax paid. This credit avoids double taxation.

## Revenue Analysis

This credit allows Fiduciary Income Taxpayers the ability to reduce their tax liability by the amount of tax paid on their behalf by pass-through entities which have elected to pay tax at the entity level. These credits are not true tax expenditures. Participation in this elective program fluctuates from year to year.

# EXECUTIVE SUMMARY

This report covers the Business Registration Tax, business taxes imposed on certain West Virginia businesses, excise taxes, and property taxes and analyzes various expenditures for these taxes. Some of these provisions constitute government expenditure programs while others are an integral part of the basic tax structure. The following summaries provide information on the taxes covered in this study.

## BUSINESS TAXES

This section of the report analyzes expenditures for the Business and Occupation Tax, Severance Tax, Health Care Provider Taxes, Mining Reclamation Fees and Solid Waste Assessment Fees, which are levied on small groups of taxpayers, as well as expenditures for the Business Registration Tax.

Less than sixty businesses are subject to the State Business and Occupation Tax, a tax levied on public utilities, electric power companies, gas storage operators, and manufacturers that produce synthetic fuel from coal. Gas storage operators and synthetic fuel producers pay a per unit tax. Electric power producers pay a per unit tax on taxable capacity while electric utilities pay a per unit tax on kilowatt hours of electricity sold. Other public utilities pay a tax based on gross income. Through statute or regulation, expenditures for application against the Business and Occupation Tax encompass businesses excluded from the tax, tax base exemptions, reduced rates, alternate tax calculations, and credits against tax liability.

The Severance Tax is levied on the gross receipts of businesses that engage in the severance, extraction, or production of depletable natural resources. The tax base also includes the processing and treatment of certain natural resource products as part of the production process. A person who purchases raw coal and processes it into a commercially usable product only pays tax on the value added in the processing activity and not on the total value of the product. In that sense, the West Virginia Severance Tax differs from a usual severance tax, for which the tax base is determined at the point of extraction.

The Minimum Severance Tax on Coal, a tax of $0.75 per ton, is imposed on every business severing, extracting or producing coal in the State for sale, profit or commercial use. The Minimum Severance Tax on Coal applies to all coal production except thin seam coal production. A credit is allowed against Severance Tax imposed on coal production for payment of the Minimum Severance Tax on Coal. However, no other credits can be used to offset the Minimum Severance Tax on Coal.

Health Care Provider Taxes include the Health Care Broad Base Tax, the Acute Care Hospital Tax, the Acute Care Hospital Tax to Enhance Practitioner Fee Schedules, and the Managed Care Organization Tax. The Health Care Broad Base tax consists of a variety of taxes imposed on the gross receipts of selected health care services. The Acute Care Hospital taxes represent additional taxes imposed on inpatient and outpatient hospital services at certain eligible acute care hospitals. The Managed Care Organization Tax is a tiered tax based on Medicaid and Non-Medicaid membership of managed care organizations. The proceeds from these taxes fund roughly 25 percent of the State's share of Medicaid program costs. The Medicaid program is a jointly funded cooperative venture between the federal government and state government to assist states in providing medical care to eligible low-income persons. In West Virginia, federal funds are matched with State funds at a ratio of roughly three to one.

Coal producers must pay reclamation fees related to their coal production at a rate of 27.9 cents per ton. Proceeds from Mining Reclamation Fees help fund coal mine reclamation projects around the State.

Disposal of solid waste at any solid waste disposal facility in West Virginia is subject to a number of statutory fees. The Solid Waste Assessment Fees are imposed in addition to any fee charged by the operator or owner of a solid waste disposal facility for receiving and disposing of solid waste. The combined base rate is $8.25 per ton of solid or sludge waste. However, a reduced rate of $2.00 per ton is applicable to the waste disposed of by commercial recyclers where at least 70 percent of the material entering the commercial recycling facility is separated for reselling or recycling.

The Business Registration Tax affects most businesses in West Virginia. By statute, each location of a business subject to the tax must obtain a business registration certificate from the State Tax Department before beginning business activities in the State. The tax is a set fee of $30.00 per business location. The business registration is permanent, but subject to revocation or suspension for cause. Business Registration Tax expenditures include activities excluded from the definition of business, activities exempt from registration, activities not required to obtain a registration certificate, and activities exempt from payment of the tax.

**EXCISE TAXES**

Excise taxes are generally levied on units of consumption of certain commodities in order to generate revenue for the taxing authority. In West Virginia, excise taxes are imposed on the privilege of manufacturing, producing, distributing or selling certain items within the State. These items include gasoline and special fuel, non-intoxicating beer, wine, tobacco products, and soft drinks. The Motor Fuel Excise Tax includes a fixed tax component on motor fuel for road use and a variable tax component based on the average wholesale price of gasoline. Also, the Excise Tax on gasoline and special fuel is levied on motor carriers operating within the State.

West Virginia is a member of the International Fuel Tax Agreement (IFTA). IFTA is a fuel tax reciprocity agreement among states of the United States and provinces of Canada. The agreement is intended to simplify the reporting and payment of all fuel use taxes by interstate motor carriers. All West Virginia-based motor carriers who travel in at least one other IFTA jurisdiction and operate one or more qualified vehicles must obtain an IFTA license. All West Virginia-based IFTA licensees must file a single tax return with the State Tax Department. West Virginia then distributes both the tax and the carrier information to the other IFTA jurisdictions on behalf of the carrier. West Virginia receives its portion of gasoline taxes due from motor carriers based in other IFTA jurisdictions from the carrier's home jurisdiction.

Revenue collected from the Motor Fuel Excise Tax is deposited into the State Road Fund. All amounts collected under IFTA are deposited into the International Fuel Tax Agreement Clearing Fund for distribution of funds owed to other member jurisdictions as provided in the agreement and for payment of any refunds owed to West Virginia-based taxpayers. After refund payments and distributions to other jurisdictions, all remaining IFTA funds are deposited into the State Road Fund. Revenue collected from the excise taxes on non-intoxicating beer, wine and tobacco products is deposited into the General Revenue Fund of the State. Beginning in fiscal year 2023, revenue collected from the Soft Drinks Tax is deposited into the General Revenue Fund of the State. Prior to that, it was deposited into a special medical school fund.

There are many possible exemptions and refunds available for the excise taxes. However, most of the expenditures pertain to the taxes on gasoline and special fuel for off-highway uses of such products. In addition to refunds and credits, discounts are available for the excise taxes on tobacco products and soft drinks.

**PROPERTY TAXES**

The Property Tax and the Property Transfer Tax are collected at the county level, but the revenue from these taxes benefits both State and local governments. While the Property Tax is an annual levy on property, the Property Transfer Tax is levied on property only when it is transferred.

The Property Tax is levied on all real and personal property in West Virginia, except property specifically exempted in the West Virginia Code. Revenues from the Property Tax benefit the State, counties, county boards of education, and municipalities. Each county and municipality can impose its own rates of property taxation. These rates can vary within counties depending upon the classification of the property. The West Virginia Legislature sets the regular rate of tax for county boards of education. This rate is used by all county boards of education Statewide. However, the total tax rate for county boards of education may differ from county to county due to excess levies and/or bond levies.

Property is assessed based on its use, location, and value as of July 1 of each year. The amount of tax paid on property depends upon the assessed valuation of the property and the rate of tax. Each county assessor is required to maintain current values on all real and personal property, except operating public utility property, in that county. The State Tax Commissioner is required to determine the market value of all industrial and natural resource properties in the State. The State Tax Commissioner also is responsible for the valuation of public utility property and all types of property that are to be included in the operating property of a public utility.

Although all property is presumed to be taxable until its owner proves otherwise, there are many possible exemptions from the Property Tax. Some of these exemptions are based on the ownership of the property while others are based on the use of the property.

The Property Transfer Tax consists of an excise tax on the privilege of transferring real estate to be paid to the State and an excise tax to be paid to the county where the transfer is recorded. Both the State and county excise tax are paid to the county clerk. There are many exemptions to the tax. Some are transfers to or from governmental bodies while others are transfers between related parties.

# INTRODUCTION

W. Va. Code §11-10-5s(c) requires a tax expenditure report to be submitted to the Legislature by January 15 of each year. In three-year cycles, these reports are intended to analyze tax expenditures for most major State taxes. The law defines the term "tax expenditure" as a provision in the tax laws designed to encourage certain kinds of activities or to aid taxpayers in special circumstances. Such provisions generally include exclusions, exemptions, deductions, adjustments, credits, and deferrals from tax.

The State Tax Commissioner has promulgated rules setting forth a timetable for such reports. This report covers business taxes, excise taxes, and property taxes. Business taxes include the Business and Occupation Tax, Severance Tax, Health Care Provider Taxes, Mining Reclamation Fees, Solid Waste Assessment Fees, and Business Registration Tax. Excise taxes include the Motor Fuel Excise Tax, Motor Carrier Road Tax, International Fuel Tax, Tobacco Products Excise Tax, Soft Drinks Tax, Beer Barrel Tax and Wine Liter Tax. Property taxes include both the Property Tax and the Property Transfer Tax. Other reports cover taxes administered by the State Tax Department that are not analyzed within this report.

## OVERVIEW

The business taxes included in this report, excise taxes and property taxes combined to account for roughly $4.1 billion in State and local revenue in Fiscal Year 2023. These revenues were distributed as follows:

| Fund | Revenue |
|---|---|
| State General Revenue Fund | $ 1,261.1 million |
| State Road Fund | $ 432.4 million |
| State Medicaid Fund | $ 345.8 million |
| State Infrastructure Fund | $ 21.9 million |
| Other Special Revenue Funds | $ 28.5 million |
| Local Government Funds | $ 2,048.4 million |

The local government funds included over $94.2 million in Severance Tax revenue and $1.9 billion in property and property transfer taxes for Fiscal Year 2023.

This study concentrates on the effect of tax expenditures upon tax yields. Most exclusions, exemptions, deductions, and credits associated with these taxes may be viewed as tax expenditures. Tax expenditures tend to escape the usual legislative scrutiny afforded other expenditures in the annual budget approval process because provisions in the tax law often remain intact indefinitely. Programs funded through tax expenditures, in effect, receive priority funding over all other programs. The goal of this report is to facilitate an examination of business tax, excise tax and property tax expenditures using available resources.

Tax expenditures are deviations from a model tax structure. A model tax structure typically contains a minimal allowance for exclusions, exemptions, deductions, and credits. A minimal allowance for tax expenditures is necessary to maximize tax equity and tax efficiency.

The distribution of tax burdens should be equitable. There are two types of equity: horizontal and vertical. Horizontal equity occurs when those with equal capacity (e.g., equal income) pay the same amount of tax. The achievement of vertical equity occurs whenever those with a greater income or tax base pay more than those with a lesser income or tax base. Tax expenditure

provisions often reduce the horizontal equity of a tax structure through an allowance of special benefits to some at the expense of others.

Economic efficiency, a requirement of a model tax structure, occurs whenever tax interference in the economy is kept to a minimum. Tax expenditures tend to reduce economic efficiency through the promotion of some economic activities over others. For example, federal depreciation and passive loss rules of the 1980s led to a significant increase in office building construction and eventually to a glut of office space.

A low-rate, broad-based tax structure often results in optimal tax competitiveness between states, another requirement of a model tax structure. However, many states tend to use tax expenditures, such as investment tax credits, to gain a competitive advantage over other states with respect to a particular taxpayer or industry. The value of these expenditures should be minimized because their cost is distributed among other taxpayers.

A model tax structure produces stable and sufficient revenue for basic public services. Tax expenditures decrease revenue, which may result in fiscal instability.

Understandability and simplicity are also important requirements for a model tax structure. Tax expenditures may complicate the tax structure, resulting in high administration and compliance costs for both the taxpayer and the taxing authority.

A model tax structure would tax nearly all expenditures in West Virginia to the extent within the Legislature's power. Deductions or exclusions required by federal law would **not** be tax expenditures because such modifications could not be effectively repealed by the Legislature.

## ESTIMATING COSTS OF TAX EXPENDITURES

This study provides estimates of the value of business tax, excise tax and property tax expenditures and certain provisions considered necessary to define a model tax structure. Except where otherwise noted, each expenditure within the study is examined independently from all other expenditures. Following the establishment of a value in isolation, the influence of outside factors (e.g., other expenditures and taxpayer behavior) is discussed, where applicable. Expenditure values less than $10,000 are reported as "minimal."

Several sources of information were used in the construction of expenditure valuations. These include, among others:

- The Department's tax return data;
- Surveys of various organizations;
- ProPublica;
- Publications from the U.S. Department of Energy;
- Publications from the U.S. Census Bureau, and
- Information from other West Virginia agencies.

In most cases, the revenue impact attributable to the repeal of a tax expenditure is less than the value of that expenditure. This occurs because tax expenditures tend to overlap with one another, and taxpayers tend to alter their behavior whenever items of income or consumption become taxed for the first time.

# BUSINESS TAXES

# BUSINESS AND OCCUPATION TAX

## OVERVIEW

The Business and Occupation Tax, known throughout most of its history as the "Gross Sales Tax," was originally enacted in 1921. As enacted, the Gross Sales Tax had as its intent to tax every individual, firm, partnership, association, and corporation conducting business for profit in West Virginia.

Enactment of the "Tax Reform Act of 1985" altered the scope of the Business and Occupation Tax to a tax on public utilities and electric power producers **only**, effective July 1, 1987. As of 1989, natural gas storage facility operators are subject to a per unit tax under the Business and Occupation Tax statutes. Additionally, legislation in 1989 provided that electric power producers and distributors would be subject to the greater of the gross sales tax or a per unit tax on kilowatt hours of electricity generated or distributed.

Beginning in June 1995, electric power producers whose tax liability for every month in 1994 was based on kilowatt-hours of electricity generated were to determine their tax liability based upon taxable generating capacity. The legislation enacted in 1995 defined "taxable generating capacity" as the capacity factor times the official capability of a generating unit. "Capacity factor" was defined as the fraction of the average four-year generation for the 1991 to 1994 period divided by the "maximum possible annual generation" of a unit. The official capability of a unit times 8,760 (the number of hours in a year) was defined as the "maximum possible annual generation." In 2001, the Business and Occupation Tax statute was revised to subject the manufacturing or production of synthetic fuel from coal to a tax at a rate of $0.50 per ton. Additional legislation enacted in 2020 allowed certain coal-fired generators to elect to use a taxable capacity factor of 45 percent when paying tax on or after July 1, 2021.

Applicable tax rates for the Business and Occupation Tax as of January 1, 2023, are shown in the following table.

## Business and Occupation Tax Rates

| Taxpayer Type | Activity and West Virginia Code Citation | Tax Base | Tax Rate |
|---|---|---|---|
| Electric power company | Generating or producing electricity for sale, profit or commercial use (§11-13-2o(b)(1) | Generating Capacity | $22.78 per KW |
| Electric power company | Generating or producing electricity for sale, profit or commercial use by a unit which has installed a flue gas desulfurization system (§11-13-2o(b)(1)) | Generating capacity | $20.70 per KW |
| Electric power company | Selling electricity that is not generated or produced in West Virginia by the taxpayer (§11-13-2o(b)(2)) | Electricity sold | $0.0019 per KWH |
| Electric power company | Selling electricity that is not generated or produced in West Virginia by the taxpayer and sale is to a plant location of a customer engaged in a manufacturing activity, if the contract demand at such plant location exceeds 200,000 kilowatts per hour per year (§11-13-2o(b)(2)) | Electricity sold | $0.0005 per KWH |
| Natural gas storage operator | Withdrawal and/or injection of natural gas from/into storage reservoirs (11-13-2e) | Net Dekatherms (maximum base = 1990-1994 average) | $0.05 per dekatherm |
| Natural gas utility | Natural gas companies (§11-13-2d(a)(4)) | Gross Income | 4.29 percent |
| Water utility | Public service or utility business (§11-13-2d(a)(2)) | Gross Income | 4.40 percent |
| Toll bridge companies | Public service or utility business (§11-13-2d(a)(5)) | Gross Income | 4.29 percent |
| All other public service or utility business | All other public service or utility business (§11-13-2d(a)(6)) | Gross Income | 2.86 percent |
| Manufacturer or Producer of synthetic fuel from coal | Producing synthetic fuel from coal (§11-13-2f) | Tons produced | $0.50 per ton |

Note: KW refers to kilowatt while KWH refers to kilowatt-hour.

## ESTIMATING COSTS OF TAX EXPENDITURES

The values of the expenditures contained within this report have been determined from several sources. Where available, information from 2022 Business and Occupation Tax returns was used. Return information was supplemented by other State Tax Department files, Public Service Commission reports, and U.S. Department of Energy publications.

## ORGANIZATION AND ANALYSIS

This study separates the Business and Occupation Tax expenditures into four groups. The groups are based on the type of expenditure or on the organization or activity involved. These groups are as follows:

- Income or Other Measurable Quantities Exempt from Tax
- Activities Subject to Reduced Rates
- Alternate Tax Calculation
- Credits

Each expenditure listed in this report contains a brief rationale for its existence. In many cases, legislative documentation on why a particular tax expenditure was enacted was not available, thus the rationales herein are based solely on the experience or inference of the State Tax Department.

## INCOME OR OTHER MEASURABLE QUANTITIES EXEMPT FROM TAX

The Business and Occupation Tax statutes provide several exemptions that exclude gross income or units of activity from the base of the tax. The following items are excluded from the appropriate tax base prior to the calculation of the tax due:

- Directly or Third Party Operated Publicly Owned Water, Sewer or Electric Plants
- Electric Power or Natural Gas Related to Selected Manufacturing Processes
- Gas Consumed and/or Recycled in a Gas Storage Operation
- Electric Generation by a Manufacturer for Own Use
- Net Generation Excluded from Taxable Generating Capacity
- Capacity Related to Retired/Inactive Reserve Electric Generating Units
- Capacity Exemptions for New Electric Generating Units
- Non-Utility Natural Gas Sales
- New Natural Gas Storage Reservoirs
- Coal-fired Merchant Power Plants
- Community Service Assessment Income of Nonprofit Homeowners' Associations

Expenditure calculations for these excluded items follow.

## DIRECTLY OR THIRD PARTY OPERATED PUBLICLY OWNED WATER, SEWER, OR ELECTRIC PLANTS

**STATUTE:** W. Va. Code §§11-13-2d(a)(2), 11-13-2o(a)(10)(c), 11-13-2o(b)(2), 11-13-2o(c)(2) and 11-13-2o(c)(3); W. Va. Legislative Regulation §11-13-3.2

**EXEMPTION:** Tax is not imposed on income received by municipally owned water plants (§11-13-2d(a)(2))

"Net generation" for a period means the kilowatt-hours of net generation available for sale generated or produced by the generating unit in this state during such period less ... the total kilowatt hours of electricity generated ... by a municipally owned plant (§11-13-2o(a)(10)(C))

Upon every person ... in the business of selling electricity to consumers ... tax imposed ... provisions ... shall not apply to ... kilowatt hours of electricity generated and sold, or purchased and resold, by a municipally owned plant (§11-13-2o(b)(2))

New generating units ... the taxable generating capacity of a county or municipally owned generating unit shall equal zero percent of the official capability of the unit (§11-13-2o(c)(2))

Peaking units ... the taxable generating capacity of a county or municipally owned generating unit shall equal zero percent of the official capability of the unit (§11-13-2o(c)(3))

Public service districts for water and sewage services, municipal waterworks, municipal combined waterworks and sewage systems and municipal and sanitary district sewage works are exempt from payment of the tax (§11-13-3(8))

**VALUE:** **$27.0 million per year**

### Rationale

Municipalities provide clean, safe drinking water and sewage treatment more as a service to the residents than as a revenue-generating venture. Many municipalities have rate structures that produce revenue below that necessary to cover the cost of service and capital expenditures, including the debt service on bonds issued. Thus, the provision of drinking water is funded in part from other revenue sources of the municipality, including taxes and fees. Although municipalities are incorporated, the statutes permitting incorporation are distinct from the statutes governing the incorporation of businesses. The exemption for municipally owned water or sewage plants exists in recognition that municipalities and public service districts are not in the business of providing water or sewage services for profit.

While municipal water or sewage service plants often operate at a loss, several West Virginia municipalities have entered electric power production or distribution activity to generate revenue for governmental operations. This exemption exists in recognition that municipalities are not businesses although the generation and distribution activities produce income in excess of costs.

For tax equity purposes, this exemption can only be justified if the service does not compete with services available from non-government utilities.

## ELECTRIC POWER OR NATURAL GAS RELATED TO SELECTED MANUFACTURING PROCESSES

**STATUTE:** W. Va. Code §§11-13-2d(a)(4) and 11-13-2o(a)(10)(c)

**EXEMPTION:** Sale of natural gas exempt to the extent that the natural gas is separately metered and is gas from which the purchaser derives hydrogen and carbon monoxide for use in the manufacture of chemicals (§11-13-2d(a)(4))

"Net generation" for a period means the kilowatt-hours of net generation available for sale generated or produced by the generating unit in this state during such period less the total kilowatt hours of electricity generated ... that are separately metered and consumed in an electrolytic process for the manufacture of chlorine that are that are separately metered and consumed in the manufacture of ferroalloy (§11-13-2o(a)(10)(C))

**VALUE:** **Cannot be disclosed due to Taxpayer confidentiality**

**Rationale**

The exemptions provided for electricity used in the manufacture of chlorine or a ferroalloy and for natural gas from which hydrogen and carbon monoxide are derived for use in the manufacture of chemicals are similar in nature. The West Virginia Code requires that the rate reduction or economic benefit derived from the exemption must be passed on to the manufacturer purchasing the electricity or natural gas. These exemptions exist to reduce production costs of manufacturing businesses in West Virginia.

## GAS CONSUMED AND/OR RECYCLED IN A GAS STORAGE OPERATION

**STATUTE:** W. Va. Legislative Regulation §§110-13-1a.2.5.1.a and 110-13-1a.2.5.1.b

**EXEMPTION:** The number of dekatherms of gas injected into or withdrawn from a gas storage reservoir shall not include any gas consumed by a gas storage operation as fuel for compressors used to pump gas into or out of storage (§110-13-1a.2.5.1.a)

The number of dekatherms of gas injected into or withdrawn from a gas storage reservoir shall not include any gas used in a recycling operation of the storage reservoir (§110-13-1a.2.5.1.b)

**VALUE:** **Not available**

**Rationale**

This exemption exists because the eligible companies are not regularly involved in an activity subject to the Business and Occupation Tax.

"Recycling operation" is defined in the Business and Occupation Tax Regulations as "the withdrawal of gas from a storage reservoir and the subsequent re-injection of gas into the same reservoir solely for the purpose of regulating the pressure of the storage reservoir or a portion thereof." Since the base of the tax is the net number of dekatherms injected into storage or the net number of dekatherms withdrawn from storage, this exemption presumably exists to avoid double taxation of recycled gas.

## ELECTRIC GENERATION BY A MANUFACTURER FOR OWN USE

**STATUTE:** W. Va. Code §11-13-2o(c)(6)

**EXEMPTION:** When electricity used in a manufacturing activity is generated in this state by the person who owns the manufacturing facility in which the electricity is used and the electricity generating unit or units producing the electricity so used are owned by such manufacture, or by a member of the manufacturer's controlled group, as defined in section 267 of the Internal Revenue Code of 1986, as amended, the generation of the electricity shall not be taxable under this article

**VALUE:** **Cannot be disclosed due to Taxpayer confidentiality**

**Rationale**

This exemption exists because the eligible companies are not regularly involved in an activity subject to the Business and Occupation Tax.

## NET GENERATION EXCLUDED FROM TAXABLE GENERATING CAPACITY

**STATUTE:** W. Va. Code §§11-13-2o(a)(10)(A) and 11-13-2o(a)(10)(B)

**EXCLUSION:** "Net generation" for a period means the kilowatt-hours of net generation available for sale generated or produced by the generating unit in this state during such period less the following: twenty-one twenty-sixths of the kilowatt-hours of electricity generated at the generating unit and sold during such period to a plant location of a customer engaged in manufacturing activity if the contract demand at such plant location exceeds two hundred thousand kilowatts per hour in a year or where the usage at such plant location exceeds two hundred thousand kilowatts per hour in a year (§11-13-2o(a)(10)(A))

"Net generation" for a period means the kilowatt-hours of net generation available for sale generated or produced by the generating unit in this state during such period less the following: twenty-one twenty-sixths of the kilowatt-hours of electricity produced or generated at the generating unit during such period by any person producing electric power and an alternative form of energy at a facility located in this state substantially from gob or other mine refuse (§11-13-2o(a)(10)(B))

**VALUE:** **Cannot be disclosed due to Taxpayer confidentiality**

### Rationale

In 1995, the Business and Occupation Tax on electric power producers shifted from a tax largely based on kilowatt hours of electricity generated to a tax on the capacity of the generating units. Prior to the change in 1995, the large volume sales to manufacturers and the generation from gob or other mine refuse were taxed at a reduced rate that was 5/26ths of the general rate on net generation. The exclusion cited above extended the preferential treatment into the revised tax base (i.e., taxable generating capacity).

Prior to June 1995, the reduced rate for large quantities of electric power delivered to a manufacturer presumably existed to provide reduced rates to the power provider. There was an understanding that the reduction in tax rates would, in turn, be passed on to the large user through lower charges. The reduced rate existed to lower production costs for manufacturers consuming large quantities of electric power.

Gob piles and mine refuse are both environmental hazards and aesthetic eyesores. The reduced rate (prior to June 1995) for electricity produced or generated from such sites presumably existed to reduce the number and size of mine waste piles.

Other exclusions from the definition of net generation exist for the following:

- Generation from municipally owned power plants;
- Electric power separately metered and consumed in an electrolytic process for the manufacture of chlorine; and
- Electric power separately metered and consumed in an electrolytic process for the manufacture of ferroalloy.

Further information on these three exclusions can be found in the first two expenditures of this section. An additional expenditure related to large volume sales to manufacturers may be found in a following group of expenditures entitled “Alternate Tax Calculations.”

## CAPACITY RELATED TO RETIRED/INACTIVE RESERVE ELECTRIC GENERATING UNITS

**STATUTE:** W. Va. Code §11-13-2o(c)(1)

**EXEMPTION:** If a generating unit is retired from service or placed in inactive reserve, a taxpayer shall not be liable for tax computed with respect to the taxable generating capacity of the unit for the period that the unit is inactive or retired

**VALUE:** **Cannot be disclosed due to Taxpayer confidentiality**

### Rationale

Prior to 1995, the tax base for electric power producers was based upon ongoing economic activity either in the form of gross income or in the form of kilowatt hours of electricity generated. Under W. Va. Code §11-13-2o et. seq., the measure of the tax (i.e., taxable capacity) was based, in part, upon net generation. This exemption presumably exists in recognition that retired or inactive generating units are not producing net electric power generation.

### Revenue Analysis

Since 2010, more than 4,600 megawatts of coal-fired capacity were retired in West Virginia.

## CAPACITY EXEMPTIONS FOR NEW ELECTRIC GENERATING UNITS

**STATUTE:** W. Va. Code §§11-13-2o(c)(2) and 11-13-2o(c)(3)

**EXEMPTION:** If a new generating unit, other than a peaking unit, is placed in initial service on or after the effective date of this section, the generating unit's taxable generating capacity shall equal forty percent of the official capability of the unit: Provided, that the taxable generating capacity of a county or municipally-owned generating unit shall equal zero percent of the official capability of the unit and the taxable generating capacity of a generating unit utilizing a turbine powered by wind shall equal five percent of the official capability of the unit. Provided further, that for taxable periods beginning on or after the first day of January 2008, the taxable generating capacity of a generating unit utilizing a turbine powered primarily by wind shall equal twelve percent of the official capability of the unit. Provided further, that for taxable periods beginning on or after the first day of January 2020, the taxable generating capacity of a generating unit utilizing solar photovoltaic methods shall equal eight percent of the official capacity of the unit (§11-13-2o(c)(2))

If a peaking unit is placed in initial service on or after the effective date of this section, the generating unit's taxable generating capacity shall equal five percent of the official capability of the unit: Provided, that the taxable generating capacity of a county or municipally-owned plant shall equal zero percent of the official capability of the unit (§11-13-2o(c)(3))

**VALUE:** **Cannot be disclosed due to Taxpayer confidentiality**

**Rationale**

These exemptions presumably exist to encourage the construction and operation of new generating plants. The exemption for wind and solar units also reflect their lower operating rate relative to a base-load plant.

## NON-UTILITY NATURAL GAS SALES

**STATUTE:** W. Va. Code §11-13-2d(a)

**EXEMPTION:** Upon any person engaging or continuing within this state in any public service or utility business ... the tax imposed by section two of this article shall be equal to the gross income of the business derived from such activity or activities

**VALUE:** **$9.5 million per year**

**Rationale**

Although the statute cited above was originally enacted in 1935, non-utility natural gas sales did not become exempt from tax under the Business and Occupation Tax until the Tax Reform Act of 1985. Prior to July 1, 1987, non-utility sales of natural gas were subject to tax under the wholesale or retail classes of the Business and Occupation Tax. As previously stated, the 1985 legislation reduced the scope of the Business and Occupation Tax to a tax upon public utilities. The Public Service Commission issues companies a "Certificate of Public Convenience and Necessity" to operate as utilities in designated areas. As stated in *United Fuel Gas Co. v. Battle*, 153 W. Va. 222, 167 S.E. 2d 890, sales by utilities outside their designated service area are not classified as utility sales. In addition, non-utilities may make sales in areas in competition with utilities. With recent deregulation of the natural gas industry, non-utility sales of natural gas have become more significant in relation to all-natural gas sales. This exemption exists in part due to the conversion of the Business and Occupation Tax to a tax upon utilities.

## NEW NATURAL GAS STORAGE RESERVOIRS

**STATUTE:** W. Va. Code §11-13-1(b)(8)

**EXEMPTION:** "Storage reservoir" means that portion of any subterranean sand or rock stratum or strata into which gas has been injected for the purpose of storage prior to the first day of March, one thousand nine hundred eighty-nine

**VALUE:** **Cannot be disclosed due to Taxpayer confidentiality**

**Rationale**

The inclusion of a date in the definition of storage reservoir created an exemption for storage reservoirs developed after February 28, 1989. This exemption presumably exists to encourage the development of new natural gas storage reservoir capacity in West Virginia.

## COAL-FIRED MERCHANT POWER PLANTS

**STATUTE:** W. Va. Code §11-13-2q

**EXEMPTION:** A coal-fired merchant power plant is exempt on the generating capacity of its generating units at the plant located in West Virginia that are owned or leased by the taxpayer and used to generate electricity

**VALUE:** **Cannot be disclosed due to Taxpayer confidentiality**

**Rationale**

Beginning January 1, 2020, a coal-fired merchant power plant is exempt from Business and Occupation Tax on the generating capacity of its generating units at the plant located in West Virginia that are owned or leased by the taxpayer and used to generate electricity. A merchant power plant is defined as an electricity generating plant that:

1. does not receive regulated cost recovery pursuant to any tariff, regulated rate, or cost recovery fee mandated or authorized by any rate-making authority of any state in the United States;
2. sells electricity it generates only on the wholesale market;
3. does not sell electricity pursuant to one or more long-term sales contracts, and
4. does not sell electricity to retail customers.

## COMMUNITY SERVICE ASSESSMENT INCOME OF NONPROFIT HOMEOWNERS' ASSOCIATION

**STATUTE:** W. Va. Code §11-13-3(b)(7)

**EXEMPTION:** The provisions of this article do not apply to: ... (7) Gross income of a nonprofit homeowners' association received from assessments on its member for community services such as road maintenance, common are maintenance, water service, sewage service and security service

**VALUE:** **Minimal**

**Rationale**

Other than electric power generation and natural gas storage, the scope of the Business and Occupation Tax generally applies to public utilities. The test to determine status as a public utility, as stated in *United Fuel Gas Co. v. Battle*, 153 W. Va. 222, 167 S.E. 2d 890, "is that to be such there must be a dedication or holding out either express or implied that such person, firm, or corporation is engaged in the business of supplying his or its product or services to the public as a class or any part thereof as distinguished from the serving of only particular individuals ..." Generally, a homeowners' association only provides service to particular individuals (i.e., members of the association). This expenditure was enacted in 2005 to exempt homeowners' associations, which are not public utilities for purposes of the Business and Occupation Tax.

# ACTIVITIES SUBJECT TO REDUCED RATES

Reduced tax rates are provided presumably in recognition of the cost or benefit associated with the particular activity or quantity. In some cases, only one or two taxpayers are eligible for the reduced tax rate.

The following activities are eligible for reduced tax rates under the Business and Occupation Tax statute:

- Sales of Electric Power Exceeding 200,000 Kilowatts Per Hour Per Year and Large-Volume Electricity Sales to Manufacturers
- Capacity of Units with a Flue Gas Desulfurization System

Expenditure calculations for the items subject to reduced rates follow.

## SALES OF ELECTRIC POWER EXCEEDING 200,000 KILOWATTS PER HOUR PER YEAR AND LARGE-VOLUME ELECTRICITY SALES TO MANUFACTURERS

**STATUTE:** W. Va. Code §§11-13-2o(b)(1) and 11-13-2o(b)(2)

**TAX RATE:** For taxpayers who generate or produce electricity for sale, profit or commercial use, the product of $22.78 multiplied by the taxable generating capacity of each generating unit in this state owned or leased by the taxpayer, subject to the modifications set forth in subsection (c) of this section: Provided, That with respect to each generating unit in this state which has installed a flue gas desulfurization system, the tax imposed by section two of this article shall, on and after January 31, 1996, be equal to the product of $20.70 multiplied by the taxable generating capacity of the units, subject to the modifications set forth in subsection (c) of this section: Provided, however, That with respect to kilowatt hours sold to or used by a plant location engaged in manufacturing activity in which the contract demand at the plant location exceeds 200,000 kilowatts per hour per year or if the usage at the plant location exceeds 200,000 kilowatts per hour in a year, in no event may the tax imposed by this article with respect to the sale or use of the electricity exceed five hundredths of one cent times the kilowatt hours sold to or used by a plant engaged in a manufacturing activity; and (§11-13-2o(b)(1))

For taxpayers who sell electricity to consumers in this state that is not generated or produced in this state by the taxpayer, nineteen hundredths of one cent times the kilowatt hours of electricity sold to consumers in this state that were not generated or produced in this state by the taxpayer, except that the rate shall be five hundredths of one cent times the kilowatt hours of electricity not generated or produced in this state by the taxpayer which is sold to a plant location in this state of a customer engaged in manufacturing activity if the contract demand at such plant location exceeds 200,000 kilowatts per hour per year or if the usage at such plant location exceeds 200,000 kilowatts per hour in a year. The measure of tax under this subdivision shall be equal to the total kilowatt hours of electricity sold to consumers in the state during the taxable year, that were not generated or produced in this state by the taxpayer, to be determined by

subtracting from the total kilowatt hours of electricity sold to consumers in the state the net kilowatt hours of electricity generated or produced in the state by the taxpayer during the taxable year. For the purposes of this subdivision, net kilowatt hours of electricity generated or produced in this state by the taxpayer includes the taxpayer's pro rata share of electricity generated or produced in this state by a partnership or limited liability company of which the taxpayer is a partner or member. The provisions of this subdivision may not apply to those kilowatt hours exempt under §11-13-2(n)(b) of this code. Any person taxable under this subdivision shall be allowed a credit against the amount of tax due under this subdivision for any electric power generation taxes or a tax similar to the tax imposed by subdivision (1) of this subsection paid by the taxpayer with respect to the electric power to the state in which the power was generated or produced. The amount of credit allowed may not exceed the tax liability arising under this subdivision with respect to the sale of the power (§11-13-2o(b)(1))

**VALUE:** **$0 per year**

**Rationale**

These provisions are part of an historic tax base for electric power providers in place prior to January 1, 1995. As production is benchmarked to 1990s levels, this provision is not dependent on economic activity occurring year-to-year. With respect to the exemption for sales of electric power exceeding 200,000 kilowatts per hour per year, this exemption exists to lower production costs for manufacturers consuming large quantities of electric power. As for large volume electricity sales to manufacturers, these activities are subject to the reduced rate resulting from the benchmark.

## CAPACITY OF UNITS WITH A FLUE GAS DESULFURIZATION SYSTEM

**STATUTE:** W. Va. Code §11-13-2o(b)(1)

**TAX RATE:** For taxpayers who generate or produce electricity for sale, profit or commercial use, the product of $22.78 multiplied by the taxable generating capacity of each generating unit in this state owned or leased by the taxpayer, subject to the modifications set forth in subsection (c) of this section: Provided, That with respect to each generating unit in this state which has installed a flue gas desulfurization system, the tax imposed by section two of this article shall, on and after January 31, 1996, be equal to the product of $20.70 multiplied by the taxable generating capacity of the units, subject to the modifications set forth in subsection (c) of this section: Provided, however, That with respect to kilowatt hours sold to or used by a plant location engaged in manufacturing activity in which the contract demand at the plant location exceeds 200,000 kilowatts per hour per year or if the usage at the plant location exceeds 200,000 kilowatts per hour in a year, in no event may the tax imposed by this article with respect to the sale or use of the electricity exceed five hundredths of one cent times the kilowatt hours sold to or used by a plant engaged in a manufacturing activity

**VALUE:** **Cannot be disclosed due to Taxpayer confidentiality**

### Rationale

Flue gas desulfurization systems are intended to remove sulfur compounds from the exhaust gases of electric generating units fired by fossil fuel. The removal of sulfur compounds (e.g., sulfur dioxide) reduces the amount of acid rain formed when the exhaust gases combine with moisture in the air. This reduced tax rate presumably exists to encourage the installation of flue gas desulfurization systems at electric generating plants and, in turn, reduce the acid rain produced from the exhaust gases. The reduced tax rate also presumably promotes a market for high-sulfur coal.

# ALTERNATE TAX CALCULATION

The following provision exists to limit the tax liability of natural gas storage operators.

## GAS STORAGE

**STATUTE:** W. Va. Code §11-13-2e(a)

**CALCULATION:** Effective July 1, 1995, the net number of dekatherms of gas injected or the net number of dekatherms withdrawn shall not exceed the storage utilization index … "storage utilization index" means the utilization of storage reservoir, through the operation of existing and functional facilities available for storage use during the five year base period ending December 31, 1994 and the storage utilization index shall be the five year average of taxable dekatherms as determined for each taxable period of the stated base period

**VALUE:** **Cannot be disclosed due to Taxpayer confidentiality**

### Rationale

This expenditure was enacted to cap the tax liability of natural gas storage operators at the average monthly level experienced by such taxpayers between 1990 and 1994.

# CREDITS

The West Virginia Code provides for the application of various tax credits against the Business and Occupation Tax. Some credits provide qualifying businesses with an investment incentive. Others provide relief from double taxation or provide relief to utilities providing aid to low-income households. The following credits apply against current Business and Occupation Tax liability:

- Economic Opportunity Tax Credit
- Industrial Expansion and Revitalization Credit
- Natural Gas Industry Jobs Retention Credit
- Credit for Reducing Utility Charges to Low-Income Families
- Consumers Sales and Service Tax and Use Tax Overpayment Credit
- Annual Credit

Many of the credits listed above may also be applied against other business and personal taxes. Expenditure values presented in this section represent the amounts applied against **only** Business and Occupation Tax. In most cases, the priority order specified by statute or regulation specifies that the initial claim of the credit be applied against the Business and Occupation Tax. However, in some cases, the credits may be applied to other taxes first; thus, the credit amounts claimed against the Business and Occupation Tax may be negligible compared to the total cost of the credit. An analysis of these expenditures follows.

## ECONOMIC OPPORTUNITY TAX CREDIT

**STATUTE:** W. Va. Code §11-13Q-7

**CREDIT:** Credit, attributable to qualified investment in tangible and real property and the creation of new jobs in West Virginia, may be used to offset up to eighty percent of Business and Occupation Tax liability attributable to generating or producing or selling electricity, provided that the credit may offset one hundred percent of the tax if the median compensation of the new jobs exceeds an inflation adjusted value

**VALUE:** **$0 per year**

### Rationale

The Economic Opportunity Tax Credit was presumably enacted to encourage greater capital investment in West Virginia and create new jobs. In its base form, qualifying taxpayers must create at least 10 new jobs. However, the Economic Opportunity Tax Credit Law also contains a headquarter relocation provision with lower minimum job creation requirements.

### Revenue Analysis

The Economic Opportunity Tax Credit is currently not being used by any taxpayers.

## INDUSTRIAL EXPANSION AND REVITALIZATION CREDIT

**STATUTE:** W. Va. Code §§11-13D-3a and 11-13-3d

**CREDIT:** Credit, attributable to qualified investment by electric power producers in tangible and real property, may be used to offset up to fifty percent of Business and Occupation Tax liability for a period of ten years

**VALUE:**

| | | | |
|---|---|---|---|
| **2016** | **$52.5 million** | **2020** | **$24.0 million** |
| **2017** | **$47.4 million** | **2021** | **$19.7 million** |
| **2018** | **$45.8 million** | **2022** | **$19.7 million** |
| **2019** | **$31.0 million** | | |

### Rationale

The Industrial Expansion and Revitalization Credit exists as an incentive for manufacturers of electricity to increase their property investment levels in West Virginia. The credit is available for nearly all purchases of real property and tangible personal property. Also, investment in replacement property is valued equally with investment in expansion property.

### Revenue Analysis

The value of the Industrial Expansion and Revitalization Credit grew significantly between 1992 and 2009 when it peaked at $58.5 million. The increase was the result of increased investment by the electric power industry in the areas of plant revitalization and pollution control abatement. As significant pollution abatement tax credits claimed over ten years began expiring, the value of this expenditure declined beginning in 2010 to an estimated $19.7 million in 2022.

## NATURAL GAS INDUSTRY JOBS RETENTION CREDIT

**STATUTE:** W. Va. Code §11-13L

**CREDIT:** Credit, attributable to the number of qualified employees employed by a natural gas storage taxpayer during the taxable year multiplied by $1,000, may annually offset up to one hundred percent of Business and Occupation Tax liability attributable to the natural gas storage tax for tax years beginning on or after October 1, 1996

**VALUE:** **Cannot be disclosed due to Taxpayer confidentiality**

### Rationale

The Natural Gas Industry Jobs Retention Credit exists as an incentive for natural gas storage companies to maintain current employment levels within West Virginia.

## CREDIT FOR REDUCING UTILITY CHARGES TO LOW-INCOME FAMILIES

**STATUTE:** W. Va. Code §§11-13F-3 and 11-13-3f

**CREDIT:** Credit, attributable to the provision of electric or natural gas or water utility service to qualified low-income residential customers at special reduced rates, may be used to offset up to one hundred percent of Business and Occupation Tax liability

**VALUE:** **$7.6 million per year**

### Rationale

This credit is a form of government assistance to qualified low-income households. Public utilities are compensated for the value of rate reductions to low-income customers through the tax credit program.

### Revenue Analysis

This credit is available to water utilities providing reduced rates to qualified low-income residential customers. Credit was also recently extended to sewer utilities.

## CONSUMER SALES AND SERVICE TAX AND USE TAX OVERPAYMENT CREDIT

**STATUTE:** W. Va. Code §11-13-31

**CREDIT:** Overpayments of sales and use tax may be claimed as a credit against the Business and Occupation Tax

**VALUE:** **Minimal**

### Rationale

This credit is a mechanism for taxpayers to claim a refund for the overpayment of Consumers Sales Tax or Use Tax without the need for filing a refund request with the State Tax Department. This credit is **not** a tax expenditure because it simply provides an additional mechanism for expeditious return of funds never due the State.

## ANNUAL CREDIT

**STATUTE:** W. Va. Code §11-13-3(a)

**CREDIT:** An annual credit of $500 is permitted for each taxpayer subject to the Business and Occupation Tax

**VALUE:** **$24,000 per year**

**Rationale**

The purpose of this credit may be to provide some measure of tax relief to small businesses. However, the credit applies to all Business and Occupation taxpayers, regardless of size. This provision is a carryover from the old broad-based Business and Occupation Tax structure in place prior to July 1, 1987.

# SEVERANCE TAX

## OVERVIEW

The Severance Tax is imposed on the gross value of severed natural resources. The gross value of a severed natural resource is the market value of the resource in the immediate vicinity where severed. Transportation costs to the customer are not included. The rate of taxation varies among taxable resources. The following table shows the rate as of July 1, 2023.

| Natural Resource[1] | Tax Rate |
|---|---|
| Coal mined and produced, average underground seam thickness in excess of 45 inches or from surface mines* | 5.00% |
| Coal mined and produced from new underground mines, average seam thickness of 37 inches to 45 inches* | 2.00% |
| Coal mined and produced from new underground mines, average seam thickness less than 37 inches* | 1.00% |
| Steam coal for electric power plants | 3.00% |
| Waste coal | 2.50% |
| Oil | 5.00% |
| Natural gas and coalbed methane | 5.00% |
| Low volume vertical oil and gas wells | 2.50% |
| Other natural resource products | 5.00% |

* Tax rates on the severance of coal are inclusive of the 0.35 percent local coal severance tax rate.

Raw coal purchased and processed into a commercially useable product is assessed tax on the value added in the processing. A Minimum Severance Tax of $0.75 per ton of coal produced by a taxpayer for sale, profit or commercial use applies to all coal except qualified thin-seam coal.

## ESTIMATING COSTS OF TAX EXPENDITURES

Several sources were used to estimate the costs of Severance Tax expenditures. However, taxpayer returns, and other records of the State Tax Department were primarily used for the estimates.

## ORGANIZATION AND ANALYSIS

The Severance Tax expenditures discussed in this report are divided into three groups as follows:

- Exemptions
- Exclusions and Other Tax Preferences
- Credits

The analysis provided for each tax expenditure includes the item's cost to the State and a possible rationale.

[1] Reduced Severance Tax rates for “thin-seam” coal production apply only to new underground mines (mines first opened on or after April 11, 1997) with average seam thickness of less than 45 inches.

# EXEMPTIONS

Two types of activities are exempt from the Severance Tax. The following is a list of these exemptions:

- Exemption for Limestone and Sandstone
- Exemption for Timber

An analysis of these exemptions follows.

## EXEMPTION FOR LIMESTONE OR SANDSTONE

**STATUTE:** W. Va. Code §11-13A-3(h)(2)(i)

**EXEMPTION:** Imposition of tax on privilege of severing limestone or sandstone. The taxes imposed under this section for persons exercising the privilege of engaging or continuing within this state in the business of severing, extracting, reducing to possession and producing for sale, profit or commercial use limestone or sandstone shall cease, terminate and be of no further force or effect on and after July 1, 2019

**VALUE:** **$1.2 million per year**

### Rationale

The termination of the severance tax on limestone or sandstone was presumably enacted to further encourage growth of this sector of the economy.

## EXEMPTION FOR TIMBER

**STATUTE:** W. Va. Code §11-13A-3b(d)

**EXEMPTION:** Imposition of tax on privilege of severing timber. The taxes imposed under this section shall cease, terminate and be of no further force or effect on and after July 1, 2019

**VALUE:** **$1.6 million per year**

### Rationale

The termination of the severance tax on timber was presumably enacted to further encourage logging and woods products related industry within the State. The proceeds of this tax were dedicated to the funding of the Division of Forestry. The Division of Forestry now relies on proceeds of State-owned timber sales for a portion of its funding.

# EXCLUSIONS AND OTHER TAX PREFERENCES

Several types of activities are excluded from the Severance Tax due to the nature of the business activity or the level of that activity. In addition, certain coal mining activities are subject to preferential tax rates. The following is a list of these exclusions and other tax preferences:

- Treatment Processes Not Considered as Mining
- Gob or Coal Refuse
- Treatment Processes Not Included in Extraction of Oil and Gas
- Low-Volume Oil and Gas Well Exclusions
- Reduced Tax Rates for Thin-Seamed Coal from New Underground Mines
- Reduced Tax Rate for Extracting Coal from Refuse and Gob Piles
- Reduced Tax Rate for Steam Coal
- Reduced Tax Rate for Low Volume Vertical Oil and Gas Wells

An analysis of these exclusions and other tax preferences follows.

## TREATMENT PROCESSES NOT CONSIDERED AS MINING

**STATUTE:** W. Va. Code §11-13A-4(b)

**EXCLUSION:** Unless such processes are otherwise provided for, or are necessary or incidental to processes provided for, the following treatment processes shall not be considered as “mining”: Electrolytic deposition, roasting, calcining, thermal or electric smelting, refining, polishing, fine pulverization, blending with other materials, treatment effecting a chemical change, thermal action and molding or shaping

**VALUE:** **Not available**

### Rationale

That portion of income derived from value added by treatment processes after severance is by definition not part of the severance process and, therefore, is exempt from tax. These processes consist of electrolytic deposition, roasting, calcining, thermal or electric smelting, refining, polishing, fine pulverization, blending with other minerals, treatment effecting a chemical change, thermal action, and molding or shaping. These processes generally occur after the resource is removed from the earth, the point at which severance occurs.

## GOB OR COAL REFUSE

**STATUTE:** W. Va. Code §§11-13A-2(c)(5) and 11-13A-3e(e)

**EXCLUSION:** "Extraction of ores or minerals from the ground" includes extraction by mine owners or operators of ores or minerals from the waste or residue of prior mining only when such extraction is sold (§11-13A-2(c)(5))

The tax imposed in W. Va. Code §11-13A-3e(b) shall not apply to any electrical power co-generation plant burning material from its wholly owned refuse or gob pile (§11-13A-3e(e))

**VALUE:** **Cannot be disclosed due to Taxpayer confidentiality**

**Rationale**

Gob that is severed but not sold by producers before use is excluded from the Severance Tax. Gob is considered to be “coal mine refuse.”

As a result of technological developments and other factors, the material in some refuse or gob piles can be recovered and used as clean coal. The exemption for electric power co-generation plants using material from their own refuse or gob piles presumably exists to provide an incentive to reduce or eliminate the refuse or gob piles.

## TREATMENT PROCESSES NOT INCLUDED IN EXTRACTION OF OIL AND GAS

**STATUTE:** W. Va. Code §11-13A-4(c)

**EXCLUSION:** The privileges of severing and producing oil and natural gas shall not include any conversion or refining process

**VALUE:** **Not available**

**Rationale**

The conversion or refining of oil and natural gas is excluded from the Severance Tax. These processes are not considered part of the severance of the natural resource and, thus, are excluded from taxation.

## LOW-VOLUME OIL AND GAS WELL EXCLUSIONS

**STATUTE:** W. Va. Code §11-13A-3a(a)

**EXCLUSION:** For taxable periods, beginning on or after January 1, 2000, there is a Severance Tax exemption for the following (1) Free natural gas provided to any surface owner; (2) natural gas produced from any well which produced an average of less than 5,000 cubic feet of natural gas per day during the calendar year immediately preceding a given taxable period; (3) oil produced from any oil well which produced an average of less than one-half barrel of oil per day during the calendar year immediately preceding a given taxable period; and (4) for a maximum period of 10 years, all natural gas or oil produced from any well which has not produced marketable quantities of natural gas or oil for five consecutive years immediately preceding the year in which a well is placed back into production and therefore produces marketable quantities of natural gas or oil

| | | |
|---|---|---|
| **VALUE:** | **2020** | **$2.6 million** |
| | **2021** | **$1.9 million** |
| | **2022** | **$1.8 million** |

### Rationale

Free natural gas provided to a surface owner is presumably excluded from taxation in recognition that tax on severed natural gas is imposed on the gross proceeds of the production and the producer does not receive direct monetary compensation for the gas provided to the surface owner. The exclusion of receipts from low-volume wells presumably exists to keep low marginal wells in production. In addition, the ten-year exemption for inactive wells presumably promotes additional development and marketing of conventional natural gas wells in West Virginia.

### Revenue Analysis

The expenditure values provided above is an estimate of the tax foregone due to the exclusion of natural gas and oil obtained from low-volume wells. The tax expenditure value fluctuates each year with the price of oil and natural gas. An estimate of the tax foregone due to the provision of free natural gas to the owner of the surface rights where gas wells are located Not available. However, the amount of tax foregone for this exclusion is likely minimal. This statute excludes horizontal wells from the tax exclusion.

## REDUCED TAX RATES FOR THIN-SEAM COAL FROM NEW UNDERGROUND MINES

**STATUTE:** W. Va. Code §11-13A-3(g)

**TAX RATE:** For tax years beginning after April 10, 1997, any new underground mine producing coal from seams of less than forty-five inches in average thickness or any existing underground mine that had not produced coal from seams of less than forty-five inches in thickness between October 12, 1996 and April 10, 1997, may qualify for reduced severance tax rates. The tax rate is two percent for coal mined from seams with an average thickness of thirty-seven inches to forty-five inches and one percent for coal mined from seams with an average thickness of less than thirty-seven inches

**VALUE:**

| | |
|---|---|
| **2020** | **$33.9 million** |
| **2021** | **$45.6 million** |
| **2022** | **$84.4 million** |

### Rationale

The application of reduced coal severance tax rates for “new” thin-seam underground mines presumably exists to encourage greater coal production from thin-seam underground mines.

### Revenue Analysis

The value of the reduced tax rate preference for thin-seam coal fluctuates each year due mainly to changes in metallurgical coal demand and price. According to data from the United States Department of Energy, the average price of metallurgical coal per short ton fell from $139.78 in 2019 to $110.64 in 2020 and sharply rose to $151.97 in 2021. In 2022, the average price of metallurgical coal was $261.72, up 72.0% from the prior year.

## REDUCED TAX RATE FOR EXTRACTING COAL FROM REFUSE AND GOB PILES

**STATUTE:** W. Va. Code §11-13A-3e(c)

**TAX RATE:** The tax imposed in W. Va. Code §11-13A-3e(b) shall be two and one- half percent of the gross value of the coal so produced

**VALUE:** **Minimal**

### Rationale

The application of a reduced coal severance tax rate for the extracting and recovering material from refuse, gob piles or other sources of waste coal presumably exists to reduce the volume and number of coal refuse and gob piles.

## REDUCED TAX RATE FOR STEAM COAL

**STATUTE:** W. Va. Code §11-13A-3(b)

**TAX RATE:** The tax imposed is five percent of the gross value of the natural resource produced. Provided, that effective July 1, 2019, the tax rate imposed by this subsection on the gross value of thermal or steam coal produced shall be reduced incrementally over the next three years for a total reduction of two percent by July 1, 2021. That on July 1, 2019, the reduction shall occur at the rate of 35 percent of the two percent reduction, on July 1, 2020, the reduction shall occur at the rate of 65 percent of the two percent reduction, and on July 1, 2021, at the rate of 100 percent of the two percent reduction.

**VALUE:** **$52.7 million per year**

### Rationale

The application of the reduced coal severance tax rates for steam coal presumably exists to encourage greater production and sales of coal for use in electric power generation. The domestic steam coal market has been rapidly shrinking over the past decade due to closure of old power plants and an emerging long-term competitive advantage for generation from lower priced natural gas associated with improving shale drilling technologies.

## REDUCED TAX RATE FOR LOWER VOLUME VERTICAL OIL AND GAS WELLS

**STATUTE:** W. Va. Code §11-13A-3a(b)(2)

**TAX RATE:** That effective for taxable periods beginning on or after January 1, 2020: For all natural gas produced from any well, excluding wells utilizing horizontal drilling techniques targeting shale formations, which produced an average between 5,000 cubic feet of natural gas per day and 60,000 cubic feet of natural gas per day during the calendar year immediately preceding the beginning date of a given taxable year, and for oil produced from any well, excluding wells utilizing horizontal drilling techniques targeting shale formations, which produced an average between one-half barrel per day and 10 barrels per day, during the calendar year immediately preceding the beginning date of a given taxable year, the rate of tax is two and five tenths percent of the gross value of the natural gas or oil produced as shown by the gross proceeds derived from the sale thereof by the producer

| | | |
|---|---|---|
| **VALUE:** | **2020** | **$2.5 million** |
| | **2021** | **$4.0 million** |
| | **2022** | **$7.5 million** |

### Rationale

The application of a reduced oil and natural gas tax rate for certain lower volume vertical wells presumably exists to encourage continuing operation of such wells. Due to technological changes involving horizontal drilling in shale formations, few to no new vertical wells are being drilled in West Virginia. The proceeds from the lower tax rate on production from such wells are largely dedicated to the plugging of abandoned orphan wells in the State.

### Revenue Analysis

Absent rising prices, the revenue yield from the special lower tax rate will decline gradually over future years as the volume produced from these older vertical wells declines over time. Therefore, the value of this expenditure should also decrease over time. The value of this expenditure will fluctuate year to year due to changes in energy prices.

# CREDITS

The West Virginia Code provides for the application of various tax credits against the Severance Tax. Some credits provide qualifying businesses with an investment incentive while others provide relief from double taxation. The following credits apply against Severance Tax liability:

- Manufacturing Investment Tax Credit
- Coal Severance Tax Rebate Credit
- Coal Loading Facilities Credit
- Credit for Payment of Minimum Severance Tax on Coal
- Annual Credit

Many of the credits listed above may also be applied against other business and personal taxes. Expenditure values presented in this section represent the amounts applied against only the Severance Tax. An analysis of these expenditures follows.

## MANUFACTURING INVESTMENT TAX CREDIT

**STATUTE:** W. Va. Code §11-13S-4(b)(2)

**CREDIT:** Credit, attributable to qualified investment by manufacturers in tangible and real property, may be used to offset up to sixty percent of Severance Tax liability for a period of ten years

**VALUE:** **$0 per year**

### Rationale

The Manufacturing Investment Tax Credit was enacted to encourage the location of new industry in West Virginia and to encourage the expansion, growth and revitalization of existing industrial facilities in West Virginia. Qualified investment placed in service or use on or after January 1, 2003, may qualify for the credit. Eligible taxpayers include those with business activity classified as having a sector identifier, consisting of the first two digits of the six-digit North American Industry Classification System code number of 31, 32, or 33 or whose six-digit code is 211112.

### Revenue Analysis

The value of this credit is zero because nearly all tax credits were claimed by producers of limestone, sandstone and timber. The Severance Tax was recently eliminated for these industries.

## COAL SEVERANCE TAX REBATE CREDIT

**STATUTE:** W. Va. Code §11-13EE

**CREDIT:** Credit, attributable to amount of the taxpayer's capital investment in new machinery and equipment directly used in the production of coal at a coal mining operation in this state multiplied by 35 percent may be applied to offset 80 percent of the state portion of the 5.0 percent severance tax rate directly attributable to the increased production of coal associated with the new investment

**VALUE:** **$0 per year (New program)**

### Rationale

The Coal Severance Tax Rebate Credit was presumably enacted to encourage new investment in the coal industry within the state. At 35 percent, the potential amount of investment tax credit associated with this Program is very high relative to any other similar investment tax credit offered by West Virginia or any other state. Therefore, there are statutorily complex rules in place to limit credit application to net expansions of mining operations in West Virginia.

### Revenue Analysis

As of 2022, there is $70 million of rebate credit available, based on filed investment tax credit schedules.

## COAL LOADING FACILITIES CREDIT

**STATUTE:** W. Va. Code §§11-13E-3a and 11-13A-10a(a)(3)

**CREDIT:** Credit, attributable to qualified investment in tangible and real property for use in a coal loading facility, may be used to offset up to fifty percent of Severance Tax liability for a period of ten years

**VALUE:** **$0.9 million per year**

### Rationale

The Coal Loading Facilities Credit exists as an incentive to encourage the construction and maintenance of coal loading facilities in West Virginia. Under this credit program, investment in replacement property is valued equally with investment in expansion property.

## CREDIT FOR PAYMENT OF MINIMUM SEVERANCE TAX ON COAL

**STATUTE:** W. Va. Code §11-12B-3(b)

**CREDIT:** A person who pays the Minimum Severance Tax shall be allowed a credit against the Severance Tax, but not including the Additional Severance Tax on Coal

**VALUE:** **$60.0 million per year**

### Rationale

A business that pays the Minimum Severance Tax on Coal is allowed a credit against the net State Severance Tax, (i.e., the gross receipts tax rate less the 0.35 percent designated for local governments). The credit amount is equal to the liability for the Minimum Severance Tax on Coal for the taxable year. The amount of the credit may not exceed the Severance Tax liability of the taxpayer. This credit is **not** a true tax expenditure. It is part of a mechanism to ensure that a minimum amount of tax per ton of mined coal is paid.

### Revenue Analysis

The value of this tax credit rises and falls with the change in coal production and has trended down in recent years.

## ANNUAL CREDIT

**STATUTE:** W. Va. Code §11-13A-10

**CREDIT:** An annual credit of $500 is permitted for each taxpayer subject to the Severance Tax

**VALUE:** **$0.5 million per year**

### Rationale

The purpose of this credit may be to provide some measure of tax relief to small businesses. However, the credit applies to all Severance taxpayers, regardless of size.

# HEALTH CARE PROVIDER TAXES

## OVERVIEW

Health Care Provider Taxes include the Health Care Broad Base Tax, the Acute Care Hospital Tax, the Acute Care Hospital Tax to Enhance Practitioner Fee Schedules, and the Managed Care Organization Tax. The Health Care Broad Base Tax and the Acute Care Hospital Taxes are imposed on the provision of selected types of health care services provided in West Virginia. The Managed Care Organization Tax is a tiered tax based on the Medicaid and Non-Medicaid membership of managed care organizations. The following is a list of taxable health care services and their respective tax rates as of June 30, 2023:

| | |
|---|---|
| Ambulatory Surgical Center | 1.75% |
| Independent Laboratory or X-ray Services | 5.00% |
| Inpatient Hospital Services | 2.50% |
| Intermediate Care Facility Services for Individuals with an Intellectual Disability | 5.50% |
| Nursing Facilities other than Intermediate Care Facility Services for Individuals with an Intellectual Disability | 5.50% |
| Outpatient Hospital Services | 2.50% |
| Acute Care Hospital Services (in addition to 2.50%) | 0.75% |
| Acute Care Hospital Practitioner Fees (in addition to 2.50%) | 0.13% |
| Managed Care Organizations | Tiered |

Health Care Broad Base Tax and Acute Care Hospital Taxes are measured by the application of a rate to the gross receipts received from providing the particular health care services. Gross receipts include all payments, in cash or in kind, from patients, third-party providers, and others for the services rendered, including retroactive adjustments under reimbursement agreements with third-party providers. Gross receipts that are not related to providing of health care services (e.g., fees received by health care providers for providing expert testimony) and charitable donations are not subject to tax.

## ESTIMATING COSTS OF TAX EXPENDITURES

Tax return information was used to estimate expenditure valuations. Estimates were calculated using the various applicable tax rates. There are currently no expenditures associated with the Managed Care Organization Tax.

## ORGANIZATION AND ANALYSIS

There are only two possible deductions from bases of the Health Care Broad Base Tax and the Acute Care Hospital Taxes, contractual allowances and bad debts. The analysis provided for each deduction includes the item's value and a rationale.

## HEALTH CARE BROAD BASE DEDUCTIONS

The two possible deductions from the gross receipts tax base of the Health Care Broad Base Tax are as follows:

- Contractual Allowances
- Bad Debts

An analysis of these deductions follows.

## CONTRACTUAL ALLOWANCES

**STATUTE:** W.Va. Code §§11-27-4(c)(1),11-27-8(c)(1), 11-27-9(c)(1), 11-27-10(c)(1), 11-27-11(c)(1), and 11-27-15(c)(1)

**DEDUCTION:** Accrual basis providers shall be allowed to reduce gross receipts by their contractual allowances, to the extent such allowances are included therein

**VALUE:** **$296.7 million per year**

### Rationale

The deductions for contractual allowances and bad debts exist to prevent taxation of gross receipts never received by accrual basis taxpayers. Contractual allowances represent the difference between gross receipts at established rates and amounts realizable from third-party payers under contractual agreements.

## BAD DEBTS

**STATUTE:** W.Va. Code §§11-27-4(c)(1),11-27-8(c)(1), 11-27-9(c)(1), 11-27-10(c)(1), 11-27-11(c)(1), and 11-27-15(c)(1)

**DEDUCTION:** Accrual basis providers shall be allowed to reduce gross receipts by bad debts, to the extent the amount of such bad debts was previously included in gross receipts upon which the tax imposed by this section was paid

**VALUE:** **$11.4 million per year**

### Rationale

The deductions for contractual allowances and bad debts exist to prevent taxation of gross receipts never received by accrual basis taxpayers. Bad debts are deducted to the extent such amounts were previously included in the measure of gross receipts upon which tax was paid. These deductions are **not** tax expenditures.

# ACUTE CARE HOSPITAL TAX DEDUCTIONS

The two possible deductions from the gross receipts tax base of the Acute Care Hospital Taxes are as follows:

- Contractual Allowances
- Bad Debts

An analysis of these deductions follows.

## CONTRACTUAL ALLOWANCES

**STATUTE:** W.Va. Code §§11-27-9(c)(1) and 11-27-15(c)(1)

**DEDUCTION:** Accrual basis providers shall be allowed to reduce gross receipts by their contractual allowances, to the extent such allowances are included therein

**VALUE:** **$76.2 million per year**

### Rationale

The deductions for contractual allowances and bad debts exist to prevent taxation of gross receipts never received by accrual basis taxpayers. Contractual allowances represent the difference between gross receipts at established rates and amounts realizable from third-party payers under contractual agreements.

## BAD DEBTS

**STATUTE:** W.Va. Code §§11-27-9(c)(1) and 11-27-15(c)(1)

**DEDUCTION:** Accrual basis providers shall be allowed to reduce gross receipts by bad debts, to the extent the amount of such bad debts was previously included in gross receipts upon which the tax imposed by this section was paid

**VALUE:** **$2.5 million per year**

### Rationale

The deductions for contractual allowances and bad debts exist to prevent taxation of gross receipts never received by accrual basis taxpayers. Bad debts are deducted to the extent such amounts were previously included in the measure of gross receipts upon which tax was paid. These deductions are **not** tax expenditures.

# COAL MINING RECLAMATION FEE

## OVERVIEW

The Coal Mining Reclamation Fee is imposed on all clean tons of coal mined in West Virginia. The current fee is 27.9 cents per clean ton mined. Revenues attributable to 15 cents out of the total 27.9 cents are deposited into the Special Reclamation Water Trust Fund, and the remainder is deposited in the Special Reclamation Fund. These funds are utilized by the Department of Environmental Protection to pay for expenses associated with reclamation of post 1977 coal mines in the State.

There is one allowable tax expenditure against the Coal Mining Reclamation Fee. An analysis of this expenditure follows.

### RECLAMATION REMEDIATION TAX CREDIT

**STATUTE:** W. Va. Code §22-3-11(g)(3)

**CREDIT:** Credit, attributable to amount of project costs, as shown in the records of the secretary, that would have been spent from the Special Reclamation Fund or Special Reclamation Water Trust Fund to accomplish the reclamation or remediation performed by the mine operator, including expenditures for water treatment.

**VALUE:** **$0 per year**

#### Rationale

The tax credit might yield a net benefit if the net cost to the State Treasury associated with reclamation or remediation by the mine operator were less than the cost for the State to otherwise perform such reclamation or remediation. This tax credit was first effective for reclamation or remediation activities occurring on or after January 1, 2012. Currently there are no active projects.

# SOLID WASTE ASSESSMENT FEES

## OVERVIEW

Several Solid Waste Assessment Fees are levied and imposed on the disposal of solid waste at any solid waste disposal facility in West Virginia. The Solid Waste Assessment Fees are imposed in addition to all other fees levied. The fees are to be added to, and constitute part of, any fee charged by the operator or owner of a solid waste disposal facility for receiving and disposing of solid waste. The following table shows the Solid Waste Assessment Fees, as of July 1, 2023, by West Virginia Code Section:

| Fee | West Virginia Code | Fee Per Ton |
|---|---|---|
| Solid Waste Assessment Fee | §22-15-11(a)(1) | $1.75 |
| Solid Waste Assessment Fee- Landfill Disposal | §22-15-11(a)(2) | $0.60 |
| Solid Waste Assessment Interim Fee | §22C-4-30(a)(1) | $1.00 |
| Recycling Assessment Fee | §22-15A-19(a) | $2.00 |
| Solid Waste Assessment Fee–Landfill Closure | §22-16-4(a) | $2.90 |
| Horizontal Drilling Waste Assessment Fee | §22-15-11(k) | $1.00 |

By statute, waste disposed of by commercial recyclers is only subject to the $2.00 per ton Recycling Assessment Fee levied via W. Va. Code §22-15A-19. The purpose of this reduced fee is to support and encourage recycling. By recovering valuable resources from solid waste, commercial recyclers reduce the need for landfills while extending their life. The term “commercial recyclers” refers to any person, corporation, or business entity whose operation involves mechanical separation of materials for the purpose of reselling or recycling at least 70 percent by weight of the materials coming into the commercial recycling facility.

Per W.Va. Code §22-16-4(a), the State share of the Solid Waste Assessment Fee dedicated to landfill closure assistance programs decreased from $3.50 per ton to $3.30 per ton beginning on July 1, 2021. It was further reduced by $0.20 per ton annually through July 1, 2025. The county solid waste authorities would gain these $0.20 per ton increments annually during this same period per W.Va. Code §22-15-11. Per statute, 25 percent of the additional county fee is distributed equally to each county or regional solid waste authority and 75 percent of this county fee is distributed on a per capita basis to each county or regional waste authority based on the most recent population projections from the United States Census Bureau. For purposes of this report, the table above has the current Landfill Closure Solid Waste Assessment Fee at $2.90 per ton which is effective between July 1, 2023 and June 30, 2024.

The Horizontal Drilling Waste Assessment Fee is levied upon the disposal of drill cuttings and drilling waste generated by horizontal well sites. The fee is in addition to all other solid waste fees.

The following types of waste collected at solid waste disposal facilities are exempt from all five of the Solid Waste Assessment Fees listed above:

- Waste disposed by owner, operator, or renter of waste disposal facility;
- Reused or recycled waste; and
- Residential waste disposed of by individuals on specific days.

While a statutory exemption for the waste disposed of by commercial recyclers is included in three of the four Solid Waste Assessment Fees, for purposes of this study the commercial recyclers expenditure is addressed as a reduced rate. In addition to the indicated exemptions, the fee assessed via W. Va. Code §22-16-4(a) provides an expenditure for waste disposal facilities that are required to set some of the fee aside for facility closure requirements.

**ORGANIZATION AND ANALYSIS**

This study separates the Solid Waste Assessment Fee expenditures into two groups. The groups are based on the type of expenditure or on the organization or activity involved. The two groups are as follows:

- Measurable Transactions Exempt from Fees
- Activities Subject to Reduced Rates and Deductions

Each expenditure listed in this report contains a brief rationale to explain the existence and the theory behind each expenditure.

# MEASURABLE TRANSACTIONS EXEMPT FROM FEES

The Solid Waste Assessment Fee statutes provide several exemptions that exclude specific transactions from the assessment fee. The following transactions are excluded from the appropriate fee base prior to the calculation of the amount due:

- Waste Disposed by Owner, Operator or Renter of Waste Disposal Facility
- Recycled or Reused Waste
- Residential Disposal on Specific Days

Expenditure calculations for these excluded items follow.

## WASTE DISPOSED BY OWNER, OPERATOR, OR RENTER OF WASTE DISPOSAL FACILITY

**STATUTE:** W. Va. Code §§22-15-11(e)(1), 22-16-4(e)(1), 22C-4-30(e)(1), and 22-15A-19(e)(1)

**EXEMPTION:** Disposal of solid waste at a solid waste disposal facility by the person who owns, operates, or leases the solid waste disposal facility if the facility is used exclusively to dispose of waste originally produced by such person in such person's regular business or personal activities or by persons utilizing the facility on a cost-sharing or nonprofit basis

**VALUE:** **$370,000 per year**

**Rationale**

The purpose of this exclusion is to provide some measure of relief for an operator of a waste disposal facility by not imposing a fee on waste produced by operator’s personal activity or regular business.

## RECYCLED OR REUSED WASTE

**STATUTE:** W. Va. Code §§22-15-11(e)(2), 22-16-4(e)(2), 22C-4-30(e)(2), and 22-15A-19(e)(2)

**EXEMPTION:** No fee applies to any waste that was reused or recycled

**VALUE:** **$14,000 per year**

**Rationale**

The purpose of this exclusion is to encourage reuse or recycling of solid waste.

## RESIDENTIAL DISPOSAL ON SPECIFIC DAYS

**STATUTE:** W. Va. Code §§22-15-11(e)(3), 22-16-4(e)(3), 22C-4-30(e)(3), and 22-15A-19(e)(3)

**EXEMPTION:** Disposal of residential solid waste by an individual not in the business of hauling or disposing of solid waste on such days and times as designated by the director

**VALUE:** **$30,000 per year**

### Rationale

This exclusion encourages individuals to dispose of larger items or accumulated refuse without having to pay any additional waste removal fee.

## ACTIVITY SUBJECT TO REDUCED RATES AND DEDUCTIONS

The Solid Waste Assessment Fee expenditure related to reduced rates and deductions is as follows:

- Solid Waste Disposed by Commercial Recycler

An analysis of this expenditure follows.

### SOLID WASTE DISPOSED BY COMMERCIAL RECYCLER

**STATUTE:** W. Va. Code §§22-15-11(e)(4), 22-16-4(e)(4), and 22C-4-30(e)(4)

**EXEMPTION:** Disposal of solid waste at a solid waste disposal facility by a commercial recycler which disposes thirty percent or less of the total waste it processes for recycling. The rate is two dollars per ton for any commercial recycler that is eligible for this reduction.

**VALUE:** **$230,000 per year**

**Rationale**

The purpose of this reduction is to support and encourage recycling. By recovering valuable resources from solid waste, commercial recyclers reduce the need for landfills while extending their life.

# BUSINESS REGISTRATION TAX

## OVERVIEW

The Business Registration Tax is a license fee required prior to starting business operations in West Virginia. The tax was originally enacted in 1970 as the "Business Franchise Registration Tax" to replace both the General License Tax and the Store Tax. In 1986, the name was changed to the Business Registration Tax to avoid confusion with the Business Franchise Tax, a tax on the net worth of businesses. In Fiscal Year 2023, Business Registration Tax collections totaled $1.01 million. All Business Registration Tax Certificates issued for periods beginning on or after July 1, 2010 are permanent unless suspended or revoked for cause or cancelled by the holder of the certificate.

## ESTIMATING COSTS OF TAX EXPENDITURES

The values of the expenditures contained within this section were determined from a variety of sources. In many cases, internal State Tax Department data was used to calculate a value for the expenditure. In other cases, the information to calculate an expenditure value was not readily available to the Department.

## ORGANIZATION AND ANALYSIS

This study separates the Business Registration Tax expenditures into four groups based on statutory language. The expenditure groups are listed below:

- Activities Excluded from Definition of Business Activity
- Activities Exempt from Registration
- Activities Not Requiring Business Registration Certificate
- Activities Exempt from Payment of Tax

Each expenditure listed in this section contains a brief rationale for the existence of the expenditure. Legislative documentation on why a particular tax expenditure was enacted is generally not available. Thus, the rationales herein are based solely on the experience of the State Tax Department.

# ACTIVITIES EXCLUDED FROM DEFINITION OF BUSINESS ACTIVITY

The following activities are excluded from the definition of business activity and are thus excluded from taxation under Business Registration Tax statutes:

- Sales of Property Directed by or Conducted by Governmental Agencies
- The Conduct of Charitable Bingo or Raffle
- Horse or Dog Race Meeting Activities and Associated Services
- Occasional or Casual Sales of Property or Services

An analysis of these exclusions follows.

## SALES OF PROPERTY DIRECTED BY OR CONDUCTED BY GOVERNMENTAL AGENCIES

**STATUTE:** W. Va. Code §§11-12-2(b)(2)(A) and 11-12-2(b)(2)(B)

**EXCLUSION:** "Business activity" shall not include:

- Judicial sales directed by law or court order (§11-12-2(b)(2)(A))
- Sales for delinquent taxes of real or personal property (§11-12-2(b)(2)(B))

**VALUE:** **Minimal**

### Rationale

Judicial sales directed by law or court order are predominantly of two types. The first type involves the sale of property owned by persons claiming bankruptcy while the second type involves the sale of confiscated property. The confiscated property generally results from its use in criminal activities or due to outstanding tax liabilities, not including outstanding property tax liabilities. While one could construe these sales as satisfying the "revenue-generating" and "gain or economic benefit" clauses in the definition of "business activity," the intent of the sales is generally otherwise. These sales are presumably excluded since the purpose of the sale is generally not for economic gain by the entity conducting the sale. The proceeds of sales resulting from bankruptcy proceedings are, in part, distributed to the creditors of the company claiming bankruptcy protection. However, the revenue received by the creditors from these sales is usually only a fraction of the amount due. In these cases, the sales reduce the "economic loss" of the creditors. Sales of property seized due to outstanding tax liabilities are generally applied to reduce the amount due. The sale of property seized due to criminal activity is made to reduce the economic gain of the criminal activity.

The sales of real or personal property for delinquent taxes are generally made by county sheriffs and the State. This exclusion exists in recognition that the entities making the sales are not businesses.

## THE CONDUCT OF CHARITABLE BINGO OR RAFFLE

**STATUTE:** W. Va. Code §§11-12-2(b)(2)(C) and 11-12-2(b)(2)(D)

**EXCLUSION:** "Business activity" shall not include:

- The conduct of charitable bingo by any person licensed under W. Va. Code §47-20-1 et seq. (§11-12-2(b)(2)(C))
- The conduct of a charitable raffle by any person (§11-12-2(b)(2)(D))

**VALUE:** **Minimal**

### Rationale

Tax-exempt charitable and public service organizations conducting bingo games are required to complete a separate application to obtain a license to conduct bingo games. Similarly, charitable and public service organizations, including the West Virginia State Fair Board, qualified to conduct raffles are required to file for a raffle license. Organizations conducting charitable bingo or raffles are excluded from the Business Registration Tax due to their filing and paying a separate license fee.

### Revenue Analysis

While some organizations conduct bingo games or raffles on a regular basis, there are licenses available for limited occasion use. The organizations conducting bingo or raffles on a limited occasion license could presumably qualify for the exclusion provided for occasional or casual sales of property or services. Many of the organizations conducting bingo or raffles are charitable organizations and would be exempt from payment of the tax due to their nonprofit status.

## HORSE OR DOG RACE MEETING ACTIVITIES AND ASSOCIATED SERVICES

**STATUTE:** W. Va. Code §§11-12-2(b)(2)(E), 11-12-2(b)(2)(F), 11-12-2(b)(2)(G), and 11-12-2(b)(2)(H)

**EXCLUSION:** "Business activity" shall not include:

- The conduct of a horse or dog race meeting by any racing association licensed under W. Va. Code §19-23-1 et seq. (§11-12-2(b)(2)(E))
- The operation or maintenance of the pari-mutuel system of wagering during the conduct of a licensed horse or dog race meeting (§11-12-2(b)(2)(F))
- The sale of any commodity during the conduct of a licensed horse or dog meeting (§11-12-2(b)(2)(G))
- The services of owners, trainers or jockeys which are essential to the effective conduct a licensed horse or dog meeting (§11-12-2(b)(2)(H))

**VALUE:** **Minimal**

### Rationale

W. Va. Code §19-23-1 requires all associations conducting horse or dog race meetings for any purse to possess a license from the West Virginia Racing Commission. The exclusion for the conduct of a horse or dog race meeting that involves a purse exists in recognition of the separate licensing requirements for such activities.

The exclusion concerning the operation or maintenance of the pari-mutuel wagering system presumably exists due to an interpretation that this activity requires a separate license from the West Virginia Racing Commission. The interpretation that a separate license is required may be the result of the language in the West Virginia Code pertaining to horse or dog racing.

A segment of W. Va. Code §19-23-12 reads in part "nor shall there be, hereafter, any imposition of tax pursuant to articles twelve, thirteen or fifteen of chapter eleven of this code on the income or receipts of owners, trainers or jockeys directly arising from their services which are essential to the effective conduct of a horse or dog race meeting." Additionally, W. Va. Code §19-23-12 precludes the taxation of the sale of any commodities during a horse or dog race meeting.

### Revenue Analysis

Repeal of the exclusions relating to horse and dog racing meetings would result in no revenue gain for the State. W. Va. Code §19-23-12 reads in part, "The license tax imposed in section ten [W. Va. Code §19-23-10] of this article shall be in lieu of all other license, income, excise, special or franchise taxes of this State, and no county or municipality or other political subdivision of this State shall be empowered to levy or impose any license, income, pari-mutuel, excise, special or franchise tax on any racing association engaged in the business of conducting a horse or dog race meeting at which horse or dog races are run for purses under the jurisdiction of and being licensed by the racing commission, or on the operation or maintenance of the pari-mutuel system of wagering, or on the sale of any commodity during a horse or dog race meeting at which horse

or dog races are run, or at any such horse or dog racetrack…" While the removal of this expenditure might subject activities coincidental to the conduct of horse or dog race meetings to the registration requirements of the Business Registration Tax, the above statement precludes the assessment of any tax.

In some cases, a business that conducts horse or dog race meetings may also be engaged in other business activity at the same location. This other business activity would be subject to the Business Registration Tax. Since the tax is based on the location of the business and not the activities, businesses already paying the tax would continue to pay if the exclusion stated above is repealed. In this case, State revenue would not change due to the repeal of the exclusion.

While the repeal of this expenditure may subject the owners, trainers and jockeys to the registration requirements of W. Va. Code §11-12-1 et seq., the imposition of the tax is precluded as stated above.

## OCCASIONAL OR CASUAL SALES OF PROPERTY OR SERVICES

**STATUTE:** W. Va. Code §11-12-2(b)(2)(I)

**EXCLUSION:** "Business activity" shall not include occasional or casual sales of property or services

**VALUE:** **Minimal**

### Rationale

Regulations specify occasional or casual sales as those occurring not more than four times a year. The sale of outgrown or unneeded items by individuals through yard sales, bulletin boards, or classified advertisements is often undertaken less than five times in a year. This expenditure exists because of the administrative difficulties of registering every individual conducting occasional or casual sales.

# ACTIVITIES EXEMPT FROM REGISTRATION

The only businesses exempt from registering for the Business Registration Tax are those persons not required to collect or withhold a tax administered under W. Va. Code §11-10-1 et seq. An analysis of this exemption follows.

## PERSONS NOT REQUIRED TO COLLECT OR WITHHOLD TAX

**STATUTE:** W. Va. Code §11-12-3(c)

**EXCLUSION:** Persons engaging in business activity in West Virginia who are not required by law to collect or withhold a tax administered under W. Va. Code §11-10-1 et seq. and who do not claim exemption from payment of taxes imposed by articles fifteen and fifteen-a of the West Virginia Code shall be exempt from both registration and payment of the tax imposed by article twelve if such person had gross income from business activity of $4,000 or less during that person's tax year for income tax purposes immediately preceding the registration period for which a registration certificate is otherwise required

**VALUE:** **Minimal**

### Rationale

The restrictions stated in this exemption applying to persons not required to collect or withhold a tax administered by W. Va. Code §11-10-1 et seq. severely limits the application of the exemption. Since Article 10, relating to tax procedure and administration, of the West Virginia Code applies to the Consumers Sales Tax and the Personal Income Tax, the exemption is limited to persons with no sales or only exempt sales and no employees. Additionally, the limit on gross income from business activity of $4,000 or less would limit application of the exemption.

This exemption presumably exists in recognition that persons satisfying the above-cited restrictions do not meet the “purposeful revenue-generating activity” clause in the definition of “business activity” stated in W. Va. Code §11-12-2(b)(2).

# ACTIVITIES NOT REQUIRING A BUSINESS REGISTRATION CERTIFICATE

The Business Registration Tax statutes provide several activities with an exemption from obtaining the Business Registration Certificate required of most other businesses. The following exempted activities are discussed in this section:

- Individual Coin-Operated Machines
- Licensed Employment Agencies, Collection Agencies, and Drug Paraphernalia Businesses Whose Only Activity At The Business Location Is That for Which an Employment Agency License or a Collection Agency License or License to Sell Drug Paraphernalia Was Issued

Expenditure calculations for these exempt business activities follow.

## INDIVIDUAL COIN-OPERATED MACHINES

**STATUTE:** W. Va. Code §11-12-3(b)(2)

**EXEMPTION:** A separate business registration certificate is not required for each coin-operated machine. A separate certificate is required for each location from which making coin-operated machines available to the public is itself a business activity

**VALUE:** **Minimal**

### Rationale

The coin-operated machine exemption exists to recognize that the activity of making coin-operated machines available, rather than operating the individual machines, is the “business activity” subject to the Business Registration Tax.

## EMPLOYMENT AGENCIES, COLLECTION AGENCIES, AND DRUG PARAPHERNALIA BUSINESSES WHOSE ONLY ACTIVITY AT THE BUSINESS LOCATION IS THAT FOR WHICH AN EMPLOYMENT AGENCY LICENSE OR A COLLECTION AGENCY LICENSE OR LICENSE TO SELL DRUG PARAPHERNALIA WAS ISSUED

**STATUTE:** W. Va. Code §11-12-3(b)(4)

**EXEMPTION:** Persons engaging in purposeful revenue generating activity for which an employment agency license or collection agency license or a license to sell drug paraphernalia is required and no other business activity is conducted by that person at each business location for which the employment agency license or collection agency license or license to sell drug paraphernalia is issued, then only that license is required for each such activity conducted by the licensee at each business location

**VALUE:** **Minimal**

### Rationale

Employment agencies, collection agencies, and businesses selling drug paraphernalia each have their own licensing requirements. The exemption exists to avoid the duplication of licensing and registration under the Business Registration Tax and the licensing and registration required in other parts of the West Virginia Code.

### Revenue Analysis

This exemption has minimal impact on revenue. As noted in the statement of the expenditure, the portion of the exemption available to employment agencies, collection agencies, or drug paraphernalia businesses can be used if the listed activity is the **only** business activity conducted at each location. However, most of these businesses are also engaged in other activities in addition to the exempt activity. These other activities are subject to the Business Registration Tax.

# ACTIVITIES EXEMPT FROM PAYMENT OF TAX

Several groups of taxpayers who are required by law to collect or withhold taxes administered by W. Va. Code §11-10-1 et seq., or who claim exemption from payment of Consumers Sales and Service Tax and Use Tax are exempt from payment of the one-time $30 Business Registration Tax. However, these taxpayers **are required** to obtain a business registration certificate. The groups exempt from payment of the Business Registration Tax are as follows:

- Persons with Limited Business Activity or Nexus
- Governmental Agencies or Instrumentalities
- Persons Engaged in Agriculture and Farming

An analysis of these expenditures follows.

## PERSONS WITH LIMITED BUSINESS ACTIVITY OR NEXUS

**STATUTE:** W. Va. Code §§11-12-3(d)(1), 11-12-3(d)(2), and 11-12-3(d)(6)

**EXCLUSION:** A person who had gross income from business activity of $4,000 or less during that person's tax year for State income tax purposes immediately preceding the registration period for which a registration certificate is required is exempt from payment of the tax (§11-123(d)(1))

An organization which qualifies, or would qualify, for exemption from federal income taxes under section 501 of the Internal Revenue Code of 1986 are exempt from payment of the tax (§11-12-3(d)(2))

A foreign retailer who is not a “retailer engaging in business in West Virginia” as defined in W. Va. Code §11-15A-1 who enters into an agreement with the State Tax Commissioner to voluntarily collect and remit Use Tax on sales to West Virginia customers is exempt from payment of the tax (§11-12-3(d)(6))

**VALUE:** **$10,000 per year**

### Rationale

For persons with business gross income of $4,000 or less, the exemption presumably exists to reduce the cost of operating a business. The “purposeful revenue-generating activity” of these businesses is a marginal activity.

Prior to 1986, occasional sales by societies acting for charitable, religious, or benevolent purposes were excluded from the definition of “business” and therefore were exempt from registration. Under current law, these organizations must obtain a license but are exempt from payment. These businesses, which include charitable and religious organizations, are usually exempt from taxes, presumably in recognition of the benevolent services these groups provide.

While engaging in “business activity,” foreign retailers are not always engaged in such activity within the borders of West Virginia. This expenditure exists in recognition of the lack of “West Virginia tax nexus” for these businesses.

## GOVERNMENTAL AGENCIES OR INSTRUMENTALITIES

**STATUTE:** W. Va. Code §§11-12-3(d)(3) and 11-12-3(d)(4)

**EXEMPTION:** The State of West Virginia, or a political subdivision thereof, selling tangible personal property, admissions or services, when those activities compete with or may compete with the activities of another person are exempt from payment of the tax (§11-12-3(d)(3))

The United States, or an agency or instrumentality thereof, which is exempt from taxation by the states is exempt from payment of the tax (§11-12-3(d)(4))

**VALUE:** **Minimal**

### Rationale

The payment of the Business Registration Tax by the State and its political subdivisions would increase the cost of governmental services and the taxes and fees used to fund the services. Payment of the tax would generally result in a transfer of local government revenue to the State. The exemption thus exists to reduce the cost of governmental services and the transfer of local revenue to the State.

The exemption from payment of the Business Registration Tax by the United States and its agencies and instrumentalities is required by the federal supremacy clause in the United States Constitution. This exemption from payment of the tax is **not** an expenditure since states are prohibited from levying direct taxes upon the United States government.

## PERSONS ENGAGED IN AGRICULTURE AND FARMING

**STATUTE:** W. Va. Code §11-12-3(d)(5)

**EXEMPTION:** A person engaged in the business of agriculture and farming is exempt from payment of the tax

**VALUE:** **$10,000 per year**

### Rationale

This exemption presumably exists to promote agriculture and farming. Prior to 1986, sales of products from farms, gardens, or dairies by the producers or growers were excluded from the definition of “business” and therefore were exempt from registration. Under current law, these organizations must obtain a license but are exempt from payment of the tax.

# EXCISE TAXES

# MOTOR FUEL EXCISE TAX

## OVERVIEW

The Motor Fuel Excise Tax is a combination of a flat tax and a variable tax. The flat tax rate is equal to $0.205 per invoiced gallon or, for alternative fuel, per each gasoline gallon equivalent. The variable component of the tax is the Consumers Sales and Service Tax and Use Tax, which is based on 5.0 percent of the average wholesale price of motor fuels as determined by the State Tax Commissioner. Each January 1, the State Tax Commissioner determines the average wholesale price for the annual period based on price and sales data gathered for the preceding period of July 1 through October 31 and publishes the information in an Administrative Notice.[2] Motor Fuel Excise Tax rates in effect for January 1, 2023 through December 31, 2023 are reflected in the following table.

**Motor Fuel Excise Tax Rates as of January 1, 2023**

| Motor Fuel | Flat Rate Tax | Variable Rate Tax | Combined Rate |
|---|---|---|---|
| Conventional Motor Fuels* | $0.205 per gallon | $0.167 per gallon | $0.372 per gallon |
| Compressed Natural Gas (CNG) | $1.618 per 1,000 cubic feet | $0.621 per 1,000 cubic feet | $2.239 per 1,000 cubic feet |
| Compressed Natural Gas (CNG) – GGE Measure | $0.205 per 126.67 cubic feet | $0.079 per 126.67 cubic feet | $0.284 per 126.67 cubic feet |
| Liquefied Natural Gas (LNG) | $0.132 per gallon | $0.051 per gallon | $0.183 per gallon |
| Liquefied Petroleum Gas (LPG or Propane) | $0.150 per gallon | $0.060 per gallon | $0.210 per gallon |
| Field Gas | Exempt per W.Va. Code §11-14C-9a | | |

* Conventional Motor Fuels include Gasoline, Diesel, Kerosene, etc. unless otherwise noted.

The Use Tax is based on the percentage of carrier operations in West Virginia. The relevant percentage is the proportion of West Virginia miles compared with the total miles traveled within and without West Virginia. Consumers Sales and Service Tax will be included in the price of fuel purchased in West Virginia and can offset the Use Tax.

The Motor Fuel Excise Tax is imposed at the time motor fuel is imported into West Virginia, other than by a bulk transfer and is measured by invoiced gallons received outside this State at a refinery, terminal, or bulk plant for delivery to a destination in West Virginia. The tax is payable by the person importing the motor fuel. The tax is also imposed on invoiced gallons of motor fuel removed, other than by bulk transfer:

- From the bulk transfer/terminal system in West Virginia;
- From the bulk transfer/terminal system outside West Virginia for delivery to a location in West Virginia as represented on the shipping papers; or

[2] Administrative notices for current and prior periods can be found on the State Tax Department webpage: http://tax.wv.gov/TaxProfessionals/AdministrativeNotices/Pages/AdministrativeNotices2022.aspx.

- Upon sale or transfer in a terminal or refinery in West Virginia to any person not holding a supplier's license.

The tax does not apply to motor fuel imported into West Virginia in the motor fuel supply tank or tanks of a motor vehicle, but the Motor Carrier Road Tax may still apply. Tax applies to fuel blended in West Virginia and is calculated on the difference between the total quantity blended and the quantity used for blending but previously taxed.

There are several exemptions from the excise tax on gasoline and special fuel. Certain exemptions are an integral part of the "normal" tax base and are not considered true expenditures. These include gasoline or special fuel used for off-highway purposes and gasoline or special fuel exported out of the State. Also included in the "normal" tax base are federally mandated exemptions. These include sales to the United States government and interstate motor carriers.

**ORGANIZATION AND ANALYSIS**

Motor Fuel Excise Tax expenditures are divided into two groups:

- Exemptions
- Deductions and Discounts

The analysis provided for each tax expenditure includes a rationale for each item and the item's cost to the State.

# EXEMPTIONS

Exemptions from the Motor Fuel Excise Tax are allowed depending upon the use of the fuel. The following exemptions are discussed in this section:

- Gasoline or Special Fuel Exported Out of State
- Sales of Aviation Fuel
- Sales of Dyed Special Fuel
- Sales of Propane
- Sales to the United States Government
- Sales to County Boards of Education
- Sales to Municipalities, Urban Mass Transportation Authorities, Units of County Government, and Volunteer Fire Departments
- Sales to Licensed Exporters
- Sales to Urban and Suburban Bus Lines
- Sales of Propane to Consumers for Poultry House Heating Purposes
- Certain Off-Highway Uses
- Sales of Motor Fuel for Use or Consumed in Railroad Diesel Locomotives
- Erroneously Collected Taxes
- Motor Fuel Lost through Fire, Lightning, Breakage, Flood, or Other Casualty
- Motor Fuel Lost through Evaporation

An analysis of these exemptions follows.

## GASOLINE OR SPECIAL FUEL EXPORTED OUT OF STATE

**STATUTE:** W. Va. Code §§11-14C-9(a)(1) and 11-14C-9(b)

**EXEMPTION:** All motor fuel exported from this State to any other state or nation

**VALUE:** **Not available**

### Rationale

The purpose of this per se exemption from both the flat rate component and the variable rate component is to exclude from taxation motor fuel not sold or used within this State. This is **not** a true tax expenditure. It is inherent in the structure of the Motor Fuel Excise Tax that only fuel sold and used in West Virginia is taxable.

## SALES OF AVIATION FUEL

**STATUTE:** W. Va. Code §11-14C-9(a)(2)

**EXEMPTION:** All sales of aviation fuel

**VALUE:** **$1.7 million per year**

### Rationale

This per se exemption from the flat rate component of tax is **not** considered a tax expenditure. As part of the "normal" tax base, certain off-highway uses of motor fuel are exempt from taxation. It is inherent in the structure of the Motor Fuel Excise Tax that only fuel used on the highways of West Virginia is taxable under the flat rate.

## SALES OF DYED SPECIAL FUEL

**STATUTE:** W. Va. Code §11-14C-9(a)(3)

**EXEMPTION:** All sales of dyed special fuel

**VALUE:** **$46.1 million per year**

### Rationale

This per se exemption from the flat rate component of tax is **not** considered a tax expenditure. As part of the "normal" tax base, certain off-highway uses of motor fuel are exempt from taxation. It is inherent in the structure of the Motor Fuel Excise Tax that only fuel used on the highways of West Virginia is taxable. "Dyed diesel fuel" is defined in the W. Va. Code §11-14C-2(31) as, "... diesel fuel that meets the dyeing and marking requirements of section 4082, Title 26, United States Code, regardless of how the diesel fuel was dyed."

## SALES OF PROPANE

**STATUTE:** W. Va. Code §11-14C-9(a)(4)

**EXEMPTION:** All sales of propane for off-highway purposes

**VALUE:** **$7.4 million per year**

### Rationale

This per se exemption from the flat rate component of tax is **not** considered a tax expenditure. As part of the "normal" tax base, certain off-highway uses of motor fuel are exempt from taxation. It is inherent in the structure of the Motor Fuel Excise Tax that only fuel used on the highways of West Virginia is taxable under the flat rate.

### Revenue Analysis

Effective January 1, 2014, the flat rate tax for propane and other alternative fuels was required to be calculated based on their gasoline gallon equivalent. The determined gasoline gallon equivalent for propane is 1.367. This change reduced the flat rate tax on propane from $0.205 per gallon to $0.15 per gallon.

## SALES TO THE UNITED STATES GOVERNMENT

**STATUTE:** W. Va. Code §§11-14C-9(c)(1) and 11-14C-9(d)(1)

**EXEMPTION:** All gallons of motor fuel sold to and purchased by the United States or any agency thereof

**VALUE:** **$540,000 per year**

### Rationale

This refundable exemption from both the flat rate component and the variable rate component of tax is mandated by federal law and, therefore, is **not** considered a tax expenditure.

## SALES TO COUNTY BOARDS OF EDUCATION

**STATUTE:** W. Va. Code §§11-14C-9(c)(4) and 11-14C-9(d)(5)

**EXEMPTION:** All gallons of motor fuel sold to and purchased by any county boards of education

**VALUE:** **$2.1 million per year**

### Rationale

This refundable exemption from both the flat rate component and the variable rate component presumably exists to benefit West Virginia public school children and to reduce costs to public school systems in the State.

### Revenue Analysis

The value presented for this expenditure is based on the amount of fuel used in school buses operated on behalf of county boards of education. Fuel used in public school buses is also exempt from the Motor Carrier Road Tax.

## SALES TO MUNICIPALITIES, URBAN MASS TRANSPORTATION AUTHORITIES, UNITS OF COUNTY GOVERNMENT, AND VOLUNTEER FIRE DEPARTMENTS

**STATUTE:** W. Va. Code §§11-14C-9(c)(2) and 11-14C-9(d)(3); 11-14C-9(c)(3) and 11-14C-9(d)(4); 11-14C-9(c)(5) and 11-14C-9(d)(6); 11-14C-9(c)(6) and 11-14C-9(d)(7); and 11-14C-9(c)(18) and 11-14C-9(d)(8)

**EXEMPTION:** All gallons of motor fuel sold to any county government or agency thereof (§§11-14C-9(c)(2) and 11-14C-9(d)(3))

All gallons of motor fuel sold to any municipal government or agency thereof (§§11-14C-9(c)(3) and 11-14C-9(d)(4))

All gallons of motor fuel sold to any urban mass transportation authority, created pursuant to the provisions of article twenty-seven, chapter eight of this code (§§11-14C-9(c)(5) and 11-14C-9(d)(6))

All gallons of motor fuel sold to and purchased by any municipal, county, state, or federal civil defense or emergency service program pursuant to a government contract for use in conjunction therewith (§§11-14C-9(c)(6) and 11-14C-9(d)(7))

All gallons of motor fuel sold to and purchased by any bona fide volunteer fire department, nonprofit ambulance service or emergency rescue service (§§11-14C-9(c)(18) and 11-14C-9(d)(8))

**VALUE:** **$3.0 million per year**

### Rationale

This refundable exemption from both the flat rate component and the variable rate component of the tax for sales to any municipal, county, State or federal civil defense or emergency service program, or urban mass transportation system exists because these items are made available for the convenience and welfare of the citizens of West Virginia. The refundable exemptions for sales of fuel to municipalities and units of county governments presumably exist to reduce costs to these entities, thereby benefiting the citizens of West Virginia.

## SALES TO LICENSED EXPORTERS

**STATUTE:** W. Va. Code §§11-14C-9(c)(7) and 11-14C-9(d)(9)

**EXEMPTION:** All invoiced gallons of motor fuel purchased by a licensed exporter and subsequently exported from this state to any other state or nation: Provided, that the exporter has paid the applicable motor fuel tax to the destination state or nation prior to claiming this refund

**VALUE:** **$8.7 million per year**

**Rationale**

The purpose of this refundable exemption from both the flat rate component and the variable rate component is to exclude from taxation motor fuel not sold or used within this State. This is **not** a true tax expenditure. It is inherent in the structure of the Motor Fuel Excise Tax that only fuel sold and used on the highways of West Virginia is taxable.

## SALES TO URBAN AND SUBURBAN BUS LINES

**STATUTE:** W. Va. Code §11-14C-9(c)(17)

**EXEMPTION:** All gallons of motor fuel sold to any person regularly operating any vehicle under a certificate of public convenience and necessity or under a contract carrier permit for transportation of persons when purchased in an amount of twenty-five gallons or more; Provided, that the amount refunded is equal to six cents per gallon; Provided, however, that the gallons of motor fuel have been consumed in the operation of urban and suburban bus lines and the majority of passengers use the bus for traveling a distance not exceeding forty miles, measured one way, on the same day between their places of abode and their places of work, shopping areas or schools

**VALUE:** **Minimal**

**Rationale**

This refundable exemption from the flat rate component of the tax is made available for the convenience and welfare of the citizens of West Virginia.

## SALES OF PROPANE TO CONSUMERS FOR POULTRY HOUSE HEATING PURPOSES

**STATUTE:** W. Va. Code §11-15-9(a)(18)

**EXEMPTION:** Sales of propane to consumers for poultry house heating purposes

**VALUE:** **$200,000 per year**

### Rationale

This refundable exemption from the variable rate component of tax for sales of propane to consumers to heat poultry houses presumably exists to promote the poultry industry in West Virginia.

## CERTAIN OFF-HIGHWAY USES

**STATUTE:** W. Va. Code §§11-14C-9(c)(8), 11-14C-9(c)(9), 11-14C-9(c)(10), 11-14C-9(c)(11), 11-14C-9(c)(12), 11-14C-9(c)(13), 11-14C-9(c)(14), 11-14C-9(c)(15), and 11-14C-9(c)(16)

**EXEMPTION:** All gallons of gasoline or special fuel used and consumed in stationary off highway turbine engines (§11-14C-9(c)(8))

All gallons of special fuel for heating any public or private dwelling, building or other premises (§11-14C-9(c)(9))

All gallons of special fuel for boilers (§11-14C-9(c)(10))

All gallons of gasoline or special fuel used as a dry-cleaning solvent or commercial or industrial solvent (§11-14C-9(c)(11))

All gallons of gasoline or special fuel used as lubricants, ingredients or components of any manufactured product or component (§11-14C9(c)(12))
All gallons of gasoline or special fuel sold for use or used as a fuel for commercial watercraft (§11-14C-9(c)(13))

All gallons of special fuel sold for use or consumed in railroad diesel locomotives (§11-14C-9(c)(14))

All gallons of motor fuel purchased in quantities of twenty-five gallons or more for use as a motor fuel for internal combustion engines not operated upon highways of this state (§11-14C-9(c)(15))

All gallons of motor fuel purchased in quantities of twenty-five gallons or more and used to power a power take-off unit on a motor vehicle (§11-14C-9(c)(16))

**VALUE:** **$54.5 million per year**

### Rationale

As part of the “normal” tax base, certain off-highway uses of motor fuel are exempt from taxation. It is inherent in the structure of the flat rate of the Motor Fuel Excise Tax that only fuel used on the highways of West Virginia is taxable. Fuel purchased for use in any of the above circumstances is entitled to a refundable exemption from the flat rate component of the Motor Fuel Excise Tax.

## SALES OF MOTOR FUEL FOR USE OR CONSUMED IN RAILROAD DIESEL LOCOMOTIVES

**STATUTE:** W. Va. Code §11-14C-9(d)(10)

**EXEMPTION:** Sales of motor fuel for use in Railroad Diesel Locomotives

**VALUE:** **$4.3 million per year**

### Rationale

This refundable exemption from the variable rate component of tax of motor fuel sold for use or consumed in railroad diesel locomotives presumably exists to promote the railroad industry in West Virginia.

### Revenue Analysis

By statute, the value of the exemption for all claimants is capped at $4.3 million per year.

## ERRONEOUSLY COLLECTED TAXES

**STATUTE:** W. Va. Code §11-14C-30(a)

**REFUND:** Refund of motor fuel taxes erroneously collected from any person, including any tax, interest, additions to tax, or penalties

**VALUE:** **Not available**

### Rationale

This refund exists to protect the taxpayer and to enable the taxpayer to reclaim taxes that should not have been paid.

## MOTOR FUEL LOST THROUGH FIRE, LIGHTNING, BREAKAGE, FLOOD, OR OTHER CASUALTY

**STATUTE:** W. Va. Code §11-14C-30(b)

**REFUND:** Refund of any invoiced gallons of motor fuel lost through fire, lightning, breakage, flood or other casualty by any supplier, distributor, producer, retail dealer, exporter or importer equal to the amount of the flat rate component of the tax

**VALUE:** **Minimal**

### Rationale

A refund for the flat rate of tax paid on invoiced gallons of motor fuel lost through fire, lightning, breakage, flood, or other casualty exists as part of the “normal” tax base. Tax should not be paid on motor fuel that is destroyed and cannot be sold or used. This exemption was expanded to include the variable rate component effective beginning with tax year 2020.

### Revenue Analysis

The amount of this exemption has been smaller in recent years due to technological improvements in the equipment used to store and haul motor fuel. There have also been improvements in preventing and managing accidents or other casualties involving the handling of motor fuel.

## MOTOR FUEL LOST THROUGH EVAPORATION

**STATUTE:** W. Va. Code §11-14C-30(c)

**REFUND:** Annual refund of the flat rate component of tax to retail dealers, and any bulk plant, for invoiced gallons of motor fuel lost through evaporation, not exceeding one-half of one percent of adjusted total accountable gallons

**VALUE:** **$80,000 per year**

### Rationale

A refund for motor fuel lost through evaporation exists as part of the "normal" tax base because tax should not be paid on gasoline or special fuel that is lost and cannot be sold or used. This exemption was expanded to include the variable rate component effective beginning with tax year 2020.

# DEDUCTIONS AND DISCOUNTS

Deductions and discounts from the Motor Fuel Excise Tax are allowed for the following reasons:

- Default Payments
- Administrative Discount for Suppliers
- Deduction for Sales to Distributors
- Tax Rate Decrease

An analysis of these discounts and deductions follows.

## DEFAULT PAYMENTS

**STATUTE:** W. Va. Code §11-14C-23(a)

**DISCOUNT:** Deduction for motor fuel taxes not remitted by any licensed distributor or importer to a supplier

**VALUE:** **$0 per year**

### Rationale

This deduction exists to protect suppliers from distributors who default on payments owed to the supplier.

## ADMINISTRATIVE DISCOUNT FOR SUPPLIERS

**STATUTE:** W. Va. Code §11-14C-23(b)

**DISCOUNT:** A supplier or permissive supplier who timely files a return with the payment may deduct an administrative discount of one tenth of one percent of the amount of tax payable to this state, not to exceed five thousand dollars per month

**VALUE:** **$315,000 per year**

### Rationale

This discount presumably exists as an incentive to suppliers to timely file their tax-due returns.

## DEDUCTION FOR SALES TO DISTRIBUTORS

**STATUTE:** W. Va. Code §11-14C-23(c)

**DISCOUNT:** For sales to licensed distributors, a supplier or permissive supplier shall deduct three fourths of one percent of the tax due from the licensed distributor as a discount to the licensed distributor

**VALUE:** **$2.0 million per year**

### Rationale

This deduction exists to provide a discount to licensed distributors. It does not apply to any other transactions, including, but not limited to, licensed distributor to licensed distributor transactions. Additionally, if the permissive supplier and/or supplier is also a licensed distributor, this discount does not apply.

## TAX RATE DECREASE

**STATUTE:** W. Va. Code §11-14C-30(d)

**EXEMPTION:** Refund of the flat rate component of tax paid resulting from a change of rate decreasing the tax on motor fuel, which is on hand and in inventory on the effective date of the rate change

**VALUE:** **$0 per year**

### Rationale

This refund of the flat rate component of tax exists to protect the taxpayer and to enable the taxpayer to reclaim an overpayment of taxes.

### Revenue Analysis

There have been no refunds because the flat tax rate component has not changed since enactment of the Motor Fuel Excise Tax Act in 2003.

# MOTOR CARRIER ROAD TAX

## OVERVIEW

The Motor Carrier Road Tax is a tax on every person or firm who operates any passenger vehicle that has seats for more than nine passengers, in addition to the driver, and any road tractor, tractor truck or truck that has more than two axles. The tax is closely related to the Motor Fuel Excise Tax. The rate of tax for motor carriers is the same as the flat rate component of the Motor Fuel Excise Tax (i.e., 20.5 cents per gallon). When motor carriers operate in interstate commerce, tax computation is accomplished by basing Motor Carrier Road Tax liability on the fraction of the total amount of motor fuel that is the same fraction that the miles traveled by the carrier on West Virginia highways is of the total number of miles traveled by the carrier in all states.

Interstate motor carriers must obtain an International Fuel Tax Agreement (IFTA) license. All West Virginia-based motor carriers who travel in at least one other IFTA jurisdiction and operate one or more qualified vehicles must obtain an IFTA license. All West Virginia-based IFTA licensees must file a single tax return with the West Virginia State Tax Department. This tax return will contain detailed information about vehicle operations in each IFTA member jurisdiction. West Virginia then distributes both the tax and the carrier information to the other IFTA jurisdictions on behalf of the carrier. West Virginia receives its portion of gasoline taxes due from motor carriers based in other IFTA jurisdictions from the carrier's home jurisdiction. If a motor carrier does not operate in any other IFTA jurisdiction, the motor carrier must file the Motor Carrier Road Tax return for tax due to West Virginia and file returns as required by other non-IFTA jurisdictions in which the carrier traveled. More specific information can be found in the separate International Fuel Tax Agreement section.

The Motor Carrier Road Tax was created as a tax on motor carriers operating upon the highways of West Virginia. Collections of the Motor Carrier Road Tax are deposited into the State Road Fund and used only for the following purposes: construction, reconstruction, maintenance and repair of highways; matching of federal funds available for highway purposes, and payment of the interest and sinking fund obligations on State bonds issued for highway purposes. Unless necessary for bond requirements, five-fourteenths of the tax shall be used for federal and State-local service highway purposes.

Certain exemptions are an integral part of the “normal” tax base for motor carriers and are not considered true tax expenditures. These include an exemption for gasoline or special fuel purchased in this State but consumed out of the State and a credit for the Motor Fuel Excise Tax paid to avoid double taxation. Also included in the “normal” tax structure are federally mandated exemptions. The federally mandated exemptions are not considered expenditures in this study since they are excluded from state taxation by federal law.

## ORGANIZATION AND ANALYSIS

Motor Carrier Road Tax expenditures are divided into three groups:

- Exemptions
- Refunds
- Credit

The analysis provided for each tax expenditure includes a rationale for each item and the item’s cost to the State.

# EXEMPTIONS

Exemptions from the Motor Carrier Road Tax are allowed depending upon the use of the fuel. The following exemptions are discussed in this section:

- Motor Carriers Operated on Behalf of the Federal Government or any State Government
- Private and State School Buses

An analysis of these exemptions follows.

## MOTOR CARRIERS OPERATED ON BEHALF OF THE FEDERAL GOVERNMENT OR ANY STATE GOVERNMENT

**STATUTE:** W. Va. Code §11-14A-8

**EXEMPTION:** Motor carriers operated on behalf of any agency of the federal government, any state government or political subdivision of any state

**VALUE:** **Not available**

### Rationale

States are prohibited from taxing purchases of motor fuel for use in vehicles operated on behalf of the federal government. Therefore, this portion of the exemption is **not** considered a true tax expenditure. Motor carriers operated on behalf of any state government are also exempt from taxation to avoid increased costs for those entities.

## PRIVATE AND STATE SCHOOL BUSES

**STATUTE:** W. Va. Code §11-14A-8

**EXEMPTION:** School buses operated on behalf of any private school and operated on behalf of this State or any of its political subdivisions

**VALUE:** **Negligible**

### Rationale

This exemption exists to benefit all West Virginia school children by reducing the operating costs of elementary and secondary schools in the State.

### Revenue Analysis

This exemption only affects school buses owned by private schools. County school buses are already exempt under an exemption from Motor Fuel Excise Tax.

# REFUNDS

A refund of the Motor Carrier Road Tax is only available for fuel consumed outside of this State. An analysis of this refund follows.

## FUEL CONSUMED OUTSIDE OF THIS STATE

**STATUTE:** W. Va. Code §11-14A-11

**REFUND:** Refund for gallons of motor fuel purchased in this State but consumed outside of this State

**VALUE:** **$0 per year**

### Rationale

Tax on fuel consumed outside of this State is refundable because it is not used upon the highways of West Virginia.

### Revenue Analysis

The value for refunds is minimal due to the enactment of IFTA, which began on January 1, 1996. Since IFTA involves a reciprocity agreement among member jurisdictions, the need for refunds for fuel consumed outside of the State has become negligible. The West Virginia State Tax Department distributes both the tax and the carrier information to the other IFTA jurisdictions on behalf of the carrier. West Virginia receives its portion of motor fuel taxes due from motor carriers based in other IFTA jurisdictions from the carrier's home jurisdiction.

# CREDIT

A credit against Motor Fuel Road Tax is allowed for an amount equal to the amount of Motor Fuel Excise Tax paid. An analysis of this credit follows.

## CREDIT AGAINST MOTOR CARRIER ROAD TAX

**STATUTE:** W. Va. Code §11-14A-9

**CREDIT:** Credit for amount of Motor Fuel Excise tax paid, if no other refund was given

**VALUE:** **Not available**

### Rationale

This credit exists to avoid double taxation on gasoline or special fuel.

# INTERNATIONAL FUEL TAX AGREEMENT

## OVERVIEW

The International Fuel Tax Agreement (IFTA) is a fuel tax reciprocity agreement among states of the United States and provinces of Canada. The agreement is intended to simplify the reporting and payment of all fuel use taxes by interstate motor carriers for all qualified vehicles. Qualified vehicles are only those taxed under IFTA and used, designed, or maintained for transportation of persons or property having two or more axles and gross vehicle weight of more than 26,000 pounds. The rate of tax is the same as the Motor Carrier Road Tax.

All West Virginia-based motor carriers who travel in at least one other IFTA jurisdiction and operate one or more qualified vehicles must obtain an IFTA license. All IFTA licensees must file a single quarterly tax return with the West Virginia State Tax Department. This tax return will contain detailed information about vehicle operations in each IFTA member jurisdiction. West Virginia then distributes both the tax and the carrier information to the other IFTA jurisdictions on behalf of the carrier. West Virginia receives its portion of gasoline taxes due from motor carriers based in other IFTA jurisdictions from the carrier's home jurisdiction. If a motor carrier does not operate in any other IFTA jurisdiction, the motor carrier must file the Motor Carrier Road Tax return for tax due to West Virginia and file returns as required by other non-IFTA jurisdictions in which the carrier traveled.

All amounts collected under IFTA are deposited into the International Fuel Tax Agreement Clearing Fund for distribution of funds owed to other member jurisdictions as provided in the agreement and for payment of any refunds owed to West Virginia-based taxpayers. After all payments and distributions, the remaining funds are deposited into the State Road Fund and used **only** for the following purposes: construction, reconstruction, maintenance and repair of highways; matching of federal funds available for highway purposes, and payment of the interest and sinking fund obligations on State bonds issued for highway purposes.

The same expenditures available under the Motor Carrier Road Tax also apply under IFTA. These include vehicles owned and operated by the federal government or any State government agency and school buses. Refunds help define and should be considered as part of the “normal” tax base. A refund is also allowed for any overpayment of motor fuel taxes paid by a West Virginia-based interstate motor carrier. Since this expenditure is part of the “normal” tax base, it is **not** considered a true expenditure for purposes of this study. In this section, only the refund for overpayment of taxes is discussed. A specific discussion of the other expenditures can be found in the Motor Carrier Road Tax section. Also, as part of the “normal” tax base, non-highway uses of gasoline or special fuel are exempt from taxation under IFTA. It is inherent in the structure of the Motor Fuel Excise Tax, and the related Motor Carrier Road Tax, that only fuel used on the highways of West Virginia is taxable. Therefore, any private or non-highway use of fuel by motor carriers is not required to be reported on the IFTA tax return. Information on specific expenditures relating to the sale of gasoline and special fuel for non-highway purposes can be found in the Motor Fuel Excise Tax section.

## ORGANIZATION AND ANALYSIS

Refunds will be the only IFTA expenditures discussed in this section. The analysis of the overpayment of motor fuel taxes includes a rationale and the cost to the State.

## REFUND

A refund for overpayment of any motor fuel tax paid by a West Virginia-based interstate motor carrier is available under IFTA. An analysis of this refund follows.

## OVERPAYMENT OF MOTOR FUEL TAXES

**STATUTE:** W. Va. Code §11-14B-11(b)(2)

**REFUND:** Refund for overpayment of motor fuel taxes by a West Virginia-based interstate motor carrier

**VALUE:** **$200,000 per year**

### Rationale

Overpayment of motor fuel taxes by a West Virginia-based interstate motor carrier is refundable since the taxes were never due to the State. This refund is **not** a tax expenditure because it simply provides for a return of funds never owed to West Virginia. Overpayment of taxes may also be recovered through a credit for use against future motor fuel taxes owed.

# TOBACCO PRODUCTS EXCISE TAX

## OVERVIEW

The Tobacco Products Excise Tax Act was passed in 2001 and replaced the Cigarette Excise Tax with a tax on both cigarettes and tobacco products other than cigarettes. Effective July 1, 2016, the Tobacco Products Excise Tax Act was amended, and an additional section was added to levy an excise tax on e-cigarette liquid.

Effective July 1, 2016, the tax on cigarettes was raised to the rate of $1.20 on each pack of 20 cigarettes. The tax is imposed on every wholesaler, subjobber, subjobber dealer, retail dealer and vending machine operator by the purchase of stamps to be affixed to or impressed upon each package of cigarettes to be sold. Stamps or meter impressions are purchased from the State Tax Commissioner and are evidence of payment of the tax.

Effective July 1, 2016, the excise tax levied on the sale of tobacco products other than cigarettes was raised to the rate of 12.0 percent of the wholesale price of each item or article sold. Tobacco products subject to this tax include cigars, snuff, chewing tobacco, and other non-cigarette tobacco products.

Effective July 1, 2016, an excise tax was levied on the sale of e-cigarette liquid at the rate of 7.5 cents per milliliter or fraction thereof. “E-cigarette liquid” includes any of the liquids or liquid mixtures used in e-cigarettes, e-cigarette liquid mixing kits, and e-cigarette mixing kit components. The excise tax on cigarettes and other tobacco products was created to provide revenue for the General Revenue Fund of the State. There are two types of expenditures that apply to the Tobacco Products Excise Tax, discounts and refunds. Discounts are allowed on all tax due on cigarettes for affixing stamps and collecting and paying the tax as required by law. Wholesalers of other tobacco products are also allowed a discount for collecting and remitting the tax. Discounts are not considered to be a part of the "normal" tax base. However, refunds in this case help define, and should be considered as part of, the “normal” tax base. Since the tax is on cigarettes meant for retail sale, a refund is allowed on any unsalable merchandise returned to the manufacturer. Refunds are also allowed on any unused or mutilated stamps.

## ORGANIZATION AND ANALYSIS

Tobacco Products Excise Tax expenditures are divided into two groups as follows:

- Discounts
- Refunds

The analysis provided for each tax expenditure includes a rationale for each item and the item’s cost to the State.

# DISCOUNTS

Discounts are allowed on all tax due for affixing stamps and collecting and paying the tax. Applicable discounts are as follows:

- Four Percent Discount on Stamp Purchases and for Collecting and Remitting the Tax
- Commission for Banks Authorized to Set Meters or Sell Stamps

An analysis of these discounts follows.

## FOUR PERCENT DISCOUNT ON STAMP PURCHASES AND FOR COLLECTING AND REMITTING THE TAX

**STATUTE:** W. Va. Code §§11-17-4(b) and 11-17-9

**DISCOUNT:** A discount of four percent on all tax due for persons affixing stamps, collecting and paying of tax as required and prescribed by this article

**VALUE:** **$6.8 million per year**

### Rationale

The 4 percent discount allowed on purchases of stamps is granted to taxpayers for providing the service of affixing stamps and collecting and remitting the tax on cigarettes and for collecting and remitting the tax on other tobacco products.

## COMMISSION FOR BANKS AUTHORIZED TO SET METERS OR SELL STAMPS

**STATUTE:** W. Va. Code §11-17-6

**DISCOUNT:** The Tax Commissioner may appoint any bank or trust company authorized to do business in this State, as his/her deputy for the purpose of selling stamps or checking, setting and sealing meters; such deputy is allowed a fee of one eighth of one percent of the face value of all stamps sold

**VALUE:** **$0 per year**

### Rationale

The commission for banks authorized to set meters or sell stamps exists as an incentive for their assistance in providing the service of selling such stamps and collecting and remitting the tax.

# REFUND

A refund of the tax on cigarettes is available for any unused or mutilated stamps or for any unsalable merchandise returned to the manufacturer with stamps affixed.

An analysis of this refund follows.

## UNUSED OR MUTILATED STAMPS OR UNSALABLE MERCHANDISE RETURNED TO MANUFACTURER

**STATUTE:** W. Va. Code §11-17-10

**REFUND:** Unused or mutilated stamps and stamps destroyed by fire or flood, or stamps or meter impressions on cigarettes returned to manufacturer may be redeemed for a refund of ninety-five percent of the face value of the stamps, less any discount allowed on the purchase of the stamps

**VALUE:** **$270,000 per year**

### Rationale

A refund for unused or mutilated stamps or unsalable merchandise returned to the manufacturer exists as part of the “normal” tax base. Tax should not be paid on cigarette tax stamps that are destroyed or on cigarettes that cannot be sold or used.

### Revenue Analysis

The amount of refunds has been declining because manufacturers are not taking back as many used or mutilated merchandise as in previous years.

# SOFT DRINKS TAX

## OVERVIEW

The Soft Drinks Tax is an excise tax levied on all bottled soft drinks, all soft drink syrups, and dry mixtures/powders as defined by regulation, whether manufactured within or without this State. The rates of tax are as follows:

- On each bottled soft drink, a tax of one cent on each 16.9 fluid ounces or on each one-half liter, or portion thereof;
- On each gallon of soft drink syrup, a tax of 80 cents, or on each four liters of soft drink syrup a tax of 84 cents, or portion thereof; and
- On each ounce by weight of dry mixture, a tax of one cent, or on each 28.35 grams, a tax of one cent, or portion thereof.

The tax is imposed on any West Virginia manufacturer or producer of bottled soft drinks or soft drink syrup for sale within this State. The tax also applies to distributors and wholesale or retail dealers who are the original consignees of any bottled soft drink or soft drink syrup brought into the State that was manufactured or produced outside of this State. In addition, the tax is imposed on any out-of-state bottler who puts indicia on a product to be sold in West Virginia. Per W.Va. Code §11-19-13, the Soft Drinks Tax will be terminated on July 1, 2024.

There are only two types of expenditures that apply to the Soft Drinks Tax: discounts and refunds. Discounts are not considered to be a part of the “normal” tax base. However, refunds in this case help define, and should be considered as part of, the “normal” base. Since the tax is on soft drinks meant for retail sale, a refund is allowed on any stamps, crowns, or soft drinks, syrups, or powders that are destroyed by fire, lightning, or flood. Refunds are also allowed on soft drinks, syrups, or powders exported from West Virginia or destroyed pursuant to a federal or State order. Because of the discounts on stamps and crowns, refunds are not allowed on tax paid stamps or crowns in the case of breakage or destruction of containers stamped or crowned. This also applies to the spoilage of soft drinks or syrups, or the loss or destruction of tax stamps or crowns.

In addition to the refunds mentioned above, several items specifically exempt from the Soft Drinks Tax help define, and are considered part of, the “normal” tax base. Although the term “soft drinks” is interpreted quite liberally, it does **not** apply to fluid milk to which no flavoring has been added or to natural undiluted fruit or vegetable juices that may not be sweetened. Also, the tax does not apply to 100 percent pure juice with sweetener added. These exempt items are **not** considered expenditures for the purposes of this report and thus will not be discussed in this section.

## ORGANIZATION AND ANALYSIS

Soft Drinks Tax expenditures are divided into two groups as follows:

- Discounts
- Refunds

The analysis provided for each tax expenditure includes a rationale for each item and the item's cost to the State.

# DISCOUNTS

Discounts are allowed on the sale of both tax stamps and crowns for soft drinks. The following discounts apply:

| Sale | Discount |
|---|---|
| Stamp sales of less than $25 | No discount |
| Stamp sales of at least $25 but less than $50 | 5.0% |
| Stamp sales of $50 or more | 10.0% |
| Crown sales | 12.5% |

Due to the small number of tax stamp discounts, they will be combined for the purposes of this study. The following discounts are discussed:

- Discount on Stamp Sales
- Twelve and One-half Percent Discount on Crowns

An analysis of these discounts follows.

## DISCOUNT ON STAMP SALES

**STATUTE:** W. Va. Code §11-19-5

**DISCOUNT:** Stamp sales of twenty-five dollars or over and less than fifty dollars, a discount of five percent of the face value of all stamps sold; and on stamp sales of fifty dollars or more, a discount of ten percent of the face value of all stamps sold

**VALUE:** **$140,000 per year**

### Rationale

The discounts allowed on purchases of stamps exist for providing the service of affixing stamps and collecting and remitting the tax.

## TWELVE AND ONE-HALF PERCENT DISCOUNT ON CROWNS

**STATUTE:** W. Va. Code §11-19-5

**DISCOUNT:** On the purchase of tax crowns, a discount of twelve and one-half percent on the value of the crowns

**VALUE:** **$940,000 per year**

### Rationale

The 12.5 percent discount allowed on purchases of crowns exists for providing the service of affixing the crowns and collecting and remitting the tax, and to allow for crowns lost through breakage and spoilage.

# REFUNDS

A refund of the Soft Drinks Tax is available for the tax stamps or crowns on soft drinks, soft drink powders, or soft drink syrups that are destroyed by fire, lightning, or flood or must be destroyed pursuant to federal or State order. A refund is also available when the soft drinks, syrups, or powders are exported out of this State. The following refunds are discussed in this section:

- Destruction of Soft Drink Tax Stamps, Crowns on Soft Drinks
- Soft Drinks, Syrups or Powders Exported Out-of-State

Analysis of these refunds follows.

## DESTRUCTION OF SOFT DRINK TAX STAMPS, CROWNS, OR SOFT DRINKS

**STATUTE:** W. Va. Code §11-19-5

**REFUND:** Refunds are allowed when tax stamps or crowns on soft drinks, soft drink powders or soft drink syrups, upon which tax has been paid, are destroyed by fire, lightning or flood; or are required to be destroyed pursuant to federal or State order

**VALUE:** **$0 per year**

### Rationale

The refund for stamps or crowns on soft drink products that are destroyed by fire, lightning, or flood exists as part of the “normal” tax base. Tax should not be paid on stamps or crowns on soft drinks that are destroyed and cannot be sold or used.

### Revenue Analysis

The refund for tax stamps, crowns, or soft drink products that have been destroyed has not been claimed in recent years. No accidents have been reported in the last few years involving soft drink manufacturers or distributors. Technological improvements are another reason for the lack of refund requests. Soft drink product containers have become more durable in recent years as manufacturers switched from glass bottles to cans and plastic containers. Since these soft drink product containers are more durable, the products with tax stamps and crowns already attached are not as easily destroyed.

## SOFT DRINKS, SYRUPS, OR POWDERS EXPORTED OUT OF STATE

**STATUTE:** W. Va. Code §11-19-5

**REFUND:** Refunds are allowed when soft drinks, syrups or powders upon which tax has been paid are exported from this State

**VALUE:** **Cannot be disclosed due to Taxpayer confidentiality**

### Rationale

The purpose of this refund is to exclude from taxation soft drinks, syrups, or powders not sold or used within this State.

# BEER BARREL TAX

## OVERVIEW

The Beer Barrel Tax is levied at the rate of $5.50 per barrel of 31 gallons of non-intoxicating beer manufactured and sold in this State, whether contained or sold in barrels, bottles, or other containers. The tax also applies to distributors who are the original consignees of non-intoxicating beer manufactured outside this State and brought into the State for sale. The Beer Barrel Tax does not apply to non-intoxicating beer manufactured by a brewpub.

The term “non-intoxicating beer” refers to the following products of the brewing industry: cereal malt beverages, beer, lager beer, ale, malt coolers, and other similar items. A product that contains at least 0.5 percent alcohol by volume, but not more than 11.9 percent alcohol by weight or 15.0 percent by volume, whichever is greater, is considered non-intoxicating beer.

Except for the exemption of brewpubs, there are no tax expenditures that apply to the Beer Barrel Tax. Unlike the other excise taxes in this study, there are no refunds or discounts that pertain to the Beer Barrel Tax.

## ORGANIZATION AND ANALYSIS

The brewpub exemption from the Beer Barrel Tax is discussed in this section. The analysis includes a rationale for the item and the item’s cost to the State.

# EXEMPTION

The only item exempted from the Beer Barrel Tax is non-intoxicating beer manufactured by a brewpub. An analysis of this exemption follows.

## BREWPUBS

**STATUTE:** W. Va. Code §11-16-13(a)

**EXEMPTION:** The barrel tax shall not apply to non-intoxicating beer manufactured by a brewpub

**VALUE:** **$40,000 per year**

### Rationale

The exemption for brewpubs exists in order to promote small-scale manufacturing within the State.

# WINE LITER TAX

## OVERVIEW

The Wine Liter Tax is levied on all wine sold by suppliers to distributors, except wine sold to the Alcohol Beverage Control Commissioner. The tax is levied at a rate of $0.26406 per liter. Collections of the Wine Liter Tax are deposited into the General Revenue Fund.

Refunds are the only types of expenditures that apply to the Wine Liter Tax. Refunds help define, and should be considered as part of, the “normal” tax base. Since the tax is meant to be imposed on wine that will eventually sell at the retail level, a refund is allowed on wine lost through fire or casualty. A refund or credit is also allowed on tax erroneously or illegally collected. Since these refunds are part of the “normal” tax base, they are **not** considered true expenditures for purposes of this study.

## ORGANIZATION AND ANALYSIS

Although **not** a true tax expenditure, refunds are analyzed in this section. The analysis provided for each tax refund includes a rationale for each item and the item's cost to the State.

# REFUNDS

As part of the "normal" tax base, refunds of tax paid on liters of wine are allowed for the following reasons:

- Erroneously or Illegally Collected Taxes
- Wine Lost through Fire or Casualty

An analysis of these items follows.

## ERRONEOUSLY OR ILLEGALLY COLLECTED TAXES

**STATUTE:** W. Va. Code §60-8-5

**REFUND:** Refund or credit will be granted for any tax erroneously or illegally collected

**VALUE:** **Minimal**

### Rationale

This refund exists to protect the taxpayer and to enable the taxpayer to reclaim taxes that should not have been paid.

## WINE LOST THROUGH FIRE OR CASUALTY

**STATUTE:** W. Va. Code §60-8-5

**REFUND:** Refund of wine lost through fire or casualty, other than breakage, when the amount of tax paid exceeds $50

**VALUE:** **$0 per year**

### Rationale

A refund for taxes of over $50 paid on wine lost through fire or casualty, other than breakage, exists as part of the "normal" tax base. Tax should not be paid on wine that is lost and cannot be sold or used.

### Revenue Analysis

The refund for wine lost through fire or casualty when taxes of over $50 have been paid has not been taken in recent years. This may be because the refund excludes breakage of products, which is probably the most likely accident to occur on a daily basis. There have been no reported fires or other casualties by suppliers in recent years.

# PROPERTY TAXES

# PROPERTY TAXES

## OVERVIEW

The Property Tax, which was enacted in 1863, is one of the oldest forms of taxation in West Virginia. This tax is administered by county officials and officials of several State government agencies. For the purposes of taxation, property can be divided into two categories: real and personal. Real property is land and anything permanently attached to land and owned by the owner of the land. Personal property is all other objects or rights that can be owned. Personal property can also be categorized as tangible and intangible. Generally, intangible property consists of rights to, or claims against, other property or services. In West Virginia, the Property Tax is levied on all real and personal property, except that which is specifically exempt in the West Virginia Code. Most of the exemptions discussed in this study have been in effect since the Property Tax laws were first enacted.

Less than 0.5 percent of all the Property Taxes collected in West Virginia goes to State government. The other beneficiaries of the Property Tax are county boards of education, county commissions, and municipalities. For the fiscal year ending June 30, 2024, $2.2 billion in Property Taxes was levied by the State, county boards of education, county commissions, and municipalities. The following list shows the amount of Property Taxes levied by each levying body for Fiscal Year 2024 (Tax Year 2023).

| Levying Body | Taxes Levied |
|---|---|
| State | $ 9,349,365 |
| County | 591,421,097 |
| School Boards | 1,489,735,746 |
| Municipalities | 141,798,874 |
| **Total** | **$2,232,305,082** |

The Property Tax is levied at different tax rates depending on the class of property. The State rate is set in the West Virginia Constitution. Each county and municipality can impose its own rates of property taxation. The West Virginia Legislature sets the rate of tax for county boards of education. This rate is used by all county boards of education Statewide. The following classes of property are used for tax purposes:

| | | |
|---|---|---|
| Class I | a. | All tangible personal property used exclusively in agriculture, including horticulture and grazing, and |
| | b. | All products of agriculture, including livestock, while owned by the producer |
| Class II | a. | All property owned, used and occupied by the owner exclusively for residential purposes, and |
| | b. | All farms, including land used for horticulture and grazing, which are occupied and cultivated by their owners or bona fide tenants |
| Class III | All real and personal property situated outside municipalities, exclusive of Classes I and II | |
| Class IV | All real and personal property situated inside municipalities, exclusive of Classes I and II | |

Class I property has been exempt from the Property Tax since Tax Year 2008.

The maximum current tax rates shown in the table below for each local taxing authority are given in terms of class of property.

**Maximum Property Tax Rates**
(in dollars per $100)

| Taxing Authority | Class I | Class II | Class III | Class IV |
|---|---|---|---|---|
| State | $0.0025 | $0.0050 | $0.0100 | $0.0100 |
| County | 0.1430 | 0.2860 | 0.5720 | 0.5720 |
| School Boards | 0.2295 | 0.4590 | 0.9180 | 0.9180 |
| Municipalities | 0.1250 | 0.2500 | -- | 0.5000 |
| | **$0.5000** | **$1.0000** | **$1.5000** | **$2.0000** |

Amendments to the State Constitution provide that these maximum rates can be temporarily exceeded by all the taxing authorities except State government. The voters of each taxing authority must approve any excess levy of tax proposed for their municipality, school board or county by a prescribed majority. The average actual tax rates per $100 of assessed valuation for the 2022 tax year, expressed in rounded dollars, are shown in the following table.

**Actual Tax Year 2022 Property Tax Rates**[3]
(in dollars per $100 of assessed valuation)

| | Average |
|---|---|
| Class I | $0.00 |
| Class II | $1.21 |
| Class III | $2.20 |
| Class IV | $2.94 |

Statewide, the average rate for all property is $1.92 per $100 of assessed valuation.

## ESTIMATING COSTS OF TAX EXPENDITURES

Several sources of information were used to determine the expenditure valuations. These include publications from the U.S. Census Bureau, the West Virginia Division of Banking, the West Virginia Higher Education Policy Commission, and the West Virginia Public Service Commission and data from ProPublica. Estimates were calculated using tax levy rates provided by the Chief Inspector Division of the State Auditor's Office and include all regular, special, and excess levy rates. The estimates were based on an assumed equalization rate of 60 percent.

## ORGANIZATION AND ANALYSIS

Although all property is presumed to be taxable until its owner proves otherwise, there are many possible exemptions from the Property Tax. The exemptions can be divided into seven distinct groups. The following is the list of groups used in this study:

[3] Rates include excess levy rates.

- Government Exemptions
- Educational Exemptions
- Exemptions for Church Property
- Exemptions for Property Owned by Nonprofit Organizations
- Miscellaneous Exemptions
- Property Valuation Preferences
- Homestead Exemption

An analysis provided for each tax expenditure includes a rationale for each item and the item's cost to the State and local governments.

# GOVERNMENT EXEMPTIONS

Exemptions from Property Tax are granted to several different government entities. The exemptions included in this section are as follows:

- United States Government Property
- State Government Property
- Local Government Property
- Property Belonging to Another State
- Government Property Subject to Lease Purchase Agreements
- Government-Owned Waterworks and Electrical Power Systems

### Rationale

The exemption for property of the United States is required by the federal supremacy clause in the United States Constitution. Since state and local governments are prohibited from levying direct taxes upon the United States government, this exemption is not a true tax expenditure.

Unlike the exemption for property belonging to the United States government and its agencies, taxation of State property and local government property used for public purposes is not prohibited by constitutional restrictions. However, if the State imposed a Property Tax on State property and local government property used for public purposes, this would result in increased costs to those entities. An increase in costs to State and local governments would possibly result in an unintended transfer of funds from one government entity to another.

## UNITED STATES GOVERNMENT PROPERTY

**STATUTE:** W. Va. Code §11-3-9(a)(1)

**EXEMPTION:** Property that belongs to the United States government, other than property permitted by the United States to be taxed under state law

**VALUE:** **$7.7 million per year**

### Revenue Analysis

All real and personal property belonging to the United States government is exempt from Property Tax in West Virginia. This includes all public corporations and other agencies created by the federal government for national purposes. This exemption does **not** include private corporations hired by the United States government.

## STATE GOVERNMENT PROPERTY

**STATUTE:** W. Va. Code §11-3-9(a)(2)

**EXEMPTION:** Property that belongs exclusively to the state

**VALUE:** **$68.3 million per year**

**Revenue Analysis**

All real and personal property belonging exclusively to the State of West Virginia is exempt from Property Tax in this State. This estimate does not include property belonging to State colleges and universities because such property is included in the exemption for educational institutions presented later in this report.

## LOCAL GOVERNMENT PROPERTY

**STATUTE:** W. Va. Code §11-3-9(a)(3)

**EXEMPTION:** Property that belongs exclusively to any county, district, city, village or town in this State and used for public purposes

**VALUE:** **$69.1 million per year**

**Revenue Analysis**

This exemption includes property owned by counties and municipalities, including the property of any parks and recreation commissions or county development authorities created by a county commission. Property used for municipal and county waterworks is **not** included in the calculations for this exemption. Also, **not** included is property owned by county boards of education, which is included in the exemption for educational institutions discussed later in this section.

## PROPERTY BELONGING TO ANOTHER STATE

**STATUTE:** W. Va. Code §11-3-9(a)(4)

**EXEMPTION:** Property located in this state belonging to any city, town, village, county or other political subdivision of any other state when it is used for public purposes

**VALUE:** **Negligible**

**Revenue Analysis**

Property located in West Virginia that belongs to any municipality, county, or other political subdivision of another state is exempt from Property Tax in West Virginia if the property is used for public purposes. The value of this exemption is negligible since there is little property of this type within West Virginia.

## GOVERNMENT PROPERTY SUBJECT TO LEASE PURCHASE AGREEMENTS

**STATUTE:** W. Va. Code §11-3-9(a)(27)

**EXEMPTION:** All property belonging to the state, any county, district, city, village, town or other political subdivision or any state college or university which is subject to a lease purchase agreement and which provides that, during the term of the lease purchase agreement, title to the leased property rests in the lessee so long as lessee is not in default or shall not have terminated the lease as to the property

**VALUE:** **Not available**

## GOVERNMENT-OWNED WATERWORKS AND ELECTRICAL POWER SYSTEMS

**STATUTE:** W. Va. Code §8-19-1

**EXEMPTION:** Personal and real property of a municipality or a county which was acquired and constructed for the purposes of a waterworks system or electrical power system and any leasehold interest in such systems which are held by other persons

**VALUE:** **$59.6 million per year**

### Revenue Analysis

Property used for a municipal or county waterworks is exempt from Property Tax in West Virginia. Additionally, the property used for municipal and county electrical power systems is exempt. An exemption for this type of property is justified for tax equity purposes only if the service does not compete with a similar service available from a non-government utility.

# EDUCATIONAL EXEMPTIONS

Certain types of property related to education are exempt from Property Tax in West Virginia. These exemptions include the following:

- Property Used for Educational Purposes
- Property Whose Income Supports Institutions of Higher Education
- Dormitories, Literary Halls and Clubrooms

### Rationale

These exemptions presumably exist to maximize funding of education since a tax on school property would result in the net transfers of some funds from the schools to the State, county commissions, and municipalities.

## PROPERTY USED FOR EDUCATIONAL PURPOSES

**STATUTE:** W. Va. Code §11-3-9(a)(9)

**EXEMPTION:** Property belonging to, or held in trust for, colleges, seminaries, academies and free schools when it is used for educational, literary or scientific purposes including books, apparatus, annuities and furniture

**VALUE:** **$168.1 million per year**

### Revenue Analysis

This exemption applies to property directly used for education, literary, or scientific purposes by colleges, seminaries, and public and private elementary and secondary schools. However, colleges must have approval from the West Virginia Higher Education Policy Commission or the West Virginia Community and Technical College System to grant degrees of higher education to qualify for this exemption. The educational, literary or scientific use of the property must be the primary use of the property.

## PROPERTY WHOSE INCOME SUPPORTS INSTITUTIONS OF HIGHER EDUCATION

**STATUTE:** W. Va. Code §11-3-9(a)(10)

**EXEMPTION:** Property belonging to, or held in trust for, colleges and universities located in West Virginia, or any public or private nonprofit foundation or corporation which receives contributions exclusively for such college or university, if the property or dividends, interest, rents or royalties derived therefrom are used or devoted to educational purposes of such college or university

**VALUE:** **$730,000 per year**

**Revenue Analysis**

To qualify for this exemption, the property must meet several conditions. The property must belong to or be held in trust by a West Virginia college or university or a public or private nonprofit foundation that receives contributions exclusively for an institution of higher education in West Virginia. In addition, the property, or the dividends, interest, rents, and royalties derived from the property, must be used for the educational purposes of the college or university. The property must belong exclusively to the college, university, or foundation.

## DORMITORIES, LITERARY HALLS, AND CLUBROOMS

**STATUTE:** W. Va. Code §11-3-9(a)(15)

**EXEMPTION:** All real estate, not exceeding one acre in extent, and the buildings on the real estate, used exclusively by any college or university society as a literary hall, or as a dormitory or clubroom, if not used with a view to profit, including, but not limited to, property owned by a fraternity or sorority organization affiliated with a university or college or property owned by a nonprofit housing corporation or similar entity on behalf of a fraternity or sorority organization affiliated with a university or college, when the property is used as residential accommodations, or as a dormitory, for members of the organization

**VALUE:** **$4.9 million per year**

**Revenue Analysis**

All real estate not exceeding one acre and any building on that property used by a college or university organization as a literary hall, dormitory or clubroom is exempt from Property Tax in West Virginia. This includes property used as residential accommodations for sorority or fraternity members and property owned by a nonprofit housing corporation and used as dormitories for students. In order for the property to be exempt, any revenue generated from that property must not exceed the cost of maintaining that property and the reasonable operating costs of the organization.

# EXEMPTIONS FOR CHURCH PROPERTY

Several exemptions exist for churches and religious organizations. These include the following:

- Property Used Exclusively for Divine Worship
- Parsonages
- Securities Sold by Churches and Religious Organizations

### Rationale

The exemptions for churches were presumably enacted to avoid State interference with church activities.

## PROPERTY USED EXCLUSIVELY FOR DIVINE WORSHIP OR SCHOOLS ASSOCIATED WITH DIVINE WORSHIP

**STATUTE:** W. Va. Code §11-3-9(a)(5)

**EXEMPTION:** Property used exclusively for divine worship, or used exclusively for divine worship and the operation of a pre-K school, primary school, middle school, secondary school, daycare center, or church camp for children, which school, daycare center, or church camp is operated by the church which owns the property or is operated by another not-for-profit organization or entity

**VALUE:** **$42.2 million per year**

### Revenue Analysis

This exemption applies only to property used exclusively for divine worship or the operation of a pre-K school, primary school, middle school, secondary school, daycare center, or church camp for children, which school, daycare center, or church camp is operated by the church which owns the property or is operated by another not-for-profit organization or entity. Property considered to be used for “divine worship” includes property used for religious services, for educational activities, such as Sunday School or Hebrew School classes, and for meetings and other activities held to further the religious activities of the organization. Property used for divine worship or for the operation of a school, daycare center or church camp associated with a church usually qualifies for the exemption for property used for charitable purposes as well.

## PARSONAGES

**STATUTE:** W. Va. Code §11-3-9(a)(6)

**EXEMPTION:** Parsonages and the household goods and furniture pertaining thereto

**VALUE:** **$2.0 million per year**

### Revenue Analysis

Parsonages and the household goods of these residences are exempt from Property Tax in West Virginia. In order for the property to qualify for this exemption, the parsonage must be owned by the trustees of the church and must be used as a home by the pastor, priest, bishop, or other similar leader of that church. The household goods excluded from taxation by this exemption are those owned by the church and do not include those goods owned by the pastor or other leader. However, household goods owned by the resident of the parsonage would be exempt under the exemption for all household goods and personal effects.

## SECURITIES SOLD BY CHURCHES AND RELIGIOUS ORGANIZATIONS

**STATUTE:** W. Va. Code §11-3-9(a)(7)

**EXEMPTION:** Mortgages, bonds and other debt securities in the hands of bona fide owners and holders hereafter issued and sold by churches and religious societies for the purposes of securing money to be used in the erection of church buildings to be used exclusively for divine worship or for the purpose of paying indebtedness thereon

**VALUE:** **$0 per year**

### Revenue Analysis

Mortgages, bonds, and other types of debt securities sold by churches and religious societies to secure money to be used in the erection of church buildings used exclusively for divine worship are specifically exempt from Property Tax in West Virginia. Although this exemption is church related, the taxpayers who are exempt from Property Tax in West Virginia on these types of debt instruments are the owners and holders of the securities, not the churches. Beginning in Tax Year 2008, all Class I personal property, including intangible personal property, is completely exempt from all property taxes.

# EXEMPTIONS FOR PROPERTY OWNED BY NONPROFIT ORGANIZATIONS

The property of various nonprofit organizations is exempt in West Virginia. The organizations whose property is partially or completely exempt from Property Taxes are as follows:

- Libraries
- Charitable and Benevolent Organizations
- Nonprofit Corporations Distributing Electricity, Water, or Natural Gas or Providing Sewer Services
- Public Institutions for the Deaf, Mute and Blind
- Nonprofit Hospitals
- Houses of Refuge, Lunatic or Orphan Asylums, and Homes for Those in Need
- Fire Departments
- Property Owned by Certain Youth Organization Facilities

### Rationale

These exemptions generally involve organizations providing socially desirable services, often for low-income individuals. These exemptions exist to promote the social welfare and public service activities of these organizations.

## LIBRARIES

**STATUTE:** W. Va. Code §11-3-9(a)(11)

**EXEMPTION:** Public and family libraries

**VALUE:** **$5.5 million per year**

### Revenue Analysis

Both real and personal property owned by public and family libraries are exempt under this expenditure. Family libraries only qualify for this exemption if the materials kept in the library are available for use by the public. All books, manuscripts, musical scores and other literary, scientific or artistic writings or materials owned by the library are exempt. In addition, personal property, such as desks and audiovisual equipment, necessary for the operation of the library and the building that houses the materials is exempt.

## CHARITABLE AND BENEVOLENT ORGANIZATIONS

**STATUTE:** W. Va. Code §§11-3-9(a)(12) and 11-3-9(a)(16)

**EXEMPTION:** Property used for charitable purposes and not held or leased out for profit (§11-3-9(a)(12))

All property belonging to benevolent associations not conducted for private profit (§11-3-9(a)(16))

**VALUE:** **$13.9 million per year**

### Revenue Analysis

Charities are eligible for an exemption from Property Tax in West Virginia under certain conditions. The charity must be operated on a nonprofit basis, must directly benefit society and must be exempt from federal income tax as a 501(c)(3) or (4) organization. In addition, the primary and immediate use of the property must be for one or more charitable purposes in order for the property to be exempt.

Some property belonging to a fraternal, benevolent or relief society or association is exempt from the Property Tax in West Virginia. In order for the property to be exempt, it must be used primarily for charitable purposes. Lodges, meeting halls, clubhouses, and other buildings that are used mainly for social purposes for the enjoyment of the members are not exempt.

## NONPROFIT CORPORATIONS DISTRIBUTING ELECTRICITY, WATER, OR NATURAL GAS OR PROVIDING SEWER SERVICES

**STATUTE:** W. Va. Code §11-3-9(a)(13)

**EXEMPTION:** Property used for public purposes of distributing electricity, water or natural gas or providing sewer services by a duly chartered nonprofit corporation when such property is not held, leased or used for profit

**VALUE:** **$53.5 million per year**

### Revenue Analysis

Property held by a duly chartered nonprofit corporation that distributes electricity, water, or natural gas or provides sewer services for public purposes is exempt. To qualify for this exemption the property must not be used for profit.

## PUBLIC INSTITUTIONS FOR THE DEAF, INTELLECTUALLY DISABLED, AND BLIND

**STATUTE:** W. Va. Code §11-3-9(a)(17)

**EXEMPTION:** Property belonging to any public institution for the education of the deaf, intellectually disabled, or blind

**VALUE:** **Minimal**

### Revenue Analysis

This exemption applies to any public institution for the education of the deaf, intellectually disabled, and blind. Since there are very few of these types of institutions in West Virginia, the value of this exemption is minimal if considered in isolation from other exemptions. However, repeal of this exemption would not affect Property Tax revenue since these types of institutions would qualify for another exemption, such as that for charitable purposes.

## NONPROFIT HOSPITALS

**STATUTE:** W. Va. Code §11-3-9(a)(17)

**EXEMPTION:** Property belonging to any hospital not held or leased out for profit

**VALUE:** **$47.4 million per year**

### Revenue Analysis

Nonprofit hospitals qualify for an exemption only if the primary and immediate use of the property is for charitable purposes. Any health care organization or hospital operated for the private gain of physicians, officers, or members of the board of the institutions does not qualify for this exemption.

## HOUSES OF REFUGE, MENTAL HEALTH FACILITIES, ORPHANAGES, AND HOMES FOR THOSE IN NEED

**STATUTE:** W. Va. Code §§11-3-9(a)(18) and 11-3-9(a)(19)

**EXEMPTION:** House of refuge and mental health facility or orphanage §11-3-9(a)(18))

Homes for children or for the aged, friendless or infirm not conducted for private profit §11-3-9(a)(19))

**VALUE:** **Minimal**

### Revenue Analysis

The following types of property are specifically exempted from West Virginia Property Tax:

- Houses of refuge, such as a community shelter for battered women;
- Mental health facilities;
- Orphanages;
- Homes for children; and
- Homes for the aged, the friendless, or the infirm.

To qualify for an exemption from Property Tax, the property must be used for charitable purposes. A home for the aged, friendless, or infirm or for children does not qualify if, to gain admittance to the home, a person must deposit a substantial amount of money that could be equated as prepayment of rent. Homes also do not qualify if they require an application fee, damage deposit, or room charge unless the charge is substantially less than market value.

Although there is a specific exemption for these homes and shelters, the institutions would qualify for an exemption either as a charitable organization, an educational institution, or a government entity. Therefore, repeal of this exemption would have no impact on Property Tax revenue.

## FIRE DEPARTMENTS

**STATUTE:** W. Va. Code §11-3-9(a)(20)

**EXEMPTION:** Fire engines and implements for extinguishing fires, and property used exclusively for the safekeeping thereof, and for the meeting of fire companies

**VALUE:** **$7.8 million per year**

### Revenue Analysis

All fire engines, equipment used to extinguish fires, and all other equipment used by firefighters and the building and land used by the fire department to store those items are exempt from Property Tax in West Virginia. Since fire equipment owned by State, county, and municipal fire departments is exempt under the exemption for State and local governments, the value of that equipment was not included in the calculations of the value of this exemption. The exemption value is based **only** on the value of equipment and real property owned by volunteer fire departments.

## PROPERTY OWNED BY CERTAIN YOUTH ORGANIZATION FACILITIES

**STATUTE:** W. Va. Code §11-3-9(a)(29)

**EXEMPTION:** Real property owned by a nonprofit organization whose primary purpose is youth development by means of adventure, educational, or recreational activities for young people, which real property contains a facility built with the expenditure of not less than $100 million that is capable of supporting additional activities within the region or the state and which is leased or used to generate revenue for the nonprofit organization whether or not the property is used by the nonprofit organization for its nonprofit purpose, subject to the requirements, limitations, and conditions set forth in §11-3-9(h) of this code

**VALUE:** **$1.3 million per year**

### Rationale

For purposes of this exemption, the term “nonprofit youth organization” means a nonprofit organization that has been chartered by the United States Congress to help train young people to do things for themselves and others, and that has established an area of at least 6,000 contiguous acres within West Virginia in which to provide adventure and recreational activities for young people and others. This exemption was presumably enacted to encourage the development of a large youth-oriented adventure and recreational facility.

# MISCELLANEOUS EXEMPTIONS

The West Virginia Code provides for several miscellaneous exemptions that cannot be classified in the above-listed groups. The following is a list of the exemptions not previously discussed:

- Property Used for Area Economic Development Purposes
- Inventory Property Stored While in Transit
- Cemeteries
- Property Used in the Subsistence of Livestock
- Household Goods and Personal Effects
- Bank Deposits and Money
- Farm Equipment, Crops and Livestock
- Capital Stock
- Class I Intangible Property
- Property Acquired by Land Reuse Agencies

An analysis of these exemptions follows.

## PROPERTY USED FOR AREA ECONOMIC DEVELOPMENT PURPOSES

**STATUTE:** W. Va. Code §11-3-9(14); W. Va. Legislative Regulation §110-3-20.1

**EXEMPTION:** Property used for area economic development purposes by nonprofit corporations when such property is not leased for profit whose purpose is to develop special programs to improve the quality of social participation in community life, contribute to the elimination of poverty and establish permanent economic and social benefits in urban or rural low-income areas

**VALUE:** **Not available**

### Rationale

This exemption presumably exists to encourage economic development in the State. The exemption applies to property owned by community development corporations or property used by certain nonprofit corporations.

## INVENTORY PROPERTY STORED WHILE IN TRANSIT

**STATUTE:** W. Va. Code §11-5-13

**EXEMPTION:** Tangible personal property which is moving in interstate commerce through West Virginia, or which was consigned from a point of origin outside the state to a warehouse, public or private, within the state for storage in transit to a final destination outside the state

**VALUE:** **$18.8 million per year**

**Rationale**

This exemption, also known as the "Freeport Exemption," was approved by the voters in a Constitutional Amendment to encourage the development and maintenance of goods distribution centers in the State.

## CEMETERIES

**STATUTE:** W. Va. Code §11-3-9(a)(8)

**EXEMPTION:** Cemeteries, except for certain personal property of commercial cemeteries, including any sites of unmarked graves which have been certified as such by the Division of Culture and History

**VALUE:** **$1.9 million per year**

**Rationale**

This exemption relates specifically to burial plots at cemeteries and unmarked graves certified by the Division of Culture and History. This exemption presumably exists because of the use of the property as a burial site. Such property cannot readily be used for other purposes.

For purposes of this exemption, property classified as cemetery property includes property where remains are buried or interred, tombstones, and access roads to service the property. Family-owned cemeteries are exempt only if the immediate use of the entire parcel of land is as a cemetery. Property owned by a cemetery company, such as office furniture, office buildings, and chapels, is **not** exempt from Property Tax.

## PROPERTY USED IN THE SUBSISTENCE OF LIVESTOCK

**STATUTE:** W. Va. Code §11-3-9(a)(21)

**EXEMPTION:** All property to be used in the subsistence of livestock on hand at the commencement of the assessment year

**VALUE:** **$550,000 per year**

**Rationale**

This exemption aids farmers by exempting all feed and other items intended to be used to feed livestock owned or kept by the farmer. This exemption is for the personal property a farmer uses in the subsistence of livestock the farmer owns.

**Revenue Analysis**

All Class I property is completely exempt from property taxes. Even if this exemption was eliminated, property to be used in the subsistence of livestock would be exempt under the constitutional amendment that excluded Class I property from Property Tax.

## HOUSEHOLD GOODS AND PERSONAL EFFECTS

**STATUTE:** W. Va. Code §§11-3-9(a)(22), 11-3-9(a)(24), 11-3-9(a)(25), and 11-3-9(a)(26)

**EXEMPTION:** Household goods to the value of two hundred dollars, whether or not held or used for profit (§11-3-9(a)(22))

Household goods, which for purposes of this section means only personal property and household goods commonly found within the house and items used to care for the house and its surrounding property, when not held or used for profit (§11-3-9(a)(24))

Personal effects, which for purposes of this section means only articles and items of personal property commonly worn on or about the human body or carried by a person and normally thought to be associated with the person when not held or used for profit (§11-3-9(a)(25))

Dead victuals laid away for family use (§11-3-9(a)(26))

**VALUE:** **Not available**

### Rationale

This exemption benefits taxpayers by exempting household goods and personal effects. These items were exempted to limit invasion of privacy. Also, there would be administrative and compliance difficulties associated with the collection of Property Tax on these items.

## BANK DEPOSITS AND MONEY

**STATUTE:** W. Va. Code §11-3-9(a)(23)

**EXEMPTION:** Bank deposits and money

**VALUE:** **$200.6 million per year**

### Rationale

This exemption presumably exists in recognition of the difficulty in administering a tax on intangible assets. However, the exemption was limited to bank deposits and money.

### Revenue Analysis

All Class I property is completely exempt from property taxes. Even if this exemption was eliminated, bank deposits and money would still be exempt under the constitutional amendment that excluded intangibles from Property Tax.

## FARM EQUIPMENT, CROPS, AND LIVESTOCK

**STATUTE:** W. Va. Code §11-3-9(a)(28)

**EXEMPTION:** All implements, equipment, machinery, vehicles, supplies, crops and livestock used to engage in commercial farming

**VALUE:** **$1.3 million per year**

**Rationale**

This exemption exists for items that are specifically used in commercial farming.

## CAPITAL STOCK

**STATUTE:** W. Va. Code §11-5-6

**EXEMPTION:** Shares in companies whose stock is assessed

**VALUE:** **Not available**

**Rationale**

This exemption exists to avoid double taxation since the exemption only applies to shares in companies that have already been assessed Property Tax on their assets. This exemption only applies to shares owned by taxpayers in West Virginia.

## CLASS I INTANGIBLE PROPERTY

**STATUTE:** W. Va. Code §11-1C-1b

**EXEMPTION:** Intangible personal property with tax situs in this state shall be exempt from ad valorem property tax beginning tax year one thousand nine hundred ninety-eight: Provided, That such property shall be subject to ad valorem property tax and taxed at fifty percent of assessed value for tax year one thousand nine hundred ninety-eight; at forty percent of assessed value for the tax year one thousand nine hundred ninety-nine; at thirty percent of assessed value for the tax year two thousand; at twenty percent of assessed value for the tax year two thousand one; at ten percent of assessed value for the tax year two thousand two and eliminated completely for the tax year two thousand three and thereafter

**VALUE:** **Not available**

**Rationale**

This exemption was approved by the voters in a Constitutional Amendment and presumably exists in recognition of the difficulty in administering a tax on intangible assets. All Class I property, including intangible personal property, is completely exempt from property taxes.

## PROPERTY ACQUIRED BY LAND REUSE AGENCIES

**STATUTE:** W. Va. Code §31-18E-9

**EXEMPTION:** The real property of a land reuse agency and its income and operations are exempt from property tax. Provided, that this exemption does not apply to real property of a land reuse agency after the fifth consecutive year in which the real property is continuously leased to a private third party. A land reuse agency may acquire real property or interests in real property by any means on terms and conditions and in a manner the land reuse agency considers proper. Provided, that a land reuse agency may not acquire any interest in oil, gas or minerals which have been severed from the realty

**VALUE:** **Not available**

### Rationale

Land reuse agencies, often called land banks in other jurisdictions, are one of the tools that municipalities and counties may use to facilitate the return of vacant, abandoned, and tax-delinquent properties to productive use. These properties impose significant costs on neighborhoods, communities, municipalities, and counties by lowering property values, increasing fire and police protection costs, decreasing tax revenues, and undermining community cohesion. Real property acquired by a land reuse agency may be used for purely public spaces and places, affordable housing, conservation areas, and retail, commercial, and industrial activities. Therefore, the real property of a land reuse agency and its income and operations are exempt from property tax.

# PROPERTY VALUATION PREFERENCES

The West Virginia Code provides special valuation procedures for certain types of property. In the determination of tax appraisals, these valuation procedures generally place a greater weight upon actual economic use rather than market valuation based on the highest and best use of the property. The following types of property are subject to special valuation procedures, which results in a partial exclusion from taxation:

- Farm Real Estate Property
- Managed Timberland
- Qualified Continuing Care Retirement Communities
- Pollution Control Facilities
- Wind Turbine Pollution Abatement
- Specialized Manufacturing Production Property
- Qualified Capital Additions to Manufacturing Facilities
- Special Aircraft Property
- High Technology Business Property
- Wireless Technology Property
- Owner-Occupied Residential Property

An analysis of these preferences follows.

## FARM REAL ESTATE PROPERTY

**STATUTE:** W. Va. Code §11-1A-10

**PREFERENCE:** With respect to farm property, the tax commissioner shall appraise such property so as to ascertain its fair and reasonable value for farming purposes regardless of what the value of the property would be if used for some other purpose, and the value shall be arrived at by giving consideration to the fair and reasonable income which the property might be expected to earn in the locality wherein situated, if rented

**VALUE:** **$17.0 million per year**

### Rationale

This preference presumably exists to encourage the preservation of farming activities within the State. If such property is actually used for viable farming activity, then the preference exists to discourage the conversion of such property over to alternative uses. This preference applies to real property designated for farm use.

## MANAGED TIMBERLAND

**STATUTE:** W. Va. Code §11-1C-11b(a)

**PREFERENCE:** Property certified by the Division of Forestry as managed timberland shall be valued based upon the land's potential to produce future income according to its use and productive potential as managed timberland

**VALUE:** **$13.5 million per year**

### Rationale

This preferential valuation treatment was approved by the voters in a constitutional amendment to encourage the development and maintenance of managed timberland in the State. The preference arose out of concern that excessive property taxation encourages the clear-cutting of forest land. Managed timberland is defined by legislative regulation to include surface real property of at least 10 contiguous acres which is devoted to forest use, has sufficient numbers of commercially valuable trees, and is managed pursuant to a State-approved plan.

## QUALIFIED CONTINUING CARE RETIREMENT COMMUNITIES

**STATUTE:** W. Va. Code §11-4-3

**PREFERENCE:** Property belonging to qualified continuing care retirement communities, which are defined as being owned by a corporation or other organization exempt from federal income taxes under the Internal Revenue Code; used in a manner consistent with the purpose of providing housing and health care for residents, and receiving no Medicaid funding under the provisions of W. Va. Code §9-4 is included under the provisions of the "Tax Limitations Amendment"

**VALUE:** **$350,000 per year**

### Rationale

This preferential treatment presumably exists to benefit retirement communities providing housing and health care to West Virginia citizens who are no longer able to live in their own homes, which are classified as Class II property. The tax rate is equivalent to the tax rate imposed upon citizens who own their own homes.

### Revenue Analysis

The preferential treatment is only for retirement communities that are exempt from federal income taxes and that received no Medicaid funding.

## POLLUTION CONTROL FACILITIES

**STATUTE:** W. Va. Code §11-6A-3

**PREFERENCE:** The value of a pollution control facility first placed into operation subsequent to July 1, 1973, shall ... be deemed to be its salvage value

**VALUE:** **$70.1 million per year**

### Rationale

This preferential treatment recognizes the limited economic benefits associated with pollution control facilities. Pollution control facilities are appraised at 5 percent of the original cost.

## WIND TURBINE POLLUTION ABATEMENT

**STATUTE:** W. Va. Code §11-6A-5

**PREFERENCE:** Each wind turbine installed at a wind power project and each tower upon which the turbine is affixed shall be considered to be personal property that is a pollution control facility for purposes of this article and, subject to an allocation of the value of project property determined by the Tax Commissioner in accordance with this section, all of the value associated with the wind turbine and tower shall be accorded salvage valuation: Provided, That the portion of the total value of the facility assigned salvage value in accordance with this section shall, on and after July 1, 2007, be no greater than seventy-nine percent of the total value of the facility

**VALUE:** **$6.2 million per year**

### Rationale

This preferential treatment recognizes the limited economic benefits associated with pollution control facilities. Pollution control facilities are appraised at 5 percent of the original cost.

## SPECIALIZED MANUFACTURING PRODUCTION PROPERTY

**STATUTE:** W. Va. Code §11-6E-3

**PREFERENCE:** The value of specialized manufacturing production property shall ... be its salvage value

**VALUE:** **$2.8 million per year**

### Rationale

Specialized manufacturing production property includes molds, jigs, dies, forms, patterns, and templates directly used in manufacturing. This preferential treatment recognizes the limited uses or useful life of this type of property. Such property is appraised at 5 percent of the original cost.

## QUALIFIED CAPITAL ADDITIONS TO MANUFACTURING FACILITIES

**STATUTE:** W. Va. Code §11-6F-3

**PREFERENCE:** The value of a certified capital addition which exceeds $50 million added to an existing manufacturing facility with an original cost valuation of $100 million or more first placed into operation for tax years beginning on or after July 1, 1997, shall be ... deemed to be appraised at five percent of its original cost. Beginning on and after July 1, 2011, when the new capital addition is a facility that is or will be classified under the North American Industry Classification System with a six digit code number 211112, or is a manufacturing facility that uses product produced at a facility with code number 211112, then wherever the term "100 million" is used in this subsection, the term "20 million" shall be substituted and where the term "50 million" is used, the term "10 million" shall be substituted. For capital additions certified on or after July 1, 2011, the value of the land before any improvements shall be subtracted from the value of the capital addition and the unimproved land value shall not be given salvage value treatment

**VALUE:** **$46.0 million per year**

### Rationale

This preferential treatment presumably exists to encourage manufacturing companies with huge existing facilities in West Virginia to undertake major expansions within the State. The new qualifying investment would be appraised at 5 percent of original cost.

### Revenue Analysis

The parameters for this preference were changed during the 2011 Legislative Session to reduce the amount of new and existing valuations for certain manufacturers and to add the stipulation that the value of the land before any improvements shall be subtracted from the value of the capital addition and unimproved land value shall not be given salvage value treatment. Previously, there was no subtraction for the value of land. The cost of the preference under the previous parameters was $10 million per year.

## SPECIAL AIRCRAFT PROPERTY

**STATUTE:** W. Va. Code §11-6H-3

**PREFERENCE:** The value of special aircraft property, for the purpose of ad valorem property taxation under this chapter and under article X of the Constitution of the State of West Virginia, shall be its salvage value

**VALUE:** **$930,000 per year**

### Rationale

This preferential treatment presumably exists to benefit commercial airlines, charter carriers, and private carriers by more closely mimicking the tax policy in place in surrounding states with regard to such mobile property.

## HIGH-TECHNOLOGY BUSINESS AND WIRELESS TECHNOLOGY PROPERTY

**STATUTE:** W. Va. Code §§11-6J-3 and W. Va. Code §11-6L

**PREFERENCE:** The value of servers directly used in a high-technology business or in an internet advertising business and the value of tangible personal property directly used in a high-technology business or in an internet advertising business, for purpose of ad valorem property taxation under this chapter and under Article X of the Constitution of the State of West Virginia, shall be its salvage value (W. Va. Code §§11-6J-3)

For five years immediately following the date of its erection, the value of a tower erected between July 1, 2019 and July 1, 2024, is its salvage value, and the correlated value determined under a unit valuation approach shall be reduced by the difference between the original cost and the salvage value of a tower (W. Va. Code §11-6L)

**VALUE:** **$210,000 per year**

### Rationale

These preferential treatments presumably exist to benefit high-technology and internet advertising businesses and to encourage the erection of structures which host antennas or other equipment used for the purposes of transmitting cellular or wireless signals.

## OWNER-OCCUPIED RESIDENTIAL PROPERTY

**STATUTE:** W. Va. Code §§11-8-5 and 11-8-6

**PREFERENCE:** Class II is all property owned, used and occupied by the owner exclusively for residential purposes, and the aggregate of taxes assessed in any one year by all levying bodies ... shall not exceed fifty cents on each one hundred dollars' assessed valuation on Class I property; one dollar on Class II property; one dollar fifty cents on Class III property; and two dollars on Class IV property

**VALUE:** **$545.7 million per year**

### Rationale

This preferential treatment presumably exists to benefit homeowners in West Virginia by allowing residential property to be taxed at 50 percent of the rate of other real and personal property.

### Revenue Analysis

If this preferential treatment was eliminated, the cost for the Homestead Exemption would rise.

# HOMESTEAD EXEMPTION

This program provides for a $20,000 exemption against the total assessed value of single-family dwellings, including mobile or manufactured homes, owned and occupied as a residence by any person who is at least 65 years old or totally and permanently disabled and has legally resided in and paid taxes on a homestead in this State for two consecutive taxable years before filing for this exemption. In general, this represents an exclusion of the first $33,333 of the appraised residential property value. However, the exclusion can exceed $33,333 in cases of additional tax preferential treatment.

**STATUTE:** W. Va. Code §11-6B-3

**EXEMPTION:** An exemption ... shall be allowed for the first twenty thousand dollars of assessed value of a homestead that is used and occupied by the owner thereof exclusively for residential purposes when such owner is sixty-five years of age or older or is certified as being permanently and totally disabled

**VALUE:** **$51.1 million per year**

## Rationale

This exemption provides a measure of tax relief for some elderly and permanently and totally disabled taxpayers in addition to the 50 percent tax preference for all owner-occupied residential property. The exemption applies to these taxpayers regardless of income level or ability to pay.

# PROPERTY TRANSFER TAX

## OVERVIEW

The Property Transfer Tax was enacted as a State tax in 1959. The tax is imposed on the privilege of transferring real property. The State tax rate is $1.10 per each $500 of value transferred, or fraction thereof. The proceeds of the State tax are deposited in the General Revenue Fund.

In 1968, an additional county tax was imposed at a rate of $0.55 per each $500 of value, or fraction thereof. In 1989, county commissions were given the option of increasing their tax rates by an additional 55 cents per each $500 of value, upon a majority vote of the commission. Effective July 6, 2017, counties may increase the county excise tax rate to $1.65 per each $500 of value. The proceeds of the county tax are deposited into the general fund of the county in which the property is located.

Beginning July 1, 2021, the State Property Transfer Tax phases down and the county property transfers phase up according to the following schedule.

| Beginning | State Tax | Additional County Tax |
|---|---|---|
| July 1, 2021 | 90% | 10% |
| July 1, 2022 | 80% | 20% |
| July 1, 2023 | 70% | 30% |
| July 1, 2024 | 35% | 65% |
| July 1, 2025 | 0% | 100% |

Each deed or other instrument presented to the county clerk for recordation is to be accompanied by a sales listing form. The form includes, among other information, the actual consideration for the property (i.e., the value on which the tax is calculated). Payment of the tax is shown by affixing documentary stamps or other evidence of payment to the instrument presented for recordation.

## ESTIMATING COSTS OF TAX EXPENDITURES

Tax data provided to the State Tax Department by county clerks was the primary means in determining the value of each tax expenditure.

## ORGANIZATION AND ANALYSIS

The Property Transfer Tax expenditures discussed in this report are divided into three groups:

- Transfers to or from Governmental Bodies
- Transfers between Related Parties
- Certain Miscellaneous Transfers

The analysis provided for each tax expenditure includes the item’s cost to the State and a rationale.

# TRANSFERS TO OR FROM GOVERNMENTAL BODIES

Certain transfers of property are excluded from the Property Transfer Tax if the transferor or transferee is a governmental entity. These exclusions may be divided into two categories:

- Transfers to or from the United States Government
- Transfers to or from West Virginia Governmental Entities

An analysis of these expenditures follows.

## TRANSFERS TO OR FROM THE UNITED STATES GOVERNMENT

**STATUTE:** W. Va. Code §11-22-1(4)

**EXCLUSION:** "Document" ... does not include ... transfers to or from the United States

**VALUE:**

| | |
|---|---|
| **State** | **$50,000 per year** |
| **County** | **$80,000 per year** |

### Rationale

States are prohibited from imposing ad valorem or any other form of taxation on the value of real property owned by the federal government unless the federal government chooses to subject itself to this form of taxation. Therefore, this exclusion is **not** a true tax expenditure.

## TRANSFERS TO OR FROM WEST VIRGINIA GOVERNMENTAL ENTITIES

**STATUTE:** W. Va. Code §11-22-1(4)

**EXCLUSION:** "Document" ... does not include ... transfers to or from ... the State of West Virginia, or to or from any of their ... political subdivisions

**VALUE:**

| | |
|---|---|
| **State** | **$90,000 per year** |
| **County** | **$170,000 per year** |

### Rationale

The purpose of this expenditure is presumably to reduce the cost of acquiring property for the State of West Virginia and local governments. An exclusion from the Property Transfer Tax reduces the cost of purchasing property.

# TRANSFERS BETWEEN RELATED PARTIES

Property transfers excluded from the Property Transfer Tax due to the relationship of the transferor and transferee parties may be divided into three categories:

- Transfers between Related Business Entities
- Transfers between Related Individuals
- Transfers between a Principal and a Straw Party

An analysis of these expenditures follows.

## TRANSFERS BETWEEN RELATED BUSINESS ENTITIES

**STATUTE:** W. Va. Code §11-22-1(4)

**EXCLUSION:** "Document" ... does not include ... deeds made pursuant to mergers of corporations or limited liability companies, partnerships, or limited partnerships, deeds made by a subsidiary corporation to its parent corporation for no consideration other than the cancellation or surrender of the subsidiary's stock and deeds made due to the conversions of corporations or other business organizations into limited liability companies

**VALUE:**

| | |
|---|---|
| **State** | **$70,000 per year** |
| **County** | **$130,000 per year** |

### Rationale

The purpose of this expenditure is to exclude various types of property transfers between related business entities when no financial gain is realized by the business entity transferring the property.

## TRANSFERS BETWEEN RELATED INDIVIDUALS

**STATUTE:** W. Va. Code §11-22-1(4)

**EXCLUSION:** "Document" ... does not include ... transfers between husband and wife, transfers between parent and child, transfers between parent and child and his or her spouse, transfers between grandparent and grandchild and his or her spouse, without consideration

**VALUE:**

| | |
|---|---|
| **State** | **$150,000 per year** |
| **County** | **$290,000 per year** |

### Rationale

The purpose of this expenditure is to exclude various types of property transfers between related persons when no financial gain is realized by the person transferring the property.

## TRANSFERS BETWEEN A PRINCIPAL AND A STRAW PARTY

**STATUTE:** W. Va. Code §11-22-1(4)

**EXCLUSION:** "Document" ... does not include ... transfers between a principal and straw party for any reason

**VALUE:** **Minimal**

### Rationale

The purpose of this expenditure is to exclude various types of property transfers where no financial gain is realized by the party transferring the property. A straw party is defined by *Black's Law Dictionary* as "... a third party who is put up in name only to take part in a transaction. Nominal party to a transaction; one who acts as an agent for another for the purpose to taking title to real property and executing whatever documents and instruments the principal may direct respecting the property. Person who purchases property for another to conceal identity of real purchaser, or to accomplish some purpose otherwise not allowed."

# CERTAIN MISCELLANEOUS TRANSFERS

Other property transfers excluded from the Property Transfer Tax may be divided into four categories:

- Transfers Where the Value of Property is $100 or Less
- Quitclaim or Corrective Deeds
- Transfers to or from Voluntary Charitable or Educational Associations
- Other Miscellaneous Transfers

An analysis of these expenditures follows.

## TRANSFERS WHERE THE VALUE OF PROPERTY IS $100 OR LESS

**STATUTE:** W. Va. Code §11-22-1(4)

**EXCLUSION:** "Document" ... does not include ... transfer of real property where the value of the property transferred is one hundred dollars or less

**VALUE:** **Minimal**

### Rationale

The presumed purpose of this expenditure is ease of administration.

## QUITCLAIM OR CORRECTIVE DEEDS

**STATUTE:** W. Va. Code §11-22-1(4)

**EXCLUSION:** "Document" ... does not include ... quitclaim or corrective deeds without consideration

**VALUE:**

| | |
|---|---|
| **State** | **$40,000 per year** |
| **County** | **$70,000 per year** |

### Rationale

The purpose of this expenditure is to exclude quitclaim or corrective deeds from Property Transfer Tax. Quitclaim deeds are defined by *Black's Law Dictionary* as, "A deed of conveyance operating by way of release; that is, intended to pass any title, interest, or claim which the grantor may have in the premises, but not professing that such title is valid, nor containing any warranty or covenants for title ..."

## TRANSFERS TO OR FROM VOLUNTARY CHARITABLE OR EDUCATIONAL ASSOCIATIONS

**STATUTE:** W. Va. Code §11-22-1(4)

**EXCLUSION:** "Document" ... does not include ... gifts to or transfers from or between voluntary charitable or educational associations or trustees thereof and like nonprofit corporations having the same or similar purposes

**VALUE:** **Minimal**

### Rationale

The purpose of this expenditure is to exclude property transfers to or from charitable or educational associations from the Property Transfer Tax. Presumably, this exclusion exists in recognition of the public good rendered by these organizations.

## OTHER MISCELLANEOUS TRANSFERS

**STATUTE:** W. Va. Code §11-22-1(4)

**EXCLUSION:** "Document" ... does not include ... wills ... testamentary or inter vivo trusts, deeds of partition ...

**VALUE:** **Minimal**

### Rationale

The purpose of this expenditure is to exclude various types of property transfers where no financial gain is realized by the party transferring the property.

February 2025

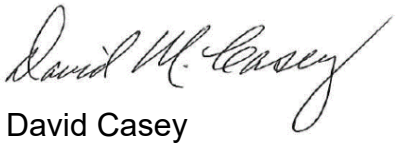
To members of the 2025-27 Legislature:

Every two years, pursuant to section 16.425 of the Wisconsin Statutes, the Department of Revenue is required to prepare a report of existing tax exemption devices. This report provides a comprehensive review of tax exemption devices and their corresponding fiscal effects.

The report represents the efforts of staff in the Department of Revenue, Division of Research and Policy, with contribution from the Office of the Commissioner of Insurance. Diligent effort has been made to ensure that the report is as accurate and complete as possible.

The Department of Revenue hopes that you find the document to be a useful resource in the formulation of public policy decisions. Research staff in the department can answer any questions you may have concerning material in this document.

Sincerely,



David Casey
Secretary of Revenue Designee

# INTRODUCTION

Wisconsin's state and local governments rely on tax revenues to fund valuable services to our citizens. Ensuring that our system of taxation is fair, equitable and efficient is vital to our economic success and quality of life. In setting tax policies, we must consider taxpayers' ability to pay, the impact of those policies on economic development and the interaction of tax policies with other policy goals.

Tax exemptions are an important component of Wisconsin tax policies. A tax exemption device is "…any tax provision that exempts, in whole or in part, certain persons, income, goods, services or property from the impact of established taxes."[1] Granting a tax exemption can be a powerful tool for providing economic development incentives or for mitigating the regressive qualities of certain tax types. However, exemptions always come with a cost. Exemptions reduce revenues otherwise available for programs or for tax relief for taxpayers who do not benefit from the exemption. Therefore, it is critical that policymakers understand both the costs of exemptions and their effectiveness at achieving their intended goal.

Recognizing the need for this information, the Legislature mandated that a report be presented biennially to the Legislature listing all tax exemption devices and their fiscal effects. First presented in 1975, this is the 25th report compiled by the Department of Revenue.

**Highlights of the Report**

The report is organized by tax type. For each, it describes the various exemptions that are currently authorized and provides estimates of the fiscal effects in fiscal year 2023-24 (FY24) where data is available. Detailed explanations of each tax type are available on the Department of Revenue website at www.revenue.wi.gov.

On a case-by-case basis, the estimates provide a valuable benchmark for discussion of whether the policy justifications warrant the loss in revenue or if other tools, such as direct expenditure programs, could be considered as alternatives. As the examples below demonstrate, determining the degree to which exemptions meet their policy objectives is challenging, due to the difficulty of quantifying the outcomes and, in some cases, the need to make assumptions regarding the underlying goal or goals.

*Individual Income Tax Exemptions*

The individual income tax is the largest generator of revenues for state government. In FY24, income tax collections of $9.718 billion represented 45.6 percent of state general purpose revenue (GPR) tax collections. Exemptions from the income tax include deductions or exclusions from taxable income and tax credits.

- *Tax exclusions* are types of income that are not taxable and do not need to be reported on the tax return, such as income from qualifying scholarships.
- *Deductions* are amounts that are subtracted from total taxable income that is reported, such as a deduction for medical care insurance premiums and the standard deduction.
- *Credits* are a direct reduction in the tax liability that is owed.
- *Nonrefundable credits* are credits that cannot exceed total tax liability.
- *Refundable credits* can exceed tax liability and can result in a payment due to the taxpayer.

Many income tax exemptions are based on Wisconsin's consistency with federal tax policy. For example, Wisconsin conforms to the federal exclusion of payments received for sickness or injury benefits, which had an estimated cost of $1.30 billion for Wisconsin in FY24. While this is clearly a high-cost exemption, removing the exemption would reduce the benefit of other policy programs such as worker's compensation, proceeds from insurance policies and allowance for injuries incurred in military action.

[1] Wisconsin Statutes Section 16.425(2).

Other income tax exclusions are unique to Wisconsin. For example, Wisconsin allows taxpayers to subtract from income 30 percent of the capital gains on assets held more than one year. This exclusion cost $305 million in FY24.

An example of a refundable tax credit is the homestead credit that provides a credit to low-income renters and homeowners to offset a portion of property taxes. The cost of the program in FY24 was $41.1 million.

*Sales Tax Exemptions*

Wisconsin generated $7.587 billion in FY24 from the 5 percent sales and use tax, which represented 35.6 percent of state GPR taxes. In addition, counties and select municipalities may collect additional sales tax from the same tax base. Sales tax exemptions result in lower revenues for both the state and local governments.

One of the largest exemptions from the sales tax is the exemption for food purchased for home consumption, which was estimated to reduce state revenues by $920.0 million in FY24. Another significant exemption is for goods sold to other state and local governments and schools, which reduced revenues by an estimated $476.7 million in FY24. Removing this exemption would result in a situation where one taxing authority imposes a tax on another.

In contrast to tangible goods that are taxed unless specifically exempt in statute, services are exempt unless they are singled out for taxation. Of those services that are exempt, the largest measurable exemptions are in the areas of professional services and business services. These exempt categories include a variety of services such as those provided by health professionals (accounting for $919.7 million in foregone revenue in FY24).

*Property Tax Exemptions*

The local property tax generates more revenue than either the state sales tax or the income tax. Property taxes collected in 2024 for taxes levied in 2023 totaled $13.09 billion, which represents the combined levy of school districts, municipalities, counties, technical colleges and special districts. The state establishes policies regarding what real and personal property is subject to the local property tax, guided by the uniformity clause of the state constitution, which prohibits differential treatment of most property including partial exemptions.

Real property that is exempt from taxation includes property owned by religious establishments, educational and medical facilities, and low-income housing owned by nonprofit benevolent associations. In total, it is estimated that the value of exempt real property is $41.03 billion. There are also a number of exemptions to personal property taxation, the combined value of which is estimated at $40.57 billion.

If the exempt property examined in this report were taxable, property tax rates would be reduced by an estimated 7.31 percent statewide, ranging from an 8.32 percent average reduction in cities to a 5.71 percent average reduction in towns.

Property tax exemptions have implications for economic development and the state's health, housing and education policies. The impact of property tax exemptions should be evaluated with consideration to both the impact on the owners of remaining taxable property and policy goals.

*Other Exemptions*

The report also discusses exemptions relating to the corporate income tax, insurance premium taxes, economic development surcharge, real estate transfer fees, public utility taxes, excise taxes, and forest crop and managed forest laws.

**Limitations of the Report**

Readers should be aware of several limitations to the report.

The fiscal impacts of tax exemption devices are often difficult to measure and estimates of the effect of tax exemptions are subject to limitations and the need to make assumptions. Generally, in calculating each fiscal effect, it is assumed that only the provision in question is changed and that all other aspects of the tax system remain the same.

All the estimates in this report are presented as the impact of the exemption device in FY24. Changes in taxpayer behavior or economic activities since that time are not reflected.

Consistent with accepted revenue estimating practices, the estimates also assume that economic variables, taxpayer behavior and other factors would be unaffected by the repeal of an exemption device. For some tax exemption devices, these assumptions are open to question. For example, the removal of an income tax deduction could significantly alter spending or investment behavior.

In addition, the estimates are only as good as the data available. In some cases, the estimates are very reliable. In other cases, little data is available, and estimates must rely on external sources or indirect information. Therefore, the estimates should generally be viewed as indicative only of the order of magnitude of tax exemption costs. Discussion on the data sources and methodologies used in constructing the estimates are contained in the individual chapters of this report.

Due to these data limitations and interactions between various exemptions, it is not necessarily accurate to sum across the exemptions to arrive at a total fiscal impact. Each estimate is made in isolation. If two or more items were eliminated, the combined effect may be more or less than the sum of their respective estimates.

The descriptions of tax exemption devices included in this report should not be considered guidance documents for taxpayers to use in preparing and filing taxes. For official publications, fact sheets and instructions, visit the Department of Revenue website: www.revenue.wi.gov.

# INDIVIDUAL INCOME TAX

**Introduction**

The individual income tax is Wisconsin's largest state tax source, generating $9.718 billion, or 44.9 percent of state general purpose revenue taxes in FY24. Wisconsin first enacted its income tax in 1911, two years before the federal income tax was imposed.

Wisconsin imposes the income tax on a base that generally conforms to the base for the federal income tax. Federal adjusted gross income (FAGI) is the starting point for the Wisconsin tax calculation. FAGI is calculated on the federal tax return by reporting the various kinds of income – for instance, wages and salaries, interest and dividends, business earnings, retirement income – and then making adjustments for certain kinds of exempt income or deductible expenses. Major adjustments and exemptions include:

- Certain contributions to retirement plans and exemptions for a portion of retirement income.
- Deductions for health insurance premiums paid by individuals and exemptions for health insurance benefits provided by employers.
- Trade and business expenses as well as certain employee job expenses that offset income from these sources.
- One-half of the self-employment tax paid for social security and Medicare coverage.
- Up to $2,500 in interest on student loans when income does not exceed prescribed limits.

In the Wisconsin tax calculation, both additions and subtractions are made to FAGI in order to determine Wisconsin adjusted gross income (WAGI). Additions are types of income that are exempt from federal tax but subject to state tax or deductions allowed for federal but not Wisconsin purposes. The major addition is state and municipal bond interest, which the federal government may not tax. Several other additions reflect that certain state tax credits are a form of income and must be included as such.

Subtractions are types of income taxable under federal law but exempted by Wisconsin and certain expenses for which Wisconsin allows a deduction. Major subtractions include:

- 30 percent of capital gains on assets held for more than one year. These gains are fully included in federal taxable income, though long-term gains are taxable at lower rates than ordinary income.
- Interest on U.S. government bonds, which states may not tax.
- Pensions received by persons who were members of or retired from Milwaukee city and county retirement funds, the state teachers' retirement fund, and the civil service retirement system prior to January 1, 1964. In addition, veterans' pensions are exempt from Wisconsin income tax.
- All social security benefits that are taxable for federal purposes. Up to 85 percent of social security benefits are subject to federal tax, but Wisconsin does not tax social security benefits.
- A portion of unemployment compensation. Unemployment compensation is only subject to Wisconsin tax when income exceeds $18,000 for married couples and $12,000 for most other filers.
- Tuition payments to postsecondary institutions in Wisconsin and to schools in Minnesota covered under Minnesota-Wisconsin tuition reciprocity. For each qualified student, the subtraction is limited to two times the average amount charged to resident undergraduates by the University of Wisconsin System at four-year institutions.
- A portion of health insurance premiums not already excluded from federal income.

WAGI is reduced a standard deduction and personal exemptions to yield Wisconsin taxable income. Wisconsin provides a sliding scale standard deduction, equal to a maximum when income is below a specified level, this maximum deduction is phased down to $0 as income increases. For instance, in 2024, the deduction for single persons was $13,230 when WAGI was less than $19,070, and it declined to $0 as income increased from $19,070 to $129,320. The deduction parameters for each filing status are shown in Table 1; the maximum deduction and phase-out range are indexed annually for inflation. Unlike federal law, Wisconsin does not allow itemized deductions; instead, it provides an itemized deductions credit, discussed below, equal to 5 percent of certain deductions in excess of the standard deduction.

**TABLE 1**
**WISCONSIN STANDARD DEDUCTIONS, 2024**

| Filing Status | Maximum Deduction | Phase-Out Range | Phase-Out Rate |
|---|---|---|---|
| Single | $13,230 | $19,070 - $129,320 | 12% |
| Head of Household | $17,090 | $19,070 - $55,779* | 22.515% |
| Married Filing Jointly | $24,490 | $27,520 - $151,344 | 19.778% |
| Married Filing Separately | $11,630 | $13,060 - $71,863 | 19.778% |

*Income at which head of household deduction equals the deduction for single filers. Above this income level, the deduction for heads of households is the same as that for single persons.

WAGI is also reduced by a personal exemption equal to $700 for each tax filer, spouse and dependent. There is an additional exemption of $250 for each tax filer and spouse age 65 or older.

Wisconsin taxable income, equal to WAGI less the standard deduction and personal exemptions, is the base to which statutory tax rates are applied to yield gross tax liability. As Table 2 shows, Wisconsin imposes a series of graduated tax rates, ranging from 3.5 percent to 7.65 percent in 2024. The top rate applies to filers with taxable income exceeding $315,310 for single persons and $420,420 for married couples filing jointly. Bracket ceilings are indexed for inflation.

**TABLE 2**
**WISCONSIN TAX RATES AND BRACKETS, 2024**

| Tax Rate | Taxable Income Brackets | | |
|---|---|---|---|
| | Single | Married - Joint | Married - Separate |
| 3.50% | $0 - $14,320 | $0 - $19,090 | $0 - $9,550 |
| 4.40% | $14,320 - $28,640 | $19,090 - $38,190 | $9,550 - $19,090 |
| 5.30% | $28,640 - $315,310 | $38,190 - $420,420 | $19,090 - $210,210 |
| 7.65% | More than $315,310 | More than $420,420 | More than $210,210 |

Finally, gross tax is reduced by credits against the tax liability. Major nonrefundable credits, which are limited to the amount of income tax liability otherwise due, include:

- The itemized deductions credit, equal to 5 percent of the amount by which certain federal itemized deductions exceed the standard deduction. Deductions allowed for the credit are those for medical expenses, mortgage interest on a primary residence located in Wisconsin, investment interest on securities the income from which is subject to Wisconsin tax, charitable contributions, and certain casualty losses that are directly related to a presidentially declared disaster. Individuals may claim the itemized deductions credit even if they do not itemize their deductions on their federal tax return.

- The school property tax credit, equal to 12 percent of the first $2,500 of property taxes, or rent constituting property taxes, for a maximum credit of $300. Rent constituting property taxes equals 20 percent of rent if heat is included in rent and 25 percent if heat is not included.

- The married couple credit for joint filers when both spouses have earned income. The credit is equal to 3 percent of the earnings of the lower earning spouses, but not more than $16,000 of earnings or $480 of credit.

- Historic rehabilitation credits, including a supplement to the federal historic rehabilitation credit, equal to 20 percent of qualifying expenditures under the federal Internal Revenue Code and a state historic rehabilitation credit equal to 25 percent of qualified expenditures to substantially rehabilitate certified historic buildings.

- The manufacturing and agriculture credit, equal to 7.5 percent of income from qualified production activities attributable to manufacturing or agricultural operations.

- A credit for income taxes paid to other states on income that is also taxable to Wisconsin. No credit is allowed for income that falls under a Wisconsin reciprocity agreement. Under a reciprocity agreement, each state agrees not to tax the wages earned within its borders by residents of the other state. Wisconsin currently has reciprocity agreements with Illinois, Indiana, Kentucky and Michigan. Because the number of Wisconsin residents working in Illinois is substantially higher than the number of Illinois residents working in Wisconsin, Wisconsin makes annual payments to compensate Illinois for the net revenue loss incurred as a result of reciprocity.

In addition to nonrefundable tax credits, Wisconsin also offers refundable credits, which are paid to claimants in the form of a tax refund when the amount of the credit exceeds tax otherwise due. These credits are essentially subsidies provided to particular types of claimants through the tax system, but the amount of credit awarded is not tied specifically to the amount of tax due. These credits are:

- The homestead credit, which equals up to 80 percent of property taxes or rent constituting property taxes when household income does not exceed $8,060. Maximum property taxes allowable under the credit are $1,460, so the maximum credit is $1,168. The credit is phased out as household income rises from $8,060 to $24,680. Rent constituting property taxes equals 20 percent of rent when heat is included in rent and 25 percent of rent when heat is not included. Individuals must be at least 62 years old, have a disability, or have earned income in order to qualify for the credit.

- The earned income tax credit (EITC), calculated as a percentage of the federal earned income tax credit depending on family size: 4 percent for persons with one child, 11 percent for persons with two children, and 34 percent for persons with three or more children. In 2024, the federal credit for persons with one child was equal to 34 percent of earnings up to $12,390, for a maximum credit of $4,213. The credit for single persons was phased out as the greater of FAGI or earnings rose from $22,720 to $49,082; the phase-out floor and ceiling were $6,920 higher for married couples. For persons with two children, the federal credit was 40 percent of earnings up to $17,400, for a maximum credit of $6,960. The credit was phased out for single persons as income or earnings rose from $22,720 to $55,768; the phase-out floor and ceiling were $6,920 higher for married couples. For persons with three or more children, the federal credit was 45 percent of earnings up to $17,400, for a maximum credit of $7,830. The credit was phased out for single persons as income or earnings rose from $22,720 to $59,899; the phase-out floor and ceiling were $6,920 higher for married couples. Thus, the maximum Wisconsin credits were $169 for persons with one child, $766 for persons with two children, and $2,662 for persons with three or more children.

- The Farmland Preservation credit is available for owners of farmland that was zoned exclusively for agricultural use or covered under a farmland preservation agreement with the state. The credit was revised and expanded beginning in tax year 2010. Under current law the credit may be claimed using either the old credit formula or the new credit formula depending on the claimants' farmland preservation agreements. The old credit is a percentage of a base amount determined using household income and the property taxes levied against the farmland. The new credit is a flat payment of $12.50 or $10 per acre of qualifying farmland.

- The veterans and surviving spouses' property tax credit equal to the amount of property taxes paid on the claimant's principal dwelling. This credit is available to certain resident disabled veterans and un-remarried surviving spouses of veterans who died while on active duty, during training, or had a service-connected disability rating of 100 percent or a 100 percent disability rating based on

individual unemployability at the time of death. In all cases, the veteran must have been a Wisconsin resident at the time of entry into service or a resident for any consecutive five-year period after entry into active-duty service. In the case of surviving spouses, the veteran must also have been a resident at the time of death. Surviving spouses may also qualify if they receive dependency and indemnity compensation.

**Estimates of Fiscal Effects**

Estimates of individual income tax exemption devices are shown below and compiled in Table 3 at the end of this section. The tax exemptions are divided into four broad categories: (1) exclusions from federal gross income, (2) adjustments to federal gross income, (3) Wisconsin modifications to federal adjusted gross income and (4) Wisconsin state tax credits. The report identifies the exemption devices, indicates the statutory sections allowing the exemption devices, and provides estimates of the fiscal effects in FY24. In some cases, related exemption devices may appear in more than one section. For example, certain medical insurance premiums are excluded from federal gross income, while other amounts can be claimed as an adjustment to federal gross income or as a Wisconsin subtraction from federal adjusted gross income. In these cases, the component fiscal effects are listed separately in each section.

Several approaches were used to generate the fiscal estimates. The estimates of exclusions from gross income, which are not reported on tax returns, were generally based on estimates of the fiscal effect of federal tax expenditures – i.e., federal tax exemption devices – contained in the annual budget document issued by the Executive Office of the President. Estimates prepared by the Congressional Budget Office and the staff of the Joint Committee on Taxation were also considered. Generally, Wisconsin's share of the federal fiscal effect was determined using the state's share of total federal adjusted gross income on all federal tax returns, and then adjustments were made to account for the differences in federal and Wisconsin tax rates.

Most of the other estimates were based on Wisconsin-specific data sources, including the 2022 Wisconsin individual income tax model, aggregate statistics from the 2023-24 tax processing year, aggregate statistics from tax year 2022 returns filed during calendar year 2023, and tax collection statistics for FY24. The tax model uses data either from aggregate statistics or derived from a statistically stratified sample of approximately 24,000 tax returns, weighted to reflect the statewide population of tax filers in 2022. This model was used to simulate the effect of tax exemption devices. The 2023-24 tax processing aggregate statistics were drawn from all tax returns processed from July 1, 2023, to June 30, 2024, while the 2022 tax year aggregate statistics were drawn from all 2022 tax returns processed during calendar year 2023.

It is important to note that the fiscal impacts for the exemption devices are calculated independently. In many cases, tax provisions have nontrivial impacts on each other. For example, an exclusion from gross income may allow a taxpayer to have income below the phase-out threshold of another deduction. Absent the exclusion, the fiscal effect of the deduction would be different. As such, the combined effect of two or more provisions may be higher or lower than the separately identified effects.

| ***Exclusions from Federal Gross Income*** | ***FY24 Fiscal Effect*** |
|---|---|

An exclusion is a type of income that is not included in federal gross income by provisions of the Internal Revenue Code or under the U.S. Constitution, or in Wisconsin income by provisions of the Wisconsin Statutes. Excluded income does not have to be reported on the income tax return.

| | |
|---|---|
| **Gain from Sale or Exchange of Residence (Home), IRC 121** | **$298,000,000** |

A taxpayer may exclude from income up to $250,000 ($500,000 for married couples filing jointly) of capital gain realized on the sale or exchange of a residence. The taxpayer generally must have owned and occupied the home as a principal residence for at least two of the five years prior to the sale. An individual not meeting the ownership or residence requirements is allowed a pro rata amount of the exclusion if the sale or exchange is due to a change in employment, health or other unforeseen circumstances. The exclusion is allowed on only one sale every two years, and it is not permitted on properties in which depreciation is allowed for rental or business use.

| | |
|---|---|
| **Gain from Sale or Exchange of Qualified Small Business Stock, IRC 1202, s. 71.98(5)** | **$6,400,000** |

For taxable years beginning after December 31, 2018, Wisconsin conforms to the federal exclusion for gains from small business stock. The qualifying stock must be held by individuals for more than five years, while the qualifying small business must have gross assets that do not exceed $50 million at the time the stock is issued.

| | |
|---|---|
| **Social Security Benefits, IRC 86** | **$182,000,000** |

Old-age and survivors' insurance benefit payments, state old-age assistance payments, and Medicare benefits are generally excluded from the gross income of the person receiving such benefits. Federal law subjects up to 50 percent of benefits to tax when income exceeds a base amount and up to 85 percent of benefits when income exceeds an adjusted base amount. In this determination, income equals modified adjusted gross income plus one-half of social security.

The base amounts for determining tax on up to 50 percent of benefits are $25,000 for single persons, including married persons filing separately who lived apart from their spouses for the full tax year; $32,000 for married couples filing a joint return; and $0 for married persons filing separately who lived with their spouses for at least part of the year. The adjusted base amounts for taxing up to 85 percent of benefits are $34,000 for single persons, $44,000 for married couples, and $0 for married persons filing separately and living with their spouses for at least part of the year.

Wisconsin does not tax any social security benefits. Table 3 provides separate fiscal estimates of the state revenue loss resulting from the federal exclusion and the loss resulting from the additional state subtraction from FAGI.

| | |
|---|---|
| **Railroad Retirement Annuities and Pensions, IRC 86** | **$1,350,000** |

Annuities or pensions paid under the 1935 and 1937 Railroad Retirement Acts are generally excluded from gross income. Up to 50 percent of Tier 1 retirement benefits are taxable for federal tax purposes, but the Railroad Retirement Acts specifically prohibit state taxation of retirement benefits, so Tier 1 benefits are completely excluded from gross income for state purposes.

| | |
|---|---|
| **Public Assistance, IRC 61** | **$2,350,000** |

Assistance provided under the Wisconsin Works program, Medicaid, general relief and other public assistance to individuals and families is excluded from the gross income of the recipients.

| | |
|---|---|
| **Sickness and Injury Benefits, IRC104 to 106** | **$1,300,000,000** |

Compensation for sickness or personal injury excluded from gross income includes the following:

- Amounts received under the worker's compensation and social security acts;
- Damages received as a result of a court suit or other legal settlement in a personal injury case;
- Proceeds received from an accident, health or medical insurance policy paid for by the taxpayer;
- A pension, annuity or similar allowance for sickness or injury sustained while active in the armed forces, the Coast and Geodetic Survey, the Public Health Service, or the Foreign Service, and disability income received by an employee of the United States for injuries incurred in a terrorist attack during the performance of duties outside the U.S.;
- Employer contributions to an accident or health plan designed to benefit the employee;
- Sick pay or employer-financed disability benefits, other than reimbursement for medical expenses deducted in the same year or a prior year, which is regarded as taxable income; and
- Earnings from medical savings accounts and health savings accounts.

| | |
|---|---|
| **Distributions from Retirement Plans for Premiums for Health and Long-Term Care Insurance, IRC 402, P.L. 109-280** | **$2,520,000** |

Pension distributions from government retirement plans to retired public safety officers used to pay health insurance are excluded from income up to a maximum of $3,000 annually.

| | |
|---|---|
| **Group Term Life Insurance Purchased for Employees, IRC 79** | **$18,100,000** |

The cost of group term life insurance provided to an individual under a policy carried by an employer is generally considered taxable income. However, the cost incurred in purchasing the first $50,000 worth of coverage is excluded from the gross income of employees.

| | |
|---|---|
| **Death Benefits, IRC 101** | **$118,000,000** |

Amounts paid under a life insurance contract are excluded whether these sums are paid at one point or over time.

| | |
|---|---|
| **Meals and Lodging to Employees, IRC 119** | **$40,200,000** |

Employees may exclude from gross income the value of any meals or lodging provided to them for the convenience of the employer. Meals must be furnished on the employer's business premises and lodging must have been accepted by an employee as a condition of employment.

| | |
|---|---|
| **Scholarships and Fellowships, IRC 117** | **$24,000,000** |

Scholarships and fellowships are excluded from gross income when received by a degree candidate at an educational institution and when used to pay tuition and course-related fees or to purchase books, equipment and supplies. Amounts used for room and board, however, must be included in income. Scholarships and fellowships do not qualify for the exclusion if they are made either to compensate the recipient for services provided, or to allow the recipient to pursue studies or research that primarily benefit the person or institution paying the scholarship and fellowship.

| | |
|---|---|
| **Awards and Prizes, IRC 74(b) and (c)** | **Minimal** |

Awards or prizes received in recognition of religious, charitable, scientific, educational, literary or civic achievement may be excluded from gross income if the amount received is transferred to a government agency or a charitable organization. Further, the exclusion applies only if the recipient was selected without any action on his or her part to enter the competition for the award and only if the recipient is not required to render any substantial future services as a condition of receiving the award.

Employee awards for length of service or achievement are generally excludable from gross income to the extent of the deduction claimed by the employer. Deductions of such awards are limited.

| | |
|---|---|
| **Rental Value of Parsonages, IRC 107** | **$5,190,000** |

The allowance paid to a minister for the purpose of renting a home, or the rental value of the home furnished as part of compensation, is excluded from gross income. In both cases, the associated utility expenses are considered part of the allowance and, as such, excluded from gross income.

| | |
|---|---|
| **Reduced Armed Forces Retirement Pay, IRC 122** | **Not Available** |

The amount deducted from retirement or retainer pay of members or former members of the United States armed forces under the Retired Serviceman's Family Protection Plan is excluded from gross income. The reduction in retirement pay is made by contract between the member of the service and the armed forces for the purchase of an annuity. This reduction is between 12.5 percent and 50 percent of retirement pay, but in no case less than $25. If the person should die before the amount of the contract is paid, the survivor

receiving the annuity may exclude from gross income any reductions in annuity payments used to conclude the contract.

| **Combat Pay and Other Armed Forces Exclusions, IRC 112 and 134** | **$161,000,000** |
|---|---|

The monthly compensation of members of the United States armed forces is excluded from gross income if the taxpayer served in a combat zone. The exclusion for commissioned officers is limited to the maximum amount that enlisted personnel may exclude. Currently designated combat zones and hazardous duty areas include:

- The Sinai Peninsula;
- Afghanistan, along with Uzbekistan, Kyrgyzstan, Pakistan, Tajikistan, Jordan, Yemen, Djibouti and Somalia;
- Kosovo area defined by executive order as the Federal Republic of Yugoslavia (Serbia/Montenegro), Albania, the Adriatic Sea and the Ionian Sea north of the 39th parallel; and
- The Arabian Peninsula, including the Persian Gulf, the Red Sea, the Gulf of Oman, the part of the Arabian Sea that is north of 10 degrees north latitude and west of 68 degrees east longitude, the Gulf of Aden, and the total land areas of Iraq, Kuwait, Saudi Arabia, Oman, Bahrain, Qatar, the United Arab Emirates, Jordan, Lebanon and Turkey east of 33.51 degrees east longitude.

Exclusions applicable to miscellaneous armed forces income are:

- All payments of benefits under any law administered by the Veterans' Administration (38 U.S. Code 3101);
- A pension of $100 per month for all persons over the age 65 who are on the Army, Navy, Air Force or Coast Guard Medal of Honor roll (38 U.S. Code 562);
- Benefits under World War Adjusted Compensation Act;
- Benefits under World War Veterans' Act;
- Leave compensation payment under Armed Forces Leave Act;
- G.I. Bill educational benefits; and
- In-kind benefits provided to armed forces personnel.

| **Life Insurance Dividends, IRC 7702** | **$24,100,000** |
|---|---|

Dividends on matured insurance policies may be excluded from gross income for income tax purposes.

| **Cancellation of Business Property Indebtedness, IRC 108(a)** | **Minimal** |
|---|---|

A taxpayer need not recognize income when a debt of the taxpayer is fully or partially canceled if the individual incurred the debt in connection with property used in a trade or business. The taxpayer must agree to reduce the basis (cost) of the property if an economic benefit was realized as a result of the discharge of a debt for the purpose of determining future depreciation and capital gains or losses.

| **Income Realized from Debt Cancellation through Bankruptcy, IRC 108** | **Not Available** |
|---|---|

When a debt is forgiven in connection with a bankruptcy proceeding, the income realized is not subject to tax unless the principal purpose of the bankruptcy plan is the evasion of income taxes.

| **Interest on Certain State and Local Bonds, ss. 66.1201(14)a, 66.1333(5)(a)4.c and 71.05(1)(c)** | **Not Available** |
|---|---|

In general, interest on obligations of state and local governments is subject to the Wisconsin income tax, even though such income may be exempt from federal taxation. However, interest on the following bonds is exempt:

- Bonds issued by a city housing authority, city redevelopment authorities, local exposition districts,

sponsoring municipalities assisting local exposition districts and local cultural arts districts;
- Certain bonds issued by the Wisconsin Housing and Economic Development Authority (WHEDA);
- Wisconsin professional baseball park and football stadium district bonds;
- Wisconsin Housing Finance Authority (WHFA) bonds (that is, bonds issued before 1983, when WHFA became known as WHEDA);
- Bonds issued by the Government of Puerto Rico, Guam, the Virgin Islands, the Northern Mariana Islands, or for bonds issued after October 16, 2004, the Government of American Samoa;
- Wisconsin higher education bonds;
- Wisconsin Aerospace Authority bonds;
- Certain bonds issued by the Wisconsin Health and Educational Facilities Authority; and
- Specified conduit revenue bonds.

| **Gifts and Inheritances, IRC 102** | **Not Available** |
|---|---|

The value of property received by gift, inheritance or bequest is excluded from gross income. This exclusion does not apply to the income from property received by gift or bequest, nor to a gift or bequest consisting of income from property rather than the property itself. No administrative records are available on the total value of property transferred by gift or inheritance, so a comprehensive estimate of the revenue loss has not been calculated.

| **Appreciation of Property Held at the Time of Death, IRC 1014** | **$195,000,000** |
|---|---|

Appreciation (gain) from property held at the time of death is not subject to tax for either the deceased or his or her heirs. The basis of inherited property generally is its fair market value at the time of the decedent's death, rather than its cost when the decedent acquired it. As a result, the appreciation of the property while it was held by the decedent – the difference in fair market value at the time of death and the decedent's cost of purchasing the property – is not taxed.

| **Employer Contributions to Pension Plans and Net Pension Fund Earnings, IRC 401 to 404A, 406 to 407 and 409 to 417** | **$1,070,000,000** |
|---|---|

Amounts contributed to qualified pension, profit-sharing, stock bonus, bond purchase and annuity plans by an employer on behalf of his or her employees are generally not treated as income taxable to the employees at the time the contributions are made. Further, employers may generally deduct these contributions from gross income, and the earnings that accrue on the contributions are excluded from the employee's income, so long as the assets are retained within a qualified plan.

Tax is imposed when distributions are made from the plan to employees in the form of pensions and annuities. At that time the taxable portion of the plan benefits must be included in the gross income of the recipient. The portion of the benefits representing the employee's contribution to the plan is not taxable upon distribution if the employee's contributions were included in income and subject to tax at the time the contributions were made.

Taxing employer contributions and earnings on pension plan assets at the time of withdrawal, rather than at the time of contribution, results in a deferral of revenue. Moreover, it may result in a revenue loss if the plan beneficiary pays tax at a lower rate after retirement.

| **Employer Reimbursement of Employee's Educational Expenses, IRC 127** | **$9,070,000** |
|---|---|

Up to $5,250 of non-job-related employer-provided educational assistance may be excluded from gross income.

| **Employer-Provided Child Care, IRC 129** | **$4,270,000** |
|---|---|

The value of child or dependent care services provided by an employer under a nondiscriminatory plan is excluded from gross income to the extent that the amount excluded does not exceed $5,000 ($2,500 for

married separate filers). Further, the value of services excluded may not exceed the earned income of the employee or the earned income of an employee's lower-earning spouse.

| **Employer-Provided Adoption Assistance, IRC 137** | **$2,470,000** |
|---|---|

Up to $16,810 per child in adoption assistance provided by an employer is excluded from gross income in tax year 2024. The $16,810 exclusion is allowed for special needs adoption even if that amount exceeds actual expenses incurred. The exclusion is phased out for persons with modified adjusted gross income between $252,150 and $292,150. The amount excludable and the phase-out ranges are indexed for inflation.

| **Individual Retirement Accounts (IRAs), IRC 408, 408A, and 530** | **$147,000,000** |
|---|---|

Taxpayers may receive tax benefits from three different types of individual retirement accounts under federal law: the traditional IRA, the Roth IRA and the education IRA. The tax expenditure combines the impact of deductions of contributions to IRAs and exclusions/deferrals of earnings from IRAs.

1. Traditional IRA

   Persons contributing to a traditional IRA may claim a deduction for the amount contributed and are not taxed on the earnings that remain in a traditional IRA. IRA contributions and earnings on them are taxable when withdrawals are made from the account.

   The full deduction for contributions is limited to persons who are not covered by an employer-provided retirement plan or who are covered by such plans but have adjusted gross income, for tax year 2024, less than $77,000 for single persons, $123,000 for married persons filing jointly or $0 for married persons filing separately. The deduction is phased out over the next $10,000 of income ($20,000 for married persons filing jointly).

   For tax year 2024, the deduction is generally limited to $7,000 for each tax filer and spouse, but not more than the person's earnings. For married couples, the combined IRA deduction may not exceed combined earnings; in other words, a spouse with little or no earnings may still claim an IRA deduction if the other spouse has earnings in excess of his or her own IRA deduction. These maximum contributions are coordinated among the three types of IRAs; the combined contribution to all IRAs for any one person cannot exceed $7,000 or the person's earnings. Further, taxpayers age 50 and older are allowed additional "catch-up" contributions of $1,000 in 2024.

   With limited exceptions, amounts in a traditional IRA cannot be withdrawn without penalty prior to age 59½. Early withdrawals must be included in gross income and are subject to an additional 10 percent federal penalty tax. The 10 percent early withdrawal penalty does not apply in cases of death and disability or when the withdrawals are used for qualified higher education expenses or first-time homeowner expenses (up to $10,000). Wisconsin imposes a state penalty equal to 33 percent of the federal penalty. Amounts withdrawn from an IRA after age 59½ must be included in gross income in the year of the withdrawal. Withdrawals generally must begin after the individual reaches the age of 70½. Insufficient withdrawals after age 70½ are subject to a penalty tax.

   Persons can make nondeductible contributions to their retirement accounts and the earnings on those nondeductible contributions can be excluded from income, as long as the assets are retained within the retirement account.

2. Roth IRA

   A Roth IRA is an account for which the contributions are not deductible when made, but qualified distributions, including earnings on contributions, are not taxable. In tax year 2024, persons whose adjusted gross income does not exceed $146,000 if single, $230,000 if married filing jointly, or $0 if married filing separately may contribute up to $7,000 per person per year to a Roth IRA. The amount of contribution permitted is phased out as income rises to $161,000 for single filers, $240,000 for married joint filers, and $10,000 for married separate filers. Individuals who are married filing

separately and did not live with their spouses at any time during the year are treated as single for the purpose of contribution limits.

The increases in contribution limits and the catch-up contributions for taxpayers age 50 and older that apply to traditional IRAs also apply to Roth IRAs.

Distributions from a Roth IRA are not subject to tax if they are made no earlier than five years after the account is established and if the taxpayer has reached age 59½. Earlier distributions are not subject to tax if they are made because of the death or disability of the taxpayer or for first-time homebuyer expenses (up to $10,000). Nonqualified distributions must be included in gross income and are subject to a 10 percent federal penalty tax and a state penalty equal to 33 percent of the federal penalty. Unlike a traditional IRA, distributions from a Roth IRA are not required upon reaching the age of 70½.

3. Education IRA

An education IRA (also known as a Coverdell Education Savings Account) is similar to a Roth IRA: contributions are not deductible, but qualified distributions are not subject to tax if they are used to pay the postsecondary expenditures of the beneficiary.

For tax year 2024, contributions of up to $2,000 per child may be made to an education IRA when income is less than $95,000 for single persons and $190,000 for married couples filing jointly. The amount that may be deducted is phased out as income rises to $110,000 for single filers and $220,000 for married joint filers.

| **Qualified Tuition and ABLE Programs, IRC 529 and 529A** | **$17,000,000** |
|---|---|

Individuals may contribute to qualified accounts established for the purpose of meeting the beneficiaries' specified higher education expenses in the case of tuition programs or qualified disability expenses in the case of ABLE programs. Contributions to qualified tuition and ABLE program accounts are not excluded from federal gross income. However, account earnings are excluded from income when distributions from the accounts are used for qualified expenses. Wisconsin also allows for a deduction for certain contributions to the Wisconsin sponsored qualified tuition programs and ABLE accounts (see College Savings Plans and ABLE accounts under Modifications to Federal Adjusted Gross Income).

| **Self-Employed Retirement Plans, IRC 401 to 404A, 406 to 407, and 409 to 417** | **$194,000,000** |
|---|---|

A self-employed taxpayer may deduct from gross income contributions made on the taxpayer's behalf to a pension, profit-sharing, annuity or bond purchase plan. Contributions must be made from earned income. The amounts earned under the plans are not subject to tax until withdrawn from the qualified accounts.

The tax expenditure combines the impact of deductions of contributions to self-employed retirement plans and exclusions/deferrals of earnings from these accounts.

| **Transportation and Other Fringe Benefits, IRC 132(a)** | **$20,500,000** |
|---|---|

Employer-provided transportation in a commuter vehicle, transit passes and parking are excluded from income of the employee receiving these benefits. In 2024, the exclusion for commuter transportation or transit passes is limited to $315 per month and the exclusion for parking is limited to $315 per month. These amounts are indexed for inflation.

Other fringe benefits excluded from income include services provided by employers to employees at no additional cost to the employer, employee discounts, property or services for which an employee would be allowed a deduction if the employee provided that property or service, property or service of minimal value, reimbursement of moving expenses, and retirement planning services. Only the transportation benefits have a measurable fiscal effect.

| | |
|---|---|
| **Foster Care Payments, IRC 131** | **$2,720,000** |

Foster care payments to care providers by a state or local government or a foster care placement agency are excluded from income.

| | |
|---|---|
| **Cancellation of Student Loans, IRC 108(f)** | **$560,000** |

The amount of a student loan funded by federal, state or local government programs that has been forgiven is not included in taxable income when the cancellation is contingent upon the beneficiary working for a specified period of time in a certain area or for a particular type of employer.

| | |
|---|---|
| **Recovery of Tax Benefit Items, IRC 111** | **Minimal** |

Certain actions, such as writing off a bad debt, can result in tax benefits. If the tax benefit item is recovered in a later year, then the recovery is taxable. For example, if a debt is written off in one year and repaid in a later year, then that repayment is taxable in the year it is received. However, if the taxpayer did not actually receive a tax benefit from the original action, any income from a subsequent recovery is not taxable.

| | |
|---|---|
| **Foreign Earned Income, IRC 911** | **$24,600,000** |

Qualified individuals who work abroad and receive earned income from foreign sources may elect to exclude up to $126,500 of such income in 2024. The exclusion amount is adjusted to take into account employer-provided housing allowances, or housing expenses where allowances are not provided, and the maximum exclusion is reduced for taxpayers who work abroad for only part of a year.

| | |
|---|---|
| **Natural Resource-Related Cost-Sharing Payments, IRC 126** | **Minimal** |

Payments received by individuals primarily for the purpose of conserving soil and water resources, protecting or restoring the environment, improving forests, or providing a habitat for wildlife may be excluded from gross income.

| | |
|---|---|
| **Passive Activity Losses, IRC 469** | **Not Available** |

In general, when the deductions exceed the income from a business activity, the resulting loss can be offset against other types of income. However, passive activity losses – those from business activities in whose management or operation taxpayers do not actively or materially participate – are subject to passive loss restrictions. Under the restrictions, passive losses can only be offset against other passive income. Passive losses subject to the restrictions can be carried forward indefinitely until used against other passive income or until the taxpayer disposes of the ownership interest in the passive business activity in a fully taxable transaction.

Certain activities are explicitly treated by the tax code as either passive or active. For example, interest, dividends, annuities, royalties and other portfolio income are not treated as income from a passive activity, so net losses generated from passive activities cannot be used to offset portfolio income.

A rental activity generally is treated as a passive activity, though a limited exception exists for rental activity losses incurred by a taxpayer who actively participates in the rental real estate venture and owns at least a 10 percent interest in the rental property. Under the exception, up to $25,000 of losses from rental real estate may be used to offset income from nonpassive sources. The $25,000 maximum is reduced (but not below zero) when the taxpayer's adjusted gross income exceeds $100,000 and is completely phased out when AGI exceeds $150,000. Special rules apply for married taxpayers who file separate returns and live apart. A taxpayer with a working interest in oil and gas activities is also exempt from the passive loss rules.

| | |
|---|---|
| **Capital Gains on Opportunity Zone Investments, IRC 1400Z** | **$9,500,000** |

States may nominate and the Secretary of the Treasury may designate a limited number of opportunity zones

in low-income communities in each state. Opportunity funds may then be created for the purpose of investing in qualified opportunity zone property. Income from capital gains reinvested in a qualified opportunity fund can be deferred from taxation. Moreover, the capital gains from the sale of investments in a qualified opportunity fund that are held for at least ten years are exempt from income tax.

***Adjustments to Federal Gross Income*** ***FY24 Fiscal Estimate***

An adjustment is an amount subtracted from gross income to arrive at adjusted gross income (AGI). After determining AGI, taxpayers apply personal exemptions and itemized deductions or a standard deduction to calculate federal taxable income. AGI is also the starting point for calculating Wisconsin state income tax liability.

| | |
|---|---|
| **Capital Losses, IRC 1211; s. 71.05(10)(c)** | **$2,300,000** |

Losses from the sale or exchange of capital assets may be used to offset gains from capital assets. If the amount of capital losses exceeds the amount of capital gains in the current year, the net capital loss may be used to offset up to $3,000 of ordinary income for Wisconsin tax purposes. The amount of net capital loss not allowed as a deduction in the current year may be carried forward to future years to offset capital gains or ordinary income up to the $3,000 limit, up to 15 years.

| | |
|---|---|
| **Losses from the Sale or Exchange of Business Property, IRC 62 (a)(3)** | **$7,780,000** |

Losses from the sale or exchange of property used in a business are deductible.

| | |
|---|---|
| **Student Loan Interest, IRC 221** | **$4,910,000** |

Persons who have taken out loans on behalf of themselves, their spouse or their dependents to pay for the cost of attending an eligible educational institution may deduct the interest they pay on these loans. The maximum deduction allowed is $2,500. For 2024, the maximum deduction amount is reduced for single and head of household filers when modified FAGI is more than $80,000 and is eliminated when modified FAGI exceeds $95,000; for married joint filers the deduction is phased out between $165,000 and $195,000 of modified FAGI. Married separate filers and those filers claimed as dependents on another's return may not claim the deduction.

| | |
|---|---|
| **Self-Employment Tax, IRC 164(f)** | **$27,300,000** |

Self-employed persons are allowed to deduct the employer-equivalent portion of their self-employment taxes, which are paid for social security and Medicare coverage. This deduction equalizes treatment between self-employed and employed persons. For the employed, the social security tax is shared by the employer and the employee; the amount paid by the employer is not considered income to the employee and is deductible for the employer.

| | |
|---|---|
| **Health Insurance of Self-Employed Persons, IRC 162(l)** | **$30,200,000** |

Under federal law, self-employed persons can deduct up to 100 percent of premiums paid for health insurance. The deduction may not exceed the earned income from the trade or business for which the insurance plan was established. Wisconsin has its own deduction for up to 100 percent of the premiums paid for health insurance by self-employed persons, which was put in place when only a partial deduction was allowed under federal law. The Wisconsin deduction is also limited to net self-employment earnings, and it is not allowed for amounts already deducted in determining federal AGI.

| | |
|---|---|
| **Educator Expenses, IRC 62** | **$730,000** |

Kindergarten through twelfth grade educators who worked in a school for at least 900 hours during a school year may deduct from income up to $300 per educator of unreimbursed qualified classroom expenses that they paid during the year.

| | |
|---|---|
| **Health Savings Accounts and Medical Savings Accounts, IRC 220 and 223** | **$11,600,000** |

A federal deduction is allowed for contributions to Archer Medical Savings Accounts (MSA) and Health Savings Accounts (HSA). Participation in the HSA or MSA program requires concurrent enrollment in a high deductible health plan, defined as a health plan with a higher annual deductible than typical health plans and with a maximum limit on the annual amount of out-of-pocket medical expenses that the participant must pay for covered expenses.

Employer contributions to HSAs or MSAs are excluded from gross income, and contributions by individuals are deductible from income. Distributions from the accounts are excluded from income if used to pay qualified medical expenses, including unreimbursed medical costs of an eligible participant, spouse or dependents. Distributions used for nonqualified expenses are subject to a 20 percent federal excise tax, unless the participant is disabled or is age 65 or older.

The $11.6 million fiscal effect shown in Table 3 relates to the *adjustment to gross income* claimed for contributions to MSAs and HSAs. In contrast, to the extent that existing MSAs and HSAs earn interest or otherwise accumulate earnings, those amounts are *excluded from gross income*. Employer contributions to MSAs and HSAs on behalf of employees are also excluded from gross income rather than deducted as an adjustment to gross income. An additional $58.2 million fiscal effect is included in the exclusion from gross income for sickness and injury benefits. The total fiscal effect for these accounts was $69.8 million in FY24.

| | |
|---|---|
| **Moving Expenses, IRC 217** | **Minimal** |

A deduction from gross income is allowed for moving expenses when the move is related to starting work in a new location. Deductible moving expenses include the cost of transporting household goods and personal effects and the cost of travel to the new residence, including lodging, but not meals. The deduction was suspended for tax years 2018 through 2025 for all individuals except members of the U.S. armed forces.

| | |
|---|---|
| **Alimony, IRC 62(a)(10), 71 and 215** | **$10,900,000** |

For divorce or separation agreements executed before 2019, alimony, separate maintenance or similar periodic payments may be deducted from the gross income of the spouse or former spouse making the payments; however, they are deductible only to the extent that the payments are includible in the gross income of the recipient. Such payments must be made pursuant to a decree of divorce or separation. Child support and property settlements are not considered alimony.

| | |
|---|---|
| **Penalty on Early Withdrawal of Savings, IRC 62(a)(9)** | **$60,000** |

Penalties paid because of premature withdrawal of funds from time savings accounts or deposits may be deducted from gross income. The adjustment is allowed for amounts forfeited to a bank, mutual savings bank, savings and loan association, cooperative bank, or homestead association as a penalty for premature withdrawal of funds from a time savings account, certificate of deposit or similar class of deposit. The deduction is not allowed when the loss is incurred in a transaction connected with a trade or business.

**Modifications to Federal Adjusted Gross Income**

A modification is an addition to or subtraction from federal adjusted gross income authorized by the Wisconsin Statutes to compute Wisconsin adjusted gross income (also referred to as Wisconsin income). In this report, with the exception of the capital gains add modification discussed in the previous section on "Adjustments to Federal Gross Income," only subtraction modifications are described because only they constitute tax exemption devices.

| | |
|---|---|
| **Social Security Benefits: Difference in State and Federal Treatment, s. 71.05(6)(b)21** | **$532,000,000** |

Wisconsin does not tax social security benefits, while up to 85 percent of those benefits are subject to federal

tax. A subtraction modification allows taxpayers with federally taxable social security to exclude those amounts from Wisconsin income. The $532 million revenue loss for FY24 for this modification is in addition to the $182 million revenue loss from the exclusion discussed in the "Exclusions from Federal Gross Income" section; the total fiscal effect of the state's tax treatment of social security is $714 million.

| **Interest on U.S. Obligations, s. 71.05(6)(b)1** | **$13,000,000** |
|---|---|

All interest and dividend income, less related expenses, received on obligations of the United States, its territories and the District of Columbia may be subtracted from federal adjusted gross income in determining Wisconsin adjusted gross income. The subtraction applies to interest on obligations issued directly by the federal government and obligations issued by independent agencies, which federal law prohibits states from taxing. The fiscal effect of this exemption is difficult to estimate because a significant portion of these bonds are held indirectly by individuals through mutual funds, partnerships and other investment vehicles. The FY24 estimate reflects only U.S. government interest explicitly deducted from Wisconsin income tax returns and does not reflect any amounts deducted as part of the distributive share of those investment vehicles.

| **Capital Gains Exclusion, ss. 71.05(6)(b)9 and 9m** | **$305,000,000** |
|---|---|

Wisconsin allows taxpayers to exclude from income 30 percent of the capital gains on assets held more than one year. A 60 percent exclusion is available for the capital gains on farm assets held more than one year.

Wisconsin also provides a full exclusion related to qualified Wisconsin businesses. Beginning with assets purchased in 2011, individuals may exclude the net capital gain on Wisconsin assets held more than five years. A Wisconsin asset is defined as real or tangible property located in the state and used in a Wisconsin business, stock in a Wisconsin business, or other ownership interest in a Wisconsin business. Qualifying businesses must register with DOR.

| **Gains on Sales of Business Assets to Related Persons, s. 71.05(6)(b)25** | **$910,000** |
|---|---|

Gains on sales of business assets, including assets used in farming, to persons related to the seller within the third degree of kinship are not subject to tax. These related persons include parents, children, grandparents, grandchildren, brothers and sisters, uncles and aunts, nephews and nieces, and great grandchildren.

| **Certain Government Employee Pensions, ss. 71.05(1)(a), (am) and (an)** | **$38,100,000** |
|---|---|

Payments received from the selected retirement systems by persons who were members of or retired from these systems prior to 1964 are excluded from Wisconsin income, to the extent the payments were included in federal income. The Milwaukee Public School Teachers, Milwaukee City Employees, Milwaukee County Employees, Milwaukee County Sheriff, Milwaukee City Police, Milwaukee Fire Fighters, and Wisconsin Public School Teachers retirement systems, and the U.S. Civil Service and Military Employee retirement system are covered by this exemption.

All payments from the U.S. military retirement system and all U.S. government pension payments received by retirees of the U.S. Coast Guard, the commissioned corps of the National Oceanic and Atmospheric Administration, and the commissioned corps of the public health service are exempt.

| **Low-Income Retirement Income Exclusion, s. 71.05(6)(b)54** | **$120,000** |
|---|---|

Up to $5,000 in qualified pension and IRA income can be excluded from gross income for taxpayers who are 65 or older and have federal adjusted gross income less than $15,000 for single filers or $30,000 for married joint filers.

| **State Legislators' Per Diem Expenses, s. 71.05(1)(b)** | **Minimal** |
|---|---|

Amounts received by state legislators as an allowance for expenses incurred while in Madison on legislative

business are excluded from Wisconsin adjusted gross income, provided a deduction for travel expenses is not claimed.

| | |
|---|---|
| **Health Insurance Premiums of the Self-Employed and Certain Employees: Difference in State and Federal Treatment, ss. 71.05(6)(b)19, 35, 38, and 42** | **$111,000,000** |

To the extent that health insurance premium payments have not already been deducted or excluded from federal income, a subtraction is available for the full amount of premiums paid by individuals.

The $111 million revenue loss is in addition to the revenue losses attributable to health insurance premiums that are excluded or deducted from federal income.

| | |
|---|---|
| **Long-Term Care Insurance Expenses, s. 71.05(6)(b)26** | **$8,960,000** |

A deduction is allowed for premiums paid for long-term care insurance. This insurance provides coverage for convalescent or custodial care, or care for a chronic condition or terminal illness that is provided in a person's home, an institution or a community-based setting. Qualified expenses include expenses for policies that cover a taxpayer and his or her spouse. Qualified expenses subtracted from gross income in the calculation of federal adjusted gross income cannot be claimed for this deduction. Also, qualified expenses claimed for this deduction cannot be used to calculate the Wisconsin itemized deduction credit.

| | |
|---|---|
| **Unemployment Compensation, s. 71.05(6)(b)8** | **$290,000** |

Wisconsin excludes from income a portion of unemployment compensation when income falls below certain amounts. Taxable unemployment compensation equals the lesser of total unemployment compensation or 50 percent of the amount, if any, by which unemployment benefits plus the recipient's adjusted gross income (excluding unemployment compensation and certain disability benefits) exceed specified base amounts. The base amounts are: $12,000 for single persons and married persons who file separately and lived apart from their spouses for the full tax year; $18,000 for married persons filing a joint return; and $0 for married persons who file separately but lived with their spouses for at least part of the tax year.

| | |
|---|---|
| **Disability Income, s. 71.05(6)(b)4** | **Minimal** |

A subtraction is allowed for payments to disabled persons that are included in federal income but were excluded under sec. 105(d) of the Internal Revenue Code prior to its repeal in 1983. This exclusion is limited to individuals who are retired on permanent and total disability, are less than 65 years old, and have FAGI of less than $20,200 ($25,400 if married and both spouses are eligible).

| | |
|---|---|
| **Adoption Expenses, s. 71.05(6)(b)22** | **$50,000** |

Adoptive parents may deduct adoption fees, court costs or legal fees relating to the legal adoption of a child. This subtraction from federal adjusted gross income is limited to $5,000 of adoption expenses that occur during the tax year in which the adoption is finalized and the two prior tax years. Employer-paid adoption expenses that under federal law are excluded from gross income may not be used for the deduction.

| | |
|---|---|
| **Higher Education Tuition Expenses, s. 71.05(6)(b)28** | **$12,100,000** |

The federal tax deduction for qualified tuition and fees does not apply in Wisconsin; however, state law does allow a tuition deduction. For tax year 2024 a deduction of up to $7,333 per student per year is allowed for tuition that is paid to any university, college, technical college or a school approved by the Educational Approval Program that is located in Wisconsin. Tuition paid to a public vocational school or public institution of higher education in Minnesota under the Minnesota-Wisconsin reciprocity agreement also qualifies for the deduction. Eligible expenses include tuition for the education of the claimant, the claimant's spouse, and his or her dependent. The maximum deduction amount is phased out in specified ranges of federal adjusted gross income: between $67,760 and $81,320 for single and head of household filers, $108,420 and $135,530 for married joint filers, and $24,210 and $67,760 for married separate filers.

| College Savings Plans, ss. 71.05(6)(b)23 and 31 to 33 | $19,000,000 |
|---|---|

In 2024, a deduction of up to $5,000 per year per beneficiary is allowed for contributions to an Edvest or Tomorrow's Scholar college savings account. To prevent double counting of the deduction, no deduction is allowed for any costs paid out using distributions from such a college savings or prepaid tuition plan. In particular, taxpayers cannot claim a deduction for tuition financed by a distribution from a college savings account when the contribution to that account was previously deducted.

In addition, any interest earnings on contributions to a plan may be deducted, to the extent these earnings are included in federal adjusted gross income and provided that the distributions from the plan are used for qualified educational purposes. Distributions from these plans are also exempt from federal tax (see Qualified Tuition Programs under "Exclusions from Federal Gross Income").

| Human Organ Donation Expenses, s. 71.05(10)(i) | Minimal |
|---|---|

An individual who, while living, donates one or more of his or her human organs to another human being for human organ transplantation may subtract $10,000 from federal adjusted gross income in the year in which the transplant occurs. The subtract modification may only be claimed for travel expenses, lodging expenses and lost wages that are incurred by the claimant and related to his or her organ donation.

| U.S. Armed Forces Active Duty Pay, ss. 71.05(6)(b34 and 71.05(6)(b)56 | $12,100,000 |
|---|---|

Members of the U.S. armed forces on active duty may deduct basic, special and incentive pay received from the federal government under 37 USC chapters 3 and 5 while on active duty. Moreover, members of the reserves or National Guard components of the U.S. armed forces who are called to federal active duty, may deduct from FAGI the amount of military pay received that relates to the period of time during which they are on active duty. Military members who do not file a Wisconsin return are excluded from this fiscal effect.

| Private School Tuition, s. 71.05(6)(b)49 | $10,100,000 |
|---|---|

Individuals may claim a deduction for tuition paid to send their dependent children to private school. The maximum deduction is $4,000 for an elementary school pupil and $10,000 for a secondary school pupil.

| Combat Zone Related Death, ss. 71.05(6)(b)48 and 48m | Minimal |
|---|---|

A deduction is allowed for the full amount of income received by an individual who died during the year while on active duty if the death occurred while he or she was serving in a combat zone. Individuals also qualify for the deduction if they died outside of the combat zone, but as a result of wounds, disease or injury incurred while serving in the combat zone. The deduction also applies to the previous year if the service member did not already file an income tax return.

| Physician or Psychiatrist Grant, s. 71.05(6)(b)51 | Minimal |
|---|---|

A deduction is allowed for the amount received by a physician or psychiatrist from the Wisconsin primary care and psychiatry shortage grant program. The grant program is intended to encourage primary care physicians and psychiatrists to practice primary care medicine or psychiatry in underserved areas in the state.

| ABLE Accounts, s. 71.05(6)(b)52 | $80,000 |
|---|---|

Individuals may claim a deduction for the amount contributed to qualified ABLE (Achieving a Better Life Experience) accounts. The beneficiary of an ABLE account must be a person with a disability. Distributions from the accounts must be used to pay the qualified disability expenses of the beneficiary. The total maximum subtraction that may be claimed by all contributors to the account for 2024 is $18,000.

| Out-of-State Employees Disaster Relief Work, s. 71.05(1)(g) | Not Available |
|---|---|

Qualifying out-of-state businesses and out-of-state employees are allowed an exemption from certain Wisconsin registration and tax reporting requirements, if the qualifying employer or employee is in Wisconsin solely to perform disaster relief work in connection with a state of emergency declared by the Governor. Compensation paid to qualifying out-of-state employees who are performing disaster relief work is not taxable.

| Olympic, Paralympic and Special Olympic Medals and Prize Money, s. 71.05(6)(b)53 | Minimal |
|---|---|

An exemption is allowed for the value of any Olympic, Paralympic or Special Olympics medal won by an individual in an Olympic, Paralympic or Special Olympics competition, and the amount of any payment such an individual receives from the U.S. Olympic Committee or from the Special Olympics Board of Directors. Because a similar exemption already exists under federal law as adopted by Wisconsin, this exemption only applies to amounts not already claimed on the individual's federal tax return. The federal provision does not allow an exclusion for individuals with more than $1 million of federal adjusted gross income and does not allow exclusions related to the Special Olympics.

| AmeriCorps Education Awards, s. 71.05(6)(b)55 | Minimal |
|---|---|

AmeriCorps education awards disbursed under 42 USC 12604 and used to pay for qualified student loans, educational expenses, or to participate in approved school-to-work programs may be deducted from income to the extent that the amounts have not already been excluded from federal adjusted gross income.

***Deductions and Exemptions from Adjusted Gross Income*** ***FY24 Fiscal Effect***

A deduction is an amount subtracted from Wisconsin adjusted gross income (or total income) to yield Wisconsin taxable income – the amount to which the tax rates are applied. Federal taxpayers may claim either a standard deduction or an itemized deduction. Wisconsin taxpayers are allowed a standard deduction only, though taxpayers may be eligible for an itemized deductions credit, explained in the next section. Wisconsin also provides a personal exemption that is subtracted from Wisconsin adjusted gross income.

| Standard Deduction, s. 71.05(22) | $843,000,000 |
|---|---|

Wisconsin provides a sliding scale standard deduction that decreases as income increases. For tax year 2024, the standard deduction for single persons was $13,230 when Wisconsin adjusted gross income (WAGI) was less than $19,070, and it was phased out as WAGI rose from $19,070 to $129,320. For heads of households, mostly single parents, the deduction was $17,090 when WAGI was less than $19,070, and it was phased down to the level of the standard deduction of single filers as WAGI rose from $19,070 to $55,779. When WAGI exceeded $55,779, heads of households received the same deduction as single filers. For joint filers, the standard deduction was $24,490 when WAGI was less than $27,520 and was phased out when WAGI was between $27,520 and $151,344. For married persons filing separately, the standard deduction was $11,630 when WAGI was less than $13,060 and was phased out when WAGI was between $13,060 and $71,863. These amounts are indexed for inflation.

The estimate of revenue loss for the standard deduction does not reflect the amount of the itemized deductions credit that would be claimed by persons not currently claiming it if the standard deduction was eliminated; the credit cannot be calculated because the amount of their itemized deductions is not known for all taxpayers.

| Personal Exemption and Additional Elderly Exemption, s. 71.05(23) | $164,000,000 |
|---|---|

Wisconsin provides an exemption equal to $700 for each tax filer, spouse and dependent, plus an additional exemption of $250 for each taxpayer and spouse age 65 and older.

***Credits*** ***FY24 Fiscal Effect***

A credit is an amount that is subtracted directly from the taxpayer's Wisconsin gross tax liability (i.e., the amount determined by applying the Wisconsin tax rates to Wisconsin taxable income) to determine the Wisconsin net tax liability. A credit can be nonrefundable or refundable. A nonrefundable credit is limited to the amount of income tax otherwise due; it cannot be used to reduce taxes to less than $0. Taxpayers may carry forward most unused nonrefundable credits to offset future years' liabilities. A refundable credit is paid to claimants in the form of a refund check when the amount of the credit exceeds the tax otherwise due.

| **Itemized Deductions Credit, s. 71.07(5)** | **$296,000,000** |
|---|---|

Federal law allows itemized deductions to be subtracted from federal adjusted gross income when these deductions exceed the federal standard deduction. Wisconsin does not allow itemized deductions, but instead has a nonrefundable credit for some of the expenses for which federal itemized deductions may be claimed. This credit is equal to 5 percent of the eligible itemized deductions in excess of Wisconsin's sliding scale standard deduction. The eligible expenses include medical expenses, interest, charitable contributions and certain casualty losses related to a federally declared disaster. No credit is allowed for the federal itemized deductions for state and local taxes and miscellaneous expenses.

The expenses used in calculating the Wisconsin itemized deductions credit are described below, and their fiscal effects are estimated. The sum of these estimates for each particular expense exceeds the total fiscal effect for the itemized deductions credit because of interaction effects.

1. Medical Expenses

   Health expenses can be claimed as an itemized deduction to the extent that the total amount of medical expenses not compensated for by insurance exceeds 7.5 percent of the taxpayer's federal adjusted gross income. Eligible expenses include: fees for doctors, dentists, health practitioners and hospital services; amounts spent for prescription medicine and drugs; premiums paid on medical or health insurance policies; costs of medical equipment (e.g., motorized wheelchairs, hearing aids, dentures, eye glasses); and the cost of transportation, meals and lodging for needed medical care. The credit for medical expenses reduced tax revenues by $25.5 million in FY24.

2. Interest

   Mortgage interest on a primary personal residence located in Wisconsin qualifies for the state's itemized deductions credit. Wisconsin also allows the credit for interest paid on indebtedness related to investments to the extent that the investment interest is offset by the taxpayer's net investment income and to the extent that income is subject to Wisconsin tax. The revenue loss from the credit for interest expense was $147 million in FY24.

3. Charitable Contributions

   Contributions to recognized charitable organizations or activities can be claimed as an itemized deduction. In general, a recognized charity is any governmental body, or any public or private corporation, trust, or foundation organized and operated principally for charitable, religious, scientific, literary or educational purposes. Certain limitations apply on contributions of property or the taxpayer's personal services. Additional limitations apply on the total amount of charitable contributions that can be deducted within a single year. The revenue loss from the credit for charitable contributions was $132 million in FY24.

4. Casualty Losses
   Only casualty losses directly related to a federally declared disaster can be claimed for purposes of the itemized deduction credit. The revenue loss from the credit for casualty losses was $100,000 in FY24.

| Child and Dependent Care Credit, s. 71.07(9g) | $27,900,000 |
|---|---|

Individuals who qualify for the federal credit for child and dependent care expenses generally qualify for the Wisconsin credit as well. The credit is available to individuals who paid someone to care for their qualifying children under age 13 or their disabled spouse or other disabled person. The federal credit is capped at $3,000 of expenses for one qualifying person or $6,000 for two or more qualifying persons. The Wisconsin credit was equal to 50 percent of the federal credit in 2022 and 2023. Beginning in 2024, the Wisconsin credit rate was increased to match the federal rate. Moreover, the qualifying expenses for the state credit were increased to $10,000 for one qualifying person or $20,000 for two or more qualifying persons.

| School Property Tax Credit, s. 71.07(9) | $461,000,000 |
|---|---|

The school property tax credit is equal to 12 percent of the first $2,500 of property taxes or rent constituting property taxes paid on a person's primary residence and contiguous land, up to a maximum credit of $300. For renters, "rent constituting property taxes" means 25 percent of rent if heat is not included or 20 percent of rent if heat is included in rent. No credit is allowed for property taxes or rent that is deductible as a trade or business expense. The credit is nonrefundable.

| Historic Preservation Credits, ss. 71.07(9m) and (9r) | $3,150,000 |
|---|---|

Two nonrefundable credits are provided to encourage the rehabilitation of historic buildings in Wisconsin.

1. Supplement to the Federal Historic Rehabilitation Credit

   The supplement to the federal historic rehabilitation credit may be claimed for projects eligible for the federal credit. The credit is equal to 20 percent of qualified rehabilitation expenditures. Qualified rehabilitation expenditures, defined under sec. 48(g) of the Internal Revenue Code, are expenditures to substantially rehabilitate certified historic buildings for use in a trade or business. The rehabilitation work must meet historic preservation standards, and the expenditures must exceed the taxpayer's adjusted basis in the building. Unused amounts of the credit may be carried forward for up to 15 years. The credit applies only to property located in Wisconsin. Taxpayers must reduce their Wisconsin adjusted basis in the building by the amount of the credit claimed. The reduced basis will result in lower depreciation deductions and will have the result that taxpayers may have an increased taxable gain from the sale or exchange of the property.

   For rehabilitation projects undertaken by a partnership, tax-option corporation or limited liability company (LLC), the credit is passed through to the individual partners, shareholders or members in proportion to their ownership interest in the partnership, corporation or LLC. Though the credit is generated by specifically approved rehabilitation projects, the credit amount is transferable. Individuals and corporations may buy or sell credits from each other. Most credits are generated by partnerships, but corporations tend to be the primary purchasers and claimants of the credits.

2. State Historic Rehabilitation Credit

   The state historic rehabilitation credit is equal to 25 percent of qualified expenditures to substantially rehabilitate certified historic buildings for noncommercial use. The credit applies to owner- occupied personal residences, provided that the residence is not used in the course of a trade or business. The credit cannot be claimed for rehabilitation of a personal residence if the person has already claimed a rehabilitation credit for another personal residence within the preceding five years. The rehabilitation work must meet historic preservation standards, and the expenditures must exceed $10,000. The maximum credit amount is $10,000 ($5,000 for married persons filing separately). Unused amounts of credit can be carried forward for up to 15 years. The credit applies only to property located in Wisconsin.

   Taxpayers must reduce their Wisconsin adjusted basis in the building (or entire property, if not a building) by the amount of the credit claimed. The reduced basis will have the result that taxpayers may have an increased taxable gain from the sale or exchange of the property.

| Working Families Credit, s. 71.07(5m) | $110,000 |
|---|---|

The working families credit equals a taxpayer's net tax liability, defined as gross tax less the itemized deductions, armed forces member, school property tax and historic rehabilitation credits, when income is less than $18,000 for married couples filing jointly and $9,000 for other tax filers. Essentially, the credit eliminates tax liability when income is below these ceilings. The credit is phased out over the next $1,000 of income above these ceilings. The credit is limited to full-year residents, and no credit is allowed for persons who are claimed as a dependent on another filer's tax return. It is nonrefundable.

| Manufacturing and Agriculture Credit, s. 71.07(5n) | $362,000,000 |
|---|---|

The manufacturing and agriculture credit is available to businesses engaged in manufacturing and agricultural production activities. The credit is equal to 7.5 percent of income attributable to qualified production activities. It is nonrefundable, but unused credit amounts may be carried forward for up to 15 years. This credit is discussed in more detail in the "Corporate Income and Franchise Taxes" chapter of this report.

| Research Expense Credits, ss. 71.07(4k) and (4n) | $25,100,000 |
|---|---|

The research expense credits are available to individuals and pass through entities for increasing research activities in Wisconsin. Qualified research must be undertaken for discovering information that is technological in nature, and its application must be intended for use in developing a new or improved business component. Substantially all of the activities of the research must be elements of a process of experimentation relating to a new or improved function, performance, reliability or quality. The standard credit is equal to 5.75 percent of the amount by which the claimant's qualified research expenses for the taxable year exceed 50 percent of the average qualified research expenses for the three taxable years immediately preceding the taxable year for which the claimant claims the credit. If the claimant had no qualified research expenses in any of the three taxable years immediately preceding the taxable year for which the claimant claims the credit, the claimant may claim an amount equal to 2.875 percent of the qualified research expenses for the taxable year for which the credit is claimed. For research related to designing internal combustion engines for vehicles and for research related to energy efficient products, the credit is equal to 11.5 percent of the amount by which the claimant's qualified research expenses for the taxable year exceed 50 percent of the average qualified research expenses for the three taxable years immediately preceding the taxable year for which the claimant claims the credit. If the claimant had no qualified research expenses in any of the three taxable years immediately preceding the taxable year for which the claimant claims the credit, the claimant may claim an amount equal to 5.75 percent of the qualified research expenses for the taxable year for which the credit is claimed.

Prior to 2018 the credits were entirely nonrefundable, but credit amounts could be carried forward for up to 15 years. Beginning in 2018, up to 10 percent of new unused credits could be claimed as a refundable credit, allowing credits to exceed the taxpayer's liability. The refundable portion of the credit was increased to 15 percent beginning in 2021 and 25 percent beginning in 2024. The tax expenditures for the nonrefundable and refundable portions of the credit are listed separately in Table 3. The total fiscal effect above is the sum of both components. This credit is discussed in more detail in the "Corporate Income and Franchise Taxes" chapter of this report.

| Community Rehabilitation Program Credit, s. 71.07(5k) | $140,000 |
|---|---|

The credit is available to persons who enter into a contract with a community rehabilitation program to have the program perform work for the claimant's business. The maximum tax credit that can be claimed is $25,000 for each community rehabilitation program for which the claimant has a contract. Unused credit amounts can be carried forward up to 15 years to offset future tax liabilities. This credit is discussed in more detail in the "Corporate Income and Franchise Taxes" chapter of this report.

| Employee College Savings Account Contribution Credit, s. 71.07(10) | Minimal |
|---|---|

The credit is available to a partner of a partnership, a member of a limited liability company (LLC), a corporation or a shareholder of a tax option (S) corporation that is an employer and contributes to an employee's college savings account. The employer may contribute up to 25 percent of the amount an individual contributor could deduct, and the employer may claim a credit equal to 25 percent of the contribution they make. Unused credit amounts can be carried forward up to 15 years to offset future tax liabilities.

| Low-Income Housing Credit, s. 71.07(8b) | Minimal |
|---|---|

The credit is available to qualifying taxpayers who are allocated tax credits by the Wisconsin Housing and Economic Development Authority (WHEDA). WHEDA may allocate the credit to individuals or entities based on the development of a qualified low-income housing project under section 42 (g) of the Internal Revenue Code that is financed with tax-exempt bonds and located in Wisconsin.

| Married Persons Credit, s. 71.07(6) | $262,000,000 |
|---|---|

Wisconsin provides a nonrefundable credit for married persons when both spouses are working to offset the marriage tax penalty facing two-earner couples. A penalty occurs when a married person pays more tax than what they would if the two spouses were taxed as two single filers. The credit equals 3 percent of the first $16,000 of earnings of the spouse with the lowest wages, resulting in a maximum credit of $480.

| Manufacturing Sales Tax Credit, s. 71.07(3s) | Minimal |
|---|---|

Until 2006, a nonrefundable credit could be claimed for the amount of Wisconsin sales tax paid on fuel and electricity consumed in manufacturing tangible personal property in the state. The credit was designed to be the equivalent of a sales tax exemption. Unused amounts of credit could be carried forward and offset against tax liability over the next 20 years. Corporations were required to increase their net income by the amount of credit claimed in lieu of reducing their deduction for the sales tax portion of the expense of fuel and electricity.

Beginning in 2006, fuel and electricity used in manufacturing became exempt from the sales tax and the credit for sales tax was repealed. Manufacturers that meet certain conditions may continue to use manufacturers' sales tax credit carried forward from prior years to offset income in the future (see the description for the Manufacturing Investment Credit). Manufacturers with up to $25,000 of unused credit could take up to 50 percent in tax years 2006 and 2007. Manufacturers with more than $25,000 of unused credit were allowed to deduct from income 50 percent of the amount that was added back to income when the credits were claimed in tax year 2007 and 50 percent in tax year 2008.

| Manufacturing Investment Credit, s. 71.07(3t) | $370,000 |
|---|---|

Beginning in 2008, businesses whose unused credit for sales tax on fuel and electricity used in manufacturing was greater than $25,000 on January 1, 2006, were able to claim a manufacturing investment credit, provided they met certain job retention, investment or other tests. The credit is equal to the unused manufacturers' sales tax credit, amortized over 15 years.

| Dairy and Livestock Farm Investment Credit, s. 71.07(3n) | $3,840,000 |
|---|---|

For taxable years beginning after 2005 and before 2014, a nonrefundable credit is available for 10 percent of certain expenditures to modernize or expand a dairy or livestock farm. The credit was sunset in 2014, so all remaining claims are carryovers from prior years. Unused credits may be carried forward up to 15 years to offset future tax liabilities. This credit is discussed in more detail in the "Corporate Income and Franchise Taxes" chapter of this report.

| | |
|---|---|
| **Development Zone and Technology Zone Credits, ss. 71.07(2dm), (2dx) and 71.07(3q)** | **Minimal** |

Development zone and technology zone credits are available to taxpayers who are certified by the Wisconsin Economic Development Corporation (WEDC) to participate in these Wisconsin zone-based programs. Credits awarded to noncorporate entities are generally passed through to their owners in proportion to their ownership interest in the entity and may be claimed on the owner's individual income tax return. These credits are nonrefundable, so they are limited to tax liability otherwise due; however, unused amounts may be carried forward. These programs and the credits are more fully discussed in the chapter on "Corporate Income and Franchise Taxes."

| | |
|---|---|
| **Economic Development Credit, s. 71.07(2dy)** | **$160,000** |

Under the economic development tax credit program, a business may apply to WEDC for certification to claim tax benefits. WEDC may certify a business that conducts or intends to conduct at least one eligible activity. The eligible activities include:

- Creating and maintaining, for a period of time established by WEDC, full-time jobs in addition to any existing full-time job.
- Making a significant investment in new equipment, machinery, real property or depreciable personal property.
- Making significant investments in the training or reeducation of employees for the purpose of improving the productivity or competitiveness of the business.
- Locating or retaining a corporate headquarters in Wisconsin or retaining employees holding full-time jobs in Wisconsin.

This credit is discussed in more detail in the "Corporate Income and Franchise Taxes" chapter of this report.

| | |
|---|---|
| **Angel Investment Credit and Early Stage Seed Investment Credit, ss. 71.07(5d) and 71.07(5b)** | **$5,420,000** |

The angel investment credit is available to individuals for investments in qualified new business ventures certified by WEDC. A credit for 25 percent of the investment may be claimed in the taxable year the investment was made.

The early stage seed investment credit is available for businesses and individuals for 25 percent of qualified investments. The maximum annual amount that may be claimed by all claimants is $30 million combined between the early stage seed credit and the angel investment credit

| | |
|---|---|
| **Income Taxes Paid to Other States/Income Tax Reciprocity, ss. 71.07(7) and 71.10(7e)** | **$592,000,000** |

If a person lives in one state and is employed in another, income may be subject to taxation in both states. To alleviate this double taxation, the state in which the taxpayer resides may allow a credit for income taxes paid to another state. Alternatively, two states may enter into a reciprocity agreement whereby the taxpayer is only required to pay state income taxes to the home state. Currently, Wisconsin has reciprocity agreements with Illinois, Indiana, Kentucky and Michigan.

1. Credit for Taxes Paid to Other States.

   Wisconsin residents may reduce their Wisconsin income tax by the amount of income taxes paid to other states (or the District of Columbia). The credit is not allowed for taxes paid on personal service income if that income is earned in states having reciprocity agreements with Wisconsin. The revenue loss from this credit was $458 million in FY24. The credit is nonrefundable, and unused amounts may not be carried forward.

2. Income Tax Reciprocity

   Since there are more Wisconsin residents employed in Illinois than residents of Illinois working in Wisconsin, the income tax revenue foregone by Illinois exceeds the taxes foregone by Wisconsin as a result of reciprocity. Either state could capture these additional revenues by eliminating reciprocity, but that would require individuals living in one state and working in the other to file income tax returns with both states. To avoid this and to eliminate the need for credits for taxes paid to the other state, Wisconsin has agreed to pay Illinois an amount equal to the tax the state foregoes in excess of the amount of tax Wisconsin foregoes as a result of reciprocity. The FY24 payment amount was $134 million.

| **Earned Income Credit, s. 71.07(9e)** | **$89,300,000** |
|---|---|

Wisconsin allows low-income workers with dependents to claim a Wisconsin earned income credit equal to a percentage of the federal earned income tax credit, depending on family size. The credit is refundable; any amount of the credit in excess of taxes otherwise due is rebated to the taxpayer.

The Wisconsin credit is 4 percent of the federal credit for persons with one child, 11 percent for persons with two children, and 34 percent for persons with three or more children. For persons with one child, the 2024 federal credit was 34 percent of the first $12,390 of earnings; for persons with two children the credit was 40 percent of the first $17,400 of earnings, and for persons with three or more children the credit was 45 percent of the first $17,400 of earnings. These federal credits were phased out as the greater of earnings or federal adjusted gross income rose from $22,720 to $49,082 for single persons with one child, from $22,720 to $55,768 for single persons with two children, and from $22,720 to $59,899 for single persons with three or more children. The phase-out floors and ceilings are $6,920 higher for married couples who are joint filers. The maximum credit and the range over which the credit is phased out are indexed to inflation.

Federal law also allows a credit for low-income workers without children; Wisconsin has no similar credit.

| **Farmland Preservation Credit and Farmland Preservation Credit 2010 and Beyond, ss. 71.07(3), 71.57 to 71.61, 71.07(3) and 71.613** | **$20,700,000** |
|---|---|

Owners of farmland zoned exclusively for agriculture use or covered under a farmland preservation agreement with the state may be able to claim a farmland preservation credit. The credit was revised and expanded beginning in tax year 2010. Under current law the credit may be claimed using either the old credit formula or the new credit formula depending on the claimants' farmland preservation agreements.

The original Farmland Preservation Credit was determined by a formula using household income and the property taxes levied against the farmland. The new Farmland Preservation Credit, 2010 and Beyond, is calculated by multiplying the claimant's qualifying acres by one of the following amounts:

- $12.50 if the qualifying acres are located in a farmland preservation zoning district and are also subject to a farmland preservation agreement that is entered into after July 1, 2009;
- $10.00 if the qualifying acres are located in a farmland preservation zoning district but are not subject to a farmland preservation agreement that is entered into after July 1, 2009; or
- $10.00 if the qualifying acres are subject to a farmland preservation agreement that is entered into after July 1, 2009, but are not located in a farmland preservation zoning district.

| **Repayment Credit, s. 71.07(1)** | **$170,000** |
|---|---|

A taxpayer who repays income in the current year that had been subject to tax in a previous year may claim a refundable credit for the amount of tax paid on that income in the previous year.

| Homestead Credit, ss. 71.07(4) and 71.51 to 71.55 | $41,100,000 |
|---|---|

Low-income homeowners and renters may qualify for a refundable income tax credit based on household income and property taxes or rent constituting property taxes. To qualify, the person:

1. Must be
   - at least 62 years old, or
   - at least 18 years old and have earned income, or
   - at least 18 years old and have a disability;
2. Must not be claimed as a dependent on anyone else's federal income tax return (unless the claimant is 62 years of age or older);
3. Must be a legal resident of Wisconsin for the entire calendar year; and
4. Must have household income (of the claimant and spouse) of less than $24,680. Household income includes both taxable and nontaxable sources.

In addition, persons are ineligible for the credit if they:

1. Live in a nursing home and receive medical assistance (Title XIX) at the time of filing the claim;
2. Live the entire year in housing that is exempt from property taxes;
3. Claim the farmland preservation credit or the veterans and surviving spouse property tax credit for their home; or
4. Receive general relief payments of $400 or more for each month of the year of claim, or public assistance (Aid to Families with Dependent Children or Temporary Assistance for Needy Families) for the entire year of claim.

For renters, property taxes are assumed to be 20 percent of rent if heat is included in the rent or 25 percent of rent if heat is not included. In computing household income, a claimant may deduct $500 for each dependent living with the claimant.

The amount of credit is determined as follows:

1. If household income is $8,060 or less, the credit is 80 percent of property taxes up to $1,460; thus, the maximum credit is $1,168.
2. If household income exceeds $8,060 but was no more than $24,680, the credit is 80 percent of the amount by which property taxes exceeds 8.785 percent of household income in excess of $8,060. That is, the credit is 80 percent of property taxes up to a maximum credit of $1,168. The credit is phased out at a rate of 7.028 percent (80 percent multiplied by 8.785 percent) when household income exceeds $8,060.
3. If household income exceeds $24,680, no homestead credit is allowed.

| Veterans and Surviving Spouses Property Tax Credit, s. 71.07(6e) | $61,100,000 |
|---|---|

Eligible veterans and surviving spouses may claim this refundable credit in the amount of the property taxes paid during the year on the claimant's principal dwelling in Wisconsin. To be eligible for the credit, veterans must be verified by the Wisconsin Department of Veterans Affairs as having served in the U.S. armed forces, having been a Wisconsin resident at the time of entry into service or for any five-year period after entry into service, currently being a Wisconsin resident for the purpose of veterans benefits, and having a service-connected disability rating of 100 percent or a 100 percent disability rating based on individual unemployability. An eligible surviving spouse must be an un-remarried surviving spouse of an individual who was a Wisconsin resident at the time of entry into service, was a Wisconsin resident at the time of death and

died while on active duty, or would be otherwise considered an eligible veteran at the time of death. Surviving spouses may also be able to claim the credit if, following the veteran's death, the surviving spouse began to receive, and continues to receive, dependency and indemnity compensation, as defined in 38 USC 101(14).

| **Enterprise Zone Jobs Credit, s. 71.07(3w)** | **$13,000,000** |
|---|---|

A refundable enterprise zone jobs credit is available for certified businesses located in a designated enterprise zone. WEDC may certify businesses for tax benefits based on activities in the designated zones, including beginning operations, expanding operations, making capital investments or retaining jobs. This credit is discussed in more detail in the "Corporate Income and Franchise Taxes" chapter of this report.

| **Jobs Tax Credit, s. 71.07(3q)** | **Minimal** |
|---|---|

In order to claim the jobs tax credit, businesses must be certified by WEDC. WEDC may award jobs tax credits to businesses that are operating or intending to operate in Wisconsin and pursuant to a contract with WEDC. The credit is based on the amount of wages paid to eligible employees in the taxable year, subject to a maximum amount of 10 percent of such wages, and the costs incurred by the claimant to undertake training activities in the current year. This credit is discussed in more detail in the "Corporate Income and Franchise Taxes" chapter of this report.

| **Business Development Credit, s. 71.07(3y)** | **$3,150,000** |
|---|---|

The refundable business development credit is available to individuals or entities that operate or intend to operate a business in Wisconsin and enter into a contract with WEDC to increase the business' net employment in Wisconsin. Pursuant to the contract with WEDC, the credit claim may be:

- Up to 10 percent of the wages paid to an eligible employee in the tax year.
- Up to 5 percent of the wages paid to an eligible employee located in an economically distressed area.
- Up to 50 percent of the claimant's training costs to enhance an eligible employee's general knowledge, employability and flexibility in the workplace; to develop skills unique to the claimant's workplace or equipment; or to develop skills that will increase the quality of the claimant's product.
- Up to 3 percent of personal property investment and up to 5 percent of real property investment in a capital investment project that involves a total capital investment of at least $1,000,000 or, if less than $1,000,000, involves a capital investment equal to at least $10,000 per eligible employee employed on the project.
- A percentage of the wages paid to an eligible employee in the tax year if the position was created or retained in connection with the location or retention of the claimant's corporate headquarters in Wisconsin.

| **Electronics and Information Technology Manufacturing Zone Credit, s. 71.07(3wm)** | **None** |
|---|---|

WEDC may designate one electronics and information technology manufacturing zone in Wisconsin for up to 15 years. The refundable electronics and information technology manufacturing zone credit is equal to 17 percent of the wages paid to full-time employees for work performed in Wisconsin and for the benefit of operations within the zone. A claimant may also claim up to 15 percent of their significant capital expenditures in the zone. WEDC may not certify more than $1.5 billion of credit for payroll expenses or more than $1.35 billion of credit for capital expenditures.

**TABLE 3**
**INDIVIDUAL INCOME TAX EXEMPTION DEVICES SUMMARY**

| Exemption Device | Statutory Reference* | FY24 Fiscal Effect |
|---|---|---|
| **Exclusions from Federal Gross Income** | | |
| Gain from Sale or Exchange of Residence (Home) | IRC 121 | 298,000,000 |
| Gain from Sale of Exchange of Qualified Small Business Stock | IRC 1202, s. 71.98(5) | 6,400,000 |
| Social Security Benefits | IRC 86 | 182,000,000 |
| Railroad Retirement Annuities and Pensions | IRC 86 | 1,350,000 |
| Public Assistance | IRC 61 | 2,350,000 |
| Sickness and Injury Benefits | IRC 104 to 106 | 1,300,000,000 |
| Distributions from Retirement Plans for Premiums for Health and Long-Term Care Insurance | IRC 402 P.L. 109-280 | 2,520,000 |
| Group Term Life Insurance Purchased for Employees | IRC 79 | 18,100,000 |

# CORPORATE INCOME AND FRANCHISE TAX

Taxation of corporate income was enacted in Wisconsin in 1911, at the same time the individual income tax was created. Since its initial enactment, the corporate tax has undergone some noteworthy changes.

1. Flat Rate. In 1981, a series of rates and brackets were replaced with a single flat rate of 7.9 percent.

2. Federalization. Under the federalized state corporate tax in effect since 1987, corporate taxpayers are subject to tax on the Wisconsin apportioned share of their federal net taxable income, with a number of adjustments for the remaining federal/state law differences and the ongoing effects of previous law differences. Corporations that conduct business in more than one state must apportion their net income among the states with jurisdiction to tax the income.

3. Single-Sales Factor Apportionment. Until 2006, Wisconsin apportioned income with a formula based on three factors — property, payroll and sales. In the formula, the sales factor was double-weighted (50 percent) and the property and payroll factors were single-weighted (25 percent each). For taxable years beginning in 2006, an apportionment formula based solely on the sales factor was phased in, with full implementation of the single sales formula beginning in 2008.

4. Combined Reporting. Effective for taxable years beginning on or after January 1, 2009, Wisconsin law requires groups of corporations with common ownership that are engaged in a unitary business to file a single return (referred to as a combined report) to compute their Wisconsin taxable income. In brief, the corporations required to use combined reporting are those which are both commonly controlled (generally speaking, this means 50 percent common ownership) and engaged in the same unitary business.

Corporations are actually subject to one of two state taxes. The corporate *income* tax, imposed since 1911, is a tax on the net income of corporations doing business in the state. The corporate *franchise* tax, imposed since 1965, is a tax on the privilege of doing business in the state. Corporate net income is used as the measure or base for the franchise tax. The distinction between the two taxes is a subtle one, relating primarily to the restrictions under federal law on the types of income that states can tax with an income tax (e.g., interest from U.S. obligations). The vast majority of corporations pay the franchise tax. The income tax applies to corporations whose business in Wisconsin consists entirely of foreign or interstate commerce and corporations that are filing their final return before dissolution. Because both levies employ the same rate and the same general rules for determining corporate net income (although interest income from U.S. obligations cannot be taxed under the income tax), the two taxes are usually considered as one.

Wisconsin also imposes an economic development surcharge equal to 3 percent of the gross tax liability of regular (C) corporations and 0.2 percent of the net income of tax-option (S) corporations. The surcharge and its exemptions are treated in a separate chapter.

Wisconsin provides for differential tax treatment of business income depending on the form of organization under which a business or organization operates. The business income of proprietorships and partnerships is reported and taxed on the individual income tax returns filed by the owners of the business. Tax-option or Subchapter S corporations are corporations that have elected under Subchapter S of the Internal Revenue Code (IRC) to have their business income taxed to the individual owners of the business in essentially the same manner as a partnership. 2017 Wisconsin Act 368 allows S corporations to elect to be taxed at the entity level as of tax years beginning after December 31, 2017, and for partnerships to be taxed at the entity level for tax years beginning after December 31, 2018. Both S corporations and partnerships that make the election pay the corporate rate of 7.9 percent of taxable income.

Businesses that are organized as regular subchapter C corporations pay the corporate income/franchise tax. In addition, under certain circumstances, the business income of nonprofit organizations and certain types of trusts can be subject to the state corporate tax.

1993 Wisconsin Act 112 authorized the formation of a new form of business organization, the limited liability company (LLC). LLCs combine the limited liability protection afforded to owners of corporations with the flow-through tax benefits provided to owners of S corporations and partners in partnerships. Generally, business income of LLCs is reported and taxed on the individual income tax returns of the owners (called members) of the business. However, some LLCs choose to be taxed as corporations and their business income is reported on the corporate return.

**Collections**

In FY24, corporate tax collections were $2.7 billion or 13.1 percent of total general purpose revenue (GPR) tax collections of $21.3 billion. Corporate tax collections are the third largest source of general fund revenue for the state after individual income taxes ($9.4 billion) and sales taxes ($7.6 billion). Corporate collections are as volatile as corporate profits themselves and highly dependent on economic conditions. Over the previous ten years, corporate income taxes have varied to between 5.2 percent and 14.6 percent of general tax revenue.

**Data Sources**

Tax exemption devices applicable to the corporate income tax are grouped into five categories: exemptions, exclusions, special treatments, deductions and credits. The following data sources were used to estimate the fiscal effects of these exemption devices:

1. Wisconsin Corporate Income Tax Model. Fiscal estimates were based in part on data and analysis provided by a computerized corporate income and franchise tax model. The corporate income tax model depends on statistically selected samples of returns from state taxpayers. The model contains detailed information from more than 13,400 corporate returns for tax year 2020, weighted to reflect the corporate tax filing population. The data for the model is compiled from state and federal tax returns. Where possible, data is captured electronically, either from electronically filed returns or by scanning the returns as they are initially processed. In addition, data that is not available electronically is entered into the database manually by full-time department staff and limited term employees. Finally, the department has developed systems to facilitate data entry and to model the fiscal effect of changes to federal and state tax laws.

2. Wisconsin Corporate Tax Collection Statistics. Department of Revenue annual aggregate statistics of corporate tax collections and data from every corporate return were also used to estimate fiscal effects. The most current data is for tax year 2021.

3. Income Tax Processing System Data. Data pulled directly from the department's income tax processing system was used for certain select estimates. The most current year for which complete tax data is available is 2021.

4. Federal Tax Expenditure Estimates. The Congressional Budget Act of 1974 requires preparation of a federal tax expenditure budget annually. These "expenditures" reflect the cost in lost federal revenues of the wide variety of exemptions and incentives contained in the Internal Revenue Code. Using Congressional Budget Office, Joint Tax Committee and U.S. Department of Treasury figures, estimates of the fiscal effect of comparable provisions contained in state law were generated. The procedure followed was first to apportion the federal tax expenditure to Wisconsin and then to adjust for the difference in state and federal tax rates and fiscal years.

5. Statistics of Income, Corporation Income Tax Returns. Published annually by the Internal Revenue Service, this data source provides aggregate data for income and deduction amounts reported on federal returns. Fiscal effects are derived by apportioning federal amounts to Wisconsin based on the proportion of Wisconsin taxable income to federal taxable income.

6. Miscellaneous Sources. Federal and state government agencies that publish data relating to the corporate sector provided additional information.

Several methodological issues complicate the estimation of the revenue loss associated with corporate tax exemption devices. The major obstacle is the lack of useful data. When data are available, they often only approximate the exempt income or deductible expenses for which an estimate is being made. Data may be several years old, which reduces its usefulness given the potential volatility in economic conditions across the nation, within the state or within a particular economic sector. Interest rates, price levels, industrial reorganizations and many other factors contribute to this volatility. Further, the corporate tax is imposed on corporate profits, which can be highly variable. Finally, the estimation process requires assumptions, for example, on Wisconsin's share of some national aggregate or the profitability of corporations operating in Wisconsin relative to firms nationwide. Frequently there is limited information on which to base these assumptions, so they may introduce errors into calculations. Additional programming is required each time the model is used to estimate a fiscal effect for a specific proposed law change.

The fiscal effects shown below relate only to the reduction in revenue under the corporate income and franchise tax. Many of the provisions are also available to individual income taxpayers who may be sole proprietors of businesses or owners or members of a pass-through entity such as a partnership or LLC. The fiscal effects for these taxpayers are shown in the individual income tax section of this report.

| ***Exclusions from Income*** | ***FY24 Fiscal Effect*** |
|---|---|

An exemption allows certain types of organizations, or certain activities related to those organizations, to be free of Wisconsin corporate franchise or income taxes.

| | |
|---|---|
| **Governmental Units, s. 71.26(1)(b) and (bm)** | **None** |

All political units are exempt from income taxation. This includes the federal and state governments, counties, cities, towns, villages, school districts, technical college districts, and special governmental districts like sewerage treatment districts and family care districts. Also exempt are quasi-governmental districts formed for some special public purpose, including local exposition, professional baseball park and local cultural arts districts.

Under the provisions of the United States Constitution, states cannot tax the assets or income-generating activities of the federal government. The state does not tax the assets or income-generating activities of local governments. Defining the net income of local government activities would be difficult, since such activities are generally not trades or businesses. In the case of activities that could be considered trades or businesses, such as municipal water utilities or public golf courses, the activities rarely result in net income to the local government.

| | |
|---|---|
| **Nonprofit Corporations or Associations, s. 71.26(1)(a)** | |
| **Nonprofit Organizations** | **None** |
| **Private Foundations** | **$94,300,000** |

All religious, scientific, educational, benevolent or other corporations or associations not organized or operated for profit are exempt from taxation on income from activities related to their tax-exempt purpose. Examples include college alumni groups, scouting organizations, religious and other not-for-profit nursing homes, community-based fund-raising drives for the needy, public interest research groups, and foundations.

Nonprofit organizations are not subject to tax on income from contributions and business activities related to their tax-exempt purpose because this income is used to provide the public services for which these organizations exist. The fiscal effect from this exemption is shown to be zero to the extent that these organizations devote their earnings and assets directly to the conduct of tax exempt purposes and hence do not generate profit.

Nonprofit organizations with income from business activities that are not related to their tax-exempt purpose are subject to a corporate-level unrelated business income tax (UBIT) similar to the federal UBIT. Certain types of income, such as royalties, are not included in UBIT.

Private foundations are treated differently since their activities tend to be more restricted than tax-exempt nonprofit organizations. Foundations generally do not conduct activities; rather, they provide grants to other organizations to conduct the activities. Thus, the investment income of foundations greatly exceeds their low amount of operating costs. The net investment income of these private foundations is exempt from the income and franchise taxes under Wisconsin law. Since 1969, the federal government has imposed an annual excise tax on the net investment income of private foundations and a series of penalty levies linked to the failure of foundations to meet certain specified operating requirements. The state does not impose a similar annual excise tax on private foundations.

| **Cooperatives, s. 71.26(1)(c), Chapter 185** | **None** |
|---|---|

Cooperatives organized under Chapter 185 of the Wisconsin Statutes are exempt from income taxation, provided they operate without profit to any shareholder or member and distribute their proceeds according to the procedures set out in sec. 185.45, Wis. Stats. Cooperatives may be organized for any lawful purpose except banking or insurance.

Agricultural cooperatives engaged in marketing farm products for producers and cooperative associations or corporations that process and market farm products exclusively for such cooperatives are exempt from income taxation. To retain their exempt status, cooperatives must: (1) have at least 25 members, (2) return to producers the net proceeds resulting from sale of their products and (3) in the preceding five years have limited payments of members' dividends to no more than 8 percent of the value of the stock per year. In order to be tax exempt, corporations that process and market farm products for agricultural cooperatives are additionally required to deal solely in farm products and cannot charge more than a sufficient amount to cover the costs of: (1) marketing and processing, (2) payment of dividends not to exceed 8 percent of the value of the cooperative's stock per year and (3) a maximum of 5 percent addition to their surplus reserve fund.

Because cooperatives, by definition, do not operate for profit, they would not have a taxable net income if subject to tax. Thus, the exemption has no fiscal effect. Distributions made by cooperatives to the cooperative members may be taxable, depending on the nature of the distribution (see the discussion of patronage dividends under the section on "Deductions from Gross Income").

| **Credit Unions, s. 71.26(1)(a)** | **$66,500,000** |
|---|---|

Federally-chartered credit unions are exempt from state taxation under federal law. Wisconsin exempts state-chartered credit unions from taxation, except for the portion of their net income attributable to public deposits from the state or local governments. There are approximately 130 credit unions operating in Wisconsin; most of them are state chartered.

| **Insurance Companies, ss. 71.43(2) and 71.45(1)** | **Not available** |
|---|---|

The following insurance companies are exempt from income taxation:

- Insurance companies exempted under sec. 501(c)(15) of the IRC. This section exempts companies other than life insurance companies whose gross receipts do not exceed $600,000 and more than 50 percent of gross receipts are from premiums. Mutual insurance companies are only exempt if exempt gross receipts do not exceed $150,000 and more than 35 percent of the gross receipts are from premiums.
- Town mutual companies organized under Chapter 612 of the Wisconsin Statutes.
- Foreign insurance companies, i.e., any insurance company organized outside the state of Wisconsin.
- Domestic life insurance companies engaged exclusively in life insurance.
- Domestic insurance companies insuring against losses relating to mortgages.

In general, only domestic insurers pay the corporate franchise tax to the Department of Revenue, based on the portion of their net income attributable to lines of insurance other than life insurance.

Approximately 80 insurance companies filed a corporate income and franchise tax return in tax year 2019 and paid net taxes of approximately $21.3 million. Other insurance companies pay a premium tax ($195.9 million in collections in FY24) to the Office of the Commissioner of Insurance, based on the amount of premiums written in Wisconsin. According to the 2019 annual report of the Office of the Commissioner of Insurance, as of December 31, 2019, there were 2,008 insurance companies with operations in the state, of which 329 were domestic companies. Of the domestic companies, 51 were town mutual companies. The fiscal effect of this exemption is unknown since it is not clear how income subject to tax would be defined.

A more complete description of the insurance premiums tax and the related exemption devices are contained in the Insurance Premiums Tax section of this report.

| **Banks under Liquidation, s. 71.26(1)(d)** | **Minimal** |
|---|---|

Banks placed in the hands of the Division of Banking of the Wisconsin Department of Financial Institutions for liquidation under sec. 220.08, Wis. Stats., are exempt from tax if such taxation would diminish the financial assets needed to make full payment to depositors. There have been relatively few bank liquidations in Wisconsin since the Depression in the 1930s. Because of the small number of banks undergoing liquidation in fiscal year 2021-22, the fiscal effect of this exemption device is not available so as to protect the confidentiality of the banks.

| **Assets Distributed to the Menominee Indian Tribe, s. 71.26(1)(e)** | **Not available** |
|---|---|

Assets distributed by the U.S. government to members of the Menominee Indian Tribe, or any corporations or organizations created by the tribe are exempt from state taxation. In addition, stocks, bonds and other securities issued by tribal corporations or organizations are exempt from state tax.

Under federal law, states generally do not have the authority to tax business activities of Indian tribes provided that the activities are conducted on reservation property or property held in tribal trust.

| **Activities of Out-of-State Publishers and Certain Foreign Corporations, s. 71.23(3)** | **Not Available** |
|---|---|

Under federal law, the state has jurisdiction to tax the Wisconsin-apportioned share of the net income of an out-of-state corporation only if the corporation has nexus – that is, a business presence – in Wisconsin. A corporation generally has nexus in Wisconsin if it has property or employees (i.e., payroll) in the state on a regular basis. Certain exceptions to the nexus rules exist so that some out-of-state corporations are not subject to the Wisconsin income and franchise tax.

Wisconsin allows the following exemptions from nexus:

- The storage of property with a firm in this state for purposes of fabricating, processing, manufacturing or printing the property for an out-of-state corporation.
- The storage of property on the premises of a Wisconsin firm when the intent is to distribute the goods outside the state.
- The printing, storage and distribution of books, magazines and other publications for out-of-state publishing companies that contract with Wisconsin printing firms.

The storage of property in Wisconsin for no more than 90 days by foreign corporations, provided the property is stored at a site not owned by the foreign corporation and is transferred and used in the state for fabricating, processing, manufacturing or printing on the site where the property is stored. Further, the assessed property value of the site where the property is stored and transferred must be at least $10 million but not more than $11 million on January 1, 1999.

These out-of-state corporations usually have no payroll or plant and equipment in Wisconsin. Thus, the act of storing property in the state for processing, printing or other temporary purposes would have been the only factor establishing nexus, and in turn, a Wisconsin tax liability for the corporations, in the absence of these exemptions.

| Veterans Service Organizations, s. 71.26(1)(am) | Minimal |
|---|---|

2007 Wisconsin Act 20 created an exclusion from the corporate income and franchise tax for income of a federally-chartered veterans service organization. This provision first applied to tax year 2008. The fiscal effect of this provision is minimal, as under prior law most income of veterans service organizations was already exempt under federal and state law. Only unrelated business income (i.e., income from activities not substantially related to the activity for which they were granted the exemption) would have been taxed. This income is now exempt.

| Interest on Conduit Revenue Bonds, s. 71.26(1m)(k) | Minimal |
|---|---|

2009 Wisconsin Act 205 authorized two or more political subdivisions to enter into an agreement to create a commission to issue conduit revenue bonds. Under the act, a commission is designed to act as a "conduit" for a developer to obtain bonding. Bonds issued by a commission are not public debt. Unless otherwise expressly provided in the bond resolution, bonds issued by a commission are payable solely from revenues derived by the project to be financed or from a contract entered into in connection with the bonds and pledged to the payment of the bonds. The bonds issued by a commission are not debts of either the state or one of the political subdivisions creating the commission and neither would be obligated to levy a tax or make an appropriation for the repayment of the bonds.

Under the act, interest on bonds issued by a commission is exempt from state income taxation if any of the following apply:

- The bonds could have been issued by Wisconsin Housing and Economic Development Authority and are used to fund multifamily affordable housing or elderly housing projects.
- The bonds could have been issued by Wisconsin Health and Educational Facilities Authority and are used by a health facility to fund the acquisition of information technology hardware or software.
- The bonds could have been issued under sec. 66.1201, 66.1333 or 66.1335, Wis. Stats., relating to housing authorities, blight and slum clearance, and housing and community development authorities, respectively.

The exemption only applies to the corporate income tax. Interest from conduit bonds would not be exempt from taxation under the corporate franchise tax.

***Exclusions from Income*** ***FY24 Fiscal Effect***

An exclusion is an item that is not included in the definition of gross income. Excluded income normally does not have to be reported on the tax return.

| Life Insurance Proceeds, IRC 101 | Minimal |
|---|---|

Amounts received by a corporation from an insurance company or any other insurer as payment for a death claim are exempt from income taxation. For example, if a company took out polices on the lives of its board members and was paid the value of insurance on the life of one of the board members upon his or her death, the insurance benefit would not be included in the income of the corporation subject to tax. However, the company could not claim a business expense deduction for the premiums it paid on the policy.

Companies are believed to represent a small proportion of all beneficiaries. Further, because insurance compensation is usually paid on the deaths of individuals past retirement age, the effect of this provision is thought to be small.

| | |
|---|---|
| **Exchanges of Corporate Property or Stock, IRC 1031-1033 and 1036-1038** | |
| **Like-Kind Exchanges** | **$2,900,000** |
| **Other Exchanges** | **Not Available** |

In general, a gain is recognized as a result of an exchange or disposition of property to the extent that any cash proceeds plus the taxpayer's basis in new property exceed the taxpayer's basis in the old property. However, gains from the following types of transactions are excluded from gross income:

- Exchange of property held for productive use in a trade or business or held for investment for like-kind (i.e., similar) property. Examples of like-kind exchanges are an exchange of a delivery truck for a delivery van and an exchange of one real property for another real property. The nonrecognition of gain does not apply to exchanges involving inventory and intangible investments, such as stocks and bonds, or to any exchanged property disposed of within two years by either party, with exceptions for death or involuntary conversions.
- Exchange of stock in the corporation for property. For example, a shareholder might contribute property to a corporation for additional shares of stock.
- Involuntary conversions. There is no recognition of gain from involuntary conversions of property provided that the property is converted into similar property or if it is converted into money used to acquire similar property.
- Exchange of common or preferred stock in a corporation for similar stock in the same corporation. For example, a shareholder might be allowed to convert 100 shares of old stock into 200 shares of new stock.
- Certain exchanges of United States obligations. There is generally no recognition of gain if United States obligations must be surrendered in exchange solely for other United States obligations.
- Certain reacquisitions of real property. There is generally no recognition of gain if the seller of real property reacquires a real property in exchange for satisfaction of indebtedness secured by the real property.

The fiscal effects of these exemption devices generally are small because they represent a postponement of income that will eventually be taxed. In general, the taxpayer's basis in the new property is equal to the basis in the old property or otherwise reduced to take into account the fact that the property was acquired in a tax-free transaction.

| | |
|---|---|
| **Recovery of Bad Debts, Prior Taxes and Delinquency Amounts, IRC 111** | **Minimal** |

Receipts generated by the recovery of bad debts, prior taxes or delinquency amounts are excluded from gross income to the extent that they did not reduce income tax liability when deducted in a prior year. The portion of a recovery amount that gave rise to a tax benefit in prior years is taxable.

| | |
|---|---|
| **Natural Resource-Related Cost-Sharing Payments, IRC 126** | **Minimal** |

Payments received by corporations primarily for the purpose of conserving soil and water resources, protecting or preserving the environment, improving forests, or providing a habitat for wildlife may be excluded from gross income. Under the federal Tax Relief and Health Care Act of 2006, escrow funds established after May 17, 2006, for hazardous waste sites under agreement with the U.S. Environmental Protection Agency under the Comprehensive Environmental Response, Compensation and Liability Act of 1980 are exempt so long as the funds are controlled by a government agency.

| | |
|---|---|
| **Interest on Certain Bonds Issued by the Wisconsin Health and Educational Facilities Authority, ss.71.26(1m)(i) and 71.45(1t)(i)** | **Minimal** |

2007 Wisconsin Act 20 provided an exemption from corporate income taxes for interest paid on certain bonds issued by the Wisconsin Health and Educational Facilities Authority (WHEFA), starting with taxable years beginning on or after January 1, 2008. This exemption would apply if the proceeds of the bonds or notes are

used by a health facility to fund the acquisition of information technology hardware or software. Interest on the bonds is not exempt under the corporate franchise tax.

**Special Treatment**

Certain corporate entities are subject to tax provisions that are substantially different from those provided for most corporations. While these entities pay corporate income or franchise taxes, the method used to compute the tax liability is different from that afforded other corporate taxpayers.

| **Limit on Tax Liability of Insurers, s. 71.46(3)** | **Minimal** |
|---|---|

The tax liability of insurance companies subject to the state income/franchise tax (see the discussion under the section on "Exemptions") is limited to 2 percent of the gross premiums derived from non-life lines of insurance in Wisconsin. The fiscal effect measures the difference between what the tax liability of the insurance companies subject to the 2 percent of gross premiums limitation would have been under the 7.9 percent tax rate applied to other corporations and what their tax liability was with the 2 percent limitation.

| **Urban Mass Transportation Companies, s. 71.39** | **None** |
|---|---|

Any corporation deriving 50 percent or more of its gross income from urban mass transportation is assessed a special tax equal to 50 percent of its taxable income. For the purpose of this special tax, taxable income is net of deductions for federal taxes and an amount equal to 8 percent of the amount by which the cost of property exceeds accumulated depreciation plus interest paid. No revenue has been collected under this special tax levy since 1974.

There are 23 county or municipality-owned urban mass transportation companies in Wisconsin, with the vast majority of revenues coming from operations in Milwaukee, Madison, Racine, Eau Claire and Green Bay. Because each of these companies generally register losses or no net income, this exemption has no fiscal effect.

| **RICs, REITs and REMICs, IRC 851-860 and 860A-860G s. 71.26(2)(b)** | **Minimal** |
|---|---|

Certain types of corporations are substantially or fully exempt from tax at the corporate level provided that they meet certain percentage requirements for distributions to shareholders. These corporations are generally organized as investment vehicles and do not carry on a trade or business other than the investment activities.

A regulated investment company (RIC) must derive its income primarily from interest, dividends and gains from the disposition of stock and securities. Most mutual funds are organized as RICs. At least 90 percent of a RIC's income must be distributed to its shareholders each year. If so, the corporation is allowed a deduction for the distributions to shareholders. This deduction reduces the corporation's net taxable income to a minimal amount and effectively eliminates any corporate tax liability. Failure to meet the distribution requirements results in the denial of the deduction and a substantial corporate tax liability.

A real estate investment trust (REIT) specializes in real estate investments and must derive its income primarily from rents from real property, other real property income, interest, dividends and gains from the disposition of stock and securities. At least 90 percent of a REIT's income must be distributed to its shareholders each year. The taxation of REITs is essentially the same as the taxation of RICs in that a deduction for distributions to shareholders is allowed if the corporation meets the distribution requirement.

A real estate mortgage investment conduit (REMIC) is an entity that holds a fixed pool of mortgages and issues multiple classes of ownership interests to investors. In general, a REMIC is treated in a manner similar to a partnership. Thus, the net income of a REMIC is taxable to the holders of the interests in the REMIC.

For these entities, any income not taxed to the corporation is generally taxed to the shareholders. Thus, the fiscal effect of this exemption device is minimal.

| "Throwback" Sales, s. 71.25(9)(dh) | Not Available |
|---|---|

A multistate corporation subject to tax in Wisconsin is required to treat certain "throwback" sales as Wisconsin sales when calculating its sales factor using the multistate apportionment formula. Throwback sales are sales originating in Wisconsin made to the federal government and shipped outside of Wisconsin and sales originating in Wisconsin to customers located in states where the seller is not subject to tax because of the nexus standards defined by federal law and interpreted by the Wisconsin Administrative Code.

Under the nexus standards, a corporation must have some type of operations in a state, generally in the form of property or employees, before its income can be taxed by that state. Without nexus, a state cannot tax a corporation. The throwback rule ensures that a corporation's entire income is subject to apportionment by the states with jurisdiction to tax. Without the throwback rule, sales to destination states in which the seller does not have nexus would not be included in the numerator of the sales factor of any state and a portion of a corporation's income would be tax exempt.

Prior to tax year 2009, sales of both tangible personal property and sales of intangibles such as services and the use of computer software were required to be thrown back if they met the criteria for throwback sales. Beginning in tax year 2009 only sales of tangible personal property must be thrown back if they meet the criteria. Sales of services and sales of the use of computer software are not thrown back. Therefore, the numerator of the sales factor is lower than it would be if these sales were thrown back, thus reducing the tax liability of businesses that make sales of services or sales of the use of computer software to states where they would not be taxed. Because these sales are now not included, there is no data available to estimate the fiscal effect of this exemption device.

| Tax-Option Corporations, IRC 1361-1368 and 1374, ss. 71.32-71.365 | Not Available |
|---|---|

A tax-option corporation is a corporation with not more than 100 individual shareholders (family members owning shares in the same Subchapter S corporation are together counted as a single shareholder) that elects Subchapter S treatment under sec. 1362 of the Internal Revenue Code. Under Subchapter S, the corporation is exempt from tax at the corporate level, and the net income is taxed to the individual shareholders under the individual income tax on a pro rata basis. The net income is taxed to the shareholders regardless of whether the corporation makes any actual distributions to the shareholders. In general, Subchapter S corporations are treated in a manner similar to partnerships and items of income retain their character as they flow through to the shareholders.

Most federal Subchapter S corporations are automatically treated as tax-option corporations for state purposes. However, Subchapter S corporations can elect to be treated as regular corporations for state purposes under certain conditions. Regular corporations converting to Subchapter S or tax-option treatment are subject to a special tax on built-in gains for both federal and state purposes. 2017 Act 368 allows Subchapter S corporations to elect to be taxed at the entity level for tax years beginning after December 31, 2017.

| Limited Liability Companies, s. 71.19-71.21 and Ch. 183 | Not available |
|---|---|

Limited liability companies (LLCs) are a type of business entity that may be taxed similar to corporations or partnerships, depending on how they are structured. If taxable as a partnership, owners of an LLC (called members) are taxed on the flow-through income of the company at lower individual rates, rather than at the higher corporate rate. However, if taxable as a corporation, an LLC is taxed at the entity level using the corporate income tax rate.

| Unincorporated Cooperative Associations (UCA), Ch. 193 | None |
|---|---|

2005 Wisconsin Act 441 authorized the creation of a new type of business organization called an unincorporated cooperative association (UCA). A UCA may be organized to market or process agricultural products; to manufacture products; to provide products, supplies or services; or for any other lawful purpose.

A UCA may be organized by one or more organizers, or it may be organized by converting from another form of business entity. The tax treatment of a UCA is similar to that of other pass-through entities, in that profits or losses are passed through to the UCA's members. Income and losses would be included on the owner's tax return and taxed at the owner's rate.

***Deductions from Gross Income*** ***FY24 Fiscal Effect***

A deduction is an amount subtracted from Wisconsin gross income (or total income) to establish Wisconsin taxable income – the amount to which the tax rate is applied.

Sec. 71.23, Wis. Stats., subjects corporations to a tax on or measured by their net income. Net income is defined as gross income less allowable deductions. Thus, the very nature of the corporate tax requires that income be reduced by certain current expenses and allocated costs. These expenses include wages and salaries, taxes, repairs, rents, interest, and the cost of employee benefits. These expenses are generally legitimate business outlays and thus are not considered a tax exemption device.

| **Amortization and Other Special Cost Recovery Allowances, IRC 169, 173-175, 178, 180, 190, 193-195, 263(c), 291, 611, 612, 616, and 617** | |
|---|---|
| **Circulation Expenditures** | **Minimal** |
| **Research and Development Expenditures** | **$58,100,000** |
| **Soil and Water Conservation Expenditures** | **Not Available** |
| **Lease Acquisition** | **Not Available** |
| **Reforestation Expenditures** | **Minimal** |
| **Start-Up Expenditures** | **Minimal** |
| **Mine Exploration and Development** | **Minimal** |

The cost associated with the consumption of an asset can be recovered in several ways. When an asset has a fixed life, costs are generally recovered through depreciation, which is discussed later in this section. For assets with indeterminate lives, the cost recovery methods include amortization, depletion and special cost recovery allowances. In addition, special cost recovery provisions apply for other types of costs that otherwise would not be recovered until the asset is disposed of, income is received for the product or service for which the cost was incurred, or the corporation is dissolved. The following costs are eligible for recovery techniques that allow taxpayers to recover costs sooner than would otherwise be allowed.

1. Circulation expenditures. Costs (other than costs to acquire land, depreciable property, and part of the business of other newspapers or periodicals) to establish, maintain or increase the circulation of newspapers and periodicals are deductible in the year paid.

2. Research and development expenditures. Costs of noncapital research and experimental activities are deductible in the year paid or amortized over a period of five years (see also the discussion of noncapital expenditures under the Research Expenditures Credit in the section on "Credits").

3. Soil and water conservation expenditures. Taxpayers engaged in farming can deduct, in the year paid, the costs of soil and water conservation practices that are consistent with a conservation plan approved by the Soil Conservation Service of the U.S. Department of Agriculture. The deduction cannot exceed 25 percent of gross income from farming.

4. Lease acquisition. The cost of acquiring a lease, including renewal options, is deductible in the year paid if certain requirements are met.

5. Reforestation expenditures. Up to $10,000 of costs to reforest qualified timber property can be amortized over a period of seven years.

6. Start-up expenditures. Costs of incorporating the taxpayer's business and issuing stock for the business can be amortized over a period of five years.

7. Mine exploration and development. A portion of the costs of exploring for energy and mineral deposits and developing such deposits for mining or drilling can be deducted in the year paid. The

remaining portion is amortized over a period of five years. The fiscal effect includes only that which comes from nonfuel mining expenses, as there are no fuel-based mines in Wisconsin.

Depletion allowances are provided to allow taxpayers to recover the costs of capital investment in natural resources. Under the cost depletion method, the acquisition costs are divided by the estimated number of units that the deposit or resource will produce. Taxpayers are allowed an annual deduction equal to the current year's production multiplied by the per unit depletion cost. Federal law also allows taxpayers the option of using percentage depletion, which provides taxpayers with an annual deduction equal to a percentage of the gross income from the current year's production. For taxable years beginning on or after January 1, 2014, the IRC in effect for the year the property is placed in service will apply for Wisconsin purposes.

The special expensing provision for depreciable property under sec. 179 of the Internal Revenue Code is discussed under Depreciation in this section.

| **Charitable Contributions, IRC 170** | **$12,100,000** |
|---|---|

Contributions by corporations to the following charities are deductible from gross income:

- The state or any other political subdivision, as long as the gift is for strictly public purposes.
- A corporation, trust, or community chest, fund or foundation operating for strictly religious, charitable, scientific, literary or educational purposes; or for fostering national or international sports competition; or for the prevention of cruelty to children or animals.
- Veterans' organizations and an auxiliary unit, society, trust or foundation of such organizations.
- Member-owned or nonprofit cemetery corporations chartered solely for burial purposes.

Certain limitations apply to the amount of contributions that can be claimed as a deduction and to the amount that can be deducted for contributions of property. In general, the deduction for charitable contributions cannot exceed 10 percent of a corporation's taxable income. Amounts of contributions not deductible in the current year can be carried forward for five years and claimed as a deduction.

| **Depreciation – Modified Accelerated Cost Recovery Systems and Expensing Election, IRC 167, 168, and 179** | |
|---|---|
| **Accelerated Recovery** | **Not Available** |
| **Section 179 Expensing** | **$1,800,000** |

Depreciation deductions are allowed to reflect the reasonable expenses incurred by taxpayers for exhaustion and wear and tear of property used in a trade or business or held for the production of income. Effective for tax year 1987, the state adopted the Modified Accelerated Cost Recovery System (MACRS), enacted as part of the federal Tax Reform Act of 1986. However, property placed in service prior to that time must continue to be depreciated according to the state restrictions in effect at the time the property was placed into service. Wisconsin has adopted all federal depreciation and amortization provisions in effect on January 1, 2014, with the exception of provisions under Section 179 of the IRC (discussed below). Subsequent changes to federal law regarding depreciation and amortization made after January 1, 2014, will not be in effect for Wisconsin without additional legislation.

Under MACRS, eligible property is generally assigned to a depreciation recovery class of 3 years, 5 years, 7 years, 10 years, 15 years or 20 years, 25 years, 27.5 years, 31.5 years, or 39 years, depending upon the type of property. The cost of the property is recovered using statutory recovery methods and conventions.

With some restrictions, sec. 179 rules of the Internal Revenue Code in effect prior to December 31, 2000, allow taxpayers to expense up to $25,000 of the cost of eligible assets purchased and put into use in the current year. The deduction begins to be phased out once the taxpayer has purchased $200,000 in eligible property in the taxable year. To qualify as sec. 179 property, the property must be acquired by purchase for use in the active conduct of a trade or business (sec. 1245 depreciable property). The total cost of the property expensed under this election cannot exceed the total amount of taxable income derived from the active conduct of any trade or business during the tax year. However, excess amounts may be carried forward

an unlimited number of years, subject to the ceiling each year. For taxable years beginning on or after January 1, 2014, Wisconsin has permanently adopted all federal Section 179 provisions, including any subsequent changes in federal law.

| | |
|---|---|
| **Dividends, IRC 591 and 1382, s. 71.26(3)(j)** | |
| **Dividends Received** | **$251,600,000** |
| **Patronage Dividends** | **Not Available** |
| **Depositor's Dividends** | **Not Available** |

Dividends paid are generally not deductible by the payor corporation except for:

- Amounts paid as dividends or earnings to depositors' accounts by savings and loan associations, mutual loan corporations, or mutual savings banks.
- Amounts distributed to patrons of businesses operating on a cooperative basis in proportion to their patronage, rather than stock or ownership. This type of dividend amounts to a delayed discount for purchases made.

Dividends received are deductible in full by the recipient corporation if the payor corporation is a controlled subsidiary in which the recipient parent corporation owns at least 70 percent of the voting stock, or at least 50 percent of the voting stock if the payor and recipient corporations are members of the same combined group. The payor corporation is not allowed to subtract the dividends paid in determining its Wisconsin taxable income. The fiscal effect relates to the revenue impact of disallowing the deduction of dividends received from corporate affiliates. Data are not available to estimate the fiscal effect for allowing the deduction of patronage or depositors' dividends.

| | |
|---|---|
| **Bad Debt Reserves of Financial Institutions, IRC 585 and 593** | **Minimal** |

In general, corporations can deduct bad debts only as the debts become worthless. Savings and loan associations, mutual savings banks, and other savings institutions may deduct additions to a reserve account for bad debts in lieu of deducting bad debts as they are experienced. Banks are also allowed to deduct additions to bad debt reserves, provided that the assets of the bank do not exceed $500 million.

The deduction for additions to bad debt reserves is generally based on the average ratio of bad debts actually incurred to total loans outstanding for the five preceding taxable years. The tax benefit from this provision is that financial institutions using the reserve method can deduct bad debts before they actually become worthless.

| | |
|---|---|
| **Net Operating Loss Carryforward, s. 71.26(4)** | **$202,000,000** |

Wisconsin authorizes corporations to carry net operating losses incurred in the current year forward for up to 20 years to offset net income in future years. In contrast, federal law allows losses to be carried forward indefinitely; however, corporations may only cover 80 percent of their income. This treatment acts to smooth out fluctuations in corporate profits, which may change dramatically with economic conditions. Losses from the earliest years are always used first. The fiscal effect relates to the difference in tax liability without the carryforward provision relative to actual liability under current law.

| | |
|---|---|
| **Income from Out-of-State Businesses Performing Disaster Relief Work, s. 71.26(2)(a)12** | **None** |

Qualifying out-of-state corporations are allowed an exemption from Wisconsin tax reporting requirements, if the qualifying employer or employee is in Wisconsin solely to perform disaster relief work in connection with a state of emergency declared by the Governor. An "out-of-state business" corporation, whether operated for profit or not for profit, is a corporation that is not organized under the laws of Wisconsin and that, except for disaster relief work during a disaster period, was not doing business in Wisconsin during the three taxable years immediately preceding the disaster period or the current taxable year in which the declared state of emergency occurs.

If an out-of-state corporation is required to be included in a combined group because it meets the requirements of sec. 71.255(2), Wis. Stats., when computing the net income of the corporation, the income received by the out-of-state corporation for performing disaster relief work may be subtracted when determining the income subject to taxation. In addition, for purposes of determining the portion of income taxable to Wisconsin by an out-of-state business, gross receipts from the sale of property or services related to performing disaster relief work are not considered sales for purposes of the sales factor.

An out-of-state business that wishes to claim the exemption must notify the department no later than 90 days after the last day of the disaster period. There is no fiscal effect for this exemption, as to date the department has not received any required notifications.

**Credits**

A credit is an amount subtracted directly from the taxpayer's Wisconsin gross tax liability (i.e., the amount determined by applying the Wisconsin tax rate to Wisconsin taxable income) to determine the Wisconsin net tax liability. Nonrefundable credits reduce a corporation's tax liability otherwise due. If the amount of credit exceeds the corporation's tax liability, the excess credit can be carried forward to offset tax liability in future years. A refundable credit also reduces a corporation's tax liability, but if the amount of credit exceeds the corporation's tax liability, a refund is issued in the amount of the excess credit.

The fiscal effect for nonrefundable credits results from a loss of revenue that otherwise would be collected. Refundable credits require an appropriation, and the fiscal effect for these credits is expressed as an increase in appropriations, even though some or all of the credit may be used to offset taxes otherwise due in the current tax year or applied to offset taxes due in a subsequent tax year.

The corporate tax forms for tax year 2022 show a total of 30 nonrefundable credits available. Of those, 17 credits are no longer being awarded but the credit is still listed on the form so that taxpayers may claim credits earned in prior tax years. In addition, the 2022 corporate tax forms show a total of six refundable credits available. The total corporate income and franchise tax revenue reduction from nonrefundable credits for FY24 is an estimated $192.6 million. In addition, refundable credits claimed by corporations led to expenditures of $71.6 million in FY24.

| **Manufacturer's Sales Tax Credit, ss. 71.28(3) and 71.47(3)** | **Minimal** |
|---|---|

Until 2006, a nonrefundable credit could be claimed for the amount of Wisconsin sales tax paid on fuel and electricity consumed in manufacturing tangible personal property in the state. The credit was designed to be the equivalent of a sales tax exemption. Unused amounts of credit could be carried forward and offset against tax liability over the next 20 years.

Beginning in 2006, fuel and electricity used in manufacturing are exempt from the sales tax and the income and franchise tax credit for sales tax was repealed. Manufacturers with up to $25,000 in credit carryforwards as of January 1, 2006, may continue to use manufacturers' sales tax credits carried forward from prior years to offset taxes in the future. The fiscal effect reflects the current tax liability reduction from the use of credits carried forward by businesses that had $25,000 or less in credit as of January 1, 2006.

| **Manufacturing Investment Credit, ss. 71.28(3t) and 71.47(3t)** | **$2,000,000** |
|---|---|

Beginning in tax year 2008, businesses whose unused carryforwards of the manufacturer's sales tax credit were greater than $25,000 on January 1, 2006, are able to claim a manufacturing investment credit, provided they met certain job retention, investment or other tests. The credit, which is nonrefundable, is equal to the unused manufacturers' sales tax credit and is to be amortized over 15 years. Claimants must have been certified by the former Wisconsin Department of Commerce as eligible to claim the credit. In order to be certified, the claimant must have satisfied one of the following requirements:

- Retention of 100 percent of the full-time (at least 35 hours per week) jobs employed by the company as of December 23, 2003.

- Average annual investment since January 1, 2003, equal to 2 percent of total book value of the company's depreciation assets in Wisconsin-based plants and facilities or $5 million.

| **Research Expenditures Credit, ss. 71.28(4) and 71.47(4)** | **$84,500,000** |
|---|---|

A nonrefundable research expenditures credit for noncapital expenditures for research-related activities conducted in Wisconsin is available. Qualifying expenditures are defined by reference to the rules established under Section 41 of the IRC with certain exceptions. Qualified research expenses cover in-house expenses for the taxpayer's own research (wages, supplies and computer use charges) and 65 percent of amounts paid or incurred for qualified research done by a person other than an employee of the taxpayer.

The credit is equal to 5.75 percent of the amount by which the claimant's qualified research expenses for the taxable year exceed 50 percent of the average qualified research expenses for the three taxable years immediately preceding the taxable year for which the claimant claims the credit. If the claimant had no qualified research expenses in any of the three taxable years immediately preceding the taxable year for which the claimant claims the credit, the claimant may claim an amount equal to 2.875 percent of the qualified research expenses for the taxable year for which the credit is claimed.

The credit applies only to research expenditures that are undertaken to discover information that is technological in nature and intended to be useful in the development of a new or improved business component. Qualified research expenses cover in-house expenses for the taxpayer's own research (wages, supplies and computer use charges) and 65 percent of amounts paid or incurred for qualified research done by a person other than an employee of the taxpayer. For corporations in a combined group, unused research credits may be shared with other members of the combined group.

For tax years beginning after December 31, 2023, up to 25 percent of the research credit is refundable.

| **Research Facilities Credit, ss. 71.28(5) and 71.47(5)** | **$1,000,000** |
|---|---|

For taxable years beginning before January 1, 2014, a research facilities credit was available. The credit applies to capital investments to construct and equip new research facilities or to expand existing facilities located in Wisconsin. The credit is equal to 5 percent of the amount of qualified investment in tangible depreciable property that is not replacement property. A similar credit exists for capital investments to construct and equip new research facilities or to expand existing facilities in Wisconsin engaging in internal combustion engine research or energy efficient products research. The credit is equal to 10 percent of the amount of qualified investment in tangible depreciable property that is not replacement property.

The rules relating to the credit are similar to the rules for the research expenditures credit. Unused amounts of credit may be carried forward and offset against tax liability for 15 years from the year the credit is computed. Corporations must increase their net income by the amount of credit claimed in lieu of reducing their deduction for research expenses or reducing their basis in the property. For corporations in a combined group, unused research facilities credits may be shared with other members of the combined group.

| **Internal Combustion Engine Research Credit, ss. 71.28(4) and 71.47(4)** | **$10,000,000** |
|---|---|

The credit for expenses is equal to 11.5 percent of the amount by which the claimant's qualified research expenses for the taxable year exceed 50 percent of the average qualified research expenses for the three taxable years immediately preceding the taxable year for which the claimant claims the credit. If the claimant had no qualified research expenses in any of the three taxable years immediately preceding the taxable year for which the claimant claims the credit, the claimant may claim an amount equal to 5.75 percent of the qualified research expenses for the taxable year for which the credit is claimed. Unused credits may be carried forward for 15 years. Members of a combined group may share unused engine research credits.

For tax years beginning after December 31, 2020, up to 15 percent of the engine research credit is refundable.

| Energy Efficient Products Research Credit, ss. 71.28(4) and 71.47(4) | Minimal |
|---|---|

The credit for expenses is equal to 11.5 percent of the amount by which the claimant's qualified research expenses for the taxable year exceed 50 percent of the average qualified research expenses for the three taxable years immediately preceding the taxable year for which the claimant claims the credit. If the claimant had no qualified research expenses in any of the three taxable years immediately preceding the taxable year for which the claimant claims the credit, the claimant may claim an amount equal to 5.75 percent of the qualified research expenses for the taxable year for which the credit is claimed.

For tax years beginning after December 31, 2020, up to 15 percent of the energy efficient products research credit is refundable.

| Supplement to Federal Historic Rehabilitation Credit, ss. 71.28(6) and 71.47(6) | $42,900,000 |
|---|---|

A nonrefundable credit is available to encourage the rehabilitation of certified historic structures in Wisconsin. This supplement to the federal historic rehabilitation credit can be claimed only for projects that are eligible for the federal historic rehabilitation credit. The rehabilitation work must meet historic preservation standards, and the expenditures must exceed the taxpayer's adjusted basis in the building. Unused amounts of the credit can be carried forward for up to 15 years. Beginning July 1, 2018, the Wisconsin Economic Development Corporation (WEDC) may not certify a person to claim more than a total of $3,500,000 in supplement to the federal historic rehabilitation tax credits for all projects undertaken on the same parcel.

The credit is equal to 20 percent of the qualified rehabilitation expenditures if the cost of the expenditures is at least $50,000, the property is placed in service after December 31, 2013, and the claimant is certified by WEDC. To be certified by WEDC, the claimant must submit evidence to WEDC that the rehabilitation was recommended by the U.S. Secretary of the Interior before physical work of construction, or destruction in preparation for construction, began and the rehabilitation was approved by the state historic preservation officer.

Credits certified for taxable years beginning on or after January 1, 2014, for 20 percent of the qualified rehabilitation expenditures may be sold or transferred to any other Wisconsin taxpayer if the transferor notifies the department in writing and submits a copy of the transferring documents. The department must certify ownership of the credit with each transfer. Nonprofit entities may be awarded credits and may transfer those credits to other entities with a Wisconsin tax liability.

| Development Zone and Development Opportunity Zone Credits, ss. 71.28(1dx) and 71.47(1dx) | Minimal |
|---|---|

The Development Zone program provides credits to taxpayers that locate or expand a trade or business activity within a development zone. A development zone is an economically distressed area designated as a development zone by WEDC or the former Wisconsin Department of Commerce. The corporation is authorized to designate 22 zones. All 22 zones have been designated, with authorized tax credits of $38.155 million. These zone designations are in effect for a period of seven to ten years. The first of these zone designations expired in September 2009 and the last expired in September 2021. Certified businesses are provided with a maximum amount of tax benefits and may claim the development zone credits up to that amount.

Under the Development Opportunity Zone program, businesses conducting economic activities in a zone may claim nonrefundable development opportunity zone credits allocated to them by WEDC. Nine zones with a total of $46.4 million in tax credits have been authorized. The designation for six zones has expired. New zones in Janesville and Kenosha were authorized in 2009 Wisconsin Act 28 with a total credit available of $5 million each over the life of the zone. In addition, 2011 Wisconsin Act 37 authorized an additional zone for the city of Beloit, also for a total credit amount of $5 million over the life of the zone. For all three of these new zones, if the original $5 million is allocated within five years, the zones can be extended for an additional five years with an additional $5 million each. The designation for the new zones will be effective for 60 months from the date

of designation. To date, only the Janesville zone has been allocated the additional $5 million and five additional years.

Businesses locating or expanding their operations within the development opportunity zones are eligible to claim a job creation credit based on the number of new, full-time positions created; an environmental remediation credit that equals up to 50 percent of eligible environmental remediation costs; and an investment credit equal to 2.5 percent of the purchase of depreciable tangible personal property (or 1.75 percent of the price if the property has been expensed under section 179 of the IRC). Unused credit amounts may be carried forward for 15 years.

A *capital investment credit* is also available for certain businesses located in the new zones in Kenosha, Beloit and Janesville equal to 3 percent of qualified purchases of depreciable tangible personal property and amounts expended to acquire, construct, rehabilitate or remodel qualified real property. Unused credit amounts may be carried forward for 15 years.

| **Enterprise Zone Jobs Credit, ss. 71.28(3w) and 71.47(3w)** | **$48,300,000** |
|---|---|

A refundable enterprise zone jobs credit is available for certified businesses located in a designated enterprise zone. WEDC may certify for tax benefits a business that begins operations in an enterprise zone if the business offers compensation and benefits to its employees working in the zone for the same type of work that are at least as favorable as those offered to its employees working outside the zone. WEDC may also certify a business that expands operations in an enterprise zone, if the business will increase its personnel by at least 10 percent or the business makes a capital investment in property located in the enterprise zone equal to at least 10 percent of the business' gross revenues in the preceding tax year attributable to business activities in Wisconsin. Finally, WEDC may certify a business that retains existing jobs in an enterprise zone if the business makes a significant capital investment in property located in the zone, and at least one of the following applies: (1) the business is an original equipment manufacturer with a significant supply chain in Wisconsin, as determined by WEDC; or (2) more than 500 full-time employees are employed by the business in the enterprise zone.

WEDC is authorized to designate no more than 30 enterprise zones, with three of the zones being areas comprising political subdivisions whose population totals less than 5,000 and at least two areas comprising political subdivisions whose population is greater than 5,000 but less than 30,000. A designation may be in effect for no more than 12 years. In determining whether to designate an area as an enterprise zone, WEDC must consider indicators of the area's economic need, infrastructure and energy support, the rate of business development, existing resources available to the area, and the effect of designation on other initiatives and programs to promote economic and community development in the area, such as job training and the creation of high-paying jobs.

The credit has five components:

1. A credit based on changes in the claimant's zone payroll over a base year, up to 7 percent of the base change. Eligible wages are those paid to new employees whose annual wages are greater than the amount determined by multiplying $2,080 by 150 percent of the federal minimum wage in a Tier I county or municipality, or greater than $30,000 in a Tier II county or municipality.

2. An additional credit based on up to 7 percent of wages paid to existing zone employees. Eligible wages are those paid to employees whose annual wages are greater than the amount determined by multiplying $2,080 by 150 percent of the federal minimum wage in a Tier I county or municipality, or greater than $30,000 in a Tier II county or municipality. The total number of employees must be equal to or greater than the number of employees in the base year. Credit claims are limited to five consecutive years.

3. A credit based on the amount paid for training to upgrade the job-related skills of full-time employees who work in the enterprise zone.

4. A credit of up to 10 percent of significant capital expenditures in the zone.

5. For taxable years beginning after December 31, 2009, a credit equal to 1 percent of the amount the claimant paid in the taxable year for goods or services from Wisconsin vendors, not including capital expenditures for which the credit is claimed.

An additional credit for one financial service corporation is based on whether a claimant has retained the minimum number of full-time employees and maintained average zone payroll for the taxable year equal to or greater than the base year. The amount of the credit is a percentage, as determined by WEDC, of the claimant's full-time employees in the enterprise zone. No more than one financial service technology business may receive the credit.

| **Economic Development Credit, ss. 71.28(1dy) and 71.47(1dy)** | **$4,300,000** |
|---|---|

For tax years beginning after December 31, 2008, and before January 1, 2016, an economic development tax credit is available. The nonrefundable credit may be claimed against the corporate income and franchise tax or against the insurance premiums tax. The amount of credit available is limited to $103.2 million, which is the amount of available credit that had not been allocated by the former Wisconsin Department of Commerce in the five zone-based programs that this credit replaces, plus an additional $100 million. Commerce's successor, WEDC, is authorized to award up to $164.2 million in credit, with WEDC able to request an additional $39 million from the Joint Committee on Finance. Unused tax credit amounts may be carried forward up to 15 years to offset future tax income and franchise tax liabilities.

Under the program, a business may apply to WEDC for certification to claim tax benefits. WEDC may certify a business that conducts or intends to conduct at least one eligible activity. The eligible activities include:

- Creating and maintaining, for a period of time established by WEDC, full-time jobs.
- Making a significant investment in new equipment, machinery, real property or depreciable personal property.
- Making significant investments in the training or reeducation of employees for the purpose of improving the productivity or competitiveness of the business.
- Locating or retaining a corporate headquarters in Wisconsin or retaining employees holding full- time jobs in Wisconsin.

WEDC may authorize additional tax benefits for certified claimants if the claimant conducts at least one eligible activity in an area designated by WEDC as economically distressed, or if the claimant creates, retains or trains members of certain targeted groups.[1]

For taxable years beginning on or after January 1, 2014, the credit may be transferred to another taxpayer who can use the transferred credit to offset income and franchise taxes under Chapter 71 or insurance premium fees under Chapter 76. The credit may only be transferred in exchange for a nonmonetary consideration. The claimant seeking to transfer the credit must apply to WEDC.

The economic development tax credit may not be computed for taxable years beginning on or after January 1, 2016; however, if WEDC has allocated tax benefits to the claimant in a contract executed before December 31, 2015, or in a letter of intent to enter into a contract before that date, the claimant may compute the credit for taxable years beginning after December 31, 2015, for as long as the contract specifies.

[1] "Member of a targeted group" means a person who resides in an area designated by the federal government as an economic revitalization area, a person who is employed in an unsubsidized job but meets the eligibility requirements for a Wisconsin Works employment position, a person who is employed in a trial job, as defined in s. 49.141 (1) (n), or in a real work, real pay project position under s. 49.147 (3m), a person who is eligible for child care assistance, a person who is a vocational rehabilitation referral, an economically disadvantaged youth, an economically disadvantaged veteran, a supplemental security income recipient, a general assistance recipient, an economically disadvantaged ex-convict, a dislocated worker, as defined in 29 USC 2801 (9), or a food stamp recipient, if the person has been certified in the manner under 26 USC 51 (d) (13) (A) by a designated local agency, as defined in 26 USC 51 (d) (12).

Unused tax credit amounts may be carried forward up to 15 years to offset future tax income and franchise tax liabilities.

| **Early Stage Seed Investment Credit, ss. 71.28(5b) and 71.47(5b)** | **Minimal** |
|---|---|

Effective for taxable years beginning after 2004, an early stage seed investment credit is available equal to 25 percent of investments paid to a fund manager that invests the funds in qualified new business ventures that are certified by WEDC. The credit may be claimed against the income and franchise tax as well as against the insurance premiums tax. The maximum annual amount that may be claimed by all claimants is $30 million combined between the early stage seed credit and the angel investment credit (the angel investment credit is discussed in the Individual Income Tax section of this report).

If the investment is held for less than three years, any previously claimed credits must be repaid to the Department of Revenue unless during the three-year period the investment becomes worthless as determined by WEDC, or if a bona fide liquidity event occurs after the investment has been held for 12 months. In addition, if the investor has invested in the business prior to the business being certified as a qualified new business venture, investments after certification by this investor are not eligible for credit. Unused credit amounts may be carried forward for 15 years.

For tax years beginning on or after January 1, 2009, a claimant may transfer unused credits to another entity. The transferor is required to obtain prior authorization from the fund manager, and the fund manager is required to notify the Department of Revenue and WEDC.

To be qualified to receive investments that are eligible for the credit, a qualified new business venture must, at the time it is certified, have its headquarters in the state; have less than 100 employees, at least 51 percent of whom are employed in the state; and have been in business for not more than ten consecutive years, and must not have received aggregate private equity investments of cash of more than $10 million. A qualified new business venture must also be engaged in one of the following:

- Manufacturing.
- Biotechnology.
- Nanotechnology.
- Communications.
- Agriculture.
- Clean energy creation or storage technology.
- Processing or assembling products, including medical devices, pharmaceuticals, computer software, computer hardware, semiconductors, any other innovative technology products or other products that are produced using manufacturing methods that are enabled by applying differentiating technology.
- Precommercialization activity related to differentiating technology that includes conducting research, developing a new product or business process.
- Developing a service that is principally reliant on applying differentiating technology.

The business may not be primarily engaged in real estate development, insurance, banking, lending, lobbying, political consulting, professional services provided by attorneys, accountants, business consultants, physicians, health care consultants, wholesale or retail trade, leisure, hospitality, transportation or construction, except construction of power production plants that derive energy from a renewable resource.

WEDC may transfer any unallocated early stage seed credits in any calendar year to the refundable business development credit (discussed below).

| **Dairy and Livestock Farm Investment Credit, ss. 71.28(3n) and 71.47(3n)** | **Minimal** |
|---|---|

For taxable years beginning before January 1, 2014, a nonrefundable credit is available for 10 percent of expenses to modernize or expand a dairy or livestock farm. Dairy animals include heifers raised as

replacement dairy animals. Livestock includes cattle (not including dairy animals), swine, poultry including farm raised pheasants but not including other farm raised game birds or ratites, fish that are raised in aquaculture facilities, sheep, and goats. The aggregate amount of credit that a taxpayer may claim is $75,000 for expenses to construct, improve and acquire buildings or facilities and equipment, for dairy animal housing, confinement, feeding, milk production and waste management, except that no more than $50,000 may be based on expenses that are incurred prior to May 27, 2010. The credit may be claimed for dairy farm modernization or expansion for taxable years beginning after December 31, 2003, and for livestock farm modernization or expansion for taxable years beginning after December 31, 2005. Both credits are repealed for tax years beginning on or after January 1, 2014. A taxpayer may carry forward credits for 15 years for those credits computed for taxable years beginning before December 31, 2013.

| **Farmland Preservation Credit, 2010 and Beyond, s. 71.613** | **Minimal** |
|---|---|

Beginning in tax year 2010, a refundable per-acre farmland preservation credit is available under which a claimant may claim as a credit against income and franchise taxes an amount calculated by multiplying the claimant's qualifying acres by one of the following amounts:

- $10 if the qualifying acres are located in a farmland preservation zoning district and are also subject to a farmland preservation agreement that is entered into after July 1, 2009;
- $7.50 if the qualifying acres are located in a farmland preservation zoning district but are not subject to a farmland preservation agreement that is entered into after July 1, 2009; or
- $5 if the qualifying acres are subject to a farmland preservation agreement that is entered into after July 1, 2009, but are not located in a farmland preservation zoning district.

| **Insurance Security Fund Assessments, s. 646.51(7)** | **None** |
|---|---|

Chapter 646 of the Wisconsin Statutes provides a credit against state taxes, including the corporate income and franchise tax, for certain assessments levied on insurance companies by the Wisconsin Insurance Security Fund. The fund is designed to protect policyholders in cases where their insurance company has failed and is in the process of liquidation. Where the available assets and reserves of failed insurers are inadequate to meet claims, the fund may assess insurance companies doing business in the state, with some exceptions (e.g., fraternal benefit societies). Such assessments are eligible for a 100 percent tax credit if they cannot be recovered through higher premiums. This can occur if premiums are fixed for a particular line of business. Credits claimed by foreign insurance companies and domestic life companies would be offset against the premiums tax. Thus, the only offsets against the income and franchise tax would be for credits claimed by domestic property and casualty companies. The tax credit is nonrefundable and must be claimed in equal installments over a five-year period, beginning with the year following the one in which the assessment is made.

| **Health Insurance Risk-Sharing Plan (HIRSP) Assessments Credit, ss. 71.28(5g) and 71.47(5g)** | **Minimal** |
|---|---|

An income and franchise tax credit and a license fee credit were available for insurers that pay assessments for HIRSP. HIRSP offered health insurance to Wisconsin residents who either were unable to find adequate health insurance coverage in the private market due to their medical conditions or who lost their employer-sponsored group health insurance. Applicants were required to meet HIRSP eligibility criteria to qualify. The credit is equal to a percentage of the amount of assessments paid by the insurer in the taxable year under HIRSP. The Department of Revenue, in consultation with the Office of the Commissioner of Insurance, determines the credit percentage for each year, and the insurer's credit amount is the percentage times $5 million in total credit available. For taxable years beginning after December 31, 2013, and before January 1, 2015, the total amount of credit available is $1.25 million.

The HIRSP assessment credit is repealed for taxable years beginning on or after January 1, 2015. Credits computed for taxable years beginning before January 1, 2015, may be carried forward for 15 years from the taxable year in which they were computed.

| Biodiesel Fuel Production Credit, ss. 71.28(3h) and 71.47(3h) | None |
|---|---|

For tax years beginning on or after January 1, 2012, and before January 1, 2014, a nonrefundable credit was available that is equal to 10 cents per gallon for biodiesel fuel produced in Wisconsin for producers that produce at least 2.5 million gallons of biodiesel fuel per year. The maximum credit that a claimant may claim in a taxable year is $1 million. Credits computed for taxable years beginning before January 1, 2014, may be carried forward for 15 years from the taxable year in which they were computed.

| Electronic Medical Records Credit, ss. 71.28(5i) and 71.47(5i) | Minimal |
|---|---|

For tax years beginning on or after January 1, 2012, and before January 1, 2014, a nonrefundable electronic medical records credit was available. The credit was equal to 50 percent of the amount paid by a health care provider in a tax year for information technology hardware or software that was used to maintain medical records in an electronic form. The maximum total amount of electronic medical records tax credits that could be claimed in a tax year was $10 million, and this amount was allocated to claimants by the former Wisconsin Department of Commerce. The Department of Revenue certified claimants as eligible to receive the credit. Unused credit amounts may be carried forward for 15 years. The Department of Revenue made its final allocation of credits in February 2014. No credit may be claimed for on an amount paid after December 31, 2013.

| Community Rehabilitation Program Credit, ss. 71.28(5k) and 71.47(5k) | Minimal |
|---|---|

For tax years that begin on or after July 1, 2011, a nonrefundable community rehabilitation credit is available. The credit is equal to 5 percent of the amount that the claimant pays in a taxable year to a community rehabilitation program to perform work for the claimant's business. The maximum credit would be $25,000 for each contract that a claimant enters into with a community rehabilitation program. Unused credits can be carried forward for 15 years to offset future tax liabilities.

| Manufacturing and Agriculture Credit, s. 71.28(5n) | $153,000,000 |
|---|---|

For taxable years beginning after December 31, 2012, a nonrefundable manufacturing and agriculture credit is available. The credit is equal to a specified percentage of the claimant's qualified production activities income that is derived from property assessed as manufacturing or agricultural property in Wisconsin, as defined under state property tax law.

"Qualified production activities income" is defined as the amount of the claimant's gross receipts for the taxable year that exceeds the cost of goods sold that are allocable to such receipts and the indirect cost multiplied by the gross receipts factor. "Qualified production activities income" does not include any of the following:

- Income from film production;
- Income from producing, transmitting or distributing electricity, natural gas or potable water;
- Income from constructing real property;
- Income from engineering or architectural services performed with respect to constructing real property;
- Income from the sale of food and beverages prepared by the claimant at a retail establishment; or
- Income from the lease, rental, license, sale, exchange or other disposition of land.

For corporations the credit would be the lesser of a specified percentage of the claimant's:

- Eligible qualified production activities income;
- Income apportioned to Wisconsin for state corporate income and franchise tax purposes; or
- Taxable income for corporate income and franchise tax purposes as determined under s. 71.255(2).

The specified percentages are:

- For taxable years beginning after December 31, 2012, and before January 1, 2014, 1.875 percent.
- For taxable years beginning after December 31, 2013, and before January 1, 2015, 3.75 percent.
- For taxable years beginning after December 31, 2014, and before January 1, 2016, 5.025 percent.
- For taxable years beginning after December 31, 2015, 7.5 percent.

Insurance companies may not claim the credit.

| **Business Development Credit, ss. 71.28(3y) and 71.47(3y)** | **$15,500,000** |
|---|---|

For taxable years beginning on or after January 1, 2016, a refundable business development tax credit is available. The credit replaces the nonrefundable economic development and refundable jobs tax credits. The business development credit is equal to all of the following, as determined by WEDC:

1. The amount of wages the claimant paid to an eligible employee in the taxable year, not to exceed 10 percent of such wages.

2. In addition to any amount claimed for an eligible employee, the amount of wages that the claimant paid to the eligible employee in the taxable year, not to exceed 5 percent of such wages, if the eligible employee is employed in an economically distressed area.

3. An amount equal to up to 50 percent of the claimant's training costs incurred to undertake activities to enhance an eligible employee's general knowledge, employability and flexibility in the workplace; to develop skills unique to the claimant's workplace or equipment; or to develop skills that will increase the quality of the claimant's product.

4. The amount of the personal property investment, not to exceed 10 percent of such investment, and the amount of the real property investment, not to exceed 5 percent of such investment, in a capital investment project that involves a total capital investment of at least $1,000,000 or, if less than $1,000,000, involves a capital investment equal to at least $10,000 per eligible employee employed on the project. For tax years beginning after December 31, 2022, a taxpayer may also claim a credit for up to 15 percent of their investment in workforce housing and 15 percent of their investment in establishing a child care program for eligible employees.

5. An amount equal to a percentage of the wages that the claimant paid to an eligible employee in the taxable year, provided that the position was created or retained in connection with the claimant's location or retention of the claimant's corporate headquarters in Wisconsin and the job duties performed are headquarters functions.

WEDC may certify a person to receive tax benefits if the person is operating or intends to operate a business in Wisconsin and the person applies and enters into a contract with WEDC. The certification may remain in effect for no more than ten cumulative years. A person is eligible to receive tax benefits if, in each year for which the person claims tax benefits, the person increases net employment in Wisconsin in the person's business above the net employment in Wisconsin in the person's business during the year before the person was certified, as determined by WEDC under its policies and procedures.

Subject to a reallocation of early stage seed investment credits (see above), WEDC may allocate up to $17,000,000 in tax benefits in 2016 and up to $22,000,000 per year thereafter. WEDC may award more than $17,000,000 in a calendar year because awards typically cover multiple years. However, the actual amount allocated to all awardees in total in a given year may not exceed the annual maximum, notwithstanding any transferred credits. Any unused allocation may be carried forward. WEDC may require a person to repay any tax benefits the person claims for a year in which the person failed to employ an eligible employee required by an agreement.

| | |
|---|---|
| **Electronic and Information Technology Manufacturing Zone Credit, s. 71.28(3wm)** | **$8,325,000** |

A refundable electronics and information technology manufacturing zone credit is available. Calculation of the credit is based on 17 percent of the claimant's payroll. An additional credit may be allowed for up to 15 percent of the claimant's significant capital expenditures in the zone in the taxable year. Eligible payroll includes full-time employees who make between $30,000 and $100,000 a year. WEDC may not certify more than $1.5 billion in credits related to payroll and no more than $1.35 billion in credits related to capital expenditures.

In order to claim these credits, the claimant must be certified by WEDC. The designation of the electronics and information technology zone shall remain in effect for no more than 15 years. A copy of the certification must be included with the claimant's Wisconsin income tax return. The amount of the credit computed must be added to the claimant's income in the year the credit is computed. The credit must be claimed within four years of the unextended due date on which the tax return was due.

| | |
|---|---|
| **Low-Income Housing Credit, ss. 71.28(8b) and 71.47(8b)** | **$6,900,000** |

For tax years beginning after December 31, 2017, a nonrefundable low-income housing credit is available. Claimants may claim a credit for the amount certified by the Wisconsin Housing and Economic Development Authority (WHEDA). A taxpayer is eligible for the credit if their tenants' income is less than 60 percent of the county's median income. Claimants must apply through WHEDA. The credit must be claimed within four years of the date on which the tax return was due. Unused credits may be carried forward for 15 years. The maximum amount of credits WHEDA may certify in a year equals $42,000,000.

# ECONOMIC DEVELOPMENT SURCHARGE

## Introduction

In addition to the corporate income and franchise tax, the state imposes an economic development surcharge on corporations. Revenue from the surcharge is deposited in a segregated economic development fund and is used to fund economic development programs of the Wisconsin Economic Development Corporation (WEDC).

The surcharge is imposed at a rate of 3 percent on gross tax liability for C corporations and 0.2 percent of net business income for S corporations. The maximum surcharge is $9,800 and the minimum is $25. The surcharge does not apply to entities not required to file an income tax return. The surcharge only applies to corporations, insurers and exempt organizations taxable as corporations that have $4,000,000 or more of gross receipts. Collections for FY24 were $38.7 million.

| ***Exemptions*** | ***FY24 Fiscal Effect*** |
|---|---|
| **Exempt Corporations, s. 77.93(1)** | **Not Available** |

Corporations that are exempt from the corporate income and franchise tax under s. 71.26(1), Wis. Stats., and that have no unrelated business income reportable under s. 71.24(1m), Wis. Stats., are exempt from the surcharge. This exemption includes primarily governmental and not-for-profit entities, and cooperative associations and cooperative corporations.

| | |
|---|---|
| **$4 Million Gross Receipts Exemption, s. 77.93(1)** | **$2,000,000** |

Businesses with less than $4 million of gross receipts are exempt from the surcharge. The fiscal effect relates to the amount of economic development surcharge that would be collected if businesses with less than $4 million in gross receipts were subject to the surcharge.

## Special Treatment

| | |
|---|---|
| **$9,800 Surcharge Limit, s. 77.94(1)** | **$34,300,000** |

The maximum surcharge that any taxpayer is required to pay is $9,800. This is considered an exemption device because the amount of surcharge that is collected is less than it would be had the surcharge been collected under the existing rates without the maximum. The fiscal effect relates to the additional amount of economic development surcharge that would be collected if the limit was removed.

# SALES AND USE TAX

**Introduction**

Wisconsin imposes a 5 percent tax on the sale or use of most items of tangible personal property and on the sale of certain services. The state first imposed a 3 percent selective sales and use tax in 1962 but replaced it with a 4 percent general sales and use tax in 1969. The current 5 percent rate has been in effect since 1982.

The original 3 percent tax was selective in that goods subject to the tax were specifically identified in the statutes: household furnishings, motor vehicles, jewelry, tobacco, fermented malt beverages, intoxicating liquors, and food sold in restaurants were taxable. The general tax imposed in 1969, in contrast to the selective tax, falls on sales of all tangible personal property, except property specifically exempted by law. The sales tax remains selective in its treatment of services, imposed only on those services the law enumerates as taxable.

Numerous changes to the sales tax base have been made over the years. Exemptions are discussed in detail in the latter half of this chapter and estimates of fiscal effects are provided. Expansions of the sales and use tax base include:

- Cigarettes (1975);
- Cable television, including installation (1975);
- Interstate telephone and telegraph services, and landscaping and lawn maintenance services (1982);
- Magazines other than those sold by subscription (1983);
- Telephone company central office equipment and coin-operated telephone services (1996);
- Telephone answering and messaging services and telecommunications services terminating in and billed to a service address in the state (1997); and
- Digital goods, including nonpermanent goods regardless of whether the purchaser is required to make continued payments for usage (2009).

The 5 percent sales tax is imposed on retailers for the privilege of selling, leasing or renting tangible personal property that is not specifically exempt from tax. In addition, a 5 percent use tax is imposed on the storage, use or other consumption in this state of tangible personal property that is purchased out-of-state and is not specifically exempt. The use tax complements the sales tax in that, without a use tax, consumers would be able to avoid sales tax by purchasing goods out-of-state. Thus, the use tax ensures that the sales tax does not place Wisconsin merchants at a competitive disadvantage compared with those in other states.

**Taxable Services**

The law imposes a sales tax on selected services. Unlike tangible personal property, sales of which are taxable unless specifically exempt, services are not subject to the sales tax unless enumerated in the statutes. The following services are taxable:

- Rooms or lodging for less than one month by hotelkeepers, motel operators and other persons furnishing accommodations to the public.
- Admissions to amusement, athletic, entertainment or recreational events or places. Admissions to places or events that are educational in nature, such as museums or zoos, and admissions to county fairs are exempt from sales tax.

- Laundry, dry cleaning, pressing and dyeing services; except when performed on raw materials or goods in a process destined for sales, on cloth diapers by a diaper service, or by the customer through the self-service machines.
- Cable television services, including installation charges.
- Prepaid calling, telecommunications and ancillary services, if the service takes place in Wisconsin.
- Photographic services, including the processing, printing and enlarging of film, and the services of photographers for the taking, reproducing and sale of photographs.
- Parking or providing parking space for motor vehicles and aircraft; docking or providing storage space for boats.
- The repair, inspection and maintenance of tangible personal property, and the installation of tangible personal property, except when such installation constitutes a capital improvement to real property.
- The production, printing or imprinting of tangible personal property for consumers who furnish directly or indirectly the materials used in such processes.
- Landscaping and lawn maintenance services.
- Towing and hauling of motor vehicles.

**Local Taxes**

Current law allows counties to impose a 0.5 percent local sales and use tax and a professional baseball park district to impose a 0.1 percent sales and use tax. These local taxes are imposed on the same tax base as the state sales and use tax. As of January 1, 2024, 68 counties impose the 0.5 percent county sales and use tax.

The Southeast Wisconsin Professional Baseball Park District first imposed a 0.1 percent sales tax in Milwaukee, Ozaukee, Racine, Washington and Waukesha counties in 1996. Proceeds from this tax were used to finance Miller Park. This tax ended March 31, 2020.

The Green Bay-Brown County Professional Football Stadium District first imposed a 0.5 percent sales tax in Brown County in 2000 to finance the renovation of Lambeau Field. This tax ended September 30, 2015.

Beginning January 1, 2024, the city of Milwaukee imposes a 2.0 percent city sales tax. In addition, the Milwaukee County sales tax increased to 0.9 percent on the same date. Manitowoc County (effective 1/1/2025) and Racine County (4/1/2025) have authorized county sales taxes effective in 2025.

Table 1 lists the state's 72 counties, the local sales taxes applicable in each county, the effective date of the county sales tax, and the combined state and local sales tax rate.

**TABLE 1**

**Administration and Collections**

Sales tax is imposed on the sales price from retail sales; use tax is imposed on the amount paid for a product that is subject to sales tax but for which the seller does not collect sales tax. Each retailer is responsible for paying sales tax, regardless of whether it is identified on the bill and collected directly from the customer. Every business that makes taxable sales is required to obtain a seller's permit from the department and pay a $20 business tax registration fee.

Retailers are permitted to retain a portion of the taxes they collect as compensation for the costs they incur in collecting the tax. Since 1997, the retailer's discount has been the greater of 0.5 percent of the tax amount or $10, not to exceed the tax amount. 2009 Wisconsin Act 28 capped the retailer's discount at $1,000 per filing period. Beginning October 1, 2023, Wisconsin Act 19 increased the rate from 0.5 percent to 0.75 percent and increased the cap from $1,000 to $8,000 per filing period.

In contrast to the sales tax, which the seller pays, the purchaser pays use tax. Corporations may file a use tax return, while individuals typically report their use tax liability on their individual income tax returns.

Since its creation in 1962 at 3 percent, the state sales tax increased twice (to 4 percent in 1969 and to 5 percent in 1982) and the tax shifted from a selective to a general sales tax. Collections increased from $83 million in FY65 to $7.6 billion in FY24. Sales and use taxes provided 14 percent of general purpose tax revenues in FY65, but that share increased to 35.6 percent in FY24.

**Calculations of Exemptions**

This report describes each sales tax exemption and, where feasible, provides an estimate of its fiscal effect in FY24. The reported fiscal effects represent the state's revenue loss only. The reduction to local sales tax collections is not included. In general, fiscal effects were estimated by obtaining or estimating the gross receipts from retail sales for the most recent year available and adjusting those receipts to FY24 levels using income and price data. When possible, estimates are based on data specific to Wisconsin obtained from state and federal agencies and trade organizations with statewide information. For some exemptions, state-specific data are not available; and the fiscal effects of these exemptions were estimated from national sales data using Wisconsin's percentage of the nation's population, personal income or a similar indicator. For some exemptions, no data on which to base an estimate are available. For others, no estimate is made because the state is precluded from taxing the sale (for example, sales to the federal government are exempt from state tax under the U.S. Constitution).

| ***Exemptions for Property Sold Primarily to Households*** | ***FY24 Fiscal Effect*** |
|---|---|
| **Food and Food Ingredients, s. 77.54(20n)(a)** | **$920,000,000** |

The sales price from the sale of and the storage, use or other consumption of food and food ingredients; except candy, soft drinks, dietary supplements and prepared food; are exempt from the sales tax. Food for direct consumption on the premises, such as meals sold in restaurants, cafes and cafeterias, is taxable. Sales of food and food ingredients, except candy, soft drinks and prepared food, from vending machines are exempt sales.

| | |
|---|---|
| **Dried Fruit, s. 77.51(1fm)(b)** | **$490,000** |

Dried or partially dried fruit is not taxable as candy if the predominant ingredient is dried or partially dried fruit along with one or more sweeteners and does not include chocolate, nuts, yogurt, or a confectionary coating or glazing on the dried or partially dried fruit.

| | |
|---|---|
| **Bottled Water, s. 77.54(20n)(a)** | **$40,100,000** |

Bottled water that is not sweetened is included in the definition of food and food ingredients, and consequently, is exempt from the sales tax.

| | |
|---|---|
| **Meals Furnished by Institutions of Higher Education, s. 77.54(20n)(c)1** | **$9,200,000** |

Sales of meals, food and beverages furnished by public and private institutions of higher education are exempt from sales tax if they are furnished to students enrolled in that institution or under an agreement with a National Football League team.

| | |
|---|---|
| **Water Sold Through Mains, s. 77.54(17)** | **$21,150,000** |

Sales of water delivered through mains, and sales of water by public and private water utility districts are exempt from the sales tax.

| | |
|---|---|
| **Fuel and Electricity for Residential Use, ss. 77.54(30)(a)1 and (2)** | **$179,400,000** |

All sales for residential use of coal, fuel oil, propane, steam, peat, fuel cubes produced from solid waste and

sales of wood used for fuel for residential use are exempt from sales tax. Sales of electricity and natural gas for residential use billed from November through April are also exempt from sales tax.

| | |
|---|---|
| **Biomass Used for Residential Fuel, s. 77.54(3)(a)1m** | **Minimal** |

Sales of biomass used for residential fuel are exempt from sales tax. Biomass includes fuel derived from wood or plant material but does not include industrial, commercial or household waste.

| | |
|---|---|
| **Mobile and Manufactured Homes, ss. 77.54(31) and 77.51(12m)(b)7** | **$730,000** |

The sale price of used mobile homes and used manufactured homes are exempt from sales tax.

Thirty-five percent of the total amount for which a new manufactured home is sold, if the manufactured home is designed to be used as a dwelling and is certified by the federal Department of Housing and Urban Development, is exempt from sales tax. The entire sales price of a used manufactured home is exempt from tax.

| | |
|---|---|
| **Motor Fuels, s. 77.54(11)** | **$633,000,000** |

Sales of motor fuels that are subject to the state motor fuel excise tax are exempt from the sales tax. Exempt fuels include gasoline, commercial and general aviation fuel, and diesel fuel.

| | |
|---|---|
| **Vegetable Oil and Animal Fats Converted to Exempt Fuel, s. 77.54(11m)** | **Minimal** |

Sales of vegetable oil or animal fat that is converted into certain motor vehicle fuel are exempt from sales tax.

| | |
|---|---|
| **Newspapers, Subscription Periodicals and Shoppers Guides, s. 77.54(15)** | **$11,600,000** |

Sales of newspapers, periodicals sold by subscription and shoppers' guides that distribute at least 48 issues in a 12-month period are exempt from sales tax. The exemption for periodicals is generally limited to those published four or more times per year. Periodicals issued at intervals not exceeding six months by an educational association or tax-exempt religious, charitable, scientific or educational organization are also exempt.

| | |
|---|---|
| **Caskets and Burial Vaults, s. 77.54(21)** | **$4,800,000** |

Sales of caskets and burial vaults are exempt from sales tax.

| | |
|---|---|
| **United States of America and State of Wisconsin Flags, s. 77.54(46)** | **Minimal** |

Sales of U.S. and Wisconsin flags are exempt from sales tax.

| | |
|---|---|
| **Self-Service Laundry and Dry Cleaning Services, s. 77.52(2)(a)6** | **$2,300,000** |

Laundry services performed by customers using self-service equipment are exempt. The sales from laundry, dry cleaning, pressing and dyeing services performed on raw materials in process and destined for sales are also exempt.

**Exemptions Related to Health Care**

| | |
|---|---|
| **Prescription Drugs (excluding insulin), s. 77.54(14)** | **$168,300,000** |

Sales of drugs are exempt from sales and use tax if the drugs are: (1) prescribed for treatment of a human being by an authorized person or dispensed by a registered pharmacist; (2) furnished by a licensed physician, surgeon, podiatrist, dentist or hospital for the treatment of patients; (3) furnished by a hospital for treatment of patients on the orders of a licensed physician, surgeon, podiatrist or dentist; (4) sold to a licensed physician, surgeon, podiatrist or dentist for treatment of patients; (5) sold to this state or a political subdivision

or any municipal corporation thereof for use in treatment of human beings or furnished by a medical facility maintained by the state; (6) furnished for the treatment of a human being by a medical facility or clinic maintained by the state or a political subdivision or any municipal corporation thereof; or (7) furnished without charge to a physician, surgeon, nurse anesthetist, advanced practical nurse, osteopath, dentist, podiatrist or optometrist if the medicine may not be dispensed without a prescription.

| | |
|---|---|
| **Insulin for the Treatment of Diabetes and Supplies for Blood Sugar Testing, ss. 77.54(14) and (28)** | **$16,200,000** |

Insulin used to treat diabetes and supplies used to measure blood sugar levels are exempt from the sales tax.

| | |
|---|---|
| **Medical Devices and Equipment, s. 77.54(22b)** | **$24,100,000** |

Durable medical equipment for use in a person's home, prosthetic devices and mobility-enhancing equipment are exempt from tax, including repair parts and accessories for such equipment and devices. Exempt devices include wheelchairs and crutches; artificial limbs, eyes and teeth; prescription eyeglasses; hearing aids; equipment used to administer prescription oxygen for home use; and adaptive equipment to enable a handicapped person to enter or operate and leave a motor vehicle.

| | |
|---|---|
| **Meals Provided by Nursing Homes, Community-Based Residential Facilities, Licensed Child Care Facilities and Hospitals, and Food Sold in Retirement Homes, s. 77.54(20n)(b)** | **Not Available** |

Sales of meals and food and food ingredients, except soft drinks, by and served on the premises of hospitals, sanatoriums, nursing homes, community-based residential facilities, licensed child care facilities and retirement homes are exempt from the sales tax. Retirement homes are nonprofit residential facilities where three or more unrelated adults or their spouses have their principal residence and where support services, including meals from a common kitchen, are available to residents. Prepared food that is sold to the elderly or handicapped by persons providing mobile meals on wheels is also exempt from tax.

| | |
|---|---|
| **Medical Records, s. 77.54(64)** | **Not Available** |

Patient health care records that are sold to the patient or to a person that the patient authorizes to receive the records are exempt from tax.

**Exemptions Related to Farming**

| | |
|---|---|
| **Tractors and Farm Machinery, s. 77.54(3)(a)** | **$53,800,000** |

Sales of tractors and farm machinery, including accessories, attachments and parts, used exclusively and directly in farming are exempt from sales tax. The exemption does not apply to motor vehicles for highway use, such as cars and trucks. In 2007, the exemption was expanded to include sales of tangible personal property that is consumed or loses its identity, in the business of farming.

| | |
|---|---|
| **Personal Property and Supplies Used in Farming, s. 77.54(3m)** | **$367,600,000** |

Sales of seeds; plants; feed; fertilizer; soil conditioners; animal bedding; sprays, pesticides and fungicides; breeding and other livestock; bees, beehives and bee combs; farm work stock; baling twine and baling wire; containers; and plastic bags, sleeves and sheeting used to store or cover hay or silage are exempt from sales tax.

| | |
|---|---|
| **Electricity Used in Farming, s. 77.54(30)(a)3** | **$12,000,000** |

Electricity sold for use in farming is exempt from sales tax.

| | |
|---|---|
| **Fuel Used in Farming, s. 77.54(30)(a)5** | **$27,800,000** |

Fuel sold for use in farming is exempt from sales tax.

| | |
|---|---|
| **Veterinary Services and Drugs for Farm Livestock, ss. 77.52(2)(a)10 and 77.54(33)** | **$9,500,000** |

Sales of services provided by veterinarians for animal health care, breeding or training of livestock, and sales of drugs used to treat farm livestock, are exempt from sales tax.

| | |
|---|---|
| **Semen for Livestock Breeding, s. 77.54(27)** | **$3,200,000** |

The sale of semen used for the artificial insemination of livestock is exempt from sales tax.

**Exemptions Related to General Business**

| | |
|---|---|
| **Machinery and Equipment Used in Manufacturing, ss. 77.54(5)(d) and 77.54(6)(am)1** | **$259,600,000** |

The sale and use of machines and specific processing equipment and repair parts used exclusively and directly by a manufacturer in the manufacturing process are exempt from sales tax. Generally, manufacturing is defined as the production by machinery from existing materials of a new article of tangible personal property with a different form, use or name. Mobile mixing and processing units, including the vehicles on which they are mounted, are also exempt from sales tax.

| | |
|---|---|
| **Fuel and Electricity Used in Manufacturing, s. 77.54(30)(a)6** | **$184,700,000** |

Fuel and electricity used in manufacturing tangible personal property are exempt from sales and use tax.

| | |
|---|---|
| **Tangible Personal Property Consumed in Manufacturing, s. 77.54(2)** | **Not Available** |

Tangible personal property, typically raw materials and other inputs, that is consumed, destroyed or loses its identity in manufacturing of finished goods that are destined for sale is exempt from sales tax.

| | |
|---|---|
| **Component Parts of Shoppers Guides, Newspapers and Periodicals, s. 77.54(2m)** | **Not Available** |

Materials and services that become component parts of shoppers' guides, newspapers and periodicals are exempt from sales tax.

| | |
|---|---|
| **Catalogs and Catalog Envelopes, ss. 77.52(2)(a)11, 77.54(25), and 77.54(25m)** | **$7,300,000** |

Catalogs and the envelopes in which catalogs are mailed are exempt from the sales tax if the catalogs are designed to advertise and promote the sale of merchandise or to advertise the services of individual businesses.

| | |
|---|---|
| **Advertising and Promotional Direct Mail, ss. 77.54(59) and 77.52(2)(a)11** | **$4,900,000** |

Direct mail that has the primary purpose of attracting public attention to a product, person, business, or organization or to attempt to sell, popularize or secure financial support for a product, person, business or organization is exempt from sales tax. Services that result in advertising and promotional direct mail are not taxable.

| | |
|---|---|
| **Fuels Converted to Electric Energy, Gas or Steam by a Utility, s. 77.54(6)(am)3** | **Not Available** |

Fuels converted to electric energy, gas, or steam by a utility are exempt from sales tax.

| | |
|---|---|
| **Waste Treatment Facilities and Machinery and Equipment Used in Recycling, ss. 77.54(5)(c), (26) and (26m)** | **Not Available** |

Sales and installation of waste treatment facilities, replacement parts, and chemicals and supplies used in operating a waste treatment facility are exempt from the sales tax. The exemption applies to expenditures by governmental units, private industry and construction contractors for sewage treatment plants, holding ponds and similar facilities. The exemption also applies to industrial waste treatment facilities that are, or would be, exempt from property tax under sec. 70.11(21), Wis. Stats. The sale and use of machinery and equipment and repair parts used exclusively and directly for waste reduction or recycling activities are exempt. Also exempt are motor vehicles used exclusively and directly in recycling that are not required to be licensed for highway use. The activities qualifying for the exemption include those that reduce the amount of solid waste generated, recover energy from solid waste, and reuse, recycle or compost solid waste. Some recycling machinery is also exempt as manufacturing machinery.

| | |
|---|---|
| **Logging Equipment, s. 77.54(39)** | **$1,700,000** |

Off-highway, heavy mechanical equipment used in the harvesting or processing of raw timber products in the field by loggers is exempt from sales tax.

| | |
|---|---|
| **Equipment Used in the Production of Maple Syrup, s. 77.54(29)** | **Minimal** |

Equipment used in the production of maple syrup is exempt from sales tax.

| | |
|---|---|
| **Wood Residue Used as Fuel in a Business Activity, s. 77.54(30)(a)4** | **$2,400,000** |

The sale of residue from the harvesting of timber for use as a fuel in a business activity is exempt from sales tax.

| | |
|---|---|
| **Building Materials, Equipment, and Supplies Used in the Construction of Professional Sports Stadiums, s. 77.54(41)** | **Not Available** |

Sales of building materials, equipment and supplies used solely in the construction, renovation or development of a sports stadium built or used by a professional sports team are exempt from the sales tax. This exemption applies to American Family Field constructed by the Southeast Wisconsin Professional Baseball Park District and to Lambeau Field constructed by the Green Bay-Brown County Professional Football Stadium District.

| | |
|---|---|
| **Building Materials, Equipment, and Supplies Used in the Construction, Development of Sports and Entertainment Arena Facilities, s. 77.54(62m)** | **Not Available** |

The sale of building materials, supplies and equipment and the sale of certain services to; and the consumption of the same property and services by; owners, lessees, contractors, subcontractors or builders if that property or service is acquired solely for or used solely in, the construction or development of sports and entertainment arena facilities (the Fiserv Forum) are exempt from tax.

| | |
|---|---|
| **Live Game Birds and Clay Pigeons, s. 77.54(47)** | **$200,000** |

Sales of live game birds and clay pigeons to licensed bird hunting preserves are exempt. Also exempt are sales of clay pigeons to a shooting facility if the shooting facility pays sales tax on its charges for shooting or if the shooting facility is a nonprofit organization whose charges for shooting are exempt occasional sales or if the charges pertain to a nonprofit gun club providing safety classes to at least 25 individuals annually.

| | |
|---|---|
| **Deer and Other Cervids, s. 77.54(62)** | **$120,000** |

Sales of farm-raised deer and other cervids sold to a licensed hunting preserve in this state are exempt from sales tax.

| | |
|---|---|
| **Trucks, Tractors, Buses, and Other Vehicles Sold to Common or Contract Carriers, s. 77.54(5)(b)** | **$48,100,000** |

Sales of trucks, truck tractors, buses, trailers and semi-trailers, and accessories, parts and supplies for such vehicles sold to common or contract carriers are exempt from sales tax. This exemption applies to urban mass transportation, bus and trucking companies, and other contract carriers.

| | |
|---|---|
| **Rolling Stock Used in Railroad Operations, s. 77.54(12)** | **$3,100,000** |

Sales of locomotives, freight cars, passenger cars and other rolling stock as well as accessories, attachments, fuel and lubricants used in railroad operations are exempt from sales tax.

| | |
|---|---|
| **Commercial Vessels and Barges, s. 77.54(13)** | **Minimal** |

Sales, storage, use or other consumption of commercial vessels and barges in excess of 50 tons and primarily engaged in interstate or foreign commerce or commercial fishing are exempt from sales tax. Accessories, parts and fuel for these vessels are also exempt from sales tax.

| | |
|---|---|
| **Fuel Used by Chartered Commercial Fishing Vessels, s. 77.54(30)(a)7** | **Minimal** |

Fuel sold for use in motorboats that are regularly employed in carrying persons for hire for sport fishing in and upon the outlying waters and specified rivers and tributaries are exempt from tax if the owner and all operators hold outlying water sport trolling licenses.

| | |
|---|---|
| **Containers, Labels, Sacks, Cans, Boxes, and Other Packaging and Shipping Materials, s. 77.54(6)(am)2** | **Not Available** |

Sales of containers, labels, sacks, cans, boxes, and other packing, packaging, and shipping materials, if such materials are used to transfer merchandise to customers, are exempt from sales tax. Packing, packaging and shipping materials, including meat casings, for use in meat packing, packaging or shipping meat are exempt from sales tax regardless of whether such materials are used to transfer merchandise to customers.

| | |
|---|---|
| **Motion Picture and TV Film and Advertising Materials, s. 77.54(23m)** | **$20,300,000** |

The sale, lease, rental or storage, use or other consumption of motion picture films, tape, and radio or television programs, and the advertising material sold, leased or rented to movie theaters, radio stations or television stations is exempt from sales tax.

| | |
|---|---|
| **Restaurant Employee Meals, s. 77.54(20r)** | **Not Available** |

Meals that are provided by a restaurant to the restaurant's employee for no consideration during the employee's work hours are exempt from sales tax.

| | |
|---|---|
| **Tangible Personal Property Purchased for Resale but Donated to a Nonprofit Organization, s. 77.56(3)** | **Not Available** |

Property purchased tax-free for resale or under a valid exemption certificate and later donated to a nonprofit organization is exempt from use tax.

| **Prepaid Telephone Cards and Authorization Numbers, s. 77.54(46m)** | **Minimal** |
|---|---|

Services obtained by the use of a prepaid telephone card or authorization number are exempt from sales tax if sales tax was paid on the card or authorization number at the time it was purchased.

| **Biotechnology and Manufacturing Research, ss. 77.54(57)(b) and 77.54(57d)(b)** | **$31,100,000** |
|---|---|

Certain machinery and equipment, including attachments, parts and accessories, and other tangible personal property used exclusively and directly in qualified research by persons engaged primarily in manufacturing or biotechnology is exempt from tax. The exemption also applies to such purchases by a member of a combined group that is conducting qualified research for another member of a combined group that is primarily engaged in manufacturing or biotechnology.

Certain machines and specific processing equipment, including accessories, attachments and parts for the machines or equipment, that are used exclusively and directly in raising animals that are sold primarily to a biotechnology business, a public or private institution of higher education, or a governmental unit for exclusive and direct use by any such entity in qualified research or manufacturing is exempt from tax. The exemption also applies to certain agricultural products, drugs, semen for artificial insemination, fuel and electricity that are used exclusively and directly in raising animals that are sold primarily to a biotechnology business, a public or private institution of higher education, or a governmental unit for exclusive and direct use by any such entity in qualified research or manufacturing.

| **Certain Products Using Alternative Energy, s. 77.54(56)** | **$7,600,000** |
|---|---|

Certain products whose power source is wind energy, direct radiant energy received from the sun, or gas generated from anaerobic digestion of animal manure and other agricultural waste are exempt from the sales tax. Electricity or energy produced by these products is also exempt from the sales tax.

| **Sales to Affiliated Companies, s. 77.54(49)** | **Not Available** |
|---|---|

Sales of taxable services and tangible personal property that is physically transferred to the purchaser are exempt from the sales tax if the seller and purchaser of such services and property are of the same affiliated group under the Internal Revenue Code and are eligible to file a consolidated federal income tax return.

| **Machinery and Equipment Used in Snowmaking and Snow-Grooming, s. 77.54(58)** | **$150,000** |
|---|---|

Snowmaking and snow-grooming machines and equipment and the fuel and electricity used to operate such machines and equipment used exclusively and directly for snowmaking and snow grooming at ski hills, ski slopes and ski trails are exempt from sales tax.

| **Parts and Materials Used in the Repair of Aircraft, ss. 77.52(2)(a)10 and 77.54(5)(a)3** | **$4,100,000** |
|---|---|

Charges for the repair, service, alteration, fitting, cleaning, painting, coating, towing, inspection and maintenance of any aircraft or any aircraft parts are exempt from tax. Supplies for aircraft are subject to tax.

| **Machinery and Equipment Used in Fertilizer Blending, Feed Milling and Grain Drying, ss. 77.54(6)(am)4 and 5** | **$1,000,000** |
|---|---|

Machines and specific processing equipment used exclusively and directly in a fertilizer blending, feed milling or grain drying operation are exempt from tax. Building materials acquired solely for and used solely in the construction or repair of holding structures used for weighing and dropping feed or fertilizer ingredients into a mixer or for storage of grain, if such structures are used in a fertilizer blending, feed milling or grain drying operation are also exempt from the sales tax.

| | |
|---|---|
| **Equipment Used in Origination or Integration of Radio or TV Programs, s. 77.54(23n)** | **$2,500,000** |

Tangible personal property purchased by a person licensed to operate a commercial radio or television station in Wisconsin and used exclusively and directly in, or is fuel or electricity consumed in, the origination or integration of various sources of program material for certain commercial radio or television transmissions that are generally available to the public free of charge is exempt from tax.

| | |
|---|---|
| **Computer and Servers Used in Commercial Printing, s. 77.54(61)** | **$530,000** |

Computers and servers purchased by a person primarily engaged in certain printing activities and used primarily to store copies of products sent to a printer or used primarily in pre-press and post-press activities are exempt from sales tax.

| | |
|---|---|
| **Music Sold to a Jukebox Operator, s. 77.54(63)** | **$500,000** |

The sale of music for jukeboxes is exempt if sold to a person in the business of providing a taxable service through a jukebox if the music is used exclusively for the jukebox.

| | |
|---|---|
| **Fish Sold to Fish Farms, s. 77.54(66)** | **$65,000** |

Farm-raised fish, sold to a fish farm that is registered with the Department of Agriculture, Trade and Consumer Protection, or to a person who holds a valid permit for the stocking of fish are exempt from tax.

| | |
|---|---|
| **Amusement Devices-Video and Electronic Games, s. 77.54(65m)(a)1** | **$25,000** |

A video or electronic game sold in a tangible form to a person in a business of providing a taxable service through the device is exempt from tax, as long as the game is used exclusively for the amusement device.

| | |
|---|---|
| **Amusement Device Prizes, s. 77.54(65m)(a)2** | **Not Available** |

Tangible personal property sold to a person in the business of providing a taxable service through an amusement device is exempt from tax if the tangible personal property is used exclusively as a prize awarded or transferred through the use of the amusement device.

| | |
|---|---|
| **Tournament or League Entrance Fees, s. 77.54(65m)(a)3** | **Not Available** |

Sales of tournament or league entrance fees are exempt from tax if the fees are advertised and set aside as prize money.

| | |
|---|---|
| **Prepared Food Manufactured by the Retailer, s. 77.54(20n)(d)4** | **$3,100,000** |

Sales of prepared food that is manufactured and sold by the same retailer at a different location from where the prepared food is manufactured. The exemption applies to prepared food that is sold by the retailer in a frozen state without eating utensils or consists of more than 50 percent yogurt. This exemption does not apply if the retailer makes any retail sales of prepared food at the building where the prepared food is manufactured.

| | |
|---|---|
| **Products Used for Disaster Relief by Out-of-State Businesses, s. 77.53(19)** | **Not Available** |

Tangible personal property and services purchased outside of this state by an out-of-state business and brought into Wisconsin solely for disaster relief work are exempt from sales and use tax when used to repair service infrastructure in connection with a state of emergency declared by the Governor.

| | |
|---|---|
| **Services Performed During a Disaster Period by Electric Cooperatives and Telecommunications Utilities, s. 77.53(19)** | **Not Available** |

Sales of a service provided by an electric cooperative to another electric cooperative, or by a telecommunications utility to another telecommunications utility, for disaster relief work performed during a disaster period are exempt from tax.

| | |
|---|---|
| **Building Materials, Equipment, and Supplies Used in the Construction or Development of Facilities in an Electronics and Information Technology Manufacturing Zone, s. 77.54(65)** | **Not Available** |

The sale of building materials, supplies, equipment and landscaping services used to construct or develop a facility in an electronics and information technology manufacturing zone is exempt from tax. In order for the exemption to apply, the following criteria must be met:

- The items are sold or stored, used or consumed by owners, lessees, contractors, subcontractors or builders.
- The items are acquired solely for, or used solely in, the construction or development of a facility designated as an "electronics and information technology manufacturing zone" under sec. 238.396(1m), Wis. Stats. The capital expenditures for the construction or development of the facility must be eligible to be claimed as an income tax credit under sec. 71.07(3wm)(bm) or sec. 71.28(3wm)(bm) Wis. Stats., as certified by the Wisconsin Economic Development Corporation (WEDC).

| | |
|---|---|
| **Disaster Relief for and by Telecommunications Utilities and Electric Cooperatives, s. 77.54(68)** | **Not Available** |

The sales price from the sale of and the use or other consumption of a service provided by an electric cooperative to another electric cooperative, or by a telecommunications utility to another telecommunications utility, for disaster relief work performed during a disaster period.

| | |
|---|---|
| **Real Estate Brokerage Memberships, s. 77.54(72)** | **$40,000** |

Memberships sold to a licensed real estate broker who, pursuant to the broker's membership agreement, offers to compensate and cooperate with other real estate brokers in brokering sales of properties are exempt from sales and use tax.

| | |
|---|---|
| **Road Building Equipment, s. 77.54(73)** | **$5,500,000** |

Certain portable machinery and equipment, including accessories, attachments, parts and supplies for such machinery and equipment, used primarily to crush, mill, produce or pulverize asphalt, concrete, gravel, rock or aggregate base for road or commercial surface lot construction or resurfacing are exempt from sales and use tax.

| | |
|---|---|
| **Qualified Data Centers, s. 77.54(70)** | **$40,000,000** |

Certain tangible personal property used in the development, construction, renovation or operation of a qualified data center are exempt from sales and use tax. The exemption is only available to data center projects certified by the Wisconsin Economic Development Corporation.

**Exemptions Related to Government Agencies and Nonprofit Organizations**

| | |
|---|---|
| **Sales to the Federal Government and its Agencies, s. 77.55(1)** | **Not Available** |

Sales of goods and services to the federal government or to any of its incorporated or unincorporated agencies or instrumentalities are exempt from sales tax. Taxing purchases by the federal government would violate the U.S. Constitution.

| | |
|---|---|
| **Sales to State and Local Governments and Schools, ss. 77.54(9a)(a)-(em), (g) and (h)** | **$610,200,000** |

Sales of tangible personal property and taxable services to the state or any of its agencies are exempt. Also exempt are sales to the University of Wisconsin Hospitals and Clinics Authority, the Wisconsin Aerospace Authority, the Wisconsin Economic Development Corporation, and the Fox River Navigational System Authority. In addition, sales to county, city, village and town governments; school districts; local exposition districts; local cultural arts districts; joint local water authorities; sewerage commissions; and metropolitan sewerage districts are exempt from sales tax.

| | |
|---|---|
| **Sales to Religious, Charitable, Scientific and Educational Organizations, s. 77.54(9a)(f)** | **$323,000,000** |

The gross receipts from sales to, and the storage, use or other consumption of tangible personal property and taxable services by any corporation, community chest, foundation, or association organized and operated exclusively for religious, charitable, scientific, or educational purposes or for the prevention of cruelty to children or animals, except specified hospital service corporations, are exempt from sales tax if no part of the net income of the organization insures to the benefit of any private person.

| | |
|---|---|
| **Lunches and Other Tangible Personal Property Sold by Elementary and Secondary Schools, s. 77.54(4)** | **Not Available** |

Sales of tangible personal property by public or private elementary and secondary schools are exempt from sales tax.

| | |
|---|---|
| **Admissions to Elementary and Secondary School Activities, s. 77.54(9)** | **Not Available** |

Sales of tickets or admissions to public and private elementary and secondary school activities are exempt from the sales tax, if the net proceeds are used for educational, religious or charitable purposes. The exemption includes revenue from admission fees to high school sporting events, school plays and other school activities.

| | |
|---|---|
| **Admissions to State Parks and Camping Fees, s. 77.54(10)** | **$1,600,000** |

Admission fees and camping fees at state park and state forest recreational areas are exempt from sales tax.

| | |
|---|---|
| **Admissions to Certain Historical Museums, s. 77.54(10)** | **Minimal** |

Admissions to a museum operated by a nonprofit corporation under a lease agreement with the State Historical Society are exempt from sales tax. This exemption applies only to the Circus World Museum in Baraboo.

| | |
|---|---|
| **Admissions to County Fairs, s. 77.52(2)(a)2** | **Not Available** |

Admissions to county fairs are exempt from sales tax.

| Volunteer Fire Department Equipment, s. 77.54(16) | Not Available |
|---|---|

Sales of fire trucks and other firefighting equipment to volunteer fire departments are exempt from sales tax. This exemption includes hoses, exhaust fans, generators, ladders and other firefighting equipment.

| Copies of Public Records, s. 77.54(32) | Minimal |
|---|---|

Charges by a governmental authority for copies of public records, including fees for searches, are exempt from sales tax.

| Sales by American Legion Baseball Teams, s. 77.54(35) | Not Available |
|---|---|

Sales of tangible personal property, tickets and admissions by American Legion baseball teams are exempt from sales tax.

| Snowmobile Trail Grooming Equipment, s. 77.54(38) | Minimal |
|---|---|

Snowmobile trail groomers and attachments are exempt from sales tax when purchased by snowmobile clubs for use in maintaining the state system of snowmobile trails. To qualify for the exemption, an organization must meet at least three times a year and have at least ten members.

| Sales of Animal Identification Tags and Samples by the Department of Agriculture, Trade and Consumer Protection, s. 77.54(42) | Minimal |
|---|---|

Sales by the Department of Agriculture, Trade and Consumer Protection of animal identification tags to persons who are required or authorized to use those identification tags, and sales of standard samples representing product or commodity grades are exempt from sales tax.

| Public Benefits Fees, s. 77.54(44) | $5,900,000 |
|---|---|

Public benefits fees are exempt from sales tax. These fees are surcharges on residential and commercial electric bills used to fund low-income energy assistance and energy conservation and efficiency programs.

| Motor Vehicles Loaned to Driver Education Programs, s. 77.56(2) | Minimal |
|---|---|

The loan by an automobile dealer of a motor vehicle for a driver education program conducted by a school or school district is exempt from use tax.

| Nonprofit Cemetery Associations, s. 77.54(9a)(i) | $200,000 |
|---|---|

Tangible personal property and taxable services used exclusively by a nonprofit cemetery company or corporation organized under IRC section 501(c)(13) is exempt from sales and use tax.

| Veterans Home Exchange Services, s. 77.54(54) | Minimal |
|---|---|

The sale of tangible personal property and taxable services by a home exchange service owned by the Department of Veterans Affairs is exempt from sales and use tax. Home exchange services are the coffee shops, snack bars, gift shops and other facilities that serve the resident veterans, families and guests at the Wisconsin Veterans Homes at King (Waupaca County) and Union Grove (Racine County).

| Building Materials Used in Construction for Local Governments and Certain Nonprofit Organization, s. 77.54(9m) | $17,400,000 |
|---|---|

Property sold to a construction contractor who, in fulfillment of a real property construction activity, transfers the property to a qualifying exempt entity, if the property becomes part of a facility in Wisconsin that is owned by the qualifying exempt entity.

| One-Time License or Right to Purchase Admissions to Professional Football Games, s. 77.54(45) | Minimal |
|---|---|

The sale by a municipality, a local professional football stadium district or a professional football team of a one-time license or similar right to purchase admission to at least three games at a football stadium in a season is exempt from sales tax. The exemption applies to the sale of admission rights whose proceeds are used to finance renovation of Lambeau Field in Green Bay.

| Nonprofit Gun Club Admissions and Memberships, s. 77.52(2)(a)2.b | Not Available |
|---|---|

Sales of admissions, including memberships by a gun club are exempt if the gun club is a nonprofit organization and if the gun club provides safety classes approved by the Department of Natural Resources to at least 25 individuals in the calendar year. Gun clubs include trapshooting, skeet-shooting, sporting-clay, hunting, rod & gun, hunting & fishing, and conservation clubs.

| Occasional Sales by Certain Nonprofit Organizations, s. 77.54(7m) | Not Available |
|---|---|

Occasional sales by certain nonprofit organizations are exempt from sales tax if the organization is not engaged in a trade or business and certain conditions apply. This exemption includes the sales of admissions to an event involving entertainment if the payment for the entertainment is no more than $50,000.

**Exemptions for Nonresidents and for Use in Other States**

| Property Used in the State by Nonresidents, s. 77.53(17) | Not Available |
|---|---|

Tangible personal property brought into the state by nonresidents of Wisconsin for their own use, storage or other consumption while temporarily in Wisconsin is exempt from use tax. However, if the property is used to conduct a trade, business or profession, or is used in the performance of personal services for wages or fees, the value of the property is subject to the tax.

| Nonresidents' Boats Berthed in Boundary Waters, s. 77.53(17m) | Not Available |
|---|---|

Generally, a boat that is owned by a resident of another state and berthed in Wisconsin is subject to use tax, if the owner did not pay sales tax when purchasing the boat. However, the boat is exempt from use tax if: (1) the boat owner is a resident of a state contiguous to Wisconsin, (2) the boat is berthed in boundary waters adjacent to the owner's state of residence and (3) the purchase of the boat was an exempt occasional sale.

| Nonresidents' Aircraft Hangared in Wisconsin, s. 77.53(17r) | Not Available |
|---|---|

Aircraft purchased in another state by a nonresident individual or business and kept in a hangar in Wisconsin is exempt from use tax.

| Goods Brought into the State by New Residents, s. 77.53(18) | Not Available |
|---|---|

Household goods purchased outside of Wisconsin but brought into the state by new residents are exempt from use tax if the goods are purchased 90 or more days prior to the date the person moves to Wisconsin. This exemption applies to all household goods, including automobiles and other registered vehicles, purchased for personal use.

| Property Purchased for Delivery Outside the State, s. 77.55(3) | Not Available |
|---|---|

Sales of tangible personal property purchased for use outside the state and sales of property delivered and prepared for export are exempt from sales tax. For example, items such as office supplies and paper products sold to persons outside the state are exempt from the sales tax.

| | |
|---|---|
| **Aircraft, Motor Vehicles and Truck Bodies Sold for Use Outside the State, s. 77.54(5)(a)** | **Not Available** |

Sales of aircraft, motor vehicles and truck bodies to nonresidents who will not use such units in Wisconsin are exempt from the sales tax. This exemption also applies to aircraft, motor vehicles and truck bodies sold to foreign governments and to certified carriers of people or property in interstate or foreign commerce.

| | |
|---|---|
| **Modular and Manufactured Homes Used in Real Property Construction Outside of the State, s. 77.54(5)(am)** | **$500,000** |

Sales of modular and manufactured homes used in real property construction outside the state are exempt from sales tax.

| | |
|---|---|
| **Property Sold to Out-of-State Common or Contract Carriers, ss. 77.55(2) and (2m)** | **Not Available** |

Sales of tangible personal property to common or contract carriers engaged primarily in trucking and sales to railroad companies are exempt from sales tax if the property is shipped to a destination outside this state.

| | |
|---|---|
| **Printed Advertising Material Used Outside the State, s. 77.54(25)** | **Not Available** |

Sales of printed advertising materials produced in Wisconsin and sold to purchasers for use only outside the state are exempt from sales tax. For example, advertising leaflets, which are printed and purchased in the state but distributed only in a neighboring state, are not subject to sales tax.

| | |
|---|---|
| **Temporary Storage of Printed Materials, s. 77.54(43)** | **Not Available** |

The temporary storage of raw materials that are incorporated into printed materials to be transported outside Wisconsin, and thereafter used solely outside Wisconsin, are exempt from sales and use tax.

| | |
|---|---|
| **Tangible Personal Property Temporarily Stored in this State, s. 77.54(69)** | **Not Available** |

Tangible personal property that is stored in this state for not more than 120 days, if the property is to be used in fulfillment of a real property construction activity that occurs solely outside of this state at a nonprofit organization, a public school district, or a business district where business tax incentives have been granted and is used by a person engaged in an activity classified as construction.

**Definitional and Miscellaneous Exemptions**

The purpose of this exemption report is to estimate the cost to the state of providing specific exemptions to the sales tax for items that would otherwise be taxable. A retail sale is defined as one where the buyer makes a purchase with no intention of resale. Retail sales are subject to the sales tax, unless otherwise provided by law. However, some sections of the statutes clarify the definition of a retail sale to exclude certain transactions from tax. For these sections no fiscal estimates have been made because sales of these items are not retail sales.

| | |
|---|---|
| **Trade-Ins and Lemon Law Refunds, ss. 77.51(15b)(b)5 and 6** | **$162,500,000** |

In transactions in which a product is traded in on the purchase of a product of greater value, sales tax is applied only to the difference between the values of the two products. The estimate applies only to trade-ins of automobiles and trucks; it does not include trade-ins of boats, mobile homes, household appliances or other items. Also, a customer purchasing a replacement vehicle with a lemon law refund may apply the value of the original trade-in to the purchase of the replacement vehicle.

| Certain Occasional Sales, ss. 77.54(7) and (7m) | Not Available |
|---|---|

Occasional sales are sales by persons other than those offering goods for sale in the ordinary course of business. Most occasional sales are exempt. Taxable occasional sales include sales of automobiles, aircraft, trailers, semi-trailers, snowmobiles, all-terrain vehicles and mobile homes not exceeding 45 feet in length, registered in the state, and boats registered in the state or in the U.S. However, these occasional sales are exempt if the transfer is to a spouse, parent or child, or the spouse of a parent or child, and if the item had previously been registered in Wisconsin, or in the case of boats, registered in the state or in the U.S. Also, the transfer of a motor vehicle from an individual to a corporation solely owned by that individual is exempt. Occasional sales of tangible personal property or services by a neighborhood association, church, civic group or similar nonprofit organization are generally exempt from sales tax if total payments for entertainment or other expenses do not exceed $10,000 and the organization's annual receipts do not exceed $50,000.

| Occasional Auction Sales, s. 77.51(9)(e) | Not Available |
|---|---|

Gross receipts from auctions of farm personal property or household goods that are not held at regular intervals are exempt from sales tax.

| Retailer's Discount, s. 77.61(4)(c) | $42,700,000 |
|---|---|

Retailers may retain the greater of 0.75 percent of their total sales tax liability or $10, not to exceed the sales tax amount, per filing period as compensation for the costs of collecting and remitting sales taxes. The retailer's discount is capped at $8,000 per filing period. Increase in rate from 0.5 percent to 0.75 percent and increase in cap from $1,000 per period to $8,000 per period effective October 2023.

| Tangible Property Included in Construction Contracts, s. 77.54(60) | $2,400,000 |
|---|---|

For construction contracts in which the taxable products are less than 10 percent of the total contract, tangible personal property and taxable services that are sold as part of a construction contract are exempt from sales tax. Contractors owe tax on their purchase price of the tangible personal property and taxable services.

| Private Label Credit Card Bad Debt, s. 77.585(1) | Effective 7/01/2078[1] |
|---|---|

A seller may claim a deduction on its sales and use tax return for the amount of any bad debt that the seller or lender writes off as uncollectible in the seller's or lender's books and records. The bad debt must be eligible to be deducted as bad debt for federal income tax purposes.

| 911 Fee, s. 77.54(55) | $2,700,000 |
|---|---|

The sales price from the 911 fee (formerly known as the police and fire protection fee) imposed by the Public Service Commission is exempt from tax.

| Federal Excise Tax on Heavy Trucks, s. 77.51(15b)(b)3s | $1,000,000 |
|---|---|

The federal excise tax imposed on heavy trucks is not included in the sales price subject to sales tax.

[1] A partial veto of 2017 Wisconsin Act 259 resulted in an effective date of July 1, 2078.

| Sales Tax Holiday, s. 77.54(67) | Nonrecurring[2] |
|---|---|

From August 1 through August 5, 2018, the following items were exempt from tax:

- School supplies, if the sales price of any single item is $75 or less;
- Clothing, if the sales price of any single item is $75 or less;
- A computer purchased for the purchaser's personal use, if the sales price of the computer is $750 or less; and
- School computer supplies purchased for the purchaser's personal use, if the sales price of any single item is $250 or less.

| Precious Metal Bullion, s. 77.54(74) | $3,300,000 |
|---|---|

Sales of precious metal bullion (coins, bars, rounds or sheets that contain at least 35 percent gold, silver, copper, platinum or palladium, and that are marked with weight, purity and content are exempt from sales and use tax. The exemption does not apply to other tangible personal property that contains, in whole or in part, precious metal bullion, such as jewelry, works of art, scrap metal or electronics.

| Electricity from Vehicle Charging Stations, s. 77.54(71) | Effective 1/1/2025 |
|---|---|

Effective January 1, 2025, the sale of electricity delivered or placed by the following is exempt from sales and use tax:

- A Level 3 charger of an electric vehicle charging station into the battery or other storage device of an electric vehicle.
- A Level 1 or Level 2 charger installed on or after March 2, 2024, of an electric vehicle charging station into a battery or other energy storage device of an electric vehicle.

**Services Not Subject to Tax**

Services are exempt from sales tax unless the statutes specifically impose the tax. Table 3 shows certain services that are not subject to sales tax and provides an estimate of the potential fiscal effect. The table does not include services that are specifically exempted from tax by law and discussed in previous sections, such as self-service laundry services, veterinary services for farm animals and labor services in construction. Similar to Table 2, Table 3 below only presents estimated state revenue foregone. The impacts on local sales tax collections are not included in the figures.

[2] The sales tax holiday was in effect from August 1 to August 5 of 2018. The FY19 fiscal effect was an estimated revenue reduction of $14.5 million.

**TABLE 2**
**SALES AND USE TAX EXEMPTION DEVICES SUMMARY**

| Exemption | Statutory Reference | FY24 Fiscal Effect |
|---|---|---|
| **Exemptions for Property Sold Primarily to Households** | | |
| Food and Food Ingredients (not including Bottled Water) | s. 77.54(20n)(a) | 920,000,000 |
| Dried Fruit | s. 77.51(1fm)(b) | 490,000 |
| Bottled Water | s. 77.54(20n)(a) | 40,100,000 |
| Meals Furnished by Institutions of Higher Education | s. 77.54(20n)(c)1 | 9,200,000 |
| Water Sold Through Mains | s. 77.54(17) | 21,150,000 |
| Fuel and Electricity for Residential Use | ss. 77.54(30)(a)1 and 2 | 179,400,000 |
| Biomass Used for Fuel Sold for Residential Use | s. 77.54(30)(a)1m | Minimal |
| Mobile and Manufactured Homes | ss. 77.54(31) and 77.51(12m)(b)7 | 730,000 |
| Motor Fuels | s. 77.54(11) | 633,000,000 |
| Vegetable Oil and Animal Fats Converted to Exempt Vehicle Fuel | s. 77.54(11m) | Minimal |
| Newspapers, Periodicals and Shoppers Guides | s. 77.54(15) | 11,600,000 |
| Caskets and Burial Vaults | s. 77.54(21) | 4,800,000 |
| U.S. and State of Wisconsin Flags | s. 77.54(46) | Minimal |

| Sewerage Services | 50,200,000 |

# INSURANCE PREMIUM TAXES

**Introduction**

Chapter 76 of the Wisconsin Statutes provides for the taxation of certain insurance companies by the Commissioner of Insurance on the basis of premiums or net investment income. Insurance business subject to taxation under Chapter 76, Wis. Stats., is not subject to the corporate income and franchise tax under Chapter 71, Wis. Stats., and vice versa. Some types of insurance companies are not subject to taxation under either chapter.

The tax imposed by Chapter 76, Wis. Stats., may apply to all insurance companies, foreign (companies organized outside Wisconsin) as well as domestic (organized in Wisconsin). The corporate franchise tax applies to domestic fire and casualty insurers and the nonlife business of domestic life insurers.

Insurance companies subject to the corporate income and franchise tax are subject to the same tax rate as that imposed on all other corporations subject to the tax, except that the tax is limited to 2 percent of premiums. The tax rates for insurance companies subject to taxation under Chapter 76, Wis. Stats., vary depending on the type of insurance business. In addition, because of the "reciprocal and retaliatory" statutes, Wisconsin taxation of foreign insurance companies (companies organized outside the state) is dependent on the taxation of Wisconsin-organized insurance companies in the domicile of such foreign companies. For example, the Wisconsin taxation of a New York company doing business in Wisconsin is dependent on the New York taxation of a Wisconsin company doing business in New York.

The Wisconsin "retaliatory" statute (sec. 76.66, Wis. Stats.) provides, in essence, that when the taxes/fees imposed by another state or country on insurers organized under Wisconsin laws doing business in that state or country are greater than the taxes or fees imposed by Wisconsin on those foreign insurers doing business in Wisconsin, then Wisconsin will tax insurers organized under the laws of the other state or country at the same higher rate.

The Wisconsin "reciprocal" statute (sec. 76.67, Wis. Stats.) provides that insurers organized under the laws of other states, territories or districts of the United States (but not other countries) shall not pay taxes, fees or licenses to Wisconsin greater than the taxes, fees or licenses imposed by the other state, territory or district on similar Wisconsin insurers doing business there. The reciprocal statute does not result in pure reciprocity because it does not apply to insurance companies organized in other countries, and it does not permit payment of less than the Wisconsin statutory tax on life insurance, fire dues (2 percent fire department dues) and certain fees. In addition, it requires a minimum tax of 0.375 percent on fire and ocean marine premiums.

Because some Wisconsin companies do insurance business in all other states, territories or districts of the United States, the effect of the reciprocity and retaliation statutes is that few U.S. fire or casualty insurers are taxed at the rates provided in the Wisconsin Statutes (except the 0.375 percent minimum tax on fire and ocean marine premiums). In general, the "retaliatory" statutes applicable to insurers organized in other countries cannot be applied because of limitations imposed by international treaties between the United States and the insurer's domiciliary country or because of practical problems of application or computation. Thus, non-U.S. insurers are taxed at the Wisconsin statutory rate and applied to premiums unless otherwise noted. The statutory premium rates are as follows: fire, 2.375 percent; ocean marine, 0.5 percent; casualty, 2 percent; domestic life (over $750 million in force), 2 percent; domestic life ($750 million or less in force), 3.5 percent of gross income;[1] nondomestic life, 2 percent; and nondomestic accident and health, 2 percent.

For the premium tax, the base is gross premiums received for direct insurance, less return premiums and cancellations, and less policyholder dividends from savings and gains on direct insurance in Wisconsin. Direct insurance includes all insurance other than reinsurance. Under reinsurance, an insurer shares the risk and premiums with other insurers.

[1] This tax plus a valuation fee is subject to a maximum of 2% of net taxable premiums.

General purpose revenue tax collections from the insurance premiums taxes in FY24 were $212.6 million. This excludes $33.8 million of fire department dues which, beginning in FY82, were changed from general purpose to program revenue. Fire department dues are distributed to local units of government, while other insurance company taxes are part of the state general fund.

In addition to the taxes imposed in Chapter 76, Wis. Stats., insurers are also subject to license fees. License fees are charged according to the schedule in sec. 601.31, Wis. Stats.

**Exemptions From Taxation**

Insurers exempt from taxation under both Chapters 71 and 76, Wis. Stats., include: town mutual insurance companies (except that fire dues are payable equal to 2 percent of the fire premiums); fraternal or mutual benefit societies; voluntary benefit plans for injury or death of students; self-insurers (except that fire dues are payable equal to 2 percent of the premiums that would have been charged by authorized insurers); the State Property Insurance Fund (except for fire dues on property that is not state-owned); and the Wisconsin Health Care Liability Plan and Patients Compensation Fund.

| | |
|---|---|
| **Town Mutual Insurance Companies, s. 76.61** | **$1,095,000** |

Town mutual insurance companies organized under or subject to Chapter 612 of the Wisconsin Statutes are not subject to taxation or license fees under Chapter 76, Wis. Stats. They are subject, however, to a fire dues tax of 2 percent of direct fire premiums. A town mutual insurance corporation may be organized by at least 100 adults, each of whom has a separate insurable risk within a prescribed territory. The territory may not exceed eight contiguous counties; however, the Commissioner of Insurance may allow a broader territory not larger than 16 contiguous counties. A town mutual may insure members against loss or damage from any cause to any property in which a member has an interest, including insurance against loss of use or loss of income from property. The insurance of crops and other property against loss due to windstorm or hail are restricted and must be reinsured. Town mutual insurers may insure policyholders from liability, errors and omissions, and medical payments and other supplemental coverage when reinsured.

| | |
|---|---|
| **Domestic Fire, Marine and Casualty Companies, ss. 76.60 and 76.63(1)** | **$263,605,000** |

Wisconsin-organized insurance companies insuring fire, marine and casualty risks are not subject to Wisconsin premium taxation with the exception of mortgage guaranty insurers. Companies not subject to the premiums tax are subject to the corporation franchise tax. They are subject to a fire dues tax of 2 percent of direct fire premiums written. Casualty risks also include all lines of accident and health insurance written by life companies, fraternal insurers, health maintenance organizations, limited-service health organizations and health medical dental indemnity insurers.

| | |
|---|---|
| **Fraternal Life Insurance Companies, s. 76.65** | **$6,045,000** |

All corporations transacting life insurance business in Wisconsin are subject to taxation under Chapter 76, Wis. Stats., except fraternal insurers organized and operating under Chapter 614, Wis. Stats. A fraternal insurer must have a lodge system and a representative form of government. It must exist solely for the benefit of its members and their beneficiaries and solely for any lawful social, intellectual, educational, charitable, benevolent, moral, fraternal, patriotic or religious purposes for the benefit of its members or the public, carried on through voluntary activity of its members in their local lodges or through institutional programs of the fraternal insurer or its lodges. It may carry only life and accident and health lines of insurance.

**Exemptions from Base**

| | |
|---|---|
| **Return Premiums and Cancellations on Direct Insurance, ss. 76.60, 76.62 and 76.63(1)** | **See Footnote[2]** |

For the tax on fire, marine and casualty insurance premiums, the tax base is defined as gross premiums as calculated under sec. 76.62, Wis. Stats. This section provides that all license fees and taxes levied under any provision of law upon gross premiums other than life insurance premiums shall be based on gross premiums received for direct insurance, less return premiums and cancellations, and returns from savings and gains on all insurance, other than reinsurance by the insurer during the preceding year in this state.

Reinsurance, where one insurer shares a portion of the premium in return for a sharing of a portion of the risk with another insurer, is not subject to taxation unless the original insurer fails to pay the premiums tax. The fiscal effect of this exemption for domestic companies is included in the exemption from taxation for domestic fire, marine and casualty companies; for foreign companies, it is included in the estimate for the "reciprocity" statute.

| | |
|---|---|
| **Exemptions from the Domestic Life Insurance Company Gross Income Tax Base, s. 76.65(1)** | **None** |

The tax base for domestic (Wisconsin-organized) life insurance companies (which may affect only those companies with $750 million or less of insurance in force) is gross income from all sources, except:

- Interest required to provide and maintain reserves according to the laws of Wisconsin;
- Premiums collected on policies of insurance and contracts for annuities.

The gross income, net of the above deductions, is subject to a factor with the numerator being net investment income applicable to life insurance and annuities and the denominator being total net investment income.

| | |
|---|---|
| **Exemptions from the Foreign and Domestic Life Insurance Company Gross Premium Tax Base, s. 76.65(2)** | **$1,595,000[3]** |

The tax base for foreign life insurance companies, which is also generally applicable to domestic life insurance companies having more than $750 million of insurance in force, is gross premiums on all policies or contracts of insurance on the lives of residents of Wisconsin less all sums apportioned to premium-paying policies on the lives of residents of Wisconsin from annual distributions of profits, savings, earnings or surplus that have been either paid in cash or applied in partial payment of premiums. Because of long-standing administrative construction, considerations received for annuity contracts are not considered premiums on policies or contracts of insurance and, thus, are not taxable under sec. 76.65(2), Wis. Stats. The fiscal effect shown is that for domestic insurers, the fiscal effect for foreign companies is included in the estimate for the "reciprocity" statute.

**Special Treatment**

| | |
|---|---|
| **Limit on Gross Income Tax of Domestic Life Insurance Companies with $750 Million or Less of Insurance in Force, s. 76.65(1)** | **None** |

For domestic life insurance companies with $750 million or less of insurance in force, the tax based on 3.5 percent of gross income (less deductions) cannot exceed the annual license fee that would have been payable had it been operating as a foreign company (in which case the tax would be 2 percent of gross

[2] Included in estimates for exemption for domestic, fire, marine and casualty companies and for "reciprocity" statute.
[3] Fiscal effect for domestic insurers only. Fiscal effect for foreign corporations included in the estimate for "reciprocity" statute.

premiums, after deducting the considerations received for annuity contracts which are exempt from taxation). This limit had no fiscal effect in FY24.

| "Retaliatory" Statute, s. 76.66 | Not Available |
|---|---|

The Wisconsin "retaliatory" statute may result in an increase in Wisconsin fees; thus, it might not be considered a tax exemption device. However, to the extent that the statutes of other states provide tax exemption devices for insurance companies organized in Wisconsin doing business in such states, the Wisconsin "retaliatory" statute could also allow such tax exemption devices to insurance companies doing business in Wisconsin. The fiscal effect of these other states' statutes is included in the estimate for the "reciprocity" statute.

**Credits**

| Credit to Domestic Life Insurers for Personal Property Taxes, s. 76.69 | $279,000 |
|---|---|

Domestic life insurance companies are allowed a premium tax credit of 50 percent of general property taxes paid on personal property in Wisconsin used in the operation of business and not held primarily for investment purposes. The credit is limited to 25 percent of the license fee for domestic life insurers.

| Credit to Insurers to Recoup Security Fund Assessments, s. 646.51(7) | $386,000 |
|---|---|

The Insurance Security Fund Board administers the security fund established by Chapter 646, Wis. Stats., to provide a mechanism for protecting insureds in the event of liquidation of insurers and to assess the costs of such protection among insurers. Sec. 646.51(7), Wis. Stats., provides for tax credits of 20 percent of security fund assessments in each of the five calendar years following the year the assessment was paid when premium rates are fixed so that it is not possible for the insurer to increase its premium rates to recoup the assessment. Domestic insurers may take tax credits only for the proportion of their business assessed which is fixed, such that it is impossible to raise premiums. Such policies are referred to as "noncancellable" in the insurance business and represent a small portion of the total insurance written. Nondomestic insurers may take tax credits subject to the provision of the "retaliatory" and "reciprocal" statutes (secs. 76.66 and 76.67, Wis. Stats.)

| Credit to Insurers for Certified Capital Investment, s. 76.635(2) | None |
|---|---|

Since FY99, certain insurers operating in Wisconsin are allowed to take a premium tax credit for investment in certified capital companies as defined in sec. 560.29, Wis. Stats. (2009). The purpose of the credit is to encourage insurers to make venture capital for companies operating in Wisconsin. Sec. 76.635(2), Wis. Stats., provides for tax credits of up to 10 percent of the amount of the certified investment each year, until the entire available credit is used.

There is no FY24 fiscal effect, as no insurance companies were certified for the credit.

| Credit for Certain Development Zone Activities, s. 76.636(2) | None |
|---|---|

Certain insurers operating in Wisconsin are allowed to take a premium tax credit for investment in certain development zone activities as defined in secs. 238.30, 238.395, 238.397, and 238.398, Wis. Stats. The purpose of the credit is to encourage insurers to make investments in economically disadvantaged areas. This program is more fully discussed in the chapter on "Corporate Income and Franchise Tax."

There is no FY24 fiscal effect, as no insurance companies were certified for the credit.

| Early Stage Seed Investment Credit, s. 76.638 | $1,221,000 |
|---|---|

For taxable years beginning after December 31, 2008, insurers may claim a credit against the premium tax

for investments made with a fund manager that invests in qualified new business ventures. This program is more fully discussed in the chapter on "Corporate Income and Franchise Tax."

| **Economic Development Credit, s. 76.637** | **None** |
|---|---|

For taxable years beginning after December 31, 2017, a nonrefundable low-income housing credit is available. Claimants may claim a credit for the amount certified by the Wisconsin Housing and Economic Development Authority (WHEDA). A taxpayer is eligible for the credit if their tenants' income is less than 60 percent of the county's median income. Claimants must apply through WHEDA. The credit must be claimed within four years of the date on which the tax return was due. Unused credits may be carried forward for 15 years. The maximum amount of credits WHEDA may certify in a year equals $42,000,000.

| **Low-Income Housing Credit, s. 71.28(8b)** | **$6,770,000** |
|---|---|

For tax years beginning after December 31, 2017, a nonrefundable low-income housing credit is available. Claimants may claim a credit for the amount certified by the Wisconsin Housing and Economic Development Authority (WHEDA). A taxpayer is eligible for the credit if their tenants' income is less than 60 percent of the county's median income. Claimants must apply through WHEDA. The credit must be claimed within four years of the date on which the tax return was due. Unused credits may be carried forward for 15 years. The maximum amount of credits WHEDA may certify in a year equals $42,000,000.

# PROPERTY TAX

The property tax is the largest source of state and local tax revenues in Wisconsin. This report reflects taxes for the 2023-24 property tax year, which covers taxes levied in December 2023 and due for payment in 2024. Total property taxes for the 2023-24 property tax year were about $13.09 billion (see Table 1). School districts accounted for the largest share of property taxes levied ($5.774 billion, or 44.13 percent of the total). Municipalities ($3.485, or 26.63 percent) and counties ($2.516 billion, or 19.23 percent) levied the next largest shares. Technical college districts, tax incremental financing districts and special districts accounted for the remaining $1.309 billion, or 10.01 percent.

**TABLE 1**
**GROSS PROPERTY TAX LEVIES FOR 2023-24 BY TYPE OF UNIT**

| Type of Unit | Number of Units | Number of Units with a Tax Levy | Gross Amount Levied | % of Total Levy |
|---|---|---|---|---|
| School Districts | 421 | 421 | $5,774,886,156 | 44.13% |
| Technical College Districts | 16 | 16 | $499,403,592 | 3.82% |
| Counties | 72 | 72 | $2,516,940,930 | 19.23% |
| Municipalities | 1,913 | 1,892 | $3,485,337,572 | 26.63% |
| Municipalities – TIF increments | 448 | 444 | $677,446,210 | 5.18% |
| Special Districts | 536 | 243 | $132,728,792 | 1.01% |
| Total | 3,406 | 3,088 | $13,086,743,252 | 100.00% |

Property tax rates are often expressed in mills (dollars per $1,000 of equalized value). For the 2023-24 property tax year, the statewide average gross tax rate was 15.53 mills. The statewide average net tax rate, which is calculated on taxes after subtracting the $1.195 billion school levies property tax credit, was 14.12 mills for the 2023-24 property tax year. Both rates were calculated based on the total equalized value of taxable property in the state, which was approximately $842.65 billion.

**Exempt Real Property – Reporting Requirements**

State law requires that the owners of certain real property exempt from property taxes to report the value of the property to municipalities, which then summarize and transmit the owner-reported information to the Department of Revenue (DOR).

By March 31 of each even-numbered year, an owner of real property exempt from property taxation is required to file with the clerk of the municipality where the property is located a report that contains, among other things, an estimate of the market value of the property as of January 1 of that year. Owners of certain types of real property (such as cemeteries and archaeological sites), the federal government, the State of Wisconsin, local governments, and owners of properties on which an in lieu of tax or an equivalent payment is made are exempt from the reporting requirement.

By July 1 of each even-numbered year, every municipal clerk is required to file with DOR a report that summarizes the data reported to him or her by owners of tax-exempt real property. This report segments exempt real property into 13 categories and 10 value brackets. If a village or city has territory in two or more counties, a separate report is due for each county-specific piece of the municipality.

This chapter includes a compilation of the totals for those municipalities that filed a report for 2024 by property purpose and value range categories.

**Real Property – Exempt Value Estimates**

An estimate of the total value of real property exempt from taxation was determined based upon the real property exemption summary reports submitted by municipalities. The estimate excludes information on properties for which no reporting requirement exists. The estimate was calculated in two major steps.

The values for the various types of exempt property were estimated for towns, villages and cities by multiplying the number of parcels in each value bracket by the midpoint value for that value bracket. For example, the value for the $10,000 to $100,000 bracket was assumed to be $55,000. For the over $100 million category, a value of $125 million was used.

NOTE: 2024 forms for both single parcel and multiparcel property owners utilized more value ranges than in previous years. This allows for better estimates of parcels with values exceeding $25 million. As a result, the 2024 figures are not comparable to some previous years' estimates.

Below, Table 2 shows the number of towns, villages and cities that should have filed a summary report, the number of municipalities that actually filed the report (as of October 31, 2024), and the percentage of the state total equalized value represented by the places that filed a report. The reported values are divided by reporting municipalities' share of statewide equalized value to arrive at an estimate of total values for all localities in that type of municipality.

**TABLE 2**
**NUMBER OF FILERS, PERCENTAGE OF EQUALIZED VALUE**
**AND ADJUSTMENTFACTOR APPLIED FOR 2024 TAXATION DISTRICT**
**EXEMPTION SUMMARY REPORTS**

| Municipal Type | Number of Municipalities | Number of Filers | Filers' Percent of Equalized Value |
|---|---|---|---|
| Towns | 1,244 | 944 | 75.88% |
| Villages | 450 | 388 | 86.22% |
| Cities | 219 | 203 | 92.69% |
| Total | 1,913 | 1,535 | 80.24% |

Estimates of the total value of exempt property for the reported classes are displayed in Table 3. Since compliance with the reporting – by owners of exempt property to their municipal clerk – is unknown, the estimated values in the table should not be deemed definitive.

**TABLE 3**
**ESTIMATED VALUE OF EXEMPT PRIVATE REAL PROPERTY, 2024**

| Purpose of Property | Exempt Value ($ millions) | Percent of Total |
|---|---|---|
| Religious: | | |
| Place of worship | 14,615,313,000 | 35.62% |
| Church – Other | 1,744,937,500 | 4.25% |
| Total Religious | 16,360,250,500 | 39.87% |
| Educational: | | |
| K-12 Education | 4,311,543,000 | 10.51% |
| Colleges and universities | 1,699,827,500 | 4.14% |
| Other education | 974,574,500 | 2.38% |
| Total Educational | 6,985,945,000 | 17.03% |
| Medical Facilities: | | |
| Nonprofit hospitals | 3,974,712,500 | 9.69% |
| Medical research foundations | 38,650,000 | 0.09% |
| Other medical | 527,733,000 | 1.29% |
| Total Medical | 4,541,095,500 | 11.07% |

| Other housing | 2,461,230,500 | 6.00% |
| Total Housing | 5,224,549,000 | 12.73% |
| Other exemptions: | | |
| Public benefits | 4,014,449,000 | 9.78% |
| Miscellaneous | 3,903,593,500 | 9.51% |
| Total Other | 7,918,042,500 | 19.30% |
| Total – All exemptions | 41,029,882,500 | 100.00% |

**Exempt Personal Property – Reporting Requirements**

All personal property is exempt from property taxes. An owner of exempt personal property is generally not required to report the value of such property to local officials or the state. Some items that were classified as personal property prior to January 1, 2024, are now classified as real property. These include: (1) buildings, improvements and fixtures on leased land; (2) buildings, improvements and fixtures on exempt lands, (3) buildings, improvements and fixtures on forest crop/managed forest land; and (4) manufactured and mobile homes not otherwise exempt under sec. 66.0435(3), Wis. Stats.

**Personal Property – Exempt Value Estimates**

This section does not address other exempt property, including household furnishings and business inventories.

*Machinery and equipment used in manufacturing.* The exemption of machinery and equipment used exclusively and directly in the manufacturing process reduces the property tax burden on manufacturers. For the 2023-24 tax year, $2.32 billion of manufacturing machinery and equipment was taxable. This taxable equipment consisted of property that was not used exclusively and directly in the manufacturing process. Based on historic experience, it is estimated that between 7 percent to 15 percent of all manufacturing machinery and equipment is taxable. Using a midrange figure of 11 percent, the department estimates that about $21.06 billion of manufacturing machinery and equipment is currently exempt from taxation.

*Waste Treatment Facilities*. All land, land improvements, buildings and machinery used exclusively and directly to remove, store or cause a physical or chemical change in industrial waste or air contaminants for the purpose of reducing or eliminating pollution of the air or waters of the state are exempt from property taxation. The exemption is available to utilities, commercial businesses and manufacturers. Information on the amount of such property owned by utilities and commercial businesses is not available. The last year for

which data is available for manufacturers is 2001 as that was the last year DOR approval was required in order for the property to be exempt. In that year, about $2.40 billion was exempt. If this figure is adjusted by the percentage change in the state total equalized value of manufacturing property (both real and personal) for the period from 2001 to 2023 (an increase of 81.61 percent), the estimated value of exempt manufacturing waste treatment property is about $4.36 billion.

*Computer Equipment*. Wisconsin provides property tax exemptions for computer equipment except for copiers, custom software, equipment with embedded computerized components and telephone systems. Local governments are reimbursed a fixed amount of $98.04 million to compensate for the lost tax base. The payments are based on the 2017-18 property value ($3.75 billion) plus inflation adjustments for 2018 and 2019. 2017-18 was the last year values for exempt computer equipment were reported. Based on a historical growth rate of 2.44 percent and the last year of reported values, the 2023-24 tax exemption is estimated at $4.44 billion.

*Nonmanufacturing Machinery, Tools and Patterns*. All machinery, tools and patterns, not including such items used in manufacturing. Machinery does not include a building and means a structure or assemblage of parts that transmits force, motion or energy from one part to another in a predetermined way by electrical, mechanical or chemical means. In 2017, nonmanufacturing machinery, tools and patterns had an assessed value of $3.35 billion. Based on a historical growth rate of 3.23 percent, the property tax exemption for 2023-24 is estimated at $4.04 billion. Based on 2017 assessed values, local governments are currently reimbursed $75.62 million.

*Personal Property Repeal*. All business and manufacturing personal property including steam and other vessels, furniture, and equipment beginning with property tax assessments applicable to January 1, 2024. In 2023, the personal property repeal exemption had an assessed value of $6.67 billion. As a result of the repeal, local governments will receive aid payments estimated at $173.80 million.

For these five personal property exemptions for which the department has information to formulate an estimate, the total exempt value is $40.57 billion.

**Effect of Exempt Property on Tax Rates**

Table 4 shows how property taxes could have been affected if the exempt property discussed in this report had not been exempt for the 2023-24 property tax year. Exempt computers, nonmanufacturing machinery, tools and patterns, and personal property repeal are excluded since aid payments are made to compensate for the loss in tax revenues. The table shows the actual average 2023-24 net property tax rates for towns, villages and cities, as well as tax rates calculated under the assumption that the estimated $41.03 billion of exempt private real property and $25.42 billion of exempt personal property (excluding exempt computer property, nonmanufacturing machinery, tools and patterns) had been added to the tax rolls, assuming no change in any state or federal aids and no change in total property tax levies.

Table 4 indicates that, if the estimated exempt private real and personal property had been placed on the tax roll in 2023-24, the statewide average net property tax rate would have declined by 7.31 percent from $14.12 to $13.08 per $1,000 of value. Under this scenario, total net tax rates in towns, villages and cities would have been lower by 5.71 percent, 7.77 percent and 8.32 percent, respectively. The larger impact in cities and villages reflects that exempt property is more likely to be located in urban than in rural areas.

**TABLE 4**
**AVERAGE NET TAX RATES FOR 2023-24 (PER $1,000 EQUALIZED VALUE)**

| For Property In: | Actual Effective Rate | Rate if Exempt Real and Personal Property Were Taxable | Percentage Change (%) |
|---|---|---|---|
| Towns | 11.12 | 10.48 | -5.71% |
| Villages | 13.90 | 12.82 | -7.77% |
| Cities | 16.55 | 15.17 | -8.32% |
| State Average | 14.12 | 13.08 | -7.31% |

**Evaluation**

A number of limitations require that the estimates presented in this chapter be used carefully:

- Noncompliance with the reporting requirements by both property owners and local governments mean that the estimates were prepared using incomplete data.
- Using the midpoint value in the value classes may overstate or understate the true value of the exempt properties.
- The value of certain exempt personal property was based on historic relationships.
- The value of government-owned property is excluded.
- The value of land enrolled under the special forest tax laws (see separate chapter in this report) is excluded.
- The value of some exempt property is difficult to estimate due to a limited market.
- Owners of exempt property may understate the value of their property.
- Owners of exempt property often have incomplete information to accurately value their property.

TAXATION DISTRICT EXEMPTION SUMMARY REPORT FOR 2024 (Sec. 70.337(2), Wis. Stats.)

| Property Purpose | $1-$10K | $10K-$100K | $100K-$200K | $200K-$500K | $500K-$1M | $1M-$2M | $2M-$5M | $5M-$10M | $10M-$15M | $15M-$25M | $25M-$50M | $50M-$75M | $75M-$100M | OVER $100M | Total |

# FOREST CROP AND MANAGED FOREST LAWS

The Forest Crop Law and Managed Forest Law extend special property tax treatment to encourage the production of harvestable timber crops by qualifying landowners. Current law assigns most of the administrative duties to the Department of Natural Resources (DNR).

**Historical Background**

Wisconsin was a premier timber producer in the late 19th century. However, by the 1920s, much of the state's forest land had been cut-over or damaged by fire. Because these lands generated little or no income, owners were unable to pay their property taxes. Counties found they were often unable to sell this land at tax sales and ended up owning the land. As county ownership increased, taxes increasingly shifted onto remaining property owners, which created a fiscal crisis for local governments. It was thought that reducing the annual tax burden on forest landowners could prevent further land abandonment and encourage reforestation, but local governments did not want to forgo the taxes they collected on forest land.

The solution was to amend the uniformity in taxation clause of the state constitution to create an exception for forest land. The amendment was approved in 1927, and the Legislature enacted the Forest Crop Law (FCL) shortly afterward. A program for owners of small forest plots, the Woodland Tax Law (WTL) was enacted in 1954. The Managed Forest Law (MFL) program was enacted in 1985 to replace both the FCL and WTL.

**Provisions of the Forest Crop Law (FCL)**

Under the FCL, an owner of a quarter-quarter section (about 40 acres) in a town or village could petition DNR to enter the land in the program. If DNR determined that forestry was the best use for the land and that a stand of merchantable timber could be produced within a reasonable period of time, the land was entered under the program under a contract for either 25 years or 50 years. The landowner had to practice forestry, notify DNR of timber harvests, and permit public access to the land for hunting and recreation.

FCL land is exempt from property taxes. To help offset the fiscal effect of this exemption, DNR makes an annual payment of $0.20 per FCL enrolled acre to the municipality where the land is located. The municipality retains 80 percent and remits 20 percent to the county. To further offset the fiscal effect of the exemption, landowners are required to make the payments described below:

| | |
|---|---|
| **Acreage Share** | **$125,304 ($3.60/acre)** |

This is an annual payment by the landowner to the municipality where the land is located. The municipality retains 80 percent and remits 20 percent to the county. On land entered prior to 1972, the payment is $0.10 per acre. The payment for 2023 to 2032 is $3.60 which equals $0.20 times the ratio of the total value of taxable land in the state in 2022 to the total value of taxable land in the state in 1972.

| | |
|---|---|
| **Withdrawal Tax** | **$0 ($0.00/acre)** |

If land is withdrawn from the FCL either at the owner's request or upon DNR finding of a contract violation by the owner, a withdrawal tax must be paid. The tax equals the sum, for the years the contract was in effect, of the differences between the amount of real estate taxes that would have been levied on the land and the acreage shares and severance taxes actually paid on the land. Each year's difference is subject to interest at 12 percent per year (or 5 percent for pre-1977 contracts) for each year the real estate tax has been deferred. DNR retains an amount equal to the total payments it has made to the municipality on the parcel. Any excess is paid to the municipality, which keeps 80 percent and remits 20 percent to the county.

| | |
|---|---|
| **Termination Tax** | **$0 ($0.00/acre)** |

When a contract expires and the land is not enrolled under the MFL program, a termination tax of 10 percent of the value of the standing timber is assessed. DNR retains an amount equal to the total payments it has

made to the municipality on the parcel. Any excess is paid to the municipality, which keeps 80 percent of the payment and remits 20 percent to the county.

**Provisions of the Managed Forest Law (MFL)**

An owner of 20 or more contiguous forest acres may apply to DNR to enter his or her land into the MFL program[1]. If DNR finds that at least 80 percent of the parcel is producing or capable of producing at least 20 cubic feet of merchantable timber per acre per year, and that the land is not developed in a manner incompatible with the practice of forestry, DNR issues an order entering the land under the program. The agreement is for 25 or 50 years (at the landowner's option) and can be renewed. The landowner agrees to follow a forest management plan and to permit (with limited exceptions) public access for hunting and recreation.

MFL land is exempt from property taxes. To help offset the effect of this exemption on local property taxes, DNR makes an annual payment of $0.20 per MFL enrolled acre to the municipality where the land is located. The municipality retains 80 percent of this payment and remits 20 percent to the county. To further offset the effect of the tax exemption, landowners are required to make additional payments. These payments are described below:

| **Acreage Share** | **$5,224,655 ($1.50/acre)** |
|---|---|

This is an annual payment by the landowner to the municipality where the land is located. The municipality retains 80 percent and remits 20 percent to the county. For MFL orders that took effect before April 28, 2004, the payment for 2023 to 2027 is $0.72 per acre. This rate equals the original rate of $0.74 multiplied by the ratio of the average statewide tax per acre on agricultural, undeveloped and taxable forest land for 2021 divided by the corresponding average for 1986. For MFL orders that took effect on or after April 28, 2004, the payment for 2023 to 2027, $1.90 per acre. This rate equals the average equalized value per acre of taxable forest land in 2021 ($2,207) times the net statewide tax rate for 2021-22 (17.2074 mills) times 5 percent.

| **Closure Fee** | **$14,122,201 ($5.57/acre)** |
|---|---|

This is an annual payment made by the landowner to the municipality where the land is located. The municipality retains 80 percent and remits 20 percent to the county. For MFL orders that took effect before April 28, 2004, the payment for 2023 to 2027, $0.96 per acre. This rate equals the original payment of $1.00 multiplied by the same ratio used to adjust the acreage share payment. For MFL orders that took effect on or after April 28, 2004, the payment for 2023 to 2027, $7.59 per acre. This rate equals the average equalized value per acre of taxable forest land in 2021 ($2,207) times the net statewide tax rate for 2021-22 (17.2074 mills) times 20 percent. The closure fee is in addition to the acreage share payment.

| **Noncompliance Fee** | **$0** |
|---|---|

This fee is $250. If DNR determines that an MFL landowner has not complied with the management plan, it notifies the municipality. The fee is collected by the municipality where the land is located. The municipality keeps 80 percent of the fee and remits 20 percent to the county.

| **Withdrawal Fee** | **$0** |
|---|---|

DNR assesses a fee of $300 on all withdrawals from the MFL program that occur before the expiration of the MFL agreement period. DNR retains the entire fee.

[1] 2015 Wisconsin Act 358 permitted currently enrolled parcels under 20 acres to renew one time.

| Withdrawal Tax | $1,521,473 |
|---|---|

For a "large property" defined as collectively greater than 1,000 acres, the land owner must pay the greater of: (a) the product of the net assessed value tax rate in the year prior to withdrawal times the assessed value of the land in the year prior to withdrawal times the number of years the land was under an MFL order minus the acreage share and yield taxes paid; or (b) 5 percent of the stumpage value of the merchantable timber on the land. On withdrawals from the MFL program on renewed MFL orders, the calculation under (a) above is made from the year of the renewal. For parcels under 1,000 acres, withdrawals are taxed at a rate equal to the property tax applicable to the land in the previous year times the number of years in the program, or ten years, whichever is less. A landowner may withdraw a parcel of land without paying withdrawal taxes or fees if DNR determines the parcel is unsuitable to produce merchantable timber as a result of certain environmental factors. DNR remits 100 percent of any withdrawal taxes to the municipality where the land is located. The municipality keeps 80 percent of the payment and shares 20 percent with the county. Since a decision to withdraw from the MFL program is not reversible once filed with DNR, an MFL landowner may request the Department of Revenue (DOR) to estimate the withdrawal tax. The request must be accompanied by a nonrefundable fee equal to the greater of $100 or the number of acres affected times $5.

| Agreement Expiration | $0 |
|---|---|

When an agreement expires and is not renewed, the land becomes subject to the property tax.

**Measuring the Tax Reduction under Forest Tax Programs**

An estimate of tax savings under the FCL and MFL programs is shown in Table 1. Landowner payments are for payments made in 2023. Property tax effects are based on data for the 2023-24 property tax year. Acreage data were obtained from the Statements of Assessment for 2023 filed by municipalities with DOR. Data on MFL withdrawal fees and MFL noncompliance fees are not available and are excluded from this analysis.

To estimate the tax savings, the net property tax per acre on taxable forest land was calculated for each municipality in the state. This was done by multiplying a municipality's total property tax levy minus the school levy tax credit by the percentage of the municipality's assessed value attributable to taxable forest land. The product of this calculation was divided by the assessed acres of taxable forest acres in the municipality.

The "initial tax" in Table 1 is an estimate of what the net property taxes on land enrolled under the FCL and MFL programs would have been had they not been enrolled. This number equals the average net tax per acre on taxable forest land in each municipality by the number of acres enrolled under the FCL or MFL program in that municipality. The amount in the table is the state total estimated tax savings.

The acreage share payments were calculated by multiplying the number of enrolled acres by the appropriate acreage share rate. For purposes of the estimate, it was assumed that all of these payments are actually made.

Data on termination and withdrawal taxes are from a DNR report regarding payments made to municipalities in 2023 for land enrolled under the FCL and MFL programs. Since DNR can retain certain amounts from some landowner payments, these landowner payments could be understated.

The "Initial Taxes" for 2023-24 were $19.02 per acre under the FCL program and $31.79 per acre under the MFL program. After subtracting the landowner payments, the "Net Tax Reductions" for 2023-24 were approximately $536,667, or $15.42 per acre under the FCL program, and approximately $90.0 million, or $24.29 per acre under the MFL program. The total net tax reduction under the two programs for 2023-24 is estimated at $90.5 million, or about 81.2 percent of the $111.5 million total "Initial Taxes" amount.

Since the equalized value of land entered under these programs is zero (due to their being exempt from taxation), these lands have an indirect effect on property taxes due to the resultant redistribution in school

equalization aids that occurs. The effects of this aid adjustment are not reflected in Table 1 and are not analyzed in this report.

**Evaluation**

The number of privately-owned acres enrolled under the various forest tax law programs and the average property tax on taxable forest land for selected years are shown on Table 2.

Although these forest land tax programs have increased the amount of timber harvested in the state, the amount of such harvests that can be attributed to these special forest tax lands is not known. Nevertheless, property taxes remain a concern for forest landowners, especially as land values increase due to demand for recreational land and other nonforestry uses. If a forest landowner wishes to pursue forestry, enrolling the land under the MFL program provides a mechanism to ease the tax burden. The provisions of the MFL statutes that require landowners to follow management plans and that impose penalties for failure to follow those plans have reduced the chances that landowners will use the MFL program to reduce their taxes while waiting to sell the land for nonforestry purposes.

**TABLE 1**
**FINANCIAL ANALYSIS OF FOREST TAX LAWS, 2023-24**

| | Forest Crop Law | | Managed Forest Law | |
|---|---|---|---|---|
| Item | Amount ($) | Per Acre | Amount | Per Acre |
| Initial Taxes | $699,562 | $19.02 | $110,869,211 | $31.79 |
| Landowner Payments: | | | | |
| Acreage shares | 125,304 | 3.60 | 5,224,655 | 1.50 |
| Closure fees | 0 | 0.00 | 14,122,201 | 5.57 |
| Severance/yield taxes | 0 | 0.00 | 0 | 0.00 |
| Termination taxes | 0 | 0.00 | 0 | 0.00 |
| Withdrawal taxes | 0 | 0.00 | 1,521,473 | 0.44 |
| Total Landowner Payments | $125,304 | $3.60 | $20,868,329 | $7.50 |
| Net Tax Reduction | $536,667 | $15.42 | $90,000,882 | $24.29 |
| Acres enrolled | 34,807 | | 3,487,946 | |

**TABLE 2**
**ACRES ENROLLED AND AVERAGE PROPERTY TAX ON FOREST LAND, 1960-2023**

| Year | Acres Enrolled | | | | Average Net Property Tax per Acre of Taxable Forest Land |
|---|---|---|---|---|---|

Tax per Acre Source: Calculated by DOR for land in the "forest" class.

# REAL ESTATE TRANSFER FEE

**Introduction**

The real estate transfer fee was enacted in 1969 after the federal documentary transfer tax was repealed. The fee applies to transfers (conveyances) of real estate ownership interests in Wisconsin that are not excluded or exempted by statute. The fee is imposed at a rate of $0.30 for each $100 of value or fraction thereof. For most conveyances, value is the full consideration paid for the property, including any assumed liens on the property. On conveyances that are gifts or for nominal consideration, value is the estimated price the property could have sold for if it been sold on the open market. The seller (grantor) of the property is responsible for paying the fee.

The transfer values reported on real estate transfer fee returns are the main source of information used by the Department of Revenue (DOR) for estimating changes in the fair market value of real property in the state. The department uses this information in the annual determination of sales/assessment ratios and equalized values for each municipality in Wisconsin.

**Collections**

The fee is paid to the county register of deeds when the transfer is recorded; however, the fee on land contracts is paid when the contract is recorded. Completion of a real estate transfer return and payment of the fee is normally required before the county register of deeds records the transaction. Every month, each register of deeds transfers 80 percent of fee collections to DOR. Total fees reported on real estate transfer fees filed in FY24 were about $118.4 million, of which about $94.7 million was paid to the state and about $23.7 million retained by counties.

**Analysis of Exemptions**

Beginning on July 1, 2009, electronic filing of real estate transfer returns has been required. Except for taxpayer identification numbers, the information reported on these returns is kept in a database that can be accessed on the DOR website. The state revenue losses reported below were based on data from transfer fee returns registered between July 1, 2023, and June 30, 2024 (state fiscal year 2023-24), on which an exemption was claimed. Of the 212,180 transfer fee returns filed in this period, there were 92,560, or 43.62 percent, on which an exemption from the fee was claimed.

If an exemption is claimed on a real estate transfer fee return, the specific subsection of sec. 77.25, Wis. Stats., which grants the exemption, must be indicated on the return, with a few exceptions. This number was used as the basis for the analysis in this report. Returns which claimed the exemption for real estate valued at $1,000 or less were reviewed so that all reported values in excess of $1,000 were reduced to $1,000.

An estimate of the revenue loss for some exemptions may be understated. This occurs because some property conveyances did not require that a transfer fee return be filed, and some conveyances can be made without declaring a property value. The discussion of the exemptions will note when this understatement could occur.

The fiscal effects shown below are for the portion of the 80 percent of the real estate transfer fee that is paid to the state. The effect on county revenues is one-fourth of the state fiscal effect.

| ***Exemptions*** | ***FY24 Fiscal Effect*** |
|---|---|
| **Easements, s. 77.21(1)** | **Not Available** |

Easements are excluded from the definition of conveyances subject to the real estate transfer fee. No real estate transfer fee return is therefore required for transfers of easements.

| | |
|---|---|
| **Leases for Less than 99 Years, s. 77.21(1)** | **Not Available** |

Leases for less than 99 years are excluded from the definition of conveyances subject to the real estate transfer fee. No real estate transfer fee return is therefore required for leases of less than 99 years.

| | |
|---|---|
| **Conveyances Prior to October 1, 1969, s. 77.25(1)** | **$200** |

Conveyances made prior to October 1, 1969, the date the fee went into effect, are exempt from the fee. Conveyances under this exemption are not required to file a return; therefore, the estimated costs may be understated.

| | |
|---|---|
| **Conveyances by Government Bodies, s. 77.25(2)** | **$738,000** |

Conveyances from the United States, the State of Wisconsin, or from an instrumentality, agency or subdivision of either, are exempt from the fee.

| | |
|---|---|
| **Conveyances by Gift to Governments, s. 77.25(2g)** | **$57,700** |

Conveyances by gift to the United States, the State of Wisconsin, or to an instrumentality, agency or subdivision of either, are exempt from the fee.

| | |
|---|---|
| **Conveyances to Governments for Land Dedications or Highways, s. 77.25(2r)** | **$44,700** |

Conveyances of land by sale or dedication under sec. 236.29(1) or (2), Wis. Stats., or sec. 236.34(1m)(e), Wis. Stats., or for the purpose of a road, street or highway, to the United States, the State of Wisconsin, or any instrumentality, agency or subdivision of either, is exempt from the fee. These conveyances are also exempt from filing a transfer fee return. The fiscal effect may therefore be understated.

| | |
|---|---|
| **Conveyances to Confirm, Correct or Reform a Prior Conveyance, s. 77.25(3)** | **$5,957,400** |

Conveyances that confirm, correct or reform a previously recorded conveyance are exempt from the fee if the new conveyance is made for no, nominal or inadequate consideration.

| | |
|---|---|
| **Conveyances on Sales for Delinquent Taxes, s. 77.25(4)** | **$61,400** |

Conveyances on sales for delinquent taxes or assessments are exempt from the fee.

| | |
|---|---|
| **Conveyances on Partition, s. 77.25(5)** | **$177,400** |

Conveyances on partition of real estate that belongs to several persons as co-owners to those persons are exempt from the fee.

| | |
|---|---|
| **Conveyances Pursuant to Mergers of Corporations, s. 77.25(6)** | **$198,500** |

Conveyances pursuant to mergers of corporations are exempt from the fee.

| | |
|---|---|
| **Conveyances Pursuant to Partnerships Registering as Limited Liability Partnerships, s. 77.25(6d)** | **$7,900** |

Conveyances pursuant to partnerships reorganizing as limited liability partnerships are exempt from the fee.

| | |
|---|---|
| **Conveyances Pursuant to Conversion of Ownership Form with No Change in Ownership Interest, s. 77.25(6m)** | **$122,200** |

Conveyances pursuant to the conversion of a business entity to another form of business entity under secs. 178.1141, 179.1141, 180.1161, 181.1161 or 183.1041, Wis. Stats., if, after the conversion, the

ownership interests in the new entity are identical with the ownership interests in the original entity immediately preceding the conversion.

| | |
|---|---|
| **Conveyances by a Domestic Partnership Interest Exchange, ss. 178.1131 and 77.25(6q)** | **$48,700** |

Conveyances by a domestic partnership who may acquire all of one or more classes or series of interests of another domestic or foreign entity.

| | |
|---|---|
| **Conveyances by a Domestication, ss. 178.1151 and 77.25(6t)** | **$3,000** |

Conveyances by a domestic partnership who may domesticate as a non-United States entity subject to non-United States governing law while continuing to be a domestic partnership. A non-United States entity may domesticate as a domestic partnership subject to this chapter while continuing to be an entity subject to its non-United States governing law.

| | |
|---|---|
| **Conveyances by Subsidiary Corporation to Parent, s. 77.25(7)** | **$137,700** |

Conveyances by a subsidiary corporation to its parent corporation for no consideration, nominal consideration, or in sole consideration of cancellation, surrender or transfer of capital stock are exempt from the fee.

| | |
|---|---|
| **Conveyances Between Parents and Their Children, s. 77.25(8)** | **$3,593,000** |

Conveyances between parent and child, stepparent and stepchild, and parent and son-in-law or daughter-in-law for nominal or no consideration are exempt from the fee.

| | |
|---|---|
| **Conveyances Between Husband and Wife, s. 77.25(8m)** | **$6,644,600** |

Conveyances between a husband and wife are exempt from the fee.

| | |
|---|---|
| **Conveyances Between Registered Domestic Partners, s. 77.25(8n)** | **$55,500** |

Conveyances between an individual and his or her domestic partner under Chapter 770, Wis. Stats., are exempt from the fee.

| | |
|---|---|
| **Conveyances Between Agent and Principal, s. 77.25(9)** | **$3,306,800** |

Conveyances between agent and principal or from a trustee to a beneficiary without actual consideration are exempt from the fee.

| | |
|---|---|
| **Conveyances to Provide or Release Security for a Debt or Obligation, s. 77.25(10)** | **$133,700** |

Conveyances to provide security or release security for a debt or obligation are exempt from the fee. However, for original land contracts filed before August 1, 1992, a transfer fee will be assessed when the documents relating to fulfillment of the land contract are filed.

| | |
|---|---|
| **Conveyances to Designate Time of Death Beneficiaries, s. 77.25(10m)** | **$420,300** |

Conveyances for sole purpose of designating a time of death beneficiary under sec. 705.15, Wis. Stats., are exempt from the fee. Conveyances under this exemption are not required to file a return; therefore, the exemption costs may be understated.

| | |
|---|---|
| **Conveyances by Will, Descent or Survivorship, s. 77.25(11)** | **$9,300,000** |

Conveyances by will, descent or survivorship are exempt from the fee.

| | |
|---|---|
| **Conveyances by Nonprobate Transfer on Death, s. 77.25(11m)** | **$2,362,100** |

Conveyances by nonprobate transfer on death under s. 705.15, Wis. Stats., are exempt from the fee.

| | |
|---|---|
| **Conveyances on Condemnation, s. 77.25(12)** | **$19,000** |

Conveyances pursuant to or in lieu of condemnation are exempt from the fee.

| | |
|---|---|
| **Conveyances of Real Estate Valued at $1,000 or Less, s. 77.25(13)** | **$2,200** |

Conveyances of real estate having a value of $1,000 or less are exempt from the fee. Previously, the exemption applied to transfers of real estate having a value of $100 or less.

| | |
|---|---|
| **Conveyances by or in Lieu of Foreclosure, s. 77.25(14)** | **$489,300** |

Conveyances under a foreclosure or a deed in lieu of a foreclosure to a person holding a mortgage or to a seller under a land contract are exempt from the fee.

| | |
|---|---|
| **Conveyances Between a Family-Owned Corporation and Its Shareholders, s. 77.25(15)** | **$220,300** |

Conveyances between a corporation and its shareholders are exempt from the fee if: (a) all of the stock in the corporation is owned by persons who are related to each other as spouses, lineal ascendants or descendants, siblings (by blood or by adoption), or spouses of siblings; (b) if the transfer is for no consideration except the assumption of debt or stock of the corporation; and (c) if the corporation owned the property for at least three years.

| | |
|---|---|
| **Conveyances Between a Family-Owned Partnership and Its Partners, s. 77.25(15m)** | **$279,500** |

Conveyances between a partnership and one or more of its partners are exempt from the fee if: (a) all of the partners are related to each other as spouses, lineal ascendants or descendants, siblings (by blood or adoption), or spouses of siblings; and (b) if the transfer is for no consideration other than the assumption of debt or an interest in the partnership.

| | |
|---|---|
| **Conveyances Between a Family-Owned Limited Liability Partnership and Its Partners, s. 77.25(15s)** | **$4,934,500** |

Conveyances between a limited liability company and one or more of its members are exempt from the fee if: (a) all of the members are related to each other as spouses, lineal ascendants or descendants, siblings (by blood or adoption), or spouses of siblings; and (b) if transfer is for no consideration other than the assumption of debt or an interest in the limited liability company.

| | |
|---|---|
| **Conveyances to Certain Trusts, s. 77.25(16)** | **$18,458,500** |

Conveyances to a trust are exempt if a transfer from the grantor to the beneficiary of the trust would be exempt under other provisions of the real estate transfer fee law.

| | |
|---|---|
| **Conveyances in Fulfillment of Land Contract, s. 77.25(17)** | **$1,515,100** |

The recording of deeds in fulfillment of a land contract is exempt from the real estate transfer fee if the proper fee was paid when the land contract was recorded. (The fee on land contracts filed before August 1, 1992, is deferred until the contract is fulfilled. The fee on land contracts filed after July 31, 1992, is due when the contract is filed.) The intent of this provision is to prevent two fees from being imposed on the same land contract transaction. Therefore, this exemption does not reduce state revenues.

| | |
|---|---|
| **Conveyances to a Local Exposition District, s. 77.25(18)** | **$0** |

Transfers of property to a local exposition district organized under Subchapter II of Chapter 229, Wis. Stats., are exempt from the fee.

| | |
|---|---|
| **Conveyances from a Fiduciary to an Unincorporated Nonprofit Association, s. 77.25(20)** | **$9,600** |

Conveyances from a fiduciary which held property for the benefit of an unincorporated nonprofit association to the unincorporated nonprofit association in the association's own name are exempt from the fee.

| | |
|---|---|
| **Conveyances of Electric Transmission Facilities and Land Rights, s. 77.25(21)** | **$0** |

Conveyances of transmission facilities or land rights for transmission facilities by a utility company to a transmission company in exchange for securities in the transmission company are exempt from the real estate transfer fee.

| | |
|---|---|
| **Total FY24 Real Estate Transfer Fee Exemption Devices** | **$59,299,000** |

# TAXATION OF PUBLIC UTILITIES

**Background**

Utility company property was originally subject to local assessment and taxation. However, as their service territories expanded, accurate assessment of property in individual municipalities proved difficult. Statutory changes directed the state (via the Department of Revenue or its predecessors) to assess and tax these utility companies on a unitary basis, with some of the tax proceeds shared with the municipalities and counties where the utility property was located. Since some utility companies' property was difficult to assess, a state tax based on gross revenues was adopted instead of a tax based on property value.

Current law provides for three types of state utility taxation.

1. Gross Revenues. Electric cooperative associations; private light, heat and power companies; and municipal utility companies (for electric and gas service outside the municipality that owns the utility) are subject to gross revenues taxes of 0.97 percent on gas revenue, 1.59 percent on wholesale electric revenue; and 3.19 percent on all other revenue.

2. Ad Valorem – Unit Value. Airlines, conservation and regulation companies, municipal electric association projects, pipelines, and railroads are taxed at the state average net property tax rate on the portion of their unit value allocated to Wisconsin.

3. Ad Valorem – Tangible Property Value. Telephone companies are taxed at the net property tax rate in the municipality where the property is located.

A utility company subject to state utility taxes is exempt from local property taxes except for certain special assessments. A private utility providing retail services whose customers and property are in only one municipality is subject to local property taxes instead of the state taxes. A private utility engaged primarily in wholesale electric sales is subject to local taxation if its generating capacity is less than 50 megawatts (MW); if the company's generating capacity is 50 MW or more, the company is subject to state gross revenues taxes.

Total state utility tax collections in FY24 were $439.3 million. Taxes on railroads and airlines, totaling $39.8 million, were deposited in the transportation fund. The remaining $399.5 million was deposited in the state general fund and accounted for 1.9 percent of general fund tax revenues. Table 1 shows utility tax collections in FY24 for gross revenues and ad valorem taxpayers.

**TABLE 1**
**FY24 UTILITY TAX COLLECTIONS**

| Utility by Tax Type | Collections |
|---|---|
| **Gross Revenues** | |
| Electric Cooperative Associations | 14,316,700 |
| Municipal Light, Heat and Power | 3,380,700 |
| Private Light, Heat and Power | 273,563,000 |
| **Ad Valorem -- Unit Value** | |
| Airlines | 4,735,400 |
| Conservation and Regulation Companies | 186,700 |
| Municipal Electric Association Projects | 3,175,800 |
| Pipelines | 44,675,700 |
| Railroads | 35,037,900 |
| **Ad Valorem – Tangible Property Value** | |
| Telephone Companies | 60,226,400 |
| **TOTAL** | $439,298,300 |

The utility tax laws allow certain deductions and exclusions when their tax liabilities are calculated. These estimates are based on data as reported to the Department of Revenue on tax returns for 2024 filed by gross revenues taxpayers or annual reports for 2024 filed by ad valorem taxpayers.

| ***Gross Revenues Exemptions*** | ***FY24 Fiscal Effect*** |
|---|---|
| **Power Purchased by Private Light, Heat and Power Companies, s. 76.28(1)(d)** | **$1,066,000** |

A private light, heat and power company may deduct from its gross revenues by a certain percentage of its purchased power costs if the following conditions are met:

- 100 percent of the purchased power costs may be deducted if:
  - the company purchases more than 50 percent of the power it sells, and
  - the power is not purchased from an affiliated interest, and
  - the entity from whom the power was purchased is subject to the state gross revenues tax.
- 50 percent of the purchased power costs may be deducted if:
  - the company purchases more than 90 percent of its power and
  - the company has less than $50 million of gross revenues.

| | |
|---|---|
| **Power Purchased by Electric Cooperatives, s. 76.48(1g)(d)** | **$8,051,000** |

An electric cooperative that purchases more than 50 percent of the power it sells may deduct 100 percent of the cost of its purchased power if one of the following conditions is met:

- The entity from whom the power was purchased is subject to the state gross revenues tax, or
- More than 50 percent of the power sold in 1987 was purchased from a seller located outside Wisconsin.

| | |
|---|---|
| **Public Benefits Charges, ss. 76.28(1)(d) and 76.48(1g)(d)** | **$16,000** |

Most electric and gas utilities must charge their customers a state-mandated fee for public benefits such as low-income energy assistance, energy conservation programs and renewable energy programs. These fees are excluded from the definition of gross revenues subject to the gross revenues tax. Since the fee is effectively a state revenue, the exclusion does not reduce state revenues.

Some electric cooperatives and municipal light, heat and power companies provide their own public benefits programs funded through fees on their customers' bills. These public benefits charges are excluded from the revenues subject to the gross revenues tax. The revenue loss shown here is only for those companies that operate their own public benefits program.

| | |
|---|---|
| **Transmission Company Revenues from Utilities Subject to State Utility Taxation, s. 76.28(1)(d)** | **$16,657,000** |

When determining its gross revenues, an electric transmission company may exclude revenues for services provided to: (1) electric cooperatives organized under Wisconsin law that provide wholesale service to their members; (2) municipal light, heat and power companies based in Wisconsin; and (3) private light, heat and power companies which are subject to the state's gross revenues tax.

**Ad Valorem Exemptions**

| | |
|---|---|
| **Hub Airlines, s. 76.074(1)(b)** | **$0** |

An airline is deemed a "hub airline" if, in the prior year, it: (1) operated at least 45 common carrier flights each weekday to at least 15 nonstop destinations from a single airport in Wisconsin; or (2) it was headquartered in Wisconsin and operated, from one or more Wisconsin airports, at least 20 common

carrier flights each weekday. A hub airline is exempt from both the state ad valorem tax on airlines and local property taxes. None of the airlines currently operating in Wisconsin qualifies as a hub airline.

| **Motor Vehicles – Generally, s. 76.025(1)** | **$0** |
|---|---|

Motor vehicles including automobiles, trucks and trailers owned by airline, pipeline, railroad, or conservation and regulation companies are exempt, except for state vehicle registration fees, from the ad valorem utility tax. Since this is how licensed motor vehicles are taxed for all owners of such property, the exemption effectively has no fiscal effect.

| **Motor Vehicles – Telephone Companies, s. 76.28(1)(d)** | **$0** |
|---|---|

Motor vehicles including automobiles, trucks and trailers owned by a telephone company are subject to state vehicle registration fees and exempt from the telephone company ad valorem tax. Since this is how licensed motor vehicles are taxed for all owners of such property, the exemption effectively has no fiscal effect.

| **Treatment Plant and Pollution Abatement Equipment – Generally, s. 76.025(1)** | **Not Available** |
|---|---|

Waste treatment property owned by an airline, pipeline, railroad, or conservation and regulation company and used to abate or eliminate the pollution of the state's water or air is exempt from the ad valorem utility tax. Since data on such property is infrequently reported and the reporting schedule is difficult to audit, information on the potential loss in state ad valorem taxes is not available.

| **Treatment Plant and Pollution Abatement Equipment – Telephone Companies, s. 76.81** | **$0** |
|---|---|

Waste treatment property owned by a telephone company and used to abate or eliminate the pollution of the state's water or air is exempt from the ad valorem utility tax. Telephone companies reported no such property was owned or leased in the most current year.

| **Computers, Fax Machines and Cash Registers – Generally, s. 76.025(1)** | **Not Available** |
|---|---|

Computers, fax machines (excluding machines that are also copiers) and cash registers that are owned by airline, pipeline, railroad, or conservation and regulation companies are exempt from the ad valorem tax. Since data on such property is infrequently reported and the reporting schedule is difficult to audit, information on the potential loss in state ad valorem taxes is not available.

| **Computers, Fax Machines and Cash Registers –Telephone Companies, s. 76.81** | **Not Available** |
|---|---|

Computers, fax machines (excluding machines that are also copiers) and cash registers that are owned by a telephone company are exempt from the ad valorem tax. Although the annual report filed by telephone companies with the Department of Revenue (DOR) contains a line for "exempt computers, software, and faxes," the data are not entered into any data retrieval system. Thus, it is not possible to estimate the effect of this exemption.

| **Telephone Company Property Used Less Than 50% for Telephone Purposes, ss. 70.112(4)(b) and 76.81** | **Not Available** |
|---|---|

If a property is used, in part, by a telephone company, and the telephone company uses 50 percent or more of the property, the property is subject to the telephone property tax and exempt from local property taxes. However, if a property is used, in part, by a telephone company, and the telephone company uses less than 50 percent of the property, the property is exempt from the telephone property tax and subject instead to local property taxes. Since telephone company reports filed with DOR do not include information on this type of property, an estimate of the effect of the exemption is not available.

| | |
|---|---|
| **Telephone Company Property Used for Rural Broadband, ss. 76.80 and 76.81** | **$19,161,500** |

Qualified broadband service property is installed in a rural and underserved area without at least two wired providers. The service property is used to provide internet access service to the rural area at actual speeds that are at least a download speed of 25 megabits per second and an upload speed of 3 megabits per second or the download and upload speed benchmark under 47 USC 1302(B). Broadband property installed after January 1, 2019, is exempt as of January 1, 2021. Broadband property installed prior to January 1, 2020, is exempt as of January 1, 2025.

| | |
|---|---|
| **Car Line Taxes, s. 76.39** | **$400,000** |

2023 Wisconsin Act 12 exempted all personal property beginning with January 1, 2024, property tax assessments. Furthermore, the federal Railroad Revitalization and Regulatory Act of 1976, 49 USC 11501(B)(4) (4-R Act) restricts the ability of state and local governments to levy discriminatory taxes on rail carriers. As a result, railroad personal property is also exempted.

# EXCISE TAXES

## Introduction

Wisconsin imposes taxes on cigarettes, tobacco products, liquor, wine and beer. The taxes on cigarettes and tobacco products are excise taxes imposed on distributors. Taxes on liquor, wine and beer are occupational taxes imposed on the seller for the privilege of engaging in a particular business. Under either approach, these taxes are commonly referred to as excise taxes.

The state collects additional excise taxes that are deposited in segregated funds, notably the motor vehicle fuel and alternate fuel taxes that are deposited in the transportation fund. Only general fund excise taxes listed above are discussed in this chapter.

Excise taxes contributed $617.8 million to the state general fund tax collections in FY24 (2.98 percent of all general fund tax collections). Table 1 below shows FY24 tax revenue collections from each general fund excise tax. The cigarette tax dominates excise tax collections, providing $482.44 million or 73 percent of FY24 total general fund excise tax collections.

**Table 1**
**General Fund Excise Tax Collections**

| Tax Type | Tax Rates as of January 1, 2024 | FY24 Excise Tax Revenues | |
|---|---|---|---|
| | | ($ millions) | % |
| Cigarettes | $2.52 Per 20-Pack | 402.7 | 70.4% |
| Tobacco | 71% of manufacturer's established list price to distributors | 5.2 | 0.9% |
| Moist Snuff | 100% of manufacturer's established list price to distributors | 63.8 | 11.2% |
| Cigars | Lesser of 71% of manufacturer's established list price to distributors or $0.50 per cigar | 16.6 | 2.9% |
| Vapor Products | $0.05/mL | 7.1 | 1.2% |
| Beer | $2.00 per 31-gallon barrel ($0.065/gallon) | 8.0 | 1.4% |
| Distilled Spirits | $0.8586 per liter ($3.25/gallon) | 64.5 | 11.3% |
| Wine and Cider<br>- up to 14% alcohol<br>- 14% to 21% alcohol<br>Apple and Pear Cider<br>- less than 7% alcohol | <br>$0.06605 per liter ($0.25/gallon)<br>$0.1189 per liter ($0.45/gallon)<br><br>$0.0171 per liter ($0.065/gallon) | 3.8 | 0.7% |
| Total Excise Taxes | | 571.8 | 100.0% |

Over the years, the state has enacted certain discounts, exemptions and refunds of taxes paid on cigarettes, tobacco products, liquor, wine and beer. The estimated state revenue foregone or state expenditures in FY24 because of these discounts, exemptions and refunds are presented in this chapter for those provisions where information is available to construct a fiscal estimate. No estimates are provided in cases where the state is precluded by federal law from imposing a tax (interstate commerce, purchases by the federal government, and purchases by U.S. armed forces members on military installations).

## Cigarettes

Wisconsin law defines cigarettes as any roll of tobacco, which is wrapped in paper, or any substance other than tobacco.

The cigarette tax was first imposed in 1939, as an emergency tax, at a rate of $0.02 per pack. The tax was increased to $0.03 per pack in 1949 and was made permanent that year. Over the years, the tax rate

increased periodically. More recently, the cigarette tax increased by $1.00 per pack, from $0.77 to $1.77, effective January 1, 2008. On September 1, 2009, the tax rate was further increased an additional 75 cents per pack, to $2.52 per pack.

In addition to excise tax paid on a pack of cigarettes, following each tax rate increase an inventory tax is imposed, and paid by all permittees and retailers who possess stamped cigarettes held for resale on which the cigarette tax was already paid before the increase.

The cigarette tax is paid by Wisconsin distributors (both in-state and out-of-state) who are required to purchase tax stamps from the Department of Revenue and affix the stamps to cigarette packs. Distributors may affix Wisconsin tax stamps only to cigarettes purchased directly from manufacturers approved by the department, which appear in good standing on the Attorney General's Directory of Certified Manufacturers and Brands. In addition, persons other than cigarette distributors who bring untaxed cigarettes into Wisconsin must pay the cigarette use tax (at the same tax rate as the in-state cigarette tax rate).

| ***Cigarettes Tax Discounts, Exemptions and Refunds*** | ***FY24 Fiscal Effect*** |
|---|---|
| **Distributors Discount, s. 139.32(5)** | **$4,571,577** |

Manufacturers, bonded direct marketers and distributors who are authorized by the department to purchase tax stamps receive a discount of 0.8 percent of the tax paid on stamp purchases.

| | |
|---|---|
| **Cigarettes Shipped to Customers in Other States, s. 139.31(3)** | **Not Available** |

Cigarettes shipped via interstate commerce to customers in other states, for sale outside of Wisconsin are exempt from tax.

| | |
|---|---|
| **Cigarettes Sold to the Armed Forces and Veterans Hospitals, s. 139.31(3)** | **Not Available** |

Cigarettes sold to post exchanges of the armed forces of the United States and to federally operated veterans hospitals in this state are exempt from tax.

| | |
|---|---|
| **Cigarettes Sold to Interstate Carriers of Passengers for Hire, s. 139.31(3)** | **Not Available** |

Cigarettes sold to interstate carriers of passengers for hire to be resold to bona fide passengers being transported are exempt from tax.

| | |
|---|---|
| **Refunds for Unusable Stamps, s. 139.36 and Wis. Admin. Code TAX 9.11** | **Not Available** |

A cigarette distributor can receive a refund of the tax paid for Wisconsin stamps affixed to packs of unsalable cigarettes returned to the manufacturer. Distributors going out of business or selling their business may receive a refund of the tax paid for Wisconsin stamps not affixed to packs of cigarettes.

| | |
|---|---|
| **Refunds to Indian Tribes for Cigarettes, ss. 139.325 and 139.323** | **$22,458,475** |

Native American tribal councils that have entered into agreements with the State of Wisconsin are eligible for two refunds on cigarette tax collected. Jointly, these two refunds essentially return 100 percent of the cigarette tax paid by tribal members residing on tribal lands. The refunds are comprised of:

- A monthly 70 percent refund of the cigarette tax paid on cigarettes sold by authorized Native American retailers on reservation trust land over which a tribe has jurisdiction. The land must have been designated a reservation or trust land on or before January 1, 1983, or on a later date as determined by an agreement between the Department of Revenue and the tribal council. FY24: $21,996,420
- A quarterly 30 percent refund of the cigarette tax paid on cigarettes sold on reservations to enrolled members of the tribe residing on the reservation. FY24: $462,055

**Tobacco and Vapor Products**

Wisconsin law defines tobacco products as cigars; cheroots; granulated, plug cut and other smoking tobacco; snuff; chewing tobacco; clippings; and other forms of tobacco prepared in such a manner as to be suitable for chewing or smoking in a pipe or otherwise. The definition includes tobacco that is used for "roll your own" cigarettes, but it does not include cigarettes. The definition of moist snuff includes any finely cut, ground, or powdered smokeless tobacco that is intended to be placed or dipped in the mouth.

The excise tax on tobacco products was first imposed on October 1, 1981, at the rate of 20 percent. On December 1, 1999, the tobacco products tax was changed from an occupational tax to an excise tax (1999 Wisconsin Act 9) and on October 1, 2001, the tax rate was raised to 25 percent.

Effective January 1, 2008, the tobacco products tax on all tobacco, other than moist snuff, increased from 25 percent of the manufacturer's list price to 50 percent of the list price, and then further increased to 71 percent of manufacturer's established list price beginning on September 1, 2009. Beginning January 1, 2008, a cap of 50 cents was also established as the maximum tax per cigar.

The taxation of moist snuff was converted to a weight-based tax effective January 1, 2008, but returned to a price-based tax (at 100 percent of the manufacturer's established list price) effective September 1, 2009.

Effective October 1, 2019, Wisconsin law imposes an excise tax on vapor products received by distributors in Wisconsin. As defined in sec. 139.75(14), Wis. Stats., "vapor product" means a noncombustible product that produces vapor or aerosol for inhalation from the application of a heating element to a liquid or other substance that is depleted as the product is used, regardless of whether the liquid or substance contains nicotine.

Table 2 below shows collections for all other tobacco and vapor products.

**Table 2**
**OTHER TOBACCO AND VAPOR PRODUCTS COLLECTIONS**

| Tax Type | Tax Rates as of January 1, 2024 | FY24 Excise Tax Revenues | |
|---|---|---|---|
| | | ($ millions) | % |
| Tobacco | 71% of manufacturer's established list price to distributors | 5.2 | 5.6% |
| Moist Snuff | 100% of manufacturer's established list price to distributors | 63.8 | 68.8% |
| Cigars | Lesser of 71% of manufacturer's established list price to distributors or $0.50 per cigar | 16.6 | 17.9% |
| Vapor Products | $0.05/mL | 7.1 | 7.7% |
| Total Excise Taxes | | 92.8 | 100.0% |

| *Tobacco Products Tax Discounts, Exemptions and Refunds* | *FY24 Fiscal Effect* |
|---|---|
| **Tobacco Products Shipped to Customers in Other States, s. 139.76(2)** | **Not Available** |

Tobacco products shipped via interstate commerce to customers in other states for sale outside Wisconsin are exempt from tax.

| | |
|---|---|
| **Tobacco Products Sold to the Armed Forces and Veterans Hospitals, s. 139.76(2)** | **Not Available** |

Tobacco products sold to the armed forces (e.g., Fort McCoy) or state or federally operated veterans' hospitals are exempt from tax.

| | |
|---|---|
| **Tobacco Products Sold to Interstate Carriers of Passengers for Hire, s. 139.76(2)** | **Not Available** |

Tobacco products sold to interstate carriers of passengers for hire to be resold to bona fide passengers being transported are exempt from tax.

| | |
|---|---|
| **Credit for Tobacco Products Returned to the Manufacturer and/or Short Shipments, s. 139.80** | **Not Available** |

A licensed tobacco products distributor can receive a refund or credit when tobacco products are shipped to customers outside Wisconsin, returned to the manufacturer and/or short shipments, or destroyed due to damage or becoming unfit for sale.

| | |
|---|---|
| **Refunds to Indian Tribes for Tobacco Products, ss. 139.803 and 139.805** | **$1,459,263** |

Native American tribal councils that have entered into agreements with the Department of Revenue are eligible for two refunds. Jointly, these two refunds essentially return 100 percent of the tobacco tax paid by tribal members residing on tribal lands. The refunds are comprised of:

- A quarterly 50 percent refund of the tobacco products tax paid on tobacco products sold on reservations to enrolled members of the tribe residing on the reservation. FY24: $140,385
- A monthly 50 percent refund of the tobacco products tax paid on tobacco products sold by authorized Native American retailers on reservation trust land over which a tribe has jurisdiction. The land must have been designated a reservation or trust land on or before January 1, 1983, or on a later date as determined by an agreement between the department and the tribal council. FY24: $1,318,878

**Distilled Spirits, Cider and Wine**

Wisconsin defines distilled spirits as any beverage (except beer) made by a distillation process from agricultural grains, fruits and sugars, containing 0.5 percent or more of alcohol by volume. Wine is defined as any beverage (except beer) made by a fermentation process from agricultural products, fruits, and sugars, containing 0.5 percent or more of alcohol by volume. It includes cider containing more than 7 percent alcohol by volume.

Cider is defined as any beverage obtained from the fermentation of the juice of apples, containing not less than 0.5 percent alcohol by volume and not more than 7 percent alcohol by volume. Cider can be flavored, sparkling, or carbonated. Cider containing more than 7 percent alcohol by volume is taxed as wine.

Wisconsin imposes an occupational tax on the sale of both distilled spirits and wine. The tax was imposed at the end of Prohibition and modified several times. The current tax rates have been in place since 1981 (except for the tax on cider, which was established in 1998). Current tax rates are: $0.06605 per liter ($0.25 per gallon) for wine containing up to 14 percent alcohol; $0.1189 per liter ($0.45 per gallon) for wine containing 14 percent to 21 percent alcohol; and $0.8586 per liter ($3.25 per gallon) for distilled spirits and

wine containing over 21 percent alcohol. The rates were converted from per gallon to per liter amounts in 1985. The tax on cider is $0.0171 per liter ($0.07 per gallon). Collections on alcoholic beverages (distilled spirits, wine, cider and beer) are shown in Table 3.

**Table 3**
**ALCOHOLIC BEVERAGE COLLECTIONS**

| Tax Type | Tax Rates as of January 1, 2024 | FY24 Excise Tax Revenues | |
|---|---|---|---|
| | | ($ millions) | % |
| Beer | $2.00 per 31-gallon barrel ($0.065/gallon) | 8.0 | 10.5% |
| Distilled Spirits | $0.8586 per liter ($3.25/gallon) | 64.5 | 84.5% |
| Wine and Cider<br>- up to 14% alcohol<br>- 14% to 21% alcohol<br>Apple and Pear Cider<br>- less than 7% alcohol | <br>$0.06605 per liter ($0.25/gallon)<br>$0.1189 per liter ($0.45/gallon)<br><br>$0.0171 per liter ($0.065/gallon) | 3.8 | 5.0% |
| Total Excise Taxes | | $76.3 | 100% |

When a liquor tax rate increases, an inventory tax is imposed on all liquor permittees and retailers who are in possession of any liquor held for resale on which tax has been paid.

Liquor, wine and cider taxes contributed $68.3 million to the state's general fund during FY24.

The distilled spirits, cider and wine taxes are remitted to the department with a monthly return. In addition to the liquor tax, distributors pay the Department of Revenue an administrative fee of $0.11 per gallon on liquor containing 0.5 percent or more alcohol by volume.

| ***Distilled Spirits, Cider and Wine Exemptions and Refunds*** | ***FY24 Fiscal Effect*** |
|---|---|
| **Wine or Cider Made at Home, s. 139.04(1)** | **Not Available** |

Wine or cider made at home, for consumption at home without compensation is not subject to tax.

| | |
|---|---|
| **Liquor Between Manufacturers, Rectifiers and Wineries, s. 139.04(4)** | **Not Available** |

The sale or shipment of liquor in bulk between manufacturers, rectifiers and wineries is not subject to tax.

| | |
|---|---|
| **Intoxicating Liquor Shipped Out of the State, s. 139.04(5)** | **Not Available** |

Intoxicating liquor for shipment in interstate or foreign commerce is not subject to tax.

| | |
|---|---|
| **Wine Sold for Sacramental Purposes, s. 139.04(6)** | **Not Available** |

Wine for sacramental purposes is not subject to tax.

| | |
|---|---|
| **Alcohol Sold for Non-Consumption Purposes, ss. 139.04(7), 139.04(8) and 139.04(9)** | **Not Available** |

The Wisconsin liquor tax is not imposed upon alcohol sold to industrial permittees used for industrial purposes, alcohol sold to medicinal permittees used for hospital or medicinal purposes, or wine sold to industrial wine permittees used for industrial purposes.

| | |
|---|---|
| **Liquor Tax Refunds, s. 139.10** | **Not Available** |

Taxes paid on the alcohol may be refunded for intoxicating liquor that is spoiled or unfit to drink, liquor

supplied to hospitals for medicinal purposes, or alcohol supplied to institutions of learning or museums for nonbeverage purposes.

**Fermented Malt Beverages**

In the following discussion, the term "beer" is used in place of "fermented malt beverages," which is the term defined under Wisconsin law. “Fermented malt beverages" is defined as any beverage made by the alcohol fermentation in water of barley malt and hops, with or without grains and sugar, containing 0.5 percent or more of alcohol by volume.

Wisconsin imposes an occupational tax on the sale of beer at the rate of $2.00 per 31-gallon barrel. The tax was first imposed in 1933 at the rate of $1.00 per barrel. The only increase in the tax occurred when it was raised to its current rate of $2.00 per barrel beginning on November 1, 1969. There is no inventory tax on beer if the tax rate were to change.

| ***Fermented Malt Beverage Credits, Exemptions and Refunds*** | ***FY24 Fiscal Effect*** |
|---|---|
| **Beer Made at Home, s. 139.04(1)** | **Not Available** |

Beer made at home for consumption at home without compensation is not subject to tax.

| | |
|---|---|
| **Brewery and Brewpub Employees, s. 139.04(2)** | **Not Available** |

Beer furnished by a brewer or brewpub of fermented malt beverages to workers employed in the brewery or brewpub for consumption on the brewery premises or brewpub premises without charge is not subject to tax.

| | |
|---|---|
| **Beer that Contains Less Than 0.5% Alcohol by Volume, s. 139.04(3)** | **Not Available** |

The manufacture or sale of any beverage containing less than one-half of 1 percent of alcohol by volume is not subject to tax.

| | |
|---|---|
| **Beer Sold by a Brewer to a Bottler, s. 139.04(4)** | **Not Available** |

The sale or shipment of fermented malt beverages by a brewer to a bottler is not subject to tax.

| | |
|---|---|
| **Beer Shipped Out of the State, s. 139.04(5)** | **Not Available** |

Beer produced for shipment in interstate or foreign commerce is not subject to tax.

| | |
|---|---|
| **Beer Sold for Industrial Purposes, s. 139.04(7m)** | **Not Available** |

Beer sold to industrial permittees used for industrial purposes is not subject to tax.

| | |
|---|---|
| **Beer Tax Refunds, s. 139.10** | **Not Available** |

Taxes paid on beer may be refunded for whole cases or full kegs of beer that are spoiled or unfit to drink, beer sold to the U.S. armed forces, or alcohol supplied to institutions of learning or museums for nonbeverage purposes.

Table 4 below provides a list of estimates for the exemption devices described in this chapter.

MEMORANDUM

TO: JOINT REVENUE COMMITTEE

FROM: TERRI LUCERO, ADMINISTRATOR, EXCISE TAX DIVISION

DATE: SEPTEMBER 22, 2021

SUBJECT: MODERNIZATION OF SALES TAX – TAXATION OF SERVICES

---

The estimates on the attached spreadsheet are based on information of tax collections on services from the state of South Dakota adjusted for Wyoming's population. The spreadsheet also includes estimates of tax collection, assuming the repeal of the manufacturing machinery exemption and the data center exemption.

## Enhancing Revenues
## Broadening the State Sales Tax

| | Taxable Sales FY21 | Conversion to Wyoming Sales at 65% of South Dakota's population | Potential revenue at average statewide rate of 5.35% | State General Fund Revenue | Local Government Revenue |
|---|---|---|---|---|---|
| **Agricultural Services** | | | | | |
| | | | | | |
| Veterinary Services, Specialities | $ 78,582,331 | $ 51,408,561 | $ 2,750,358 | $ 1,408,347 | $ 1,342,011 |
| Landscape Counseling & Planning | $ 7,345,941 | $ 4,805,715 | $ 257,106 | $ 131,653 | $ 125,452 |
| Lawn and Garden Services | $ 99,417,179 | $ 65,038,719 | $ 3,479,571 | $ 1,781,747 | $ 1,697,824 |
| Total | $ 185,345,451 | $ 121,252,994 | $ 6,487,035 | $ 3,321,747 | $ 3,165,288 |
| | | | | | |
| **Business Services** | | | | | |
| | | | | | |

**Enhancing Revenues**
**Broadening the State Sales Tax**

*South Dakota's reported taxable sales come from their "State Taxable Sales by SIC Code" as found on their website.
**These are currently items that are not being taxed in Wyoming - either nontaxable or exempt.
Nontaxable means there is no imposition statute; exempt means it was originally taxable, but the legislature has decided to exempt it (for a variety of reasons)
**Note: This comparison only includes services that are available on the South Dakota website. To the best of my knowledge, it does not include exempt sales of tangible personal property.**

## Overview

Original House Bill No. HB0097 (Enrolled Act No. 59) was signed into law by Governor Gordon into law on February 26, 2019. This act relates to taxation and revenue and provides for a sales and use tax exemption for the purchases of equipment used to provide broadband internet services in unserved areas. The act provides for a reporting requirement and an effective date of July 1, 2019. The broadband internet services equipment purchases exemption is located within the "economic incentive" group of sales and use tax exemptions in the Wyoming statutes [W.S. 39-15-105(a)(viii) and W.S. 39-16-105(a)(viii)]. This exemption has a sunset date of July 1, 2024.

The exemption is provided to broadband internet service providers and is for the purchase of equipment used to provide broadband internet services in unserved areas. "Unserved areas" is defined in W.S. 9-12-1501(e) as "an area in which there exists no fixed terrestrial broadband service, or in which the maximum fixed terrestrial broadband speed available:

(i) To residential customers is at speeds less than twenty-five (25) megabits per second download and three (3) megabits per second upload;
(ii) To a business corridor within a municipality:
    (A) With a population of less than two thousand (2,000), is twenty-five (25) megabits per second download and three (3) megabits per second upload;
    (B) With a population of two thousand (2,000) or more, is fifty (50) megabits per second download and five (5) megabits per second upload.
(iii) To a business corridor in an unincorporated area of a county, is twenty-five (25) megabits per second download and three (3) megabits per second upload."

## Specific Reporting Requirements by Statute

Wyo. Stat. Ann. § 39-15-105(b)

> "The Wyoming business council, the department of workforce services and the department of revenue shall jointly report to the joint revenue interim committee on or before December 1 of each year that the exemption is in effect. If requested by the department of revenue, any person utilizing the exemption shall report to the department the amount of sales tax exempted, and the number of jobs created or impacted by the utilization of the exemption."

This report is to evaluate the cumulative effects of the exemption from initiation of the exemption and shall include:

(i) A history of employment in terms of the numbers of employees, full-time and part time employees, and rate of turnover classified by the 2007 edition, as amended, of the North American Industry Classification System (NAICS) code manufacturing section 31 -33 from information collected by the Department of Employment;
(ii) A history of wages and benefit disaggregated by gender for each job category; and
(iii) A comprehensive history of taxes paid to the state of Wyoming.

## Findings

This year represents the fourth report in a series of annual reports on the effects of this sales and use tax exemption. References to data contained in this report will be referred to as FY23 and will cover the period of July 1, 2022 through June 30, 2023.

The FY23 report is based on 12 surveys mailed on July 19, 2022 to a list of businesses obtained from the Wyoming Business Council that were identified as providers of broadband internet services. A cover letter sent with the survey informed the businesses that once completed, the response could be either mailed, submitted electronically or faxed to the Excise Tax Division for data processing. The Department attempted to contact internet providers who had not responded. The Department of Revenue received six (6) responses, of the six responses received, four of those respondents reported exempt purchases of broadband equipment and two of the respondents did not report any exempt purchases of broadband equipment. The response rate to this survey was 50%.

## Exemption Cost

Based on survey responses for FY23, there were $7,833,563.30 in exempt purchases made by the businesses surveyed. Applying the statewide sales and use tax rate average of 5.36%, this amounts to $419,878.99 in unrealized sales and use tax revenue by the State of Wyoming as a result of this exemption.

## Employment

Figure 1 Illustrates the total reported employment.

## Wages

Figure 3 details the average wage per occupational classification.

| | *FY20* | *FY21* | *FY22* | *FY23* |
|---|---|---|---|---|
| *Supervisor/Manager* | $ 43.32 | $ 42.92 | $ 39.56 | $ 50.06 |
| *Administrative Svcs* | $ 24.63 | $ 30.96 | $ 27.29 | $ 29.63 |
| *Customer Service* | $ 19.91 | $ 18.67 | $ 19.68 | $ 19.43 |
| *Skilled Labor* | $ 29.72 | $ 40.75 | $ 26.31 | $ 36.69 |
| *Unskilled Labor* | $ 21.47 | $ 26.19 | $ 26.74 | $ 23.39 |
| *Average* | $ 25.36 | $ 27.72 | $ 26.58 | $ 29.66 |

**Figure 3: Average Wage by Occupational Classification**

Figure 4, Illustrates the average annual wage per occupation classification per year.

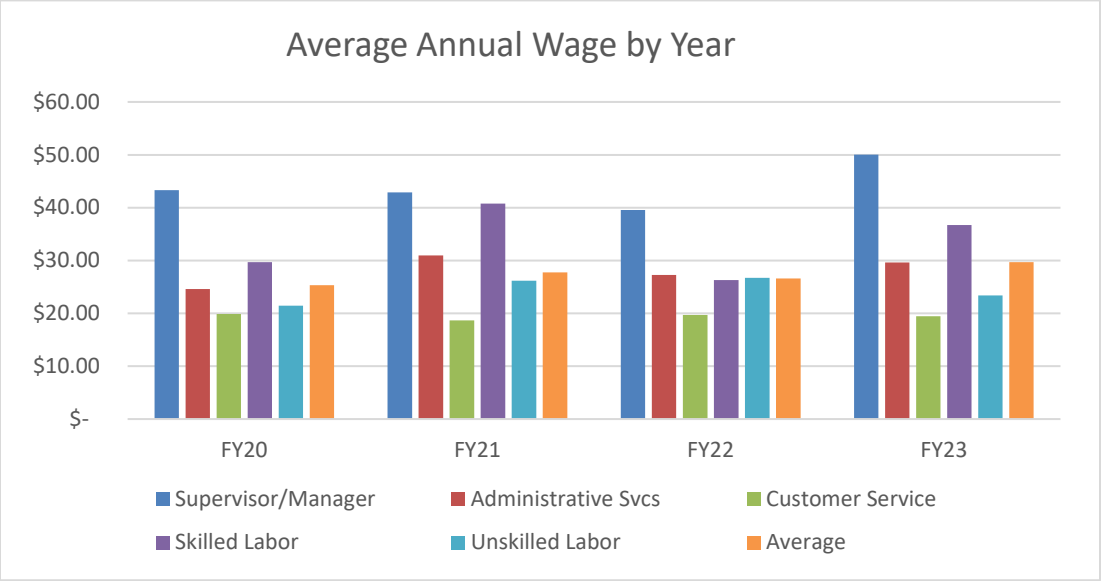

**Figure 4: Average Wage by Year**

## Benefits

Of the respondents with full-time employees residing in Wyoming, 71% offer medical insurance, 71% offer dental insurance, 71% offer vision insurance, 71% offer Prescription coverage and 71% offer a 401K program. Two of the seven respondents offered 401K program benefits to part-time employees.

## Turnover

Respondents reported varying degrees of turnover. Figure 5, illustrates the turnover rate per occupational classification as well as the average turnover rate for the year for the combined occupational classifications.

| | *FY20* | *FY21* | *FY22* | *FY23* |
|---|---|---|---|---|
| *Supervisor/Manager* | 3.80% | 7.53% | 5.22% | 9.22% |
| *Administrative Svcs* | 5.57% | 21.57% | 12.10% | 30.70% |
| *Customer Service* | 18.76% | 21.94% | 33.57% | 63.20% |
| *Skilled Labor* | 3.94% | 9.50% | 17.76% | 10.88% |
| *Unskilled Labor* | 11.14% | 37.51% | 22.06% | 14.31% |
| Average | 8.64% | 19.61% | 18.14% | 25.66% |

**Figure 5: Turnover Rate per Occupational Classification**

## Survey Process and Costs

All surveys were sent in the mail. The primary expense associated with this report is the time spent following up with the respondents, reviewing and analyzing the data received, as well as the preparation of this report. The Department estimates office personnel expended 40 to 50 hours over the course of several weeks on this specific exemption survey.

## REMI Analysis: Economic Impacts

The analyses of the economic impacts of the sales and use tax exemptions for (1) purchases of machinery and machine tools used directly and predominantly in manufacturing, for (2) purchases and rentals of qualifying computer equipment necessary for the operation of a data processing center, and for (3) purchases of equipment by a telecommunications service provider, video programming service provider, or provider of internet access used to provide broadband internet service were prepared using the Regional Economic Models, Inc. (REMI) Tax-PI model. REMI Tax-PI is the next generation Policy Insight model built exclusively for Wyoming. It is an integrated model that combines the best features of the input-output, general equilibrium, econometric, and economic geography methodologies. Tax-PI is also a dynamic rather than a static model allowing for year-by-year analysis of the total regional effects of any specific policy.

Table 3: Economic Impact of Sales & Use Tax Exemption Removal for Broadband Internet Providers

| Category | | | | | | Average |
|---|---|---|---|---|---|---|
| *(Change from Baseline)* | 2023 | 2024 | 2025 | 2026 | 2027 | 2023-2030 |
| Total Employment - Jobs | -1 | -1 | -2 | -2 | -2 | -2 |
| Population - Individuals | -1 | -1 | -1 | -2 | -2 | -2 |
| Wages and Salaries | -$0.1 | -$0.1 | -$0.1 | -$0.1 | -$0.1 | -$0.1 |
| Personal Income | -$0.1 | -$0.1 | -$0.1 | -$0.2 | -$0.2 | -$0.2 |
| Disposable Personal Income | -$0.1 | -$0.1 | -$0.1 | -$0.1 | -$0.2 | -$0.1 |
| Gross Domestic Product | -$0.1 | -$0.2 | -$0.2 | -$0.3 | -$0.3 | -$0.3 |
| Output | -$0.3 | -$0.4 | -$0.4 | -$0.5 | -$0.5 | -$0.5 |
| Sales & Use Tax Revenue | -$0.004 | -$0.004 | -$0.006 | -$0.006 | -$0.006 | -$0.005 |
| Property Tax Revenue | -$0.002 | -$0.002 | -$0.002 | -$0.002 | -$0.002 | -$0.002 |
| *Note: All dollar amounts are expressed as millions of fixed (2022) dollars.* | | | | | | |

The economic impact of the **removal of the sales tax exemption** for purchases of equipment by a telecommunications service provider, video programming service provider, or provider of internet access used to provide broadband internet service was modeled in REMI as an increase in the production costs for the telecommunications industry of $0.5 million per year beginning in 2022. This exemption removal would result in an average annual loss of 2 jobs and a decrease in GDP of $0.3 million per year over the period of 2023 to 2030 when compared to the baseline scenario (see Table 3).

**Key Definitions**

**Total Employment** comprises estimates of the number of non-farm jobs, full-time plus part-time, by place of work. Full-time and part-time jobs are counted at equal weight. Includes direct, indirect, and induced jobs.

**Population** reflects mid-year estimates of people, including survivors from the previous year, births, special populations, and three types of migrants (economic, international, and retired).

**Wages and Salaries** are the monetary remuneration of employees, including the compensation of corporate officers; commissions, tips, and bonuses; voluntary employee contributions to certain deferred compensation plans, such as 401(k) plans; and receipts in kind that represent income. Wages and salaries disbursements are affected by changes in Wage Rate and Employment.

**Personal Income** is the income that is received by all persons from all sources. It is calculated as the sum of wage and salary disbursements, supplements to wages and salaries, proprietors' income with inventory valuation and capital consumption adjustments, rental income of persons with capital consumption adjustment, personal dividend income, personal interest income, and personal current transfer receipts, less contributions for government social insurance.

**Disposable Personal Income** equals personal income minus personal taxes.

**Gross Domestic Product** or **GDP** is the market value of goods and services produced by labor and property. It is often referred to as "value added" and is equal to its gross output (sales or receipts and other operating income, plus inventory change) minus its intermediate inputs (consumption of goods and services purchased from other industries or imported).

**Output** is the amount of production, including all intermediate goods purchased as well as value-added (compensation and profit). Output can also be thought of as sales or supply or simply price multiplied by quantity (P×Q).

**Sales & Use Tax Revenue** includes the state imposed 4% tax rate and local optional taxes. The tax rate of 5.3% applied in the estimation is a population weighted county average.

**Property Tax Revenue** includes taxes from residential, commercial, industrial, and agricultural properties. The tax rate of 65 mills applied in the estimation is the statewide average.

**About the REMI PI+ Model**

The REMI PI+ model incorporates aspects of four major modeling approaches: **Input-Output**, **General Equilibrium**, **Econometric**, and **Economic Geography**. Each of these methodologies has distinct advantages as well as limitations when used alone. The REMI integrated modeling approach builds on the strengths of each of these approaches.

The REMI model at its core has the inter-industry relationships found in **Input-Output models**. As a result, the industry structure of a particular region is captured within the model, as well as transactions between industries. Changes that affect industry sectors that are highly interconnected to the rest of the economy will often have a greater economic impact than those for industries that are not closely linked to the regional economy.

**General Equilibrium** is reached when supply and demand are balanced. This tends to occur in the long run, as prices, production, consumption, imports, exports, and other changes occur to stabilize the economic system. For example, if real wages in a region rise relative to the U.S., this will tend to attract economic migrants to the region until relative real wage rates equalize. The general equilibrium properties are necessary to evaluate changes such as tax policies that may have an effect on regional prices and competitiveness.

REMI is sometimes called an "**Econometric model**," as the underlying equations and responses are estimated using advanced statistical techniques. The estimates are used to quantify the structural relationships in the model. The speed of economic responses is also estimated, since different adjustment periods will result in different policy recommendations and even different economic outcomes.

The **New Economic Geography** features represent the spatial dimension of the economy. Transportation costs and accessibility are important economic determinants of interregional trade and the productivity benefits that occur due to industry clustering and labor market access. Firms benefit having access to a large, specialized labor pool and from having access to specialized intermediate inputs from supplying firms. The productivity and competitiveness benefits of labor and industry concentrations are called agglomeration economies, and are modeled in the economic geography equations.

The primary national, state, and county data source for REMI PI+ is the Bureau of Economic Analysis (BEA) State Personal Income (SPI) and Local Area Personal Income (LAPI) series (which also include employment and total population at both the state and county level). REMI also relies on numerous other data sources including the Bureau of Labor Statistics, Energy Information Administration, Center for Disease Control and Prevention, National Center for Health Statistics, and the Department of Defense. *Source: remi.com.*

## Overview

Original House Bill No. 44 (Enrolled Act No. 20) was signed into law by Governor Freudenthal on March 3, 2004. This act relates to taxation and revenue and provides for a sales and use tax exemption for machinery and machine tools used directly and predominantly in manufacturing within the State of Wyoming. The act provides for definitions, limitations, a reporting requirement and an effective date. This law took effect on July 1, 2004, and per subsequent amendments, has a sunset of December 31, 2027.

The Manufacturing machinery exemption is located within the "economic incentive" group of sales and use tax exemptions in the Wyoming statutes [W.S. 39-15-105(a)(viii); W.S. 39-16-105(a)(viii)]. The law exempts from Wyoming sales and use taxes, until December 31, 2027, the sale or lease of machinery to be used in Wyoming directly and predominantly in Manufacturing tangible personal property provided the following requirements are met:

- The sale or lease is to a manufacturer classified by the Department of Revenue under the North American Industry Classification System (NAICS) code Manufacturing section 31 – 33; and
- The sale or lease does not include noncapitalized machinery except machinery expensed in accordance with Section 179 of the Internal Revenue Code.

## Specific Requirements by Statute

Wyo. Stat. Ann. § 39-15-105(b)

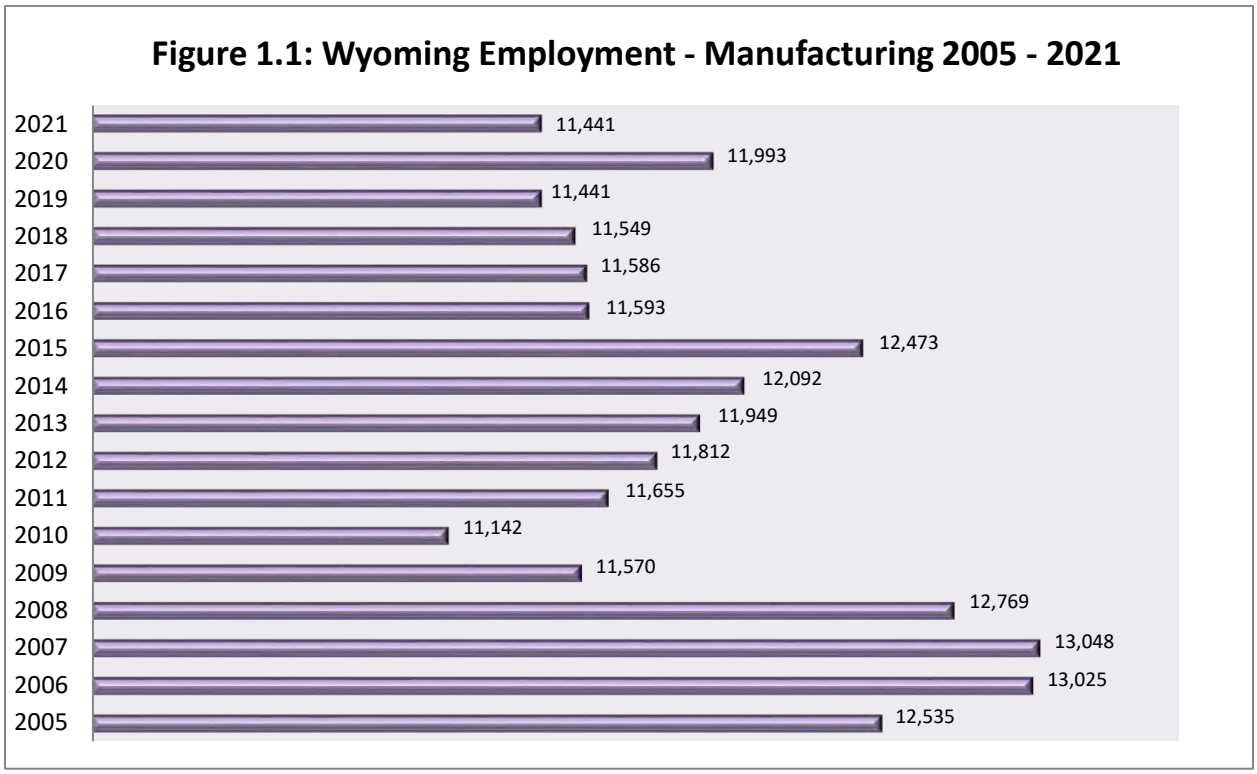
> "The Wyoming business council, the department of workforce services and the department of revenue shall jointly report to the joint revenue interim committee on or before December 1 of each year that the exemption is in effect. If requested by the department of revenue, any person utilizing the exemption shall report to the department the amount of sales tax exempted, and the number of jobs created or impacted by the utilization of the exemption."

This report is to evaluate the cumulative effects of the exemption from initiation of the exemption and shall include:

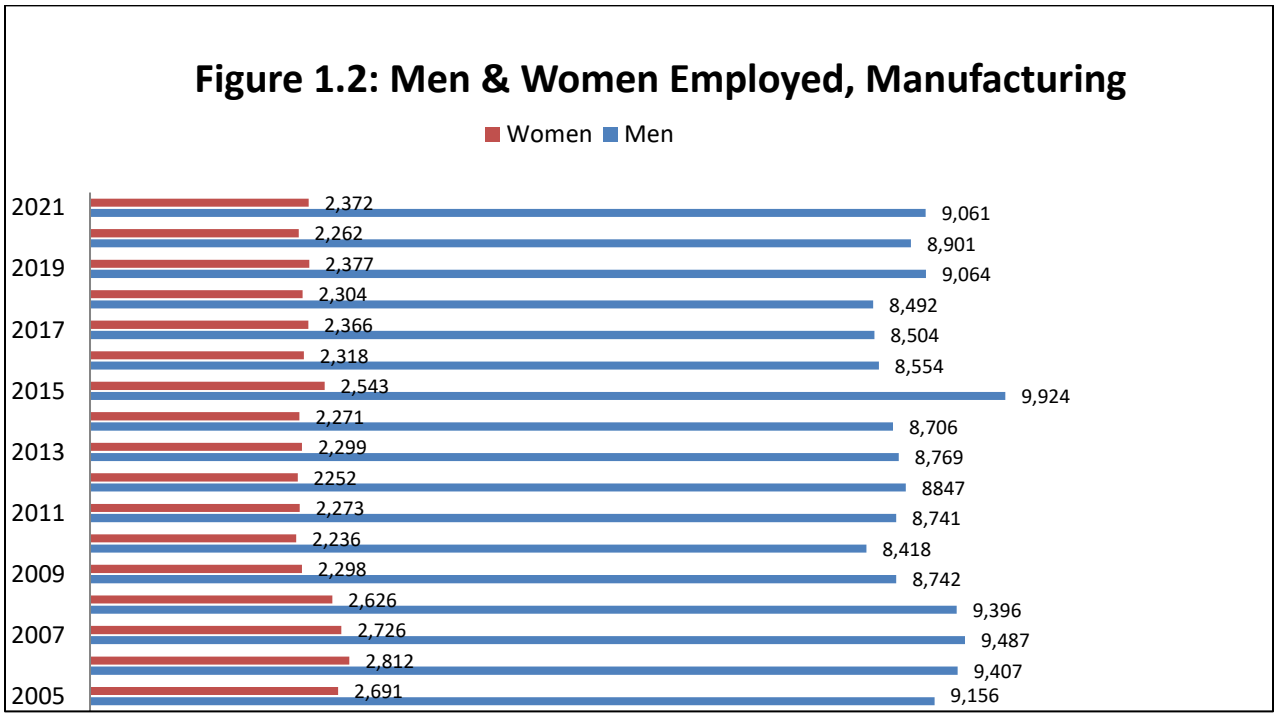
(i) A history of employment in terms of the numbers of employees, full-time and part time employees, and rate of turnover classified by the 2007 edition, as amended, of the North American Industry Classification System (NAICS) code manufacturing section 31 – 33 from information collected by the Department of Employment;
(ii) A history of wages and benefits disaggregated by gender for each job category; and
(iii) A comprehensive history of taxes paid to the state of Wyoming.

## Employment

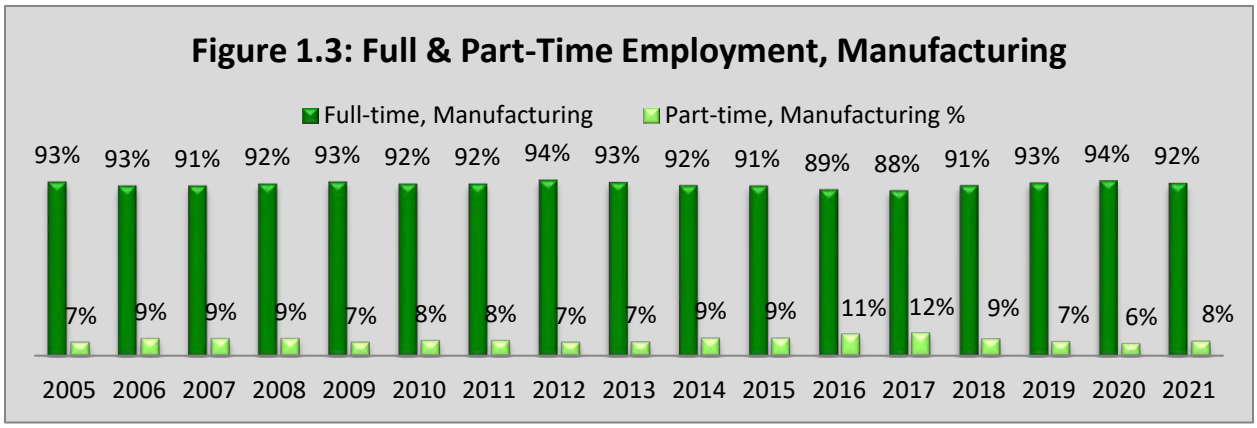
Figure 1.1 details employment history from 2005 to 2021 in the manufacturing industry in Wyoming.



The Figure 1.2 details employment by gender both in the manufacturing industry in Wyoming.



Figures 1.3 graphically compares full-time and part-time employement for the manufacturing industry in Wyoming.



A discussion about those employed in the manufacturing industry is not complete without a closer review of the Standard Occupational Classification (SOC) system. Wyoming utilizes the SOC system to categorize workers within the state; and while manufacturing has its own SOC code, several other occupational groups are typically found in the manufacturing industry as well. Table 1.1, on page 6 illustrates the total number of persons working in the selected SOC categories within Wyoming from year 2005.[1]

Please note, the Department of Workforce Services updated the SOC classification system to include new classification numbers and occupational titles, therefore the new classification numbers have no reporting information prior to 2018.

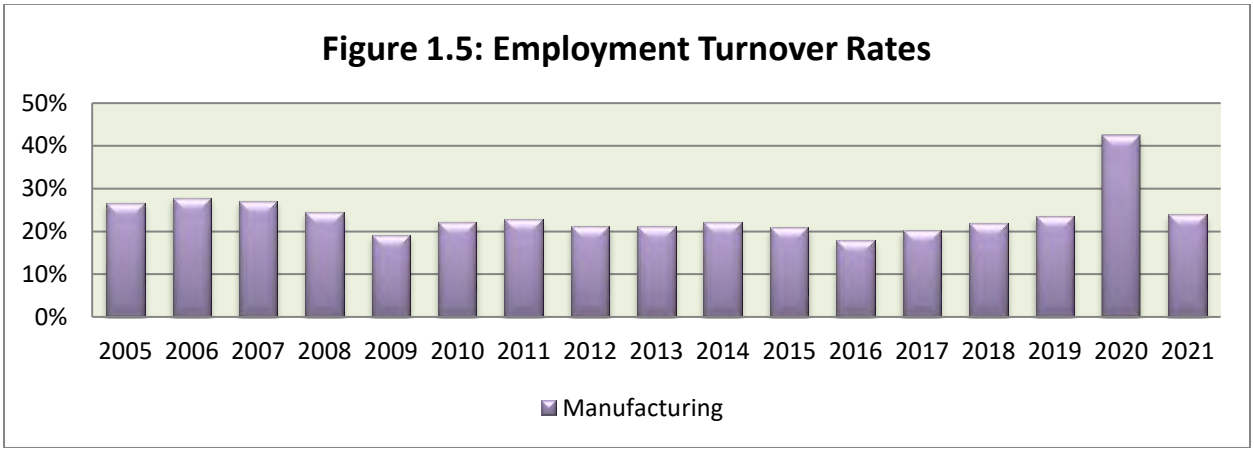
## Turnover

Figure 1.5, illustrates Wyoming's annual turnover rates for the Manufacturing Industry as compared to All Industries for years 2005-2021.[4]

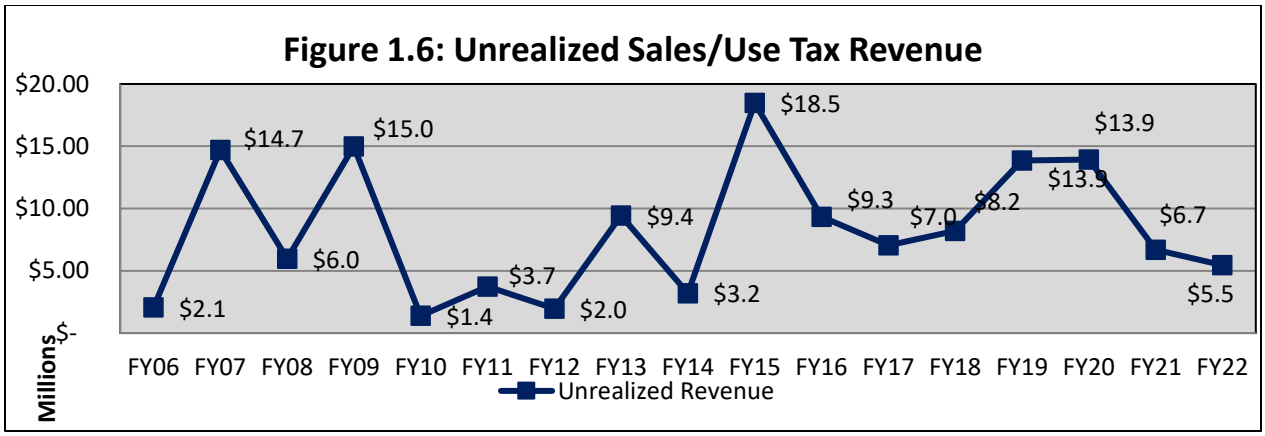


## Exemption Cost

Based on survey responses in 2022, for purchases between the periods of July 1, 2021 through June 30, 2022, exempt manufacturing machinery purchases by Wyoming manufacturers equaled $101,127,872.00.[5] As a result of this exemption and applying the average sales and use tax rate of 5.40%, the unrealized sales and use tax revenue for the State of Wyoming totaled $5,460,905.09. For this period, 1,113 Manufacturing Machinery Survey Forms were sent, 484 responses were received, which reflects a response rate of 43.4%. Of the 484 reponses received, 141 companies reported exempt machinery purchases.

Figure 1.6, on page 10, shows unrealized sales/use tax revenue from years 2006–2021 for exempt manufacturing purchases.[6]

[4] Wyoming Department of Workforce Services, *Wyoming Industry Turnover by Year and Quarter, 1992Q1 to 2022Q4*, (totals derived from Q1 – Q4 yearly average).
[5] Survey Aggregate for 2022.
[6] Wyoming Department of Revenue. *The Effects of the Sales and Use Tax Exemption for Manufacturing Machinery, Fifteenth Edition* (2020).



In addition to exact figures, the Department also evaluated purchases based on eight dollar ranges:

| | | |
|---|---|---|
| • $0 | | by 343 purchasers |
| • $1 - $1,000 | $7,858.74 | by 16 purchasers |
| • $1,001 - $10,000 | $169,103.40 | by 38 purchasers |
| • $10,001 - $50,000 | $811,753.27 | by 35 purchasers |
| • $50,001 - $100,000 | $1,163,189.63 | by 15 purchasers |
| • $100,001 – $1,000,000 | $10,100,298.84 | by 23 purchasers |
| • $1,000,001 - $10,000,000 | $54,942,911.12 | by 13 purchasers |
| • $10,000,001+ | $33,932,757.00 | by 1 purchaser |

Figure 1.7 graphically represents the number of purchasers per dollar range.

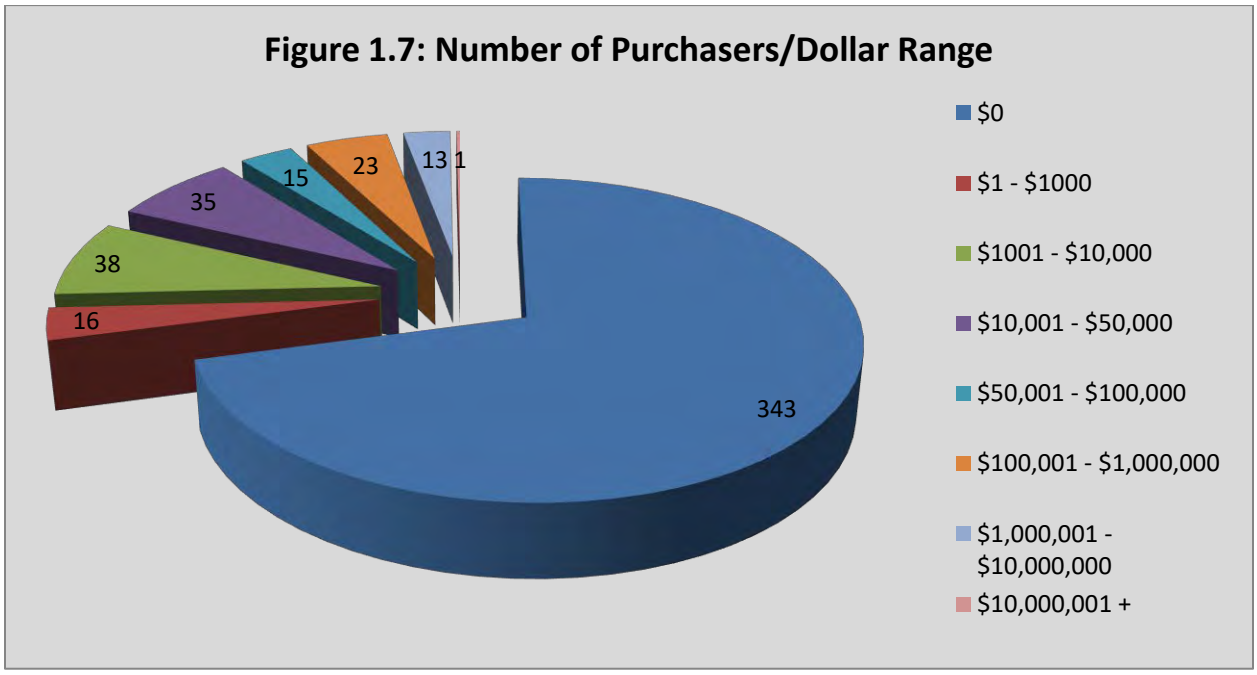


Figure 1.7 graphically represents the number of purchasers per dollar range.

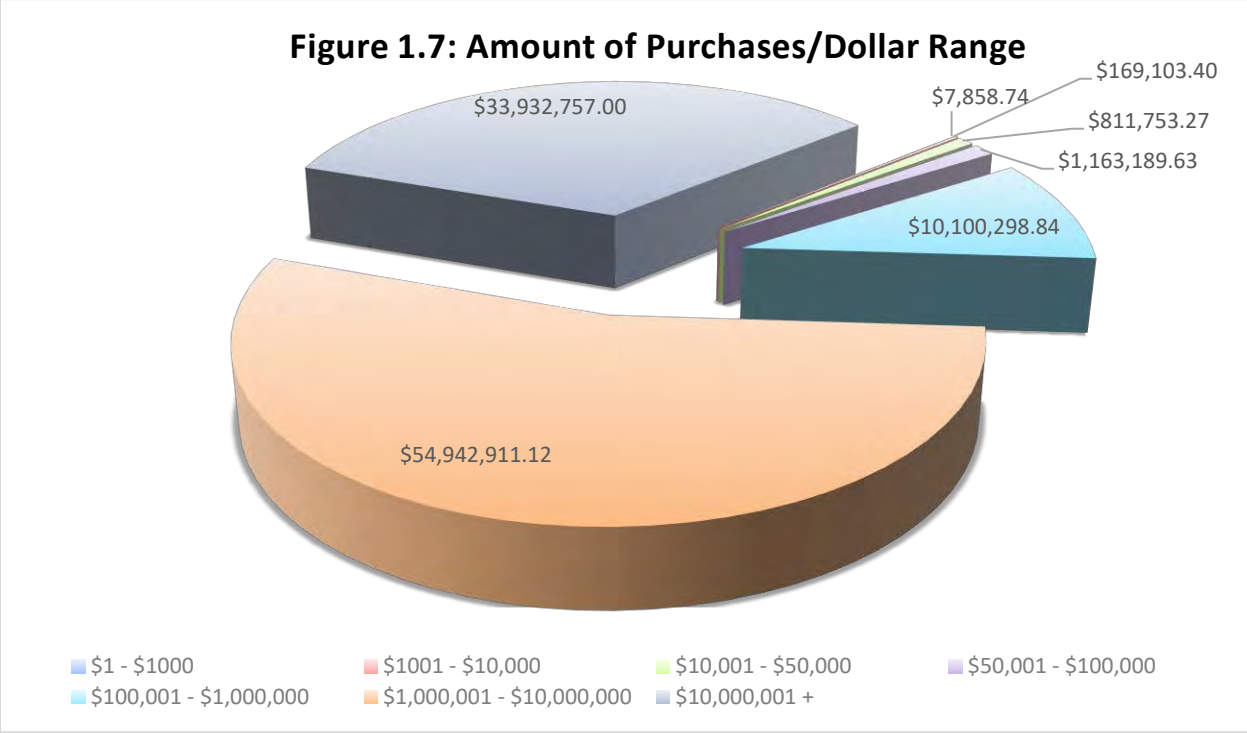

## REMI Analysis: Economic Impacts

The analyses of the economic impacts of the sales and use tax exemptions for (1) purchases of machinery and machine tools used directly and predominantly in manufacturing, for (2) purchases and rentals of qualifying computer equipment necessary for the operation of a data processing center, and for (3) purchases of equipment by a telecommunications service provider, video programming service provider, or provider of internet access used to provide broadband internet service were prepared using the Regional Economic Models, Inc. (REMI) Tax-PI model. REMI Tax-PI is the next generation Policy Insight model built exclusively for Wyoming. It is an integrated model that combines the best features of the input-output, general equilibrium, econometric, and economic geography methodologies. Tax-PI is also a dynamic rather than a static model allowing for year-by-year analysis of the total regional effects of any specific policy.

Table 1: Economic Impact of **Sales & Use Tax Exemption Removal** for Manufacturing Machinery

| Category | | | | | | Average |
|---|---|---|---|---|---|---|
| *(Change from Baseline)* | 2022 | 2023 | 2024 | 2025 | 2026 | 2022-2030 |
| | | | | | | |
| Total Employment - Jobs | -42 | -55 | -65 | -72 | -77 | -72 |
| Manufacturing | -10 | -13 | -15 | -17 | -19 | -18 |
| Construction | -9 | -11 | -13 | -14 | -14 | -13 |
| Retail Trade | -4 | -5 | -5 | -6 | -6 | -5 |
| Accomodation & Food Services | -2 | -3 | -4 | -4 | -5 | -4 |
| All Other | -17 | -23 | -28 | -31 | -34 | -31 |
| | | | | | | |
| Population - Individuals | -22 | -36 | -50 | -63 | -74 | -70 |
| | | | | | | |
| Wages and Salaries | -$1.9 | -$2.5 | -$3.0 | -$3.4 | -$3.6 | -$3.4 |
| Personal Income | -$3.0 | -$3.9 | -$4.7 | -$5.3 | -$5.8 | -$5.5 |
| Disposable Personal Income | -$2.7 | -$3.5 | -$4.1 | -$4.6 | -$5.1 | -$4.8 |
| Gross Domestic Product | -$5.5 | -$7.5 | -$9.0 | -$10.2 | -$11.1 | -$10.4 |
| Output | -$12.8 | -$17.3 | -$20.6 | -$23.0 | -$25.1 | -$23.4 |
| | | | | | | |
| Sales & Use Tax Revenue | -$0.08 | -$0.11 | -$0.13 | -$0.14 | -$0.16 | -$0.12 |
| Property Tax Revenue | -$0.02 | -$0.02 | -$0.03 | -$0.04 | -$0.05 | -$0.04 |
| *Note: All dollar amounts are expressed as millions of fixed (2020) dollars.* | | | | | | |

The economic impact of the **removal of the sales tax exemption** for purchases of manufacturing machinery and machine tools used directly and predominantly in manufacturing was modeled in REMI as an increase in the production costs for the manufacturing industry of $9.0 million per year beginning in 2021. The removal of this exemption would result in an average annual loss of 72 jobs and a decrease in GDP of $10.4 million per year over the period of 2022 to 2030 when compared to the baseline scenario (see Table 1).

The manufacturing, construction, retail trade, and accommodation & food services sectors endure most of the job losses. While manufacturing and construction account for the direct and indirect job losses, the retail trade and accommodation & food services sectors, in particular, will be hindered by the decline of disposable personal income. Fewer jobs and a decline in salaries will result in less household spending.

## Key Definitions

**Total Employment** comprises estimates of the number of non-farm jobs, full-time plus part-time, by place of work. Full-time and part-time jobs are counted at equal weight. Includes direct, indirect, and induced jobs.

**Population** reflects mid-year estimates of people, including survivors from the previous year, births, special populations, and three types of migrants (economic, international, and retired).

**Wages and Salaries** are the monetary remuneration of employees, including the compensation of corporate officers; commissions, tips, and bonuses; voluntary employee contributions to certain deferred compensation plans, such as 401(k) plans; and receipts in kind that represent income. Wages and salaries disbursements are affected by changes in Wage Rate and Employment.

**Personal Income** is the income that is received by all persons from all sources. It is calculated as the sum of wage and salary disbursements, supplements to wages and salaries, proprietors' income with inventory valuation and capital consumption adjustments, rental income of persons with capital consumption adjustment, personal dividend income, personal interest income, and personal current transfer receipts, less contributions for government social insurance.

**Disposable Personal Income** equals personal income minus personal taxes.

**Gross Domestic Product** or **GDP** is the market value of goods and services produced by labor and property. It is often referred to as "value added" and is equal to its gross output (sales or receipts and other operating income, plus inventory change) minus its intermediate inputs (consumption of goods and services purchased from other industries or imported).

**Output** is the amount of production, including all intermediate goods purchased as well as value-added (compensation and profit). Output can also be thought of as sales or supply or simply price multiplied by quantity (P×Q).

## About the REMI PI+Model

The REMI PI+ model incorporates aspects of four major modeling approaches: **Input-Output**, **General Equilibrium**, **Econometric**, and **Economic Geography**. Each of these methodologies has distinct advantages as well as limitations when used alone. The REMI integrated modeling approach builds on the strengths of each of these approaches.

The REMI model at its core has the inter-industry relationships found in **Input-Output models**. As a result, the industry structure of a particular region is captured within the model, as well as transactions between industries. Changes that affect industry sectors that are highly interconnected to the rest of the economy will often have a greater economic impact than those for industries that are not closely linked to the regional economy.

**General Equilibrium** is reached when supply and demand are balanced. This tends to occur in the long run, as prices, production, consumption, imports, exports, and other changes occur to stabilize the economic system. For example, if real wages in a region rise relative to the U.S., this will tend to attract economic migrants to the region until relative real wage rates equalize. The general equilibrium properties are necessary to evaluate changes such as tax policies that may have an effect on regional prices and competitiveness.

REMI is sometimes called an "**Econometric model**," as the underlying equations and responses are estimated using advanced statistical techniques. The estimates are used to quantify the structural relationships in the model. The speed of economic responses is also estimated, since different adjustment periods will result in different policy recommendations and even different economic outcomes.

The **New Economic Geography** features represent the spatial dimension of the economy. Transportation costs and accessibility are important economic determinants of interregional trade and the productivity benefits that occur due to industry clustering and labor market access. Firms benefit having access to a large, specialized labor pool and from having access to specialized intermediate inputs from supplying firms. The productivity and competitiveness benefits of labor and industry concentrations are called agglomeration economies, and are modeled in the economic geography equations.

The primary national, state, and county data source for REMI PI+ is the Bureau of Economic Analysis (BEA) State Personal Income (SPI) and Local Area Personal Income (LAPI) series (which also include employment and total population at both the state and county level). REMI also relies on numerous other data sources including the Bureau of Labor Statistics, Energy Information Administration, Center for Disease Control and Prevention, National Center for Health Statistics, and the Department of Defense. *Source: remi.com.*

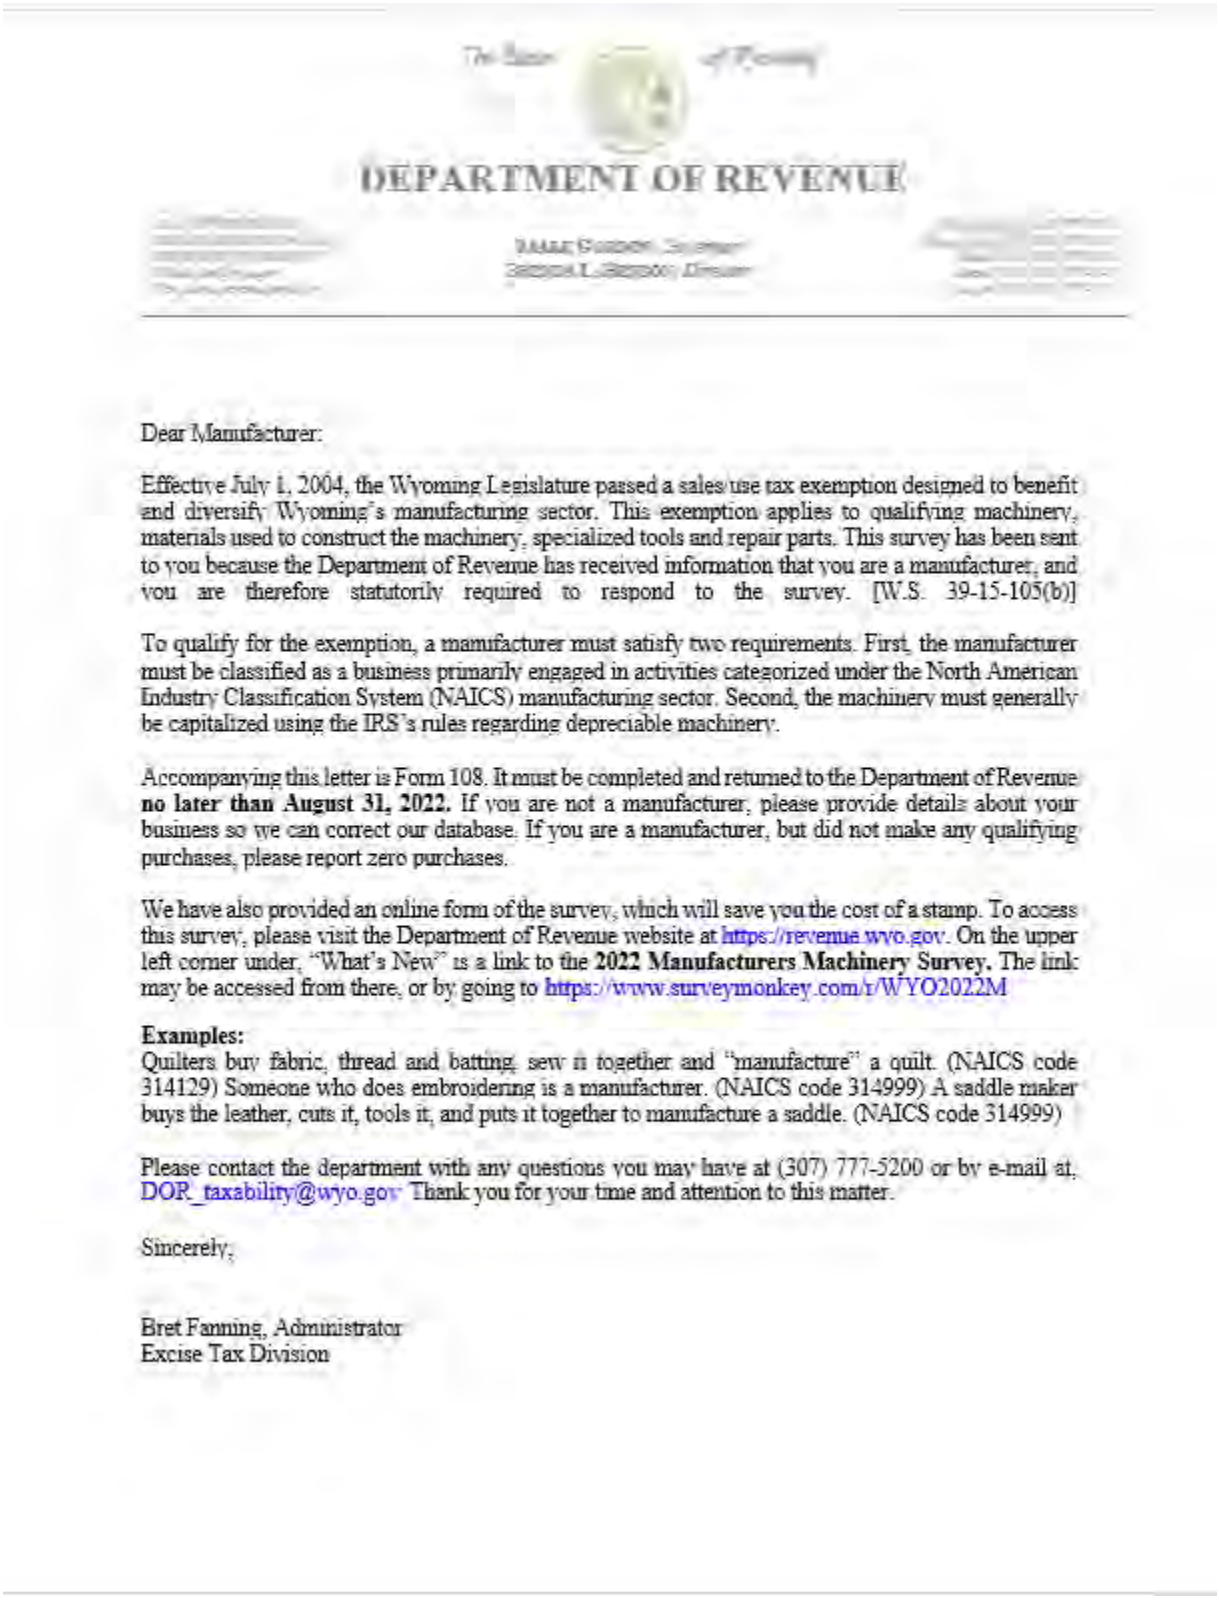
## Appendices

Appendix A: Manufacturing Machinery Survey Form 108 Cover Letter

Appendix B: Manufacturing Machinery Survey Form 108

**Appendix A**: Manufacturing Machinery Survey Form 108 Cover Letter



DEPARTMENT OF REVENUE

Dear Manufacturer:

Effective July 1, 2004, the Wyoming Legislature passed a sales/use tax exemption designed to benefit and diversify Wyoming's manufacturing sector. This exemption applies to qualifying machinery, materials used to construct the machinery, specialized tools and repair parts. This survey has been sent to you because the Department of Revenue has received information that you are a manufacturer, and you are therefore statutorily required to respond to the survey. [W.S. 39-15-105(b)]

To qualify for the exemption, a manufacturer must satisfy two requirements. First, the manufacturer must be classified as a business primarily engaged in activities categorized under the North American Industry Classification System (NAICS) manufacturing sector. Second, the machinery must generally be capitalized using the IRS's rules regarding depreciable machinery.

Accompanying this letter is Form 108. It must be completed and returned to the Department of Revenue **no later than August 31, 2022.** If you are not a manufacturer, please provide details about your business so we can correct our database. If you are a manufacturer, but did not make any qualifying purchases, please report zero purchases.

We have also provided an online form of the survey, which will save you the cost of a stamp. To access this survey, please visit the Department of Revenue website at https://revenue.wyo.gov. On the upper left corner under, "What's New" is a link to the **2022 Manufacturers Machinery Survey.** The link may be accessed from there, or by going to https://www.surveymonkey.com/r/WYO2022M

**Examples:**
Quilters buy fabric, thread and batting, sew it together and "manufacture" a quilt. (NAICS code 314129) Someone who does embroidering is a manufacturer. (NAICS code 314999) A saddle maker buys the leather, cuts it, tools it, and puts it together to manufacture a saddle. (NAICS code 314999)

Please contact the department with any questions you may have at (307) 777-5200 or by e-mail at, DOR_taxability@wyo.gov Thank you for your time and attention to this matter.

Sincerely,

Bret Fanning, Administrator
Excise Tax Division

NAICS code(s), four or more digits, i.e. 3112 : _____

*The North American Industrial Classification System (NAICS) is the standard used by Federal and state agencies to organize establishments into industries on the basis of the activity in which they are primarily engaged. To find your NAICS Code, if unknown, please visit: https://www.naics.com/code-search/. If your NAICS code does not fall between 3111 and 3599, stop here and sign affidavit at bottom.*

If you are unsure of your NAICS code, please provide a detailed description of the process your business uses to produce products. (Even if you hand-produce individual items or modify other products, you may be categorized as a manufacturer under NAICS).

Purchases or leases of machinery (including machine tools and parts thereof or materials purchased for the repair/construction of machinery) are exempt from state sales/use tax when the machinery will be used directly and predominantly in manufacturing in Wyoming, subject to stipulations outlined in W.S. 39-15-105 and W.S. 39-16-105.*

| | |

## Overview

Original House Bill No. 61 (Enrolled Act No. 5) was signed into law by Governor Freudenthal on March 9, 2006. This act relates to taxation and revenue and provides for a sales and use tax exemption for the sales/purchases of equipment used to construct a new coal gasification or coal liquefaction facility. The act provides for reporting requirements and an effective date.

The coal gasification and liquefaction exemption is located within the "economic incentive" group of sales and use tax exemptions in the Wyoming statutes [W.S. 39-15-105(a)(viii)(R); W.S. 39-16-105(a)(viii)(G)].

## Specific Reporting Requirement by Statute

Wyo. Stat. Ann. § 39-15-105(b)

> "The Wyoming business council, the department of workforce services and the department of revenue shall jointly report to the joint revenue interim committee on or before December 1 of each year that the exemption is in effect. If requested by the department of revenue, any person utilizing the exemption shall report to the department the amount of sales tax exempted, and the number of jobs created or impacted by the utilization of the exemption."

This report is to evaluate the cumulative effects of the exemption from initiation of the exemption and shall include:

(i) A history of employment in terms of the numbers of employees, full-time and part time employees, and rate of turnover classified by the 2007 edition, as amended, of the North American Industry Classification System (NAICS) code manufacturing section 31 – 33 from information collected by the Department of Employment;
(ii) A history of wages and benefits disaggregated by gender for each job category; and
(iii) A comprehensive history of taxes paid to the state of Wyoming.

## Findings

This is the fifteenth written report in a series of annual reports on the effects of the sales and use tax exemption for companies in the coal gasification and coal liquefaction industry. The Department has been actively tracking any proposed projects. At this time, there are no known projects actively being pursued within the state of Wyoming

### *Employment Information*

Currently not applicable, as the Department has not identified any businesses actively engaged in constructing a commercial facility at this time.

*Wage and Benefits Information*
Currently not applicable, as the Department has not identified any businesses actively engaged in constructing a commercial facility at this time.

*Fiscal Information*
Currently not applicable, as the Department has not identified any businesses actively engaged in constructing a commercial facility at this time.

## Overview

Original House Bill No. 67 (Enrolled Act No. 31) was passed and signed by Governor Freudenthal into law on March 5, 2010. This act relates to taxation and revenue and provides for a sales and use tax exemption for the purchases and rentals of qualifying computer equipment including computers, servers, monitors, keyboards, storage devices and other peripherals, racking systems, cabling and trays that are necessary for the operation of a data processing services center when the aggregate purchase of the qualifying equipment exceeds two million dollars in any calendar year. The act provides for a reporting requirement and an effective date. This law took effect upon signature.

Subsequently House Bill No. 117 (Enrolled Act No. 17) was passed and signed by Governor Mead on February 18, 2011. This had the effect of amending and expanding the first Act. As it now reads, subject to meeting the applicable provisions of the exemption, the following purchases by a data processing services center (as defined in W.S. 39-15-101(a)(xliv)) are exempt:

> (I) The sales price paid for the purchase or rental of qualifying prewritten and other computer software, computer equipment including computers, servers, monitors, keyboards, storage devices, containers used to transport and house such computer equipment and other peripherals, racking systems, cabling and trays that are necessary for the operation of a data processing services center when the aggregate purchase of the qualifying equipment exceeds two million dollars ($2,000,000.00) in any calendar year;
>
> (II) The sales price paid for the purchase or rental of qualifying uninterruptable power supplies, back-up power generators, specialized heating and air conditioning equipment and air quality control equipment used for controlling the computer environment necessary for the operation of a data processing services center when the aggregate purchase of the qualifying equipment exceeds two million dollars ($2,000,000.00) in any calendar year;

This exemption is located within the "economic incentive" group of sales and use tax exemptions in the Wyoming statutes [W.S. 39-15-105(a)(viii) and W.S. 39-16-105(a)(viii)]. In order to avail themselves of the exemption a qualifying data processing services center must meet certain requirements.

In addition to having a physical location in the state where the qualifying equipment will be maintained and operated (until it is scheduled for replacement or until it has reached the end of its serviceable life) for Subparagraph (I) the qualifying data processing services center must make, or have made within the five years immediately preceding March 5, 2010, an initial capital investment of not less than five million dollars ($5,000,000.00) and for Subparagraph (II) the qualifying data processing services center must make, or have made within the five years immediately preceding April 1, 2011, an initial capital investment of not less than fifty million dollars ($50,000,000.00). Furthermore, the data processing services center must have received certification from the Wyoming Business Council that the business has created or will create a number of jobs in Wyoming that is appropriate to the size and stage of development of the data processing services center as determined by the Wyoming Business Council.

## Specific Requirements by Statute

Wyo. Stat. Ann. § 39-15-105(b)

> "The Wyoming business council, the department of workforce services and the department of revenue shall jointly report to the joint revenue interim committee on or before December 1 of each year that the exemption is in effect. If requested by the department of revenue, any person utilizing the exemption shall report to the department the amount of sales tax exempted, and the number of jobs created or impacted by the utilization of the exemption."

This report is to evaluate the cumulative effects of the exemption from initiation of the exemption and shall include:

(i) A history of employment in terms of the numbers of employees, full-time and part time employees, and rate of turnover classified by the 2007 edition, as amended, of the North American Industry Classification System (NAICS) code manufacturing section 31 – 33 from information collected by the Department of Employment;
(ii) A history of wages and benefits disaggregated by gender for each job category; and
(iii) A comprehensive history of taxes paid to the state of Wyoming.

## Findings

This report represents the tenth year the Department of Revenue has requested information from companies potentially utilizing the exemption. The Department contacted the Wyoming Business Council for a list of certified Data Processing Centers in Wyoming. An email along with the survey was sent to certified Data Processing Centers with instructions for the respondents that once completed, the information could be mailed, faxed or emailed back to the Department of Revenue's Excise Tax Division. The Department attempted to contact data processing centers that had not responded twice prior to March 31, 2022 which was the closing date of the survey.

For the calendar year ending December 2021, the Department reached out to five entities that have been identified as data processing service centers in Wyoming. Of those, the Department received responses from two. Of the two responses, both companies made sufficient purchases to utilize the exemption under part (I), but only one of those made sufficient purchases to trigger part (II). The response rate to this survey was 40%.

## Exemption Cost

Companies claiming exemption on qualifying prewritten and other computer software, computer equipment including computers, servers, monitors, keyboards, storage devices, containers used to transport and house such computer equipment and other peripherals, racking systems, cabling and trays reported $207M in exempt purchases in 2021. In addition, $75.5M in qualifying uninterruptable power supplies, back-up power generators, specialized heating and air conditioning equipment and air quality control equipment used for controlling the computer

environment necessary for the operation of a data processing services center was made in 2021. Applying the statewide average tax rate for 2021, of 5.39% results in $15.2M in unrealized sales and use tax in 2021. Figure 1 describes the total purchases and unrealized tax for each year. Figure 2 graphically represents the cumulative effect of the exemption.

**Figure 1: Exempt Purchases and Unrealized Tax Revenue, 2010 – 2021**

| | Qualifying Exemption (I) | Qualifying Exemption (II) | Total Exempt Purchases | Unrealized Sales and Use Tax |
|---|---|---|---|---|
| 2Q10 – 2Q13 | $ 22,260,014.00 | $ 40,845,160.00 | $ 63,105,174.00 | $ 3,319,332.15 |
| 3Q2013 – Yr End | $ 277,488,171.00 | $ 38,647,960.00 | $ 316,136,131.00 | $ 16,976,510.23 |
| 2014 | $ 162,583,622.00 | $ 6,836,331.00 | $ 169,419,953.00 | $ 9,080,909.48 |
| 2015 | $ 181,946,836.00 | $ 5,904,642.00 | $ 187,851,478.00 | $ 10,106,409.52 |
| 2016 | $ 319,517,743.00 | $ 12,123,508.00 | $ 331,641,251.00 | $ 17,908,627.55 |
| 2017 | $ 195,682,743.00 | $ - | $ 195,682,743.00 | $ 10,488,595.02 |
| 2018 | $ 423,514,743.00 | $ 11,903,520.00 | $ 435,418,263.00 | $ 23,469.044.38 |
| 2019 | $ 194,099,133.27 | $ 160,458,586.00 | $ 354,557,719.27 | $ 19,039,749.52 |
| 2020 | $ 255,055,416.88 | $ 5,508,023.00 | $ 260,563,439.88 | $ 13,940,144.03 |
| 2021 | $ 207,235,312.41 | $ 75,494,766.20 | $ 282,730,078.61 | $ 15,239,151.24 |
| Total | $2,239,383,734.56 | $ 357,722,496.20 | $2,597,106,230.76 | $139,568,473.13 |

## Wage Earnings

Figure 5 on page 6 details the average hourly wage per occupational classification and per year.

**Figure 5: Average Wage per Occupational Classification, 2013 - 2021**

| | 2013 | 2014 | 2015 | 2016 | 2017 | 2018 | 2019 | 2020 | 2021 |
|---|---|---|---|---|---|---|---|---|---|
| **Supervisor / Manager** | $ 51.61 | $ 37.49 | $ 36.23 | $ 34.60 | $ 50.88 | $ 53.14 | $ 46.11 | $40.87 | $63.56 |
| **Administrative Services** | $ 26.81 | $ 23.99 | $ 23.48 | $ 27.10 | $ 26.23 | $ 27.32 | $ 23.41 | $25.29 | $24.51 |
| **Customer Service** | $ 28.88 | $ 29.00 | $ 31.30 | $ 44.37 | $ 43.51 | $ 59.87 | $ 59.54 | $48.34 | $47.08 |
| **Skilled Labor** | $ 32.74 | $ 34.28 | $ 23.68 | $ 32.20 | $ 28.27 | $ 28.70 | $ 29.62 | $43.00 | $55.57 |
| **Unskilled Labor** | $ 15.72 | $ 17.99 | $ 23.13 | $ 23.23 | $ 23.45 | $ 21.53 | $ 22.09 | $18.45 | $25.97 |

Figure 6 graphically represents the average hourly wage per occupational classification, per year.

**Figure 6: Average Wage by Occupational Classification, 2013 – 2021**

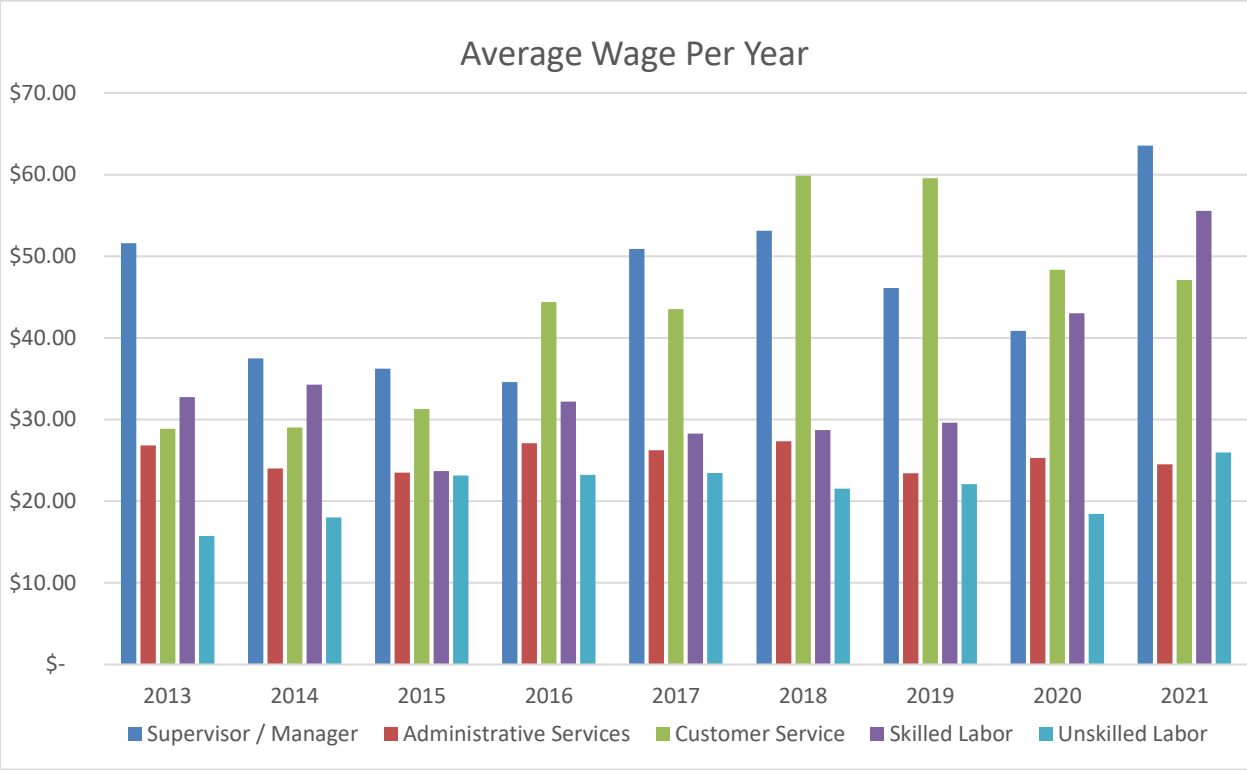

Figure 7 depicts the wage difference for skilled labor and Figure 8 depicts the same for unskilled labor.

**Figure 7: Average Wage for Skilled Labor Positons, year over year, by Gender**

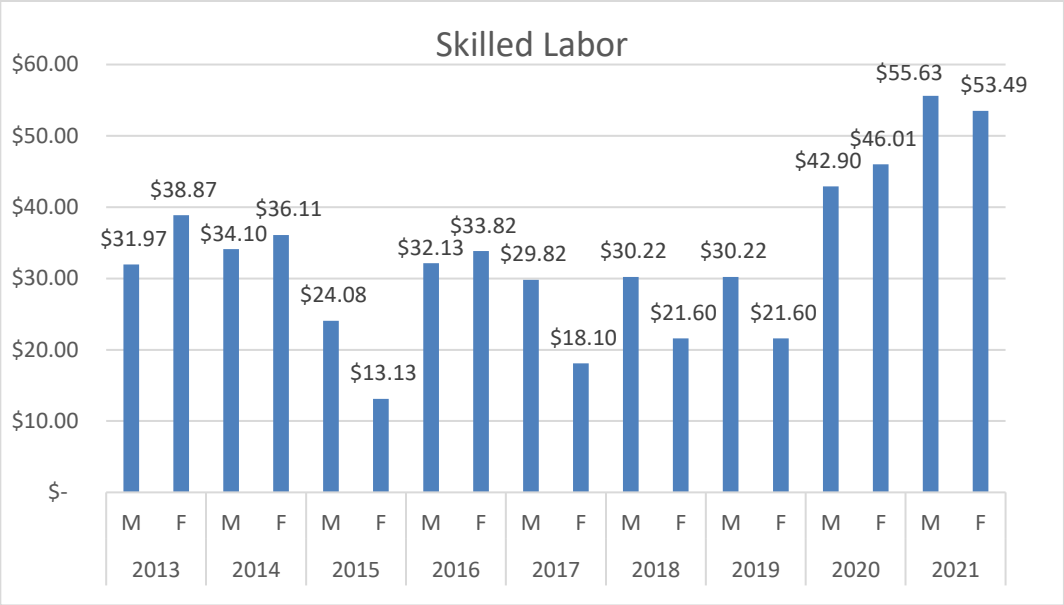

**Figure 8: Average Wage for Unskilled Labor Positions, year over year, by Gender**

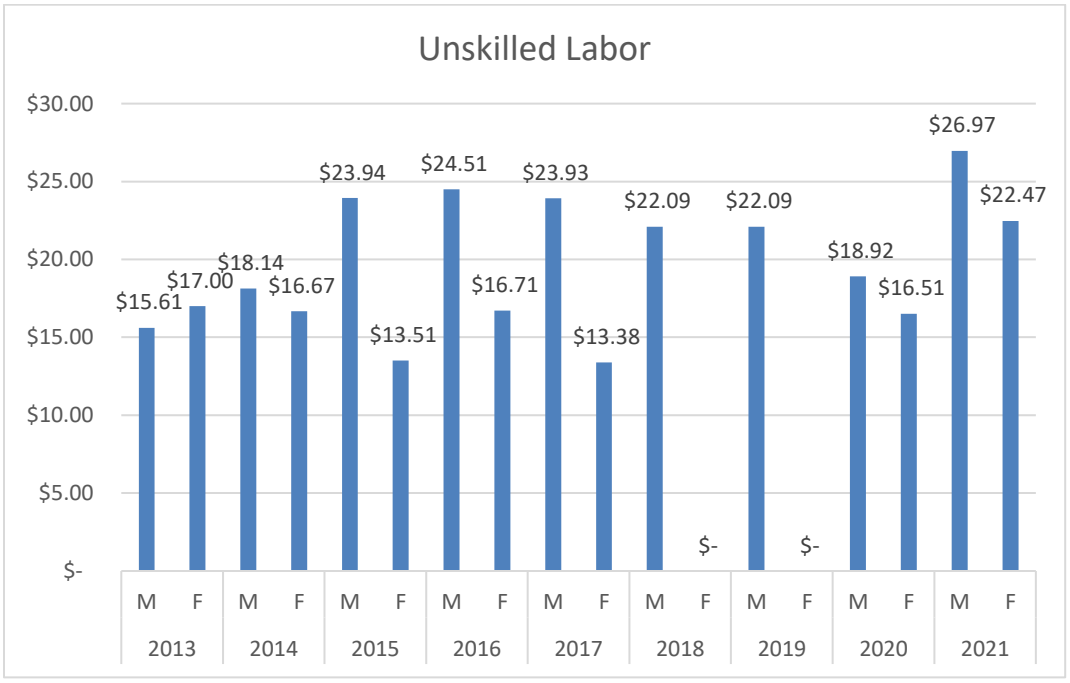

## Benefits

Consistent with every year surveyed, all companies employing in this field reported a full benefits package including medical and dental insurance, a prescription plan, and a vision plan. Also, a retirement savings plans for full time employees was offered by 100% of respondents. Some part time employees did receive full benefit packages.

## Turnover

In 2021, respondents reported no turnover in supervisor/manager or administrative positions. Customer service positions reported a 36.40% turnover rate while skilled labor reported a 52.40% turnover rate and unskilled labor 38.50% turnover rate.

## Survey Costs

Due to the limited number of businesses contacted for this report, the cost to mail was minimal. As a result, the primary expense associated with this report is the time spent following up with the respondents, reviewing and analyzing the data received, and preparation of this report. The Department estimates office personnel expended 40 to 50 hours over the course of several weeks on this specific exemption survey.

## REMI Analysis: Economic Impacts

The analyses of the economic impacts of the sales and use tax exemptions for (1) purchases of machinery and machine tools used directly and predominantly in manufacturing, for (2) purchases and rentals of qualifying computer equipment necessary for the operation of a data processing center, and for (3) purchases of equipment by a telecommunications service provider, video programming service provider, or provider of internet access used to provide broadband internet service were prepared using the Regional Economic Models, Inc. (REMI) Tax-PI model. REMI Tax-PI is the next generation Policy Insight model built exclusively for Wyoming. It is an integrated model that combines the best features of the input-output, general equilibrium, econometric, and economic geography methodologies. Tax-PI is also a dynamic rather than a static model allowing for year-by-year analysis of the total regional effects of any specific policy.

Table 2: Economic Impact of **Sales & Use Tax Exemption Removal** for Data Centers

| Disposable Personal Income | -$4.2 | -$4.8 | -$5.2 | -$5.6 | -$5.8 | -$5.6 |
| Gross Domestic Product | -$4.1 | -$5.2 | -$6.0 | -$6.5 | -$6.8 | -$6.4 |
| Output | -$7.1 | -$8.9 | -$10.2 | -$11.0 | -$11.6 | -$10.8 |
| | | | | | | |
| Sales & Use Tax Revenue | -$0.17 | -$0.19 | -$0.20 | -$0.22 | -$0.22 | -$0.18 |
| Property Tax Revenue | -$0.06 | -$0.06 | -$0.07 | -$0.07 | -$0.08 | -$0.06 |
| *Note: All dollar amounts are expressed as millions of fixed (2020) dollars.* | | | | | | |

The economic impact of the **removal of the sales tax exemption** for purchases and rentals of qualifying computer equipment necessary for the operation of a data processing center was modeled in REMI as an increase in the production costs for the data center industry of $15.0 million per year beginning in 2021. This exemption removal would result in an average annual loss of 60 jobs and a decrease in GDP of $6.4 million per year over the period of 2022 to 2030 when compared to the baseline scenario (see Table 2).

The information, finance & insurance, retail trade, and construction sectors will incur the majority of the job losses. Direct job losses are attributed to information, while indirect job losses are attributed to the finance & insurance and construction sectors. The retail trade sector will be adversely impacted from the decline in disposable personal income.

## Key Definitions

**Total Employment** comprises estimates of the number of non-farm jobs, full-time plus part-time, by place of work. Full-time and part-time jobs are counted at equal weight. Includes direct, indirect, and induced jobs.

**Population** reflects mid-year estimates of people, including survivors from the previous year, births, special populations, and three types of migrants (economic, international, and retired).

**Wages and Salaries** are the monetary remuneration of employees, including the compensation of corporate officers; commissions, tips, and bonuses; voluntary employee contributions to certain deferred compensation plans, such as 401(k) plans; and receipts in kind that represent income. Wages and salaries disbursements are affected by changes in Wage Rate and Employment.

**Personal Income** is the income that is received by all persons from all sources. It is calculated as the sum of wage and salary disbursements, supplements to wages and salaries, proprietors' income with inventory valuation and capital consumption adjustments, rental income of persons with capital consumption adjustment, personal dividend income, personal interest income, and personal current transfer receipts, less contributions for government social insurance.

**Disposable Personal Income** equals personal income minus personal taxes.

**Gross Domestic Product** or **GDP** is the market value of goods and services produced by labor and property. It is often referred to as "value added" and is equal to its gross output (sales or receipts and other operating income, plus inventory change) minus its intermediate inputs (consumption of goods and services purchased from other industries or imported).

**Output** is the amount of production, including all intermediate goods purchased as well as value-added (compensation and profit). Output can also be thought of as sales or supply or simply price multiplied by quantity (P×Q).

## About the REMI PI+Model

The REMI PI+ model incorporates aspects of four major modeling approaches: **Input-Output**, **General Equilibrium**, **Econometric**, and **Economic Geography**. Each of these methodologies has distinct advantages as well as limitations when used alone. The REMI integrated modeling approach builds on the strengths of each of these approaches.

The REMI model at its core has the inter-industry relationships found in **Input-Output models**. As a result, the industry structure of a particular region is captured within the model, as well as transactions between industries. Changes that affect industry sectors that are highly interconnected to the rest of the economy will often have a greater economic impact than those for industries that are not closely linked to the regional economy.

**General Equilibrium** is reached when supply and demand are balanced. This tends to occur in the long run, as prices, production, consumption, imports, exports, and other changes occur to stabilize the economic system. For example, if real wages in a region rise relative to the U.S., this will tend to attract economic migrants to the region until relative real wage rates equalize. The general equilibrium properties are necessary to evaluate changes such as tax policies that may have an effect on regional prices and competitiveness.

REMI is sometimes called an "**Econometric model**," as the underlying equations and responses are estimated using advanced statistical techniques. The estimates are used to quantify the structural relationships in the model. The speed of economic responses is also estimated, since different adjustment periods will result in different policy recommendations and even different economic outcomes.

The **New Economic Geography** features represent the spatial dimension of the economy. Transportation costs and accessibility are important economic determinants of interregional trade and the productivity benefits that occur due to industry clustering and labor market access. Firms benefit having access to a large, specialized labor pool and from having access to specialized intermediate inputs from supplying firms. The productivity and competitiveness benefits of labor and industry concentrations are called agglomeration economies, and are modeled in the economic geography equations.

The primary national, state, and county data source for REMI PI+ is the Bureau of Economic Analysis (BEA) State Personal Income (SPI) and Local Area Personal Income (LAPI) series (which also include employment and total population at both the state and county level). REMI also relies on numerous other data sources including the Bureau of Labor Statistics, Energy Information Administration, Center for Disease Control and Prevention, National Center for Health Statistics, and the Department of Defense. *Source: remi.com.*

## V. Employment and Benefits Information

a. Please indicate the total number of employees per category type, disaggregate by full and part time status, gender and wage (per hour) as well as turnover rate. Note this information is required per W.S. Title 39-15-105 and Title 39-16-105 to evaluate the economic impact of this exemption.

**Categories:**
**Owner/officer** – Owners, Officers, Sole Proprietors, Corporate Officers, Self Employed, etc.
**Supervisor/Manager** – Upper/Middle/Lower Managers, Foremen, Supervisors, etc.
**Administrative Staff** – Clerical, Office, Accounting, Bookkeeping, Purchasing, Shipping & Receiving, etc.
**Customer-Support Services** – Customer service, Sales, Delivery, etc.
**Skilled Laborers** – Professionals, Engineers, Tradesmen, machinists, R&D, Design, Quality Control, etc.
**Unskilled Laborers** – Technicians, Operatives, Maintenance, Production, Laborers, etc.

| Category Name[1] (such as supervisor, laborer, etc.) | Full Time or Part Time? | Number of Workers | | Average Wage (per hour) | | Average Rate of Turnover |
|---|---|---|---|---|---|---|
| | | Male | Female | Male | Female | |
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |

b. Please indicate the total number of employees residing in the State of Wyoming. _____

## V. Benefits Impact Information

Which, if any, of the following benefits does this company offer its employees? Check each applicable box

| Employee Type | None | Health | Dental | Vision | Prescription | 401(k) |
|---|---|---|---|---|---|---|
| Full-time Employees | | | | | | |
| Part-time Employees | | | | | | |

## VI. AFFIDAVIT AND SIGNATURE

I _____, (authorized agent for company) hereby certify under penalty of perjury that the company named on this form is entitled to the sales and use tax exemption on purchases and rentals of qualifying computer equipment, as per W.S. Title 39-15-105 and Title 39-16-105. I further certify that the Company Information and Economic Impact Information provided above is true and accurate to the best of my knowledge.

## Overview

Original House Bill No. 93 (Enrolled Act No. 116) was signed by Governor Freudenthal into law on March 3, 2005. This act relates to taxation and revenue and provides for a sales and use tax exemption for the sales/purchases of tangible personal property or services performed for the repair, assembly, alteration or improvement of railroad rolling stock. The act provides for a reporting requirement and an effective date of July 1, 2005. Originally the exemption provided a sunset date of July 1, 2015. During the 2015 Legislative Session the exemption was extended until July 1, 2021. The railroad rolling stock exemption is located within the "economic incentive" group of sales and use tax exemptions in the Wyoming statutes. [W.S. 39-15-105(a)(viii) and W.S. 39-16-105(a)(viii)]

## Specific Reporting Requirements by Statute

Wyo. Stat. Ann. § 39-15-105(b)

> "The Wyoming business council, the department of workforce services and the department of revenue shall jointly report to the joint revenue interim committee on or before December 1 of each year that the exemption is in effect. If requested by the department of revenue, any person utilizing the exemption shall report to the department the amount of sales tax exempted, and the number of jobs created or impacted by the utilization of the exemption."

This report is to evaluate the cumulative effects of the exemption from initiation of the exemption and shall include:

(i) A history of employment in terms of the numbers of employees, full-time and part time employees, and rate of turnover classified by the 2007 edition, as amended, of the North American Industry Classification System (NAICS) code manufacturing section 31 – 33 from information collected by the Department of Employment;
(ii) A history of wages and benefits disaggregated by gender for each job category; and
(iii) A comprehensive history of taxes paid to the state of Wyoming.

## Findings

This year represents the thirteenth year the Department of Revenue has requested information from companies potentially utilizing the exemption. The Department did not survey companies in 2013 or 2014 as the legislature only required reporting until 2012 and did not renew the reporting requirement until 2015. Therefore the graphs and tables included in this report will omit these periods.

For FY21 the Department of Revenue surveyed six (6) businesses which are or we believe have been engaged in activities involving the repair of railroad rolling stock. Of those sent, the Department received five (5) responses for an 83% response rate. Of the companies responding, we accepted the exclusion of employment data for one company as they do not have any Wyoming

employees. As a result, we will include the companies' utilization of the exemption but recognize that the employment data is accurate only in relation to those companies that have provided employment data specific to the number of employees involved in the repair, assembly, alteration or improvement of railroad rolling stock in Wyoming.

## Exemption Cost

Based on survey responses for FY21, there were $6,441,900.62 in exempt railroad rolling stock repair purchases and sales by the companies surveyed. Applying the statewide sales and use tax rate average of 5.35%, this amounted to $344,641.68 in unrealized sales and use tax revenue by the State of Wyoming for FY21. Cumulatively the industry has made exempt purchases or sales in excess of $244.3M for the repair of railroad rolling stock since FY07 which translates to approximately $13M in unrealized sales tax revenues. Further, given that over time the respondents have indicated over $1M in sales/use tax savings for the 2 years both preceding and succeeding FY13 and FY14, it is likely that similar utilization occurred in those years. Considering this, the Department projects the actual total unrealized sales/use tax revenue to be more than $13M. Figure 1 below details the annual exempt purchases and sales by the companies as a whole.

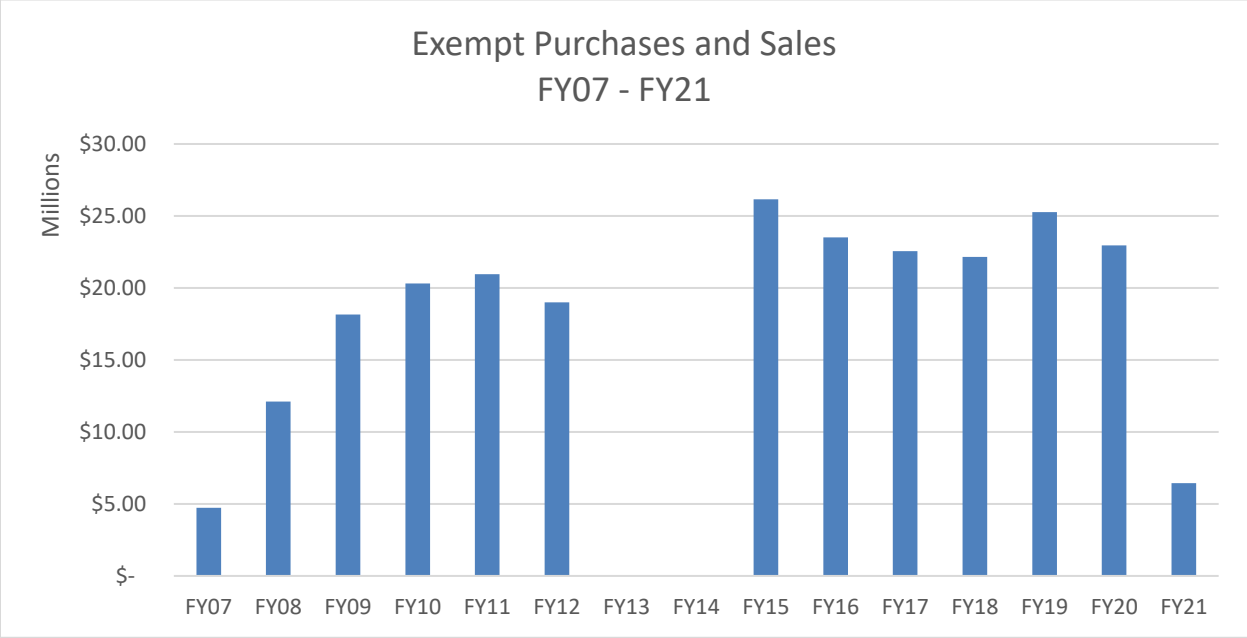

**Figure 1: Exempt Purchases and Sales, FY07 to FY21**

Unlike previous years, in FY21, the company with no employees in Wyoming engaged in the repair, assembly, alteration or improvement of railroad rolling stock reported $2.4M in exempt purchases and sales representing 36.7% of the total exemption utilization.

Figure 2, on page 4, illustrates each respondent's percentage of exempt purchases and sales as compared to total purchases and sales in FY21.

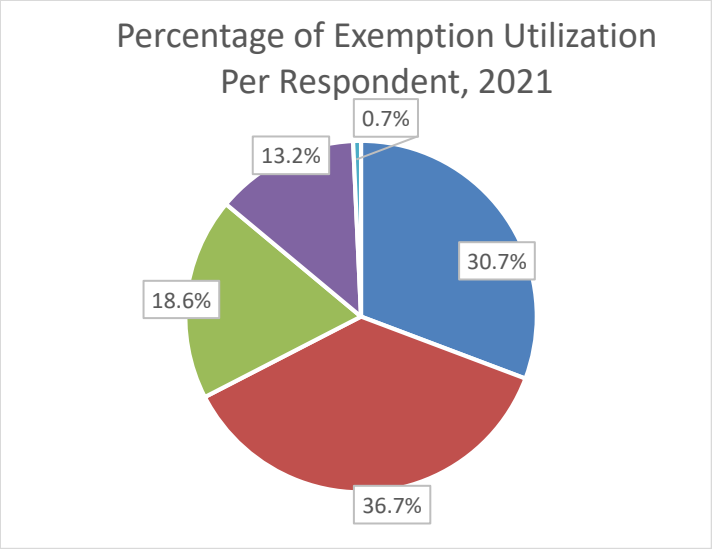

Figure 2: Percentage of Exempt Purchases and Sales by Respondent, FY21

## Employment

The number of positions available by companies engaged in the repair of railroad rolling stock has varied throughout the Department's evaluation period. In FY07, when the Department first began surveying companies engaged in the repair of railroad rolling stock, only 92 positions existed. This number peaked in FY11 with 244 positions. The sector lost 35% of those positions, ending FY12 with 158. Between FY15 through FY17 the group regained 64 of those positions, ending FY17 with 222 positions. After experiencing an employment dip in FY18 the total number of available positions reached 253 positions in FY19 and in FY20 reached a high of 348 position. FY21 showed a loss of 251 positions for a total of 97 positions. All employees were full time. Figure 3 illustrates the total reported employment year over year.

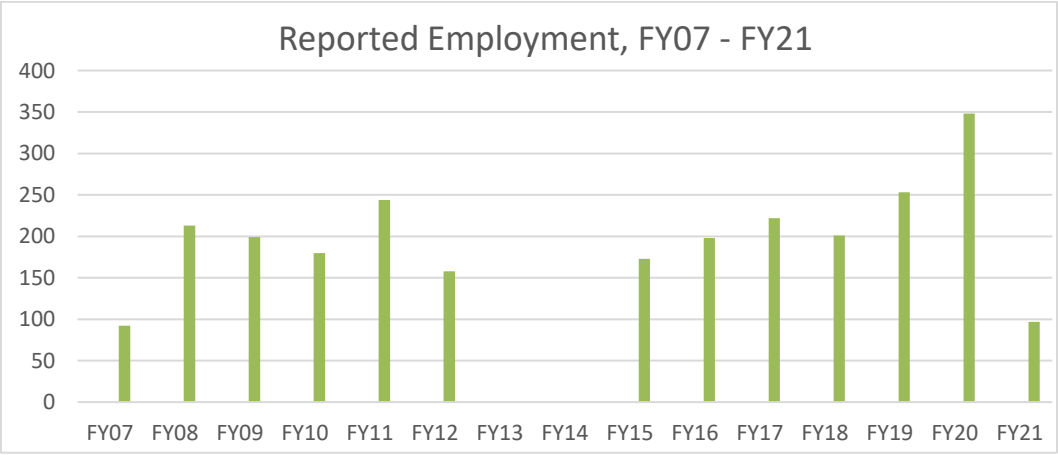

Figure 3: Reported Employment, FY07 - FY21

By occupational classification, in FY21 companies reported 42% of their workers were skilled labor with another 31% being unskilled. This accounts for 73% of the workforce and is consistent with prior years. Each of the surveyed years reported between 80% and 90% of the total workforce were skilled or unskilled labor. Over time, the percentage of skilled to unskilled has risen to and dropped but remained the majority of the workforce. Respondents have indicated there have been no customer service positions since FY11. Figure 4 details the number of employees by Occupational Classification year over year.

| | FY07 | FY08 | FY09 | FY10 | FY11 | FY12 | FY15 | FY16 | FY17 | FY18 | FY19 | FY20 | FY21 |

**Figure 5: Percentage of Employees by Occupational Classification, FY07 – FY21**

By gender, men account for 92.8% of the workforce. Of the 7 women holding positions, 3 are managerial and 4 are in an administrative services. This is comparable to last year when 11 women were employed in positions categorized within the scope of the exemption. Figure 6, on page 6, illustrates the number of men and women as segments of the total workforce.

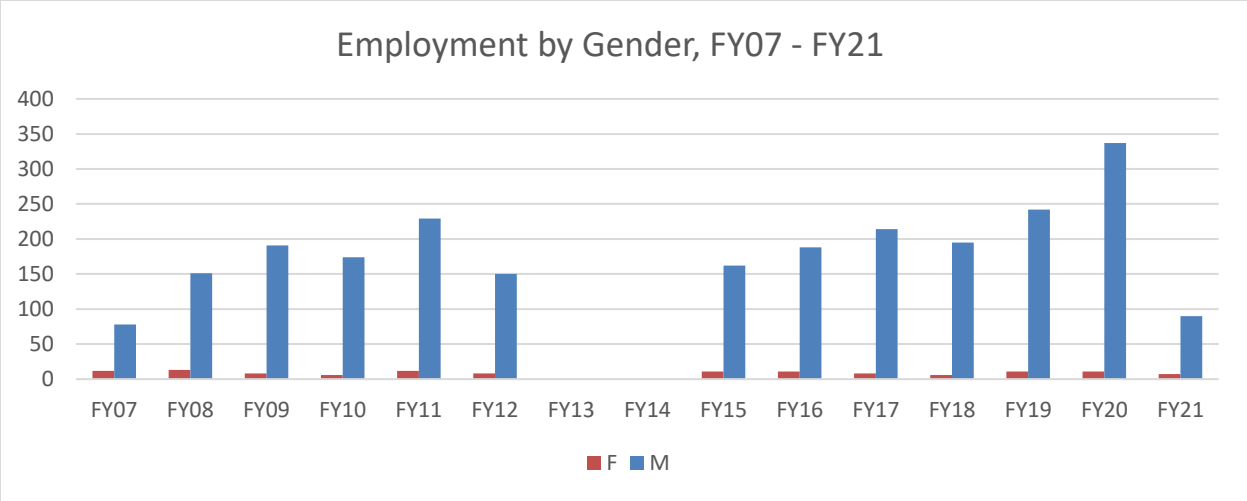

Figure 6: Employment by Gender, FY07 – FY21

## Wages

As expected, wages have fluctuated, with a generalized increase, since FY07. In that year the average wage across the industry was $13.77/hour. By FY21 average wage had increased to $45.20/hour. The total payroll expenditures for all employees increased from $9.9M in FY16 to 22.7M in FY20. Total payroll expenditures in FY21 decreased to 5.4M.

Per occupational classification wages have likewise increased over the last thirteen years. However when looking at the last four years, wages in the individual occupational classifications have not experienced much growth. In FY18 managers/supervisors earned an average wage of $33.77/hour but by FY21 this had dropped to $31.01. Administrative positions earned an average wage of $18.12/hr in FY18 increasing to $22.28 in FY20. FY21 showed a decrease in the average wage to $20.10. Skilled labor positions earned an average of $25.55/hr in FY18 increasing to $32.77/hr. in FY21. Unskilled labor showed an average wage of $20.49/hr in FY18, increased to $21.65/hr. in FY19. FY20 shows an increase to $23.73/hr. and a decrease in FY21 to $16.40/hr. Figure 7 details the average wage per occupational classification.

| | FY07 | FY08 | FY09 | FY10 | FY11 | FY12 | FY15 | FY16 | FY17 | FY18 | FY19 | FY20 | FY21 |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| *Supervisor / Manager* | $25.47 | $26.77 | $30.82 | $31.65 | $32.70 | $30.82 | $32.48 | $31.18 | $34.38 | $33.77 | $32.83 | $36.55 | $31.01 |
| *Administrative Services* | $13.65 | $12.43 | $15.52 | $16.20 | $17.28 | $17.82 | $20.28 | $21.03 | $20.90 | $18.12 | $21.70 | $22.28 | $20.10 |
| *Customer Service* | | $29.28 | $17.59 | $19.53 | $19.24 | | | | | | | | |
| *Skilled Labor* | $14.77 | $17.12 | $20.21 | $21.60 | $21.74 | $18.73 | $21.36 | $21.53 | $22.74 | $25.55 | $21.98 | $33.67 | $32.77 |
| *Unskilled Labor* | $14.89 | $14.34 | $15.30 | $15.86 | $16.70 | $17.89 | $17.24 | $19.19 | $19.90 | $20.49 | $21.65 | $23.73 | $16.40 |
| *Average* | $13.77 | $17.33 | $20.50 | $21.50 | $21.94 | $20.15 | $21.10 | $21.97 | $23.15 | $23.83 | $23.08 | $31.32 | $45.20 |

Figure 7: Average Wage per Occupational Classification, FY07 – FY21

Figure 8 illustrates the annual average wage as compared to the average wage per occupational classification per year.

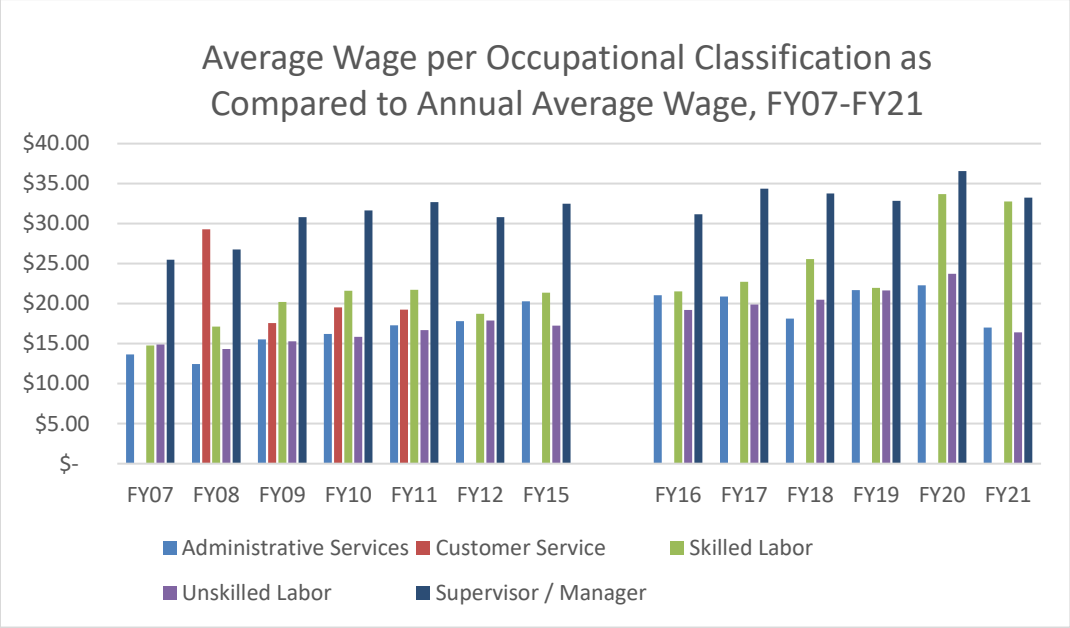

**Figure 8: Average Wage per Occupational Classification as Compared to Annual Average Wage, FY07 – FY21**

Not since FY08 have women been held positions in each occupational classification. At that time a woman's earnings were on average 64% of a man's in the same position. In FY19 this average was 71%. FY20 saw a substantial increase of women's wages to 85% compared to a man's wages in the same position and FY21 women's wages decreased to 43% compared to a man's wages in the same position. The greatest disparity in FY21 is in administrative service positions where women earn 67% compared to men. There were no women in customer service, unskilled labor or skilled labor positions in FY21. Figure 9 compares men's and women's wages by occupational classification and also provides the percentage of wage women receive as compared to men in similar positions for FY07 – FY12.

| | | FY07 | *Percent* | FY08 | *Percent* | FY09 | *Percent* | FY10 | *Percent* | FY11 | *Percent* | FY12 | *Percent* |

**Figure 10: Men and Women Wages per Occupational Classification, FY15 – FY21**

## Benefits

With regards to the benefits offered to employees, though FY15 all employers offered a full benefit package to their employees, consisting of medical insurance, dental insurance, vision insurance, prescription benefits and retirement (either in the form of a 401(k) or railroad pension program). In FY16 one employer reported they did not offer benefits of any kind to their employees. It is unknown if this employer continued this in FY17 as the company did not report to our office. However in FY18 all employers reported at least partial benefits, all offered medical insurance, dental insurance and vision insurance but only 67% offered a prescription plan or retirement. In FY21 again all employers offered medical insurance, dental insurance, vision insurance and prescription coverage but only 75% offered an employer/employee partnered retirement plan.

## Turnover

In FY07 respondents reported a total turnover rate at 10%. This was the highest reported until FY17, when it increased to 15%. In FY18 this dropped to 8.6% and even further in FY19 to 4.3%. FY20 showed an increase in turnover to 21.3% and in FY21, only four respondents provided turnover information which reflected a rise in turnover to 42.7%. FY17 through FY19, the occupational classification with the highest percentage of turnover has been skilled labor. In FY20 the turnover rate for skilled labor increased to 32.5% and FY21 shows turnover dropped to 19.7%. However, turnover for unskilled labor rose from 0% in FY19 to 50.0% in FY20, with a slight decrease in FY21 to a rate of 45%. Figure 11, on page 9, illustrates the turnover rate per occupational classification per year.

| | FY07 | FY08 | FY09 | FY10 | FY11 | FY12 | | FY15 | FY16 | FY17 | FY18 | FY19 | FY20 | FY21 | Average |

**Figure 11: Turnover Rate per Occupational Classification, FY07 – FY21**

When comparing reported turnover to the Wyoming average, traditionally employers reported a much lower turnover rate than is experienced by the Wyoming population at large. From 2007 through 2021 the Wyoming workforce has experienced an average yearly turnover rate of 42.7%. Figure 12 compares the turnover as reported by employers involved in railroad repair related services to Wyoming employers at large. The Department of Workforce Services has published the 2020 third quarter turnover rate of 43.5% for all industries. As of the writing of this report, no other turnover information has been published in order to make a comparison of turnover rates across all industries for FY21.

**Figure 12: Turnover Comparison as Compared to Wyoming Average, FY07 – FY20**

## Survey Process and Costs

All surveys were sent out electronically keeping the cost down. As a result, the primary expense associated with this report is the time spent following up with the respondents and reviewing and analyzing the data received as well as the preparation of this report. The Department estimates office personnel expended 40 to 50 hours over the course of several weeks on this endeavor.

## Wyoming Business Council Regional Project Assessment System (RPAS)

**Manufacturing sales tax incentive economic analysis**

The Department of Revenue requested this information from the Wyoming Business Council.

The Wyoming Business Council informed the Department that they have determined the RPAS component is redundant to the REMI model provided by A&I and therefore did not provide the report. Additionally, the person responsible for the RPAS report moved on to another opportunity so the Business Council is without the capability to provide the RPAS report this year.

## REMI Analyses: Economic Impacts

The analyses of the economic impacts of the sales and use tax exemptions for the sales/purchases of tangible personal property or services performed for the repair, assemble, alteration, or improvement of railroad rolling stock was prepared using the Regional Economic Models, Inc. (REMI) PI+ model. REMI PI+ is the next generation Policy Insight model built exclusively for Wyoming. It is an integrated model that combines the best features of the input-output, general equilibrium, econometric, and economic geography methodologies. PI+ is also a dynamic rather than a static model allowing for year-by-year analysis of the total regional effects of any specific policy.

The economic impact of the **removal of the sales tax exemption** for the sales/purchases of tangible personal property or services performed for the repair, assemble, alteration, or improvement of railroad rolling stock was modeled in REMI as an increase in the production costs for this repair and maintenance industry of $1.0 million per year beginning in 2020 (see Table 3). This exemption removal would result in an average annual loss of 17 jobs and a decrease in GDP of $1.4 million per year over the period of 2021 to 2030 when compared to the baseline scenario.

Other services, construction, retail trade, and accommodation & food services sectors will sustain most of the job losses. Direct job losses will be found in other services, while indirect job losses will be found in the construction sector. Retail trade and accommodation & food services, being consumption-driven industries, will see declines in employment as personal income and salaries are reduced.

## Key Definitions

**Total Employment** comprises estimates of the number of non-farm jobs, full-time plus part-time, by place of work. Full-time and part-time jobs are counted at equal weight. Includes direct, indirect, and induced jobs.

**Population** reflects mid-year estimates of people, including survivors from the previous year, births, special populations, and three types of migrants (economic, international, and retired).

**Wages and Salaries** are the monetary remuneration of employees, including the compensation of corporate officers; commissions, tips, and bonuses; voluntary employee contributions to certain deferred compensation plans, such as 401(k) plans; and receipts in kind that represent income. Wages and salaries disbursements are affected by changes in Wage Rate and Employment.

**Personal Income** is the income that is received by all persons from all sources. It is calculated as the sum of wage and salary disbursements, supplements to wages and salaries, proprietors' income with inventory valuation and capital consumption adjustments, rental income of persons with capital consumption adjustment, personal dividend income, personal interest income, and personal current transfer receipts, less contributions for government social insurance.

**Disposable Personal Income** equals personal income minus personal taxes.

**Gross Domestic Product** or **GDP** is the market value of goods and services produced by labor and property. It is often referred to as "value added" and is equal to its gross output (sales or receipts and other operating income, plus inventory change) minus its intermediate inputs (consumption of goods and services purchased from other industries or imported).

**Output** is the amount of production, including all intermediate goods purchased as well as value-added (compensation and profit). Output can also be thought of as sales or supply or simply price multiplied by quantity (P×Q).

**Sales & Use Tax Revenue** includes the state imposed 4% tax rate and local optional taxes. The tax rate of 5.3% applied in the estimation is a population weighted county average.

**Property Tax Revenue** includes taxes from residential, commercial, industrial, and agricultural properties. The tax rate of 65 mills applied in the estimation is the statewide average.

## About the REMI PI+ Model

The REMI PI+ model incorporates aspects of four major modeling approaches: **Input-Output**, **General Equilibrium**, **Econometric**, and **Economic Geography**. Each of these methodologies has distinct advantages as well as limitations when used alone. The REMI integrated modeling approach builds on the strengths of each of these approaches.

The REMI model at its core has the inter-industry relationships found in **Input-Output models**. As a result, the industry structure of a particular region is captured within the model, as well as transactions between industries. Changes that affect industry sectors that are highly interconnected to the rest of the economy will often have a greater economic impact than those for industries that are not closely linked to the regional economy.

**General Equilibrium** is reached when supply and demand are balanced. This tends to occur in the long run, as prices, production, consumption, imports, exports, and other changes occur to

stabilize the economic system. For example, if real wages in a region rise relative to the U.S., this will tend to attract economic migrants to the region until relative real wage rates equalize. The general equilibrium properties are necessary to evaluate changes such as tax policies that may have an effect on regional prices and competitiveness.

REMI is sometimes called an "**Econometric model**," as the underlying equations and responses are estimated using advanced statistical techniques. The estimates are used to quantify the structural relationships in the model. The speed of economic responses is also estimated, since different adjustment periods will result in different policy recommendations and even different economic outcomes.

The **New Economic Geography** features represent the spatial dimension of the economy. Transportation costs and accessibility are important economic determinants of interregional trade and the productivity benefits that occur due to industry clustering and labor market access. Firms benefit having access to a large, specialized labor pool and from having access to specialized intermediate inputs from supplying firms. The productivity and competitiveness benefits of labor and industry concentrations are called agglomeration economies, and are modeled in the economic geography equations.

The primary national, state, and county data source for REMI PI+ is the Bureau of Economic Analysis (BEA) State Personal Income (SPI) and Local Area Personal Income (LAPI) series (which also include employment and total population at both the state and county level). REMI also relies on numerous other data sources including the Bureau of Labor Statistics, Energy Information Administration, Center for Disease Control and Prevention, National Center for Health Statistics, and the Department of Defense. *Source: remi.com.*
